AN ILLUSTRATED DICTIONARY OF MEDICINE BIOLOGY AND ALLIED SCIENCES

GOULD

FOR INDEX OF SPECIAL TABLES AND IMPORTANT DEFINITIONS, CLASSIFYING LARGE NUMBERS OF FACTS. SEE PAGE XVI.

From The Practitioner, London.

"The language of medicine changes so quickly with the advance of knowledge that for practitioners who wish to keep fairly abreast of scientific progress a good medical dictionary is not so much a luxury as a necessity of intellectual life. Dr. George M. Gould, who is one of the leading ophthalmic surgeons in the United States, and editor of the *Medical News*, has in the work before us presented the profession with the completest lexicon of medical terminology that exists in the English language. . . . . Dr. Gould has done for our medical language what Dr. Murray is doing for the mother tongue of English-speaking peoples. It need only be added that the work is printed in a clear type that bears witness to the careful regard of the author, as an ophthalmologist, for the reader's eyes, and is 'got up' in a style sufficiently handsome to make it an ornament to the book-shelf and strong enough to withstand the wear and tear of daily use."

AN ILLUSTRATED DICTIONARY OF MEDICINE BIOLOGY AND ALLIED SCIENCES

INCLUDING THE

PRONUNCIATION, ACCENTUATION, DERIVATION, AND DEFINITION OF THE TERMS USED IN

MEDICINE, ANATOMY, SURGERY, OBSTETRICS, GYNECOLOGY, THERAPEUTICS, MATERIA MEDICA, PATHOLOGY, DERMATOLOGY, PEDIATRICS, OPHTHALMOLOGY, OTOLOGY, LARYNGOLOGY, PHYSIOLOGY, NEUROLOGY, HISTOLOGY, TOXICOLOGY, DIETETICS, LEGAL MEDICINE, PSYCHOLOGY, CLIMATOLOGY, ETC., ETC.

AND THE

VARIOUS SCIENCES CLOSELY RELATED TO MEDICINE

BACTERIOLOGY, PARASITOLOGY, MICROSCOPY, BOTANY, ZOÖLOGY, DENTISTRY, PHARMACY, CHEMISTRY, HYGIENE, ELECTRICITY, VETERINARY MEDICINE, ETC.

PREFACE.

In this work I have conscientiously endeavored to give the greatest possible amount of lexicographic and encyclopedic knowledge within the limits of a single volume, condensed as much as is consistent with clearness, and so arranged as to furnish the student and worker with concise, accurate, and useful definitions.

I have tried to satisfy the following specific desiderata:—

1. The inclusion of the many thousands of new words and terms that have been introduced into medicine during the last few years, marked as they have been by unparalleled scientific activity and progress. To this end an almost countless number of volumes and periodicals have been systematically gleaned by myself and a tireless corps of friends and assistants. Not to have met this important and pressing need would have made this volume a work of mere inexcusable compilation and copying from the many word-books already published, instead of a fresh gathering from the living literature of the day.

2. To give the most compact epitomization of the works of older and authoritative lexicographers, including all such obsolete or obsolescent terms as may be met with in the medical encyclopedias or handbooks likely to be used by a modern student.

3. To include all the more commonly-used terms of biology—a thing highly desirable; *a*. Because of the modern recognition of the great truth that general biologic science is the foundation of genuine and progressive medical science; *b*. Because the best schools of medicine are more and more urging or making obligatory the preliminary biologic course of study; and *c*. Because, so far as I know, no satisfactory lexicon of biology exists in English.

4. Keeping the size and purpose of the book well in view, to give it an encyclopedic character—not only by supplying the usual pronunciation, derivation, and definition of words, but also by showing their logical relations, their bearings, and their practical importance for the worker in literary or clinical medicine. This aim will explain a number of peculiar features, as for instance, the large number of tables, whereby at a glance one may catch the correlations of a single fact with many others, and thus at once classify and crystallize his comprehension of them. It seems deserving of mention that in modern literature there is not to be found as complete and digested a *résumé* of surgical operations, of bacteriology, of parasitology, of tests, and of many other subjects, as is here furnished.

5. When advisable, to give a pictorial illustration that would tell what words could not make clear. Hence, those who find the work helpful in this respect will thank the publishers for the generous supply of illustrations, a large number being new engravings from original drawings made expressly for this work. Conservatism in this respect, however difficult, has been the rule, because pictures, for example of surgical instruments, are plenteous and to be had for the asking, and because illustrations that are useless, or that do not illustrate, might possibly have made the book superficially more attractive, but would certainly have given ground for just criticism. Besides the large number of original illustrations first presented in this volume, many have been taken or adapted from the well-known and authoritative works of Sappey, Landois, Ziegler, Piersol, Stirling, Woodhead, Holden, Tyson, Fullerton, and others.

6. As regards orthography, to do what Professor Whitney, in the preface to his great work, *The Century Dictionary*, says is the duty of the dictionary-maker :—

> "The language is struggling toward a more consistent and phonetic spelling, and it is proper in disputed and doubtful cases to cast the influence of the dictionary in favor of this movement, both by its own usage in the body of the text, and at the head of articles by the order of forms, or by the selection of the form under which the word shall be treated."

More than this I have not attempted to do, and not to have done this much would have been distinctly wrong. The lexicographer may not impose or command, but in the interest of true and prudent progress he may suggest and advise. Both spellings are noted of words in dispute, and one is of course at liberty to accept that which he thinks best. Those who prefer to follow the older practice have against them all the best philologists, such authorities as Professor Whitney, Professor Skeat, the editors of the *Standard*, and of other great Dictionaries. Gradual, careful phonetic progress is a duty we all owe to our profession.

I have usually recommended that in medicine the diphthongs *æ* and *œ* be supplanted by *e*; such usage is already well established as regards many words, and the suggestion is in strict harmony with etymology and the spirit of the language. We do not spell such words as *gangræne*, *æther*, *œconomy*, *æternal*, *pœnalty*, *mediœval*, *solœcism*, *primœval*, as here written, and the redundant diphthong should not be retained in *diarrhœa*, *hæmorrhage*, *œdema*, *cœliotomy*, *pœdiatric*, etc. Why is the change right in one instance and wrong in the other?

In the spelling of certain chemic words, the advice of The American Association for the Advancement of Science has, as a rule, been followed, and seems to be in the line of cautious and wise progress. The unanimous acceptance and practice of all these recommendations by the American Medical Editors' Association constitute a gratifying proof of progressiveness and freedom from irrational prejudice.

7. To indicate the best pronunciation of words by the simplest and most easily understood phonetic method. The plan I have used is simple and little liable to mistaking. The syllabification has no significance except to show the pronunciation, and in this the natural English common usage and power of letters are followed. Thus, in all but a few instances, the use of diacritic marks and vexatious signs or symbols is avoided. When a vowel stands alone or at the end of a syllable it has its natural long sound : *a*, as in *male ; e*, as in *mete ; i*, as in *mile ; o*, as in *mole ; u*, as in *mule ;* when preceding, or between, consonants, the vowels have their natural short sounds, unless occasionally the use of the diacritic mark gives them the long sound, as *āt* (*ate*), *ōs* (*ose*), *īt* (*ite*). In a few instances the sign, ˘ has been used over *a*, as in *marriage*, to distinguish the sound from that of *a*, as in *harm*. When *a* has the sound of *ah*, it has generally been written *ah*. In such words as *cystotomy*, *acidity*, and the like, the pronunciation of the final vowel-sound is indicated by *e*, as being the simplest representation of the common sound not otherwise easily expressed phonetically. When *s* has the sound of *z* it is indicated by *z*. The pronunciation of some foreign words has been approximated by devices readily comprehended.

It is impossible to adequately express my deep sense of gratitude to those who have aided me in the preparation and proof-reading of this volume. Dr. C. W. Greene, the experienced philologist, also Dr. W. A. N. Dorland, Professor Charles S. Dolley, Dr. A. A. Eshner, and Professor Burt G. Wilder, have been most self-sacrificing, and to their scientific zeal, literary experience, and tireless good-will those who find the book useful will be indebted. To Dr. Dolley, the well-known biologist, belongs unstinted praise for the preparation of the definitions of biologic terms, the table of Bacteria, and that of Parasites, as well as for a number of

original drawings. Intelligence, learning, and never-failing conscientiousness have been given almost every line of the work by Drs. Dorland and Eshner. The same is true of the work of Dr. David Riesman.

It seems almost wrong to mention in a second order the names of Professor S. H. Gage, Professor Henry Leffmann, Dr. A. C. Wood, Dr. Alfred Stengel, Professor A. P. Brubaker, Dr. J. Chalmers Da Costa, Dr. A. H. Cleveland, Mr. Ryland W. Greene, Dr. J. Hendrie Lloyd, Mr. Pierre A. Fish, Dr. D. Bevan, Dr. Emma Billstein, Dr. S. McClintock Hamill, Dr. A. H. Stewart, and others.

Every author well knows, or perhaps regrets that he does not know, the blessing of a publisher and of a printer who take pride in their work above and beyond the question of dollars and cents. Such a publisher and such a printer I have had.

The acceptability of the smaller dictionaries I have offered the profession (something like twenty-five thousand copies having been distributed) leads me to hope that the present more complete work will find a wider range of usefulness.

PHILADELPHIA, *April, 1894.*

PREFACE TO THE THIRD EDITION.

The rapid exhaustion of the first and second editions of this dictionary permits me to correct a number of typographic and other errors, to modify some definitions, and to add new material throughout the entire extent of the book. I have profited by the kind criticisms of friends and of reviewers, and such suggestions as seemed to me just have been accepted and embodied in the work. In science, and especially in the science of medicine, what was true yesterday may be only half-true to-day, and may even be wholly untrue to-morrow. Old knowledge is constantly undergoing modification, and new knowledge is as constantly appearing, so that it is only by constant changes that a book seeking to reflect the condition and growth of a science can from day to day remain a perfect mirror of its progress.

The most outspoken words of praise in reviews, notices, private letters, etc., as also the exhaustion in so short a time of two large editions, give evidence that the volume has found a certain field of usefulness, and, personally, nothing can be more gratifying than the assurance that one has been of distinct service to his profession and to his fellows.

PHILADELPHIA, *September, 1895.*

PREFACE TO THE FIFTH EDITION.

In the present fifth edition I have endeavored to reduce the remaining inaccuracies to a minimum. I have also added the more important of the new terms in medicine which have come into use since the issue of the fourth edition. The changes in the text number altogether about four hundred.

GEORGE M. GOULD.

PHILADELPHIA, *March, 1900.*

ABBREVIATIONS.

ABBREVIATIONS USED IN GENERAL MEDICINE.

āā	ana	Of each.
A. c.	Ante cibum	Before meals.
Abdom.	Abdomen	The belly.
Abs. feb.	Absente febre	When fever is absent
Abstr.	Abstractum	Abstract.
Ad.	Adde	Add.
Ad lib.	Ad libitum	At pleasure, as desired.
Admov.	Admoveatur	Let it be applied.
Ad pond. om.	Ad pondus omnium	To the weight of the whole.
Adv.	Adversum	Against.
Aggred. feb.	Aggrediente febre	While fever is coming on.
Al.	Aluminum	Aluminum.
Alt. dieb.	Alternis diebus	Every other day.
Alt. hor.	Alternis horis	Every other hour.
Alv. adstrict.	Alvo adstricta	The bowels being confined.
Alv. deject.	Alvi dejectiones	The intestinal evacuations.
Anat.		Anatomy.
Aq.	Aqua	Water.
Aq. astr.	Aqua astricta	Ice.
Aq. bull.	Aqua bulliens	Boiling water.
Aq. com.	Aqua communis	Common water.
Aq. dest.	Aqua destillata	Distilled water.
Aq. ferv.	Aqua fervens	Hot water.
Aq. font.	Aqua fontana	Spring water.
Aq. mar.	Aqua marina	Ocean water.
Aq. pur.	Aqua pura	Pure water.
As.		Arsenic.
At. wt.		Atomic weight.
Av.		Avoirdupois.
B.		Boron, Bowels.
Ba.		Barium.
B. A., or B. S.	Balneum arenæ	Sand bath.
Bals.	Balsamum	Balsam.
Be.		Beryllium.
Bi.		Bismuth.
Bib.	Bibe	Drink.
Biol.		Biology.
B. i. d.	Bis in die	Twice daily.
B. M.	Balneum maris	Sea-water bath.
Bol.	Bolus	A large pill.
B. p.		Boiling-point.
Br.		Bromin.
Bull.	Bulliat	Let it boil.
B. v.	Balneum vaporis	Vapor bath.
C.	Congius, Centigrade	Carbon; Cubic; A gallon; Centigrade.
Ca.		Caicium.
Cap.	Capiat	Let him take.
c.c.		Cubic centimeter.
Cd.		Cadmium.
Ce.		Cerium.
Cel.		Celsius.
Cent.		Centigrade.
Cg.		Centigram.
C. m.	Cras mane	To-morrow morning.
cm.		Centimeter
C. m. s.	Cras mane sumendus	To be taken to-morrow morning.
C. n.	Cras nocte	To-morrow night.
Co.		Cobalt.
Cochl.	Cochleare	Spoonful.
Cochl. ampl.	" amplum	A tablespoonful.
" infant.	" infantis	A teaspoonful.
" mag.	" magnum	A tablespoonful.
" med.	" medium	A dessertspoonful.
" parv.	" parvum	A teaspoonful.
Col.	Cola	Strain.
Colat.	Colatus	Strained.
Colet.	Coletur	Let it be strained.
Color.	Coloretur	Let it be colored.
Comp.	Compositus	Compound.
Cong.	Congius	A gallon.
Cons.	Conserva	Keep.
Contin.	Continuatur	Let it be continued.
Cont. rem.	Continuetur remedium	Let the medicine be continued.
Coq.	Coque	Boil.
Cort.	Cortex	Bark.
Crast.	Crastinus	For to-morrow.
Crys.		Crystal.
Cs.		Cesium.
Cu.	Cuprum	Copper.
Cuj.	Cujus	Of which.
C. v.	Cras vespere	To-morrow evening.
Cyath.	Cyathus	A glassful.
D.	Dosis; Da	A dose; Give.
Decub.	Decubitus	Lying down.
De d. in d.	De die in diem	From day to day.
Deg.		Degree; degeneration.
De R.		Reaction of degeneration.
Destil.	Destilla	Distil.
Det.	Detur	Let it be given.
Dieb. alt.	Diebus alternis	On alternate days.
" tert.	" tertiis	Every third day.
Dil.	Dilue	Let it be dissolved.
Dilut.	Dilutus	Dilute.
Dim.	Dimidius	One-half.
Dist.	Distilla	Distil.
Div.	Divide	Divide.
D. in p. æq.	Divide in partes æquales	Divide into equal parts.
Donec alv. sol. fuerit,	Donec alvus soluta fuerit	Until the bowels are opened.
D. P.	Directione propria	With a proper direction.
E.		Erbium.
Eb.		Erbium.
E.-j		Elbow-jerk.
Ejusd.	Ejusdem	Of the same.
Elec.	Electuarium	An electuary; Electricity.
Emb.		Embryology.
Enem.		Enema.
Er.		Erbium.
Exhib.	Exhibeatur	Let it be given.
Ext.	Extractum	Extract.
F.		Fahrenheit; Fluorin.
Far.		Faradic.
Fe.	Ferrum	Iron.
Feb. dur.	Febre durante	The fever continuing.
F., Ft.	Fac, Fiat	Make.
Filt.	Filtra	Filter.
Fld.	Fluidus	Fluid.
Flor.	Flores	Flowers.
F. m.	Fiat mistura	Make a mixture.
Fol.	Folia	Leaves.
F. p.	Fiat potio	Make a potion.
F. pil.	Fiat pilula	Make a pill.
F. s. a.	Fiat secundum artem	Prepare skilfully.
Galv.		Galvanic.
Gl.		Glucinum.
Gm.		Gram.
Gr.	Granum	Grain.
Gtt.	Guttæ	Drops.
Guttat.	Guttatim	By drops.
H.		Hydrogen.
Hg.	Hydrargyrum	Mercury.
Hl.		Hectoliter.
Hm.		Hectometer.
Hor. decub.	Hora decubitus	At bed-time.
H. s.	Hora somni	At bed-time.
I.	Iodum	Iodin.
In.		Indium.
In d.	In die	Daily.
Inf.	Infunde	Pour in.
Inj.	Injectio	An injection.
Ir.		Iridium.
K.	Kalium	Potassium.
K.-j.		Knee-jerk.
Kl.		Kiloliter.
Km.		Kilometer.
L.		Liter.
Li.		Lithium.
Liq.		Liquor.
M.	Meridies; Misce	Noon; Mix.
Mac.	Macera	Macerate.
Mass. pil.	Massa pilularum	Pill-mass.

M. ft.	Mistura fiat	Let a mixture be made.
Mg.	Magnesium; Milligram.	
Ml.	Milliliter.	
Mm.	Millimeter.	
Mod. prescript	Modo præscripto	In the manner directed.
Mol. wt.	Molecular weight.	
Mor. sol.	More solito	In the usual way.
Muc.	Mucilago	Mucilage.
Myg.	Myriagram.	
Myl.	Myrialiter.	
Mym.	Myriameter.	
N.	Nitrogen.	
Na.	Natrium	Sodium.
Ni.	Nickel.	
No.	Numero	Number.
Noct.	Nocte	By night.
O.	Octarius	A pint.
Ol.	Oleum	Oil.
Ol. oliv.	Oleum olivæ	Olive-oil.
Ol.-res.	Oleoresina	Oleoresin.
O. m.	Omni mane	Every morning.
Omn. bih.	Omni bihora	Every two hours
Omn. hor.	Omni hora	Every hour.
Omn. noct.	Omni nocte	Every night.
Os.	Osmium.	
Ov.	Ovum	An egg.
Oz.	Uncia	Ounce.
P.	Phosphorus, Pulse.	
Part. æq.	Partes æquales	Equal parts.
Pb.	Plumbum	Lead.
P. c.	Post cibum	After meals.
P. C.	Pondus civile	Avoirdupois weight.
Pd.	Palladium.	
Phar.	Pharmacopeia.	
Pil.	Pilula	Pill.
Pocul.	Poculum	A cup.
Pond.	Pondere	By weight.
Pot.	Potio	Potion; potassa.
Ppt.	Preparata	Precipitate; Prepared.
P. rat. ætat	Pro rata ætatis	In proportion to age.
P. r. n.	Pro re nata	When required.
Pt.	Pint.	
Pulv.	Pulvis	Powder.
Q. d.	Quater in die	Four times a day.
Q. l.	Quantum libet	According as required.
Q. p.	Quantum placeat	At will.
Q. s.	" sufficit	A sufficient quantity.
Qt.	Quart.	
Q. v.	Quantum vis	As much as you wish.
R.	Reaumur's thermometer, Respiration.	
℞.	Recipe	Take.
Rad.	Radix	Root.
Rb.	Rubidium.	
R. D.	Reaction of degeneration.	
Rect.	Rectificatus	Rectified.
Rep.	Repetatur	Let it be repeated.
S.	Semis	Half; Sulphur.
S.	Signa	Label.
S. a.	Secundum artem	According to art.
Sb.	Stibium	Antimony.
Scr.	Scrupulum	Scruple.
Sig.	Signetur	Let it be labeled.
Sig. n. pr.	Signa nomine proprio	Label with common name.
Sing.	Singulorum	Of each.
Si non val.	Si non valeat	If it does not answer.
Si op. sit	Si opus sit	If requisite.
Solv.	Solve	Dissolve.
Sp., or Spir.	Spiritus	Spirit.
Sp. gr.	Specific gravity.	
Ss.	Semi, semissis	One-half.
St.	Stet	Let it stand.
Su.	Sumat	Let him take.
S. v.	Spiritus vini	Alcoholic spirit.
S. v. r.	Spiritus vini rectificatus	Rectified spirit of wine.
S. v. t.	Spiritus vini tenuis	Dilute alcohol, proof-spirit.
Syr.	Syrupus	Syrup.
T.	Temperature.	
T. d.	Ter in die	Three times a day.
Tr., Tinct.	Tinctura	Tincture.
Ung.	Unguentum	Ointment.
Ur.	Urine.	
Vesic.	Vesicatorium	A blister.
Wt.	Weight.	
V. s. b.	Venesectio brachii	Bleeding from the arm.
♏.	Minimum	Minim.
ʒ.	Drachma	Dram.
℈.	Scrupulum	Scruple.
℥.	Uncia	Ounce.

ABBREVIATIONS THAT SHOULD ONLY BE USED UNDER HEADINGS, OR WITH A CONTEXT, RENDERING THE MEANING OBVIOUS.—*Ewart.*

Names of Diseases.

Bctasis	Bronchiectasis.
Brhea	Bronchorrhea.
Btis	Bronchitis.
G. K.	Granular Kidney.
G. P.	General Paralysis.
Phth., or $\phi\theta$, or ϕ.	Phthisis.
Pna	Pneumonia.
Pnx	Pneumothorax.
Rhc F.	Rheumatic Fever.
Rhsm	Rheumatism.
Sct F.	Scarlet Fever.
Syph., or $\sigma\upsilon\phi$.	Syphilis.

Names of Regions or Organs.

Clavr	Clavicular.
I. C. F.	Infraclavicular Fossa.
Infrascr	Infrascapular.
Interscr	Interscapular.
Mamy	Mammary.

K. C. . . . . Kathodal Closing.
K. C. C. . . . . Kathodal Closing Contraction.
K. C. T. . . . . Kathodal Closing Tetanus.
K. D. . . . . Kathodal Duration (or Period of Closure of Circuit).
K. D. C. . . . . Kathodal Duration Contraction.
K. D. T. . . . . Kathodal Duration Tetanus.
K. W. . . . . Kilo-watt.
L. . . . . Inductance (Coefficient of); Length.
M. . . . . Strength of Pole.
Ma. . . . . Milliampère.
Mfd. . . . . Microfarad.
N. . . . . North Pole.
O. . . . . Opening of Circuit.
P. D. . . . . Potential Difference.
Q. . . . . Electric Quantity.
R. . . . . Ohmic Resistance.
S. . . . . South Pole.
T. . . . . Time.
Te. . . . . Tetanic Contraction.
U. . . . . Unit.
V. . . . . Volume; Velocity.
v. . . . . Volt.
V. A. . . . . Voltaic Alternative.
V. M. . . . . Volt-meter.
W. . . . . Work; Weight; Watt.
Z. . . . . Contraction (Zuckung).
Z. Z.′ Z.″ . . . . . Increasing Strengths of Contraction.
κ . . . . . Magnetic Susceptibility.
μ . . . . . Magnetic Permeability.
ω . . . . . Ohm.
ρ . . . . . Specific Resistance.
Ω . . . . . Megohm (one-millionth part of an ohm).
⊣⊢ . . . . . Battery.
+ . . . . . Anode or Positive Pole.
— . . . . . Kathode or Negative Pole.
> . . . . . Greater than, as K > A.
< . . . . . Less than.

PREFIXES AND SUFFIXES USED IN CHEMISTRY.

Am- indicates the group NH_2.
Azo-, diazo-, and **hydrazo-** indicate compounds in which nitrogen atoms are linked in various ways.
Di- is applied as a prefix to signify *two*.
Im- indicates the group NH.
Ket- indicates the molecule CO in certain structural relations.
Mon- is employed as a prefix to signify *one*.
Nitro- indicates the group NO_2.
Pent- is applied as a prefix to signify *five*.
per- denotes in a rather vague sense an indefinitely large amount of the body to which it is prefixed, or to which it is referred.
Sesqui- indicates the proportion of *two* to *three*.
Sub- is employed in a rather vague sense to indicate deficiency of the body to which it is prefixed.
Tetr- is applied as a prefix to signify *four*.
Thio- indicates sulphur, especially replacing oxygen.
Tri- (sometimes "*ter-*") is applied as a prefix to signify *three*.
-al indicates aldehydic structure.
-an is applied to a class of bodies related to the starch and sugar group.
-ane indicates a saturated hydrocarbon.
-ase indicates an enzyme, or non-organized ferment, *e.g.*, diastase. This termination is at present restricted generally to enzymes of vegetable origin, but it should also be used with animal enzymes—which, however, usually end in "in." It would thus be better to say *pepsase* and *trypsase*, rather than *pepsin* and *trypsin*.
-ate. A suffix to nouns in chemistry signifying any salt formed by an acid acting on a base; *e. g.*, *sulphate*, *phosphate*.
-ic denotes the higher of two valencies assumed by an element, and incidentally in many cases a larger amount of oxygen.
-in is of no precise significance, and is mostly applied to bodies the structure of which is not yet known.
-yl, -ene, -enyl, and **-ine** indicate hydrocarbons. According to the American system of orthography, the only case in which "*ine*" is used is as a termination for a series of hydrocarbons, beginning with Ethine, C_2H_2. English writers and some American chemists use it to signify basic properties, regarding *-in* as the proper term for non-basic bodies. They thus distinguish between salicin, which forms no salts with acids, and morphin (which under such system is spelled "morphine"), which does. It must be noted that such methods are not in accordance with the tendency of modern chemic nomenclature, which seeks to express structure, not properties. The organic bases

or alkaloids are not all of the same type, and when their structure is elucidated systematic names will be found for them. Until then there is no particular gain in indicating them as a group.

-id is similar to "in."

-ol indicates alcoholic structure, *i. e.*, presence of the group HO (hydroxyl), *e. g.*, alcohol, glycerol, phenol.

-one is applied to bodies related to the starches and sugars. It is, however, not used with this significance in "peptone," which word is not formed according to any established system.

-ose indicates a carbohydrate, *e. g.*, glucose, although it is also occasionally applied to the results of digestion of proteids, *e. g.*, albumose.

-ous denotes the lower of two degrees of valency assumed by an element and incidentally indicates, in many cases, a small amount of oxygen.

The word *sulphonic* indicates the group HSO_3.

SIGNS ABBREVIATIONS, ETC., USED IN DESCRIPTIVE ZOÖLOGY AND BOTANY.

o	Feet.
′	Inches.
″	Lines; each one-twelfth of an inch, or about two millimeters.
!	A mark of affirmation or authentication.
?	A mark of doubt.
-	Figures or words separated by a short dash indicate the extremes of variation, as 5–10″ long, few–many flowered; *i. e.*, varying from 5 to 10 lines in length, and with few to many flowers.
c.c.	Cubic centimeter.
cm.	Centimeter.
mm.	Millimeter.
μ	The Micron, Micromillimeter, or unit of Microscopic Measurement. For convenience of reference, the following table of comparative measurements is given:—

μ	*Inches.*	μ	*Inches.*	*Inches.*	μ
1.	.000039	6.	.000236	$\frac{1}{10000}$	2.5399
2.	.000079	7.	.000276	$\frac{1}{1000}$	25.3997
3.	.000118	8.	.000315	$\frac{1}{100}$	253.9972
4.	.000157	9.	.000354		
5.	.000197	10.	.000394	**One Meter.**	39.370432 in.

x	Used to express magnification, thus × 1000 indicates a magnification of 1000 diameters. The improper fraction $\frac{1000}{1}$ indicates the same thing, but is rarely used.
①	An annual Herb.
②	A biennial Herb.
♃	A perennial Herb.
♄	An Undershrub, deciduous.
♄	An Undershrub, evergreen.
♄	A Shrub, deciduous.
♄	A Shrub, evergreen.
♄	A Tree, deciduous.
♄	A Tree, evergreen.
♄	An herbaceous Vine, annual or biennial.
♄	A woody Vine, deciduous.
♄	A woody Vine, evergreen.
♄	A trailing Herb, annual or biennial.
♄	A trailing Herb, perennial.
♒	An aquatic plant.
☿	Flowers perfect.

♂ . . . . . A male animal, or a plant or flower bearing only stamens or antheridia.
♀ . . . . . A female animal or a plant or flower bearing only pistils or archegonia.
○ . . . . . A young animal of undetermined sex, thus ♂o, young male, or ♀yg for young female, but ○*juv* (*juvenis*, young).
⊙ . . . . . A monocarpic plant.
○– . . . . . Cotyledons accumbent.
○| . . . . . Cotyledons incumbent.
♀ . . . . . A plant introduced and naturalized.
† . . . . . A plant cultivated for ornament.
† . . . . . A plant cultivated for use.
8 . . . . . Monecious.
♂♀ . . . . . Diecious.
♂♀☿ . . . . . Polygamus.
0 . . . . . Wanting or none.
∞ . . . . . Numerous or indefinite; more than twenty when applied to stamens.
σ . . . . . The microsecond represents .001 second or the unit of time in experiments or psychophysic reactions.

Authors' names are abbreviated in the following Manner:—
Ait., Aiton. **Bech.**, Bechstein. **Cham.**, Chamisso. **Dum.**, Duméril, etc.

Nupt, signifies in ornithology, breeding plumage.
hornot, means a bird of the year.
-aceæ, a suffix used in botany to designate a family, the name chosen being one of the principal genera. Ex., *Rosa*, *Rosaceæ*, *Ranunculus*, *Ranunculaceæ*. Cf., *iceæ*, *ideæ*, *ineæ*, *eæ*.
-ana, preferably used as a suffix to the name of a species around which others naturally cluster, in the naming of subsections or groups of species; *e. g.*, the group of species of *Helix* related to *H. pomatia* may be indicated by the term *Pomatiana*.
-ensis, a termination given to the names of species only when derived from the name of their habitat; *e. g.*, *Tænia madagascariensis*, *Daphne chinensis*, *Dracæna brasiliensis*.
Eu-, employed as a prefix in forming the names of genera, subgenera, or sections of genera before a Greek derivative.
Excl. gen., exclusit genus.
Excl. sps., exclusit species.
Excl. var., exclusit varietas, when following an onym, indicates that the group has undergone revision, and the name does not cover the original ground to the extent indicated.
-ia, **-ius**, **-ica**, **-icus**, **-ina**, **-inus**, **-ita**, **-itus**, terminations used in making specific names which are derived from the name of a river or other body of water, a province, a country, or a kingdom; *e. g.*, *arabicus*.
-iceæ, **-ideæ**, **-ineæ**, suffixes used in botany to designate a family when the name taken ends in Latin *-ix* or *-is* (genitive *icis*, *idis*, *iscis*); *e. g.*, *Salicineæ* from *Salix*, *Berberideæ* from *Berberis*, *Tamariscineæ* from *Tamarix*.
-eæ, as a rule, these suffixes, together with *eæ*, are employed to designate botanic sub-families, tribes, and sub-tribes; *e. g.*, *Roseæ* from *Rosa*.
-idæ, **-inæ**, the suffixes added to the name of the earliest known or most characteristic genus, to designate zoölogic families or sub-families; *e. g.*, *Strix*, *Strigis*, *Strigidæ*, *Bucerotis*, *Bucerotidæ*.
-ites, **-itis**, frequently employed to designate fossil organisms analogous to the living form whose generic name is the radical to which *ites* is appended. They are rarely used with specific names.
Mutatis char., *mutatis characteris*, when following a specific name signifies a change in the diagnostic characters of a species.
-astrum, **-oidea** or **-oides**, **-oidalis**, **-oideum**, **-opsis**, terminations employed in forming generic, sub-generic, or specific names after a Greek derivative. Bourguinat suggests that *astrum* be reserved to be appended to the name of a genus to indicate its typical sub-division. *Opsis* and *oides* should be reserved for sub-divisions of a genus which resemble another genus, by adding them to the name of that other genus when it is of Greek origin.
-oides is preferably reserved for specific names of Greek or barbarous (never Latin) origin.
(a) When the radical of the specific name is the name of a genus which it resembles, *e. g.*, *Salix myrtilloides*, *Bupleurum ranunculoides*, *Malva abutiloides*, *Thuja cupressoides*.
(b) When the radical is the name of another species which the new one resembles. *Helix caracaloides*, a species like *H. caracalensis*.
(c) When the radical of the specific name is a Greek word signifying an animal, organ, part, object, as *Potentilla arachnoidea*, *Prenanthes deltoidea*. *Jungermannia zoöpsis*, *icthyoides*, *rhomboidale*, *pterigoideus*, *paraboloides*, *dendroideus*.
Only one apparent exception to the compounding of Greek and Latin has been consecrated by usage; viz.: *ovoides* from *ovum* and εἶδος; this has arisen from the absence of euphony in the correct form, ooides (ᾠόν, and εἶδος).
pro-parte, for a part, when following a specific name indicates that since its first application the group has been revised.
Pseudo-, a prefix employed in forming specific names before a Greek derivative.
-pteris, a termination frequently employed in the generic names of ferns, for the purpose of recalling the affinities of the genus.
sp. (1) In zoölogy, abbreviation of species, written when the specific name is not known or is wanting, or if placed after the name of the authority, as *Crania craniolaris*, Linné sp., indicates that Linné is only to be credited with the specific name.
(2) In botany, species or specimen.
Sub-, a prefix employed in forming specific names before a Latin derivative. It may also be used in designating a new species before the name of another with which the first was in intimate relation. It is also used in the sense of *nearly*, *less*, *somewhat*, *slightly*. It has, moreover, a few legitimate Latin compounds which may be used for specific names; *e. g.*, *subterraneus*, *subalpinus-a-um*, *subcurrens*, *subcutaneus*, *subdimidiatus*, *subjectus*, *submersus*, *subrotundus*, *substratus*.
Sub-sp., subspecies.
gen., genus.
var., variety, placed before the name of a plant or animal indicates that it is a hybrid of doubtful origin.

PREFIXES AND SUFFIXES USED IN MEDICAL TERMS.

PREFIXES.

A-, an-, called *alpha privative* (Gr. *α, αν,* or *αμ*), the equivalent of our prefix, *un-*, or *in-*, denotes an absence or want of the thing or quality expressed by the principal; *e. g., adynamia, anaërobic, aphasia, apraxia, apyrexia, astigmatism, atony,* etc. *a* is used before consonants, *an* before vowels, and, rarely, *am* before *bl* or *br*. (To be distinguished from *ana*.)

Ad- (ad), to, at, toward, as, *adduction, adhesion.* The *d* is often changed in the compound to correspond to the next letter, as *accretion, appendix.*

Al- (Arab.) article *the*; *e. g., alchemy,* the secret art; *alcohol,* the very subtle.

Amphi- (or **amph-**) (ἀμφί), upon both sides, in two ways, as in *amphiarthrosis, amphibia,* etc.

Ana- (ἀνά). Up, through, again; *e. g., anabolism, anasarca, analomy,* etc.

Anti- (or **ant-**) (ἀντί). Against, opposed to, opposite of; as *antaphrodisiac, antibrachium, antipyretic, antiseptic,* etc.

Apo- (ἀπό). Off, away, upon; *e. g., aponeurosis, apoplexy,* etc.

Auto- (αὐτός). Self; as *autopepsia, autopsy.*

Bary- (βαρύς). Heavy, difficult; as *barymezia, baryphonia,* etc.

Bi-, bin- (bis). Twice, twofold; *e. g., bicuspid, bivalent, binocular, binaural.*

Bio- (βίος). Life, *e. g., bioplasm, biology, biolysis.*

Brach- (βραχίων). Arm, pertaining to the arm; as *brachialgia, brachioncus.*

Broncho- (βρόγχος). Pertaining to the trachea; as *bronchorrhagia, bronchotomy.*

Cardi-, cardio- (καρδία). Pertaining to the heart, as *cardiogram, cardialgia.*

Celio-, cœlio- (κοιλία). Pertaining to the belly, as *celiotomy, cœliac.*

Chiro- (χείρ). The hand. *Chiragra, chiropodist.*

Co-, con-. Together, along with; *e. g., coitus, congenital.*

Dacryo- (δάκρυον). A tear, pertaining to a tear; as *dacryoid, dacryo-cystitis.*

Dactyl- (δάκτυλος). A finger; pertaining to the fingers; as *dactylitis, dactylion, dactylate.*

Dermo-, dermato- (δέρμα). The skin; pertaining to the skin; *e. g., dermotomy, dermatolysis.*

Di- (δίς). Twice, double; as *dimorphism, digastric.*

Dia- (διά). Through. Examples: *diabetes, diagnosis, diaphragm, diarrhea,* etc.

Dyn- (δύναμις). Force, power; *dynamogeny, dynamograph.*

Dys- (δυς). Difficult, defective, painful; *e. g., dysentery, dyspnea, dysuria.*

Ec-, ex-, ecto- (ἐκ, ἐξ, ἐκτός). Out, outside, away from; as in *ecchymoses, ecdemic, eclampsia, exostosis, exanthema, ectropion, ectoderm.*

En-, em- (ἐν, ἐμ). In, within; as in *embryo, embolism, endemic,* etc.

Endo-, ento- (ἐντός). Within, internal; *e. g., endarteritis, endoscope, entoblast, entoplic.*

Entero- (ἔντερον). The intestine; as in *enterocele, enterostomy,* etc.

Epi- (ἐμί). Upon, over, above; *e. g., epiblast, epicranium, epistaxis, epidemic,* etc.

Extra- (*Lat.*). Outside; *e. g., extravasation, extroversion.*

Galact- (γάλα). Milk; as *galactocele, galactozemia, galacturia.*

Gastro- (γαστήρ). The stomach; relation to the stomach; *e. g., gastrocele, gastrocnemius, gastroenterostomy,* etc.

Genio- (γενείον). Pertaining to the chin; *e. g., geniohyoglossus, geniohyoid.*

Glosso- (γλῶσσα). Pertaining to the tongue. See *glossology, glossoplegia, glossophytia.*

Hæma-, hæmato- or **hemo-** (αἷμα). The blood; pertaining to the blood. See *hematemesis, hematoma, hemorrhage,* etc.

Hemi- (ἡμι-ἥμισυς). Half; as in *hemiachromatopsia, hemicrania, hemiplegia.*

Hepat- (ἧπαρ). The liver; pertaining to the liver. See *hepatemphraxis, hepatization, hepatopostema.*

Hetera- (ἕτερος). Different; opposite; *e. g., heteroinfection, heterologous, heteropathy.*

Hydro-, hydr- (ὕδωρ). Water; resembling or relating to water, dropsy, etc.; as in *hydremia, hydragogue, hydrate, hydrocephalus,* etc.

Hyper- (ὑπερ). Excess; exaggerated abnormality in amount, size, quality, etc. See *hyperesthesia, hypermetropia, hyperpyrexia, hypertrophy,* and others

Hypno- (ὕπνος). Sleep. See *hypnopathy, hypnotism*

Hypo- (ὑπό). Diminution as to degree, amount, size, quality, etc., or that located under or beneath; *e. g., hyposthenia, hypoblast, hypochondriac, hypodermatic, hypoglossal.*

Hystera-, hystero- (ὑστέρα). The uterus or womb; relation to the uterus; *e. g., hysterectomy, hystero-epilepsy, hysteropexia,* etc

Ileo- (*Ileum*). Pertaining to the ileum; *e. g., ileo-colitis, ileotyphus.*

Ilio- (*Ilium*). Pertaining to the ilium; *e. g., ilio femoral, iliolumbar.*

Im-, in- (*In*). Privative, negative; as *imperforate, incarceration, insane, incontinence.*

In- (εν). In, within, upon, by; as *incubation, infarction, inflammation, inoculation,* etc.

Infra- (*Infra*). Beneath, below; *e. g., inframaxillary, infrascapular.*

Inter- (*Inter*). Between. See *intercellular, intercostal, intertrigo,* and others.

Intra- (*Intra*). Within, inside of, as *intra-articular, intrauterine.*

Iso- (ἴσος). Equal, like; *e. g., isometric, isothermal, isopathy.*

Kata-, kath- (κατά). Down, through; as *katabolism, katatonia, kathode.*

Leuko- (λευκός). Whiteness; *e. g., leukemia, leukocyte, leukomain, leukorrhea.*

Lith-, litho- (λιθος). Pertaining to stone, calculus, or lithic acid. See *lithemia, lithiasis, lithotripsy,* etc.

Macro- (μακρός). Largeness, hypertrophy; as in *macroglossia, macromelia.*

Mal- (*Malus*). Bad; as *malformation, malpractice, malaria*

Melano- (μέλας). Blackness, pigmentation; *e. g., melancholia, melano-sarcoma.*

Meso- (μέσος). The middle; *e. g., mesoblast, mesocolon,* etc.

Meta- (μετά). With, after; *e. g., metabolism, metatarsus.*

Micro- (μικρός). Smallness; *e. g., micrococcus, microglossia, microscope.*

Mon-, mono- (μόνος). Singleness. For example, *monamin, monomania, monorchis.*

Morpho- (μορφή). Shape, form; *e. g., morphography, morphology, morphometry.*

Multi- (*multus*). Number, many; *e. g., multilocular, multiparous.*

Myelo- (μυελός). Referring to the brain or spinal cord; as *myeloid, myelitis.*

Myo- (μῦς). Pertaining to a muscle or to muscularity. See *myocarditis, myoma, myopathy.*

Neo- (νέος). New, recent, young; as *neogala, neo-membrane, neoplasm.*

Nephr- (νεφρος). Pertaining to the kidney; *e. g., nephrapostasis, nephria, nephritis.*

Neuro- (νεῦρον). Relating to a nerve or to neurology. In the original Greek the word meant a cord or tendon,—*neurosis,* the stringing of the bow. It is now applied only to nerve-structure; as, *e. g., neuralgia, neurasthenia, neurilemma, neuroglia.*

Ob- (*Ob*). In front of, against, denoting hindrance or obstruction; *e. g., obstruent, obturator, occlusion, opponens.*

Odonto- (ὀδούς). Of the teeth; as *odontology, odontalgia.*

Oligo- (ὀλίγος). Fewness or lack of, as *oligocythemia.*

Ophthalmo- (ὀφθαλμός). Pertaining to the eye, as *ophthalmia, ophthalmoplegia.*

Ortho- (ορθός). Straight, upright, correct. See *orthoscope, orthopedia, orthopraxis.*

Osteo- (ὀστεον). Referring to bone. See *osteoblast, osteomyelitis, osteoplastic.*

Oto- (οὖς). Pertaining to the ear, as *otorrhea, otophone.*

Oxy- (ὀξυς). Denoting the presence of oxygen, or acidity; as *oxygen, oxyhemoglobin.*

Pan-, Pant- (πᾶς, πάν). All, every, universal; as *pancreas. pangenesis, pantomorphic.*

Para- (παρά). Through, near, by, by the side of, abnormality. Examples: *paracentesis, paresthesia, parenchyma, parotid.*

Peri- (περί). About, around. See, *e. g., pericardium, perimeter, perilymph, periosteum.*

Pod- (πους). Pertaining to the foot, as *podalgia, podedema.*

Poly-, pol- (πολύς). Many, much; *e. g., polycoria, polygalactia, polyuria.*

Præ-, pre- (*Præ*). Before; *e. g., præcordia, prepuce.*

Pro- (πρό). Before, down; as in *process, procidentia, prolapse, proptosis.*

Proc-, procto- (πρωκτός). The anus, pertaining to the anus; *e. g., proctitis, proctoplegia.*

Pseudo- (ψευδής). False, spurious; as in *pseudarthrosis, pseudocyesis.*

Pyo- (πῦον). Pertaining to pus or purulency; *e. g., pyogenic, pyosalpinx.*

Pyr-, pyro- (πῦρ). Concerning fire or heat, or inflammation; *e. g., pyrogenous, pyrexia.*

Retro- (*Retro*). Backward, behind; *e. g., retroflex, retroversion.*

Rhin-, Rhino- (ῥίς). Pertaining to the nose, as *rhinoplasty, rhinitis.*

Semi- (*Semis*). Half, partly, almost, as *semicapium, semilunar.*

Sphyg- (*σφυγμός*). Pertaining to the pulse, as *sphygmometer, sphygmotechny.*
Sub- (*Sub*). Beneath, under; and also partialty or deficiency of, as *subclavian, subluxation.*
Super- (*Super*). Above, upon; excess of; *e. g., supercilium, superfœcundation.*
Supra- (*Supra*). Above, upon, superior to, as *supraorbital, supraspinatus.*
Sym-, syn- (*σύν*). With, together, same. See, *e. g., symblepharon, symphysis, synalgia, synchondrosis.*
Zoö- (*ζῶον*). Animal. See *zoölogy, zoöchemia.*

SUFFIXES.

-ago (agere). Gives the idea of activity, presentation, etc.; as *lumbago.*
-agogue (*ἄγειν*, to bear off, carry away). Signifies an agent stimulating the function of excretion or secretion of the product. Thus, *emmenagogue, hydragogue, sialagogue.*
-agra (*ἄγρα*, an attack, seizure). Denotes an acute attack of pain in the part, as *arthragra, podagra.*
-algia (*ἄλγος*, pain). Pain in a part, expressed by the chief word; *e. g., cephalalgia, gastralgia.*
-atresia (*ἀτρησια*). Imperforate, as in *proctatresia.*
-cele (*κήλη*). A tumor, hernia, or protrusion. See *cystocele, hydrocele, meningocele.*
-cele, cœle (*κοιλία*). A cavity, ventricle; *e. g., mesocele.*
-ectomy (*ἐκτέμνειν*). Excision, exsection; as in oöphorectomy, *nephrectomy, splenectomy.*
-emia, (*αἷμα*, blood). Denotes a condition of the blood, or an ingredient in the same, expressed by preceding word; *e.g., hydremia, lithemia, pyemia, uremia.*
-etin (*ῥητίνη*) Used in the names of certain resins, as *abietin.*
-fuge (fugare, to expel). Driving out, an expeller, as *vermifuge, febrifuge,* etc.
-graph, graphy (*γράφειν*, to write). An instrument; a treatise or description; *e. g., sphygmograph, demography.*
-ia, often contracted to *-y*, denotes the quality of the root-word as an abstract noun, as *akromegalia, akromegaly.*
-idæ (*-ίδης*). The suffix to the name of a genus forming the name of a family; *bovidæ, equidæ.*
-igo. A variation of *-ago; e. g., prurigo, vertigo.*
-is, -sis. Present the abstract idea of activity of the root-word.
-ism (*-ισμος*). Implies the doctrine, practice, or theory of the principal word; *Darwinism, tribadism.*
-ite (*-ίτης*). Of the nature of. In anatomy, denoting a constituent part of an organ; as *sergite, sternite.* In chemistry, any salt of an -ous acid; as *sulphite, phosphite.*
-itis (*-ίτις*). Originally the feminine ending of Greek substantives and denotes an especial activity of the root-word. By habit and general use it is now limited to inflammatory activity; as *gastritis, otitis,* etc.
-logy (*λόγος*, discourse). A treatise upon; as *bacteriology, dermatology, pathology.*
-lysis (*λύσις*, a loosening). A separation into constituent parts, or the setting free of some part; as *hydrolysis, analysis.*
-malacia (*μάλακος*, soft). Abnormal softness; as in *osteomalacia.*
-mania (*μανία*, madness). The chief word denotes the principal symptom of the mental affection; *e. g., erotomania, kleptomania,* etc.
-meter (*μέτρον*, a measure). An instrument for measuring; *e. g., aërometer, urinometer.*
-odynia (*ὀδύνη*, excessive pain). The principal word denotes the seat of great pain, as *coccygodynia.*
-oid (*εἶδος*, form). Similar in shape, etc.; as in *choroid, cuboid, sphenoid, xiphoid.*
-oma (*ωμα*). A tumor, *e. g., glioma, sarcoma.*
-opia (*ὤψ*). Pertaining to the eye or vision; as in *amblyopia, myopia,* etc.
-orium, -torium, -sorium (*τήριον*). Designate places, tools, etc.; as *tentorium, auditorium,* etc.
-osis, -osus, derived from Greek words in *-όω*, and usually denote fulness, redundancy, excess.
-pathy (*πάθος*). A condition of disease, and also a method of cure; as *adenopathy, psychopathy, homeopathy, hydropathy.*
-phobia (*φόβος*, fear). Morbid or exaggerated fear or dread, as *agoraphobia, photophobia.*
-plasty (*πλάσσειν*, to form). Surgical plastic operation upon a part; *e. g., blepharoplasty, rhinoplasty.*
-rhagia (*ῥήγνυμι*, to burst forth). A hemorrhage or excessive discharge; *e. g., blennorrhagia, metrorrhagia.*
-rhaphy (*ῥαφή*, a suture). A stitching or suturing of a part; as *enterorrhaphy, perineorrhaphy.*
-rhea (*ῥέειν*, to flow). An excessive discharge or excretion; as *blennorrhea, diarrhea, leukorrhea.*
-scope (*σκοπεῖν*, to look). An instrument for making an examination; as *laryngoscope, microscope.*
-scopy (*σκοπέειν*). An examination; as *ophthalmoscopy.*
-stomy (*στόμα*, mouth). A suffix seen in the names of those surgical operations in which an artificial opening or passage is formed, as *enterostomy.*
-tas, -ty. Derived originally from the Greek *-της*, denote abstract quality or idea, as *immunity, acidity.*
-tio, -atio, -tion. A suffix of verbal roots denoting an action or function as taking place—an occurrence. The *n* was added to the original *-tio* by Roman and French influence.
-tomy (*τέμνειν*, to cut). Incision; *e. g., laparotomy, tenotomy.*
-ulus, -ula, -ulum, -ola, -ion, -ellus, -illus, -leus. Diminutives.
-uria (*οὐρεειν*, to urinate). Abnormalities of the urine or of urination; as *albuminuria, polyuria.*

DEGREES, DIPLOMAS, AND QUALIFICATIONS.

A. A. S. . . . . . Fellow of the American Academy.
A. B. or **B. A.** . . Bachelor of Arts.
A. M. . . . . . Master of Arts.
C. M. . . . . . Master in Surgery.
D. D. S. . . . . . Doctor of Dental Surgery.
D. P. H. . . . . . Diploma in Public Health.
D. S. M. . . . . . Diploma in State Medicine.
D. S. S. . . . . . Diploma in Sanitary Science.
F. B. S. . . . . . Fellow of the Botanical Society.
F. B. S. Ed. . . . Fellow Botanical Society of Edinburgh.
F. C. S. . . . . . Fellow of the Chemical Society.
F. E. S. . . . . . Fellow of the Entomological Society.
F. F. P. S. G. . . Fellow of the Faculty of Physicians and Surgeons of Glasgow.
F. K. Q. C. P. I. . Fellow of the King and Queen's College of Physicians of Ireland.
F. L. S. . . . . . Fellow of the Linnæan Society.
F. R. C. P. L. . . Fellow of the Royal College of Physicians of London.
F. R. C. P. Ed. . . Fellow of the Royal College of Physicians of Edinburgh.
F. R. C. P. I. . . . Fellow of the Royal College of Physicians of Ireland.
F. R. C. S. E. . . Fellow of the Royal College of Surgeons of England.
F. R. C. S. Ed. . . Fellow of the Royal College of Surgeons of Edinburgh.
F. R. C. S. I. . . . Fellow of the Royal College of Surgeons in Ireland.
F. R. S. . . . . . Fellow of the Royal Society.
F. R. S. E. . . . . Fellow of the Royal Society of Edinburgh.
F. R. S. L. . . . . Fellow of the Royal Society of London.
L. A. H. . . . . . Licentiate of the Apothecaries' Hall, Dublin.
L. D. S. . . . . . Licentiate in Dental Surgery.
L. F. P. S. G. . . Licentiate of the Faculty of Physicians and Surgeons of Glasgow.
L. K. Q. C. P. I. . Licentiate of the King and Queen's College of Physicians of Ireland.
LL. B. . . . . . Bachelor of Laws.
LL. D. . . . . . Doctor of Laws.
L. R. C. P. L. . . Licentiate of the Royal College of Physicians of London.
L. R. C. P. Ed. . . Licentiate of the Royal College of Physicians of Edinburgh.
L. R. C. S. Ed. . . Licentiate of the Royal College of Surgeons of Edinburgh.
L. R. C. S. I. . . . Licentiate of the Royal College of Surgeons in Ireland.
L. S. A. . . . . . Licentiate of the Apothecaries' Society of London.
L. S. S. . . . . . Licentiate in Sanitary Science.
M. A. . . . . . Master of Arts.
M. B. . . . . . Bachelor of Medicine.
M. D. . . . . . Doctor of Medicine.
M. K. Q. C. P. I. . Member of the King and Queen's College of Physicians of Ireland.
M. P. S. . . . . . Member of the Pharmaceutical Society.
M. R. C. C. . . . Member Royal College of Chemistry.
M. R. C. P. L. . . Member of the Royal College of Physicians of London.
M. R. C. P. Ed. . Member of the Royal College of Physicians of Edinburgh.
M. R. C. P. I. . . Member of the Royal College of Physicians of Ireland.
M. R. C. S. E. . . Member of the Royal College of Surgeons of England.
M. R. C. S. Ed. . Member of the Royal College of Surgeons of Edinburgh.
M. R. C. S. I. . . Member of the Royal College of Surgeons in Ireland.
M. R. C. V. S. . . Member of the Royal College of Veterinary Surgeons.
M. S. . . . . . Master in Surgery.
Ph. B. . . . . . Bachelor of Philosophy.
Ph. D. . . . . . Doctor of Philosophy.
V. S. . . . . . Veterinary Surgeon.

AN ILLUSTRATED DICTIONARY

OF

MEDICINE, BIOLOGY, AND ALLIED SCIENCES.

A

A [*ἀ, ἀν*, or *ἀμ*, without]. The Greek letter *alpha*, called alpha privative, equivalent to the prefix *un* or *in*. It denotes absence or want of the thing or quality expressed by the root of the word. *a-* is used before consonant, and *an-* before vowel sounds; *am-* is sometimes used before *-bl* or *-be*. Also, the symbol of *Anode*.

Aa [*ἀνά*, of each]. An abbreviation, written āā, used in prescriptions to denote repetition of the same quantity for each item.

āāā. Abbreviation for *Amalgam*.

Aasmus (*a-as'-mus*) [*ἀασμός*, a breathing out]. Asthma.

Ab [*ab*, from]. A Latin prefix signifying *from*.

Abaca (*ab'-ak-ah*, Sp. pron. *ah-vah-kah'*). Manilla hemp. See *Hemp*. Also *Musa textilis*, the plant which produces it.

Abactinal (*ab-ak'-tin-al*) [*ab*, away; *actinal*, the oral surface of a radiate animal]. In biology, aboral. Aga-siz's term for the surface of radiates opposite to that having the mouth.

Abactio (*ab-ak'-she-o*) [*abigere*, to drive away]. An abortion, or labor, artificially induced.

Abactus Venter (*ab-ak'-tus ven'-ter*) [*abigere*, to drive out; *venter*, the belly]. An abortion procured by artificial means.

Abadie's Sign. See *Signs and Symptoms, Table of.*

Abalienated (*ab-āl'-yen-a-ted*) [*abalienatus*, alienated, estranged]. 1. Deranged, or insane. 2. Gangrenous, or so severely injured as to require amputation or extirpation.

Abalienation (*ab-āl-yen-a'-shun*) [*abalienatio; ab*, away; *alienare*, to transfer]. Decay, especially mental decay, insanity.

Abanet. See *Abnet*.

Abaptista (*ah-bap-tis'-tah*). Same as *Abaptiston*.

Abaptiston (*ah-bap-tis'-ton*) [*ἀ* priv.; *βάπτιστος*, immersed]. A trephine so shaped that penetration of the brain is impossible.

Abarthrosis (*ab-ar-thro'-sis*) [*ab*, from; *arthrosis*, a joint]. Same as *Diarthrosis*, or *Abarticulation*.

Abarticular (*ab-ar-tik'-u-lar*) [*ab*, from; *articulus*, joint]. Not connected with or situated near a joint.

Abarticulation (*ab ar-tik-u-la'-shun*) [*ab*, from; *articulatio*, joint]. 1. Same as *Diarthrosis*, a term more frequently used; sometimes also a synonym of *Synarthrosis*. 2. A luxation; the dislocation of a joint.

Abasia (*ah-bā'-ze-ah*) [*ἀ* priv.; *βάσις*, a step]. Motor incoördination in walking. See *Astasia*.

Abasic (*ah-bā'-sik*). Pertaining to, or affected with, abasia.

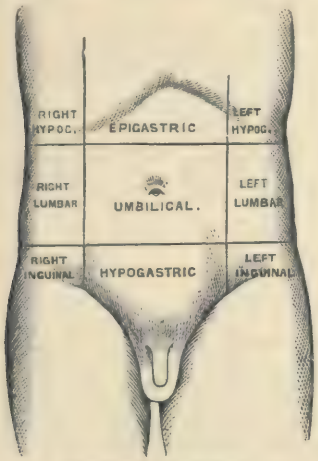
Abatement (*a-bāt'-ment*) [*ab*, from; *batuere*, to strike]. Mitigation or decrease in severity of pain, or of any untoward symptom or condition.

Abattoir (*ah-bat-war'*) [Fr.]. A slaughter-house or establishment for the killing and dressing of animals.

Abaxial (*ab-ak'-se-al*) [*ab*, from; *axis*, an axle]. Not situated in the line of the axis. In botany, indicating that the embryo is not in the axis of the seed.

Abbé Condenser. See *Illuminator, Abbé*. **A. Illuminator.** See *Illuminator*.

Abbé's Apochromatic Lenses. See *Apochromatic Lens*. **A. Catgut Rings**, rings composed of eight or ten turns of heavy catgut in the shape of an oval, with inside diameter of two inches, for use in intestinal anastomosis.



Abbreviate, or Abbreviated (*ab-bre'-ve-a-ted*) [*ab*, from; *breviare*, to shorten]. Shortened, cut short.

Abbreviations (*ab-bre-ve-a'-shuns*). See *List of Abbreviations* in introductory matter.

Abdomen (*ab-do'-men* or *ab'-do-men*) [*abdere*, to hide]. The large inferior cavity of the trunk, extending from the pelvic cavity to the diaphragm, and bounded in front and at the sides by the lower ribs and abdominal muscles, and behind by the vertebral column, the psoas and quadratus lumborum muscles. It is artificially divided into nine regions by two circular lines, the upper parallel with the cartilages of the ninth ribs, the lower with the iliac crests, and by two lines from the cartilages of the eighth rib to the center of Poupart's ligament. The regions thus formed are, above, the right hypochondriac, the epigastric, and the left hypochondriac; secondly, the right lumbar, umbilical, and left lumbar; and below, the right inguinal, the hypogastric and the left inguinal. **A., Pendulous**, a relaxed condition of the abdominal walls in which they hang down over the pubis.

Abdominal (*ab-dom'-in-al*) [*abdere*, to hide]. Pertaining to or connected with the abdomen. **A. Aneurysm.** See *Aneurysm*. **A. Aorta.** See *Artery*. **A. Aponeurosis.** See *Aponeurosis*. **A. Brain**, the solar plexus. **A. Compress**, a form of local pack, made by forming folds of a coarse linen towel of sufficient breadth to reach from the ensiform cartilage to the pubis; one of the folds is then wrung out of cold water, applied, and the remainder is rolled around the body so as to retain it in position. **A. Ganglia.** See *Ganglia*. **A. Gestation.** See *Pregnancy, Extra-uterine*. **A. Hysteria**, an hysterical condition simulating peritonitis, in which the abdomen becomes extremely painful to the touch, swollen, and distended with gas, attended with temporary rise of temperature. **A. Line**, the linea alba. **A. Muscles**, the internal and external obliques, the transversalis, rectus, pyramidalis, and quadratus lumborum. See *Muscles, Table of.* **A. Pore**, a name applied to the openings connecting the peritoneal

cavity of a few fishes with the urino-genital cloaca, and employed in the outward transportation of the generative products. **A. Press.** See *Prelum Abdominale.* **A. Reflex.** See *Reflexes, Table of.* **A. Regions.** See *Abdomen.* **A. Respiration,** R. carried on chiefly by the diaphragm and abdominal muscles. **A. Ribs,** transverse ossifications (dermal?) of the abdominal wall of crocodiles and certain other reptiles. **A. Ring, External,** a triangular opening in the fibers of the aponeurosis of the external oblique muscle transmitting the spermatic cord of the male and the round ligament of the female. **A. Ring, Internal,** an oval aperture in the fascia transversalis that transmits the spermatic cord of the male and the round ligament of the female. **A. Scutella,** the broad, belly scales of serpents, so far as the anus. **A. Section.** See *Celiotomy.* **A. Segments,** the more or less evident transverse divisions or somites of the abdomen in arthropods. **A. Typhus,** Enteric Fever. **A. Vertebræ,** those vertebræ in fishes, that give off ribs or processes arching the visceral cavity.

ABDOMINAL REGIONS.

Abdomino-anterior (*ab-dom'-in-o-an-te'-re-or*). Having the belly forward (used of the fetus in utero).

Abdomino-genital (*ab-dom'-in-o-jen'-it-al*). Relating to the abdomen and the genitalia. **A. Nerve, Inferior,** the ilio-inguinal nerve. **A. Nerve, Superior,** the ilio-hypogastric nerve.

Abdomino - hysterectomy (*ab-dom'-in-o-his-ter-ek'-to-me*). Removal of the uterus through an abdominal incision.

Abdomino - hysterotomy (*ab-dom'-in-o-his-ter-ot'-o-me*). Hysterotomy through an abdominal incision.

Abdomino-posterior (*ab-dom'-in-o-pōs-te'-re-or*). Having the belly toward the mother's back (used of the fetus in utero).

Abdomino-scrotal (*ab-dom'-in-o-skro'-tal*). Relating to the abdomen and the scrotum. **A. Muscle,** the cremaster muscle.

Abdomino-thoracic (*ab-dom'-in-o-tho-ras'-ik*). Relating to the abdomen and thorax.

Abdomino - uterotomy (*ab-dom'-in-o-u-ter-ot'-o-me*). See *Abdomino-hysterotomy.*

Abdomino-vesical (*ab-dom'-in-o-ves'-ik-al*). Relating to the abdomen and the urinary bladder. **A. Pouch,** a fold of the peritoneum in which are comprised the urachal fossæ.

Abdominoscopy (*ab-dom-in-os'-ko-pe*) [*abdomen; σκοπειν,* to examine]. Examination of the abdomen for diagnostic purposes, by inspection, palpation, measurement, percussion, *etc.*

Abdominous (*ab-dom'-in-us*) [*abdere,* to hide]. Having a large abdomen.

Abduce (*ab-dūs'*) [*ab,* away; *ducere,* to lead]. To draw away, as by an abductor muscle.

Abducens (*ab-du'-senz*) [L., "leading away"]. A term applied to certain muscles, or their nerves, that draw the related part from the median line of the body. Also, the sixth pair of nerves supplying the external recti of the eye. **A. oculi.** See *Muscles, Table of.*

Abducent (*ab-du'-sent*). See *Abducens.*

Abduct (*ab-dukt'*) [*ab,* from; *ducere,* to draw]. To draw, or cause to move, away from the median line, whether of the body or of a limb.

Abduction (*ab-duk'-shun*) [*ab,* from; *ducere,* to lead]. 1. The withdrawal of a part from the axis of the body, or of a limb. 2. The recession or separation from each other of the parts of a fractured bone. 3. **A. of the Eyes,** the power of the external recti, measured by the maximum ability to preserve singleness of the image with prisms placed bases toward the nose. It is commonly from 6° to 8°. See, also *Adduction.*

Abductor (*ab-duk'-tor*). Same as *Abducens, q.v.* **A. Auris.** See *Muscles, Table of.*

Abelmoschus (*a-bel-mos'-kus*) [Ar., *'habb-el-misk,* a grain of musk]. A genus of malvaceous plants. *A. esculentus* furnishes the esculent known as gumbo, or okra. *A. moschatus* affords *Ambrette, q.v.,* or musk-seed, formerly used in medicine. Unof.

Abepithymia (*ab-ep-e-thi'-me-ah*) [*ab,* from; *ἐπιθυμία,* longing]. 1. A perverted longing, or desire. 2. Paralysis of the solar plexus (the diaphragm formerly was regarded as the seat of the soul [*θυμός*], and of the desires).

Abernethy's Operation. See *Operations, Table of.* **A. Sarcoma,** a form of spindle-celled vascular sarcoma.

Aberrant (*ab-er'-ant*) [*ab,* from; *errare,* to wander]. Deviating from the normal or regular type, in appearance, structure, course, *etc., e.g.,* the aberrant duct of the testis or liver, aberrant arteries, *etc.*

Aberration (*ab-er-a'-shun*) [*ab,* from; *errare,* to wander]. Deviation from the normal; mental derangement; fetal malformation; vicarious menstruation; escape of the fluids of the body by any unnatural channel. In optics, any imperfection of focalization or refraction of a lens. **A., Chromatic,** the dispersion arising from unequal refraction of light of different parts of the spectrum. The violet rays being more refrangible than the red rays, are brought to a focus nearer the lens, and the image is surrounded by a halo of colors. **A., Mental,** a degree of paranoia that may or may not amount to insanity. **A., Spherical,** the excess of refraction of the peripheral part of a convex lens over the central area, producing an imperfect focus and a blurred image.

Abesamum (*ab-es'-am-um*) [L.]. Wheel-grease; fat charged with iron; formerly used as a remedy.

Abevacuation (*ab-e-vak-u-a'-shun*) [*ab,* from; *evacuation*]. 1. A morbid evacuation; an excessive or deficient discharge. 2. The passage of matter from one organ or cavity into another; metastasis.

Abeyance (*ab-a'-ans*) [O. Fr., for "open-mouthed expectation"]. A suspension of activity, or of function; a state of suspended animation, or action.

Abi (*ah'-be*). See *Lucuma.*

Abiaba (*ah-be ah'-bah*). See *Lucuma.*

Abicum (*ab'-ik-um*) [L.]. The thyroid cartilage. (Obs., or rare.)

Abies (*a'-be-ēz*) [L.]. A genus of coniferous plants, including the fir, hemlock, and spruce. *A. balsamea,* Silver Fir, Balsam Fir, or Balm of Gilead, a tree of the nat.

ord. *Conifera*, from which is derived the Terebinthina Canadensis. *A. canadensis*, Hemlock Spruce. Bark of the Canadian Fir-tree. Used as an astringent in various local and internal conditions. Yields Pix Canadensis. *A. excelsa*, Norway Spruce. Yields Pix Burgundica. *A. pectinata*, the European Silver Fir. Its buds are resinous, balsamic, and sudorific. Unof. **A. Preparations,** Extractum Abietis Canadensis Liquidum (B. P.). Dose ♏xv–lx. Glycerinum Abietis (B. P.). Dose ʒj–ij. Geddes's Fluid-Extract of Hemlock Bark. Dose ♏v–x.

Abietene (*a-bi'-et-ēn*), C_7H_{16}. A hydrocarbon, obtained from the *Pinus sabiniana*, a Californian nut pine. It is an aromatic, volatile liquid, agreeing in composition with normal heptane. It is extensively used as a popular remedy; called, also, *Erasene*. Unof.

Abietic (*ab-i-et'-ik*), **Abietinic** (*ab-i-et-in'-ik*) [*Abies*]. Pertaining to the genus *Abies*, as Abietic Acid, $C_{44}H_{64}O_5$ or $C_{20}H_{30}O_2$, discovered by Maly in the resin of *Abies excelsa* and *Larix europea*.

Abietin (*a-bi'-et-in*) [*Abies*]. A resinous principle obtained from the turpentine of various species of pine and fir. **A. Anhydrid,** $C_{44}H_{62}O_4$, the main constituent of *Resin*, *q. v.*

Abietis Resina (*a-bi'-et-is res-i'-nah*). The resin of the fir or pine.

Abietite (*ab'-i-et-it*), $C_6H_8O_3$. A sugar resembling mannite, found by Rochleder in the needles of the European Silver Fir, *Abies pectinata*.

Abiogenesis (*ab-i-o-jen'-es-is*) [ἀ priv.; βιός, life, and *genesis*]. The (theoretical) production of living by non-living matter. The older term was *Spontaneous Generation*. Other synonyms of the word are *Generatio æquivoca*, *Generatio primaria*, *Archigenesis*, *Archebiosis*, *etc.* The theory has been supported by Pouchet, Haeckel, Huxley, Bastian, and others. Those opposed to the doctrine are called panspermists or heterogenists. The dispute is one of the most fundamental in biology.

Abiological (*ah-bi-o-loj'-ik-al*) [ἀ priv.; βιός, life; λόγος, treatise]. Not pertaining to biology.

Abirritant (*ab-ir'-it-ant*) [*ab*, from; *irritare*, to irritate]. 1. Tending to diminish irritation; soothing. 2. Relating to diminished sensitiveness. 3. A remedy or agent that allays irritation.

Abirritation (*ab-ir-it-a'-shun*) [*ab*, from; *irritare*, to irritate]. Diminished tissue-irritability; atony or asthenia.

Abirritative (*ab-ir'-it-a-tiv*) [*ab*, from; *irritare*, to irritate]. Due to, or characterized by, atony.

Abitus (*ab'-it-us*) [*ab*, from, away; *ire*, to go]. In comparative anatomy, any one of the narrow canals leading from a ciliated chamber to the excurrent canal, as in the higher forms of sponges.

Abjoint (*ab-joint'*) [*abjungere*, to separate]. In biology, to separate by means of a joint or septum.

Abjunction (*ab-jungk'-shun*) [see *Abjoint*]. In biology, the separation by means of a joint or septum, as of spores from a growing hypha in some fungi.

Ablactation (*ab-lak-ta'-shun*) [*ab*, from; *lactare*, to give suck]. The end of the suckling period. The weaning of a child.

Ablastemic (*ah-blas-tem'-ik*) [ἀ priv.; βλάστημα, a shoot]. In biology, non-germinal; in no way related to germination.

Ablastous (*ah-blas'-tus*) [ἀβλαστος, not budding, sterile]. In biology, producing no germs or buds.

Ablation (*ab-la'-shun*) [*ablatio*, removal]. Removal of a part of the body, as a tumor, by amputation, excision, *etc.*

Ablatio retinæ (*ab-la'-she-o ret-in'-e*). Detachment of the retina.

Ablator (*ab-la'-tor*) [L., "remover"]. A cutting instrument used in the removal of parts (a name chiefly used in veterinary surgery).

Ablepharia (*ah-blef-ar'-e-ah*) [ἀ priv.; βλέφαρον, the eyelid]. The condition of the absence of the eyelids.

Ablepharon (*ah-blef'-ar-on*) [ἀ priv.; βλέφαρον, the eyelid]. Congenital absence of the eyelids.

Ablepharous (*ah-blef'-ar-us*) [ἀ priv.; βλέφαρον, the eyelid]. Having no eyelids.

Ablepsia (*ah-blep'-se-ah*) [ἀβλεψία, without sight]. 1. Blindness. 2. Dulness of perception.

Ablepsy (*ah-blep'-se*). See *Ablepsia*.

Abloom (*a-bloom'*). In biology, the state of being in blossom.

Abluent (*ab'-lu-ent*) [*abluere*, to wash away]. Detergent. That which cleanses or washes away.

Ablution (*ab-lu'-shun*) [*abluere*, to wash away]. Washing or cleansing the body. Separation of chemical impurities by washing.

Abmortal (*ab-mor'-tal*) [*ab*, from; *mors*, death]. Passing from dead or dying to living muscular fiber (used of electric currents).

Abnerval (*ab-ner'-val*) [*ab*, from; *nervus*, a sinew]. Passing from a nerve (used of electric currents in muscular fiber).

Abnet (*ab'-net*) [Hebr., a girdle]. A girdle, or girdle-shaped bandage.

Abneural (*ab-nu'-ral*) [*ab*, from; νεῦρον, nerve]. Pertaining to a part remote from the neural or dorsal aspect; ventral.

Abnormal (*ab-nor'-mal*) [*ab*, away from; *norma*, a law]. Not normal; not conformable with nature or with the general rule. **A. Pigmentation,** any excess, deficiency, or uncommon distribution of the natural pigment cells in the rete mucosum. Sometimes caused artificially either by mechanical means, such as tattooing, or by the reduction and deposition under the epidermis of metallic salts administered as medicine, such as nitrate of silver.

Abnormalism (*ab-nor'-mal-izm*) [*ab*, away from; *norma*, a law]. 1. Abnormality. 2. An abnormal thing or structure.

Abnormality (*ab-nor-mal'-it-e*) [*ab*, away from; *norma*, a law]. The quality of being abnormal; a deformity or malformation.

Abnormity (*ab-nor'-mit-e*). Same as *Abnormality*.

Aboiement (*ah-bwah-mong'*) [Fr.]. Barking; the involuntary utterance of barking sounds.

Abolition (*ab-o-lish'-un*) [*abolitio*]. Destruction; cessation; suspension, as of a physiological function.

Abomasum (*ab-o-ma'-sum*) [*ab*, away; *omasum*, paunch]. In biology, the reed or proper digestive stomach of ruminating mammals. It is pyriform, lined by smooth mucous membrane, which secretes gastric juice. Also called "fourth," or "true," stomach; dried, it is called rennet and used for coagulating milk.

Aborad (*ab-o'-rad*) [*ab*, away from; *os*, mouth]. Away from the mouth; in an aboral situation or direction.

Aboral (*ab-o'-ral*) [*ab*, away from; *os*, mouth]. Opposite to, or remote from, the mouth.

Aborally (*ab-o'-ral-e*) [*ab*, away from; *os*, mouth]. In an aboral situation, direction, or manner.

Aborigines (*ab-or-ij'-in-ēz*) [*ab*, from; *origo* (*origin*), origin, beginning]. Primitive, autochthonous, native, indigenous.

Abort (*ab-ort'*) [*abortare*, to miscarry]. 1. To miscarry; to expel the fetus before it is viable. 2. To prevent the full development, as of a disease. 3. To come short of full development. 4. An abortion; an aborted fetus.

Aborticide (*ab-or'-tis-id*) [*abortus*, a miscarriage; *cædere*, to kill]. 1. The killing of the unborn fetus

2. The means of killing the fetus. 3. Causing the destruction of a fetus.

Aborticidium (*ab-or-tis-id'-e-um*) [*abortus*, a miscarriage; *cædere*, to kill]. Means of killing a fetus.

Abortient (*ab-or'-shent*) [L. *abortiens*, miscarrying]. Abortive; abortifacient.

Abortifacient (*ab-or-te-fa'-shent*) [*abortus; facere*, to make]. 1. Causing abortion. 2. A drug or agent inducing the expulsion of the fetus. Ergot, rue, cotton-root, and digitalis, are examples. They act by causing uterine contractions. See *Oxytocic* and *Ecbolic*.

Abortion (*ab-or'-shun*) [*abortus*, a miscarriage]. The premature expulsion of the ovum before the child is viable, that is, occurring any time before the end of the sixth month. It may be produced by various general diseases, as syphilis, the acute fevers, nephritis, most exhausting diseases; by traumatism, reflex influences, emotional disturbances; by the action of various poisons, as ergot, cantharides, rue, and savin; by diseased conditions of the uterus and displacements of that organ; or by diseases of the fetus, its membranes, or the placenta. The most important symptoms are hemorrhage and pain, with final expulsion of the uterine contents. In the first two months of pregnancy the ovum is usually expelled entire; later the membranes and placenta are retained after the fetus comes away, and must be removed subsequently. By some authors expulsion of the ovum during the first three months is *abortion;* from this time to viability it is termed *immature delivery*, or *miscarriage*, and from the period of viability to that of maturity, *premature delivery*. **A., Artificial**, that produced intentionally. **A., Criminal**, when not demanded for therapeutic reasons. **A., Embryonic**, up to the fourth month. **A., External Causes of**, those acting from without, as violence, pressure, injections, *etc.* **A., Fetal**, taking place subsequent to the fourth month. **A., Habitual**, repeated A. in successive pregnancies. **A., Incomplete**, when the membranes or placenta are retained. **A., Inevitable**, when the embryo or fetus is dead, or when there is an extensive detachment or rupture of the ovum. **A., Internal Causes of**, those due to abnormal conditions or diseases of the mother. **A., Missed**, the death of the fetus and not followed within two weeks by its expulsion. **A., Ovular**, that occurring during the first three weeks after conception. **A., Paternal and Maternal Causes of**, those due to diseases of the father or of the mother respectively. **A., Spontaneous**, that not induced by artificial means.

Abortionist (*ab-or'-shun-ist*) [*abortus*, a miscarriage]. One who criminally produces abortions; especially one who follows the business of producing abortions.

Abortive (*ab-or'-tiv*) [*abortus*, a miscarriage]. Prematurely born; coming to an untimely end; incompletely developed; cutting short the course of a disease; abortifacient. **A. Epilepsy.** See *Epilepsy*.

Abortus (*ab-or'-tus*) [L.]. An aborted fetus; the fruit of an abortion.

Aboulia (*ah-boo'-le-ah*). See *Abulia*.

Aboulomania (*ah-boo-lo-ma'-ne-ah*). See *Abulomania*.

Ab ovo (*ab o'-vo*) [L.]. In biology, from the egg; from the beginning.

Abrachia (*ah-bra'-ke-ah*) [ἀ priv.; βραχίων, arm]. The condition of an armless monster. In biology, without anterior limbs

Abrachiocephalia (*ah-bra-ke-o-sef-a'-le-ah*) [ἀ priv.; βραχίων, arm; κεφαλή, head]. Absence of head and arms from a fetus.

Abrachius (*ah-bra'-ke-us*). A monster without arms. See *Abrachia*.

Abrade (*a-brād'*) [*abradere*, to rub off]. To remove by friction or chafing; to roughen by friction.

Abranchia (*ah-brang'-ke-ah*) [ἀ priv.; βράγχια, gills]. In biology, a name given to several different groups of animals that have no gills.

Abrasio (*ab-ra'-ze-o*) [L.]. An abrasion. **A. corneæ**, operative removal of the epithelium of the cornea because of diseased conditions.

Abrasion (*ab-ra'-zhun*) [*abrasio: ab*, priv.; *radere*, to rub]. Excoriation of the cutaneous or mucous surface by mechanical means. In dentistry, the wearing away of the dentine and enamel, or the cutting edges of the teeth, whether by mechanical or chemical means.

Abrasor (*ab-ra'-zor*) [L. "abrader"]. A surgeon's rasp or xyster; any file or instrument used in the surgical or dental abrasion of a surface; also, a rasp used in pharmacy.

Abric Acid (*a'-brik as'-id*). See *Acid*.

Abrin (*a'-brin*). 1. The chemical ferment or poisonous principle of jequirity, erroneously supposed to be due to a specific microbe. See *Bacillus of jequirity ophthalmia* in Table of Bacteria. 2. A vegetable albuminoid employed in the study of immunity.

Abroma (*ah-bro'-mah*) [ἀ priv.; βρῶμος, a stink]. A genus of sterculiaceous trees. *A. augusta*, of S. Asia, affords a milky juice, esteemed in dysmenorrhea. Unof.

Abrotanum (*ab-rot'-an-um*) [ἀβρότονον, an aromatic plant]. The plant called Southern Wood, *Artemisia abrotanum*. See *Artemisia*.

Abrupt (*ab-rupt'*) [*abruptus*, broken off]. In biology, terminating suddenly; truncated.

Abruption (*ab-rup'-shun*) [*abruptio*, from *ab*, and *rumpere*, to break]. 1. A rupture or tearing asunder. 2. A transverse fracture.

Abrus (*a'-brus*) [ἁβρός, pretty]. Jequirity; Indian Licorice. The seeds of *A. precatorius*, or Wild Licorice. Properties are thought to be due to the presence of certain ferments. Non-sterilized infusions applied to the conjunctiva or to any mucous surface induce violent purulent inflammation with growth of false membrane. It is used in producing artificial conjunctivitis. **A. Infusum**: semina iij, aqua dest. ℥ss. Macerate and add aq. ℥ss. All unofficial. **Abri Liquor**, strength 12 per cent.; dilute with 3 to 5 times its bulk of water and apply 2 drops daily. **Abri Pasta**, 1 in 4; used with caution in affections of the skin.

Abscess (*ab'-ses*) [*abscessus*, a departure or separation—of the matter]. A pus-formation within some cavity of the body, the result of localized inflammation. According to location, abscesses are named *Dorsal, Iliac, Mammary, Ischio-rectal, Peri-typhlitic, Retro-pharyngeal, Urethral, etc.* **A., Alveolar**, abscess in the gum or alveolus. **A., Atheromatous.** See *Endarteritis, Chronic*. **A. of Brain**, due to local injury, or to suppurative inflammation near or distant, such, especially, as diseases of the ear. The symptoms are those of pressure, impaired function of the part affected, meningitis, headache, optic neuritis, *etc.* **A., Bursal**, abscess in the bursæ, the most frequent being in the bursæ patellæ, commonly called *Housemaid's Knee*. **A., Canalicular**, mammary abscess that communicates with a milk duct. **A., Caseous**, one that contains cheesy materials. **A., Chronic**, or *Cold Abscess*, one of slow and apparently non-inflammatory development, usually about a bone, joint, or gland. **A., Cold.** See *A., Chronic*. **A., Congestive**, the pus appears at a point distant from where it is formed. **A., Constitutional**, due to some systemic disorder. **A., Critical**, occurring at some critical period of an acute disease. **A., Embolic**, formed in the clot of an embolism. **A., Fecal**, one developing in the rectum or large intestine. **A., Gangrenous**, one attended with death of adjacent parts. **A., Lacunar**, one in the lacunæ of the urethra. **A., Metastatic.** See *Pyemia*. **A., Miliary.** See

Pyemia. **A., Milk,** or **A., Mammary,** one in the female breast. **A., Multiple.** See *Pyemia*. **A., Ossifluent.** See *Ossifluent*. **A., Perforating,** one perforating the cornea, the lung, or other containing wall. **A., Phlegmonous,** an acute A. **A., Pointing of,** the point where the abscess tends to break through its external confining wall. **A., Psoas,** one arising from disease of the lumbar, or lower dorsal vertebræ, the pus descending in the sheath of the psoas muscle, and usually pointing beneath Poupart's ligament. **A., Pyemic.** See *Pyemia*. **A., Residual,** about the products of some old result of inflammation. **A. Root,** the root of *Polemonium Reptans*. Alterative, astringent and expectorant. Dose of fld. ex. ʒ ss-ij. Unof. **A., Shirt Stud,** retro-mammary abscess concurrent with a subintegumentary abscess, the two sacs communicating by means of a sinus. **A., Stercoraceous.** See *Fecal A.* **A., Symptomatic,** one indicative of some other affection. **A., Thecal,** in the sheaths of tendons. **A., Tropical,** acute hepatitis terminating in suppuration and abscess formation. **A., Tubercular.** Same as *A., Cold*.

Abscession (*ab-sesh'-un*) [*abscessio,* departure]. 1. An abscess; a critical discharge. 2. Metastasis.

Abscissæ (*ab-sis'-se*) [*ab*, away; *scindere*, to cut]. The transverse lines cutting vertical ones at right angles, to show by a diagram the relations of two series of facts, as, *e. g.*, the number of pulse-beats, or the temperature record in given periods of time.

Abscission (*ab-sish'-un*) [*ab*, from; *scindere*, to cut]. Removal of a part, as the prepuce, or a fractured bone, by cutting. Applied particularly to a surgical operation upon a staphylomatous cornea, in which the bulging portion is excised, the parts brought together so that the posterior and chief part of the globe forms a "stump" for an artificial eye. In biology, a term applied to that mode of detachment of spores in fungi which consists in the disorganization of the zone connecting the spores with the hypha.

Absconsio (*ab-skon'-se-o*) [*abscondere*, to hide]. A sinus or cavity whether normal or pathological.

Absence (of mind) (*ab'-sens*) [*absentia*, absence]. Inattention to surroundings; in marked instances it may be a result of central lesions. It is often seen in epileptics and melancholiacs.

Absentia epileptica (*ab-sen'-she-ah ep-il-ep'-tik-ah*). Brief losses of consciousness occurring in the mild form of epilepsy.

Absinthe (*ab'-sinth* or *ab-sant'*). See *Absinthium*.

Absinthin (*ab-sin'-thin*) [*absinthium*]. A bitter and crystalline principle obtainable from wormwood. See *Absinthium*.

Absinthism (*ab-sinth'-izm*). A disease similar to alcoholism, the result of the excessive use of absinthe. It is characterized by general muscular debility and mental disturbances, which may proceed to convulsions, acute mania, general softening of the brain, or general paralysis.

Absinthium (*ab-sinth'-e-um*) [L.]. Wormwood. The leaves and tops of *Artemisia absinthium*. Contains a volatile oil and an intensely bitter principle, *Absinthin*, $C_{20}H_{28}O_4$, which is a narcotic poison. A. increases cardiac action, produces tremor and epileptiform convulsions. Dose gr. xx–xl, in infusion. Used as a stomachic tonic. *Absinthe*, a French liquor, is an alcoholic solution of the oil exhibited with oils of anise, marjoram, and other aromatic oils.

Absinthol (*ab-sinth'-ol*), $C_{10}H_{16}O$. The principal constituent of oil of wormwood; it is isomeric with ordinary camphor.

Absolute Alcohol (*ab'-so-lūt al'-ko-hol*). See *Alcohol*.

Absorb (*ab-sorb'*) [*ab*, from; *sorbere*, to suck up]. In physiology, to suck up or imbibe, as the imbibition performed by the lacteals in the body.

Absorbent (*ab-sor'-bent*) [*absorbere*, to suck in]. In physiology, an organ or part that absorbs, withdraws, or takes up. A term applied to the *Lacteals* and *Lymphatics*, *q. v.* In materia medica, a drug or medicine that produces absorption or exudation of diseased tissue. In surgery, a substance that mechanically takes up excreted matter, as *A. Cotton*, *A. Sponge*, *etc.* **A. Glands.** See *Lymphatics*. **A. System,** the lacteals and lymphatics, with their associated glands.

Absorptiometer (*ab-sorp-te-om'-et-er*) [*absorption; meter*]. A device for measuring the thickness of the layer of liquid that is taken up between two glass plates by capillary attraction. Used in conjunction with a spectro-photometer, it serves as a hematoscope.

Absorption (*ab-sorp'-shun*) [*absorbere*, to suck in]. The permeation or imbibition of one body by another. The process whereby nourishment, medicines, morbid products of tissue metamorphosis, *etc.*, are taken up by the lymphatic and venous systems. In ophthalmology the process by which the lens is disintegrated and carried off after the capsule has been ruptured. **A. Lines** or **Bands,** the lines of the spectrum, called Fraunhofer's lines; they are dark lines caused by the arrestation or absorption of the ethereal waves of certain lengths and rapidities, mainly by vapors of the sun's atmosphere. **A. of Composition,** or **External Absorption,** the taking up of material by the skin or mucous surfaces. **A., Cutaneous,** absorption by the skin. **A., Disjunctive,** the removal of living tissue around a necrosed mass, and its consequent separation from its surroundings. **A., Interstitial,** the removal by the absorbent system of effete matters. **A. Method,** to determine whether or not hematuria is due to lesion of the bladder. It is based on the fact that the undenuded surface of the bladder will not absorb foreign substances. Fifteen grains of potassium iodid are injected into the bladder, and fifteen minutes later the saliva is examined for iodin. If found, it is an indication of an unhealthy state of the bladder. **A., Progressive,** atrophy of a part due to pressure. **A., Pulmonary,** the taking up of oxygen, or of vapors (as of ether), by the lungs. **A., Venous,** absorption by the veins.

Absorptive (*ab-sorp'-tiv*) [*absorbere*, to suck in]. Having the power or function of absorbing.

Absorptivity (*ab-sorp-tiv'-i-te*) [*absorbere*, to suck in]. The power or quality of being absorbent.

Abstemiousness (*ab-ste'-me-us-nes*) [*abs*, from; *temetum*, wine]. Abstinence from wine. Temperance or moderation in matters of diet.

Abstention (*ab-sten'-shun*) [*abstentio*, retention]. An act of abstinence, or of abstaining; retention; constipation.

Abstergent (*ab-ster'-jent*) [*abs*, from; *tergere*, to cleanse]. Cleansing, detergent. See *Detergent*.

Abstersive (*ab-ster'-siv*) [*abstersivus*]. Abstergent.

Abstinence (*ab'-stin-ens*) [*abs*, from; *tenere*, to hold or keep]. Privation or self-denial in regard to food, liquors, *etc.* See *Fasting*.

Abstract (*ab'-strakt*) [*abstrahere*, to draw away; *Abstractum; gen., Abstracti: pl., Abstracta*]. In pharmacy, a solid preparation in which two parts of the drug are represented by one part of the abstract (which is compounded with milk-sugar). Abstracts are double the strength of fluid extracts. They are permanent, but should be kept in a cool place.

Abstraction (*ab-strak'-shun*) [*abstractio*, a drawing away]. Blood-letting. Also, attention to one idea to the exclusion of others. Generalization or classi-

fication of the qualities common to the individuals of a group. In pharmacy, the process of distillation.

Abstractitious (*ab-strak-tish'-us*) [*abstrahere*, to draw away]. Susceptible of being abstracted without change from another substance; derived or derivable by abstraction.

Abstractum (*ab-strak'-tum*) [*pl.*, *Abstracta*]. An abstract. See *Abstract*.

Abstriction (*ab-strik'-shun*) [*ab*, from; *stringere*, to bind]. Spore-formation in lower cryptogams characterized by decided constriction of the walls at the place of division.

Absus (*ab'-sus*) [L.]. The plant *Cassia absus* of India and Egypt. Its seeds are locally employed in the treatment of ophthalmia, and are regarded as depurative. Unof.

Abterminal (*ab-ter'-min-al*) [*ab*, from; *terminus*, end]. Passing from tendinous into muscular tissue (used of electric currents).

Abulia (*ah-bu'-le-ah*) [*ἀ* priv.; *βουλή*, will]. Loss or defect of will power.

Abulic (*ah-bu'-lik*). Characterized by or affected with abulia; of defective will-power.

Abulomania (*ah-bu-lo-ma'-ne-ah*) [*ἀ* priv.; *βουλή*, will; *μανία*, madness]. A disease of the mind characterized by imperfect or lost will-power.

Abumbrella (*ab-um-brel'-ah*) [*ab*, from; *umbrella*, the disc of acalephs]. In biology, a term applied to the surface of the velum, it being turned away from the disc, in medusæ. Opposite of *Adumbrella*.

Abuta (*ah-boo'-tah*) [L.]. A genus of menispermaceous plants. *A. amara*, affords false pareira brava, and *A. rufescens* is the so-called white pareira brava. Both are S. American. Unof.

Abutilon (*a-bu'-til-on*) [L.]. A genus of malvaceous plants. *A. avicennæ*, common in the U. S. (velvet-leaf Indian mallow); is demulcent, and is a safe remedy for diarrhea. Unof.

Abvacuation (*ab-vak-u-a'-shun*). Same as *Abevacuation*, *q. v.*

Abysmal (*ah-biz'-mal*) [*abyssus*, abysm]. Fathomless. Pertaining to great depths in the ocean. See *Abyssal*.

Abyssal (*ah-bis'-al*) [*ἄβυσσος*, without bottom]. In biology, refers to plants and animals inhabiting the depths of the ocean between 100 and 1000 fathoms. **A. Theory of Light**, an hypothesis assuming the importance of phosphorescence and of luminous organs in fishes and other animals in depths of the ocean where no sunlight penetrates.

Acacia (*ah-ka'-she-ah*) [L.; Gr., *ἀκακία*]. 1. A large genus of leguminous trees, shrubs, and herbs, many of them Australian or African. Many of the species are medicinal, and some are poisonous. The bark is usually very astringent. Gum arabic is produced by various species, mostly either African or Asiatic. 2. **A. anthelmintica.** See *Mussanin*. *A. catechu.* See *Catechu*. *A. lebbek*, *A. nilotica*, *A. vera*, and *A. verek*, are among the species that furnish gum arabic. 3. Gum Arabic. A nearly white transparent gum exuding from *Acacia Senegal*. Soluble in water. Used in the manufacture of mucilage. Contains *Arabin*, $C_{12}H_{22}O_{11}$, identical in composition with cane-sugar. **A., Mucilage,** acacia 34, water 100 parts; incompatible with alcoholic tinctures. **A., Syrup,** mucilage 25, syrup. simp. 75. Used in various mixtures as a demulcent and to suspend insoluble powders.

Acajou (*ak-a-zhoo'*). See *Cashew*.

Acaleph (*ak'-al-ef*) [*ἀκαλήφη*, a nettle, a sea-nettle]. In biology, one of the acalephæ, or sea-nettles; a medusa, a sea-blubber.

Acalephoid (*ak-al-ef'-oid*) [*ἀκαλήφη*, a nettle, a sea nettle]. Resembling an acaleph.

Acalycal (*ah-kal'-ik-al*) [*ἀ* priv.; *κάλυξ*, calyx]. In biology, used to describe stamens inserted upon the receptacle, not adherent to the calyx.

Acalycine (*ah-kal'-is-in*) [*ἀ* priv.; *κάλυξ*, calyx]. In biology, lacking a calyx, acalycinous.

Acalyculate (*ah-kal-ik'-u-lāt*) [*a* priv.; *calyculus*, a calycle]. In biology, having no calycle, or accessory calyx.

Acalypha (*ah-kal'-if-ah*) [*ἀκαλῦφής*, unveiled]. A genus of euphorbiaceous plants. **A., Ext., Liq.** Dose ♏ x–ʒj. *A. fruticosa*, of India, is useful in dyspepsia and diarrhea, and is tonic and alterant. *A. hispida* has similar uses. *A. indica*, a euphorbiaceous plant, common in India. The leaves are expectorant, emetic, laxative. **A. Succus.** Dose for an infant ʒj. Unof. *A. virginica*, of North America, is diuretic and expectorant.

Acamathesia (*ak-am-ath-e'-ze-ah*) [*ακαμάθησις*]. Same as *Akatamathesia*.

Acamathesis (*ak-am-ath-e'-sis*) [*ἀκαμάθησις*]. Same as *Akatamathesia*.

Acampsia (*ah-kamp'-se-ah*) [*ἀ* priv.; *κάμπτειν*, to bend]. Inflexibility of a limb.

Acanaceous (*ak-an-a'-se-us*) [*ἄκανος*, a prickly shrub]. In biology, beset with prickles, as the edges of some leaves.

Acantha (*ak-an'-thah*) [*ἄκανθα*, a thorn]. In botany, a thorn or prickle; in zoölogy, a spine or fin ray; in anatomy, a vertebral process.

Acanthæsthesia (*ak-anth-es-the'-ze-ah*). See *Akanthesthesia*.

Acanthia lectularia (*ak-an'-the-ah lek-chu-la'-re-ah*) [L.]. The common bedbug.

Acanthial (*ak-an'-the-al*) [*ἀκάνθιον*, a little thorn]. Pertaining to the acanthion.

Acanthichthyosis (*ak-anth-ik-the-o'-sis*) [*ἀκάνθιον*, a little thorn; *ἰχθύς*, a fish]. *Ichthyosis spinosa*, *q. v.*

Acanthion (*ak-an'-the-on*) [*ἀκάνθιον*, a little thorn]. See *Craniometrical Points*.

Acanthocarpous (*ak-anth-o-kar'-pus*) [*ἄκανθα*, a thorn; *καρπός*, fruit]. In biology, spiny-fruited.

Acanthocephala (*ak-an-tho-sef'-al-ah*) [*ἄκανθα*, spine; *κεφαλή*, head]. An order of parasitic worms, characterized by a thorny armature of the head and proboscis. They are generally grouped in one genus, *Echinorrhynchys*. They infest pigs, birds, and fishes, and in their larval stage live in crustaceans.

Acanthocephalous (*ak-anth-o-sef'-al-us*) [*ἄκανθα*, a spine; *κεφαλή*, head]. In biology, spiny-headed.

Acanthocladous (*ak-anth-ok'-lad-us*) [*ἄκανθα*, a spine; *κλάδος*, a branch]. In biology, possessing spiny branches.

Acanthoid (*ak-an'-thoid*) [*ἄκανθα*, a spine]. Resembling a spine, or spicula; spinous.

Acanthological (*ak-anth-o-loj'-ik-al*) [*ἄκανθα*, a spine; *λόγειν*, to speak]. In biology, pertaining to the knowledge of spines.

Acantholysis (*ak-an-thol'-is-is*) [*ἄκανθα*, prickle; *λύσις*, a loosening, a wasting]. Any skin disease in which there is an atrophy of the prickle-layer. **A. Bullosa.** See *Epidermolysis*.

Acanthoma (*ak-anth-o'-mah*) [*ἄκανθα*, a spine: *pl.*, *Acantho'mata*]. A localized excessive growth in any part of the prickle-cell layer of the skin.

Acanthomastic (*ak-anth-o-mas'-tik*) [*ἄκανθα*, a spine; *μαστίχη*, mastic]. A gum produced by *Atractylis gummifera*, a plant of the Mediterranean region; valued in the Oriental countries. Unof.

Acanthopelvis (*ak-anth-o-pel'-vis*) [*ἄκανθα*, thorn; *πέλυς*, pelvis]. Same as *Acanthopelys*.

Acanthopelys (*ak-anth-op′-el-is*) [ἀκανθα, thorn; πέλυς, pelvis]. A pelvis that is encroached upon by exostoses.

Acanthophorous (*ak-anth-off′-or-us*) [ἀκανθα, a spine; φέρειν, to bear]. In biology, bearing or producing spines or thorns.

Acanthopod (*ak-anth′-o-pod*) [ἀκανθα, a spine; πούς, foot]. In biology, an animal with spiny feet, or spine-like claws.

Acanthopterous (*ak-anth-op′-ter-us*) [ἀκανθα, a spine; πτέρον, a wing]. In biology, having spiny wings or fins.

Acanthosis (*ak-anth-o′-sis*) [ἀκανθα, thorn]. Any skin disease marked by abnormalities in the prickle-cell layer. *A. Nigricans*, a general pigmentation of the skin, with papillary, mole-like growths; a rare condition.

Acanthus (*ak-anth′-us*) [ἀκανθος, a spine]. A genus of European herbs. *A. mollis* and *A. spinosa* were formerly much esteemed as vulnerary, antidysenteric and antihectic remedies; they are demulcent and mucilaginous. Unof.

Acapsular (*ah-kap′-su-lar*) [ἀ priv.; *capsula*, a small box or capsule]. In biology, destitute of a capsule.

Acardia (*ah-kar′-de-ah*) [ἀ priv.; καρδία, heart]. A monstrosity without heart, developed simultaneously with a normal fetus.

Acardiac (*ah-kar′-de-ak*) [ἀ priv.; καρδία, heart]. 1. Having no heart. 2. A fetus with no heart. See *Acardiacus*.

Acardiacus (*ah-kar-di′-ak-us*) [ἀ priv.; καρδία, heart]. See *Acardiac*. A synonym, employed mainly by the German writers, for omphalosite. The term was adopted because of the frequent absence of the heart in this condition. **A. Acormus.** See *Asomata*. **A. Anceps.** Same as *Paracephalus*, *q. v.*

Acardiohemia, or Acardiohæmia (*ah-kar-de-o-he′-me-ah*) [ἀ priv.; καρδία, heart; αἷμα, blood]. Lack of blood in the heart.

Acardionervia (*ah-kar-de-o-ner′-ve-ah*) [ἀ priv.; καρδία, heart; *nervus*, a sinew]. Diminished nervous action or nerve-stimulus in the heart.

Acardiotrophia (*ah-kar-de-o-tro′-fe-ah*) [ἀ priv.; καρδία, heart; τροφή, nutrition]. Atrophy of the heart.

Acarian (*ah-ka′-re-an*) [ἀκαρής, small, tiny]. Of or pertaining to the acarids or mites.

Acariasis (*ak-ar-i′-as-is*) [ἀ priv.; κείρειν, to cut]. See *Mange*.

Acaricidal (*ak-ar-is-i′-dal*) [ακαρής, small, tiny; *cædere*, to kill]. Destructive of acarids, or mites.

Acaricide (*ak-ar′-is-īd*) [ἀκαρής, small, tiny; *cædere*, to kill]. An agent that destroys acarids.

Acarid, Acaridan (*ak′-ar-id*, *ak-ar′-id-an*) [ἀκαρής, small, tiny]. Pertaining to *Acarus*.

Acarina (*ak-ar-i′-nah*) [L.]. An order of insects (mites) with stout bodies, having the unjointed abdomen consolidated with the head and thorax, with biting, sucking, or puncturing mouth-organs, breathing mostly by means of tracheæ.

Acarinosis (*ak-ar-in-o′-sis*) [*acarus*, a mite]. Any disease, as the itch, produced by a mite, or acarid.

Acarodermatitis (*ak-ar-o-der-mat-i′-tis*) [*acarus*, a mite; *dermatitis*]. Dermatitis dependent upon or caused by acari, or mites.

Acaroid (*ak′-ar-oid*) [*Acarus*, a mite]. Mite-like. **A. Gum,** Botany Bay Gum; Resina lutea. An aromatic resin used in Australia as a remedy for gastric troubles, intestinal catarrhs, diarrheas, *etc.* Dose grs. viij–xvj, in alcoholic solution. Unof. **A. Resin,** Black Boy Gum. The resin of various species of *Xanthorrhea*, *q. v.* Benzoic acid is prepared from it, and it is said to have the properties of storax. and balsam of Peru.

Acarotoxic (*ak-ar-o-toks′-ik*) [*acarus*, a mite; τοξικόν, a poison]. Poisonous, or destructive, to acari.

Acarpæ (*a-kar′-pē*) [ἀ priv.; καρπός, fruit]. A name proposed for a group of skin diseases in which there are no papules, tubercles, or elevated points.

Acarpous (*ak-ar′-pus*) [ἀ priv.; καρπός, fruit]. Having no elevations; not nodular. In biology, producing no fruit; sterile, barren.

Acarus (*ak′-ar-us*) [ἀ priv.; κείρειν, to cut (because so small): *pl.*, *Acari*]. The mite, or tick, a parasite of man and animals. *A. autumnalis* the harvest-bug, now called *Leptus autumnalis*. *A. folliculorum.* See *Steatozoön*. *A. scabiei.* See *Scabies*.

Acatalepsy (*ah-kat′-al-ep-se*) [ἀ priv.; καταλαμβάνειν, to understand]. 1. Uncertainty in diagnosis. 2. Mental impairment; dementia.

Acataleptic (*ah-kat-al-ep′-tik*) [ἀ priv.; καταλαμβάνειν, to understand]. Uncertain; doubtful (used of a prognosis or a diagnosis of a disease).

Acatamathesia (*ah-kat-am-ath-e′-ze-ah*) [ἀ priv.; καταμάθησις, understanding]. 1. Inability to understand conversation, due to mental disorder. 2. A morbid blunting of the perceptions; as in psychical deafness, or psychical blindness.

Acataphasia (*ah-kat-af-a′-ze-ah*) [ἀ priv.; κατά, after; φάσις, utterance]. A disorder in the syntactical arrangement of uttered speech, due to some central lesion.

Acataposis (*ah-kat-ap′-o-sis*) [ἀ priv.; κατά, down; πόσις, a drinking, a swallowing]. A difficulty in swallowing; dysphagia.

Acatastasia (*ah-kat-as-ta′-ze-ah*) [ἀκαταστασία]. Absence of regularity, or of fixed character, in the course of a disease, or in the nature of an excretion.

Acatastatic (*ah-kat-as-tat′-ik*). Marked or characterized by acatastasia; irregular; not of definite type.

Acatharsia (*ah-kath-ar′-se-ah*) [ἀκαθαρσία, uncleansed state]. Impurity; foulness; need of purgation, or cleansing.

Acaudal (*ah-kaw′-dal*) [ἀ priv.; *cauda*, a tail]. Acaudate, ecaudate, tailless, anurous.

Acaudate (*ah-kaw′-dāt*). Same as *Acaudal*.

Acaules (*ah-kaw′-lēz*) [ἀ priv.; *caulis*, a stem]. Plants which, as in the case of lichens, algæ, *etc.*, lack a stalk, or have it but very indistinctly developed.

Acaulescence (*ah-kaw-les′-ens*) [ἀ priv.; *caulis*, a stalk]. In biology, plants wherein the growth of the main stem is arrested. Also *Acaulosia*.

Acaulescent (*ah-kaw-les′-ent*) [ἀ priv.; *caulis*, a stalk]. In botany, stemless.

Acaulosia (*ah-kaw-lo′-se-ah*) [ἀ priv.; *caulis*, a stalk]. See *Acaulescence*.

Accelerans Nerve (*ak-sel′-er-ans*) [L.]. A nerve from the accelerans center in the medulla to the heart, intermediating acceleration of its rhythm.

Acceleration (*ak-sel-er-a′-shun*) [*acceleratio*]. Quickening, as of the pulse, or of the respiratory function. In biology, the term applied to change of structure during growth brought about by the addition of parts, either by "homotopy" or by "heterotopy."

Accelerative Epilepsy (*ak-sel′-er-a-tiv ep′-il-ep-se*). See *Epilepsy*.

Accelerator Urinæ (*ak-sel′-er-a-tor u-ri′-nē*) [L.]. A muscle of the penis whose function is to expel the last drops in urination, to expel the semen, and to assist erection. The sphincter vaginæ is its analogue in the female. See *Muscles, Table of.*

Accentuation (*ak-sen-tu-a′-shun*) [*accentuare*]. A term applied to the heart sounds, generally the second, when they are louder, because of an increased blood-tension in the vessels, giving rise to a forcible elastic recoil of the latter with abrupt closure of the valves.

Access (*ak'-ses*) [*accessus*, an approach]. 1. An attack of a disease. 2. The return of a fit, or paroxysm. 3. Cohabitation.

Accessiflexor (*ak-ses-e-fleks'-or*) [*accessus* and *flexor*]. An accessory flexor muscle.

Accession (*ak-sesh'-un*) [*accessio*; *ad*, to; *cedere*, to go]. The assault, beginning, or onset of a disease, or of a stage of the same; applied especially to a recurrence of periodical disease.

Accessive (*ak-ses'-iv*) [*accessio*]. Marked or characterized by sharp and sudden accessions or paroxysms.

Accessorium (*ak-ses-so'-re-um*) [L.]. An accessory part; an adjunct, or appendage.

Accessory (*ak'-ses-o-re*, or *ak-ses'-o-re*) [*accessorius*]. A term applied to certain glands, muscles, ducts, nerves, arteries, *etc.*, that are often inconstant, but always auxiliary in function, course, *etc.*, to the principal. Certain small muscles, as the lumbricales, are regarded as accessory to more important muscles. In biology, something additional; as an accessory bud, fruit, or plume. **A. Buds**, in botany, buds that are developed by the side of, or above, the normal axillary bud. **A. Fruits**, in botany, those fruits a considerable portion of whose substance is distinct from the seed-vessel and formed of the accrescent and succulent calyx, or torus, or receptacle, bracts, *etc.* **A. Gland of Rosenmüller.** See *Gland.* **A. Gland of the Pancreas**, *Brunner's Glands*, *q. v.* **A. of the Parotid**, the *Socia Parotidis*, *q. v.* **A. Valves**, in zoölogy, small additional valves which occur in certain forms, as the accessory valves placed near the umbones of the genus *Pholas* among the *Mollusca*.

Accident (*ak'-se-dent*) [*accedere*, to occur]. 1. In legal medicine, an event occurring to an individual without his expectation, and without the possibility of his preventing it at the moment of its occurrence. 2. An intercurrent or complicating symptom or event, not to be looked for in the regular progression of an attack of disease.

Accidental (*ak-se-dent'-al*) [*accidentalis*]. 1. Due to, or caused by, an accident. 2. Intercurrent; having no essential connection with other conditions or symptoms. **A. Hemorrhage.** See *Hemorrhage.*

Accidentalism (*ak-se-dent'-al-ism*) [*accidentalis*]. That theory of medicine that ignores pathology and etiology, and attends only to the symptoms or accidental features of disease.

Accidentalist (*ak-se-dent'-al-ist*) [*accidentalis*]. One who advocates or follows accidentalism.

Accipiter (*ak-sip'-it-er*) [L., a "hawk"]. A facial bandage with tails radiating like the claws of a hawk.

Acclimate (*ak-kli'-māt*) [*ad*, to; *clima*, a climate]. To accustom to a new or untried climate.

Acclimatation (*ak-kli-mat-a'-shun*), or

Acclimation (*ak-lim-a'-shun*). See *Acclimatization.*

Acclimatization (*ak-kli-mat-iz-a'-shun*) [*ad*, to; *clima*, climate]. The process of becoming accustomed to the climate, soil, water, *etc.*, of a country to which a plant, animal, person, or a people has removed.

Acclimatize (*ak-kli'-mat-īz*) [*ad*, to; *clima*, climate]. See *Acclimate.*

Acclivis (*ak-kli'-vis*) [L., "sloping"]. The *Obliquus internus* muscle of the abdomen.

Accommodation (*ak-om-o-da'-shun*) [*accommodare*, to adjust]. Adaptation or adjustment. Adaptation of the fetus to the uterus and birth-canal. **A., Absolute**, the accommodation of either eye separately. **A., Anomalies of**, departures from the normal in the action of the mechanism of accommodation. **A., Histological**, the occurrence of changes in the morphology and function of cells following changed conditions. **A., Negative**, the eye passive or at rest. **A. of the Eye**, that function of the ciliary muscle and lens whereby objects at different distances are clearly seen. It depends upon the inherent elasticity of the lens, which when the ciliary muscle of an emmetropic eye is at rest is adapted to the proper focalization of parallel rays of light, or of such rays as proceed from an infinite distance, or from the horizon of the observer. Objects nearer, to be clearly seen, require a greater refracting power on the part of the eye because the rays from such objects are more divergent. This additional refracting power is gained by an increased antero-posterior diameter of

the lens, *L*, (*illustration annexed*) brought about by the contraction of the ciliary muscle, *M*, which occasions a loosening of the suspensory ligament and a thickening of the lens by its own elasticity. **A., Paralysis of**, paralysis of the ciliary muscle. **A., Phosphenes**, the peripheral light streak seen in the dark after the act of accommodation. **A., Range of**, the distance between the *Punctum proximum*, or nearest of distinct vision, and the *Punctum remotissimum*, or the most distant point. **A. Theory**, a theory that ascribes the production of myopia to a distention of the posterior portion of the sclera from the increased intra-ocular pressure dependent upon frequently repeated accommodation of the eyes.

Accompaniment (of the Cataract) (*a-kum'-pan-e-ment*). An old name for secondary or recurrent capsular cataract; opacity of the capsule following an operation for cataract.

Accouchée (*ak-koo-shay*) [Fr., *a*, to; *couche*, a bed]. A woman delivered of a child.

Accouchement (*ak-koosh-mong*) [*ad*, to; *couche*, bed]. The French term for labor, or delivery of a child. The act of childbirth. **A. Forcé**, rapid and forcible delivery with the hand during severe hemorrhage.

Accoucheur (*ak-koo-shur*) [Fr.]. A man-midwife.

Accoucheuse (*ak-koo-shuz*) [Fr.]. A midwife.

Accrementitial (*ak-re-men-tish'-al*) [*accrescere*, to increase]. In biology, of or pertaining to the process of accrementition.

Accrementition (*ak-re-men-tish'-un*) [*ad*, to; *crescere*, to grow]. A growth in which increase takes place by interstitial development from blastema, and also by reproduction of cells by fission. The production or development of a new individual by the separation of a part of the parent; gemmation.

Accrescent (*ak-res'-ent*) [*accrescere*, to grow]. In biology, refers to those parts connected with the flower which increase in size after flowering, as frequently occurs with the calyx, involucre, *etc.*

Accrete (*ak-rēt*) [*accretus*; *accrescere*, to increase, grow]. In biology, grown together.

Accretion (*ak-re'-shun*) [*ad*, to; *crescere*, to increase]. A term denoting the manner by which crystalline and certain organic forms increase their material substance. Also, the adherence of parts that are normally separate.

Accumbent (*ak-um'-bent*) [*ad*, to; *cumbere*, to lie down]. In biology, lying against a thing. Cotyledons

are accumbent when the edges of their applied faces lie against the radicle.

Accumulator (*ak-u'-mu-la-tor*) [*accumulare*, to heap up]. An apparatus to store electricity.

A. C. E. Mixture. An anesthetic mixture composed of alcohol 1 part, chloroform 2 parts, ether 3 parts. See *Anesthetic*.

Acedia (*ah-se'-de-ah*) [ἀκηδία]. A certain form of melancholia.

Acelius (*ah-se'-le-us*) [ἀ priv.; κοιλία, the belly]. Without a belly; applied to those extremely emaciated.

Acelomatous (*ah-sel-o'-mat-us*) [ἀ priv.; κοίλωμα, a hollow]. In biology, destitute of a perivisceral cavity or cœlum.

Acelomi (*ah-se'-lo-mi*) [ἀ priv.; κοιλία, the belly]. In biology, worms destitute of a perivisceral cavity, as tapeworms.

Acelomous (*ah-se'-lo-mus*). See *Acelomatous*.

Acelous (*ah-se'-lus*) [ἀ priv.; κοίλος, hollow]. Without intestines; anenterous.

Acenaphthene (*as-en-af'-thēn*) [*aceticus*; naphthalene], $C_{12}H_{10}$. A hydrocarbon that occurs in coal tar, and separates on cooling from the fraction boiling at 260–280° C. It crystallizes from hot alcohol in long needles melting at 95° C. and boiling at 277° C.

Acentric (*ah-sen'-trik*) [ἀ priv.; κέντρον, center]. Not centric; not originating in, or pertaining to, a nerve-center; peripheric.

Aceognosia (*as-e-og-no'-se-ah*) [ἄκος, a remedy; γνῶσις, knowledge]. A knowledge of remedies.

Aceology (*as-e-ol'-o-je*) [ἄκος, ἄκεος, a remedy; λόγος, a discourse]. Therapeutics; medical and surgical treatment of disease; acology.

Acephalan (*ah-sef'-al-an*) [ἀκέφαλος, headless]. An acephal, one of the *acephala*, or pertaining to such. A lamellibranchiate mollusc.

Acephalemia, or Acephalhemia (*ah-sef-al-e'-me-ah*) [ἀ priv.; κεφαλή, head; αἷμα, blood]. Deficiency of blood in the head.

Acephalia (*ah-sef-a'-le-ah*) [ἀ priv.; κεφαλή, head]. In teratology, the absence of the head.

Acephalism (*ah-sef'-al-izm*) [ἀ priv.; κεφαλή, head]. See *Acephalia*.

Acephalobrachia (*ah-sef-al-o-bra'-ke-ah*) [ἀ priv.; κεφαλή, head; βραχίων, arm]. In teratology, absence of the head and arms.

Acephalobrachius (*ah-sef-al-o-bra'-ke-us*) [ἀ; κεφαλή; βραχίων]. A monster with neither head nor arms.

Acephalocardia (*ah-sef-al-o-kar'-de-ah*) [ἀ priv.; κεφαλή, head; καρδία, heart]. Absence of the head and heart.

Acephalocardius (*ah-sef-al-o-kar'-de-us*) [ἀ; κεφαλή; καρδία]. A monster with neither head nor heart.

Acephalochiria (*ah-sef-al-o-ki'-re-ah*) [ἀ priv.; κεφαλή, head; χείρ, hand]. Absence of the head and hands.

Acephalochirus (*ah-sef'-al-o-ki'-rus*) [See *Acephalochiria*]. A monster with neither head nor hands.

Acephalocyst (*ah-sef'-al-o-sist*) [ἀ priv.; κεφαλή, head; κύστις, a bladder]. The bladder-worm. A headless, sterile hydatid, found in the liver and other organs. *A. racemosa*, the hydatid mole of the uterus.

Acephalogaster (*ah-sef-al-o-gas'-ter*) [ἀκεφαλός, headless; γαστήρ, belly]. A monster with neither head nor stomach.

Acephalogasteria (*ah-sef-al-o-gas-te'-re-ah*). Absence of the head and stomach. See *Acephalogaster*.

Acephalophoran (*ah-sef-al-off'-o-ran*) [ἀ priv.; κεφαλή, head; φέρειν, to bear]. In biology, a member of DeBlainville's group of molluscs, *Acephalophora*.

Acephalopodia (*ah-sef-al-o-po'-de-ah*) [ἀ priv.; κεφαλή, head; πούς, foot]. Absence of the head and feet.

Acephalopodius (*ah-sef-al-o-po'-de-us*). A monster with neither head nor feet. See *Acephalopodia*.

Acephalorrhachia (*ah-sef-al-o-ra'-ke-ah*) [ἀ priv.; κεφαλή, head; ῥάχις, spine]. Absence of the head and vertebral column.

Acephalostomia (*ah-sef-al-o-sto'-me-ah*) [ἀ priv.; κεφαλή, head; στόμα, mouth]. Absence of the head, with a mouth-like opening on the superior aspect.

Acephalostomus (*ah-sef-al-os'-to-mus*) [ἀ priv.; κεφαλή; στόμα]. A monster with no head, but with a mouth-like aperture. See *Acephalostomia*.

Acephalothoracia (*ah-sef-al-o-tho-ra'-se-ah*) [ἀ priv.; κεφαλή, head; θώραξ, chest]. Absence of the head and thorax.

Acephalothorus (*ah-sef-al-o-tho'-rus*). A monster without head or thorax. See *Acephalothoracia*.

Acephalous (*ah-sef'-al-us*) [ἀκεφαλός, headless]. Headless.

Acephalus (*ah-sef'-al-us*) [ἀ priv.; κεφαλή, head]. 1. A species of omphalositic monsters characterized by complete absence of the head and usually of the upper extremities. It is the commonest condition among the omphalosites. 2. A variety of the above species marked by the highest form of development. The head is absent, but there is at least one superior extremity, and the thorax is generally fairly well-developed.

Acer (*a'-ser*). A genus of sapindaceous trees and shrubs; the maples. *A. saccharinum*, the Sugar Maple of North America, affords a large commercial supply of sugar. *A. rubrum*, the Red Maple, has an astringent inner bark. *A. pennsylvanicum*, Striped Maple, is said to be antemetic and alterative. Unof.

Aceras (*as'-er-as*) [ἀ priv.; κέρας, horn, spur]. A genus of orchids. *A. anthropophora* (green-man, man-orchid) has sudorific leaves, and the bulbs are used as salep. Unof.

Acerates (*as-er-a'-tēz*) [ἀ priv.; κέρας, horn]. A genus of asclepiadaceous plants, regarded by some as a section of the genus *Gomphocarpus*. *A. decumbens*, of New Mexico, is said to cure snake bites. *A. longifolia*, of the U. S., is diaphoretic. Unof.

Aceratophorous (*ah-se-ra-tof'-o-rus*) [ἀ priv.; κέρας, horn; φέρειν, to bear]. In biology, hornless, muley. *Cf. Acerous*.

Aceratosis (*ah-ser-at-o'-sis*) [ἀ priv.; κέρας, horn]. Deficiency or imperfection of corneous tissue.

Acerb (*a-serb'*) [*acerbus*, bitter]. Having a bitter, astringent and pungent taste; as certain drugs.

Acerbity (*a-serb'-it-e*) [*acerbitas*, sharpness, sourness]. Acidity combined with astringency.

Aceric (*as-er'-ik*) [*acer*, a maple tree]. Pertaining to, or found in the maple; as aceric acid.

Aceride (*as'-er-īd*) [ἀ priv.; *cera*, wax]. An ointment or plaster containing no wax.

Acerose (*as'-er-ōs*) [*acus* (*acer*), chaff]. In botany, chaffy; needle-shaped, as pine needles.

Acerotous (*ah-ser'-o-tus*) [ἀ priv.; κηρός, wax]. Containing no wax; said of ointments and plasters.

Acerous (*as'-er-us*) [ἀ priv.; κέρας, a horn]. In biology, having undeveloped, minute, or no horns or antennæ; aceratophorous.

Acervate (*as-er'-vāt*) [*acervatus*, *p.p.* of *acervare*, to heap upon]. In biology, growing in heaps or clusters.

Acervuline (*as-er'-vu-lin*) [*acervulus*, a heap]. Agminated, or aggregated; as certain mucous glands.

Acervulus, or Acervulus cerebri (*as-er'-vu-lus ser'-e-bri*). Concretionary matter near the base of the pineal gland, consisting of alkaline phosphates and carbonates, with amyloid matter; brain-sand.

Acescence (*as-es'-ens*) [*acescere*, to grow sour]. 1. The process of becoming sour; the quality of being

somewhat sour. 2. A disease of wines, whereby they become sour owing to the agency of *mycoderma aceti*.

Acescency (*as-es'-en-se*). See *Acescence*.

Acescent (*as-es'-ent*) [*acescere*, to become sour]. Somewhat acid or tart; acidulous.

Aceta (*as-e'-tah*). Plural of *Acetum*, *q. v.*

Acetable (*as-et'-a-bl*) [*acetabulum*, a small cup]. An old name for the *acetabulum*.

Acetabular (*as-et-ab'-u-lar*) [*acetabulum*, a small cup]. Pertaining to the acetabulum.

Acetabuliferous (*as-et-ab-u-lif'-er-us*) [*acetabulum*, a small cup; *ferre*, to bear]. Having suckers, as the arms of cuttle-fishes and squids.

Acetabuliform (*as-et-ab'-u-le-form*) [*acetabulum*, a small cup; *forma*, form]. Having the form of the acetabulum, or of a shallow cup; cotyloid, or glenoid.

Acetabulum (*as-et-ab'-u-lum*) [L., a small cup or measure]. In biology, any cup-shaped cavity or organ. The articulating cavity of the head of the femur, or the leg of an insect; one of the suckers on the arms of cephalopods, or on the scolex of a tapeworm; the receptacle of certain fungi and lichens.

Acetal (*as'-et-al*) [*acetum*, vinegar], $C_6H_{14}O_2$. Ethidene diethylate, a colorless, mobile liquid, with an ethereal odor, produced by the imperfect oxidation of alcohol under the influence of platinum black. Sparingly soluble in water; boils at 104° C.; sp. gr. at 20° is 0.8304. Its action is that of a soporific. Dose ʒj.

Acetaldehyd (*as-et-al'-de-hīd*). The normal aldehyd; ethaldehyd. See *Aldehyd*.

Acetals (*as'-et-alz*) [*acetum*, vinegar]. Products of the combination of aldehyds with the alcohols at 100° C.

Acetamid (*as-et'-am-id*), C_2H_5NO. A white crystalline solid produced by distilling ammonium acetate, or by heating ethyl acetate with strong aqueous ammonia. It combines with both acids and metals to form unstable compounds.

Acetanilid (*as-et-an'-il-id*), C_8H_9NO. A white, crystalline solid. Produced by boiling anilin and glacial acetic acid together for several hours; the crystalline mass is then distilled. It melts at 114° and boils at 295°. It is soluble in hot water, alcohol and ether. Under the name *antifebrin* it is prescribed as an antipyretic. Dose gr. iij–xv.

Acetarium (*as-et-a'-re-um*) [*gen.*, *Acetarii*: *pl.*, *Acetaria*]. A pickle or salad. **A. Scorbuticum**, a pickle containing leaves of scurvy-grass or other anti-scorbutic plants; used in the treatment of scorbutic cases. Unof.

Acetary (*as'-et-a-re*) [*acetum*, vinegar]. An obsolete or rare name for a sour pulpy substance found in pears and some other fruits; often enclosed within a congeries of calculous granules.

Acetate (*as'-et-āt*) [*acetum*, vinegar]. Any salt of acetic acid. **A. of Lead**, plumbi acetas. See *Plumbum*.

Acetic (*as-e'-tik*) [*acetum*, vinegar]. Pertaining to *acetum* or vinegar; sour. See *Acid, Acetic*. **A. Fermentation**, the development of acetic acid by the activity of the *Mycoderma aceti*.

Acetin (*as'-et-in*) [*acetum*, vinegar]. A chemical compound formed by the union of glycerin and acetic acid.

Acetolatum, (*as-et-o-la'-tum*) [*gen.*, *Acetolati*: *pl.*, *Acetolata*]. Distilled vinegar, variously aromatized or medicated.

Acetolature (*as-et-ol'-at-ūr*) [*acetolaturum*]. Any acetous tincture, or medicated vinegar.

Acetometer (*as-et-om'-et-er*) [*acetum*, vinegar; *μέτρον*, measure]. An instrument used in the quantitive determination of acetic acid.

Acetometry (*as-et-om'-et-re*) [*acetum*, vinegar; *μέτρον*, measure]. The quantitive estimation of the amount of acetic acid in vinegar. Usually made by an *acetometer*.

Acetone (*as'-et-ōn*) [*acetum*, vinegar], C_3H_6O. Dimethyl Ketone. A colorless, mobile liquid, of peculiar odor and burning taste; present in crude wood-spirit; it occurs in small quantities in the blood and in normal urine, and in considerable quantities in the urine of diabetics. Like methyl alcohol it is miscible in all proportions with ether, alcohol, and water. It is an excellent solvent for resins, gums, camphor, fats, and gun-cotton.

Acetones (*as'-et-ōnz*). A class of compounds that may be regarded as consisting of two alcoholic radicals united by the group CO, or as aldehyds in which hydrogen of the group COH has been replaced by an alcoholic radical.

Acetonemia (*as-et-o-ne'-me-ah*) [*acetone*; *αἷμα*, blood.] The presence of acetone in the blood. It may result from a number of diseases, but is characteristic of chronic diabetes, and is associated with dyspnea, subnormal temperature, lowered pulse-rate, *etc.* The patient finally falls into coma. The treatment consists in increasing the secretions and by removing the causes of the diseases.

Acetonuria (*as-et-ōn-u'-re-ah*) [*acetone*; *οὖρον*, urine]. The presence of acetone in the urine.

Acetophenone (*as-et-o-fe'-nōn*), $C_6H_5(CO)(CH_3)$. "Hypnone;" a hypnotic and antiseptic. Without satisfactory action. Dose ♏iv-xv. It results from the action of zinc methyl upon benzoyl chlorid. Crystallizes in large plates, melts at 20.5°, and boils at 202°.

Acetosella (*as-et-o-sel'-ah*). See *Oxalis acetosella*.

Acetous (*as-e'-tus*) [*acetum*, vinegar]. Like or resembling vinegar; pertaining to, or charged with vinegar or acetic acid.

Acetoxim (*as-et-oks'-im*), $(CH_3)_2C.N.OH$. A compound formed by the action of hydroxylamin upon acetone; readily soluble in water, alcohol and ether; fuses at 60°, boils at 135°.

Acetoxims (*as-et-oks'-imz*). See *Aldoxims*.

Acetphenetidin (*as-et-fe-net'-id-in*). See *Phenacetin*.

Acetum, (*as-e'-tum*) [*gen.*, *Aceta*: *pl.*, *Aceti*]. [L.]. Vinegar. An impure, dilute acetic acid produced by acetous fermentation of wine, cider, or other fruit-juice. See *Fermentation*. In pharmacy, a solution of the active principles of certain drugs in dilute acetic acid. There are four official *aceta*, each of which contains the soluble principles of ten per cent. of its weight, viz., of lobelia, opium, sanguinaria, and squill; the *acetum* of cantharides is official in Great Britain. **A. aromaticum** (N. F.) ["aromatic vinegar"], a mixture of alcohol, water and acetic acid, aromatized with the oils of rosemary, lavender, juniper, peppermint, cassia, lemon and cloves. **A. britannicum**, an aromatic vinegar consisting of glacial acetic acid 600.0, camphor 60.0, oil of cloves 2.0, oil of cinnamon 1.0, oil of lavender 0.5.

Acetyl (*as'-et-il*) [*acetum*, vinegar], (C_2H_3O). A univalent radical supposed to exist in acetic acid and its derivatives. Aldehyd may be regarded as the hydrid and acetic acid as the hydrate, of acetyl. **A. Peroxid**, $(C_2H_3O)_2O_2$, a thick liquid, insoluble in water, but readily dissolved by ether and alcohol. It is a powerful oxidizing agent. It is decomposed in sunlight and explodes violently when heated.

Acetylene (*as-et'-il-ēn*) [*acetum*, vinegar], C_2H_2. A colorless gas, with a characteristic and very unpleasant odor, burning with a luminous, smoky flame. Illuminating gas contains a small amount of it. Formed by the imperfect combustion of illuminating gas and other hydrocarbons. The *acetylene series* of hydrocarbons has the general formula, $C_n H_{2n-2}$.

Ache (*āk*) [A. S., *acan*, to ache]. Any continuous or throbbing pain.

Ache (*ātch*) [Fr.]. An old, or local name for common parsley. See *Apium*.

Acheilia (*ah-ki'-le-ah*) [*ἀ* priv.; *χεῖλος*, a lip]. The congenital absence of lips.

Acheilous (*ah-ki'-lus*) [*ἀ* priv.; *χεῖλος*, a lip]. Born without lips; affected with acheilia.

Acheiria (*ah-ki'-re-ah*) [*ἀ* priv.; *χείρ*, a hand]. The congenital absence of hands.

Acheirous (*ah-ki'-rus*) [*ἀ* priv.; *χείρ*, a hand]. Affected with acheiria; born without hands.

Acheirus (*ah-ki'-rus*). An acheirous person, or fetus; one who was born without hands.

Achene (*a-kēn'*). Same as *Achenium*.

Achenium (*ah-ke'-ne-um*) [*ἀ* priv.; *χαίνειν*, gape: *pl.*, *Achenia*]. In biology, a small, dry, one-seeded, indehiscent fruit.

Achenocarp, or **Achænocarp** (*ah-ke'-no-karp*) [*ἀ* priv.; *χαίνειν*, to gape; *καρπός*, fruit]. In biology, any dry fruit, not opening spontaneously when ripe. See *Achenium*.

Achenodium (*ak-en-o'-de-um*) [L.]. A cremocarp or double achenium, as produced by some umbelliferous plants. See *Achenium*.

Achetous, or **Achætous** (*ah-ke'-tus*) [*ἀ* priv.; *χαίτη*, hair]. In biology, lacking setæ, chætæ, or bristles.

Achilia (*ah-ki'-le-ah*). See *Acheilia*.

Achillea (*ak-il-e'-ah*) [*Achilles*, its reputed discoverer]. Milfoil, Yarrow. The herb *A. millefolium*. Properties due to a bitter, aromatic, astringent, tonic extractive, *achillein*, and a volatile oil. It has long been used as a vulnerary, and has been highly recommended for intermittents, and in low, exanthematous fevers. Dose ʒj–Oj infusion *ad lib.*; ℞ of the extractive, ʒj–iij; of the volatile oil, gtt. v–xv. Unof. To the genus *Achillea* belong various other unofficial medicinal plants, as *A. moschata*, of the Alps, used in preparing cordials and a diaphoretic medicine, and *A. ptarmica*, or sneezewort, a strong sialagogue.

Achillein (*ak-il'-e-in*) [*achilleinum*; *gen.*, *Achilleini*]. An extractive from *Achillea millifolium*. See *Achillea*.

Achilles Tendon (*ak-il'-ēz ten'-don*). See *Tendon*.

Achillodynia (*ak-il-o-din'-e-ah*) [*Achilles*; *ὀδύνη*, pain]. Pain referred to the insertion of the tendo-Achillis, sometimes with apparent swelling of the tendon and of the os calcis.

Achilous (*ah-ki'-lus*). See *Acheilous*.

Achiote (*a-che-o'-te*). See *Annotto*.

Achiria (*ah-ki'-re-ah*). See *Acheiria*.

Achirous (*ah-ki'-rus*). See *Acheirous*.

Achirus (*ah-ki'-rus*). See *Acheirus*.

Achlamydeous (*ak-lam-id'-e-us*) [*ἀ* priv.; *χλαμύς*, a cloak). In biology, flowers lacking calyx, corolla, or perianth.

Achlorophyllous (*ah-klo-ro-fil'-us*) [*ἀ* priv.; *χλωρός*, green; *φύλλον*, leaf]. In biology, without chlorophyll, or leaf-green.

Achloropsia (*ah-klo-rop'-se-ah*) [*ἀ* priv.; *χλωρός*, green; *ὄψις*, vision]. Green-blindness.

Achlys (*ak'-lis*) [*ἀχλύς*, gloom, mist]. Cloudiness of the cornea.

Achne (*ak'-ne*) [*ἀχνη*, anything shaved off]. 1. Lint, or charpie; floss. 2. Mucus upon the eye.

Acholia (*ah-ko'-le-ah*) [*ἀ* priv.; *χολή*, bile]. Non-secretion or non-excretion of bile.

Acholic (*ah-kol-'ik*) [*ἀ*; *χολή*]. Affected with acholia.

Acholous (*ak'-o-lus*) [*ἀ* priv.; *χολή*, bile]. Pertaining to or affected with acholia.

Achondroplasia (*ah-kon-dro-pla'-se-ah*) [*ἀ* priv.; *χόνδρος*, cartilage; *πλάσσειν*, to form]. Lack of development in a cartilaginous structure; the absorption of cartilage during its transformation into bone.

Achondroplasy (*ah-kon'-dro-pla-se*) [*ἀ* priv.; *χόνδρος*, cartilage; *πλάσσειν*, to form]. Lack of the normal development of cartilage. Parrot's term for a form of fetal rickets in which the limbs are short, the curves of the bones exaggerated, and there is an absence of the proliferating zone of cartilage at the junction of the epiphyses. The children are generally still-born. This condition is very much like a fetal cretinism.

Achor (*a'-kor*) [*ἀχωρ*, chaff, scurf, or dandruff: *pl.*, *Achores* (*a-kor'-ēz*)]. *Crusta lactea*. A small pustule, followed by a scab, upon the heads of infants.

Achordal (*ah-kor'-dal*) [*ἀ* priv.; *χόρδη*, cord]. Not derived from the notochord.

Achorion (*a-ko'-re-on*) [dim. of *ἄχωρ*, chaff]. A genus including several species of fungous (or fungoid) organisms (possibly modified forms of *Penicillium glaucum*), found in the skin, especially the hair follicles. *A. keratophagus*, the form causing *Onychomycosis*, *q. v.* *A. lebertii*, the parasite of *Tinea tonsurans*. *A. schönleinii*, the species occurring in ringworm or *Tinea favosa*.

Achroa (*ah-kro'-ah*). See *Achroia*.

Achroia (*ah-kroi'-ah*). Same as *Achroma*, *q. v.*

Achroicythemia (*ah-kroi-si-the'-me-ah*). Same as *Achroiocythemia*. See also *Oligochromemia*.

Achroiocythemia (*ah-kroi-o-si-the'-me-ah*), or **Achrœocythæmia** (*ah-kre-o-si-the'-me-ah*) [*ἄχροως*, colorless; *κύτος*, cell; *αἷμα*, blood]. A deficiency of hemoglobin in the red blood corpuscles; also, the diseased state that is associated with such deficiency.

Achroleucous (*ah-kro-lu'-kus*) [*ἀχροος*, pale; *λευκός*, white]. Yellowish-white, dull cream color.

Achroma (*ah-kro'-mah*) [*ἀ* priv.; *χρῶμα*, color]. Absence of color. Pallor. Paleness, from whatsoever cause. **A., Congenital.** See *Albinism*. **A. Cutis.** See *Leukoderma*.

Achromasia (*ah-kro-ma'-ze-ah*). See *Achroma*.

Achromatic (*ah-kro-mat'-ik*) [*ἀ* priv.; *χρῶμα*, color]. Pertaining to achroma; without color. **A. Lens**, one the dispersing power of which is exactly neutralized by another lens having the same curvature but of unequal refractive index. See also *Aberration* and *Objective*. **A. Triplet.** See *Microscope*.

Achromatin (*ah-kro'-mat-in*) [*ἀ* priv.; *χρῶμα*, color]. The substance in the nucleus of a cell prior to division. So called because not readily stained by coloring agents. See *Cell Body*. **A. of Flemming.** See *Paralinin*.

Achromatism (*ah-kro'-mat-izm*) [*ἀ* priv.; *χρῶμα*, color]. Absence of chromatic aberration.

Achromatopsia (*ah-kro-mat-ōp'-se-ah*) [*ἀ* priv.; *χρῶμα*, color; *ὄψις*, eyesight]. Color-blindness; Daltonism; dyschromatopsia.

Achromatosis (*ah-kro-mat-o'-sis*) [*ἀ* priv.; *χρῶμα*, color]. Any disease characterized by deficiency of pigmentation in the integumentary tissues.

Achromatous (*ah-kro'-mat-us*) [*ἀ* priv.; *χρῶμα*, color]. Deficient in color.

Achromia (*ah-kro'-me-ah*) [*ἀ* priv.; *χρῶμα*, color]. Albinism; achroma.

Achromodermia (*ah-kro-mo-der'-me-ah*) [*ἀ* priv.; *χρῶμα*, color; *δέρμα*, skin]. An albinotic, or colorless state of the skin.

Achromophilous (*ah-kro-mof'-il-us*) [*ἀ* priv.; *χρῶμα*, color; *φιλεῖν*, to love]. Not readily stained; not chromophilous.

Achromotrichia (*ah-kro-mo-trik'-e-ah*) [*ἀ* priv.; *χρῶμα*, color; *θρίξ*, hair]. Absence of pigment from the hair.

Achromous (*ah-kro'-mus*) [*ἀ* priv.; *χρῶμα*, color]. Pale, colorless; having no color.

Achroödextrin (*ah-kro-o-deks'-trin*) [*ἀχροος*, colorless; *dexter*, right]. A reducing dextrin formed by the action

of the diastatic ferment of saliva upon starch or glycogen. It is a modification of dextrin that may be precipitated by alcohol, and is not altered by ptyalin, nor colored by iodin.

Achylia (*ah-ki'-le-ah*) [*ἀ* priv.; *χυλός*, juice]. Absence or deficiency of juice, or of chyle.

Achylosis (*ah-ki-lo'-sis*) [*ἀ* priv.; *χυλός*, juice]. Deficient chylification.

Achylous (*ah-ki'-lus*) [*ἀ* priv.; *χυλός*, juice]. Without chyle; deficient in chyle or juice.

Achymosis (*ah-ki-mo'-sis*) [*ἀ* priv.; *χυμός*, chyme]. Deficient chymification.

Achyranthes (*ah-ki-ran'-thēz*) [*ἄχυρον*, chaff; *ἄνθος*, a flower]. A genus of amyrantaceous plants. *A. calea*, of Mexico, is febrifugal. *A. repens*, of Europe and the United States, is diuretic. Unof.

Acicula (*as-ik'-u-lah*) [dim. of *acus*, a needle]. In biology, a spine, bristle, or prickle; the bristle-like flower of a grass.

Acicular (*as-ik'-u-lar*) [*acus*, a needle]. Needle-like.

Aciculum (*as-ik'-u-lum*) [dim. of *acus*, a needle: *pl.*, *Acicula*]. In biology, one of the slender sharp bristles in the rudimentary limbs of some worms.

Aciculus (*as-ik'-u-lus*) [*acus*, a needle]. In biology, a stout bristle or prickle.

Acid (*as'-id*) [*acere*, to be sour]. A name loosely applied to any substance having a sour taste. A compound of an electro-negative element with one or more atoms of hydrogen which can be replaced by electro-positive or basic atoms. Acids vary in their terminations according to the quantity of oxygen or other electro-negative constituent. Those having the maximum of oxygen end in *-ic*; those of a lower degree in *-ous*. Where there are more than two combinations the preposition *hyper-* is prefixed to the highest, and *hypo-* to the lowest. Acids that end in *-ic*, as sulphur*ic* acid, form salts terminating in *-ate*; those ending in *-ous* form salts terminating in *-ite*. Physiologically, acids in concentrated form act as caustics; diluted and in medicinal doses they check acid-producing and increase alkaline secretions. **A., Abietic.** See *Abietic.* **A., Abric** ($C_{12}H_{24}N_3O$), a crystallizable acid, said to exist in jequirity. **A., Aceric**, found in the juice of *Acer campestre*, the common English maple. **A., Acetic**, an acid solution composed of 36 parts of absolute acetic acid ($C_2H_4O_2$), and 64 parts water. Has strong acid properties. Miscible with water and alcohol. **A., Acetic, Glacial**, the absolute acid in crystalline form. An escharotic. **A., Acetic, Dilute**, contains six per cent. of absolute acid. Dose ʒj–ij. An impure form obtained by the destructive distillation of wood is known as wood vinegar, or pyroligneous acid. **A., Acetic, Test.** See *Tests, Table of.* **A., Aconitic** ($C_6H_6O_6$), occurs in different plants, as *Aconitum napellus*, sugar cane, and beet-roots. It may be obtained by heating citric acid alone or with concentrated HCl. It crystallizes in small plates, that dissolve readily in alcohol, ether and water, and melt at 186°–7°. An acid found in aconite. **A., Adibasic.** See *A., Suberic.* **A., Adipic** ($C_6H_{10}O_4$), obtained by oxidizing fats with nitric acid. Crystallizes in shining leaflets, or prisms; soluble in thirteen parts of cold water; melts at 148°. It is dibasic and diatomic. **A., Agaricic** ($C_{16}H_{30}O_5 + H_2O$), a resin acid obtained from the fungus *Polyporus officinalis*, growing on larch trees. The acid has been recommended for the checking of night sweats. It also checks the other excretions and diminishes thirst. It is mildly cathartic. Unof. **A., Alanthic** ($C_{15}H_{20}O_2$), *Inulic acid*, found in *Inula helenium*. Occurs in needle-like crystals. **A., Aldepalmitic** ($C_{16}H_{30}O_2$), the chief component of the butter of the cow. **A., Alginic.** See *Algin.* **A., Alloxanic** ($C_4H_2N_2O_4$), a crystalline acid, obtained by treating alloxan with alkalies. **A., Alpha-oxynaphthoic** ($C_{11}H_8O_3$), a fragrant crystalline acid, derived from alpha-naphthol. It is strongly antiseptic and deodorant; useful in wound-dressing; but appears to be toxic when taken by the stomach. Unof. **A., Alphatolinic.** See *A., Phenyl-acetic.* **A., Amalic** ($C_8(CH_3)_4N_4O_7$), [*ἀμαλός*, weak], tetramethylalloxantin, formed by the action of HNO_3, or chlorine water, upon thein, or, better, by the reduction of dimethyl alloxan with H_2S. Consists of colorless, sparingly soluble crystals, that impart a red color to the skin. **A., Amido-acetic.** See *Glycin.* **A., Amidobenzoic** ($C_7H_7NO_2$), occasionally found in the urine. **A., Amido-succinamic**, same as *Asparagin.* **A., Angelic** ($C_5H_8O_2$), a crystalline monobasic acid. Exists free along with valeric and acetic acids in the roots of *Angelica archangelica*, and as butyl and amyl esters in Roman oil of cumin. Crystallizes in shining prisms, melts at 45°, and boils at 185°. It has a peculiar smell and taste. **A., Anisic** ($C_8H_8O_3$), obtained by oxidizing anisol and anethol with HNO_3, and from aniseed by the action of oxidizing substances. Crystallizes from hot water in long needles, from alcohol in rhombic prisms; melts at 185°, boils at 280°. It is antiseptic and antirheumatic. **A., Anthranilic** ($C_7H_7NO_2$), prepared by oxidizing indigo by boiling it with manganese dioxid and sodium hydroxid. It sublimes in long needles, is readily soluble in hot water and alcohol, and melts at 144°. **A., Anthropocholic** ($C_{18}H_{28}O_4$) [*ἄνθρωπος*, man; *χόλη*, bile], an acid said to be obtainable from human bile. Its existence is doubtful. **A., Anticylic**, a white fragrant powder with pleasant acid taste, readily soluble in water, alcohol, and glycerin, used as an antipyretic. Dose gr. $\frac{1}{100}$. **A., Aposorbic** ($C_5H_8O_7$), produced on oxidizing sorbin with HNO_3. It crystallizes in small leaflets that melt with decomposition at 110°. Easily soluble in water. **A., Arabic.** See *Arabin.* **A., Arabonic** ($C_5H_{10}O_6$), tetraoxyvaleric acid, obtained by the action of bromin water or HNO_3 upon arabinose. **A., Aromatic**, a name applied to certain organic acids occurring in the balsams, resins, and other odoriferous principles. Also, in pharmacy, a dilute mineral acid reinforced by aromatic substances in order to modify their flavor. **A., Arsenous**, and **Arsenic.** See *Arsenic.* **A., Aspartic** ($C_4H_7NO_4$), occurs in the vinasse obtained from the beet root, and is procured from albuminous bodies in various reactions. It is prepared by boiling asparagin with alkalies and acids. It crystallizes in rhombic prisms, or leaflets, and dissolves with difficulty in water. **A., Atrolactinic** ($C_9H_{10}O_3$), obtained from acetophenone by means of prussic acid and H_2SO_4 or dilute HCl. Dissolves very readily in water; crystallizes with one-half H_2O in needles or plates; melts at 91°. **A., Atropic** ($C_9H_8O_2$), results from atropin, tropic acid, and atrolactinic acid when they are heated with concentrated HCl. Crystallizes from hot water in monoclinic plates; is sparingly soluble in cold water, easily in ether and benzene; melts at 106°. **A., Auric** ($Au(OH)_3$), gold trihydroxid. **A. Bath.** See *Bath.* **A., Behenolic** ($C_{22}H_{40}O_2$), derived from the bromids of erucic and brassidic acids. Melts at 57.5°. **A., Benzoic** ($C_7H_6O_2$), occurs free in some resins, chiefly in gum benzoin, and in coal tar. It crystallizes in white, shining needles, or leaflets, melts at 120°, and distils at 250°. It volatilizes readily, and its vapor possesses a peculiar odor that produces coughing. **A., Boric.** See *Boron.* **A., Brassidic** ($C_{22}H_{42}O_2$), isomeric with erucic acid; produced by the action of nitric acid on erucic acid; melts at 56°. **A., Brenz**

catechin sulphuric ($C_6H_4(HO)_2.O.SO_2$), has been found in human urine, mainly after the ingestion of salicin, hydroquinon, *etc.* **A., Butyric** ($C_4H_8O_2$) [*butyrum*, butter], an acid having a viscid appearance and rancid smell. It is obtained commercially by the fermentation of a mixture of sugar and butter or cheese in the presence of an alkaline carbonate, but occurs in various plants, in cod-liver oil, in the juice of meats, and in the perspiration. Combined with glycerin as glyceryl butyrate, it is essentially butter. The ether derived from butyric acid is the natural flavor of the pineapple. **A., Caffeic** ($C_9H_8O_4$), obtained when the tannin of coffee is boiled with potassium hydroxid; crystallizes in yellow prisms, and is very readily soluble in hot water and alcohol. **A., Campholic** ($C_{10}H_{18}O_2$), produced on distilling camphor over heated soda-lime, or with alcoholic potash; it melts at 95°, and is a white, volatile solid, insoluble in cold water. **A., Camphoric** ($C_{10}H_{16}O_4$), a dibasic acid, obtained by boiling camphor with HNO_3; crystallizes from hot water in colorless leaflets; melts at 178°, and decomposes into water and its anhydrid, $C_8H_{14}(CO)_2O$. Used in night-sweats of phthisis. Dose gr. x–xxx. **A., Camphoronic** ($C_9H_{12}O_5 + H_2O$), produced by the further oxidation of camphoric acid; it occurs in the mother liquor. Loses its water of crystallization at 100–120° and melts at 135°. It forms colorless microscopic needles that are volatile and readily soluble in water. **A., Capric** ($C_9H_{19}CO.OH$), occurs in small quantity, as a glycerid in cow's butter. Crystallizes in fine needles, melting at 30° C., very insoluble in boiling water. **A., Caproic** ($C_6H_{12}O_2$), the sixth in the series of fatty acids; a clear, mobile oil, colorless, inflammable, and with a very acid and penetrating taste. Prepared from butter, cocoanut oil, and various other sources. **A., Caprylic** ($C_7H_{15}CO.OH$), an acid combined with glycerin, forming a glycerid existing in various animal fats; liquid at ordinary temperatures. **A., Carbamic** ($H_2N.CO.OH$), an acid not known in the free state; its ammonium salt is contained in commercial ammonium carbonate. The esters of carbamic acid are called urethanes. **A., Carbazotic.** See *A., Picric.* **A., Carbolic** (C_6H_5OH), Phenol—the correct designation of this substance—is procured from coal tar by fractional distillation. It has a very peculiar and characteristic odor, a burning taste, is poisonous, and has preservative properties. The sp. gr. at 0° is 1.084; it crystallizes in colorless rhombic needles that melt at 42.2°, boiling at 180°, and it is not decomposed upon distillation. At ordinary temperatures it dissolves in water with difficulty (1 : 15), but is soluble in alcohol, ether, glacial acetic acid, and glycerin in all proportions. Upon exposure to light and air it deliquesces and acquires a pinkish color. It is used in the manufacture of many of the artificial coloring matters, *e. g.*, picric acid, used as a yellow dye. Large quantities of various qualities of carbolic acid are consumed for antiseptic purposes. It is a powerful antiseptic and germicide, and a violent poison. Internally it is used in vomiting and intestinal fermentation. Dose gr. ¼–j. **A., Carb., Aqua,** contains 10 drachms of the glycerit to 1 pint of water. Dose ʒj–ʒss. **A., Carb., Gargarisma** grs. ij–ʒj, for fetid sore throat. **A., Carb., Glycerit,** contains acid 1, glycerin 4 parts. **A., Carb., Liquefactum,** (B. P.). Dose ♏ j–ij. **A., Carb., Solutions,** vary from 1 to 5 per cent. in water. **A., Carb., Suppos. cum Sapone** (B. P.), each containing gr. j of carbolic acid. **A., Carb., Unguent,** contains acid 10, ointment 90 parts. **A., Carbol., Injectio Hypoderm.,** 2–5 per cent., for anthrax, and erysipelas. **A., Carbonic** (CO_2), carbon dioxid; a product of combustion; a colorless, transparent, odorless gas, heavier than air; incapable of sustaining respiration. It is eliminated by the lungs, and when retained in the system gives rise to cyanosis. **A., Carminic** ($C_{17}H_{18}O_{10}$), coloring matter found in the buds of certain plants, and especially in cochineal, an insect inhabiting different varieties of cactus. It is an amorphous purple-red mass, very readily soluble in water and alcohol. Yields red salts with the alkalies. **A., Cathartinic,** an active principle from several species of *Cassia.* It occurs in brown hygroscopic scales. Used as a laxative in doses of gr. iv–vj. **A., Cerebrinic** ($C_{59}H_{113}NO_3$), an acid found in the brain and belonging to the group called cerebrinacides. **A., Cerotic** ($C_{27}H_{54}O_2$) [*κηρωτός*, waxy], a fatty acid, existing in the free state in beeswax, and combined with ceryl as an ether in Chinese wax. It crystallizes from alcohol in delicate needles, melting at 78°. **A., Chelidonic** ($C_7H_4O_6$), occurs together with malic acid in *Chelidonium majus.* Crystallizes in silky needles with one molecule of water, and melts at 220°. **A., Chloracetic** [*chlorin and acetic*], an acid, called also *Monochloracetic* acid, produced by the substitution of chlorin for the hydrogen of the radicle in acetic acid. It is sometimes used as a caustic. **A., Chloric** ($HClO_3$), an acid known only in its compounds and its aqueous solution. Some of its compounds, the chlorates, are of great service in medicine. **A., Cholalic.** See *A., Cholic.* **A., Cholic** ($C_{24}H_{42}O_5$), *Cholalic Acid,* from glycocholic and taurocholic acids; crystallizes from hot water in small anhydrous prisms, sparingly soluble in water, and melting at 195°. **A., Choloidinic,** derived from Cholalic Acid, and probably a mixture of this with dyslysin; all three decomposition products of bile acids. **A., Chromic,** strictly the compound H_2CrO_4; chromium trioxid combined with water; it forms salts called chromates. In most books the chromium trioxid, CrO_3, is called by this name. It is a crystalline solid, and is a useful escharotic for the destruction of syphilitic warts and similar growths. A solution of 1 : 40 is used as an antiseptic wash for putrid sores and wounds. **A., Chrysanisic** ($C_7H_5N_3O_6$), an acid forming golden-yellow crystals, used in the preparation of certain anilin dyes. It melts at 259° and sublimes. **A., Chrysenic** ($C_{17}H_{12}O_3$), produced when chrysene is fused with caustic alkali. Forms silver-white leaflets and melts at 186°. **A., Chrysophanic** ($C_{15}H_{10}O_4$), *Rheinic Acid,* exists in the lichen, *Parmelia parietina,* in senna leaves, and in the rhubarb root. Crystallizes in golden yellow needles or prisms, melting at 162°. See *Chrysarobin.* **A., Cinchoninic** ($C_9H_6N(CO_2H)$), produced by oxidizing cinchonin with potassium permanganate, or HNO_3. Crystallizes in needles, containing $2H_2O$, in thick prisms, or plates, with $2H_2O$; melts at 254°. **A., Cinnamic** ($C_9H_8O_2$), occurs in Peru and Tolu balsams, in storax, and in some benzoin resins. Crystallizes from hot water in fine needles, from alcohol in thick prisms; is odorless, melts at 133°; soluble in hot water and in alcohol. It has been used in tuberculosis, both internally and externally. Dose ♏ j–x, hypodermatically. **A., Citric** ($C_6H_8O_7$), occurs free in lemons, black currants, bilberry, beets, and in various acid fruits. It crystallizes with one molecule of water in large rhombic prisms, which melt at 100°, are colorless, inodorous, and extremely sharp in taste. It is used as a discharge in calico-printing. It is refrigerant, antiseptic, and diuretic. **A., Comanic** ($C_6H_4O_4$), obtained from chelidonic acid by the loss of carbon dioxid. It dissolves with difficulty in water; melts at 250°. **A., Comenic** ($C_6H_4O_5$), is produced by heating meconic acid to 120-200°. It is rather insoluble in water and crystallizes in hard, warty masses.

A., Coumalic ($C_6H_4O_4$), identical with comanic acid. Produced when malic acid is heated together with concentrated H_2SO_4; dissolves with difficulty in cold water and melts with decomposition at 206°. **A., Coumaric** ($C_9H_8O_3$), an acid derived from coumarin and intimately related to salicylic acid, being converted into the latter by fusion with potassium hydrate. **A., Coumarilic** ($C_9H_6O_3$), a monobasic acid obtained from coumarin dibromid; crystallizes from hot water in delicate needles, melting at 190°; moderately soluble in water and extremely soluble in alcohol. **A., Crenic** [*κρήνη*, a spring], an acid found in certain spring waters and also in vegetable mould and in ochreous deposits. **A., Cresolsulphuric** ($C_7H_7O.SO_2.OH$), exists in the urine in small traces; also found in the urine of herbivorous animals. **A., Cresylic.** See *Cresol.* **A., Croconic** ($C_5H_2O_5$), is produced by the alkaline oxidation of most of the hexa-substituted benzene-derivatives; crystallizes in sulphur-yellow leaflets, readily soluble in water and alcohol; has an acid taste and reaction. **A., Cumic** ($C_{10}H_{12}O_2$), is produced by the oxidation of cuminic alcohol with dilute HNO_3. Very soluble in water and alcohol, crystallizes in colorless needles or leaflets, melts at 116°, and boils at about 290°. **A., Cyanic** (CONH), obtained by heating polymeric cyanuric acid. It is a mobile, volatile liquid, only stable below 0°; reacts strongly acid; has an odor like that of glacial acetic acid; vesicates the skin; dissolves in alcohols. **A., Cyanuric.** See *A., Tricyanic.* **A., Damalic** ($C_{12}H_{22}O_2$), [*δάμαλις*, heifer], has been obtained from the urine of cows and horses, and from human urine. **A., Damaluric** ($C_7H_{12}O_2$) [*δάμαλις*, heifer; *οὖρον*, urine], an oily compound, derivable from the urine of cattle and of mankind. **A., Desoxalic** ($C_8H_6O_8$), is seen in large, shining crystals, that melt at 85°. **A., Diacetic** ($C_4H_6O_3$), an acid present in the urine in some diseased conditions, *e. g.*, acetonuria. With a solution of ferric chorid it gives a Burgundy-red color. **A., Durylic** ($C_{10}H_{12}O_2$), obtained by the oxidation of durene; crystallizes in hard prisms and melts at 115°. **A., Elaïdic** ($C_{18}H_{34}O_2$), a fatty acid, produced by the action of nitrous acid on oleic acid. Isomeric with the latter. Consists of brilliant leaflets, melting at 44–45°. **A., Ellagic** ($C_{14}H_8O_9$), occurs in the bezoar stones (an intestinal calculus of the Persian goat). Occurs in the form of a powder containing 1 molecule of water of crystallization. Insoluble in water; light pale yellow in color; tasteless. **A., Enanthylic,** or **Œnanthylic** [*οἰνάθη*, wine flower, a plant (*οἶνος*, wine; *ἄνθος*, flower); *ὕλη*, principle], a complex ether formed by the action of nitric acid on fatty substances, especially castor oil. **A., Erucic** ($C_{22}H_{42}O_2$), present as glycerid in rape-seed oil and in the fatty oil of mustard. Prepared by saponifying rape-seed oil with lead oxid. Crystallizes from alcohol in long needles that melt at 33–34°. **A., Euchroic** ($C_{12}H_{11}N_3O_8$), an amid of mellitic acid, produced by dry distillation of the ammonium salt. It crystallizes in large prisms and is sparingly soluble in water. **A., Eugenic.** See *Eugenol.* **A., Euxanthinic** ($C_{19}H_{18}O_{11}$), *Porrisic Acid*, occurs as a magnesium salt in so-called *purrée*, a yellow coloring matter from India and China. Crystallizes from alcohol in yellow prisms with H_2O. **A., Everninic** ($C_9H_{10}O_4$), produced on boiling evernic acid ($C_{17}H_{16}O_7$) (from *Evernia prunastri*, a lichen formerly much used in dyeing and for making a hair powder), with baryta. It melts at 157°. **A., Ferulic** ($C_{10}H_{10}O_4$), corresponds to vanillin. It is found in asafetida, from which it may be obtained by precipitation with lead acetate. It is very soluble in hot water, crystallizes in shining needles or prisms, and melts at 169°. **A., Filicic,** the main ingredient of *Male Fern.* It is a white crystalline powder with slight taste and odor, insoluble in water. **A., Fluoric** (HF), gaseous and soluble in water, a strong escharotic. The dilute acid, 1 : 200, is used as an internal remedy in goiter. Dose ♏xx-xxx. **A., Formic** (CH_2O_2), an acid obtained from a fluid emitted by ants when irritated; also found in stinging nettles, in shoots of the pine, and in various animal secretions. Prepared by heating oxalic acid and glycerin. It is a colorless, mobile fluid, with a pungent odor, and vesicates the skin if dropped upon it. It boils at 99° and at 0° has a sp. gr. of 1.223. **A., Galactonic.** See *A., Lactonic.* **A., Gallic** ($C_7H_6O_5$), occurs free in gall nuts, in tea, in the fruit of *Cæsalpinia coriaria*, mangoes, and various other plants. Obtained from ordinary tannic acid by boiling it with dilute acids. Crystallizes in fine, silky needles, containing one molecule of water. Dissolves slowly in water and readily in alcohol and ether; has a faintly acid, astringent taste; melts near 220°. Astringent and disinfectant; useful in night sweats, diabetes, and chronic diarrhea. **A., Gallic, Unguent,** benzoated lard 90, gallic acid 10. *A., Pyrogallic* (unofficial), obtained from gallic acid by heating the latter. Recommended locally in phagedenic chancres as an antiseptic and disinfectant in 1–2½ per cent. solutions. Dose, internally, gr. j–ij. **A., Gluconic** ($C_6H_{12}O_7$), is formed by the oxidation of dextrose, cane sugar, dextrin, starch, and maltose with chlorin or bromin water. Most readily obtained from glucose. It is dextro-rotatory, but does not reduce Fehling's solution. It melts at 200°. **A., Glutaric** ($C_5H_8O_4$), normal pyrotartaric acid. Crystallizes in large monoclinic plates, melts at 97°, and distils at 303°, at 14° soluble in 1.2 part of water. **A., Glycocholic** ($C_{26}H_{43}NO_6$), a monobasic acid found in bile; sparingly soluble in water; crystallizes in minute needles, melting at 133°. **A., Glycollic** ($C_2H_4O_3$), *Oxyacetic Acid*, produced by the action of nascent hydrogen upon oxalic acid. It is a thick syrup that gradually crystallizes on standing over sulphuric acid; the crystals melt at 80° and deliquesce in the air. It dissolves easily in water, in alcohol, and in ether. **A., Glycoluric** ($C_3H_6N_2O_3$), *Hydantoïc Acid*, prepared by heating urea with glycocoll to 120°. It is a monobasic acid; very soluble in hot water and in alcohol. Crystallizes in large, rhombic prisms. **A., Glycuronic** ($C_6H_{10}O_7$), obtained by decomposing euxanthic acid on boiling with dilute H_2SO_4. It is a syrup that decomposes readily into the lactone, $C_6H_8O_6$, on warming. It is levo-rotatory. This acid has been found in urine; it probably does not exist in normal urine; but it appears after taking certain drugs, as benzol, indol, nitro-benzol, and the quinin derivatives. **A., Glyoxylic** ($C_2H_2O_3$), obtained by oxidizing glycol, alcohol, and aldehyd. It is a thick liquid, readily soluble in water. Crystallizes in rhombic prisms by long standing over sulphuric acid. **A., Guanido-Acetic.** See *Glycocyamin.* **A., Gynocardic** ($C_{14}H_{24}O_2$), derived from the seeds of the *Gynocardia odorata.* It occurs as a yellowish oily substance melting at 30° C. (86° F.), with a distinct odor and acid taste. Used as an antisyphilitic and antirheumatic. Dose gr. ½–iij. Used externally as a liniment (1 to 10 or 20). **A., Haloids** (*as'-id hal'-oidz*), derivatives that arise in the replacement of the hydroxyl of acids by halogens. They are liquids of sharp odor, fuming in the air and undergoing transformation into acids and halogen hydrids. They are heavier than water. They decompose at ordinary temperatures, forming acids. **A., Hemipinic** ($C_{10}H_{10}O_6$), formed by oxidizing

narcotin with dilute HNO_3. Melts at 182°. **A., Hesperetinic** ($C_{10}H_{10}O_4$), obtained from the glucoside hesperidin. Melts at 228°. **A., Hippuric** ($C_9H_9NO_3$) [ἵππος, horse; οὖρον, urine], *Benzoyl Glycocoll*, occurs in considerable amount in the urine of herbivorous animals, sometimes in that of man. Crystallizes in rhombic prisms, and dissolves readily in hot water and alcohol. It melts at 187°. Its salts (hippurates of lime, lithium, and sodium) are regarded as good solvents of the urates, and are recommended in gout, rheumatism, and calculous diseases. Dose grs. iv–xvj. Unof. **A., Hircic**, a peculiar-smelling acid contained in goat's milk. **A., Homogentisic**, an acid separated by Baumann from highly-colored urine, believed to be formed by the action of bacteria on the tyrosin normally found in pancreatic digestion. **A., Homophthalic** ($C_9H_8O_4$), obtained by fusing gamboge with caustic potash. Crystallizes from hot water in stout prisms, melting at 175°. **A., Hydantoïc.** See *A., Glycoluric*. **A., Hydriodic** (HI), *Acidum Hydriodicum*; a gaseous acid. Its solution and a syrup prepared from it are used as alteratives, with the general effects of iodin. Unof. **A., Hydrobromic** (HBr); the dilute acid, which is the chief form used, consists of 10 per cent. acid and 90 per cent. water. A good solvent for quinin. Useful in hysteria, congestive headaches, and neuralgia. Is recommended as a substitute for potassium and sodium bromids. Dose ♏xx–℥ij. **A., Hydrocaffeïc** ($C_9H_{10}O_4$), obtained from caffeïc acid by the action of sodium amalgam. **A., Hydrochloric,** *Muriatic Acid* (HCl), a liquid consisting of 31.9 per cent. of HCl gas in 68.1 per cent. of water. Colorless, pungent, and intensely acid. Valuable as an aid to digestion. **A., Hydrochloric, Dilute,** a ten per cent. solution of absolute acid in water. Dose ♏iij–x. **A., Hydrocinnamic** ($C_6H_5.(CH_2)_2CO_2H$), *Phenyl-propionic Acid*, obtained by the action of sodium amalgam upon cinnamic acid. Very soluble in hot water and alcohol; crystallizes in needles, melts at 47°, and distils at 280°. **A., Hydrocyanic, Dilute** (HCN), *Prussic Acid*, a liquid consisting of two per cent. of the acid with 98 per cent. of water and alcohol. Generally prepared by the action of H_2SO_4 on potassium ferrocyanid. It is a mobile liquid, of a sp. gr. of .697 at 18°; becomes crystalline at −15°; boils at +26.5°; possesses an odor like that of bitter almonds; is extremely poisonous; a feeble acid. Prussic acid is found in the bitter almond, the leaves of the peach, and in the cherry laurel, from the leaves of which it is distilled. It is the most violent poison known, death from complete asphyxia being almost instantaneous. Valuable for its sedative and antispasmodic effects in vomiting, whooping-cough, and spasmodic affections. Dose ♏j–v. The following preparations are employed: *Aqua Laurocerasi*, water distilled from the leaves of the cherry laurel. Dose ♏v-xxx, with caution. *Scheele's Dilute Hydrocyanic Acid*, is a 4 or 5 per cent. solution; dangerous. *Amygdala Amara*, oil of bitter almond; used in cosmetics. **A., Hydrocyanic, Vapor,** ♏x–xv of dilute acid in ℥j of water, warmed and the vapor inhaled to relieve irritable coughs. **A., Hydrofluoric** (HF), an aqueous solution of hydrofluoric gas, administered in dilute form as an inhalation in phthisis and goiter. See *Fluorin*. **A., Hydrosulphuric** (H_2S), an acid which, both in its pure and gaseous form and in its watery solution, is much used as a chemical reagent. The gas has been employed by inhalation and by rectal injection in cases of tuberculosis. (See *Bergeron's Method.*) Called also *Hydrogen Sulfid* and *Sulfydric Acid*. **A., Hydrurilic** ($C_8H_6N_4O_6$), obtained by decomposing the copper salt with HCl. Occurs in little prisms. **A., Hyperosmic.** See *A., Osmic*. **A., Hypochlorous** (HClO), an unstable compound, important as a disinfecting and bleaching agent. Some of its salts, the hypochlorites, have a limited use in medicine. **A., Hypophosphorous** (H_3PO_2), its salts (hypophosphites), also the dilute acid, and a syrup prepared with it, are used as remedial agents. (See *Calcii Hypophosphis, Ferri Hypophosphis, Sodii Hypophosphis, Potassii Hypophosphis*). **A., Igasuric,** an acid occurring in St. Ignatius Bean and certain other plants containing strychnia. It occurs in small, hard crystals with an acid, astringent taste. **A., Indoxylic** ($C_9H_7NO_3$), produced from its ethyl ester by fusion with caustic soda at 180°. Appears as a white crystalline mass, melting at 123°. **A., Iodic** (HIO_3), a monobasic acid. Its solution (two per cent.) has been recommended as an alterative subcutaneous injection. **A., Isopropyl Succinic.** See *A. Pimelic*. **A., Isosaccharic** ($C_6H_{10}O_8$), an acid very soluble in water and alcohol, forming rhombic crystals, and melting at 185°. Its solution is dextro-rotatory. **A., Kephalo-phosphoric,** a brain-acid differing from ordinary phosphoric acid in that three molecules of its hydroxyl are replaced by one molecule each of kepalyl, stearyl, and glyceryl. **A., Lactic** ($HC_3H_5O_3$), a liquid containing 75 per cent. of absolute acid in 25 per cent. of water. Produced in the fermentation of milk. Generally found impure from subsequent fermentation, except when freshly made. Useful in aiding digestion, in diabetes, and as a solvent of false membrane in diphtheria. Dose ℥ss–℥ss. *A., Lactic, Dil.*, (B. P.). Dose ℥ss–ij. **A., Lactonic** ($C_6H_{12}O_7$), *Galactonic Acid*, produced from milk-sugar, galactose, and gum arabic by the action of bromin water. It crystallizes, on standing over H_2SO_4, in small needles. **A., Leuconic** ($C_5O_5 + 4H_2O$), an acid produced by oxidizing croconic acid with HNO_3 or chlorin. Very soluble in water; occurs in small, colorless needles. **A., Levulinic** ($C_5H_8O_3$), obtained from levulose, cellulose, cane-sugar, *etc.* Isomeric with methyl acetoacetic acid; dissolves readily in water, alcohol, and ether; crystallizes in scales that melt at 33.5°; boils with slight decomposition at 239°. **A., Linoleic** ($C_{16}H_{28}O_2$), occurs as glycerid in drying oils, such as linseed oil, hemp oil, poppy oil, and nut oil. Prepared by saponifying linseed oil with potash. It is a yellowish oil that has a sp. gr. of 0.921. **A., Maizenic,** an acid derived from the stigmata (silk) of Indian corn; said to be a good diuretic. Unof. **A., Malic** ($C_4H_6O_5$), a bibasic acid, occurring free or in the form of salts in many plant juices, in unripe apples, in grapes, and in mountain-ash berries. It forms deliquescent crystals, that dissolve readily in alcohol, slightly in ether, and melt at 100°; it has a pleasant acid taste. **A., Malonic** ($C_3H_4O_4$), occurs in the deposit found in the vacuum pans employed in the beet-sugar manufacture; obtained by the oxidation of malic acid with chromic acid; crystallizes in large tables or laminæ; easily soluble in water, alcohol, and ether; melts at 132°; at higher temperatures it decomposes into acetic acid and carbon dioxid. **A., Mandelic** ($C_6H_5.CH(OH).CO_2H$), is formed from benzaldehyd by the action of prussic acid and HCl. Obtained naturally from amygdalin; is levo-rotatory, and forms brilliant crystals, melting at 132.8°. **A., Mannitic** ($C_6H_{12}O_7$), obtained by the action of platinum black upon aqueous mannitol. It is a very soluble, gummy mass, and reduces Fehling's solution. **A., Mannonic** ($C_6H_{12}O_7$), produced by oxidizing mannose with bromin water. **A., Meconic** ($C_7H_4O_7$), a tribasic acid, occurring in opium in union with mor

phin. Crystallizes with $3H_2O$ in white laminæ, readily soluble in hot water and alcohol. Ferric salts color the acid solutions dark red. **A., Melilotic** ($C_6H_4(CH_2)_2.OH.CO_2H$), occurs free and in combination with coumarin in the yellow melilot. Crystallizes in long needles, dissolves easily in hot water, and melts at 81°. **A., Mellitic** ($C_{12}H_6O_{12}$), occurs in mellite or honey-stone, which is found in some lignite beds. Honey-stone is an aluminium salt of mellitic acid, $C_{12}Al_2O_{14} + 18H_2O$, and affords large quadratic pyramids of a bright yellow color. Mellitic acid crystallizes in fine, silky needles, readily soluble in water and alcohol; has a sour, bitter taste. **A., Mellophanic** ($C_6H_2(CO_2H)_4$), formed by the oxidation of isodurene. Very soluble in cold water and crystallizes in small prisms. Melts at 240°. **A., Mesidic.** See *A. Uvitic.* **A., Mesitylenic** ($C_9H_{10}O_2$), obtained by gradually oxidizing mesitylene with dilute HNO_3. Crystallizes from alcohol in large prisms, from water in needles. Melts at 166° and sublimes very readily. **A., Metaphosphoric** (HPO_3), a glassy solid, not volatile by heat. It is freely soluble in cold water, and is converted by boiling into orthophosphoric acid. Used as a test for albumin in the urine. **A., Metasaccharic** ($C_6H_{10}O_8$), produced by oxidizing arabinose carboxylic acid with HNO_3. Melts at 68° when air-dried. **A., Mucic** ($C_6H_{10}O_8$), is obtained in the oxidation of dulcitol, milk-sugar, galactose, galactonic acid and nearly all the gum varieties. A white crystalline powder, almost insoluble in cold water and alcohol. It melts at 210° with decomposition. **A., Muriatic.** See *A., Hydrochloric.* **A., Myronic** [*μύρον*, unguent] ($C_{10}H_{19}NS_2O_{10}$), an acid that occurs as a potassium salt in the seeds of black mustard. Crystallizes from water in bright needles. **A., Nitric** (HNO_3), a liquid consisting of 68 per cent. absolute acid in 32 per cent. of water. The pure acid is colorless, fuming, and highly caustic. A very powerful escharotic, used in cauterization of chancres and phagedenic ulcers. **A., Nit., Dilute,** contains ten per cent. absolute acid. Dose ♏iij–xv, well diluted. **A., Nitro-hydrochloric,** *Aqua Regia,* a golden yellow, fuming mixture of four parts nitric and 15 of hydrochloric acid. A ready solvent of gold. Valuable in affections of the liver. Dose ♏v–xx, very dilute. **A., Noropianic** ($C_8H_6O_5$), is obtained from opianic acid by heating with hydriodic acid. Readily soluble in water; melting at 171°. **A., Oleic** ($C_{18}H_{34}O_2$), a constituent acid present in many fats and oils. Obtained in the manufacture of stearin candles. Soluble in alcohol, benzol, and the essential oils; insoluble in water. Saponifies when heated with alkaline bases. Used in making the oleates. It is a colorless oil that crystallizes on cooling. Melts at + 14°. Odorless in a pure condition, but becomes rancid on exposure to the air. **A., Opianic** ($C_{10}H_{10}O_5$), dimethyl ether of noropianic acid. Crystallizes from hot water in fine prisms, melting at 150°. **A., Orsellinic** ($C_8H_8O_4$), is found in different lichens of the genera *Roccella* and *Lecanora.* Consists of easily soluble prisms, melting at 176°. **A., Ortho-oxybenzoic.** See *A. Salicylic.* **A., Orthophosphoric** (H_3PO_4), ordinary phosphoric acid, as distinguished from metaphosphoric and pyrophosphoric acids. **A., Osmic** (OsO_4), the oxide of *osmium,* one of the rarer elements; it occurs as yellow crystals, acrid, burning, yielding an intensely irritating vapor; it has been recommended for hypodermatic use in sciatica, strumous glands, and cancer. **A., Osmic, Liq.,** one per cent. Dose ♏iv–vj, hypodermatically for sciatica, neuralgia, *etc. Potassium Osmate* ($K_2OsO_4 + 2H_2O$), given in epilepsy. Dose gr. $\frac{1}{4}$. **A., Oxalic** ($C_2H_2O_4$), a colorless crystalline solid obtained by treating sawdust with caustic soda and potash. It occurs in many plants chiefly as potassium oxalate; with two parts of water, it crystallizes in fine, transparent monoclinic prisms that at 20° effloresce in dry air and fall in a white powder. It is soluble in nine parts of water at moderate temperature and quite easily in alcohol. In ½ gr. doses a depressant to respiratory centers. In large doses a violent poison. Unof. **A., Oxamic** ($C_2O_2(NH_2OH)$), a monobasic acid occurring as a crystalline powder that dissolves with difficulty in cold water and melts at 173°. **A., Oxyacetic.** See *A., Glycollic.* **A., Oxycitric** ($C_6H_8O_8$), is produced by boiling chlorcitric acid with alkalies or water. **A., Oxyuvitic** ($C_9H_8O_5$), is produced by the action of chloroform upon sodium aceto-acetic ester. Crystallizes from hot water in fine needles, and melts with decomposition at about 290°. **A., Palmitic** ($C_{16}H_{32}O_2$), an acid existing as a glycerin ether in palm-oil and in most of the solid fats. It forms fine, white needles, or pearly crystalline scales. **A., Palmitolic** ($C_{16}H_{28}O_2$), an acid that is isomeric with linoleic acid; melts at 42°. **A., Palmitoxylic** ($C_{16}H_{28}O_4$), a monobasic acid, produced from palmitolic acid on heating with fuming HNO_3. Melts at 67°. **A., Paracresotic** ($C_8H_9O_3$), a preparation from paracresylol. It is employed usually in the form of its sodium salt, $C_8H_7NaO_3$, which is a safe and reliable antipyretic. It is especially of service in the rheumatism of children. Dose, to children, gr. ij–iij; to adults up to ʒij. Unof. **A., Paralactic.** See *A., Sarcolactic.* **A., Paratartaric.** See *A., Racemic.* **A., Pelargonic** ($C_9H_{18}O_2$), a complex ether that imparts the specific flavor to geranium and certain other aromatic oils. **A., Perosmic.** Same as *A., Osmic.* **A., Phenylacetic** ($C_6H_5.CH_2.CO_2H$), *Alphatoluic Acid,* obtained from benzyl cyanid when boiled with alkalies. Crystallizes in shining leaflets, resembling those of benzoic acid; melts at 76.5°, and boils at 262°. It is prescribed in coughs and tuberculosis; is stimulant and antihectic. Dose of alcoholic solution gtt. x–xx. Unof. **A., Phenyl-propionic.** See *A., Hydrocinnamic.* **A., Phenyl Sulphate,** a solution of three grammes of phenol in 20 c.c. of strong sulphuric acid. Used for the detection of nitrates in water. **A., Phosphoric** (H_3PO_4), *Orthophosphoric Acid,* contains 50 per cent. each of acid and water. Of value in strumous affections, and thought to be serviceable in dissolving phosphatic deposits. Has none of the effects derived from free phosphorus or the hypophosphites. **A., Phosphoric, Dilute,** contains ten per cent. of absolute acid. Dose ♏v–xxx. See *Sodium, Potassium, Calcium, etc.* **A., Phosphorous** (H_3PO_3), a compound of hydrogen with phosphorus and hydrogen with phosphorus anhydrid. Its salts are called phosphites. **A., Phthalic** ($C_8H_6O_4$), the ortho-dicarboxylic acid of benzene, obtained by oxidizing naphthalene with HNO_3. It crystallizes in short prisms or in leaflets readily soluble in hot water, alcohol, and ether. It melts at above 200°. See *Phthalate.* **A., Picric** ($C_6H_2(NO_2)_3OH$), obtained by the nitration of phenol. It crystallizes from hot water and alcohol in yellow leaflets or prisms which possess a very bitter taste. Readily soluble in hot water, its solution imparting a beautiful yellow color to silk and wool. It melts at 122.5°; a saturated solution is of some value as a wash in erysipelas. An excellent test for albumin and sugar in urine. Dose gr. v–xv. **A., Pimelic** ($C_7H_{12}O_4$), *Isopropyl Succinic Acid,* melts at 114°. **A., Piperic** ($C_{12}H_{10}O_4$), a monobasic acid, consisting of shining prisms; almost insoluble in water, and crystallizes from alcohol in long needles, melting at 217°. It is produced from piperin by boiling with alcoholic potash. **A., Porrisic.** See *A., Euxanthinic.* **A.,**

Prehnitic ($C_{10}H_6O_5$), results from oxidizing prehnitol with potassium permanganate. Very soluble in water, and crystallizes in warty masses that melt at 238°. **A., Propargylic.** See *A., Propiolic.* **A., Propiolic.** ($C_3H_2O_2$), *Propargylic Acid*, a liquid with an odor resembling that of glacial acetic acid; when cool, it solidifies to silky needles, that melt at + 6°; dissolves readily in water, alcohol, and ether; boils with decomposition at 144°. **A., Protocatechuic** ($C_7H_6O_4$), obtained from many benzene derivatives as well as from various resins (benzoin, asafetida, myrrh) on fusion with potassium hydroxid. Crystallizes with one molecule of water in shining needles or leaflets, and dissolves readily in hot water, alcohol, and ether. **A., Prussic.** See *A., Hydrocyanic.* **A., Purpuric** ($C_8H_5N_5O_6$), an acid not known in the free state, since as soon as it is liberated from its salts by mineral acids it immediately decomposes into alloxan and uramil. Produced by the action of HNO_3 upon uric acid. **A., Pyrogallic** ($C_6H_6O_3$), pyrogallol, formed by heating gallic acid with water to 210° It forms white leaflets or needles, melts at 115°, and sublimes when carefully heated. Readily soluble in water, less so in alcohol and ether. It is useful in the treatment of certain skin diseases, but is poisonous, and must be used with caution. **A., Pyroligneous,** the crude acid obtained in the destructive distillation of wood. It is a clear liquid of reddish-brown color and strong acid taste, with a peculiar penetrating odor described as empyreumatic, due largely to the furfurol it contains. It possesses a sp. gr. of from 1.018 to 1.030, and contains from four to seven per cent. of real acetic acid. **A., Pyromellitic** ($C_{10}H_6O_8$), is produced by oxidizing durene and durylic acid with potassium permanganate. Crystallizes in prisms, readily soluble in hot water and alcohol, melts at 264°. **A., Pyrophosphoric,** the dihydric phosphate ($2H_2O.P_2O_5$), one of the forms of the so-called phosphoric acid. It differs from the ordinary (trihydric or orthophosphoric) acid, and also from the monohydric, or metaphosphoric, acid, in its reactions. It is also poisonous, which they are not. Its iron salt is used in medicine. The pure acid is a soft, glassy mass. **A., Pyrotartaric** ($C_5H_8O_4$), is obtained by heating tartaric acid in a close vessel; consists of small, rhombic prisms, readily soluble in water, in alcohol, and in ether; it melts at 112°. **A., Pyruvic** ($C_3H_4O_3$), a monobasic acid forming crystalline compounds with the acid alkaline sulphites. **A., Quillaic,** an acid existing in commercial saponin. Injected into the tissues it is said to be extremely poisonous, though not when taken by the mouth. Unof. **A., Quinaldinic** ($C_9H_6N(CO_2H)$), crystallizes from hot water in needles containing $2H_2O$; effloresces in the air; melts at 156°. Prepared by oxidizing *a*-methyl-quinolin with chromic acid in sulphuric acid solution. **A., Quinic** ($C_7H_{12}O_6$), is present in the cinchona barks, coffee beans, bilberry, and other plants. Obtained as a secondary product in the preparation of quinin. Consists of rhombic prisms, easily soluble in water; melting at 162°. **A., Quininic** ($C_9H_5(O.CH_3)N(CO_2H)$), obtained by oxidizing quinin and quinidin with chromic acid in sulphuric acid solution. Crystallizes in long, yellow prisms; dissolves in alcohol with a blue fluorescence, and melts at 280°. **A., Racemic** ($C_4H_6O_6$), *Paratartaric Acid*, differing from common tartaric acid, not in chemical but in physical properties. **A., Rheinic.** See *A., Chrysophanic.* **A., Rhodanic** ($C_3H_3S_2ON$), obtained by the action of $CNS(NH_4)$ upon chloracetic acid. Consists of yellow prisms, or plates, that melt at 169° with decomposition. **A., Ricinoleic** ($C_{18}H_{34}O_3$), is present in castor oil in the form of a glycerid. It is a colorless oil that solidifies in the cold to a hard, white mass, melting at 16–17°. **A., Rosolic** ($C_{20}H_{16}O_3$), a phenol compound, derived from rosanilin; valued as a dye and as a staining agent. See *Stains.* **A., Rufigallic** ($C_{14}H_8O_8 + 2H_2O$), a derivative of anthracene; obtained by heating gallic acid with four parts of H_2SO_4 to 140°. Consists of reddish-brown crystals, losing water at 120°, and subliming in red needles. **A., Saccharic.** 1. Acidum saccharicum ($C_6H_{10}O_8$), a dibasic acid; a deliquescent, gummy mass, readily soluble in alcohol. It turns brown at 100° and decomposes. Prepared by the action of HNO_3 on sugar and various other carbohydrates. 2. ($C_6H_{12}O_6$), *Tetraoxycaproic Acid*, a monobasic acid readily changeable, when free, into its lactone, saccharin. Not known in its free state. **A., Saccharonic** ($C_6H_{10}O_7$), formed by oxidizing saccharin by HNO_3. Very soluble in water; forms large crystals. **A., Salicylic** ($C_7H_6O_3$), *Ortho-oxybenzoic Acid*, occurs in a free condition in the buds of *Spiræa Ulmaria*, in the oil of wintergreen, and in other varieties of gaultheria. It consists of four-sided prisms and crystallizes readily from hot water in long needles. Is soluble in water, and very soluble in chloroform; melts at 155°–156°. Is a powerful antiseptic; also used in the treatment of acute articular rheumatism and myalgia. **A., Santoninic** ($C_{15}H_{20}O_4$), an acid into which santonin is changed under the influence of the alkalies. **A., Sarcolactic** ($C_3H_6O_3$), occurs in muscles, to which it gives their acid reaction, and in blood, especially after the muscles have been in a state of contracting activity. It is also found in urine in phosphorus poisoning. **A. Sclerotinic.** An acid found in ergot, of which it is one of the active principles. Given, hypodermically it has acted as an ecbolic. See *Sclerotis.* **A., Sorbic** ($C_6H_8O_2$), occurs together with malic acid in the juice of unripe mountain-ash berries. An oil that does not solidify until it has been heated with potash; almost insoluble in cold water, but crystallizes from alcohol in long needles, melting at 134.5°, distilling at 228° without decomposition. **A., Sozolic.** See *Aseptol.* **A., Sphingostearic,** an acid closely resembling stearic acid, derivable from sphingomyelin. **A., Stearic** ($C_{18}H_{36}O_2$), associated with palmitic and oleic acids as a mixed ether, in solid animal fats, the tallows; crystallizes from alcohol in brilliant leaflets, melting at 62.2° C. **A., Stearoleic** ($C_{18}H_{32}O_2$), obtained from oleic and elaïdic acids. Melts at 48°. **A., Stearoxylic** ($C_{18}H_{32}O_4$), produced by warming stearoleic acid. Melts at 86°. **A., Suberic** ($C_8H_{14}O_4$), a dibasic acid obtained by boiling corks or fatty oils with HNO_3. Melts at 140° C. Forms small granular crystals very soluble in boiling water, in alcohol, and in ether. It fuses at about 300° F., and sublimes in acicular crystals. **A., Succinic** ($C_4H_6O_4$), an acid prepared by the distillation of amber, and artificially in many other ways; occurs in certain hydatid cysts of the liver; diuretic, stimulant, and antispasmodic. Unof. **A., Sulfydric.** See *A., Hydrosulphuric.* **A., Sulphanilic** ($C_6H_4(NH_2).SO_3H$), obtained by heating anilin (1 part) with fuming H_2SO_4 (2 parts) to 180° until SO_2 appears. Crystallizes in rhombic plates with one molecule of water, which effloresce in the air. **A., Sulphichthyolic,** an acid that appears to be the principal component of commercial ichthyol. Its sodium, ammonium, lithium, and zinc salts have been highly praised as efficacious in cystitis, nephritis, and diabetes. Dose grs. iss in pill or capsule. **A., Sulphocarbolic** ($C_6H_5HSO_4$), phenyl bisulphate, formed by the union of carbolic and sulphuric acids. Its salts, the sulpho-carbolates, are used in medicine as intestinal antiseptics, *etc.* See *Aseptol.* **A.,**

Sulphonic. See *Aseptol.* **A., Sulphoricineolic,** an acid prepared from castor oil acted upon by sulphuric acid. It is a thick syrup, that has the power of dissolving and emulsifying many substances; recommended for pharmaceutical uses. **A., Sulphuric** (H_2SO_4), *Oil of Vitriol*, a heavy, oily, corrosive acid, consisting of not less than 92.5 per cent. sulphuric anhydrid and 7.5 per cent. of water. Of value in lead poisoning. Sometimes used as a caustic. **A., Sulph., Aromatic,** contains 20 per cent. acid, diluted with alcohol and flavored with cinnamon and ginger. Dose ♏v–xv. **A., Sulph., Dilute,** contains ten per cent. strong acid to 90 of water. Dose ♏x–xv, well diluted. **A., Sulphurous** (H_2SO_3), a colorless acid containing about 6.4 per cent. of sulphurous anhydrid in 93.6 per cent. of water. The gas (SO_2) is a very valuable disinfectant. The acid is used as a spray or lotion in diphtheria, stomatitis, and as a wash for indolent and syphilitic ulcers. The various hyposulphites are mainly valuable in that they decompose and give off sulphur dioxid. Dose ♏v–ʒj. See, also, *Sodium*, *Potassium*, and *Magnesium*. **A., Tannic** ($C_{14}H_{10}O_9$), *Tannin*, an astringent acid obtained from nutgalls, occurring in yellowish, scaly crystals. Soluble in water and alcohol. Internally it is an antidote in poisoning by alkaloids and tartar emetic, and in hemorrhoids and catarrh of mucous membrane. Useful mainly as an astringent lotion in many skin diseases. Dose gr. j–xx. **A., Tan., Glycerit,** one part tannin in four of glycerin. **A., Tan., Suppositories,** one part of tannin to five of butter of cacao. **A., Tan., Troches,** each contain ½ gr. of tannic acid. **A., Tan., Unguent,** a ten per cent. ointment of the acid incorporated with benzoated lard. **A., Tartaric** ($C_{14}H_{10}O_9$), an astringent acid, chiefly employed in refrigerant drinks and in baking powders; 20 grains neutralize 27 of potassium dicarbonate, 22 of sodium dicarbonate, and 15½ of ammonium carbonate. Dose gr. x–xxx. Widely distributed in the vegetable world, and occurs principally in the juice of the grape, from which it deposits after fermentation in the form of acid potassium tartrate (argol). It results on oxidizing saccharic acid and milk sugar with HNO_3. It crystallizes in large monoclinic prisms, which dissolve readily in water and alcohol, but not in ether. It melts at 167°–170°. Its salts are the tartrates. **A., Tartronic** ($C_3H_4O_5$), occurs in large prisms that are easily soluble in water, alcohol, and ether. It melts at 184° C. Produced from glycerol by oxidation with potassium permanganate. **A., Taurocholic** ($C_{24}H_{45}NOS_7$), occurs in bile; very soluble in water and alcohol; crystallizes in fine needles. **A., Teracrylic** ($C_7H_{12}O_2$), obtained by the distillation of terpentic acid. It is an oily liquid, with an odor resembling that of valeric acid, and boiling at 208° without decomposition. **A., Terebic** ($C_7H_{10}O_4$), a monobasic acid formed when turpentine oil is oxidized with HNO_3. Sparingly soluble in cold water, crystallizes in shining prisms, and melts at 175°. **A., Tetraoxycaproic.** See *A., Saccharic.* **A., Tetraoxyvaleric.** See *A., Arabonic.* **A., Thebolactic** ($C_3H_6O_3$), a crystalline principle obtained from opium. **A., Tide** (*as'-id-tid*). See *Tide.* **A., Trichloracetic** ($HC_2Cl_3O_2$), an acid formed from acetic acid, three atoms of the hydrogen of which is (in the new acid) replaced by chlorin. It is considered one of the best reagents for the detection of albumin in the urine, and is a valuable caustic, especially for rhinopharyngological purposes. **A., Trichlorlactic** ($C_3H_3O_3Cl_3$), made by heating chloralcyanhydrin with concentrated HCl. It is a crystalline mass that melts at from 105° to 110°. Soluble in water, in alcohol, and in ether. **A., Tricyanic** ($C_3N_3O_3H_3$), *Cyanuric Acid*, obtained from tricyanogenchlorid by boiling the latter with water and alkalies. It crystallizes from aqueous solution with two molecules of water in large rhombic prisms; soluble in 40 parts of cold water; easily soluble in hot water and in alcohol. **A., Trimesic** ($C_9H_6O_6$), formed when mesitylenic and uvitic acids are oxidized with a chromic acid mixture. Crystallizes in short prisms, readily soluble in hot water and alcohol, melts about 300°, and sublimes near 240°. **A., Tropic** ($C_6H_5.C_2H_3(OH).CO_2H$), obtained by digesting the alkaloids, atropin, and belladonna with baryta water. Slowly soluble in water; crystallizes in needles or plates, and melts at 117°. **A., Umbellic** ($C_6H_8O_4$), obtained by digesting umbelliferon with caustic potash, and then precipitating with acids. It is a yellow powder, decomposing at about 240°. **A., Undecolic** ($C_{11}H_{18}O_2$), obtained from the bromid of undecylenic acid. It fuses at 59.5°. **A., Uric** ($C_5H_4N_4O_3$), an acid found in the urine of man and the carnivora—rarely in the herbivora—abundantly in the excrement of birds, reptiles, and molluscs. Crystallizes in small, white, rhombic crystals, insoluble in alcohol and ether, soluble in 1900 parts of boiling water, and in hydrochloric acid. Exists usually in combination with the metals of the alkaline group. Separated from urine by adding ten per cent. of hydrochloric acid and allowing the crystals to settle for 48 hours, when they may be separated and weighed. Haycraft's method is a more exact but extended process. **A., Uric, Murexid, Test for.** See *Murexid.* **A., Uroleucic** ($C_9H_{10}O_5$) [*uro-*, *leucin*], a stellate, crystalline acid found in the urine in alkaptonuria. **A., Uvitic** ($C_9H_8O_4$), *Mesidic Acid*, obtained by oxidizing mesitylene with dilute HNO_3. Crystallizes from hot water in needles, melting at 287°. **A., Valeric** ($C_5H_{10}O_2$), formed by oxidizing normal amyl alcohol. Similar to butyric acid, but is more sparingly soluble in water; boils at 186°; sp. gr. at 0° is 0.9568. It congeals in the cold and melts at 20°. A mobile liquid with caustic acid taste and the pungent smell of old cheese. Its salts have been somewhat used in medicine. **A., Veratric** ($C_9H_{10}O_4$), occurs with veratrin in the sabadilla seeds; crystallizes from hot water in short, white, transparent needles, melting at 179.5° C.; soluble in water and alcohol. **A., Vulpic** ($C_{19}H_{14}O_5$), occurs in the lichen *Cetraria vulpina*, from which it may be extracted by chloroform or lime water. Sparingly soluble in water and ether, crystallizes from alcohol in yellow prisms, melting at 110° and subliming. **A., Xanthic** ($C_2H_5.O.CS.SH$), a heavy, oily liquid, not soluble in water, with a penetrating smell and a sharp, astringent taste, many of whose salts have a yellow color. **A., Xylic** ($C_6H_3(CH_3)_2.CO_2H$), produced by the oxidation of pseudocumene. Crystallizes from alcohol in long prisms; dissolves with difficulty in water; melts at 126° C., and sublimes readily. **A., Xylidic** ($C_9H_8O_4$), obtained by oxidizing xylic acid with dilute HNO_3; separates from boiling water in flocculent masses; melts at 282°.

Acida (*as'-id-ah*) [L.]. Plural of *Acidum*, *q. v.*

Acid-Albumin (*as'-id al'-bu-min*). A derived albumin. A proteid having been acted upon or dissolved in the stronger acids, and yielding an acid reaction.

Acidiferous (*as-id-if'-er-us*) [*acidum*, acid; *ferre*, to bear]. Containing an acid; producing acidity.

Acidifiable (*as-id'-if-i-a-bl*) [*acidum*, acid; *fieri*, to become]. Capable of becoming an acid, or of becoming sour.

Acidification (*as-id-if-ik-a'-shun*) [*acidum*, acid; *facere*, to make]. Conversion into an acid; the process of becoming sour.

Acidimeter (*as-id-im'-et-er*) [*acidum*, acid; *μέτρον*, a measure]. An instrument for performing acidimetry.

Acidimetry (*as-id-im'-et-re*) [*acidum*, acid; *μέτρον*, a measure]. Determination of the free acid in a solution by an acidimeter, or by chemical reactions.

Acidity (*as-id'-it-e*) [*acidum*, acid]. The quality of being acid; sourness; excess of acid.

Acidology (*as-id-ol'-o-je*) [*ἀκίς*, a bandage, a point; *λόγος*, a treatise]. The science of surgical appliances.

Acidometry (*as-id-om'-et-re*). See *Acidimetry*.

Acidopeirastic (*as-id-o-pi-ras'-tik*) [*ἀκίς*, a point; *πειράζειν*, to test]. See *Akidopeirastic*.

Acidosteophyte (*as-id-os'-te-o-fit*) [*ἀκίς*, a point; osteophyte]. A sharp, or needle-shaped, osteophyte.

Ac'ids, Aromat'ic. Acids derived by replacing hydrogen in the benzenes by carboxyls. They are crystalline solids that generally sublime undecomposed. Most of them dissolve with difficulty in water. **A., Diazo.** See *Diazo Acids*. **A., Dibasic,** acids containing two carboxyl groups. They are solids, crystallizable, and generally volatile without decomposition. They are mostly soluble in water and have a strong acid reaction. See *Table*. **A., Fatty,** a class of monobasic acids, formed by the oxidation of the primary alcohols. The more complex fatty acids are found in all oleaginous compounds, where they exist combined with glycerin, forming fats. The fatty acids have a general formula $C_nH_{2n}O_2$. See *Table*. **A., Monobasic,** products of the replacement by oxygen of the two hydrogen atoms attached to the carbon-carrying OH. These acids enter into combination with a univalent basic radical to form a neutral salt, or a salt containing one equivalent of a base. **A., Organic,** acids characterized by the carboxyl group CO.OH.

TABLE OF DIBASIC ACIDS OF THE FATTY COMPOUNDS.

1. FIRST SERIES. $C_nH_{2n-2}O_4$.

Name.	Formula.	Physical Condition.	Melting Point. (*Centigrade.*)	Solubility.
Oxalic,	$C_2H_2O_4$	Solid.	101°	Slowly in water. Easily in alcohol.
Malonic,	$C_3H_4O_4$	Solid.	132°	Easily in water, alcohol, ether.
Succinic,	$C_4H_6O_4$	Solid.	180°	Slowly in water and alcohol.
Pyrotartaric,	$C_5H_8O_4$	Solid.	112°	Readily in water, alcohol, ether.
Adipic,	$C_6H_{10}O_4$	Solid.	148°	Slowly in water.
Pimelic,	$C_7H_{12}O_4$	Solid.	102–104°	. . .
Suberic,	$C_8H_{14}O_4$	Solid.	140°	Slowly in water. Readily in alcohol, ether.
Lepargylic (Azelaic),	$C_9H_{16}O_4$	Solid.	106°	Slowly in water.
Sebacic,	$C_{10}H_{18}O_4$	Solid.	127°	. . .
Brassylic,	$C_{11}H_{20}O_4$	Solid.	108°	Almost insoluble in water.
Roccellic,	$C_{17}H_{32}O_4$	Solid.	132°	. . .
Cetyl Malonic,	$C_{19}H_{36}O_4$	Solid.	121°	. . .

2. SECOND SERIES. UNSATURATED DICARBOXYLIC ACIDS. $C_nH_{2n-4}O_4$.

Fumaric,	$C_4H_4O_4$	Solid.	. . .	Almost insoluble in water.
Maleic,	$C_4H_4O_4$	Solid.	130°	Readily soluble in water.
Ethidene Malonic,	$C_5H_6O_4$	Solid.	220°	. . .
Citraconic,	$C_5H_6O_4$	Solid.	80°	. . .
Itaconic,	$C_5H_6O_4$	Solid.	161°	Slowly soluble in water.
Mesaconic,	$C_5H_6O_4$	Solid.	202°	Slowly soluble in water.
Allyl Malonic,	$C_6H_8O_4$	Solid.	103°	. . .
Propylidene Malonic,	$C_6H_8O_4$	Solid.	. . .	. . .
Hydromuconic,	$C_6H_8O_4$	Solid.	195°	Slowly soluble in water.
Pyrocinchonic,	$C_6H_8O_4$	Only exists in the salts.	. . .	. . .
Allyl Succinic,	$C_7H_{10}O_4$	Solid.	94°	. . .
Carbocaprolactonic,	$C_7H_{10}O_4$	Solid.	69°	. . .
Teraconic,	$C_7H_{10}O_4$	Solid.	162°	. . .
Xeronic,	$C_8H_{12}O_4$	. . .	. . .	. . .

TABLE OF DIBASIC ACIDS OF THE FATTY COMPOUNDS.—*Continued.*

3. THIRD SERIES. $C_nH_{2n-6}O_4$.

NAME.	FORMULA.	PHYSICAL CONDITION.	MELTING POINT. (*Centigrade*)	SOLUBILITY.
Acetylene Dicarboxylic,	$C_4H_2O_4$	Solid.	175°	. . .
Glutinic,	$C_4H_2O_4$	Solid.	145–146°	. . .
Muconic,	. . .	Solid.	260°	. . .
Diallyl Malonic,	. . .	Solid.	133°	. . .
Diacetylene Dicarboxylic,	$C_6H_2O_4$	Solid.	. . .	Readily soluble in water, alcohol, ether.
Tetra-acetylene Dicarboxylic,	$C_{10}H_2O_4$	Solid.	. . .	. . .

4. KETONE DICARBOXYLIC ACIDS.

Mesoxalic,	$C_3H_2O_5$	Solid.	115°	. . .
Oxalo-acetic,	$C_4H_4O_5$	. . .	. . .	. . .
Aceto-malonic,	$C_5H_6O_5$	. . .	. . .	. . .
Acetone Dicarboxylic,	$C_5H_6O_5$	Solid.	130°	Readily soluble in water and ether.
Aceto-succinic,	$C_6H_8O_5$	Solid.	244–245°	. . .
Aceto-glutaric,	$C_7H_{10}O_5$	. . .	. . .	. . .

5. DIKETONE-DICARBOXYLIC ACIDS.

Oxal-diacetic,	$C_6H_6O_6$	Solid.	77°	. . .
Oxal-levulinic,	$C_7H_8O_6$	Liquid.	. . .	. . .
Diaceto-succinic,	$C_8H_{10}O_6$	Solid.	78°	. . .

6. URIC ACID GROUP (CARBAMIDES OF THE DICARBOXYLIC ACIDS).

Parabanic Acid (*Oxalyl Urea*),	$C_3H_2N_2O_3$	Solid.	. . .	Soluble in water and ether.
Oxaluric Acid,	$C_3H_4N_2O_4$	Solid.	. . .	Slowly soluble in water.
Barbituric Acid (*Malonyl Urea*),	$C_4H_4N_2O_3$	Solid.	. . .	. . .
Dialuric Acid (*Tartronyl Urea*),	$C_4H_4N_2O_4$	Solid.	. . .	. . .
Alloxan (*Mesoxalyl Urea*),	$C_4H_2N_2O_4$	Solid.	. . .	Readily soluble in water.
Uric Acid,	$C_5H_4N_4O_3$	Solid.	. . .	Insoluble in alcohol and ether. Slowly soluble in water.
Guanin,	$C_5H_5N_5O$	Solid.	. . .	Insoluble in water, alcohol, ether.
Theobromin,	$C_7H_8N_4O_2$	Solid.	290°	Slowly soluble in hot water and alcohol.
Caffein (Thein),	$C_8H_{10}N_4O_2$	Solid.	225°	Slightly soluble in cold water and alcohol.

TABLE OF FATTY ACIDS.

FIRST SERIES. $C_nH_{2n}O_2$.

NAME.	FORMULA.	PHYSICAL CONDITION.	MELTING POINT. (*Centigrade.*)	BOILING POINT. (*Centigrade.*)	SPECIFIC GRAVITY.
Formic,	CH_2O_2	Liquid.	. . .	99°	1.223
Acetic,	$C_2H_4O_2$	Liquid.	. . .	118°	1.0514
Propionic,	$C_3H_6O_2$	Liquid.	. . .	140°	0.992
Butyric,	$C_4H_8O_2$	Liquid.	. . .	163°	0.9587

Acidulated (*as-id'-u-la-ted*) [*acidulare*, to make sour]. Somewhat sour or acid; sourish.

Acidulous (*as-id'-u-lus*) [*acidulare*, to make sour]. Sourish; subacid; moderately sour.

Acidum (*as'-id-um*) [L.]. See *Acid*.

Acidurgia (*as-id-ur'-je-ah*). See *Aciurgia*.

Acies (*a'-she-ēz*) [L., sharpness, edge, steel]. 1. Sharpness; keenness. 2. A sharp or cutting instrument. 3. Iron or steel as a medicine.

Acinaceous (*as-in-a'-she-us*) [*acinus*, a berry or grape-stone]. Possessing or made of kernels, small seeds, or drupelets, as a grape or raspberry.

Acinacifolious (*as-in-as-if-o'-le-us*) [*acinaces*, a simitar; *folium*, a leaf]. In biology, having simitar-shaped leaves.

Acinaciform (*as-in-as'-e-form*) [*acinaces*, a simitar; *formis*, shape]. In biology, a leaf, pod, or other object, having one straight, thick edge, and one thin and convex; simitar-shaped.

Acinarious (*as-in-a'-re-us*) [*acinus*, the grape]. In biology, having the surface covered with grape-like vesicles, as in certain algæ.

Acinesia (*as-in-e'-ze-ah*) [ἀ priv.; κίνησις, motion]. Motor paralysis. A loss of motion in any or all parts of the body; abstinence from motion. Also, the interval between consecutive throbs of the heart. See also *Diastole*.

Acinesis (*as-in-e'-sis*). Same as *Acinesia*.

Acinetan (*as-in-e'-tan*) [ἀκίνητος, motionless]. An infusorian having suctorial, tubular processes instead of cilia; one of the *Acinetæ*.

Acinetatrophia (*as-in-et-at-ro'-fe-ah*) [*acinesis; atrophia*]. Atrophy due to lack of exercise.

Acinetic (*as-in-et'-ik*) [ἀκίνητος, motionless]. Relating to, or affected with, acinesia.

Acinetiform (*as-in-et'-e-form*). In biology, an acinetan-like infusorian.

Acini (*as'-in-i*) [L.]. Plural of *Acinus*, *q. v.*

Aciniform (*as-in'-e-form*) [*acinus*, a grape]. Grape-like.

Acinus (*as'-in-us*) [*acinus*, a grape: *pl.*, *Acini*]. Any one of the smallest lobules of a conglomerate gland; a saccule of a compound racemose gland; a lobule of the liver, *etc.*

Acipenser (*as-e-pen'-ser*) [ἀκκιπήσιος, the sturgeon]. A genus of fishes. *A. huso*. See *Ichthyocolla*.

Acipenserid (*as-e-pen′-ser-id*) [ἀκκιπήσιος, the sturgeon]. A member of the family *Acipenseridæ*. A sturgeon.

Acipenseroid (*as-e-pen′-ser-oid*) [ἀκκιπήσιος, the sturgeon]. In biology, resembling the sturgeon.

Aciurgia (*as-e-er′-je-ah*), or **Aciurgy** (*as′-e-er-je*) [ἀκίς, point; ἔργειν, to work]. Operative surgery.

Ack′ermann's An′gles. See *Angle*.

Aclastic (*ak-las′-tik*) [ἀ priv.; κλάειν, to break]. Not refracting.

Acleitocardia (*ah-kli-to-kar′-de-ah*) [ἀ priv.; κλείειν, to close; καρδία, the heart]. Imperfect closure of the foramen ovale, a fetal opening between the auricles of the heart, which prevents perfect aëration of the blood. It is thought to be connected with the disease variously known as cyanopathy, "Blue Disease," "Blue Jaundice," *etc*.

Acmastic (*ak-mas′-tik*) [ἀκμαστικός, in full bloom]. Having no acme, or culminating point (said of fevers); continuous.

Acme (*ak′-me*) [ακμή, a point]. The critical stage of a disease; the crisis. The highest point or degree of anything.

Acmon (*ak′-mon*) [ἄκμων, an anvil]. The incus.

Acne (*ak′-ne*) [ἀχνή, a point]. *Acne vulgaris; Varus;* a very common, usually chronic, inflammatory disease of the sebaceous glands, occurring mostly about the face, chest, and back. The lesions may be papular, pustular, or tubercular. It occurs usually between the ages of puberty and twenty-four years, is usually worse in winter, and is associated with menstrual and gastro-intestinal troubles. The individual lesions consist of minute pink, acuminate papules or pimples, in the center of which is a black-topped comedo (*A. punctata, A. papulosa*). **A. adenoid.** See *Lupus, Disseminated Follicular*. **A. adolescentium.** Synonym of *A. vulgaris*. **A. albida.** Synonym of *Milium*. **A. artificialis,** that form that disappears when the cause is removed. **A. atrophica.** Synonym of *A. varioliformis*. **A. cachecticorum,** a form occurring only in starved or debilitated persons after long, wasting diseases, as phthisis. It consists of flat, livid, acneiform papules and pustules without comedones, resulting in deep pigmented scars. They are situated chiefly on the trunk and lower extremities. **A. ciliaris,** acne at the edges of the eyelids. **A. disseminata.** Synonym of *A. vulgaris*. **A. erythematosa.** Synonym of *A. rosacea*. **A. frontalis.** Synonym of *A. varioliformis*. **A. generalis,** acne that has become general over the surface of the body. **A. hypertrophica,** stage of *A. rosacea* in which there is a permanent, intensely red, non-inflammatory, nodulated thickening of the tips and sides of the nose, expanding it, both laterally and longitudinally. **A. indurata,** a variety of *A. vulgaris*, characterized by chronic, livid indurations, the result of extensive perifollicular infiltration. Especially seen in strumous subjects. **A. keloid.** See *Dermatitis papillomatosa capillitii*. **A. keratosa,** a rare form of acne in which a horny plug takes the place of the comedone, and by its presence excites inflammation. **A. mentagra.** See *Sycosis*. **A. necrotica.** Synonym of *A. varioliformis*. **A. papulosa.** See *Acne*. **A. picealis,** *Tar Acne;* a form of dermatitis that involves chiefly the extensor surfaces of the limbs, common in fiber-dressers who work with paraffin and in persons otherwise brought in contact with tar or its vapor. **A. punctata,** a variety of *A. vulgaris*. See *Acne*. **A. pustulosa,** a variety of *A. vulgaris*, characterized by dermic abscesses. **A. rodens.** Synonym of *A. varioliformis*. **A. rosacea.** *Rosacea; Telangiectasis faciei; Nævus araneus; Brandy Nose; Whisky Nose; Spider Nevus; Spider Cancer.* A chronic, hyperemic, or inflammatory affection of the skin, situated usually upon the face, especially the nose, cheeks, forehead, and chin. It starts as a redness, which later becomes permanent and is then associated with the development of papules, pustules, and varicose vessels. In the latest stages there is an excessive formation of new tissue. Its causes are some reflex irritation of the stomach, bowels, or sexual apparatus. Common in drunkards. **A. scrofulosa,** a variety of *A. cachecticorum*, that occurs in strumous children. **A. sebacea.** Synonym of *Seborrhea*. **A. simplex,** a variety of *A. vulgaris*. **A. sycosiformis.** Same as *Sycosis non-parasitica*. **A. tarsi,** an inflammatory affection of the large sebaceous glands of the eyelashes (Meibomian glands). **A. variolifor′mis,** a rather rare disease, situated chiefly about the forehead, at the junction with the hairy scalp, and extending into the hair. It is especially abundant on the temples, and may spread over the face and body. It is a disease of adult life, but may occur before the age of twenty years. The pustules appear in groups, and each has a hard, central, necrotic scab, which presses into the skin, and when separated leaves a deep pit, at first dark red, but eventually becoming white. It is a very chronic disease, appearing in successive crops. Its etiology is unknown. **A. vulgaris.** See *Acne*.

Acnemia (*ak-ne′-me-ah*) [ἀ priv.; κνήμη, leg]. Deficiency in the calf of the leg.

Acnitis (*ak-ni′-tis*) [ἀχνή, a point; ιτις, inflammation]. See *Hydrosadenitis phlegmonosa*.

Acœ-. See *Ace-*.

Acœlius (*ah-se′-le-us*). See *Acelius*.

Acolasia (*ak-o-la′-ze-ah*) [ἀκολασία, intemperance]. Unrestrained self-indulgence; lust; intemperance.

Acolastic (*ak-o-las′-tik*) [ἀκολασία, intemperance]. Due to, or characterized by, acolasia.

Acology (*ak-ol′-o-je*) [ἄκος, remedy; λόγος, a discourse]. Aceology.

Acolous (*ah-ko′-lus*) [ἀ priv.; κῶλον, limb]. Having no limbs.

Acomia (*ah-ko′-me-ah*) [ἀ priv.; κόμη, hair]. Baldness. A deficiency of hair arising from any cause.

Acomous (*ah-ko′-mus*) [ἀ priv.; κόμη, hair]. Hairless, bald.

Acondylose (*ah-kon′-dil-ōs*). See *Acondylous*.

Acondylous (*ah-kon′-dil-us*) [ἀ priv.; *condyle*]. Having no condyles; having no joints.

Aconine (*ak′-o-nin*) [ἀκονιτον], $C_{26}H_{39}NO_{11}$. A decomposition product of aconitin.

Aconite (*ak′-o-nīt*). See *Aconitum*.

Aconitia (*ak-o-nish′-e-ah*). Aconitin, or aconitina; a very poisonous alkaloid, the active principle of aconite.

Aconitic Acid (*ak-o-nit′-ik*). See *Acid*.

Aconiti folia (*ak-o-ni-tī fo′-le-ah*) [L.]. Aconite leaves. See *Aconitum*. **A. radix** (*ak-o-ni-ti ra′-dix*), aconite root. See *Aconitum*.

Aconitina (*ak-on-it-i′-nah*). Same as *Aconitia*. See *Aconitum*.

Aconitum (*ak-o-ni′-tum*) [L.]. The root of *Aconitum napellus*. Possesses a bitter, pungent taste. Produces numbness and persistent tingling in the tongue and lips. It is very poisonous. Exerts great depression of the heart, respiration, circulation, and nerves. It is antipyretic, diaphoretic, and diuretic. The active principle is *Aconitin*. Highly beneficial in fevers, acute throat affections, and inflammation of the respiratory organs. Dose gr. ss–ij. **A. Abstractum,** has double the strength of the powdered drug, or its fluid extract. Dose gr. ¼–j. Unof. **A. Extractum.** Dose gr. ⅙–⅓. **A. Ext. Fld.,** has a strength of one drop to the grain of powdered drug. Dose ♏½–ij. **A. Liniment**

(B. P.), aconite-root, camphor, and rectified spirit. **A. Tinct.**, contains aconite 35, alcohol and water each q. s. Dose ♏½-iv. The following are unofficial: **Aconitina** ($C_{33}H_{43}NO_{12}$) (aconitin), an amorphous solid. Dose gr. $\frac{1}{100}$–$\frac{1}{50}$. *A. ferox*, a plant of the Himalayas, used internally for pneumonia and pleurisy; externally for neuralgia. Dose of the tincture (1 in 10) ♏j–v. **A. Injectio Hypodermica**, one grain in ½ ounce. Dose ♏j–iv. **A. Napellina**, Dose gr. $\frac{1}{2}$–$\frac{3}{5}$. St. Jacob's Oil, a weak aconite liniment. **A. Oleatum**, a two per cent. solution of aconitin in oleic acid. **A. Ung.** (B. P.), eight grains to the ounce.

Aconuresis (*ah-kon-u-re'-sis*) [*ἀ* priv.; *conari*, to strive; *οὐρησις*, urination]. Involuntary discharge of urine.

Acopa (*ak'-o-pah*). Plural of *Acopon*, *q. v.*

Acopia (*ah-ko'-pe-ah*) [*ἀκοπία*]. Freedom from weariness.

Acopic (*ah-kop'-ik*) [see *Acopia*]. Refreshing; restorative; restful.

Acopon (*ak'-o-pon*) [*ἀ* priv.; *κόπος*, fatigue]. A restorative, or cordial medicine or application.

Acoprosis (*ah-kop-ro'-sis*) [*ἀ* priv.; *κόπρος*, excrement]. Deficient formation of feces.

Acor (*a'-kor*) [L.]. Acrimony: acidity, as of the stomach.

Acorea (*ah-ko-re'-ah*) [*ἀ* priv.; *κόρη*, pupil]. Absence of the pupil.

Acoretin (*ak-o-re'-tin*) [*acorus*; *ῥητίνη*, resin]. A resinous principle obtained from *Acorus calamus*.

Acoria (*ah-ko'-re-ah*) [*ἀ* priv.; *κόρος*, satisfaction]. A greedy or insatiable appetite.

Acorin (*ak'-o-rin*) [*ἀ* priv.; *κόρη*, the pupil]. A bitter glucoside obtained from *Acorus calamus*, or sweet flag.

Acormous (*ah-kor'-mus*) [*ἀ* priv.; *κορμός*, the trunk of a tree]. Trunkless; of the nature of an acormus.

Acormus (*ah-kor'-mus*) [*ἀ* priv.; *κορμός*, the trunk]. A monster without a trunk or body.

Acorn (*a'-korn*) [L.]. The fruit or nut of the oak. See *Camata* and *Camatina*.

Acorn-cups (*a'-korn-kups*). The capsules in which acorns are seated. See *Valonia*.

Acorus (*ak'-o-rus*) [*ἀ* priv.; *κόρη*, the pupil]. See *Calamus*.

Acosmia (*ah-koz'-me-ah*) [*ἀ* priv.; *χόσμος*, order]. 1. Poor health. 2. An irregularity in the course of a disease.

Acotyledon (*ah-kot-il-e'-don*) [*ἀ* priv.; *κοτυληδών*, a hollow vessel]. In botany, a plant producing an embryo without seed-leaves or cotyledons.

Acotyledonous (*ah-kot-il-e'-do-nus*) [*ἀ* priv.; *κοτῦληδών* a hollow vessel]. Destitute of embryo or embryonic leaves, or cotyledons.

Acouchi (*ah-koo'-chē*). See *Acuchi*.

Acoumeter, or Acouometer (*ah-koo'-met-er, a-koo-om'-et-er*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. An instrument for measuring the acuteness of hearing.

Acoumetry (*ah-koo'-met-re*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. The measurement or testing of the acuteness of the hearing.

Acouophonia (*ah-koo-o-fo'-ne-ah*) [*ἀκούειν*, to hear; *φωνή*, sound]. Auscultatory percussion.

Acouoxylon (*ah-koo-oks'-il-on*) [*ἀκούειν*, to hear; *ξύλον*, wood]. A wooden (pine) stethoscope.

Acousimeter (*ah-koo-sim'-et-er*) [*ἀκουσις*, a hearing; *μέτρον*, a measure.] See *Acoumeter*.

Acousma (*ah-koos'-* or *-kows'-mah*) [*ἀκουσμα*, thing heard: *pl.*, *Acousmata*]. An auditory hallucination; a condition in which imaginary sounds are noticed by the patient, and are believed by him to be real.

Acoustic (*ah-koos'-tik* or *-kows'-tik*) [*ἀκουστικός*]. Relating to the ear or sense of hearing. **A. Duct**, the external meatus of the ear. **A. Nerve**, the portio mollis of the seventh pair. See *Nerves*. **A. Tetanus**, the rapidity of the induction shocks in a frog's nerve-muscle preparation, as measured by the pitch of a vibrating rod. **A. Tubercle**, a rounded elevation on either side of the floor of the fourth ventricle.

Acoustics (*ah-koos'-tiks* or *a-kows'-tiks*) [*ἀκουστικός*]. The science of sound.

Acquetta (*ak-wet'-tah*) [Ital.]. Same as *Aqua tofana*.

Acquired Movements (*ak-wi'-erd moov'-mentz*). Those brought under the influence of the will only after conscious and attentive effort and practice, in distinction from reacquired movements, those reinstated in their former proficiency after injury to the motor regions of the brain.

Acræpalous (*ah-krep'-al-us*). See *Acrepalous*.

Acramphibryous (*ak-ram-fib'-ri-us*) [*ἄκρος*, at the end; *ἀμφί*, on both sides; *βρύον*, blossom]. In biology, pertaining to plants that produce lateral as well as terminal buds.

Acrania (*ah-kra'-ne-ah*) [*ἀ* priv.; *κρανίον*, skull]. The condition of a monster with partial or complete absence of the cranium.

Acranial (*ah-kra'-ne-al*) [*ἀ* priv.; *κρανίον*, skull]. Having no cranium.

Acrasia (*ah-kra'-ze-ah*) [*ἀ* priv.; *κρᾶσις*, moderation]. 1. Intemperance; lack of self-control. 2. Acratia.

Acraspedote (*ah-kras'-pe-dōt*) [*ἀ* priv.; *κράσπεδον*, a hem or border]. In biology, pertaining to Gegenbaur's group of medusæ, *Acraspeda;* having a disk without velum or marginal fold.

Acratia (*ah-kra'-she-ah*) [*ἀκράτεια*: *ἀ* priv.; *κράτος*, force]. Impotence, loss of power.

Acraturesis (*ah-krat-u-re'-sis*) [*ἀκράτεια*, lack of strength; *οὐρησις*, micturition]. Inability to micturate, from atony of the bladder.

Acrecbolic (*ak-rek-bol'-ik*) [*ἄκρος*, at the apex; *ἐκβόλιον*, to throw out]. In biology, capable of protrusion by an outward movement of the tip; the introverted and eversible proboscis of certain worms and molluscs.

Acrembolic (*ak-rem-bol'-ik*) [*ἄκρος*, at the apex; *ἐμβάλλειν*, to throw in, insert]. In biology, introversion by an inward movement of the tip, as the everted proboscis of certain worms and molluscs.

Acrepalous, or Acræpalous (*ah-krep'-al-us*) [*ἀ* priv.; *κραιπάλη*, debauch]. Correcting the nausea that follows excess in drinking, or in eating. a pick me up?

Acrid (*ak'-rid*) [*acer*, *acris*, sharp]. Pungent, irritating; producing an irritation, as of the tongue, fauces, or stomach.

Acridian (*ăk-rid'-i-an*) [dim. of *ἀκρίς*, a locust]. Pertaining to the acridia or grasshoppers.

Acridin (*ak'-rid-in*) [*acer*, acrid], $C_{13}H_9N$. A substance produced by heating anilin and salicylic aldehyd to 260° with $ZnCl_2$. Very soluble in alcohol and ether. It occurs in crude anthracene and dissolves in dilute acids with a beautiful green fluorescence. It readily sublimes in colorless leaflets; melts at 110°; and has a very pungent odor.

Acridins (*ak'-rid-inz*) [*acer*, acrid]. Substances obtained when diphenylamin is heated to 300° with fatty acids. They are feeble bases; their salts are decomposed by boiling water.

Acridophagus (*ak-rid-of'-a-gus*) [*ἀκρίς*, a locust; *φαγεῖν*, eat]. The eater of locusts.

Acrimony (*ak'-rim-o-ne*) [*acrimonia*]. Irritating quality, pungency, corrosiveness: an acrid quality or state.

Acrinia (*ah-krin'-e-ah*) [*ἀ* priv; *κρίνειν*, to separate]. Diminution or suppression of a secretion or excretion.

Acrinyl (*ak-rin'-il*) [*acer*, acrid], C_7H_7O. One of the univalent radicles. **A. Sulphocyanate**, $C_7H_7O.SCN$, an acrid and vesicating substance found in white mustard, corresponding to the essential oil of the black mustard.

Acrisia (*ah-kris'-e-ah*) [*ἀ* priv.; *crisis*]. The absence of a crisis from a disease; an unfavorable crisis or turn in the course of an attack of disease.

Acritical (*ah-krit'-ik-al*) [*ἀ* priv.; *κρίσις*, a crisis]. Having no crisis; not relating to a crisis.

Acritochromacy (*ah-krit-o-kro'-mas-e*) [*ἄκριτος*, undistinguished; *χρῶμα*, color]. Color-blindness, achromatopsia.

Acroæsthesia (*ak-ro-es-the'-ze-ah*). See *Acroesthesia*.

Acroanesthesia (*ak-ro-an-es-the'-ze-ah*) [*ἄκρον*, extremity; *ἀναισθησία*, want of feeling]. Anesthesia of the extremities.

Acroarthritis (*ak-ro-arth-ri'-tis*) [*ἄκρον*, extremity; *ἄρθρον*, a joint; *ιτις*, inflammation]. Inflammation of the joints of a limb.

Acroasphyxia (*ak-ro-as-fiks'-e-ah*) [*ἄκρον*, extremity; *ἀ* priv.; *σφύξις*, pulse]. Asphyxia of the extremities, the so-called phenomena of Raynaud.

Acrobryous (*ak-rob'-re-us*) [*ἄκρος*, apex; *βρύον*, a flower]. In biology, growing only at the apex.

Acrobystia (*ak-ro-bis'-te-ah*) [*ἀκροβυστία*, the foreskin]. The prepuce.

Acrobystiolith (*ak-ro-bis'-te-o-lith*) [*ἀκροβυστία*, the prepuce; *λίθος*, a stone]. A preputial calculus.

Acrobystitis (*ak-ro-bis-ti'-tis*) [*ἀκροβυστία*, the foreskin; *ιτις*, inflammation]. Posthitis.

Acrocarpous (*ak-ro-kar'-pus*) [*ἄκρος*, at the apex; *καρπός*, fruit]. In biology, fruiting at the tips, as mosses.

Acrocephalia (*ak-ro-sef-a'-le-ah*) [*ἄκρον*, a point; *κεφαλή*, the head]. A deformity of the head in which the vertical diameter is increased and the top is more or less pointed.

Acrocephalic (*ak-ro-sef-al'-ik*) [*ἄκρον*, a point; *κεφαλή*, the head]. Characterized by acrocephalia; having the top of the head unusually high.

Acrocephaline (*ak-ro-sef'-a-lin*) [*ἄκρον*, point; *κεφαλή*, head]. In biology, resembling birds of the genus *Acrocephalus*, the large-billed reed warblers.

Acrocephalous (*ak-ro-sef'-al-us*) [*ἄκρον*, a point; *κεφαλή*, the head]. Characterized by or affected with acrocephalia.

Acrocephaly (*ak-ro-sef'-al-e*) [*ἄκρον*, a point; *κεφαλή*, the head]. Same as *Acrocephalia*.

Acrocheir (*ak'-ro-kir*) [*ἄκρον*, point; *χείρ*, hand]. The ends of the fingers considered together; the forearm and hand.

Acrochordon (*ak-ro-kor'-don*) [*ἀκροχορδών*, literally the end of a catgut cord]. A pedunculated or pensile wart. Synonym of *Molluscum fibrosum*.

Acrocinesis (*ak-ro-sin-e'-sis*) [*ἄκρος*, extreme; *κίνησις*, movement]. Excessive motility; abnormal freedom of movement, as seen in certain cases of hysteria.

Acrocinetic (*ak-ro-sin-et'-ik*) [*ἄκρος*, extreme; *κίνησις*, movement]. Characterized by acrocinesis.

Acrocyst (*ak'-ro-sist*) [*ἄκρος*, apex; *κύστις*, pouch]. In biology, a sort of broad sac at the top of the gonangium in certain hydroids.

Acrodermatitis (*ak-ro-der-mat-i'-tis*) [*ἄκρον*, extremity; *δέρμα*, skin; *ιτις*, inflammation]. Inflammation of the skin of an extremity.

Acrodont (*ak'-ro-dont*) [*ἄκρος*, apex or edge; *ὀδούς*, tooth]. In biology, one of or pertaining to those lizards with teeth attached to the edge of the jaw, without alveoli.

Acrodynia (*ak-ro-din'-e-ah*) [*ἄκρος*, an extremity; *ὀδύνη*, pain]. Epidemic erythema; a disease closely allied to pellagra. It is characterized by gastro-intestinal symptoms, redness of the conjunctivæ, edema of the face, formication, pricking pains in the palm and soles, hyperesthesia followed by anesthesia of these parts, and an erythematous eruption preceded by bullæ, chiefly on the hands and feet, but spreading over the limbs and trunk. This is followed by exfoliation and dark brown or black pigmentation, greatest in the warm regions of the body. Wasting of the limbs, with edema, cramps, pareses, and spasms may be present, and death may follow in the old or feeble. The disease is probably due to some noxious constituent of or defect in the diet.

Acroesthesia, or Acroæsthesia (*ak-ro-es-the'-ze-ah*) [*ἄκρος*, extreme; *αἴσθησις*, sensation]. Exaggerated sensitiveness, or sensibility. Sense of pain in the extremities.

Acrogen (*ak'-ro-jen*) [*ἄκρος*, apex; *γενής*, produced]. In biology, a member of a division of the Cryptogams which grow by terminal buds, as ferns and mosses.

Acrogenic (*ak-ro-jen'-ik*) [*ἄκρος*, apex; *γενής*, produced]. In biology, partaking of the character of an acrogen.

Acrogenous (*ak-roj'-en-us*) [*ἄκρος*, at the apex; *γενής*, produced]. In biology, growth by increase at the summit, as ferns, mosses, and certain zoöphytes.

Acrogynous (*ak-roj'-in-us*) [*ἄκρος*, at the tip; *γυνή*, female]. In biology, having the archegonia formed from or near the apical cell, as certain of the *Hepaticæ*.

Acrolein (*ak-ro'-le-in*) [*acer*, sharp; *oleum*, oil], C_3H_4O. Acrylic Aldehyd. A highly volatile liquid derived from the decomposition or the destructive distillation of glycerin. See *Acrylaldehyd*.

Acrolenion (*ak-ro-len'-e-on*) [*ἄκρον*, point; *ὠλένη*, elbow]. Same as *Olecranon*.

Acromania (*ak-ro-ma'-ne-ah*) [*ἄκρος*, extreme; *μανία*, madness]. Incurable or extreme insanity.

Acromastitis (*ak-ro-mas-ti'-tis*) [*acromastium; itis*, inflammation]. Inflammation of the nipple.

Acromastium (*ak-ro-mas'-te-um*) [*ἄκρον*, a point; *μαστός*, breast]. The nipple.

Acromegalia (*ak-ro-meg-a'-le-ah*), or **Akromegaly** (*ak-ro-meg'-al-e*) [*ἄκρος*; *μεγάλη*, large]. A disease characterized by abnormally great development of the extremities, and of the features of the face, including the bony as well as the soft parts. The disease is of long duration, twenty years or more, the patient finally dying of exhaustion. The etiology is unknown, although Virchow believes heredity to have an important share in its causation.

Acromial (*ak-ro'-me-al*) [*ἄκρος*, extremity; *ὦμος*, the shoulder]. Relating to the acromion.

Acromicria (*ak-ro-mik'-re-ah*) [*ἄκρος*, extremity; *μικρός*, small]. Abnormal smallness of the extremities. A condition in which there is a reduction in the size of the nose, ears, and face, as well as hands and feet.

Acromio-clavicular (*ak-ro'-me-o-kla-vik'-u-lar*) [*ἄκρος*, extremity; *ὦμος*, the shoulder; *clavus*, a key]. Relating to the acromion and the clavicle.

Acromio-coracoid (*ak-ro'-me-o-ko'-rak-oid*). See *Acromio-coracoideus*.

Acromio-coracoideus (*ak-ro'-me-o-ko-rak-oid-e'-us*) [*ἄκρος*, extremity; *ὦμος*, the shoulder; *κόραξ*, a crow]. A triangular ligament lying between the acromion and the coracoid process.

Acromio-deltoideus (*ak-ro'-me-o-del-toid-e'-us*) [*ἄκρος*, extremity; *ὦμος*, the shoulder; *δελτοειδής*, deltoid]. In comparative anatomy, a muscle having as its origin the acromion, and the deltoid ridge of the humerus as its insertion.

Acromio-humeral (*ak-ro'-me-o-hu'-mer-al*) [ἄκρος, extremity; ὦμος, the shoulder; *humerus*]. Relating to the acromion and the humerus. **A. Muscle,** the deltoid.

Acromion (*ak-ro'-me-on*) [ἄκρον, a summit; ὦμος, the shoulder]. The triangular-shaped process at the summit of the scapula, that forms the attachment of the deltoid muscle.

Acromio-thoracic (*ak-ro'-me-o-tho-ra'-sik*) [ἀκρώμιον, shoulder; θώραξ, thorax]. In anatomy, relating to the shoulder and thorax, as the acromio-thoracic artery.

Acromio-trapezius (*ak-ro'-me-o-tra-pe'-ze-us*) [ἀκρώμιον, shoulder; *trapezium*]. In anatomy, a part of the trapezius muscle.

Acromphalon (*ak-rom'-fal-on*) [ἄκρον, a point; ὀμφαλός, the navel]. See *Acromphalus*.

Acromphalus (*ak-rom'-fal-us*) [ἄκρον, extremity; ὀμφαλός, the navel]. 1. The center of the umbilicus to which the cord is attached. 2. The first stage of umbilical hernia, marked by a pouting of the navel.

Acromyodian (*ak-ro-me-o'-de-an*) [ἄκρον, extremity; μῦς, muscle; ᾠδή, song]. In biology, having the syringeal muscles attached to the ends of the upper bronchial rings, as in certain singing birds, the *Acromyodi*.

Acromyodic (*a-kro-me-od'-ik*). Same as *Acromyodian*.

Acromyodous (*ak-ro-mi'-o-dus*). Same as *Acromyodian*.

Acronarcotic (*ak-ro-nar-kot'-ik*) [*acer*, sharp; ναρκοῦν, to benumb]. Both acrid and narcotic.

Acroneurosis (*ak-ro-nu-ro'-sis*) [ἄκρον, an extremity; νεῦρον, a nerve]. Any neurosis manifesting itself in the extremities.

Acronyx (*ak'-ro-nix*) [ἄκρον, an extremity; ὄνυξ, a nail]. The ingrowing of the nail.

Acroparalysis (*ak-ro-par-al'-is-is*) [ἄκρον, an extreme; παρά, by; λύειν, to loose]. Paralysis of the extremities.

Acroparesthesia, or **Acroparæsthesia** (*ak-ro-par-es-the'-ze-ah*) [ἄκρον, extremity; παρά, around; αἴσθησις, sensation]. 1. Abnormal, or perverted sensation in the extremities. 2. Extreme or confirmed paresthesia.

Acropathology (*ak-ro-path-ol'-o-je*) [ἄκρον, an extremity; πάθος, disease; λόγος, treatise]. The pathology of the extremities.

Acropathy (*ak-rop'-a-the*) [ἄκρον, an extremity; πάθος, suffering]. Any disease of the extremities.

Acropetal (*ak-rop'-et-al*) [ἄκρον, the top; *petere*, to seek]. In biology, developing from the base or center, upward and outward, as many leaves, lateral shoots, or flower clusters.

Acrophobia (*ak-ro-fo'-be-ah*) [ἄκρον, a height; φόβος, fear]. Morbid dread of being at a great height.

Acropodium (*ak-ro-po'-de-um*) [ἄκρος, at the top; ποδίον, dim. of πούς (ποδ), foot]. In zoölogy, the entire upper surface of the foot.

Acroposthia (*ak-ro-pos'-the-ah*) [ἄκρος, extreme; πόσθη, foreskin]. The distal part of the prepuce.

Acroposthitis (*ak-ro-pos-thi'-tis*) [ἄκρος, extreme; πόσθη, foreskin]. Posthitis.

Acrorrheuma (*ak-ro-ru'-mah*) [ἄκρον, an extremity; ῥεῦμα, a flux]. Rheumatism of the extremities.

Acrosarcum (*ak-ro-sar'-kum*) [ἄκρος, at the end; σάρξ (σαρκ), flesh]. In biology, a berry fruit produced by an ovary with an adnate calyx, *e. g.*, a currant or cranberry.

Acroscleriasis (*ak-ro-skle-ri'-as-is*) [ἄκρον, extremity; σκληρός, hard]. Sclerotic changes in the extremities.

Acroscopic (*ak-ro-skop'-ik*) [ἄκρος, apex; σκοπεῖν, view]. In biology, looking toward the top.

Acrosphacelus (*ak-ro-sfas'-el-us*) [ἄκρον, extremity; σφάκελος, dead]. Gangrene of an extremity.

Acrospire (*ak'-ro-spīr*) [ἄκρος, at the top; σπεῖρα, a coil, spire]. In biology, the first sprout of a grain.

Acrospore (*ak'-ro-spor*) [ἄκρος, at the end; σπορά, seed]. In biology, the spore of one of those fungi that fruit at the summit of simple erect hyphæ. See *Peronospora*.

Acrospores (*ak'-ro-sporz*) [ἄκρος, topmost; σπορά, a seed]. See *Conidia*.

Acrosporous (*ak-ros'-po-rus*) [ἄκρος, topmost; σπορά, a seed]. Same as *Acrospore*.

Acrotarsial (*ak-ro-tar'-se-al*) [ἄκρος, extremity; ταρσός, tarsus]. In biology, pertaining to the instep.

Acrotarsium (*ak-ro-tar'-se-um*) [ἄκρος, top; ταρσός, tarsus]. The instep.

Acroteria (*ak-ro-te'-re-ah*) [ἀκρατήρια]. The extremities.

Acrothymion, or **Acrothymum** (*ak-ro-thi'-me-on*) [ἄκρος, summit; θύμος, thyme]. A rugose wart with a broad top.

Acrotic (*ak-rot'-ik*) [ἄκρος, extreme, outmost]. Relating to the glands of the skin; affecting the surface.

Acrotica (*ak-rot'-ik-ah*) [ἄκρος, extreme]. Acrotic diseases.

Acrotism (*ah'-krot-izm*) [ἀ priv.; κρότος, striking]. Any defective beating of the pulse; failure of the pulse.

Acrotismus (*ah-krot-iz'-mus*) [ἀ priv.; κρότος, striking]. See *Acrotism*.

Acrylaldehyd (*ak-ril-al'-de-hīd*) [*acer*, sharp; *aldehyd'*], C_3H_4O. *Acrolein*, the aldehyd of the allyl series; obtained by distilling glycerin to which strong phosphoric acid has been added, or by the dry distillation of fatty bodies; a colorless, mobile liquid, boiling at 52°, possessing a sp. gr. of 0.8410 at 20°. It has a pungent odor and attacks the mucous membranes in a violent manner. It occasions an odor of burning fat. It is soluble in 2–3 parts of water.

Actea, or **Actæa** (*ak-te'-ah*) [ἀκτῆ, the elder]. A genus of ranunculaceous plants having active medicinal qualities. *A. alba*, the white cohosh, has much the same qualities as *A. spicata*. *A. cimicifuga* is more important. See *Cimicifuga*. *A. racemosa*. See *Cimicifuga*. *A. rubra*, red cohosh, and *A. spicata*, are purgative and emetic.

Actinal (*ak'-tin-al*) [ἀκτίς, a ray]. In biology, pertaining to the oral pole, surface, or aspect of a radiate animal.

Actine (*ak'-tin*) [ἀκτίς, a ray]. In biology, a spicular ray, in sponges.

Actinenchyma (*ak-tin-en'-kim-ah*) [ἀκτίς, ray; ἔγχυμα, infusion]. In biology, a tissue of stellate cells.

Actinic (*ak-tin'-ik*) [ἀκτίς, a ray]. Referring to those wave-lengths of the spectrum corresponding to the violet and ultra-violet parts of the same that produce chemical changes in the haloid salts of silver, and are therefore valuable in photography.

Actiniochrome (*ak-tin'-e-o-krōm*) [ἀκτίς, a ray; χρῶμα, color]. A red pigment obtained from certain *Actinias*.

Actinism (*ak'-tin-izm*) [ἀκτίς, a ray]. The chemical quality of light, or of the sun's rays.

Actinohematin (*ak-tin-o-hem'-a-tin*) [ἀκτιν, ray; αἷμα, blood]. In biology, a respiratory pigment found by MacMunn in *Actiniæ*.

Actinoid (*ak'-tin-oid*) [ἀκτίς, ray; εἶδος, form]. In zoölogy, radiate, as a star fish.

Actinologous (*ak-tin-ol'-o-gus*) [ἀκτίς, a ray; λόγος, a word]. In biology, exhibiting actinology.

Actinologue (*ak-tin'-o-log*) [ἀκτίς, a ray; λόγος, a word]. In biology, a part possessing actinologous homology.

Actinology (*ak-tin-ol'-o-je*) [ἀκτίς, a ray; λόγος, a word]. In biology, that kind of homological relation that exists between the successive segments, regions, or divisions of a part or organ, in that they radiate or spring from it.

Actinomere (*ak-tin'-o-mēr*) [*ἀκτίς*, ray; *μέρος*, a part]. In zoölogy, one of the radiating partitions characteristic of the *Actinozoa*.

Actinomeric (*ak-tin-o-mer'-ik*) [*ἀκτίς*, a ray; *μέρος*, a part]. In biology, radiately divided.

Actinomorphic (*ak-tin-o-morf'-ik*) [*ἀκτίς*, a ray; *μορφή*, form]. Same as *Actinomorphous*.

Actinomorphous (*ak-tin-o-morf'-us*) [*ἀκτίς*, ray; *μορφή*, form]. Regularly radiated, as flowers divisible into similar portions in two or more vertical planes.

Actinomyces (*ak-tin-om'-is-ēz*) [*ἀκτίς*, a ray; *μύκης*, mushroom]. A genus of parasitic fungoid organisms. One species, *A. bovis*, causes the disease actinomycosis. Called also the *Ray Fungus*.

Actinomycoma (*ak-tin-o-mi-ko'-mah*) [*ἀκτίς*, a ray; *μύκης*, a fungus: *pl.*, *Actinomycomata*]. A tumor such as is characteristic of actinomycosis.

Actinomycosis (*ak-tin-o-mi-co'-sis*) [*ἀκτίς*, a ray; *μύκης*, a fungus]. A parasitical, infectious, inoculable disease first observed in cattle, and also occurring in man, and characterized by the manifestations of chronic inflammation, with or without suppuration, often resulting in the formation of granulation tumors. The disease is due to the presence of a characteristic microparasite, the *ray fungus*, *Actinomyces bovis*, which is composed of fine mycelial threads and club-shaped bodies. The most frequent and most curable form is when the abscesses form about the jaws and teeth. The best mode of staining the threads is by Gram's method. To stain the clubs as found in man is difficult; the best results have been obtained with orange rubin or eosin. The only treatment of the disease is removal of the infected tissue. When the parasite has found a nidus in the lungs or digestive tract, all treatment is so far useless. The disease is often called *lumpy-jaw* and *holdfast*.

Actinomycotic (*ak-tin-o-mi-kot'-ik*) [*ἀκτίς*, ray; *μύκης*, fungus]. Pertaining to or affected with actinomycosis.

Actinophore (*ak-tin'-o-fōr*) [*ἀκτίς*, a ray; *φέρειν*, to bear]. In biology, one of the peripheral elements affording support to the true fin rays in typical fishes and selachians.

Actinophorous (*ak-tin-off'-o-rus*) [*ἀκτίς*, ray; *φέρειν*, to bear]. In biology, bearing ray-like spines.

Actinosoma (*ak-tin-o-so'-mah*) [*ἀκτίς*, ray; *σῶμα*, body]. In biology, the entire body of a simple or composite actinozoan.

Actinospora chartarum (*ak-tin-o-spo'-rah char-ta'-rum*) [*ἀκτίν*, ray; *σῶμα*, body; *charta*, paper]. A parasitic fungus developing on paper and books.

Actinost (*ak'-tin-ost*) [*ἀκτίς*, ray; *ὀστέον*, a bone]. In ichthyology, one of the bones supporting the pectoral and ventral fins in true fishes.

Actinosteophyte (*ak-tin-os'-te-o-fīt*) [*ἀκτίς*, a ray; *osteophyte*]. An osteophyte of radiated form.

Actinostome (*ak-tin'-o-stōm*) [*ἀκτίς*, ray; *στόμα*, mouth]. In biology, the mouth of an actinozoan.

Actinotrichium (*ak-tin-o-trik'-e-um*) [*ἀκτίς*, ray; *θρίχ*, a hair]. In biology, a fiber in the fin-fold of an embryo fish, the forerunner of the adult fin-ray.

Actinotrocha (*ak-tin-ot'-ro-kah*) [*ἀκτίς*, ray; *τροχή*, ring]. The larva of certain gephyrean worms, characterized by rings of cilia about the mouth and anus.

Actinozoa (*ak-tin-o-zo'-ah*) [*ἀκτίς*, ray; *ζῶον*, an animal]. A division of celenterates including the sea-anemones, coral-polyps, *etc.*, having rayed tentacles about the mouth, and a digestive sac connected to the body wall by radial dissepiments called mesenteries.

Actinula (*ak-tin'-u-lah*) [dim. of *ἀκτίς*, ray: *pl.*, *Actinulæ*]. In biology, the oval generative zoöid of a gymnoblastic hydroid, developing without intermediate metamorphosis into a hydroid of the adult form.

Action (*ak'-shun*) [*agere*, to do, or perform]. In physiology, a term used to denote the function of an organ. **A., Reflex**, an involuntary movement of an organ or part of the body resulting from an impression carried by a sensory or afferent nerve to a subordinate center, and then sent back by an efferent nerve to some point at or near the source of irritation.

Active (*ak'-tiv*) [*agere*, to do, or perform]. In medicine, a term applied to treatment the reverse of passive, that is, where the pathological conditions are acted upon directly rather than partly controlled. Also, in a growing condition; opposed to dormant. **A. Insufficiency of Muscles.** See *Insufficiency*. **A. Spots**, the cortical centers of the brain, especially those that control definite muscular movements.

Activity (*ak-tiv'-it-e*) [*agere*, to do or perform]. Capacity for acting; sensibility; vitality; potency; energy.

Actual (*ak'-chu-al*) [*agere*, to do]. Real, effective; not potential. **A. Cautery.** See *Cautery*.

Actuation (*ak-chu-a'-shun*) [*agere*, to do, or perform]. That mental function that is exercised between the impulse of volition and its actualization or performance.

Acuchi (*ah-koo'-chē*). The resin or balsam obtained from *Icica heterophylla*, a tree of tropical America. It is almost identical with elemi. Unof.

Acufilopressure (*ak-u-fī'-lo-pres-ur*) [*acus*, needle; *filum*, a thread; *pressure*]. A combination of acupressure and ligation.

Acuity (*ak-u'-it-e*) [*acuitas; acuere*, to sharpen]. Acuteness or clearness of visual power in the perception of small or distant objects.

Aculeate (*ak-u'-le-āt*) [*aculeus*, a sting, prickle]. In botany, armed with prickles, *i.e.*, *aculii*; as the rose and brier. In biology, having a sting.

Aculeiform (*ak-u-le'-if-orm*) [*aculeus*, prickle; *forma*, shape]. Resembling a prickle.

Aculeolate (*ak-u'-le-o-lāt*) [*aculeolus*, a little prickle]. In biology, beset with small prickles.

Aculeus (*ak-u'-le-us*) [dim. of *acus*, a needle: *pl.*, *Aculei*]. In biology, a prickle or pointed excrescence of the bark, as in the rose or raspberry; the modified ovipositor or sting of a hymenopterous insect.

Acumeter (*ak-oo'-met-er*) [*ἀκούειν*, to hear; *μέτρον*, a measure]. Instrument for testing hearing.

Acuminate (*ak-u'-min-āt*) [*acuminatus*, pointed, acute]. Taper-pointed or sharp-pointed.

Acuminose, or **Acuminous** (*ak-u'-min-ōs*, or *-us*) [*acumen*, point]. In biology, same as *Acuminate*.

Acuminulate (*ak-u-min'-u-lāt*) [dim. of *acumen*, a point]. Slightly taper-pointed.

Acupression (*ak-u-presh'-un*) [*acus*, a needle; *premere*, to press]. Acupressure.

Acupressure (*ak'-u-presh-ūr*) [*acus*, a needle; *premere*, to press]. An operation to stop hemorrhage or aneurysm by the compression of a needle inserted into the tissues upon either side, either above or below the vessel. There are a variety of methods of performing acupressure.

Acupuncturation (*ak-u-pungk-chu-ra'-shun*) [*acus*, a needle; *punctura*, a puncture]. Acupuncture.

Acupuncturator (*ak-u-pungk'-chu-ra-tor*) [*acus*, a needle; *punctura*, a puncture]. An instrument used in performing acupuncture.

Acupuncture (*ak'-u-punk-chūr*) [*acus*, a needle; *pungere*, to prick]. Puncture of the skin or tissue by one or more needles for the relief of pain, the exit of fluid, the coagulation of blood in an aneurysm, *etc.*

Acus (*a'-kus*) [L.]. A needle. **A. Ad Cataractam,** a cataract needle. **A. Cannulata,** a trocar to be used with a cannula. **A. Electrica,** a needle for use with electricity. **A. Exploratoria,** an exploring needle. **A. Interpunctoria,** a needle for eye-operations. **A. Invaginata,** a sheathed needle. **A. Sutoria,** a needle for stitching wounds.

Acute (*ak-ūt'*) [*acutus*, sharp]. Merely sharp-pointed or ending in a point less than a right angle. Sometimes used in the sense of forming a sharp angle. Used of disease having a rapid and severe onset, progress, and termination. When applied to pain, sound, vision, *etc.*, means sharp, keen.

Acutenaculum (*ak-u-ten-ak'-u-lum*) [*acus*, a needle; *tenaculum; pl.*, *Acutenacula*]. A needle-holder.

Acuteness (*ak-ūt'-nes*) [*acutus*, sharp]. The quality of being acute, rapid, or sharp. Referring to vision, used as a synonym of keenness or acuity.

Acutifoliate (*ak-u-te-fo'-le-āt*) [*acutus*, sharp; *foliatus*, leaved]. In biology, bearing sharp-pointed leaves.

Acutilobate (*ak-u-te-lo'-bāt*) [*acutus*, sharp; *lobatus*, lobate]. In biology, possessing acute lobes, as a leaf.

Acutorsion (*ak-u-tor'-shun*) [*acus*, a needle; *torsion*]. The twisting of an artery with a needle as a means of controlling hemorrhage.

Acyanoblepsia (*ah-si-an-o-blep'-se-ah*) [ἀ priv.; κύανος, blue; βλεψία, sight]. Same as *Acyanopsia.*

Acyanopsia (*ah-si-an-op'-se-ah*) [ἀ priv.; κύανος, blue; ὄψις, sight]. Inability to distinguish blue colors.

Acyclic (*ah-sik'-lik*) [ἀ priv; κυκλικός, circular]. In botany, not whorled.

Acyesis (*ah-si-e'-sis*) [ἀ priv.; κύησις, pregnancy]. 1. Sterility of the female. 2. Non-pregnancy.

Acyetic (*ah-si-et'-ik*) [ἀ priv.; κύησις, pregnancy]. Relating to acyesis.

Acyprinoid (*ah-sip'-rin-oid*) [ά priv.; *cyprinoid*]. In biology, a region in the fauna of which the *Cyprinidæ* and *Labyrinthici* are wanting.

Acystia (*ah-sis'-te-ah*) [ἀ priv.; κύστις, bladder]. Absence of the bladder.

Acystinervia (*ah-sis-tin-er'-ve-ah*) [ἀ priv.; κύστις, bladder; *nervus*, a nerve]. Paralysis or lack of nerve stimulus in the bladder.

Ad [*ad*, to]. A Latin prefix of words and terms, signifying *to, toward, at, etc. Ad deliquium*, to fainting. *Ad libitum*, at pleasure, or according to discretion.

Ad, or **Add.** A contraction of *Adde*, or *Additur*, meaning, *add*, or *let there be added;* used in prescription writing.

Adacrya (*ah-dak'-re-ah*) [ἀ priv.; δάκρυον, tear]. Absence or deficiency of the secretion of tears.

Adactyl (*ah-dak'-til*) [ἀ priv.; δάκτυλος, digit]. 1. Without fingers or without toes. 2. A monstrosity that has an absence of digits.

Adactylia (*ah-dak-til'-e-ah*) [ἀ priv.; δάκτυλος, a finger]. Absence of the digits.

Adactylism (*ah-dak'-til-izm*) [ἀ priv.; δάκτυλος, a finger]. The absence of the digits.

Adactylous (*ah-dak'-til-us*) [ἀ priv.; δάκτυλος, a finger]. Without fingers or toes. In biology, without claws.

Adæmonia (*ad-e-mo'-ne-ah*). See *Ademonia.*

Adamantin (*ad-am-an'-tin*) [ἀδάμας, from ἀ priv.; δαμάζειν, to overpower]. Pertaining to adamant. **A. Cement,** a substance used for filling teeth, consisting of finely powdered silex or pumice stone mixed with an amalgam of mercury and silver. See *Amalgam.* **A. Substance,** the enamel of the teeth.

Adambulacral (*ad-am-bu-la'-kral*) [*ad*, against; *ambulacrum*]. In biology, adjoining the ambulacra, as certain ossicles in echinoderms.

Adamita (*ad-am-i'-tah*) [L.]. A white vesical calculus.

Adam's Apple (*ad'-amz ap'-pl*). See *Pomum Adami.* **A. Operation.** See *Operations, Table of.*

Adansonia digitata (*ad-an-so'-ne-ah dij-it-a'-tah*). The Baobab tree, a native of Africa. The bark is used in the form of an infusion, ℥j to Oj, as a remedy for intermittent fever. Unof.

Adansonin (*ad-an'-so-nin*). A febrifugal alkaloid from the leaves and bark of *Adansonia Digitata.* Unof.

Adaptation (*ad-ap-ta'-shon*) [*adaptare*, to adjust]. In biology, favorable organic modifications suiting a plant or animal to its environment. **A. of the Retina,** the faculty possessed by the retina of accommodating the power of vision to a diminished amount of light, as in a darkened room.

Adarce (*ad-ar'-se*) [ἀδάρκη, a salty efflorescence]. A salty alkaline concretion found in salt-marshes in Asia Minor. It is detergent and has been much used in leprosy and skin diseases. Unof.

Adarticulation (*ad-ar-tik-u-la'-shun*) [*ad*, to; *articulatio*, a jointing]. See *Arthrodia.*

Addephagia (*ad-e-fa'-je-ah*) [L.]. See *Bulimia.*

Adder's-tongue (*ad'-erz-tung*). The leaves of *Ophioglossum vulgatum*, a common perennial herb; mucilaginous, and used in the preparation of salves. Unof. **A.-wort** (*ad'-erz-wert*). See *Bistort.*

Add'ison's Disease. Melasma suprarenale, dermatomelasma-supra-renale, or cutis ærea ("bronzed skin"), a disease of the supra-renal capsules, first described by Dr. Addison, and characterized by tubercular infiltration of the capsules, discoloration of the skin, progressive anemia, and asthenia, ending in death from exhaustion. See *Diseases, Table of.* **A. Keloid.** See *Keloid* and *Morphea.*

Additamentum (*ad-it-am-en'-tum*) [L.]. Any appendix, as an epiphysis. **A. Coli,** the appendix vermiformis.

Adducens (*ad-du'-senz*) [L.]. An adductor, a term applied to certain muscles. **A. Oculi,** the internal rectus muscle of the eye.

Adducent (*ad-du'-sent*) [*adducens*]. Performing adduction.

Adduction (*ad-duk'-shun*) [*adductio; adducere*, to bring toward]. Any movement whereby a part is brought toward another or toward the median line of the body. **A. of the Eyes,** the power of the internal recti measured by the maximum ability to preserve singleness of the image with prisms placed bases toward the temples. It varies from 30° to 50°. See also *Abduction.*

Adductive (*ad-duk'-tiv*) [*adducens*]. Same as *Adducent.*

Adductor (*ad-duk'-tor*) [*adducere*, to bring forward]. Any muscle effecting adduction.

Adelarthrosomatous (*ad-el-ar-thro-so'-mat-us*) [ἀ priv.; δῆλος, manifest; ἄρθρον, joint; σῶμα, body]. In biology, indistinctly segmented, or articulated.

Adelaster (*ad-el-as'-ter*) [ἄδηλος, not manifest; ἀστήρ, star]. In biology, a cultivated plant that for the time being cannot be referred to its proper genus.

Adelocodonic (*ad'-el-o-ko-don'-ik*) [ἄδηλος, not manifest; κώδων, a bell]. In biology, lacking a disc or umbrella; said of a gonophore.

Adelomorphous (*ad-el-o-mor'-fus*) [ἄδηλος, not evident; μορφή, form]. Not delomorphous; not clearly defined; not having a determinate form (a term applied to certain cells in the gastric glands.)

Adelopneumona (*ad-el-op-nu'-mo-nah*) [ἄδηλος, not manifest; πνεύμων, lung]. In biology, the *Pulmonifera* among gasteropods, the pulmonary cavity being hidden by the mantle.

Adelopod, Adelopode (*a-de′-lo-pod, -pōd*) [ἀδηλος, not manifest; πούς, foot]. In biology, an animal with concealed or inconspicuous feet.

Adelphia (*ad-el′-fe-ah*) [ἀδελφός, brotherhood]. In biology, a group of stamens united by their filaments.

Adelphous (*ad-el′-fus*) [ἀδελφός, brotherhood]. Having stamens with more or less coalescent filaments.

Ademonia (*ad-e-mo′-ne-ah*) [ἀ priv.; δημονία, trouble, distress]. Mental distress.

Ademosyne (*ad-e-mos′-in-e*) [ἀδημοσύνη, trouble, distress]. Depression of spirits; home-sickness.

Aden (*a′-den*) [ἀδήν, an acorn, a gland]. A gland; a bubo. **A. Fever.** See *Dengue*. **A. Ulcer.** See *Phagedena tropica*.

Adenalgia (*ad-en-al′-je-ah*) [ἀδήν, gland; ἄλγος, pain]. Glandular pain.

Adenectopia (*ad-en-ek-to′-pe-ah*) [ἀδήν, gland; ἔκτοπος, away from a place]. A condition in which the gland does not occupy its proper position.

Adenemphraxis (*ad-en-em-fraks′-is*) [ἀδήν, gland; ἔμφραξις, a stoppage]. Glandular obstruction.

Adenia (*ad-e′-ne-ah*) [ἀδήν, gland]. Enlargement of the glands; *Lymphadenoma, q. v.*

Adenic (*ad-en′-ik*) [ἀδήν, gland]. Relating to or of the nature of a gland.

Adeniform (*ad-en′-e-form*) [ἀδήν, gland; *forma*, resemblance]. Of the shape of a gland; glandlike.

Adenin (*ad′-en-in*) [ἀδήν, a gland—first discovered in pancreatic glands], $C_5H_5N_5$. A leucomaïne discovered in 1885 by Kossel; the simplest member of the uric acid group of leucomaïnes. A relation exists between hydrocyanic acid and all the members of this group, and the base, adenin, seems to be formed by polymerization of hydrocyanic acid. It occurs, with other bases, as a decomposition product of nuclein, and may be obtained from all animal and vegetable tissues rich in nucleated cells. It crystallizes in leaflets with pearly luster. It exists largely in the liver and urine of leucocythemic patients, as a result of the breaking up of the nucleated white blood corpuscles. It appears to be necessary to the formation and building up of organic matter, playing an important part, together with guanin, in the physiological function of the cell nucleus. Nuclein, the parent of adenin and guanin, has been credited with a direct relation to the reproductive powers of the cell. Adenin is not poisonous. Its physiological action is not definitely known.

Adenitis (*ad-en-i′-tis*) [ἀδήν, gland; *itis*, inflammation]. Inflammation of a gland. See *Bubo* and *Lymphadenitis*.

Adenization (*ad-en-i-za′-shun*) [ἀδήν, a gland]. Adenoid degeneration.

Adeno- (*ad-e′-no*) [ἀδήν, gland]. A prefix used to denote relation to glands.

Adenoblast (*ad′-en-o-blast*) [ἀδήν, a gland; βλαστός, a germ]. Any functionally active gland-cell; a cell that assists in the glandular action.

Adeno-carcinoma (*ad-en-o-kar-sin-o′-mah*) [ἀδήν, gland; καρκίνος, a cancer]. Adenoma blended with carcinomatous elements.

Adenocarcinomatous (*ad′-en-o-kar-sin-o′-mat-us*) [ἀδήν; καρκίνος]. Of the nature of adeno-carcinoma.

Adenocele (*ad′-en-o-sēl*, or *ad-en-o-se′-le*) [ἀδήν, gland; κήλη, a tumor]. See *Adenoma*.

Adenochirapsology (*ad-en-o-ki-rap-sol′-o-je*) [ἀδήν, gland; χείρ, hand; ἅπτειν, to touch; λόγος, treatise]. The obsolete doctrine of the healing of scrofula by the touch of a king's hand.

Adeno-chondroma (*ad-en-o-kon-dro′-mah*) [ἀδήν, gland; χόνδρος, cartilage; *pl.*, *Adeno-chondromata*]. A tumor consisting of both glandular and cartilaginous tissue.

Adeno-cystoma (*ad-en-o-sis-to′-mah*) [ἀδήν, gland; κύστις, bladder; *oma*, tumor]. A cystic adenoma.

Adenodiastasis (*ad-en-o-di-as′-tas-is*) [ἀδήν, gland; διάστασις, separation]. 1. Displacement of a gland. 2. Abnormal separation of a gland into distinct parts.

Adenodiastatic (*ad-en-o-di-as-tat′-ik*) [ἀδήν, gland; διάστασις, separation]. Relating to or marked by adenodiastasis.

Adenodynia (*ad-en-o-din′-e-ah*) [ἀδήν, gland; ὀδύνη, pain]. See *Adenalgia*.

Adeno-fibroma (*ad-en-o-fi-bro′-mah*) [ἀδήν, gland; *fibra*, a fiber]. A combination of adenoma and fibroma.

Adenofibromatous (*ad-en-o-fi-bro′-mat-us*) [ἀδήν, gland; *fibra*, a fiber]. Of the nature of adeno-fibroma.

Adenogenesis (*ad-en-o-jen′-es-is*) [ἀδήν, a gland; γένεσις, a creation]. The development of a gland.

Adenography (*ad-en-og′-ra-fe*) [ἀδήν, a gland; γράφειν, to write]. A treatise on the glandular system.

Adenoid (*ad′-en-oid*) [ἀδήν, gland; εἶδος, resemblance]. Resembling a gland. **A. Acne.** See *Lupus, Disseminated Follicular*. **A. Body,** the prostate gland. **A. Disease.** Synonym of *Hodgkins's Disease*. **A. Tissue.** See *Animal Tissue*. **A. Tumor.** See *Adenoma*. **A. Vegetations,** a term applied to an hypertrophy of the adenoid tissue that normally exists in the naso-pharynx. This hypertrophy is associated with the following characteristic symptoms: Vacant expression of the child, open mouth, noisy breathing, more or less impairment of the hearing, a hacking cough, a peculiar muffling of the voice, and an enlargement of the tonsils. The vegetations exert an injurious influence on the physical development of the children so affected. The most important predisposing cause is youth; they are met with in all classes of life and in all climates. Treatment consists in the early and complete removal of the growths.

Adenoidal (*ad-en-oid′-al*) [ἀδήν, a gland; εἶδος, an appearance]. Somewhat resembling a gland.

Adenologaditis (*ad-en-o-log-ad-i′-tis*) [ἀδήν, a gland; λογάδες, whites of the eyes; ιτις, inflammation]. 1. Ophthalmia neonatorum. 2. Inflammation of the glands and conjunctiva of the eyes.

Adenology (*ad-en-ol′-o-je*) [ἀδήν, gland; λόγος, a discourse]. The science of the glandular system.

Adeno-lymphocele (*ad-en-o-limf′-o-sēl*) [ἀδήν, gland; *lympha*, lymph; κήλη, tumor]. Dilatation of the lymph-vessels and enlargement of the lymphatic glands.

Adenoma (*ad-en-o′-mah*) [ἀδήν, gland; *oma*, tumor: *pl.*, *Adenomata*]. A tumor that has sprung from a gland or is constructed after the type of a secreting gland. **A. destruens,** a destructive form of adenoma, involving the stomach walls. **A. sebaceum,** neoplastic papules on the face, of congenital origin but of later development. The disease occupies the position of acne rosacea, *i. e.*, the middle two-thirds. The lesions are roundish, convex papules, from a millet to a hempseed in size, of a bright crimson color, but may be quite colorless and slightly translucent. They do not pale on pressure. They are usually associated with intellectual inferiority, a large proportion of the patients being imbeciles or chronic epileptics.

Adenomalacia (*ad-en-o-mal-a′-she-ah*) [ἀδήν, a gland; μαλακία, softening]. Abnormal softness of a gland.

Adenomesenteritis (*ad-en-o-mes-en-ter-i′-tis*) [ἀδήν, a gland; μέσος, middle; ἔντερον, intestine; ιτις, inflammation]. Inflammation of the mesenteric glands.

Adeno-myoma (*ad-en-o-mi-o′-mah*) [ἀδήν, a gland; μῦς, a muscle; *oma*, tumor: *pl.*, *Adeno-myomata*]. A tumor composed of glandular and muscular tissues.

Adeno-myxoma (*ad-en-o-miks-o′-mah*) [*ἀδήν*, a gland; *μύξα*, mucous; *oma*, tumor: *pl.*, *Adeno-myxomata*]. A growth having the characters of adenoma and myxoma.

Adenoncosis (*ad-en-on-ko′-sis*) [*ἀδήν*, a gland; *ὄγκωσις*, swelling]. The enlargement of a gland.

Adenoncus (*ad-en-ong′-kus*) [*ἀδήν*, gland; *ὄγκος*, a mass]. A glandular tumor.

Ad′eno-ner′vous Fe′ver. Synonym of *Plague*.

Adeno-neurotic (*ad-en-o-nu-rot′-ik*) [*ἀδήν*, a gland; *νεῦρον*, nerve]. Pertaining to the glands and nerves. **A. Fever**, the plague.

Adenopathy (*ad-en-op′-a-the*) [*ἀδήν*, gland; *πάθος*, disease]. Any disease of a gland or of the glands.

Adenopharyngitis (*ad-en-o-far-in-jī′-tis*) [*ἀδήν*, a gland; *φάρυγξ*, the throat; *ιτις*, inflammation]. Inflammation of the tonsils and pharynx.

Adenophlegmon (*ad-en-o-fleg′-mon*) [*ἀδήν*, a gland; *φλέγμονη*, inflammation]. Suppurative inflammation of a lymphatic gland.

Adenophore (*ad-en′-o-for*) [*ἀδήν*, a gland; *φερέιν*, to bear]. In biology, the pedicle or stalk supporting a nectar gland.

Adenophorous (*ad-en-off′-o-rus*) [*ἀδήν*, a gland; *φέρειν*, to bear]. Glandular, or gland-bearing.

Adenophthalmia (*ad-en-off-thal′-me-ah*) [*ἀδήν*, gland; *ὀφθάλμος*, the eye]. Inflammation of the Meibomian glands.

Adenophthalmitis (*ad-en-off-thal-mi′-tis*). Same as *Adenophthalmia*.

Adenophyllous (*ad-en-off′-il-us*) [*ἀδήν*, a gland; *φύλλον*, a leaf]. In biology, with leaves which bear glands.

Adenophyma (*ad-en-o-fi′-mah*) [*ἀδήν*, gland; *φῦμα*, growth]. A swelling of a gland or ganglion; a bubo.

Adenopodous (*ad-en-op′-o-dus*) [*ἀδήν*, gland; *πούς*, foot]. In biology, bearing glands on the footstalk or petiole.

Adeno-sarcoma (*ad-en-o-sar-ko′-mah*) [*ἀδήν*, a gland; *σάρξ*, flesh; *oma*, a tumor: *pl.*, *Adeno-sarcomata*]. A tumor with the characters of adenoma and sarcoma.

Adeno-scirrhus (*ad-en-o-skir′-us*) [*ἀδήν*, gland; *σκίρρος*]. Adenoma with scirrhous or carcinomatous elements.

Adenosclerosis (*ad-en-o-skle-ro′-sis*) [*ἀδήν*, a gland; *σκληρός*, hard]. A hardening of a gland, with or without swelling.

Adenose (*ad′-en-ōs*) [*ἀδήν*, gland]. Glandular; abounding in glands; gland-like.

Adenosis (*ad-en-o′-sis*) [*ἀδήν*, a gland]. 1. Any glandular disease. 2. Any chronic glandular disorder.

Adenotomy (*ad-en-ot′-o-me*) [*ἀδήν*, a gland; *τόμη*, a cutting]. The anatomy of the glands; dissection or incision of a gland.

Adenous (*ad′-en-us*) [*ἀδήν*, gland]. See *Adenose*.

Adephagia (*ad-e-fa′-je-ah*) [*ἀδηφαγία*, gluttonous]. A gluttonous appetite; bulimia.

Adephagous (*ad-ef′-ag-us*) [*ἀδηφαγία*]. Gluttonous.

Adeps (*ad′-eps*) [L., *gen.*, *Adipis*]. Lard. The fat obtained from the abdomen of the hog, *Sus Scrofa*. Composed of 38 per cent. stearin and margarin, and 62 per cent. olein. Forms 70 per cent. of ceratum and 80 of unguentum, *q. v.* **A. anserinus**, goose-grease. **A. benzoinatus**, contains two per cent. of benzoin. **A. lanæ hydrosus**, hydrous wool-fat, the purified fat of the wool of sheep. **A. ovillus**, mutton suet. **Adipis, Oleum**, a fixed oil expressed from lard. **A. præparatus** (B. P.), purified fat of the hog. **Ung. Simp.**, contains white wax, benzoated lard, and almond-oil. **A. suillus**, hogs' lard; adeps.

Adepsin (*ad-ep′-sin*) [*adeps*, lard]. A petrolatum much like vaselin.

Adermia (*ah-der′-me-ah*) [*ἀ* priv.; *δέρμα*, skin]. Absence or defect of the skin.

Adermonervia (*ah-der-mo-ner′-ve-ah*) [*ἀ* priv.; *δέρμα*, skin; *nervus*, a nerve]. Loss or lack of nerve-stimulus in the skin.

Adermotrophia (*ah-der-mo-trō′-fe-ah*) [*ἀ* priv.; *δέρμα*, skin; *τροφή*, nutrition]. Atrophy of the skin.

Adesmia (*ah-des′-me-ah*). See *Adesmy*.

Adesmosis (*ah-des-mo′-sis*) [*ἀ* priv.; *δεσμός*, a band]. Atrophy of the cutaneous connective tissue.

Adesmy (*ah-des′-me*) [*ἀδεσμος*, unfettered]. In botany, the separation of parts normally entire or united.

Adglutinate (*ad-glu′-tin-āt*). Same as *Agglutinate*.

Adhatoda Vasica (*ad-hat′-o-dah vas′-ik-ah*). Malabar nut; leaves of *A. justicia*, a tree of the order of Acanthaceæ, growing in India. Expectorant and anti-spasmodic. Dose of the fld. ext. ʒ ¼–j.

Adherence (*ad-he′-rens*) [*adhærere*, to adhere]. See *Adhesion*.

Adherent (*ad-he′-rent*) [*adhærere*, to adhere]. In botany, adnate; the union of unlike structures.

Adhesion (*ad-he′-zhun*) [*adhærere*, to stick to]. Abnormal union of two surfaces as a result of abrasion, inflammation, etc. **A., Primary**, called also *Healing by First Intention* and by *Immediate Union*, a method of healing of wounds by the production of lymph, followed by the vascularization and cicatrization of the exudate. **A., Secondary**, or *Healing by Second Intention*, or *by Granulation*, is that mode of healing attended by the production of pus and the formation of granulations. **A. Plaster.** See *Emplastrum*.

Adhesive (*ad-he′-siv*) [*adhærere*, to adhere]. Sticky, tenacious. **A. Inflammation**, inflammation accompanied by plastic exudation, and tending to the union of apposed surfaces. It may be reparative in its effect, as in wounds, or it may be injurious in its results, as in some cases of pleurisy. **A. Plaster.** See *Resin* and *Emplastrum*.

Adiantum (*ad-e-an′-tum*) [*ἀ* priv.; *διαντός*, wettable]. A genus of ferns; the maiden-hair. *A. capillus-veneris* and *A. pedatum*, of N. America, are serviceable in coughs. The demulcent and anti-hectic remedy, *capillaire*, is prepared from the former. Unof.

Adiaphoresis (*ah-di-af-o-re′-sis*) [*ἀ* priv.; *διαφορείειν*, to perspire]. Deficient sweat.

Adiaphoretic (*ah-di-af-o-ret′-ik*) [*ἀ* priv.; *διαφορείειν*, to perspire]. Reducing the sweat; anidrotic.

Adiaphorous (*ad-i-af′-or-us*) [*ἀδιάφορος*, indifferent]. Neutral; inert; doing neither harm nor good.

Adiapneustia (*ah-de-ap-nūs′-te-ah*) [*ἀ* priv.; *διαπνευστέειν*, to perspire]. A stoppage of perspiration.

Adiathesia (*ah-di-ath-e′-se-ah*) [*ἀ* priv.; *διάθεσις*, condition]. A condition or particular disease that is not congenital.

Adiathesic (*ah-di-ath-e′-sik*) [*ἀ* priv.; *διάθεσις*, condition]. Not connected with any diathesis.

Adiathetic (*ah-di-ath-et′-ik*) [*ἀ* priv.; *διάθεσις*, condition]. Adiathesic.

Adicity (*ad-is′-it-e*). In chemistry, combining capacity, according as an element or a compound is a monad, dyad, *etc.* Same as *Valency*.

Adinin (*ad′-in-in*). See *Adenin*.

Adipate (*ad′-ip-āt*) [*adeps*, fat]. Any salt of adipic acid.

Adipic (*ad-ip′-ik*) [*adeps*, lard]. Of or belonging to fat. **A. Acid.** See *Acid*.

Adipoceration (*ad-ip-os-er-a′-shun*) [*adeps*, fat; *cera*, wax]. The formation of adipocere.

Adipocere (*ad′-ip-o-sēr*) [*adeps*, fat; *cera*, wax]. A wax-like substance formed by the exposure of fleshy tissue to moisture, with the exclusion of air, *i. e.*, in the

earth or under water. It consists of the fatty acids in combination with the alkaline earths and ammonium. Human bodies in moist burial places often undergo this change.

Adipogenous (*ad-ip-oj'-en-us*) [*adeps*, fat; *gignere*, to produce]. Producing fat and adipose tissue.

Adipoma (*ad-ip-o'-mah*) [*adeps*, fat; *oma*, a tumor: *pl.*, *Adipomata*]. A fatty tumor; lipoma.

Adipomatous (*ad-ip-o'-mat-us*) [*adeps*, fat; *oma*, a tumor]. Of the nature of adipoma.

Adipose (*ad'-ip-ōs*) [*adeps*, fat]. Fatty. **A. Fin**, the fleshy, rayless, dorsal fin of some fishes. **A. Tissue**, fat cells united by connective tissue; distributed extensively through the body. It is composed of triolein, tripalmitin, and tristearin, and is liquid during life or at the temperature of the living body.

Adiposis (*ad-ip'-o-sis*) [*adeps*, fat; *osis*, state]. Corpulence; fatty degeneration; fatty infiltration. **A. hepatica**, fatty degeneration or infiltration of the liver.

Adipositas (*ad-ip-os'-it-as*) [L.]. Fatness; corpulency.

Adiposity (*ad-ip-os'-it-e*). Fatness; corpulency.

Adipsia (*ah-dip'-se-ah*) [ἀ priv.; δίψα, thirst]. Absence of thirst.

Adipsic (*ah-dip'-sik*) [ἀ priv.; δίψα, thirst]. Pertaining to adipsia; quenching thirst.

Adipsous (*ah-dip'-sus*) [ἀ priv.; δίψα, thirst]. Quenching thirst.

Aditus (*ad'-it-us*) [*ad*, to; *ire*, to go]. In anatomy, an entrance, as to any one of the radial canals of a sponge. **A. laryngis**, the entrance to the larynx.

Ad'jective Col'oring Mat'ter. See *Pigments, Colors, and Dye-stuffs.*

Adjuster (*ad-jus'-ter*) [Fr., *adjuster*, to adjust]. He who or that which adjusts. A device formerly used for the forcible reduction of dislocations.

Adjust'ing Col'lar. See *Collar.*

Adjust'ment, Coarse. Commonly, the rack and pinion for raising or lowering the tube of a microscope a considerable distance without lateral deviation. **A., Fine**, the micrometer screw generally at the top of the column of a microscope for raising or lowering the tube slowly through a short distance.

Adjuvant (*aj'-u-vant*) [*adjuvare*, to assist]. A medicine that assists the action of another to which it is added.

Admortal (*ad-mor'-tal*) [*ad*, to; *mors*, *mortis*, death]. Moving from living muscular tissue toward that which is dead or dying, as electric currents.

Adnascent (*ad-nās'-ent*) [*ad*, to; *nasci*, to grow]. In biology, growing upon or attached to something.

Adnata (*ad-na'-tah*) [*ad*, to; *nasci*, to be born, to grow]. 1. The *tunica adnata*; the conjunctiva; more correctly, a tendinous expansion of the muscles of the eye; it lies between the sclerotic and the conjunctiva. 2. One of the coats of the testicle. In zoölogy, appendages of the skin, as scales, hair, feathers.

Adnate (*ad'-nāt*) [*adnatus*, grown to]. In biology, congenitally attached or united.

Adnation (*ad-na'-shun*) [*adnatus*, grown to]. The state of being adnate.

Adnerval (*ad-ner'-val*) [*ad*, to; *nervus*, a nerve]. Moving toward a nerve; said of electric currents in muscular fiber.

Adneural (*ad-nu'-ral*) [*ad*, to; *νεῦρον*, a nerve]. A term used to describe a nervous affection in which the disease is at the very point of the symptoms exclusively, as in the form of an adventitious deposit.

Adnexa (*ad-neks'-ah*) [*ad*, to; *nectere*, to joint: *pl.*]. Adjunct parts, as the adnexa of the uterus. **A. bulbi**, the appendages of the bulb of the eye.

Adolescence (*ad-o-les'-ens*) [*adolescere*, to grow]. Youth, or the period between puberty and maturity, usually reckoned as extending in males from about 14 to 25 years, and in females from 12 to 21 years.

Adonidin (*ad-on'-id-in*) [*Adonis*]. A glucosid derived from *Adonis vernalis*, a plant indigenous in Europe and Asia. Recommended in cardiac dropsy. Dose gr. ⅛–¼. Unof.

Adonis æstivalis (*ad-o'-nis es-tiv-a'-lis*). A plant much used in Italy as a cardiac tonic. Similar properties possessed by *A. vernalis*. Dose of fld. ext. ♏ij–ij. **A. Tinctura**, dose ♏x–xxx.

Adoral (*ad-o'-ral*) [*ad*, near to; *os*, the mouth]. Situated near the mouth.

Adosculation (*ad-os-ku-la'-shun*) [*ad*, to; *osculari*, to kiss]. Impregnation by external contact without intromission.

Adpressed, or **Appressed** (*ad-presd'* or *ap-resd'*) [*ad-pressus*]. Brought into contact with but not united.

Adradial (*ad-ra'-de-al*) [*ad*, near to; *radius*, a ray]. Near a ray, as the third series of tentacles in certain hydrozoöns. *Cf. Interradial, Perradial.*

Adradii (*ad-ra'-de-i*) [*ad*, near to; *radius*, a ray]. Special organs lying between the perradii and interradii of medusæ.

Adrectal (*ad-rek'-tal*) [*ad*, near by; *rectus*, straight]. In biology, near the rectum, as certain glands.

Adrenal (*ad-rē'-nal*) [*ad*, near to; *ren*, the kidney]. In biology, adjacent to the kidney.

Adrenals (*ad-rē'-nalz*) [*ad*, near to; *ren*, the kidney]. The supra-renal capsules.

A'drian's Mix'ture. A hemostatic mixture containing chloride of iron 25 parts, chloride of sodium 15 parts, and water 60 parts.

Adrostral (*ad-ros'-tral*) [*ad*, to, at; *rostrum*, beak]. In biology, belonging to or placed near the beak or snout.

Adrue (*ad-ru'-e*). Anti-emetic root. The root of *Cyperus articulatus*. Strongly recommended to check black vomit of yellow fever; anthelmintic, aromatic, stomachic. Dose of the fld. ext. gtt. xx–xxx. Unof.

Adscendent (*ad-sen'-dent*). See *Ascending.*

Adstriction (*ad-strik'-shun*) [*adstrictis*, a binding]. Ligation; astringent action; constipation.

Adsurgent, or **Assurgent** (*ad-ser'-jent*, *as-ser'-jent*) [*ad*, to; *surgere*, to rise]. Same as *Ascending.*

Adterminal (*ad-ter'-min-al*) [*ad*, near to; *terminus*, the end]. Moving toward the insertion of a muscle; said of electric currents in muscular fiber.

Adul Oil. An oil used in India for treating rheumatism.

Adult (*ad-ult'*) [*adolescere*, *adultus*, to grow]. Mature; of full legal age. One of mature age. **A. Sporadic Cretinism.** See *Myxedema.*

Adulteration (*ad-ul-ter-a'-shun*) [*adulterare*, to corrupt]. The admixture of inferior, impure, inert, or less valuable ingredients to an article for gain, deception, or concealment. Medicines, wines, foods, *etc.*, are largely adulterated.

Adumbrella (*ad-um-brel'-ah*). In biology, the upper surface of the velum in the medusæ, the opposite of exumbrella or *Abumbrella.*

Adumbrellar (*ad-um-brel'-ar*). In biology, pertaining to the upper or outer surface of the velum in the medusæ; opposed to abumbrellar.

Aduncous (*ad-ung'-kus*) [*ad*, to; *uncus*, a hook, barb]. In biology, hooked, as the bill of a parrot or hawk.

Adust (*ad-ust'*) [*adustus*, burned up]. Hot and dry; parched.

Adustion (*ad-us'-chun*) [*adustus*, burned up]. 1. The quality of being adust. 2. Cauterization.

Advancement (*ad-vans'-ment*) [M. E., avancement]. An operation to remedy strabismus, generally in conjunction with tenotomy, whereby the opposite tendon from the over-acting one, having been cut, is brought

forward, so that, growing fast in a more advanced position, it shall have more power to act upon the globe of the eye. **A., Capsular**, an operation similar to that on the tendon upon Tenon's capsule. It must be distinguished from advancement by the fact that the tendon itself is not divided.

Adventitia (*ad-ven-tish'-e-ah*) [*adventitius*, foreign]. The external covering or coat of the blood-vessels.

Adventitious (*ad-ven-tish'-us*) [*adventitius*, foreign]. Accidental, foreign, acquired, as opposed to natural or hereditary; occurring out of the ordinary or normal place or abode.

Adventive (*ad-ven'-tiv*). In biology, an incompletely naturalized exotic.

Adverse (*ad'-vers*) [*adversus*, opposite]. In biology, turned or directed toward the axis.

Adversifoliate (*ad-ver-se-fo'-le-āt*) [*adversus*, opposite; *folium*, leaf]. See *Adversifolious.*

Adversifolious (*ad-ver-se-fo'-le-us*) [*adversus*, opposite; *folium*, leaf]. In biology, having opposite leaves.

Adynamia (*ah-din-a'-me-ah*) [ἀ priv.; δύναμις, power]. Deficiency or loss of vital or muscular power.

Adynamic (*ah-din-am'-ik*) [ἀ priv.; δύναμις, power]. Pertaining to or characterized by adynamia. **A. Fever.** Synonym for *Typhus Fever, q. v.*

Æ-. See *E-.*

Æcidioform (*e-sid'-e-o-form*) [αἰκία, a wheal; *forma*, form]. See *Æcidiostage.*

Æcidiomycetes (*e-sid-e-o-mi-se'-tēz*) [αἰκία, a wheal; μύκης, a fungus]. Æcidium fungi, including many of the rusts, blights, and mildews.

Æcidiospore (*e-sid'-e-o-spor*) [αἰκία, a wheal; σπορά, seed, spore]. In biology, a fungal spore developed by abstriction in a member of the genus *Æcidium.*

Æcidiostage (*e-sid'-e-o-stāj*) [αἰκία, a wheal; M. E., stage]. The first stage in the reproduction of uredine fungi. Same as *Æcidioform.*

Æcidium (*e-sid'-e-um*) [αἰκία, a wheal; *dim.*, ἰδιον]. The cup-shaped organ producing the æcidiospores in the uredine fungi.

Ædœagra (*e-de-a'-grah*). See *Edeagra.*

Ædœatrophia (*e-de-at-ro'-fe-ah*). See *Edeatrophia.*

Ædœauxe (*e-de-auks'-e*). See *Edeauxe.*

Ædœitis (*e-de-i'-tis*). See *Edeitis.*

Ædœodynia (*e-de-o-din'-e-ah*). See *Edeodynia.*

Ædœogargalismus (*e-de-o-gar-gal-iz'-mus*). See *Edeogargalismus.*

Ædœography (*e-de-og'-ra-fe*). See *Edeography.*

Ædœology (*e-de-ol'-o-je*). See *Edeology.*

Ædœomania (*e-de-o-ma'-ne-ah*). See *Edeomania.*

Ædœomycodermitis (*e-de-o-mi-ko-der-mi'-tis*). See *Edeomycodermitis.*

Ædœopsy (*e-de'-op-se*). See *Edeopsy.*

Ædœoptosis (*e-de-op-to'-sis*). See *Edeoptosis.*

Ædœoscopy (*e-de-os'-ko-pe*). See *Edeoscopy.*

Ædœotomy (*e-de-ot'-o-me*). See *Edeotomy.*

Ægagropila (*e-gag-rop'-il-ah*). Plural of *Ægagropilus.*

Ægagropilus (*e-gag-rop'-il-us*) [αἰγάγρος, a wild goat; πῖλος, felt]. An intestinal concretion formed of hair, found in animals and occasionally in man. A bezoar.

Ægilops (*e'-jil-ops*). See *Egilops.*

Ægithognathous (*e-jith-og'-na-thus*) [αἰγιθος, the hedge-sparrow; γνάθος, jaw]. Characterized by having an anteriorly truncated vomer in union with the alinasal wall and turbinals, as in passerine birds.

Ægobronchophony (*e-go-brong-koff'-o-ne*). See *Egobronchophony.*

Ægonia (*e-go'-ne-ah*) [L.]. A minor or slight egophony.

Ægophony (*e-goff'-o-ne*). See *Egophony.*

Ægyptia ulcera (*e-jip'-she-ah ul'-ser-ah*) [L.]. Egyptian ulcers; a form of ulceration of the tonsils and fauces.

Æipathia (*ah-ip-ath'-e-ah*) [ἀειπαθεια, from ἀεί, always; πάθος, a suffering]. Constant and incurable suffering.

Æluropodous (*e-lu-rop'-o-dus*) [αἴλουρος, cat; ποῦς, foot]. Cat-footed.

Æluropsis (*el-u-rop'-sis*) [αἴλυρος, cat; ὄψις, appearance]. Obliquity of the eye or of the palpebral fissure.

Æquabiliter justo major, or minor Pelvis (*e-kwa-bil'-it-er*). See *Pelvis.*

Æquator Oculi (*e-kwa'-tor ok'-u-li*). See *Equator.*

Æquilibrium (*e-kwil-ib'-re-um*). See *Equilibrium.*

Aer (*a'-er*). See *Air.*

Aërated (*a'-er-a-ted*) [ἀήρ, the atmosphere]. Impregnated or charged with carbon dioxid or air.

Aëration (*a-er-a'-shun*) [ἀήρ, air]. The process of supplying or charging with air or with some gas, such as carbon dioxid; the state of being supplied with air or gas.

Aërenchyma (*a-er-en'-kim-ah*) [ἀήρ, air; ἐγχεῖν, to pour]. In biology, cork-like plant tissue.

Aërendocardia (*a-er-en-do-kar'-de-ah*) [ἀήρ, air; ἐνδον, within; καρδία, heart]. The existence of air within the heart.

Aërenterectasia (*a-er-en-ter-ek-ta'-se-ah*) [ἀήρ, air; ἔντερον, intestine; ἔκτασις, distention]. Flatulence; distention of the abdomen by gas within the intestines.

Aërhemoctonia (*a-er-hem-ok-to'-ne-ah*) [ἀήρ, air; αἷμα, blood; κτόνος, killing]. Death by the entrance of air into the veins.

Aërhemotoxia (*a-er-hem-o-toks'-e-ah*) [ἀήρ, air; αἷμα, blood; τοξικόν, poison]. See *Aërhemoctonia.*

Aërial (*a-e'-re-al*). Pertaining to the air. **A. Fistula.** See *Fistula.*

Aëriferous (*a-er-if'-er-us*) [ἀήρ, air; *ferre*, to bear]. Conveying air, as the trachea and its branches.

Aërification (*a-er-if-ik-a'-shun*) [ἀήρ, air; *facere*, to make]. 1. The process of charging with air; the state of being charged with air. 2. Emphysema.

Aërifluxus (*a-er-if-luks'-us*) [ἀήρ, air; *fluxus*, flow]. Any abnormal escape of air, as by belching, flatulence, *etc.*

Aëriperitonia (*a-er-ip-er-it-o-ne'-ah*) [ἀήρ, air; περί, around; τείνειν, to stretch]. Peritoneal tympanites.

Aërobe (*a'-er-ōb*) [ἀήρ, air; βίος, life]. One of the aërobia. See *Aërobic.*

Aërobia (*a-er-o'-be-ah*) [ἀήρ, air; βίος, life]. Plural of *Aërobe.* Organisms that require air or free oxygen for the maintenance of life. **A., Facultative,** organisms normally or usually anaërobic, but under certain circumstances acquiring aërobic power.

Aërobic (*a-er-ōb'-ik*) [ἀήρ, air; βίος, life]. Requiring oxygen (air) in order to live. A term applied to those bacteria requiring free oxygen. Those that do not grow in its presence are called **anaërobic.** Between these extremes there are forms that are able to grow without oxygen under favorable conditions, though they make use of it when present; others that may grow in its presence, though flourishing best in its absence; these are called respectively **facultative aërobes** or **facultative anaërobes,** in distinction from those first mentioned, which are called **obligatory aërobes** or **anaërobes.**

Aërobiosis (*a-er-o-bi-o'-sis*) [ἀήρ, air; βίος, life]. Life that requires the presence of air, or free oxygen.

Aërobiotic (*a-er-o-bi-ot'-ik*) [ἀήρ, air; βιωτικός, pertaining to life]. Thriving only in the presence of free oxygen.

Ærocomia sclerocarpa (*e-ro-ko'-me-ah skle-ro-kar'-pah*). A South American plant, very popular as a remedy in leucorrhea, diarrhea, and albuminuria. It is astringent. Unof.

Aëroconiscope (*a-er-o-kon'-is-kōp*) [ἀήρ, air; κόνις, dust; σκοπεῖν, to inspect]. A device for collecting dust from the air for microscopical observation.

Aërocyst (*a'-er-o-sist*) [ἀήρ, air; κύστις, bladder]. In biology, the air-bladder of sea-weeds.

Aërodermectasia (*a-er-o-der-mek-ta'-se-ah*) [ἀήρ, air; δέρμα, skin; ἔκτασις, distention]. Surgical emphysema; distention of the subcutaneous connective tissue by air.

Aëroenterectasia (*a-er-o-en-ter-ek-ta'-se-ah*) [ἀήρ, air; ἔντερον, intestine; ἔκτασις, dilatation]. Distention of the bowels with gas.

Aërognosy (*a-er-og'-no-se*) [ἀήρ, air; γνῶσις, knowledge]. See *Aërology.*

Aërography (*a-er-og'-ra-fe*) [ἀήρ, air; γράφη, a writing]. The description of the air and its qualities.

Aërohydropathy (*a-er-o-hi-drop'-a-the*) [ἀήρ, air; ὕδωρ, water; πάθος, disease]. Pneumatic treatment of disease, combined with hydropathy.

Aërohydrous (*a-er-o-hi'-drus*) [ἀήρ, air; ὕδωρ, water]. Containing air and water, as certain minerals.

Aërology (*a-er-ol'-o-je*) [ἀήρ, air; λόγος, treatise]. The science of the air and its qualities.

Aërometer (*a-er-om'-et-er*) [ἀήρ, air; μέτρον, a measure]. An instrument for ascertaining the density of gases.

Aërometry (*a-er-om'-et-re*) [ἀήρ, air; μέτρον, a measure]. The science of measuring the density of gases.

Aërophobia (*a-er-o-fo'-be-ah*) [ἀήρ, air; φόβος, fear]. Dread of a current of air; a symptom of hydrophobia and hysteria.

Aërophoby (*a'-er-o-fo-be*) [ἀήρ, air; φόβος, fear]. See *Aërophobia.*

Aërophone (*a'-er-o-fōn*) [ἀήρ, air; φωνή, sound]. An instrument for increasing the amplitude of sound-waves.

Aërophore (*a'-er-o-fōr*) [ἀήρ, air; φορεῖν, to carry]. 1. A device for the inflation of the lungs of a still-born child with air. 2. A breathing apparatus to be used by firemen and others, to prevent the inhalation of noxious gases.

Aërophyte (*a-er-o-fīt*) [ἀήρ, air; φύτον, plant]. An air-plant.

Aëropinic (*a-er-o-pin'-ik*) [ἀήρ, air; πίνειν, to drink]. Affected with the habit of wind-sucking. Applied to a horse that habitually bites his crib or manger and swallows air.

Aëroplethysmograph (*a-er-o-pleth-iz'-mo-graf*) [ἀήρ, air; πλῆθος, fulness; γράφειν, to write]. An apparatus for registering graphically the expired air; the latter raises a very light and carefully equipoised box placed over water, and this moves a writing-style.

Aëropneumonectasia (*a-er-op-nu-mo-nek-ta'-se-ah*) [ἀήρ, air; πνεύμων, the lung; ἔκτασις, distention]. Emphysema of the lungs.

Aërorrhachia (*a-er-o-ra'-ke-ah*) [ἀήρ, air; ῥάχις, the spine]. An accumulation of air or gas in the spinal canal.

Aëroscepsy (*a-er-o-skep'-se*) [ἀήρ, air; σκέψις, a viewing]. In zoölogy, the power of perceiving atmospheric changes.

Aëroscope (*a'-er-o-skōp*) [ἀήρ, air; σκοπεῖν, to observe]. An instrument for the examination of air-dust. Also, an instrument for estimating the purity of the air.

Aëroscopy (*a-er-os'-ko-pe*) [ἀήρ, air; σκοπεῖν, to observe]. The investigation of atmospheric conditions.

Aërosis (*a-er-o'-sis*) [ἀέρεσθαι, to become air]. Gas formation within the body.

Aërotherapeutics (*a-e-ro-ther-a-pu'-tiks*) [ἀήρ, air; θεραπεύειν, to serve]. Pneumatotherapeutics; a mode of treating disease by varying the pressure or the composition of the air breathed.

Aërotherapy (*a-er-o-ther'-a-pe*) [ἀήρ, air; θεραπεύειν, to serve]. See *Aërotherapeutics.*

Aërothorax (*a-er-o-tho'-raks*) [ἀήρ, air; θώραξ, the chest]. See *Pneumothorax.*

Aërotonometer (*a-er-o-to-nom'-et-er*) [ἀήρ, air; τόνος, tension; μέτρον, measure]. An instrument for estimating the tension of gases in the blood.

Aërotropism (*a-er-ot'-ro-pizm*) [ἀήρ, air; τρέπειν, to turn]. In biology, the deflection of roots from the normal direction of growth by the action of gases.

Aërourethroscopy (*a-er-o-u-rēth'-ro-sko-pe*) [ἀήρ, air; οὐρήθρα, urethra; σκοπεῖν, to examine]. Urethroscopy conjoined with inflation of the urethra with air.

Aërozoa (*a-er-o-zo'-ah*) [ἀήρ, air; ζῷον, animal]. Same as *Aërobia.*

Aërteriversion (*a-er-ter-iv-er'-shun*) [ἀήρ, air; τηρέειν, to hold; *vertere*, to turn]. A method of arresting hemorrhage by everting the cut end of an artery, invaginating the vessel in itself and fixing the parts by a needle.

Aërteriverter (*a-er-ter-iv-er'-ter*) [ἀήρ, air; τηρέειν, to hold; *vertere*, to turn]. An instrument used in perforating aërteriversion.

Æruginous (*e-ru'-jin-us*). See *Eruginous.*

Ærugo (*e-ru'-go*) [L., *gen. Æruginis*]. 1. Rust of a metal. 2. Subacetate of copper. **Æ. Ferri**, the subcarbonate of iron. **Æ. Plumbi**, lead carbonate, or subcarbonate.

Ærumna (*e-rum'-nah*) [L.]. Mental distress, or mental and physical distress combined.

Æs (*ēz*) [L.]. Copper or brass. See *Copper.*

Æschrolalia (*es-kro-la'-le-ah*). See *Eschrolalia.*

Æschromythesis (*es-kro-mi-the'-sis*). See *Eschromythesis.*

Æsculin (*es'-ku-lin*). See *Esculin.*

Æsculus hippocastanum (*es'-ku-lus hip-o-kas'-ta-num*) [L.]. Horse-chestnut. The fruit of the common "buckeye," or horse-chestnut. Recommended in hemorrhoids. Dose gr. iij. Unof.

Æstates (*es-ta'-tēz*) [L., *pl.*]. Freckles, or sunburn. See *Ephelis* and *Lentigo.*

Æsthacyte (*es'-tha-sīt*) [αἴσθησις, feeling; κύτος, a cell]. In biology, one of the sense-cells of sponges, discovered by Stewart.

Æsthematology (*es-the-mat-ol'-o-je*). See *Esthematology.*

Æsthesia (*es-the'-ze-ah*). See *Esthesia.*

Æsthesin (*es'-the-sin*). See *Esthesin.*

Æsthesiogen (*es-the'-se-o-jen*). See *Esthesiogen.*

Æsthesiography (*es-the-se-og'-ra-fe*). See *Esthesiography.*

Æsthesiology (*es-the-se-ol'-o-je*). See *Esthesiology.*

Æsthesiomania (*es-the-se-o-ma'-ne-ah*). See *Esthesiomania.*

Æsthesiometer (*es-the-se-om'-et-er*). See *Esthesiometer.*

Æsthesiometry (*es-the-se-om'-et-re*). See *Esthesiometry.*

Æsthesioneurosis (*es-the-se-o-nu-ro'-sis*). See *Esthesioneurosis.*

Æsthesis (*es-the'-sis*). See *Esthesis.*

Æsthesodic (*es-the-sod'-ik*). See *Esthesodic.*

Æsthete (*es'-thēt*) [αἰσθητός, perceived by the senses]. In biology, one of the sense-organs of the *Chitonidæ* described by Moseley.

Æsthetica (*es-thet'-ik-ah*) [αἴσθησις, perception by the senses]. Diseases characterized by impairment or abolition of any of the senses.

Æsthophysiology (*es-tho-fiz-e-ol'-o-je*). See *Esthophysiology.*

Æstival (*es'-tiv-al*). See *Estival.*

Æstivation (*es-tiv-a'-shun*). See *Estivation.*

Æstuarium (*es-tu-a'-re-um*). See *Estuarium.*

Æstuation (*es-tu-a'-shun*). See *Estuation.*

Æstus (*es'-tus*) [L.]. Heat; especially a flushing, or sudden glow of heat. **Æ. volaticus,** wildfire rash; strophulus.

Ætas (*e'-tas*) [L.]. Age; a period of life. See *Age.*

Æthalium (*e-tha'-le-um*) [αἰθαλος, smoke, soot (referring to the spores)]. In biology, a placentoid compound plasmodium formed by certain mycetozoa, *e. g.*, the flowers of tan.

Æther (*e'-ther*). See *Ether.*

Ætherism (*e'-ther-izm*). See *Etherism.*

Æthiopification (*e-the-op-if-ik-a'-shun*). See *Ethiopification.*

Æthiopiosis (*e-the-op-e-o'-sis*). See *Ethiopification.*

Æthiops (*e'-the-ops*) [αἰθιοψ, an Ethiopian]. An old term for any black mineral powder used in medicine. **Æ. antimonialis,** a black triturate of mercury, antimony, and sulphur, made after several distinct formulæ. **Æ. martialis,** black iron deutoxid. **Æ. mineralis,** black amorphous triturate of mercury with sulphur, in various proportions.

Æthusa (*e-thu'-sah*). See *Ethusa.*

Æthusin (*e-thu'-sin*). See *Ethusin.*

Ætiology (*e-te-ol'-o-je*). See *Etiology.*

Afebrile (*ah-fe'-bril*) [*á* priv.; *febrilis,* feverish]. Without fever.

Afetal (*ah-fe'-tal*) [*á* priv.; *fetus,* an offspring]. Without a fetus.

Affection (*af-ek'-shun*) [*afficere,* to affect]. A synonym of disease.

Affective (*af-ek'-tiv*) [*afficere,* to affect]. Exciting emotion. **A. Faculties,** the emotions and propensities—especially those peculiar to man. **A. Insanity,** emotional or impulsive insanity.

Affectus (*af-ek'-tus*) [L.]. A disordered condition. **A. animi,** an affection of the mind; mental disorder. **A. suffocatorius.** Synonym of *Diphtheria.*

Afferent (*af'-er-ent*) [*afferens,* carrying to]. Carrying toward the center. Of *nerves:* conveying impulses toward the central nervous system; sensory, centripetal. Of *blood-vessels:* those, as arteries, conveying blood to the tissue, sometimes also to the gills. Of *lymphatics:* those conveying lymph to a lymphatic gland. Compare *Efferent.*

Afferentia, or **Vasa afferentia** (*va'-sah af-er-en'-she-ah*) [L.]. 1. The lymphatic vessels. 2. Any vessels carrying blood or lymph to an organ.

Affiliation (*af-il-e-a'-shun*) [*ad,* to; *filius,* son]. In medical jurisprudence, the act of imputing or affixing the paternity of a child in order to provide for its maintenance.

Affinity (*af-in'-it-e*) [*affinis,* akin to]. Relationship. A synonym of *Attraction.* **A., Chemical,** the force exerted at inappreciable distances, and between definite and invariable weights of two or more combining substances, whereby bodies of dissimilar nature unite to form new compounds. Contradistinguished from *cohesion,* which is an attraction between molecules. **A., Elective,** the preference of one substance for another rather than for a third or fourth. Affinity is spoken of as *compound, developed, disposing, divellent, intermediate, quiescent, reciprocal,* or *synthetic,* according to the part it plays, or is conceived to play, in any chemical process.

Affium (*af'-e-um*) [Arab., *Afiûn*]. The Asiatic name for opium.

Afflate (*af-lāt'*) [*afflatus,* blown upon]. Sudden in its attack; overwhelming.

Afflatus (*af-la'-tus*) [L., "a blowing upon"]. 1. A draft or blast of air. 2. A sudden attack. 3. A supposed inspiration or divine influence.

Affluence (*af'-lu-ens*) [*affluentia,* from *affluere,* to flow to]. A determination or influx, as of blood to a part.

Affluent (*af'-lu-ent*) [*affluens,* flowing to]. Producing a congestion; determinant; flowing in or upon.

Afflux (*af'-lux*) [*affluere, affluxus,* to flow toward]. The flow of the blood or other liquid to a particular part.

Affluxion (*af-luk'-shun*) [*affluere, affluxus,* to flow toward]. See *Afflux.*

Affusion (*af-u'-zhun*) [*affusio, affundere,* to pour upon]. Pouring water upon a substance to cleanse it, or upon the body in fevers to reduce temperature and calm nervous symptoms.

A-form Chronoscope. See *Chronoscope.*

African (*af'-rik-an*) [*Africa,* Latin name of the country]. Pertaining to Africa. **A. Arrow-poison.** See *Strophanthus.* **A. Date-mark.** See *Furunculus orientalis.* **A. Fever.** Synonym of *Dengue.* **A. Gum,** gum arabic. See *Acacia.* **A. Lethargy,** or **Nelávan,** a "sleeping sickness" affecting negroes of the West African coast. Increasing somnolence is the characteristic symptom. It is very fatal. Death after emaciation follows in from three to six months. Post-mortem examination has revealed hyperemia of the arachnoid, and it is asserted that this "sleeping sickness" is only one of the symptoms of *Filariasis, q. v.* No treatment avails. **A. Pepper,** *Chillies;* the intensely biting fruit of *Capsicum fastigiatum.* See *Capsicum.*

After (*af'-ter*) [A. S., *æfter,* back]. 1. The anus. The buttocks. 2. Next in succession. **A. Action,** the negative variation in an electrical current continuing for a short time in a tetanized muscle. **A. Birth,** the popular designation of the placenta, cord, and membranes, sometimes called the *secundines.* **A. Brain.** See *Hindbrain* and *Metencephalon.* **A. Care,** the care or nursing of convalescents; specifically, the treatment of patients discharged as cured from lunatic asylums. **A. Cataract,** *Cataracta Secundaria;* an opacity of the media of the eye after operation for cataract due to opacification of the capsule or to non-absorption of the remains of the lens-substance. **A. Damp,** a poisonous mixture of gases, such as carbon monoxid and carbon dioxid, found in coal mines after an explosion of inflammable gases. **A. Hearing,** a neurotic condition in which sounds are heard after the wave-motion that produces them has ceased. **A. Images,** continued retinal impressions after the stimulus of the light or image has ceased to act. A *positive after-image* is a simple prolongation of the sensation; a *negative after-image* is the appearance of the image in complementary colors. After-sensations may be also experienced with other senses. **A. Milk,** the *strippings;* the last milk taken from the teat at any one milking. It is peculiarly rich in butter, as compared with the fore-milk. **A. Pains.** See *Pains.* **A. Perception,** the perception of a sensation after the stimulus has passed away. **A. Sensation,** a sensation lasting longer than the stimulus producing it. **A. Taste,** a gustatory sensation produced some time after the stimulus has been removed. **A. Treatment.** See *A. Care.*

Afterings (*af'-ter-ingz*) [A. S., *æfter,* after]. See *After-milk.*

Agacement des Dents [Fr.]. The unpleasant sensation of teeth "set on edge" from contact of acids.

Agalactia (*ah-gal-ak'-te-ah*) [*á* priv.; γάλα, milk]. Failure or insufficiency of the mother's milk after childbirth.

Agalactous (*ah-gal-ak'-tus*) [*á* priv.; γάλα, milk]. 1. Without milk. 2. Not suckled; not nourished with milk.

Agalaxy (*ah-gal'-ak-se*). See *Agalactia.*

Agallocha (*ag-al'-o-kah*) [ἀγάλλοχον, the lignum aloes]. The milky juice of *Excœcaria agallochum*, a small tree of India. The juice is very acrid, and when brought in contact with the skin blisters it. Used locally for the cure of leprosy. Unof.

Agallochum (*ag-al'-o-kum*) [ἀγάλλοχον, the lignum aloes]. Same as *Agallocha*, or the wood of the tree that produces it; eagle-wood, or aloes-wood.

Agalorrhea, or Agalorrhœa (*ah-gal-o-re'-ah*) [ἀ priv.; γάλα, milk; ῥέειν, to flow]. A cessation of the flow of milk.

Agamic (*ah-gam'-ik*) [ἀ priv.; γάμος, marriage]. 1. In biology, not sexual; not pertaining to the sexual relation; asexual reproduction; parthenogenesis.

Agamogenesis (*ah-gam-o-jen'-es-is*) [ἀ priv.; γάμος, marriage; γένεσις, generation]. Reproduction without fecundation, as, *e. g.*, by gemmation. See *Parthenogenesis.*

Agamogenetic (*ah-gam-o-jen-et'-ik*) [ἀ priv.; γάμος, marriage; γένεσις, generation]. Pertaining to *Agamogenesis.*

Agamospore (*ah-gam'-o-spōr*) [ἀ priv.; γάμος, marriage; σπορά, offspring]. In biology, an asexually produced spore.

Aganactesis (*ag-an-ak-te'-sis*) [ἀγανάκτησις, physical pain]. Irritation; physical pain or uneasy sensation.

Aganoblepharon (*ag-an-o-blef'-ar-on*) [ἀγανοβλέφαρος, mild-eyed]. Adhesion of the eyelids to each other.

Agar-agar (*a'-gar-a'-gar*) [Ceylon]. A kind of glue made from certain sea-weeds, such as *Gracilaria lichenoides* and *Gigartina speciosa*, used in medicine to make suppositories, and in bacteriological studies to make a solution in which microörganisms are bred or kept. See *Gelose.*

Agaric (*ag-ar'-ik*) [ἀγαρικόν, a fungus employed as tinder by the *Agari* of Sarmatia]. A fungus of the genus *Agaricus*, *e. g.*, the mushroom and toadstool. See *Agaricus.*

Agaricic Acid (*ag-ar-is'-ik as'-id*). See *Acid, Agaricic.*

Agaricin (*ag-ar'-is-in*) [see *Agaric*], $C_{16}H_{30}O_5 + H_2O$. A white crystalline substance, the active principle of *Agaricus albus.* It has proved useful in the night sweats of phthisis where atropia has failed. Dose gr. $\frac{1}{20}$–$\frac{1}{16}$. Unof.

Agaricus (*ag-ar'-ik-us*) [see *Agaric*]. A genus of the family of Agaricini or Mushrooms. *A. albus*, Purging Agaric, unof., a fungus parasite upon the European Larch; it contains an alkaloid, *agaricin*, and *agaric acid.* It is used as a drastic purgative, and is valuable in night sweats. Dose gr. xxx–℥j as a purgative; gr. xv in night sweats. **A., Ext., Alcohol.** Dose gr. iij–vj. **A., Ext., Liq.** Dose ♏iij–xx. **A., Tinct.** Dose ♏xx–℥j. The edible species, *A. campestris*, is characterized by a brownish color, that does not change when cut, and an agreeable taste. *A. chirurgorum*, Surgeon's Agaric, a parasitic fungus formerly used for *Moxa*, *q. v.* Soaked in solution of potassium nitrate it forms *spunk.* *A. muscarius*, Fly Agaric, a poisonous mushroom, containing an alkaloid, *Muscarin*, *q.v.*, a powerful cardiac depressant. Dose of the alkaloid gr. $\frac{1}{8}$–ij. *Muscarin Nitrate*, used hypodermatically. Dose gr. $\frac{1}{10}$–$\frac{3}{4}$.

Agaster (*ah-gas'-ter*) [ἀ priv.; γαστήρ, the stomach]. An animal without a stomach.

Agastric (*ah-gas'-trik*) [ἀ priv.; γαστήρ, the stomach]. Having no intestinal canal, as the tape-worms.

Agastronervia (*ah-gas-tro-ner'-ve-ah*) [ἀ priv.; γαστήρ, the stomach; *nervus*, a nerve or sinew]. See *Agastroneuria.*

Agastroneuria (*ah-gas-tro-nu'-re-ah*) [ἀ priv.; γαστήρ, the stomach; νεῦρον, a nerve]. Deficiency in the nerve-stimulus sent to the stomach.

Agathin (*ag'-ath-in*) [ἀγαθός, good], $C_6H_4(OH).CH.N.N.(CH_3).C_6H_5$. Salicyl-*alpha*-methyl-phenyl-hydrazone, obtained by the interaction of salicylic aldehyd, and *alpha*-methyl phenyl-hydrazin. It is a greenish-white, crystalline substance, without odor or taste, insoluble in water, soluble in alcohol and ether, and melts at 74° C. Used as an anti-neuralgic in doses of eight grains, two or three times daily. Its action is cumulative. Unof.

Agave (*a-ga'-ve*) [ἀγανή, noble]. A large genus of amaryllidaceous plants, natives of North America. *A. americana*, American Aloe, the leaves of a plant growing in North America. It is diuretic and anti-syphilitic. Dose of the fld. ext. ℥ss-j. The fresh juice is also similarly employed. The fermented juice, called *pulque*, is a moderately stimulant drink, very popular in Mexico. Unof.

Age (*āj*) [M. E., *age*]. The length of time a being has existed; also, a certain stage in life. The period of life is divided into a succession of ages, as follows: 1. *Infancy*, from birth to the appearance of the temporary teeth. 2. *Childhood*, from the cutting of the first permanent teeth to puberty. 3. *Youth*, from puberty to the attainment of the full stature, that is, 18 or 19 for girls, 21 to 22 for boys. 4. *Maturity*, covers the interval from youth to the climacteric. 5. *Old-age*, or period of decline. Other divisions may be made, as, *e. g.*, those of embryonic life, of immaturity, of maturity, of sterility, *etc.*

Agenesia (*ah-jen-e'-se-ah*) [ἀ priv.; γένεσις, generation]. A term somewhat loosely used to designate abnormal or imperfect development. Also impotence and sterility. In botany, the asexual development of the flower.

Agenesis (*ah-jen'-es-is*) [ἀ priv.; γένεσις, generation]. 1. Impotence; barrenness. 2. Incomplete and defective development.

Agenosomus (*ah-jen-o-so'-mus*) [ἀ priv.; γεννᾶν, to beget; σῶμα, body]. A variety of single autositic monsters, of the species *Celosoma* in which there is a lateral or median eventration occupying principally the lower portion of the abdomen, while the genital and urinary organs are either absent or very rudimentary.

Agens (*a'-jenz*) [L.]. An agent. **A. Morbi.** See *Morbi.*

Agent (*a'-jent*) [*agere*, to act, to do]. A substance or force that by its action effects changes in the human body.

Agenus (*aj'-en-us*) [ἀ priv.; γένος, offspring]. Cellular plants.

Agenya (*ah-jen'-e-ah*) [ἀ priv.; γένυς, chin]. Congenital absence of the chin.

Agerasia (*aj-er-a'-se-ah*) [ἀγηρασία, eternal youth]. Vigorous old age; age without its wonted feebleness and decay.

Ageusia (*ah-gu'-se-ah* or *ah-ju'-se-ah*) [ἀ priv.; γεῦσις, taste]. Abolition of the sense of taste.

Ageustia (*ah-gūs'-te-ah*) [ἀ priv.; γεῦσις, taste]. Same as *Ageusia.*

Agger (*aj'-er*) [L.]. In anatomy, a pile or mound. **A. nasi**, an anterior prolongation and elevation of the mucous membrane covering the middle turbinated bone; its direction is almost parallel with the dorsal ridge of the nose, running forward and downward till it reaches very nearly to the anterior aperture of the nostril. **A. valvulæ venæ** [*pl.*, *Ag'geres valvula'rum vena'rum*], the eminence of a venous valve; a projection within the lumen of a vein at the junction of a valve.

Agglomerate (*ag-lom'-er-āt*) [*agglomerare*, to wind into a ball]. Grouped or clustered; massed. Crowded into a dense cluster. **A. Glands.** See *Gland.*

Agglutinant (*ag-lu′-tin-ant*) [*agglutinare*, to paste to]. Promotive of repair by adhesion; favorable to agglutination.

Agglutinate (*ag-lu′-tin-āt*) [*agglutinare*, to paste to]. In biology, to glue together; to unite by adhesion.

Agglutination (*ag-lu-tin-a′-shun*) [*agglutinare*, to glue upon or to]. A joining together; applied to the healing of wounds; it is called *immediate*, if by the first intention; *mediate*, if through the intermediation of some natural plastic material.

Agglutinative (*ag-lu′-tin-a-tiv*) [*agglutinare*, to glue upon or to]. 1. Favoring agglutination; adhesive. 2. Any substance with adhesive properties, fitted to retain the edges of wounds in apposition. Such are caoutchouc, collodion, *etc.*

Aggravation (*ag-ra-va′-shun*) [*aggravare*, to make worse]. Increase in severity, as of a disease, symptom, or pain.

Aggregate (*ag′-re-gāt*) [*ad*, to; *gregare*, to collect into a flock]. Grouped into a mass. **A. Glands.** See *Gland.*

Aggregation (*ag-re-ga′-shun*) [*ad*, to; *gregare*, to collect into a flock]. 1. The massing of materials together. 2. A congeries or collection of bodies, mostly of such as are similar to each other.

Agitation (*aj-it-a′-shun*) [*agitare*, to excite, arouse]. 1. Fatiguing restlessness with violent motion; mental disturbance. 2. A stirring or shaking, as in pharmacy.

Aglet, Aiglet (*ag′-let, āg′-let*) [M. E.]. In biology, a drooping anther or catkin.

Aglia (*ag′-le-ah*) [L.]. A speck or spot upon the cornea or on the white of the eye.

Aglobulia (*ah-glo-bu′-le-ah*) [ἀ priv.; *globulus*, a globule]. A decrease in the quantity of red blood corpuscles, with corresponding increase of serum.

Aglobulism (*ah-glob′-u-lizm*) [ἀ priv.; *globulus*, a globule]. Aglobulia; oligocythemia.

Aglobulous (*ah-glob′-u-lus*) [ἀ priv.; *globulus*, a globule]. Characterized by aglobulia.

Aglossia (*ah-glos′-e-ah*) [ἀ priv.; γλῶσσα, the tongue]. Congenital absence of the tongue.

Aglossostoma (*ah-glos-os′-to-mah*) [ἀ priv.; γλῶσσα, the tongue; στόμα, the mouth]. A fetal monster in which there is a mouth without a tongue.

Aglossus (*ah-glos′-us*) [ἀγλωσσος, without a tongue]. A person without a tongue.

Aglutition (*ah-glu-tish′-un*) [ἀ priv.; *glutire*, to swallow]. Difficulty in swallowing; inability to swallow.

Agmatology (*ag-mat-ol′-o-je*) [ἀγμός, a fracture; λόγος, discourse]. The science or study of fractures.

Agmen (*ag′-men*) [*agmen*, a multitude]. In biology, a taxonomic group between a class and an order.

Agminate (*ag′-min-āt*) [*agmen*, a multitude]. Aggregated, clustered. **A. Glands.** See *Gland, Peyer's.*

Agnail (*ag′-nāl*) [A. S., *angnægl*]. 1. Hangnail. 2. A whitlow. 3. A corn on the toe or foot.

Agnathia (*ag-na′-the-ah*) [ἀ priv.; γνάθος, a jaw]. Absence or defective development of the jaws.

Agnathus (*ag′-na-thus*) [ἀ priv.; γνάθος, a jaw]. A monster with no lower jaw.

Agnea, or **Agnœa** (*ag-ne′-ah*) [ἀγνοια, want of perception]. A condition in which the patient does not recognize things or persons.

Agnew's Operations. See *Operations, Table of.*

Agnew's Rectal Chemise. An appliance for controlling hemorrhage from the rectum. It consists of a gum catheter to the end of which are attached three square pieces of mosquito-netting. These are moistened with a solution of the persulphate of iron, and the whole introduced into the rectum, where it acts as a plug.

Agnin (*ag′-nin*) [*agnus*, a lamb]. A fatty substance derivable from sheep's wool, unmixed with water; it is harder, darker, and less agreeable in color and odor than lanolin. See *Lanolin* and *Suint.*

Agnina Membrana (*ag-ni′-nah mem-bra′nah*) [L.]. "The lamb-like, or woolly, membrane,"—the amnion.

Agnus castus (*ag′-nus kas′-tus*) [L.]. The chaste tree, *Vitex agnus castus;* its leaves and seeds were formerly used as a preservative of chastity, and its homeopathic preparations are still exhibited as anaphrodisiacs.

-ago′ga, -agogue [ἀγωγός, one who leads]. A suffix, denoting agents that drive out other substances, as emmenagogues, lithagogues, *etc.*

Agomphiasis (*ah-gom-fi′-as-is*) [ἀ priv.; γομφίος, a tooth]. Same as *Agomphosis.*

Agomphious (*ah-gom′-fe-us*) [ἀγόμφως, toothless]. Without teeth.

Agomphosis (*ah-gom-fo′-sis*) [ἀ priv.; γομφίος, a tooth]. 1. Absence of the teeth. 2. A loosening or looseness of the teeth.

Agonia (*ag-o′-ne-ah*) [ἀγωνία, a contest or struggle]. 1. Distress of mind; extreme anguish. 2. The death struggle. [ἀγονος, barren]. Barrenness; sterility; impotence. **A. Bark.** See *Agoriada.*

Agoniadin (*ag-on-i′-ad-in*) [ἀγονος, barren], $C_{10}H_{14}O_6$. A glucosid found in Agonia bark, and used as an antiperiodic.

Agonous (*ag′-o-nus*) [ἀγονος, unfruitful]. Barren; impotent.

Agony (*ag′-o-ne*) [ἀγωνία, a contest or struggle]. Violent pain; extreme anguish; the death-struggle.

Agoraphobia (*ag-o-ra-fo′-be-ah*) [ἀγορά, a market-place, assembly; φόβος, fear]. 1. A morbid fear of open places or spaces; kenophobia. 2. Dread of assemblies; morbid dislike of crowds or of associating with others.

Agoriada (*ag-o-re-ah′-dah*) [Sp.]. The Brazilian tree, *Plumieria lancifolia*, and its febrifuge bark.

Agoriadin (*ag-o-ri′-ad-in*) [Sp.], $C_{10}H_{14}O_6$. A glucosid, probably the active principle of *Agoriada.*

-agra [ἀγρα, a seizure]. A Greek word added as a suffix to various roots to denote *seizure, severe pain;* as podagra, *etc.*

Agrammatism (*ah-gram′-at-izm*) [ἀ priv.; γράμμα, a word]. A phenomenon of aphasia, consisting in the inability to form words grammatically, or the suppression of certain words of a phrase. See *Aphasia.*

Agraphia (*ah-graf′-e-ah*) [ἀ priv.; γράφειν, to write]. Inability to express ideas by writing. In some cases not a single letter can be formed; in others, words, and a number of words, without meaning, can be written. See *Aphasia.* **A., Musical,** pathological loss of the ability to write musical notes.

Agraphy (*ag′-ra-fe*) [ἀ priv.; γράφειν, to write]. Same as *Agraphia.*

Agrestial (*ag-res′-te-al*) [*agrestis*, rural]. In biology, growing wild in the fields.

Agria (*ag′-re-ah*) [ἀγριος, wild]. A pustular eruption; malignant pustule; herpes.

Agrielcosis (*ag-re-el-ko′-sis*) [ἀγριος, wild; ἕλκωσις, ulceration]. A malignant or uncontrollable ulceration.

Agrimony (*ag′-rim-o-ne*) [ἀγρός, a field; μόνος, alone]. The root of *Agrimonia eupatoria.* A mild astringent. Dose of fld. ext. ʒ ss-ij. Unof.

Agriopsoria (*ag-re-op-so′-re-ah*) [ἀγριος, wild; ψώρα, itch]. An incurable or severe attack, or variety, of itch.

Agrioriganum (*ag-re-o-rig′-an-um*) [ἀγριος, wild; ὀρίγανον, origanum]. Wild Marjoram, *Origanum vulgare.*

Agriothymia (*ag-re-o-thīm'-e-ah*) [ἄλριος, wild; θυμός, mind, will]. Maniacal fury; it is variously divided or classed as ambitious, hydrophobic, religious, *etc.*

Agrippa (*ah-grip'-ah*) [L.]. A person born with the feet foremost.

Agromania (*ag-ro-ma'-ne-ah*) [ἀγρός, a field; μανία, madness]. A mania for living in the country.

Agrostography (*ag-ros-tog'-ra-fe*) [ἀγρωστις, conch-grass; γράφειν, to write]. See *Agrostology*.

Agrostology (*ag-ros-tol'-o-je*) [ἀγρωστις, conch-grass; λέγειν, to speak of]. The botany of grasses.

Agrypnetic (*ah-grip-net'-ik*) [ἀ priv.; ὕπνος, sleep]. 1. Sleepless; wakeful. 2. Preventing sleep; agrypnotic.

Agrypnia (*ah-grip'-ne-ah*) [ἄγριος, restless; ὕπνος, sleep]. Loss of sleep, sleeplessness, *Insomnia, q. v.*

Agrypnocoma (*ah-grip-no-ko'-mah*) [ἀγρύπνος, sleepless; κῶμα, coma]. Coma vigil; wakeful lethargy, with low-muttering delirium.

Agrypnotic (*ah-grip-not'-ik*) [ἀ priv.; ὕπνος, sleep]. 1. Preventing sleep; causing wakefulness. 2. A medicine that prevents sleep.

Aguardiente (*ah-guar-de-ent'-tā*) [Sp.]. Ardent spirits; brandy or rum.

Ague (*a'-gu*) [*acutus*, sharp, acute; Fr., *aigu*]. Malarial or intermittent fever, characterized by paroxysms, or stages, of chill, fever, and sweating at regularly recurring times, and followed by an interval or intermission whose length determines the epithets, quotidian, tertian, *etc.* In some cases there is a double paroxysm, and hence called double quotidian, double tertian, *etc.* The duration of each paroxysm varies from two to twelve hours. The most frequent and important complication of intermittent fever is pneumonia, the consolidation occurring very suddenly. In the blood of many malarial patients a minute hematozoan, the *hematomonas malariæ*, has been found. They are seen in the red corpuscles, are hyaline, and include pigment granules. They gradually increase in size, fill the cell, a process of segmentation occurs, the cell wall breaks down, and the segments, each containing a pigment granule, are set free. These are oval and possess one to three flagella. These bodies disappear under the use of quinin. **A. Aden.** See *Dengue.* **A., Brass-founders',** a disease common among brass-founders, characterized by symptoms somewhat resembling an imperfect attack of intermittent fever, the recurrence of the paroxyms, however, being irregular. The direct cause is generally thought to be the inhalation of the fumes of deflagrating zinc or "spelter." **A., Brow,** intermittent neuralgia of the brow. **A. Cake,** chronic enlargement of the spleen in diseases of malarial origin. **A., Catenating,** ague associated with other diseases. **A. Drop.** See *Fowler's Solution.* **A., Dumb,** latent ague; masked ague; ague with no well-marked chill, and with at most only partial or slight periodicity. **A., Latent,** see *A., Dumb.* **A., Leaping,** a term for the dancing mania. **A., Masked.** See *A. Dumb.* **A. Tree,** common Sassafras. **A. Weed.** 1. See *Grindelia.* 2. The *Eupatorium perfoliatum*, or thorough-wort.

Agynary (*aj'-in-a-re*) [ἀ priv.; γυνή, female]. In biology, having no pistil, as a double flower.

Agynous (*aj'-in-us*) [ἀ priv.; γυνή, female]. In biology, destitute of female reproductive organs.

Ahypnia (*ah-hip'-ne-ah*) [ἀ priv.; ὕπνος, sleep]. Sleeplessness.

Ahypnosis (*ah-hip-no'-sis*) [ἀυπνία, sleeplessness]. Entire absence of the capacity to sleep, most marked in insanity.

Aichmophobia (*āk-mo-fo'-be-ah*) [αἰχμή, a spear point; φοβεῖν, to fear]. An extravagant dread of sharp or pointed instruments.

Aid-Forceps (*ād'-for-seps*) [Fr., *aide; forceps*]. A device for making safe and effective traction upon the obstetrical forceps by means of a fillet or tape and a dynamometer.

Aidoio- (*a-doi'-o*). See *Edeo-.*

Aidoiomania (*a-doi-o-ma'-ne-ah*). See *Edeomania.*

Aiglet (*āg'-let*). See *Aglet.*

Aigret, Aigrette (*a'-gret, a-gret'*). In biology, same as *Egret.*

Ailanthus (*a-lan'-thus*) [Malacca, *Ailanto*, "tree of heaven"]. The bark of *A. glandulosa*, commonly known as Tree of Heaven. Properties due to an oleoresin and a volatile oil. A nauseant and drastic purgative, constituting an excellent anthelmintic against tape-worm. **A., Ext. Fld.** Dose ♏x–℥j. **A., Tinct.** Dose ♏x–℥ij.

Ailing (*āl'-ing*) [M. E., *eyle*]. Indisposed; out of health; not well.

Ailment (*āl'-ment*) [M.E., *eyle*]. A disease; sickness; complaint; usually used in reference to chronic disorders.

Aimorrhea (*am-or-e'-ah*) [αἷμα, blood; ῥοία, a flowing]. A bleeding, or hemorrhage.

Ainhum (*in-yoon'*) [negro word, meaning *to saw*]. A disease in Guinea and Hindostan, peculiar to negroes, in which the little toes are slowly and spontaneously amputated at about the digito-plantar fold. The process is very slow, does not affect other toes or parts, is unaccompanied by any constitutional symptoms, and its cause is unknown. It sometimes attacks the great toe. Called also *Dactylolysis spontanea.*

Air [ἀήρ from ἀεῖν, to blow, or breathe]. The chief part of the atmosphere. *Atmospheric air* consists of a mixture of 77 parts by weight, or 79.19 by volume, of nitrogen, and 23 parts by weight, or 20.81 by volume, of oxygen, with 3.7 to 6.2 parts by volume of CO_2 in 10,000 parts. 100 cubic inches weigh 30,935 grains. The pressure of the air at sea-level is about 14¾ pounds upon the square inch. **A., Alkaline,** free or volatile ammonia. **A., Azotic,** nitrogen. **A. Bag.** See *A. Cushion.* **A. Bath,** therapeutic exposure to air that may be heated, condensed, or variously medicated. See *Bath.* **A.-bed,** an air-tight, rubber, inflated mattress employed in conditions requiring long confinement to bed. **A.-bladder.** See *A.-vesicle.* **A. Bubbles,** in microscopy, are prepared by heating a drop of thin mucilage. They are useful as a test for central light. In oblique light the bright spot will appear on the side away from the mirror. **A.-cell,** an air-sac; an air-vesicle of the pneumonic tissue. **A., Complemental,** is that that can still be inhaled after an ordinary inspiration. **A. Conduction,** a method of testing the hearing-power by means of a watch held at varying distances from the ear, or by the employment of a number of tuning forks of varying pitch. See *Bone Conduction.* **A.-cure,** the therapeutic employment of air. **A.-cushion.** A cushion filled with air; usually made of soft india-rubber. **A., Dephlogisticated,** an old name for Oxygen. **A.-douche.** The inflation of the middle ear with air. **A.-duct.** See *Duct.* **A.-embolism,** free air in the blood-vessels during life, or the obstruction due to it. **A., Expired,** that driven from the lungs in expiration. **A., Factitious,** carbon dioxid. **A., Fixed,** an old name for carbon dioxid (carbonic acid). **A. Hunger.** See *Diabetes mellitus.* **A., Inspired,** that taken into the lungs on inspiration. **A., Mephitic,** carbon dioxid. **A.-meter.** See *Anemometer.* **A. Passages,** the nares, mouth, larynx, trachea, and bronchial tubes. **A., Phlogisticated,** nitrogen. **A.-pump,** an apparatus for exhausting or compressing air. **A., Reserve**

or **Supplemental,** that that can still be exhaled after an ordinary expiration. **A., Residual,** that remaining in the lungs after the most complete expiration possible. **A.-sac.** See *Air-vesicle.* **A.-space,** a space in tissue filled with air or other gases arising from the separation, rupture, or absorption of cells. **A., Stationary,** that remaining in the lungs during normal respiration. **A., Supplemental.** See *A., Reserve.* **A.-tester,** an instrument for testing the impurity of the air. **A., Tidal,** that taken in and given out at each respiration. **A.-vesicle,** any small air-space, especially the expanded terminal portion of a minute or ultimate bronchial vessel. **A., Vital,** an old name for Oxygen. See *Atmosphere.*

Ajowan (*aj'-oo-an*) [E. Ind.]. Bishop's Weed. The fruit of *Ammi copticum.* Carminative and antiseptic. It has been recommended in colic, diarrhea, *etc.* Dose of the fld. ext. ♏x–xxx.

Akamathesia, Akamathesis. See *Akatamathesia.*

Akanthesthesia (*a-kan-thes-the'-ze-ah*) [ἄκανθα, a thorn; αἴσθησις, sensation]. A form of paresthesia or perverted sensation in which there is a feeling as of a sharp point.

Akanthion (*a-kan'-the-on*). See *Acanthion.*

Akatamathesia (*ah-hat-am-ath-e'-ze-ah*) [ἀ priv.; καταμάθησις, understanding]. Inability to understand.

Akataphasia (*a-kat-af-a'-se-ah*). See *Acataphasia.*

Akazga (*a-kaz'-gah*) [African]. A poisonous plant of West Africa, probably a *Strychnos.* Also its bark, and an amorphous extractive derived from it. It is one of the African ordeal poisons and contains *akazgin.*

Akazgin (*a-kaz'-gin*) [African]. An alkaloid from *akazga;* its effects are much like those of strychnia.

Akene (*ak'-ēn*). See *Achenium.*

Akido-galvano-cautery (*ak-id-o-gal-van-o-kaw'-te-re*) [ἀκίς, needle; *Galvani*; καυτήριον, a branding-iron]. Galvanic cauterization by the needle electrode.

Akidopeirastic (*ak-id-o-pi-ras'-tik*) [ἀκή, ἀκίς, needle; πειραστικός, proving]. Relating to the exploratory puncture of a diseased area by means of a stout needle.

Akinesia (*ah-kin-e'-se-ah*). See *Acinesia.*

Akinesis (*ah-kin-e'-sis*) [ἀ priv.; κίνησις, quiescence]. Absence or imperfection of movement. Applied to the heart's diastole and to immotility of the iris; also to any lack of motility, especially when due to some central or cerebral cause. **A. Algera,** an affection manifested by voluntary abstinence from movement on account of the pain of movement, without any apparent cause of pain.

Aknemia (*ak-ne'-me-ah*). See *Acnemia.*

Akology (*ak-ol'-o-je*). See *Aceology.*

Akral (*ak'-ral*) [ἄκρος, extreme]. See *Cephalic.*

Akrokinesis (*ak-ro-kin-e'-sis*). See *Acrocinesis.*

Akromegaly (*ak-ro-meg'-a-le*). See *Acromegalia.*

Akromikria (*ak-ro-mik'-re-ah*). See *Acromicria.*

Akroposthitis (*ak-ro-pos-thi'-tis*). See *Acroposthitis.*

Akyanopsia (*ah-ki-an-op'-se-ah*). See *Acyanopsia.*

Al. The Arabic definite article, *the,* prefixed to many words to designate preëminence, *etc.,* as alkali, alcohol. In chemical nomenclature it is used as a suffix to denote similarity to or derivation from an aldehyd, as chloral, butyral, *etc.*

Ala (*a'-lah*) [L., a wing: *pl.,* *Alæ*]. A name of various wing-shaped parts or appendages. In biology, the side petal of a papillonaceous corolla. **A. Auris,** the pinna of the ear. **A. Cinerea,** a triangular space of gray matter in the fourth ventricle of the brain, probably giving origin to the pneumogastric nerves. **A. Majores,** 1. The greater wings of the sphenoid. See *Alisphenoid.* 2. The external labia pudendi. **A. Minores.** 1. The lesser wings of the sphenoid. 2. The labia minora pudendi. **A. Nasi,** the lateral cartilage of the nose. **A. Pontis.** See *Ponticulus.* **A. Pulmonum,** the lobes of the lung. **A. of Sacrum,** the flat triangular surface of bone extending outward from the base of the sacrum, supporting the psoas magnus muscle. **A. Vespertilionis,** the broad ligament of the uterus. **A. Vulvæ,** the labia of the pudendum. Applied also to the armpits, parts of the sphenoid, vomer, *etc.*

Alalia (*al-a'-le-ah*) [ἀ priv.; λαλιά, talk]. 1. Impaired or lost articulation from paralysis of the muscles of speech or from local laryngeal disease. 2. Aphasia due to a psychic disorder.

Alalic (*al-a'-lik*) [ἀ priv.; λαλιά, talk]. Characterized by or pertaining to alalia.

Alanin (*al'-an-in*) [L., *aldehyde*], $C_3H_7NO_2$. Lactamic acid. An organic base obtained by heating aldehyd ammonia with hydrocyanic acid in the presence of an excess of HCl; it occurs in aggregated hard nodules with a sweetish taste; soluble in five parts of cold water; with more difficulty in alcohol; insoluble in ether. When heated, it commences to char at about 237°; it melts at 255° and then sublimes.

Alaninate (*al-an'-in-āt*) [L., *aldehyde*]. A salt of alanin. **A. of Mercury,** a crystalline, soluble compound of mercury and alanin; antisyphilitic. Dose gr. $\frac{1}{32}$ to $\frac{1}{4}$. Unof.

Alan'son's Operation. See *Operations, Table of.*

Alant Camphor. See *Helenin.*

Alantin (*al-an'-tin*) [Ger., *alant,* elecampane]. Same as *Inulin.*

Alantol (*al-an'-tol*) [Ger., *alant,* elecampane; *oleum,* oil], $C_{20}H_{22}O$. Inulol. An aromatic liquid obtained from elecampane; used like creosote for phthisis.

Alar (*a'-lar*) [*ala,* wing]. Winglike. In biology, situated in the forks of a stem. **A. Ligaments,** lateral synovial folds of the ligament of the knee-joint. **A. Odontoid Ligaments,** lateral ligaments of the odontoid process. **Alares musculi,** the pterygoid muscles. **Alares venæ,** superficial veins at the bend of the arm. **Alaria ossa,** lateral processes of the sphenoid bone.

Alaris (*al-a'-ris*) [*ala,* wing]. Wing-shaped. See *Alar.*

Alary (*a'-lar-e*) [*ala,* a wing]. In biology, pertaining to wings; wing-shaped.

Alate (*a'-lāt*) [*ala,* a wing]. In biology, winged or having winglike borders or expansions; aliferous; aligerous.

Alate-pinnate (*a'-lāt-pin'-āt*) [*ala,* a wing; *pinna,* a feather]. In biology, a pinnate leaf having a winged petiole.

Alba (*al'-bah*) [L., "white"]. The white fibrous tissue of the brain and nerves.

Albadara (*al-bad-a'-rah*) [Arabic]. An old name for the basal joint of the great toe.

Alban (*al'-ban*) [*albus,* white], $C_{10}H_{16}O$. A white resin that may be extracted from gutta percha.

Albedo (*al-be'-do*) [L., "whiteness"]. Whiteness. **A. retinæ,** retinal edema. **A. unguis,** or **unguium,** the lunula of the nail; the white semilunar place at the root of a finger nail.

Albescent (*al-bes'-ent*) [*albescere,* to become white]. Whitish; moderately white.

Albicans (*al'-be-kanz*) [*albicare,* to grow white]. White; whitish. Used as the name of either of the *corpora albicantia* at the base of the brain.

Albicant (*al'-be-kant*) [*albicare,* to be white]. See *Albescent.*

Albicantia (*al-be-kan'-she-ah*) [L.]. Plural of *Albicans.* See *Corpora.*

Albication (*al-be-ka'-shun*) [*albicare,* to be white]. In biology, a growing white.

Albicomus (*al-be-ko'-mus*) [*albus*, white; *coma*, hair]. Having white hair.

Albiduria (*al-bid-u'-re-ah*) [*albidus*, white; *οὖρον*, urine]. White urine.

Albiflorous (*al-bif-lo'-rus*) [*albus*, white; *flos*, a flower]. In biology, bearing white flowers.

Albinism (*al'-bin-izm*) **Albinismus** (*al-bin-iz'-mus*) [*albus*, white]. *Congenital Achroma; Congenital Leucoderma.* That condition of the skin in which there is a congenital absence of pigment unaccompanied by textural changes in the skin, and involving its entire surface, including the pilary filaments and the choroid coats and irides of the eyes. Usually associated with nystagmus, photophobia, and astigmatism.

Albino (*al-bi'-no*) [Sp.]. A person affected with albinism. Also an animal or plant differing from the normally colored members of its kind by being white or colorless.

Albinotic (*al-bin-ot'-ik*) [Sp.]. Affected with albinism.

Albinuria (*al-bin-u'-re-ah*) [*albus*, white; *οὐρεῖν*, to micturate]. 1. Chyluria; whiteness of the urine. 2. Albuminuria.

Albizzia (*al-bitz'-e-ah*) [Ital., *Albizzi*, a Tuscan proper name]. A genus of leguminous plants. *A. anthelminthica.* See *Moussena.*

Albolene (*al'-bo-lēn*) [*albus*, white; *oleum*, oil]. A hydrocarbon oil, colorless, tasteless, odorless, and not affected by exposure to air or strong acids. It is a form of lanolin, and is used as an application to inflamed surfaces and for spraying the respiratory passages.

Albuginea (*al-bu-jin'-e-ah*) [*albus*, white]. White, or whitish. **A. oculi**, the sclerotic coat of the eye. **A. ovarii**, and **testis**, the tunica albuginea of the ovary and testicle. The spleen, the epididymis, the penis, and the kidneys have each an investment or capsule called *albuginea* or *tunica albuginea.*

Albugineous (*al-bu-jin'-e-us*) [*albus*, white]. 1. Whitish. 2. Resembling the white of an egg.

Albuginitis (*al-bu-jin-i'-tis*) [*albus*, white; *ιτις*, inflammation]. Inflammation of a tunica albuginea.

Albugo (*al-bu'-go*) [L.]. 1. A white spot, as upon the cornea. 2. A whitish, scaly eruption. 3. The white of an egg.

Albumen (*al'-bu-men* or *al-bu'-men*) [*albus*, white]. The white of an egg. See *Albumin.*

Albumenoid (*al-bu'-men-oid*). See *Albuminoid.*

Albumenuria (*al-bu-men-u'-re-ah*). See *Albuminuria.*

Albumimeter (*al-bu-mim'-et-er*) [*albus*, white; *μέτρον*, measure]. An instrument for determining the quantitive estimation of albumin in urine, or in any compound or mixture.

ALBUMIMETER.

Albumin (*al-bu'-min*) [*albus*, white]. A proteid substance, the chief constituent of the body. Its molecule is highly complex and varies widely within certain limits in different organs and conditions. It contains approximately the following percentages: Carbon 51.5 to 54.5; hydrogen 6.9 to 7.3; nitrogen 15.2 to 17.0; oxygen 20.9 to 23.5; sulphur 0.3 to 2.0 Its approximate formula is $C_{72}H_{112}N_{18}O_{22}S$. Albumen, white of egg, often called albumin, is largely composed of it. Other varieties are called after their sources or characteristic reactions, as acid-albumin, alkali-albumin, muscle-, serum-, ovum-, vegetable-albumin, *etc.* Normal albumin is the type of a group of proteids known as albumins. For the various *tests* for albumin, see *Table of Tests*, under *Test.* See also, *Proteids* and *Native Albumins.* **A. of Bence-Jones**, a variety found in pseudo-albuminuria. It does not give a precipitate with an excess of HNO_3 except on standing, when a coagulum forms that will be redissolved on heating. **A., Blood.** See *Serum-albumin.* **A., Caseiform**, that variety not coagulated by heat, but precipitated by acids. **A., Circulating**, that found in the fluids of the body. **A. Crystals.** See *Crystalloids.* **A., Derived**, a modification of albumin resulting from the action of certain chemicals. **A., Egg-.** See *Egg-albumin.* **A., Muscle-**, a variety found in muscle-juice. **A., Native**, any albumin occurring normally in the organism. **A., Organic**, that forming an integral part of the tissue. **A., Serum-.** See *Serum-albumin.* **A., Test Solution of**, a filtered solution of the white of an egg in 100 c.c. of distilled water. **A., Vegetable**, that form that is found in various vegetable juices.

Albuminate (*al-bu'-min-āt*) [*albus*, white]. The compound of albumin and certain bases, as albuminate of iron, or of iron and potassium, *etc.*

Albuminaturia (*al-bu-min-āt-u'-re-ah*) [*albus*, white; *οὖρον*, urine]. The abnormal presence of albuminates in the urine.

Albuminiferous (*al-bu-min-if'-er-us*) [*albumin; ferre*, to bear]. See *Albuminiparous.*

Albuminimeter (*al-bu-min-im'-et-er*). See *Albumimeter.*

Albuminin (*al-bu'-min-in*) [*albumin*]. The non-nitrogenous substance of the cells that enclose the white of birds' eggs.

Albuminiparous (*al-bu-min-ip'-ar-us*) [*albumin; parere*, to produce]. Yielding albumin.

Albuminogenous (*al-bu-min-oj'-en-us*) [*albumin; γενής*, producing]. Producing albumin.

Albuminoid (*al-bu'-min-oid*) [*albumin; εἶδος*, form]. 1. Resembling albumin. Applied to certain compounds having many of the characteristics of albumin. 2. Any nitrogenous principle of the class of which normal albumin may be regarded as the type. **A. Disease**, also spoken of as *lardaceous, waxy*, or *amyloid degeneration.* A form of degeneration usually affecting simultaneously a number of the viscera, and occurring secondarily to some preëxisting disease. Those viscera most usually the seat of the change are, in the order of frequency, the spleen, liver, kidneys, intestine and lymph glands. The tissues around the capillary vessels are first affected; from these centers it spreads till the whole organ or section presents a pale, glistening, waxy, or bacon-like appearance. This is due to the infiltration of a peculiar proteid substance, lardacein, which, with iodin, gives a deep mahogany brown color, the characteristic test for the disease. The preëxisting trouble is either some chronic suppuration, as in bone or joint disease, or some wasting disease like pulmonary tuberculosis, syphilis, *etc.* The only way in which the disease may be arrested is by thorough removal of the cause.

Albuminoids (*al-bu'-min-oidz*) [*albumin*]. Substances resembling true proteids in their origin and composition. They are amorphous non-crystalline colloids, occurring as organized constituents of the tissues, and also in fluid form. Mucin, Nuclein, Keratin, Fibroin, Spongin, Elastin, Gelatin, Chondrin, *etc.*, are the principal members of the group.

Albuminometer (*al-bu-min-om'-et-er*). See *Albumimeter.*

Albuminone (*al-bu'-min-ōn*) [*albumin*]. A principle derivable from certain albuminoids; it is not coagulable by heat, and is soluble in alcohol.

Albuminorrhea (*al-bu-min-or-e'-ah*) [*albumin; ῥοία*, a flow]. Copious abnormal discharge of albumins.

Albuminose (*al-bu'-min-ōs*) [*albumin*]. 1. A product of the digestion of fibrin or any albuminoid in very

dilute hydrochloric acid; acid albumin. 2. Albumose, or the product of the digestion of albumin by the gastric juice.

Albuminosis (*al-bu-min-o'-sis*) [*albumin*]. Abnormal increase of the albuminous elements in the blood, or the condition that results from such increase.

Albuminous (*al-bu'-min-us*) [*albumin*]. Containing, or of the nature of an albumin.

Albumin-Peptone (*al-bu'-min-pep'-tōn*). Same as *Albuminose* (*2d def.*).

Albumins (*al-bu'-minz*). See *Albumin*.

Albuminuria (*al-bu-min-u'-re-ah*) [*albumin; οὖρον*, urine]. The presence in the urine of albumin, a mixture of serum-albumin and serum-globulin in various proportions. True albuminuria must be distinguished from the presence of albumin due to an admixture with the urine of blood, pus, or other albuminous fluid. However, even under these circumstances it must be remembered that true albuminuria may be coëxistent. Albumin in the urine may result from a number of causes, *e. g.*, mechanical interference with the renal circulation; from congestion, lesions, and organic diseases of the kidneys themselves; from toxic substances in the blood, such as lead, in which case there is a granular form of nephritis; from changes in the blood due to various diseases, as anemia, purpura, scurvy, and sepsis; in pyrexia; in certain nervous disorders, such as tetanus, delirium tremens, apoplexy, Graves's disease, and epilepsy; in various functional disorders, as dyspepsia, high living, great exertion, *etc.*, and during pregnancy. The etiology of albuminuria is still undetermined, but it is now recognized that it will be produced by any condition that interferes with the nutrition of the glomeruli or renal epithelium. **A. of Adolescence.** See *A., Cyclic.* **A., Adventitious.** See *A., Pseudo-.* **A., Cardiac,** that due to chronic valvular disease. **A., Cyclic,** a condition also known as physiological, simple, functional, or transient albuminuria, or the albuminuria of adolescence, in which a small quantity of albumin appears in the urine, especially of the young, at stated times of the day; hence the term "cyclic." The nature of this phenomenon is not positively known, but it is probably the result of some changes in the renal circulation. **A., Dietetic,** that due to the ingestion of certain forms of food, especially eggs, cheese, and pastry. **A., Dyscrasic.** See *A., Hematogenous.* **A., False,** a mixture of albumin with the urine during its transit through the urinary passages, where it may be derived from blood, pus, or special secretions that contain albumin. **A., Febrile,** that due to fever, or associated with acute infectious diseases, slight changes occurring in the glomeruli without organic lesion. **A., Functional.** See *A., Cyclic.* **A., Gouty,** albumin in the urine of elderly people, who secrete a rather dense urine containing an excess of urea. **A., Hematogenous,** that resulting from some abnormal blood-condition, and not due to nephritis. **A., Hepatic,** that form associated with marked disturbance of the hepatic function, as shown by slight jaundice and vague dyspeptic attacks. **A., Intrinsic.** See *A., True.* **A., Mixed,** the presence of a true- and pseudo-albuminuria. **A., Morbid,** that due to any pathological condition. **A., Nephrogenous,** that due to renal disease. **A., Neurotic,** that due to nervous disorders. **A., Paroxysmal.** See *A., Cyclic.* **A., Physiological,** the presence of albumin in normal urine, without appreciable coëxisting renal lesion or diseased condition of the system. **A., Pseudo-,** *A., Adventitious;* albuminuria dependent upon the presence of such fluids as blood, pus, lymph, spermatic fluid, or the contents of an abscess-cavity, in the urine. **A., Simple.** See *A., Cyclic.* **A., Temporary,** that lasting but for a short time. **A., Tests of.** See *Table of Tests*, under *Test.* **A., Transient.** See *A., Cyclic.* **A., True,** *A., Intrinsic;* that due to the excretion of a portion of the albuminous constituents of the blood with the water and salts of the urine.

Albuminuric (*al-bu-min-u'-rik*) [*albumin; οὖρον*, urine]. Associated with, of the nature of, or affected by, albuminuria. **A. Retinitis.** See *Retinitis.*

Albuminurorrhea (*al-bu-min-u-ror-re'-ah*) [*albumin; οὖρον*, urine; *ῥοία*, a flowing]. See *Albuminuria.*

Albumose (*al'-bu-mōs*) [*albumin*]. Any albuminoid substance ranking among the first products of the splitting up of proteids by enzymes, and intermediate between the food-albumins and the typical peptones. According to Kühne there are at least two albumoses, *antialbumose* and *hemialbumose*. The latter, after the precipitation and filtering off of the para-peptones, *e. g.*, in the peptic digestion of fibrin, yields the following: 1. *Protalbumose*, soluble in hot and cold water and precipitable by NaCl in excess. 2. *Deuteroalbumose*, soluble in water, not precipitated by NaCl in excess, unless an acid be added at the same time. 3. *Heteroalbumose*, insoluble in hot or cold water, soluble in dilute or more concentrated solutions of NaCl, and precipitable from these by excess of the salt. 4. *Dysalbumose*, same as heteroalbumose, except that it is insoluble in salt solutions.

Albumosuria (*al-bu-mōs-u'-re-ah*) [*albumose; οὖρον*, urine]. The abnormal presence of an albumose in the urine.

Alburnum (*al-ber'-num*) [L., "sap-wood"]. In biology, young wood, sap-wood.

Alcahest (*al'-ka-hest*) [Uncertain derivation]. An old name for the supposed universal solvent, and for a medicine curative of all congestions. **A. of Glauber,** a crude potassium carbonate derived from the burning of potassium nitrate with hot coals.

Alcali (*al'-ka-li*). See *Alkali.*

Alcaptone (*al-kap'-tōn*). See *Alkaptone.*

Alcaptonuria (*al-kap-tōn-u'-re-ah*). See *Alkaptonuria.*

Alchemist (*al'-kem-ist*) [Origin doubtful]. One who practices alchemy.

Alchemy (*al'-kem-e*) [Arab., of doubtful derivation]. The supposed art of the transmutation of metals (into gold) and of finding a remedy for all diseases. Modern chemistry is the development of this chimerical medieval dream.

Al'cock's Canal. See *Canal.*

Alcohol (*al'-ko-hol*) [*al*, the; *koh'l*, finely powdered antimony]. Ethyl alcohol, C_2H_6O. A liquid obtained by the distillation of fermented grain or starchy substance. It is used in pharmacy as a solvent for resins, and as a base for all tinctures. Commercial alcohol contains 91 per cent. of absolute alcohol, with 9 per cent. of water. It is inflammable, colorless, and possesses a pungent odor and burning taste. Sometimes it is used externally as a stimulant lotion. Internally, it is a powerful cerebral excitant; in large doses a depressant, narcotic poison, producing muscular incoördination, delirium, and coma. It is a food within the limits of ʒj–ℨj per day; its continued use is apt to result in epilepsy, amblyopia, and insanity. In the form of wine, whisky, or brandy, it is valuable in diphtheria, adynamic fevers, and poisoning by cardiac depressants. **A., Absolute,** spirit containing no water. **A., Amyl,** $C_5H_{12}O$, commonly known as "*Potato Spirit*" and "*Fusel Oil*"; a transparent, colorless liquid. **A., Anhydrous,** one free from water. **A., Aromatic,** an alcohol containing phenyl. **A., Benzyl,** C_7H_8O, obtained from benzaldehyd by the action of sodium amalgam. It is a

colorless liquid, with a faint aromatic odor; boils at 206°; its sp. gr. at 0° is 1.062. It dissolves with difficulty in water, but readily in alcohol and ether. **A. deodoratum,** deodorized alcohol, containing 92.5 per cent. by weight of ethyl-alcohol and 7.5 per cent. of water. **A., Dilute,** composed of 41 per cent. by weight of ethyl-alcohol. **A., Ethyl.** See *Alcohol.* **A. of Fermentation,** has a disagreeable odor; boils at 129–130°; occurs in fusel-oil; consists mainly of inactive isobutyl carbinol. **A., Methyl,** CH_4O, known as "Wood Spirit." **A., Phenic.** See *Acid, Carbolic.*

Alcoholate (*al'-ko-hol-āt*) [*al,* the; *koh'l,* finely powdered antimony]. 1. A chemical compound, as a salt, into which an alcohol enters as a definite constituent. 2. A preparation made with alcohol.

Alcoholature (*al-ko-hol'-at-chūr*) [*al,* the; *koh'l,* finely powdered antimony; Fr. *alcoolature*]. An alcoholic tincture, especially one prepared with fresh plants.

Alcoholic (*al-ko-hol'-ik*) [*al,* the; *koh'l,* finely powdered antimony]. 1. Pertaining to, containing, or producing alcohol. 2. One addicted to the use of spirituous drinks. **A. Radicals,** the name applied to the univalent radicals, $C_nH_{2n}+1$.

Alcoholica (*al-ko-hol'-ik-ah*) [*al,* the; *koh'l,* finely powdered antimony]. In pharmacy, alcoholic preparations.

Alcoholimeter (*al-ko-hol-im'-et-er*). See *Alcoholometer.*

Alcoholimetry (*al-ko-hol-im'-et-re*). See *Alcoholometry.*

Alcoholism (*al'-ko-hol-izm*) [*al,* the; *koh'l,* finely powdered antimony]. The morbid results of excessive or prolonged use of alcoholic liquors. The term **acute A.** has been used as a synonym for inebriety. The **chronic** form is associated with severe lesions or disturbances of the digestive, respiratory, and nervous systems.

Alcoholismus (*al-ko-hol-iz'-mus*). Syn. of *Alcoholism.*

Alcoholization (*al-ko-hol-iz-a'-shun*) [*al,* the; *koh'l,* finely powdered antimony]. The art or process of alcoholizing; the state of being alcoholized; the product of the process of alcoholizing.

Alcoholize (*al'-ko-hol-īz*) [*al,* the; *koh'l,* finely powdered antimony]. 1. To impregnate with or blend with alcohol. 2. To convert into an alcohol. 3. To reduce to a very subtle powder.

Alcoholometer (*al-ko-hol-om'-et-er*) [*alcohol; μέτρον,* a measure]. A hydrometer or other instrument used in determining the percentage of alcohol in any liquid.

Alcoholometry (*al-ko-hol-om'-et-re*) [*alcohol; μέτρον,* a measure]. The determination of the proportion of alcohol present in any liquid.

Alcoholophilia (*al-ko-hol-o-fil'-e-ah*) [*alcohol; φιλεῖν,* to love]. The appetite for strong drink; a craving for intoxicants.

Alcohols (*al'-ko-hols*) [*al,* the; *koh'l,* finely powdered antimony]. A series of neutral compounds resembling bases exhibiting gradations corresponding to their increase in molecular weight. They are derived from the normal hydrocarbons by replacing hydrogen with the group OH. The lower alcohols are mobile liquids, readily dissolving in water and possessing the characteristic alcohol odor; the intermediate members are more oily, and dissolve with difficulty in water; while the higher are crystalline solids without odor or taste. The alcohols resemble the fats. Their boiling-points increase gradually (with similar structure) in proportion to the increase of their molecular weights. See *Table.* **A., Diatomic,** those formed by replacing two atoms of hydrogen in a hydrocarbon by two molecules of hydroxyl. **A., Dibasic.** See *A., Diatomic.* **A., Dihydric.** See *Glycols,* and *Table of Alcohols.* **A., Divalent.** See *Glycols.* **A., Hexahydric,** alcohols containing six hydroxyl groups attached to six different carbon atoms. They approach the sugars very closely in their properties, having a very sweet taste, but differ from them in

TABLE OF THE ALCOHOLS.

1. OF THE FATTY COMPOUNDS.

SERIES 1.—ALCOHOLS, $C_nH_{2n+1}OH$,

NAME.	FORMULA.	PHYSICAL CONDITION.	BOILING POINT. (*Centigrade.*)	SPECIFIC GRAVITY.
Methyl (*Wood Spirit*),	CH_4O	Liquid.	66°	0.796 at 20°
Ethyl,	C_2H_6O	Liquid.	78.3°	0.78945 at 20° 0.80625 at 0°
Propyl,	C_3H_8O	Liquid.	97.4°	0.8044 at 20°
Butyl,	$C_4H_{10}O$	Liquid.	116.8°	0.8099 at 20°
Amyl,	$C_5H_{12}O$	Liquid.	137°	0.8168 at 20°
Hexyl,	$C_6H_{14}O$	Liquid.	157°	0.819 at 23°
Heptyl (*Enanthyl*),	$C_7H_{16}O$	Liquid.	175°	. . .
Octyl,	$C_8H_{18}O$	Liquid.	190–192°	0.830 at 16°
Nonyl,	$C_9H_{20}O$	. . .	. . .	. . .
Decyl,	$C_{10}H_{22}O$	Solid.	43.5°	. . .
Undecatyl,	$C_{11}H_{24}O$	Solid.	. .	. . .
Dodecatyl,	$C_{12}H_{26}O$	Solid.	119°	. . .
Tridecatyl,	$C_{13}H_{28}O$	Solid.	. . .	. . .
Tetradecatyl,	$C_{14}H_{30}O$	Solid.	167°	. . .
Pentadecatyl,	$C_{15}H_{32}O$	Solid.	. . .	. . .
Hexadecyl (*Cetyl*),	$C_{16}H_{34}O$	Solid.	. . .	. . .
Heptadecyl,	$C_{17}H_{36}O$	Solid.	. . .	. . .
Octodecyl,	$C_{18}H_{38}O$	Solid.	210°	. . .
Ceryl (*Cerotin*),	$C_{27}H_{56}O$	Solid.	. . .	. . .
Mellissyl,	$C_{30}H_{62}O$	Solid.	. . .	. . .

SERIES 2.—UNSATURATED ALCOHOLS, C_nH_{2n}—1.OH.

Vinyl,	C_2H_4O	Does not exist in the free state.	. . .	. . .
Allyl,	C_3H_6O	Liquid.	96–97°	0.8540 at 20°
Crotyl,	C_4H_8O	Liquid.	117–120°	. . .

SERIES 3.—UNSATURATED ALCOHOLS, C_nH_{2n}—3.OH. Acetylene Series.

Propargyl,	C_3H_4O	Liquid.	114–115°	0.9715 at 20°

The only known alcohol of this series.

2. OF THE AROMATIC OR BENZENE SERIES.

SERIES 1.—PRIMARY ALCOHOLS.

Benzyl,	C_7H_8O	Liquid.	206°	1.062 at 0°
Tolyl,	$C_8H_{10}O$	Liquid.	212°	1.033 at 20°
Phenyl Propyl,	$C_9H_{12}O$	Liquid.	235°	. . .
Cumin,	$C_{10}H_{14}O$	Liquid.	246°	. . .

TABLE OF THE ALCOHOLS.—*Continued.*

SERIES 2.—DIVALENT (DIHYDRIC) ALCOHOLS.

NAME.	FORMULA.	PHYSICAL CONDITION.	BOILING POINT. (*Centigrade.*)	SPECIFIC GRAVITY.
Benzylene-Glycol,	$C_7H_8O_2$	Does not exist in the free state.	. . .	. . .
Tollylene(*Phthalyl*)	$C_8H_{10}O_2$	. . .	. .	. . .
Styrolene, ...	$C_8H_{10}O_2$	Solid.	. . .	. . .
Benzoyl Carbinol,	$C_8H_8O_2$	Solid.	. . .	. . .

SERIES 3.—OXY- OR PHENOL ALCOHOLS.

Oxy-benzyl, . . .	$C_7H_8O_2$	Solid.	. .	. . .
Anisyl, ...	$C_8H_{10}O_2$	Solid.	259°	. . .
Piperonyl, ...	$C_8H_8O_3$	Solid.	. . .	. . .
Vanillin, ...	$C_8H_{10}O_3$	Solid.	. . .	. . .
Phenyl Glycerol, .	$C_9H_{12}O_3$	Solid.	. .	. . .
Mesicerin, ...	$C_9H_{12}O_3$	Liquid.	. . .	. . .

that they do not reduce an alkaline copper solution and are not fermented by yeast. Moderate oxidation converts them into glucoses, $C_6H_{12}O_6$. They are obtained from the latter by the action of sodium amalgam. **A., Monatomic.** See *A., Monovalent.* **A., Monohydric.** See *A., Monovalent.* **A., Monovalent** (*Monohydric*), products of the replacement of one atom of hydrogen of the hydrocarbons by the hydroxyl group HO. **A., Normal,** primary alcohols in which the replacing group possesses normal structure. **A., Primary,** products of the replacement of one hydrogen atom in carbinol by alkyls. **A., Secondary,** products of the replacement of two hydrogen atoms in carbinol by alkyls. **A., Tertiary,** products of the replacement of all of the three hydrogen atoms of carbinol by alkyls. **A., Triatomic,** those formed by replacing three atoms of hydrogen in a hydrocarbon by three molecules of hydroxyl. **A., Unsaturated,** those derived from the unsaturated alkylens in the same manner as the normal alcohols are obtained from their hydrocarbons. In addition to the general character of alcohols, they are also capable of directly binding two additional affinities. See *Table.*

Alcoömeter (*al-ko-om′-et-er*). See *Alcoholometer.*

Alcornin (*al-kor′-nin*) [Sp.]. A peculiarly fatty, crystallizable substance, supposed to be the active principle of alcornoque.

Alcornoque (*al-kor-no′-kwa*) [Sp.]. 1. Cork, or the cork-oak. 2. The *Alchornea latifolia*, a euphorbiaceous tree of tropical America. Its bark is bitter and tonic, and has been used as a remedy in phthisis. Unof.

Aldane (*al′-dān*) [See *Aldehyd*]. A chemical compound formed by uniting two or more molecules of an aldehyd and removing the aqueous elements.

Aldehyd (*al′-de-hīd*) [*al*, the first syllable of alcohol; *dehyd*, from *dehydratus*], C_2H_4O. Alcohol deprived of two atoms of hydrogen, or *acetic aldehyd*. It is a colorless, limpid liquid, with a characteristic odor. When exposed to the air or to oxygen it is converted into acetic acid. It boils at 208°, and has a sp. gr. of 0.8009 at 0°. It is miscible in all proportions with water, ether, and alcohol. Internally it produces intoxication, anesthesia, and asphyxia. The vapor is used in catarrhal congestions and ozena. **A., Anisic,** $C_8H_8O_2$, results on oxidizing various essential oils (anise, fennel, *etc*,) with dilute HNO_3. A colorless oil of sp. gr. 1.123 at 15°, and boiling at 248°. **A., Benzoic,** C_7H_6O, the oil of bitter almonds. **A., Cinnamic,** C_9H_8O, the chief ingredient of the essential oil of cinnamon and cassia. It is a colorless, aromatic oil, that sinks in water and boils at 247°. **A., Formic,** is asserted to have extreme value as a microbicide and antiseptic, even its fumes and its solution of one part in 20,000 being destructive to various pathogenic germs. **A., Protocatechuic,** $C_6H_3(OH)$-$(OH).CHO$, the parent substance of vanillin and piperonal, prepared from pyrocatechin by the action of chloroform. It dissolves readily in water, forms brilliant crystals, and melts at 150°. **A., Salicylic,** $C_6H_4(OH).CHO$, occurs in the volatile oils of the different varieties of *Spiræa*. It is an oil with an aromatic odor, boiling at 196°, with a sp. gr. at 15° of 1.172; easily soluble in water, and colors the skin an intense yellow.

Aldehydene (*al-de-hī′-dēn*) [*aldehyd*], C_2H_3. A chemical radicle derived from ethylene.

Aldehyds (*al′-de-hīdz*) [See *Aldehyd*]. A class of compounds intermediate between alcohols and acids, derived from their corresponding primary alcohols by the oxidation and removal of two atoms of hydrogen, and converted into acids by the addition of an atom of

TABLE OF THE ALDEHYDS.

A. OF THE FATTY COMPOUNDS.

1. ALDEHYDS OF THE PARAFFIN SERIES, $C_nH_{2n}O$.

NAME.	FORMULA.	PHYSICAL CONDITION.	MELTING POINT. (*Centigrade*)	BOILING POINT. (*Centigrade*)	SPECIFIC GRAVITY.
Methyl (*Formic*), . .	CH_2O	Gas	. . .	. . .	. . .

Anisic, ...	$C_8H_8O_2$	Liquid	. . .	248°	1.123 at 15°
Protocatechuic,	$C_7H_6O_3$	Solid	150°	. . .	. . .
Vanillin, . . .	$C_8H_8O_3$	Solid	80–81°	. . .	. . .

oxygen. They contain the group COH. They exhibit in their properties a gradation similar to that of the alcohols. The lower members are volatile liquids, soluble in water, and have a peculiar odor, but the higher are solids, insoluble in water, and cannot be distilled without decomposition. See *Table.*

Aldepalmitic Acid (*al-de-pal-mit'-ik as'-id*). See *Acid, Aldepalmitic.*

Alder (*al'-der*). See *Alnus.*

Al'derman's Nerve. See *Arnold's Nerve*, in *Nerve Table.*

Aldin (*al'-din*) [see *Aldehyd*]. An amorphous basic chemical substance, formed from an ammonia compound of aldehyd. Several aldins are known.

Aldol (*al'-dol*) [see *Aldehyd*], $C_4H_8O_2$. A colorless, odorless liquid, obtained by the action of dilute HCl on crotonaldehyd and acetaldehyd. It is miscible with water, and at 0° has a sp. gr. of 1.120; upon standing, it changes to a sticky mass that cannot be poured.

Aldoses (*al'-do-sēz*) [see *Aldehyd*]. The aldehyd alcohols, containing the atomic group CH(OH).CHO.

Aldoxim, or Aldoxime (*al-doks'-im*) [See *Aldehyd*]. Products of the combination of aldehyds or ketones and free hydroxylamin. They are usually liquid bodies that boil without decomposition.

Ale (*āl*) [A. S., *ealw*]. An alcoholic beverage brewed from malt and hops. It contains from three to seven per cent. of alcohol. See *Malt Liquors.*

Aleatico (*al-e-a'-tik-o*) [It.]. An excellent sweet red wine, prepared in Tuscany, and esteemed one of the best and most delicate stimulants of its class.

Alecithal (*ah-les'-ith-al*) [ἀ priv.; λεκίθος, yolk]. A term applied to certain ova having the food-yolk absent, or present only in very small quantity.

Alegar (*ā'-le-gar*) [A. S., *ealw; egar*, sour]. Vinegar made of ale.

Alembic (*al-em'-bik*) [Arab., *al*, the; ἀμβιξ, a cup]. A vessel used for distillation.

Alembroth (*al-em'-broth*) [Origin unknown]. An old name for a compound of the chlorid of ammonium and mercury. Its solution has been used of late as an antiseptic.

Alepidote (*ah-lep'-e-dōt*) [ἀ priv.; λεπίς, a scale]. Without scales, as certain fishes.

Aleppo Boil, Button, Evil, Pustule, or Ulcer. See *Furunculus orientalis.*

Aletrin (*al'-et-rin*). See *Aletris.*

Aletris (*al'-et-ris*). Star Grass, Unicorn Root, Starwort, Colic Root. The root of *A. farinosa*. Tonic, diuretic, and anthelmintic. Formerly a popular domestic remedy in colic, dropsy, and chronic rheumatism. Dose of fld. ext. ♏x–xxx; of tincture (1 in 8 proof spirit) ʒi–ij; of *aletrin*, the extractive, gr. ¼–iv. **A. Cordial.** Dose ʒj three times daily. Unof.

Aleukemia (*ah-lu-ke'-me-ah*) [ἀ priv.; λευκός, white; αἷμα, blood]. Deficiency in the proportion of white cells in the blood.

Aleurometer (*al-u-rom'-et-er*) [ἄλευρον, flour; μέτρον, a measure]. An instrument used for the examination of crude gluten as to its power of distending under the influence of heat, as a means of judging of the value of a flour for bread-making. A similar instrument, termed an *aleuroscope*, has also been invented.

Aleuronat (*al-u'-ro-nat*) [ἄλευρον, flour]. A vegetable albumin used as a substitute for bread in cases of diabetes.

Aleurone (*al-u'-rōn*) [ἄλευρον, fine flour]. Proteid matter in the form of small rounded particles, found in seeds.

Aleuroscope (*al-u'-ro-skōp*) [ἄλευρον, flour; σκοπεῖν, to view]. See *Aleurometer.*

Alexander-Adam's Operation. See *Operations, Table of.*

Alexanderism (*al-eks-an'-der-izm*) [*Alexander*]. The insanity of conquest; agriothymia ambitiosa.

Alexander's Operation. See *Operations, Table of.*

Alexeteric (*al-eks-e-ter'-ik*) [ἀλεξητήρ, defender]. Good against poison, venom, or infection.

Alexia (*al-eks'-e-ah*) [ἀ priv.; λέξις, word]. Word-blindness. A form of aphasia and a special type of psychical blindness, in which the patient is unable to recognize ordinary written or printed characters. **A., Musical,** musical blindness; pathological loss of the ability to read music.

Alexifer (*al-eks'-if-er*) [ἄλεξις, help; φέρειν, to bear]. A remedy or object that serves as an amulet or antidote against poison.

Alexin (*al-eks'-in*) [ἄλεξις, help]. 1. Any defensive proteid; any phylaxin or sozin. 2. An antibacterial substance found by Hankin in the blood of certain animals and giving immunity to certain toxins. 3. A synonym for *Tuberculocidin.*

Alexipharmac, or Alexipharmic (*al-eks-e-far'-mak*, or *-mik*) [ἀλέξειν, to repel; φάρμακον, a poison]. A medicine neutralizing a poison.

Alexipharmacon (*al-eks-e-far'-mak-on*) [ἀλέξειν, to repel; φάρμακον, a poison]. Any alexipharmac medicine.

Alexipyretic (*al-eks-e-pi-ret'-ik*) [ἀλέξειν, to ward off; πυρετός, a fever]. A febrifuge.

Alexiteric (*al-eks-e-ter'-ik*). See *Alexeteric.*

Aleze (*ah-lēz*) [Fr., *alèze*]. A cloth to protect the bed from becoming soiled by excreta, *etc.*

Alfonsin (*al-fon′-sin*) [from Alfonso Ferri, a sixteenth century surgeon]. An old form of bullet extractor.

Algæ (*al′-je*) [*alga*, a seaweed]. A group of acotyledonous plants, of simple vegetable construction, living mostly in the water.

Algaroth (*al′-gar-oth*) [It., *Algarotti*, the Veronese physician]. Oxychlorid of antimony.

Algedo (*al-je′-do*) [ἀλγηδών, pain]. Severe pain in the generative organs and extending to the urinary organs, sometimes arising from a sudden stoppage of gonorrhea.

Algefacient (*al-je-fa′-shent*) [*algere*, to be cool; *facere*, to make]. Cooling.

Algeinuresis (*al-jin-u-re′-sis*) [ἀλγεῖν, to feel pain; οὐρησις, urination]. Painful urination.

Algera, or **Algeros** (*al-je′-rah*, or *-ros*) [ἀλγηρός, painful]. Painful; characterized by pain.

Algesia (*al-je′-ze-ah*) [ἀλγησις, pain]. Pain; suffering.

Algesichronometer (*al-je-ze-kro-nom′-et-er*) [ἀλγησις, pain; χρόνος, time; μέτρον, a measure]. An instrument used to note the lapse of time before a nerve center responds to a painful stimulus.

Algesimeter (*al-jes-im′-et-er*) [ἀλγησις, pain; μέτρον, a measure]. An instrument for determining the acuteness of the sense of pain.

Algesis (*al-je′-sis*). See *Algesia*.

Algesthesis, or **Algæsthesis** (*al-jes-the′-sis*) [ἀλγος, pain; αἰσθησις, feeling]. The perception of pain; any painful disease.

Algetic (*al-jet′-ik*) [ἀλγεῖν, to have pain]. Pertaining to, or producing, pain.

-algia (*al′-je-ah*) [ἀλγος, pain]. A suffix denoting pain, as odontalgia, neuralgia, *etc.*

Algid (*al′-jid*) [*algidus*, cold]. Cold, chilly. **A. Fever**, a pernicious intermittent fever, with great coldness of the surface of the body. **A. Cholera**, Asiatic cholera.

Algin (*al′-jin*) [*alga*, a seaweed]. Alginic acid; a gummy substance derivable from seaweeds and forming a good substitute for gum arabic.

Algology (*al-gol-ō-ji*) [*alga*, a seaweed; λέγειν, speak]. That department of botany treating of algæ, phycology.

Algometer (*al-gom′-et-er*) [ἀλγος, pain; μέτρον, a measure]. An instrument for testing the sensibility of a part to pain.

Algometry (*al-gom′-et-re*) [ἀλγος, pain; μέτρον, a measure]. The testing of pain.

Algophobia (*al-go-fo′-be-ah*) [ἀλγος, pain; φόβος, dread]. Unreasonable or morbid dread of pain.

Algophobic (*al-go-fo′-bik*) [ἀλγος, pain; φόβος, dread]. Characterized by algophobia.

Algophobist (*al-go-fo′-bist*) [ἀλγος, pain; φόβος, dread]. One who morbidly dreads pain.

Algor (*al′-gor*) [L.]. A sense of chilliness or coldness. *A. Progressivus.* Syn. of *Scleroderma Neonatorum.*

Algos (*al′-gos*) [ἀλγος, pain]. Pain; a painful disease, or attack.

Algosis (*al-go′-sis*) [*alga*, seaweed]. The causation of disease by certain plants, as algæ.

Algospasm (*al′-go-spazm*) [ἀλγος, pain; σπασμός, spasm]. Painful spasm or cramp.

Al'ibert's Ke'loid. See *Keloid* and *Diseases, Table of.*

Alibility (*al-ib-il′-e-te*) [*alibilis*, nutritive]. Availability of a nutritious substance for absorption and assimilation.

Alible (*al′-i-bl*) [*alibilis*, nutritive]. Nutritive; absorbable and assimilable.

Alicant (*al′-ik-ant*) [from *Alicante*, in Spain]. A strong, sweet, and dark-colored Spanish wine.

Alices (*al′-is-ēz*) [L.]. Red spots preceding the pustulation in smallpox.

Alienation (*āl-yen-a′-shun*) [*alienatio; alienare*, to withdraw]. Mental derangement, insanity.

Alienist (*āl′-yen-ist*) [*alienare*, to withdraw]. One who treats mental diseases; a specialist in the treatment of insanity.

Aliethmoid (*al-e-eth′-moid*) [*ala*, a wing; ἠθμός, a strainer]. In birds, the wing of the ethmoidal portion of the orbito-nasal cartilage.

Aliferous (*al-if′-er-us*) [*ala*, a wing; *ferre*, to bear]. Winged; alate; aligerous.

Aliform (*al′-if-orm*) [*ala*, wing; *forma*, shape]. Wing-shaped. **A. Process**, the wing of the sphenoid. See *Alisphenoid. Aliformes musculi* (*al-if-or′-mēz mus′-ku-li*). The aliform or wing-shaped muscles; the pterygoid muscles.

Aligerous (*al-ij′-er-us*) [*ala*, wing; *gerere*, to bear]. Having wings; alate; aliferous.

Aliment (*al′-im-ent*) [*alimentum*, from *alimentare*, to nourish]. Nourishment, food. A substance that, acted upon by the digestive and assimilative organs, yields the sources and repairs the losses of heat, force, or the tissues of the body.

Alimentary (*al-im-en′-ta-re*) [*alimentum*, from *alimentare*, to nourish]. Nourishing. **A. Bolus**, the food after mastication and just prior to swallowing. **A. Canal, Duct, System**, or **Tube**, the digestive tube from the lips to the anus, with its accessory glands.

Alimentation (*al-im-en-ta′-shun*) [*alimentare*, to nourish]. The process of the reception and conversion of food into material fit for nourishment. **A., Rectal**, the nourishing of a patient by the administration of small quantities of concentrated food through the rectum. There are many formulæ for these nutritious enemata, the most important of which are the following: 1. *Leube's Pancreatic-meat Emulsion.*—"For rectal alimentation: chop five ounces of finely-scraped meat still finer, add to it one and a-half ounces of finely-chopped pancreas, free from fat, and then three ounces of lukewarm water; stir to the consistence of a thick pulp. Give at one time, care being taken to wash out the rectum with water about an hour before." 2. *Mayet's Formula.*—"Fresh ox-pancreas 150 to 200 grams; lean meat 400 to 500 grams. Bruise the pancreas in a mortar with water at a temperature of 37° C., and strain through a cloth. Chop the meat and mix thoroughly with the strained fluid, after separating all the fat and tendinous portions. Add the yolk of one egg, let stand for two hours, and administer at the same temperature, after having cleansed the rectum with an injection of oil. This quantity is sufficient for 24 hours' nourishment, and should be administered in two doses." 3. *Rennie's Formula.*—"Add to a bowl of good beef-tea one-half pound of lean, raw beefsteak pulled into shreds. At 99° F. add one drachm of fresh pepsin and one-half drachm of dilute HCl. Place the mixture before the fire and let it remain for four hours, stirring frequently. The heat must not be too great, or the artificial digestive process will be stopped altogether. It is better to have the mixture too cold than too hot. If alcohol is to be given it should be added at the last moment. Eggs may also be added, but should be previously well beaten." 4. *Peaslee's Formula.*—"Crush or grind a pound of beef-muscle fine; then add one pint of cold water; allow it to macerate 40 minutes, and then gradually raise it to the boiling point; allow it to boil for two minutes—no more—and then strain." 5. *Flint's Mixture.*—"Milk ℥ij, whisky ℥ss, to which add half an egg."

Alimentivity (*al-im-en-tiv′-i-te*) [*alimentare*, to nourish]. The instinct that impels the animal organism to take food or nourishment.

Alinasal (*al-in-a′-sal*) [*ala*, a wing; *nasus*, the nose]. Pertaining to the *ala nasi*, or wing of the nose.

Aliped (*al′-ip-ed*) [*ala*, a wing; *pes*, a foot]. Characterized by having the fingers or toes connected by a membrane, for purposes of flight.

Aliptic (*al-ip′-tik*) [ἀλειπτικός]. 1. Relating to inunction. 2. Gymnastic; pertaining to physical culture.

Alisma (*al-iz′-mah*) [ἄλισμα, plantain]. A genus of endogenous plants. *A. plantago*, or water plantain, has pungent, acrid qualities, and is used as a diuretic and stimulant. Unof.

Alismin (*al-iz′-min*) [ἄλισμα, plantain]. An extractive or precipitate, obtained from the tincture of *Alisma plantago*.

Alisphenoid (*al-is-fe′-noid*) [*ala*, a wing; σφήν, a wedge; εἶδος, form]. 1. Pertaining to the greater wing of the sphenoid bone. 2. That bone which in adult life forms the main portion of the greater wing of the sphenoid.

Alizarin (*al-iz-a′-rin*) [Arab., *al*, the; *açārah*, to extract], $C_{14}H_8O_4$. The red coloring principle occurring in the madder plant, *Rubia tinctorium*, and in anthracene, a coal-tar product. It occurs in red prismatic crystals, readily soluble in ether and alcohol. The alizarins form a group of the anthracene colors. See *Conspectus of Pigments* under *Pigment*. **A. Blue**, a crystalline blue coloring matter formed by heating nitroalizarin in combination with H_2SO_4 and glycerin. **A. Red**, a pale flesh-color used in dyeing.

Alkahest (*al′-ka-hest*). Same as *Alcahest*.

Alkalescence (*al-ka-les′-ens*) [Arab., *al-qalt*, soda-ash]. Slight or commencing alkalinity; alkaline quality or tendency.

Alkalescent (*al-ka-les′-ent*) [Arab., *al-qalt*, soda-ash]. Somewhat alkaline; mildly alkaline.

Alkali (*al′-ka-li*) [Arab., *al-qalt*, soda-ash]. The term includes the hydrated oxids of the alkali metals; these are electro-positive, are strong bases, uniting with acids to form salts, turn red litmus blue, and saponify fats. **A., Caustic** (usually potash), when so concentrated as to possess caustic properties; potash and soda are called **fixed alkalies**, because permanently solid; soda is called a mineral, potash a vegetable, and ammonia a volatile alkali.

Alkali-albumin (*al′-ka-li-al-bu′-min*). A derived albumin; a proteid having been acted upon by dilute alkalies and yielding an alkaline reaction.

Alkaligenous (*al-ka-lij′-en-us*) [*alkali*; γενής, producing]. Affording or producing an alkali.

Alkalimeter (*al-ka-lim′-et-er*) [*alkali*; μέτρον, a measure]. An instrument for estimating the alkali in a substance.

Alkalimetry (*al-ka-lim′-et-re*) [*alkali*; μέτρον, a measure]. The measurement of the amount of an alkali in a substance.

Alkaline (*al′-ka-lin*) [*alkali*]. Having the qualities of or pertaining to an alkali. **A. Bath.** See *Bath*. **A. Copper Test.** See *Tests, Table of*. **A. Tide.** See *Tide*.

Alkalinity (*al-ka-lin′-it-e*) [*alkali*]. The quality of being alkaline.

Alkalinuria (*al-ka-lin-u′-re-ah*) [*alkali*; οὖρον, urine]. Alkalinity of the urine.

Alkalization (*al-ka-li-za′-shun*) [*alkali*]. The act of rendering a thing alkaline; the state or quality of being rendered alkaline.

Alkaloid (*al′-ka-loid*) [*alkali*; εἶδος, likeness]. Resembling an alkali.

Alkaloidal (*al-ka-loid′-al*) [*alkali*; εἶδος, likeness]. Having the qualities of an alkaloid.

Alkaloids (*al′-ka-loids*) [*alkali*; εἶδος, likeness]. All nitrogenous vegetable compounds of basic and alkaline character, or their derivatives, from which bases may be isolated. They are chief constituents of the active principles of the vegetable drugs employed as medicines or poisons. Those alkaloids containing no oxygen are generally liquid and volatile; such are nicotin and conein. The others are solid, crystallizable, and non-volatile. **A., Putrefactive.** See *Ptomaïnes*.

Alkaluretic (*al-ka-lu-ret′-ik*) [*alkali*; οὖρον, urine]. Causing or tending to cause a flow of alkaline urine.

Alkanet (*al′-kan-et*) [Sp., dim. of *alcaña*, henna]. The root of the herb, *Alkanna* (*Anchusa*) *tinctoria*, yielding a red dye that is used in staining wood, coloring adulterated wines, and in pharmacy to give a red color to salves, *etc.*

Alkan′na Red. See *Alkannin*.

Alkannin (*al′-kan-in*) [Sp., dim. of *alcaña*, henna]. Alkanna red; a valuable coloring matter obtained from alkanet. It is a dark, brownish-red, resinous mass, or powder, insoluble in water, but soluble in alcohol and ether, neutral in reaction.

Alkapton (*al-kap′-ton*). A yellowish resinous body occasionally found in urine, which on exposure to air acquires a brownish tint. It does not ferment and does not reduce bismuth like glucose, though it throws down a somewhat brownish mass. It is highly soluble in water, but only sparingly in ether.

Alkaptonuria (*al-kap-ton-u′-re-ah*) [*alkapton*; οὖρον, urine]. The presence of alkapton in the urine. It has been found in cases of pulmonary tuberculosis, and in other instances in which there are no local lesions or general disease. It is without clinical significance.

Alkarsin (*al-kar′-sin*) [*alcohol*; *arsenic*]. Cadet's Fuming Liquid; an extremely poisonous liquid containing cacodyl. It is of a brown color, and on exposure to the air ignites spontaneously.

Alkophyr (*al′-ko-fir*). Brücke's name for a variety of peptone soluble in alcohol.

Alkoxid (*al-koks′-id*) [*alcohol*; *oxid*]. A chemical compound formed by the union of an alcohol with a metallic base.

Alkylogens (*al-kil′-o-jenz*). See *Esters, Haloid*.

Alkyls (*al′-kilz*) [*alkali*]. The name applied to the univalent alcohol radicals, C_nH_{2n+1}; methyl, ethyl, *etc.*, are alkyls.

Alkyl-sulphids (*al′-kil-sul′-fids*). Thio-ethers. Sulphur analogues of the ethers. They are colorless liquids, mostly insoluble in water and possessing a disagreeable odor resembling that of garlic.

Allagostemonous (*al-ag-o-ste′-mon-us*) [ἀλλαγή, change; στήμων, a thread or stamen]. In botany, the alternate insertion of the stamens on the receptacle and corolla.

Allamanda (*al-am-an′-dah*) [*Allamand*, a Swiss scientist]. A genus of apocynaceous climbing shrubs of tropical America. *A. cathartica* is diaphoretic, emetic, cathartic, and refrigerant. Unof.

Allantiasis (*al-an-ti′-as-is*) [ἀλλᾶς, a sausage]. Sausage poisoning, due to putrefactive changes in imperfectly cured sausages, or in those made from bad materials.

Allantoic (*al-an-to′-ik*) [ἀλλᾶς, a sausage; εἶδος, resemblance]. Pertaining to the allantois. **A. Parasite**, a form of autosite in which the weaker fetus forms anastomoses with the allantoic or placental circulation of the stronger, thus becoming directly dependent for its nutrition upon the circulation of the latter. It is characterized by a partial or complete disappearance of the heart of the parasite.

Allantoid (*al-an′-toid*) [ἀλλᾶς, sausage; εἶδος, resemblance]. 1. Resembling or like a sausage. 2. Relating to the allantois.

Allantoidian (*al-an-toid'-e-an*) [ἀλλᾶς, a sausage; εἶδος, resemblance]. Any animal which in its fetal condition possesses an allantois.

Allantoin (*al-an'-to-in*) [ἀλλᾶς, a sausage, εἶδος, resemblance], $C_4H_6N_4O_3$. A crystalline substance occurring in traces in normal urine, and prepared from uric acid by oxidation processes. Also the characteristic constituent of the allantoic fluid, and likewise found in fetal urine and amniotic fluid. It crystallizes in small, shining, colorless, hexagonal prisms, soluble readily in hot water. It reduces Fehling's solution on prolonged boiling.

Allantois (*al-an'-to-is*) [ἀλλᾶς, a sausage; εἶδος, resemblance]. One of the fetal appendages or membranes, derived from the mesoblastic and hypoblastic layers. Its function is to convey the blood-vessels to the chorion. The lower part finally becomes the bladder, the rest, the urachus.

Allantotoxicon (*al-an-to-toks'-ik-on*) [ἀλλᾶς, a sausage; τοξικόν, a poison]. A name applied to a poisonous substance, probably a ptomaïne, that develops during the putrefactive fermentation of sausage, especially that made of blood and liver.

Allarton's Operation. See *Operations, Table of.*

Allassotonic (*al-as-o-ton'-ik*) [ἀλλάσσειν, to vary; τόνος, tension]. In biology, a term applied to the transient movements produced by stimulation, in mature plant organs; opposite of *Auxotonic.*

Allen's Closet. See *Sewage, Disposal of.* **A. Tests.** See *Tests, Table of.*

Allenthesis (*al-en'-the-sis*) [ἄλλος, other; ἔνθεσις, insertion]. The presence or the introduction of foreign bodies into the organism.

Allentheton (*al-en'-the-ton*) [ἄλλος, other; ἔνθεσις, insertion]. A foreign body present in the organism.

Alleorgan, or Allœorgan (*al-e-or'-gan*) [ἄλλοιος, of another sort; ὄργανον, organ]. Same as *Alloplast.*

Alleosis, or Allœosis (*al-e-o'-sis*) [ἀλλοίωσις, change]. 1. Change; alterative effect; recovery from illness. 2. Mental disorder.

Alleotic, or Allœotic (*al-e-ot'-ik*) [ἀλλοίωσις, change]. Alterative.

Allepigamic (*al-ep-ig-am'-ik*) [ἄλλος, other; ἐπί, upon; γαμικός, relating to marriage]. In biology, a term applied by Poulton to the colored foreign objects displayed by certain animals during courtship, as by the bower birds.

Allesthesia (*al-es-the'-se-ah*) [ἄλλος, other; αἴσθησις, feeling]. Same as *Allochiria.*

Allevation (*al-e-va'-shun*) [*ad*, to; *levare*, to lift up]. 1. The relief of pain. 2. The raising or lifting of a patient from the bed or from the reclining posture.

Alleviation (*al-e-ve-a'-shun*) [*alleviatus; ad*, to; *levare*, lift up]. The relief or palliation of pain.

Alleviative (*al-e'-ve-a-tiv*) [*allevare*, to lighten]. 1. Tending to mitigate or relieve pain. 2. A remedy for the relief of pain.

Alleviator (*al-e'-ve-a-tor*) [*allevare*, to lighten]. A device for raising or lifting a sick person from the bed.

Allex (*al'-eks*) [L.]. Same as *Hallux.*

Allheal (*awl-hēl'*) [A. S., *all; hælan*, to heal]. The officinal valerian, *Valeriana officinalis;* also the plant *Stachys palustris.*

Alliaceous (*al-e-a'-shus*) [*allium*, garlic]. Resembling garlic or pertaining to the same.

Alligator-forceps (*al'-e-ga-tor-for'-seps*). A surgeons' toothed forceps, one of the jaws of which works with a double lever.

Alligator Pear (*al'-e-ga-tor pār*). The seeds of *Persea gratissima*, or Avocado Pear. A Mexican remedy for intercostal neuralgia, and internally, an anthelmintic (?). Dose, internally, of the fld. ext. ♏xxx–℥j.

Allingham's Operations. See *Operations, Table of.*

Allingham's Rectal Plug. An appliance for controlling hemorrhage from the rectum.

Allis's Inhaler. See *Anesthetic.*

Allis's Sign. See *Signs and Symptoms, Table of.*

Alliteration (*al-it-er-a'-shun*) [*ad*, to; *litera*, letter]. A form of dysphrasia in which the patient arranges his words according to the sound.

Allium (*al'-e-um*) [L.]. Garlic. The bulb of *A. sativum.* Contains a pungent volatile oil (allyl sulphid), that is found also in the leek and the onion. The tubers are used both as a food and as a condiment, and are stimulants to digestion. **A. cepa**, the common onion, and **A. porrum**, the leek, have similar qualities. **A., Syr.**, contains, fresh garlic 20, sugar 80, dil. acetic acid q. s. Dose ℥j–℥iv.

Allochetia (*al-o-ke'-te-ah*). Same as *Allochezia.*

Allochezia (*al-o-ke'-ze-ah*) [ἄλλος, other; χέζειν, to desire to go to stool]. 1. The passage of feces from the body through an abnormal opening. 2. The passing of non-fecal matter from the bowels.

Allochiria (*al-o-ki'-re-ah*) [ἄλλος, other; χείρ, hand]. An infrequent tabetic symptom, in which, if one extremity be pricked, the patient locates the sensation in the corresponding member of the other side.

Allochroic (*al-lo-kro'-ik*) [ἄλλος, another; χρῶμα, color]. Of changeable or diversified color.

Allochromasia (*al-o-kro-ma'-ze-ah*) [ἄλλος, other; χρῶμα, color]. Color-blindness.

Allochromatic (*al-o-kro-mat'-ik*) [ἄλλος, other; χρῶμα, color]. Of a changeable color.

Allocinetic (*al-o-sin-et'-ik*). See *Allokinetic.*

Allocryptic (*al-o-krip'-tik*) [ἄλλος, other; κρυπτός, hidden]. In biology, a term applied by Poulton to mimetic coloration in animals produced by covering themselves with foreign objects.

Allœosis (*al-e-o'-sis*). See *Alleosis.*

Allœotic (*al-e-ot'-ik*). See *Alleotic.*

Allogamy (*al-og'-am-e*) [ἄλλος, other; γάμος, marriage]. In biology, cross fertilization.

Alloisomerism (*al-o-i-som'-er-izm*) [ἄλλος, other; ἰσομερής, having equal parts]. The application of the same structural formula to many different compounds; a variety of isomerism.

Allokinetic (*al-o-kin-et'-ik*) [ἄλλος, other; κίνησις, motion]. Moved or set in motion by external impressions or forces; not autokinetic.

Allolalia (*al-o-la'-le-ah*) [ἄλλος, other; λαλεῖν, to speak]. Any perversion of the faculty of speech.

Allolalic (*al-o-lal'-ik*) [ἄλλος, other; λαλεῖν, to speak]. Affected with allolalia.

Allomerism (*al-om'-er-izm*) [ἄλλος, other; μέρος, shape]. In chemistry, the property of retaining a constant crystalline form while the chemical constituents present, or their proportions, vary.

Allomorphism (*al-o-morf'-izm*) [ἄλλος, other; μορφή, shape]. The property possessed by certain substances of assuming a different form while remaining unchanged in constitution.

Allopathy (*al-op'-a-the*) [ἄλλος, other; πάθος, affection]. According to Hahnemann, the inventor of the term, that method of the treatment of disease consisting in the use of medicines the action of which upon the body in health produces morbid phenomena different from those of the disease treated. Opposed to homeopathy. It need hardly be said that modern scientific medicine is based upon no such theory, or definition, as that supplied by homeopathy. See *Regular.*

Allophasis (*al-off'-as-is*) [ἄλλος, other; φάσις, speech]. Incoherency of speech; delirium.

Allophemy (*al-off'-e-me*) [ἄλλος, other; φήμι, to speak]. See *Heterophemy.*

Alloplast (*al'-o-plast*) [*ἄλλος*, other; *πλαστός*, form, mold]. In biology, a plastid composed of several tissues; the opposite of homoplast.

Allorrhythmia (*al-or-ith'-me-ah*) [*ἄλλος*, other; *ῥυθμός*, rhythm]. Variation in interval of the pulse. See *Pulse*, *Pulsus*, and *Cardiac Rhythm*.

Allosematic (*al-o-sem'-at-ik*) [*ἄλλος*, other; *σῆμα*, a sign, mark, or significant character]. Applied to coloration which enables an animal to associate itself with some large or dangerous animal.

Allosteatodes (*al-o-ste-at-o'-dēz*) [*ἄλλος*, other; *στεατώδης*, fat-like]. Marked by perversion or morbidity of the sebaceous secretion.

Allotoxin (*al-o-toks'-in*) [*ἄλλος*, other; *τοξικόν*, poison]. Any substance, produced by tissue metamorphosis within the organism, that tends to shield the body by destroying microbes or toxins that are inimical to it.

Allotriodontia (*al-ot-re-o-don'-she-ah*) [*ἀλλότριος*, strange; *ὀδούς*, tooth]. 1. The transplanting of teeth from one person to another. 2. The existence of teeth in abnormal situations, as in tumors.

Allotrioecrisis (*al-ot-re-o-ek'-ris-is*) [*ἀλλότριος*, strange; *ἐκκρισις*, excretion]. The discharge or elimination of foreign matters with the excretions.

Allotriogeusia (*al-ot-re-o-gu'-se-ah*). Same as *Allotrigeustia*.

Allotriogeustia (*al-ot-re-o-gūs'-te-ah*) [*ἀλλότριος*, strange; *γεῦσις*, taste]. Perversion of the sense of taste; abnormality of the appetite.

Allotriolithiasis (*al-ot-re-o-lith-i'-as-is*) [*ἀλλότριος*, strange; *λίθος*, a stone]. The formation or existence of a calculus of unusual material, or composed entirely or in part of a foreign body.

Allotriophagy (*al-ot-re-off'-a-je*) [*ἀλλότριος*, strange; *φαγεῖν*, to eat]. Depraved or unnatural appetite.

Allotriotexis (*al-ot-re-o-teks'-is*) [*ἀλλότριος*, strange; *τέξις*, birth]. 1. Abnormality in delivery. 2. The birth or delivery of a monstrosity.

Allotriuria (*al-ot-re-u'-re-ah*) [*ἀλλότριος*, strange; *οὖρον*, urine]. Abnormality of the urine.

Allotrope (*al'-o-trōp*) [*ἄλλος*, different; *τροπή*, a change]. One of the forms in which an element capable of assuming different forms may appear.

Allotrophic (*al-o-trof'-ik*) [*ἄλλος*, other; *τροφή*, nourishment]. Having perverted or modified characters as a nutrient.

Allotropism (*al-ot'-ro-pizm*) [*ἄλλος*, other; *τρόπος*, method]. 1. The term expresses the fact of certain elements existing in two or more conditions with differences of physical properties. Thus carbon illustrates allotropism by existing in the forms of charcoal, plumbago, and the diamond. See *Isomeric*. 2. Appearance in an unusual or abnormal form.

Allotropy (*al-ot'-ro-pe*). Allotropism.

Allotrylic (*al-o-tril'-ik*) [*ἀλλότριος*, foreign; *ὕλη*, principle]. Due to the presence of a foreign principle or material; enthetic. **A. Affections**, morbid states caused by the lodgment of foreign substances in the organism. The foreign substance may be animate or inanimate, organic or inorganic.

Alloxan (*al-oks'-an*) [*allantoin; oxalic*], $C_4H_2N_2O_4$. The ureïd of mesoxalic acid; it is produced by the careful oxidation of uric acid, or alloxantin with nitric acid or chlorin and bromin. It appears in long, shining, rhombic prisms, easily soluble in water, with a very acid reaction, and possessing a disagreeable taste. The solution placed on the skin slowly stains it a purple red. It occurs in the intestinal mucus in cases of diarrhea.

Alloxanic Acid (*al-oks-an'-ik*). See *Acid*.

Alloxantin (*al-oks-an'-tin*) [*allantoin; oxalic*], $C_8H_4N_4O_7 + {}_3H_2O$. A substance obtained by reducing alloxan with $SnCl_2$, zinc and HCl, or H_2S in the cold. It occurs in small, hard, colorless prisms that turn red in air containing ammonia. Its solution has an acid reaction.

Alloy (*al-oi'*) [from the French word *aloi*, a contraction of *a la loi*]. 1. A compound of two or more metals by fusion. See *Gold Plate* and *Gold Solder*. 2. The least valuable of two or more metals that are fused together.

Allozoöid (*al-o-zo'-oid*) [*ἄλλος*, other; *ζωοειδής*, like an animal]. In zoölogy, a zoöid differing from the organism producing it.

Allspice (*awl'-spīs*). See *Pimenta*, and *Florida Allspice*.

Allure (*al-ur'*). Synonym of *Influenza*.

Allyl (*al'-il*) [*ὕλη*, matter], C_3H_5. A non-saturated univalent alcohol-radical of the oils obtained from alliaceous plants. It does not exist in the free state. **A. Alcohol**, C_3H_5HO, a colorless inflammable liquid, with pungent odor, boiling at 97° C. **A. Aldehyd**, C_3H_4O, a syn. of *Acrolein*. **A. Cyanid**. See *Sinamin*. **A. Mustard Oil**, $CS.N.C_3H_5$, Allyl thiocarbimid. The principal constituent of ordinary mustard oil. It is a liquid not readily dissolved by water; boils at 150.7°; at 10°, it has a sp. gr. of 1.017; it has a pungent odor and vesicates the skin. **A. sulphid**, $(C_3H_5)_2S$, the essential oil of garlic. **A. thiocarbimid**. See *A. Mustard Oil*. **A. tribromid**, $C_3H_5Br_3$, a colorless liquid used as an antispasmodic. Dose, five drops. Unof.

Allylamin (*al-il'-am-in*) [*ὕλη*, matter; *ammonia*], $NH_2(C_3H_5)$. Ammonia in which a hydrogen atom is replaced by allyl. It is a sharply caustic mobile liquid.

Allylin (*al-il'-in*) [*ὕλη*, matter], $C_8H_{12}O_3$. Monoallyl ether, produced by heating glycerol with oxalic acid. It is a thick liquid, boiling at 225–240°.

Almeciga (*al-ma'-thig-ah*) [Sp.]. See *Elemi*.

Almen and Nylander's Test. See *Tests, Table of*.

Almen's Tests. See *Tests, Table of*.

Almond (*am'-und*) [M. E., *almonde*]. See *Amygdala*. **A. Bread**, a variety of bread made from almond flour, for use by diabetics. It is made as follows: Take of blanched sweet almonds a quarter of a pound. Beat them as fine as possible in a stone mortar, remove the sugar by putting in a linen bag and steeping for a quarter of an hour in boiling water acidulated with vinegar; mix this paste thoroughly with three ounces of butter and two eggs. Add the yolks of three eggs and a little salt, and stir well for some time. Whip up the whites of three eggs and stir in. Put the dough thus obtained into greased moulds and dry by a slow fire. **A. of the Ear**, the tonsil. **A. Mixture**. See *Amygdalæ Mistura*. **A. Oil**, oleum amygdalæ, the fixed oil obtained from both the sweet and the bitter almond. It is odorless, agreeable to the taste, and of a yellow color; sp. gr. .919 at 15° C. It is used in pharmacy and medicine and in soap-making. **A. Oil, Bitter**, Oleum amygdalæ amaræ. See *Amygdala*. **A. Paste**, a magma of bitter almonds, alcohol, white of egg and rose-water, used to soften the skin and prevent the hands and lips from chapping. **A. of the Throat**, the tonsil.

Alnuin (*al'-nu-in*) [Celtic, *al*, near; *lan*, a river-bank]. A precipitate from the tincture of *Alnus rubra*. Said to be alterative and resolvent. Dose gr. ii–x. Unof.

Alnus (*al'-nus*) [Celtic, *al*, near; *lan*, a river-bank]. Alder Bark. The bark of the American Alder. *A. serrulata*, contains tannic acid. The decoction of bark and leaves is astringent, and used as a gargle and as a lotion for wounds and ulcers. Dose of powdered bark gr. x.

Alochia (*ah-lo'-ke-ah*) [*ἀ* priv.; *λόχια*, the lochia]. Absence of the lochia.

Aloe (*al'-o*) [ἀλόη, the aloe]. The inspissated juice of several species of aloe, of which the *A. socotrina*, *A. barbadensis*, and *A. capensis* are most commonly used. Its properties are due to a glucosid, *aloïn*, $C_{17}H_{18}O_7$. A tonic astringent, useful in amenorrhea, chronic constipation, and atonic dyspepsia. It is also an emmenagogue and anthelmintic. Dose gr. j–v. **A. americana**. See *Agave*. **A. Decoct., Comp.** (B.P.). Dose gr. ss–ij. **A. Enema** (B.P.), aloes, carbonate of potassium; mucilage of starch. **A. et Asafœtida, Pil.**, aloes and asafetida āā gr. 1½. **A. et Canellæ, Pulv.**, contains powdered bark of Canella alba. Dose gr. v–xx. **A. et Ferri, Pil.**, contains gr. j each of aloes, ferrous sulphate, and aromatic powder, incorporated with confection of roses. **A. et Mastich, Pil.**, "Lady Webster's" pill, contains each aloes gr. ij, mastich and red rose gr. ss. **A. et Myrrh, Pil.**, contains each aloes gr. ij, myrrh, gr. j, aromatic powder gr. ss, mixed with syrup. **A. et Myrrh, Tinct.**, aloes 10, myrrh 10, alcohol 100 parts. Dose ʒss–ʒij. **A. Ext. Aquosum**, prepared by mixing 1 with 10 parts boiling water, straining and evaporating. Dose gr. ss–v. **A. Pil.**, aloes and soap āā gr. ij. **A. Purificata**, the common drug purified by solution in alcohol and evaporation. Dose gr. j–v. **A. Socotrin, Pil.** (B. P.), contains socotrin, aloes, hard soap, oil of nutmeg and confection of roses. Dose gr. v–x. **A. Tinct.**, consists of aloes 10, glycyrrhiza 10, dil. alcohol 100 parts. Dose ʒss–ʒij. **A. Vin.**, has aloes 6, cardamon 1, ginger 1, str. white wine 100 parts. Dose ʒj–ʒiv.

Aloedary (*al'-o-ed-a-re*) [ἀλοηδάριον, aloedarium]. A compound aloetic purgative medicine.

Aloeretin (*al-o-e-re'-tin*) [ἀλόη, aloes; ῥητίνη, resin]. A brown resin contained in aloes.

Aloes (*al'-oz*). See *Aloe*. **A. Caballine** [*caballus*, a horse]. Coarse aloes, used in veterinary medicine. **A. Hepatic**, dark liver-colored aloes, mostly Socotrine or Barbadian. **A. Lign.** See *Agallochum*.

Aloes-wood (*al'-oz-wood*). See *Agallochum*, and *Aquilaria*.

Aloetic (*al-o-et'-ik*) [ἀλόη, the aloe]. Containing or pertaining to aloes.

Aloetin (*al-o-e'-tin*) [ἀλόη, the aloe; ῥητίνη, resin]. 1. Aloeretin. 2. A yellow crystalline principle obtainable from aloes; aloeretic acid.

Alogia (*ah-lo'-je-ah*) [ἀ priv.; λόγος, word, reason]. 1. Inability to speak, due to some psychical defect. 2. Stupid or senseless behavior.

Alogotrophy (*al-o-got'-ro-fe*) [ἄλογος, strange, absurd; τροφή, nutrition]. Irregular and perverted nutrition, leading to deformity.

Aloin (*al'-o-in*) [ἀλόη, the aloe]. A bitter principle found in aloes. It forms fine needles, possesses a very bitter taste, and acts as a strong purgative. Several glucosids of this name are described; as *Barbaloin*, *Nataloin*, *Zanaloin*, *Socaloin*, *q. v.*

Alonette's Operation. See *Operations, Table of*.

Alonsenel (*al-on-sen-el'*) [Fr.]. A variety of the *Cowania mexicana*, a tall, rosaceous shrub of Mexico and the Rocky Mountain region. It is also called Cowan Plant and Cliff-rose. It is locally valued as a styptic and astringent. Unof.

Alopecia (*al-o-pe'-se-ah*) [ἀλώπηξ, a fox]. Baldness; Calvities; a term employed to designate the forms of baldness occurring in any disease as a symptom of the latter, or occurring as a purely local affection of the follicles in which the pilary filaments are lodged. It may be universal or partial, congenital or acquired, physiological or pathological, symmetrical or asymmetrical. It follows a large number of systemic affections. **A. adnata.** See *A., Congenital.* **A. areata**; Area celsi; Tinea decalvans; Porrigo decalvans; Alopecia circumscripta; that condition in which suddenly or slowly one or several, usually asymmetrically distributed, patches of baldness appear upon the hairy regions of the body, more often upon the scalp and parts covered by the beard. The patches vary in size from a pin-head to an involvement of the entire surface from the coalescing of many patches. The disease may be produced by traumatism of the head, nervous shock, neurasthenia, ringworm of the scalp and syphilis. **A. circumscripta.** See *A. areata.* **A., Congenital**, a rare form, seldom complete, due to absence of hair-bulbs. **A. furfuracea**; *Alopecia pityroides capillitii; Pityriasis capitis; Seborrhea capillitii; Pityriasis simplex; Dandruff;* a form of baldness associated with a disorder of the scalp marked by hyperemia, itching, and exfoliation of dry or fatty scales from its surface. It may be acute or chronic, and produce a dryness, brittleness, and lack of luster in the hair. **A. localis**; *A. neuritica;* that form occurring in one or more patches at the site of an injury, or in the course of a recognizable nerve. **A. neuritica.** See *A. localis.* **A. neurotica**, a name given to baldness of trophoneurotic origin. **A. orbicularis.** Same as *A. circumscripta.* **A. pityroides capillitii.** See *A. furfuracea.* **A. pityroides universalis**, a rapid and general denudation of hair occurring in debilitated states, preceded by abundant desquamation of fatty scales. The skin is rather firmer and stiffer than normal. **A. senilis**; Senile Calvities; that occurring in old age from atrophy and sclerosis of the scalp. **A. simplex**, the idiopathic premature baldness of young adults. Most common in males. Often associated with premature grayness. **A. syphilitica**, that due to syphilis. **A. universalis**, that in which there is a general falling out of the hairs of the body.

Alopecist (*al-o-pe'-sist*) [ἀλώπηξ, a fox]. One who makes a specialty of the treatment of baldness.

Alopecoid (*al-o-pe'-koid*) [ἀλώπηξ, a fox; εἶδος, form]. Resembling a fox; vulpine.

Alouchi (*al-oo'-chi*). See *Acuchi.*

Alouette's Amputation. See *Operations, Table of*.

Aloxanthin (*al-oks-an'-thin*), $C_{15}H_{10}O_6$. A yellow substance obtained from barbaloin and socaloin by the action of bichromate of potassium.

Alpestrine (*al-pes'-trin*) [*alpestris*, alpine]. Peculiar to mountain districts, as alpestrine diseases.

Alpha (*al'-fah*) [ἄλφα, the first letter of the alphabet]. The Greek letter *α*, used in combination with many chemical terms to indicate the first of a series. **A. Angle.** See *Angle.* **A.-dextrin.** Same as *Erythro-dextrin.* **A. Kava Resin.** See *Lewinin.* **A.-naphthol.** See *Naphthol.* **A.-naphthol Test.** See *Tests, Table of.* **A.-oxynaphthoic Acid.** See *Acid, Alpha-oxynaphthoic.*

Alphenic (*al-fen'-ik*) [Fr., *Alphénic*]. White barley sugar.

Alphonsin (*al-fon'-sin*). See *Alfonsin.*

Alphos (*al'-fos*) [ἀλφός, vitiligo]. 1. An old name for leprosy. 2. Psoriasis. 3. A term vaguely applied to various skin diseases. See *Psoriasis.*

Alphosis (*al-fo'-sis*) [ἀλφός, vitiligo]. Albinism; leucoderma.

Alpinia (*al-pin'-e-ah*) [*Alpinus*, Italian botanist of the sixteenth century]. A genus of zingiberaceous tropical plants. *A. officinarum*, *A. chinensis*, and other species furnish Galangal, *q.v.* Still other species are medicinal. Unof.

Alsace Gum (*al-sās' gum*). See *Dextrin.*

Alstonidin (*al-ston′-id-in*) [*Alston*, a Scotch botanist]. An amorphous substance contained in a variety of Dita bark.

Alstonin (*al′-sto-nin*) [*Alston*, a Scotch botanist]. 1. An amorphous substance contained in a variety of Dita bark. 2. A crystalline alkaloid, $C_{21}H_{20}N_2O_4$, obtained from *Alstonia Constricta*.

Alter (*awl′-ter*) [L., "other"]. To castrate, or spay.

Alterant (*awl′-ter-ant*). Same as *Alterative*.

Alteration (*awl-ter-a′-shun*) [*alterare*, to make other]. A change, as of form. **A. Theory.** See *Difference Theory*.

Alterative (*awl′-ter-a-tiv*) [*alter*, another]. A medicine that alters the processes of nutrition and excretion, restoring, in some unknown way, and without sensible evacuation, the normal functions of an organ or of the system. It seems to be a necessary or convenient term covering our ignorance of the *modus operandi* of certain medicines, as mercury, iodin, *etc.* **A., Compound,** a domestic remedy consisting of bamboo, brier-root, stillingia, burdock-root, and poke-root, āā fld. ext. ℥iij, prickly-ash bark fld. ext. ℥j. Recommended by Sims in scrofulous affections. Dose ℥j–ij.

Alternate (*awl′-ter-nāt*) [*alternare*, to do by turns]. In botany, applied to that form of leaf-arrangement in which only one leaf occurs at a node. **A. Generation.** See *Alternation of Generations*.

Alternating (*awl′-ter-nāt-ing*) [*alternare*, to do by turns]. Occurring successively. **A. Insanity,** a form of insanity in which there are regular cycles of exaltation and depression.

Alternation (*awl-ter-na′-shun*) [*alternare*, to do by turns]. Repeated transition from one state to another. **A. of Generations.** 1. In biology, a generative cycle in which the young do not resemble the parent, but like forms are separated by one or more unlike generations. 2. That form of reproduction in which some of the members of the cycle can produce new beings non-sexually, while in the final stage reproduction is always sexual. Tenia or tapeworm, is an example. The segments, *Proglottides*, are hermaphrodite, and are evacuated with the feces. From the egg, fertilized after it is shed, is developed the embryo, that is swallowed by another animal, in whose tissues it forms an encysted stage (*Cysticercus*, *Cœnurus*, or *Echinococcus*). To undergo further development the cysticercus must find another host, where it forms new segments.

Althaus's Oil. A modification of Lang's Oil. It is made as follows: Metallic mercury 1 part, pure lanolin 4 parts, 2 per cent. carbolic oil 5 parts. It forms a homogeneous gray cream that has no tendency to decomposition. It is used in the treatment of syphilis in injections of ♏v at a dose.

Althea or **Althæa** (*al-the′-ah*) [L.]. Marsh-mallow. The peeled root of *A. officinalis*, a plant of the mallow family. It consists of about one-third of vegetable mucus and starch, together with the alkaloids *Asparagin* and *Althein* (latterly regarded as identical). Its decoction is employed as a mucilaginous drink. **A. syrupi** contains four per cent. althea. Dose indefinite. *Asparagin* possesses sedative and diuretic properties, and is useful in ascites and gout. Dose gr. ij–iij.

Althein (*al-the′-in*). See *Althea*.

Alticomous (*al-tik′-o-mus*) [*altus*, high; *coma*, head of hair, foliage]. In biology, leafy at or near the summit only.

Altitude (*al′-te-tūd*) [*altitudo*, height]. The height, as of an individual. In climatology, the elevation of a place above the sea-level. **A.-staff,** a device employed for measuring the exact height of recruits. It consists of a rigid upright with a vertex-bar moving without play at right angles to the upright.

Altricious (*al-trish′-us*) [*altrix*, a nurse]. Requiring a long nursing; hence, slow of development (the reverse of precocious).

Aluchi (*al-oo′-chi*). See *Acuchi*.

Aludel (*al′-u-del*) [Arab., *al*, the; *uthāl*, utensil]. In chemistry, a pear-shaped glass or earthen vessel used in sublimation.

Alum (*al′-um*) [*alumen*, alum]. Any one of a class of double sulphates formed by the union of one of the sulphates of certain non-alkaline metals with a sulphate of some alkaline metal. The standard (or common commercial) alum, the official *Alumen*, U. S. P., is the aluminium-potassium sulphate, $Al_2(SO_4)_3 + K_2SO_4 + 24H_2O$. It is a powerful astringent and styptic in medicine, and is extensively used in the arts. It is employed by bakers to whiten their bread, but the effect upon the system is probably injurious. Ordinary **A. Ammoniæ** is the same as the above, except that the potassium is replaced by ammonium. It is official in Great Britain, and is extensively used on account of its cheapness. What is known as *concentrated* or *patent* alum, is the normal aluminium sulphate (*aluminii sulphas*) which is not a true alum. **A. Ammonio-ferric** (*Ferri et Ammonii sulphas*), U. S. P., is strongly styptic, and is useful in leucorrhea. Dose gr. v–x. **A. Potassio-ferric** is extremely similar to the A. ammonio-ferric. (For **A. Rubidium,** see *Rubidium*). **A. Sodæ,** double sulphate of sodium and aluminium, is too soluble for ordinary uses. The other alums are very numerous, but they are of little interest to the physician. **A. Whey,** a preparation obtained by boiling ℥ij of alum in a pint of milk, and straining. It is used as an astringent and internal hemostatic, in wineglassful doses.

Alumen (*al-u′-men*) [L., *gen.*, *Aluminis*]. See *Alum*. **A. exsiccatum,** burnt or dehydrated alum.

Alumina (*al-u′-min-ah*) [L.]. Sesquioxid of aluminium; the principal ingredient of clay, and of many stones, earths and minerals.

Aluminate (*al-u′-min-āt*) [*alumina*]. A basic salt of alumina.

Aluminated Copper. See *Lapis divinus*.

Aluminiferous (*al-u-min-if′-er-us*) [*alumen*, alum; *ferre*, to form]. Yielding alum.

Aluminium (*al-u-min′-e-um*) [L.]. Al = 27. Quantivalence II, IV. A silver white metal distinguished by its low sp. gr., about 2.6. **A. hydrate,** $Al_2(HO)_6$, a tasteless white powder, feebly astringent. Dose gr. iij–xx. **A. and Potassium sulphate,** $K_2Al_2(SO_4)_4$ (*Alum*, *q. v.*), a valuable astringent used in catarrh, leucorrhea, gonorrhea. Dose gr. x–xx. In teaspoonful doses, an emetic. **A. sulphate,** $Al_2(SO_4)_3$, an antiseptic and astringent used as a lotion in 5 per cent. solution. **A. acetate,** unof.; a disinfectant. **A. acetotartrate,** unof.; a disinfectant.

Aluminosis (*al-u-min-o′-sis*) [*aluminium*]. A pulmonary disease common among workers in aluminium; the dust collects within the lung tissue.

Alumnol (*al-um′-nol*) [*aluminium*]. An astringent and antiseptic "sulphur combination of aluminium." Useful in gonorrhea, endometritis, ear, nose and skin diseases, *etc.* Used in the main externally. Unof.

Alum Root. The root of *Heuchera americana*. Properties due to gallic and tannic acids. It is very astringent. Dose of the fld. ext. gtt. x–xx. Also the root of *Geranium maculatum*, a mild and safe astringent. See *Geranium*. Unof.

Alusia (*al-u′-ze-ah*) [*ἀλύειν*, to wander]. Hallucination; morbid state of mind.

Alutaceous (*al-u-ta'-she-us*) [*aluta*, soft leather]. In botany, of a pale brown color, like untanned leather.

Alvearium (*al-ve-a'-re-um*) [L.]. The external auditory canal or meatus.

Alveloz (*al-vel-oth'*) [Sp.]. An extractive from *Euphorbia icterodoxa*, having diuretic properties. It is highly recommended as a topical application in cancer. Unof.

Alveolar (*al-ve'-o-lar*) [*alveolus*, a small hollow]. Pertaining to the alveoli or sockets of the teeth. **A. Abscess**, a gum-boil. **A. Arch**, the alveolar surface of the jaw. **A. Artery**, a branch of the internal maxillary. **A. Border**, the face margin of the jaws. **A. Cancer.** See *Cancer*. **A. Index**, in craniometry, the gnathic index; the ratio of the distance between the basion and alveolar point, to the distance between the basion and the nasal point, multiplied by 100. (Sometimes the basilar index is called the alveolar index.) See *Index* and *Craniometrical Points*. **A. Point.** See *Craniometrical Points*. **A. Process**, the border of the superior maxilla in which the alveoli are placed. **A. Sarcoma.** See *Sarcoma*.

Alveolarium (*al-ve-o-la'-re-um*) [*alveus*, a bee-hive]. A name sometimes applied to the external *meatus* of the ear. It is so called because the wax of the ear gathers in that place.

Alveolate (*al-ve'-o-lāt*, or *al'-ve-o-lāt*) [*alveolatus*, hollowed out like a little tray]. In biology, pitted, honeycombed.

Alveoli (*al-ve'-o-li*). Genitive and plural of *Alveolus*.

Alveolitis (*al-ve-o-li'-tis*) [*alveolus*, a hollow; *ιτις*, inflammation]. Inflammation of the alveolus of a tooth.

Alveolo-condylean (*al-ve'-o-lo-kon-dil'-e-an*) [*alveolus*, a hollow; *κόνδυλος*, a knuckle]. In craniometry, pertaining to the alveolus and condyle. **A. Plane.** See *Plane*.

Alveolo-dental (*al-ve'-o-lo-den'-tal*) [*alveolus*, a hollow; *dens, dentis*, a tooth]. Pertaining to the teeth and their sockets.

Alveolo-labialis (*al-ve'-o-lo-lab-e-a'-lis*) [*alveolus*, a hollow; *labium*, the lip]. The buccinator muscle.

Alveolo-subnasal (*al-ve'-o-lo-sub-na'-sal*) [*alveolus*, a hollow; *sub*, under; *nasus*, nose]. In biology, pertaining to the alveolar and subnasal points of the skull. **A. Prognathism.** See *Prognathism*.

Alveolus (*al-ve'-o-lus*) [L.; *pl.*, *Alveoli*]. The bony socket of a tooth. **A. of Glands**, the ultimate sacs of a racemose gland. **A. of the Lungs**, are the air cells. **A. of the Stomach**, or the *alveolar structures*, are depressions, like honeycomb cells, found in the stomach, intestines and esophagus.

Alvergnat's Pump. An instrument used in estimating the gaseous constituents of the blood.

Alveus (*al'-ve-us*) [*alveus*, a trough]. A trough, tube, or canal; applied to ducts and vessels of the body. **A. communis**, the utricle of the ear. **A. hippocampi**, a certain structure in the cerebral hemisphere investing the convexity of the hippocampus major.

Alviduca (*al-ve-du'-ka*) [*alvus*, the belly; *ducere* to lead]. Laxative or cathartic medicines.

Alvifluxus (*al-ve-fluks'-us*) [*alvus*, the belly; *fluxus*, a flow]. A free alvine discharge; a diarrhea. **A. Torminosus.** A synonym of *Dysentery*.

Alvine (*al'-vin* or *-vin*) [*alvinus; alvus*, belly]. Pertaining to the belly. **A. Concretion**, an intestinal calculus. **A. Dejections**, the feces. **A. Discharges**, the feces. **A. Obstruction.** Synonym of *Constipation*.

Alvus (*al'-vus*) [L.]. The belly, or its contained viscera.

Alymphia (*ah-limf'-e-ah*) [*ἀ* priv.; *lympha*, clear water]. A deficiency of lymph.

Alysm, or Alysmus (*al'-izm*, or *al-iz'-mus*) [*ἀλυσμός*, a wandering]. Disquietude; restlessness; mental disquiet; sadness; anxiety.

Amadelphous (*am-ad-el'-fus*) [*ἅμα*, together; *ἀδελφός*, brother]. In zoölogy, gregarious.

Amadou (*am'-a-doo*) [Fr., *amadouer*, to coax]. German tinder or touchwood; *Boletus igniarius*, a fungus found on old tree-trunks, used to stanch local hemorrhage, as a dressing of wounds, *etc.*

Amalgam (*am-al'-gam*) [*μάλαγμα*, a soft mass]. A combination of mercury with any other metal. See *Copper Amalgam*. **A. Carrier and Plugger**, an instrument designed for carrying and introducing amalgam into the cavity of a tooth. **A. Manipulator**, an instrument used by dentists for preparing amalgam fillings.

Amalgamation (*am-al-gam-a'-shun*) [*μάλαγμα*, a soft mass]. In metallurgy, the process of combining mercury with some other metal, as practiced in separating silver and gold from some other ores.

Amalic Acid (*am-al'-ik*). See *Acid*.

Amandin (*am-an'-din*) [Fr., *amande*, almond]. A proteid contained in sweet almonds.

Amandine (*am-an'-din*) [Fr., *amande*, almond]. A kind of cold cream or almond paste.

Amanitin (*am-an'-it-in*) [*ἀμανῖται*, a kind of fungus]. 1. A principle identical with cholin, obtained from the fly agaric. 2. A poisonous glucosid obtainable from various species of agaric.

Amara (*am-a'-ra*) [*amarus*, bitter]. Bitters.

Amaranthus spinosus (*am-ar-an'-thus spi-no'-sus*) [L.]. The fresh root of the shrub is used in India as a specific in gonorrhea. An emollient and diuretic. Dose indefinite. Unof.

Amarin (*am-a'-rin*) [*amarus*, bitter], $C_{21}H_{18}N_2$. Triphenyl dihydroglyoxalin, results from boiling hydrobenzamid with caustic potash. It crystallizes from alcohol and ether in prisms, melting at 113°. It exerts a poisonous effect on animals.

Amarone (*am-ar-ōn'*) [*amarus*, bitter], $C_{16}H_{11}N$. A crystalline substance produced by the dry distillation of hydrobenzamid and other substances.

Amarthritis (*am-ar-thri'-tis*) [*ἅμα*, together; *ἄρθρον*, a joint; *ιτις*, inflammation]. Arthritis affecting many, or several joints at once.

Amasesis (*ah-mas-e'-sis*) [*ἀ* priv.; *μάσησις*, chewing]. Inability to chew the food.

Amassette (*am-as-et'*) [Fr.]. A kind of spatula, often of horn, used in color-grinding and in pharmacy.

Amasthenic (*am-as-then'-ik*) [*ἅμα*, together; *σθένος*, strength]. Uniting the chemical ray of light in a focus, as a lens.

Amastia (*ah-mas'-te-ah*) [*ἀ* priv.; *μαστός*, breast]. The condition of being without mammæ or nipples.

Amativeness (*am'-at-iv-nes*) [*amare*, to love]. The sexual passion.

Amatory (*am'-at-o-re*) [*amator*, a lover]. Pertaining to love. **A. Fever**, love-sickness; chlorosis. **A. Muscles**, the oblique muscles of the eye, used in ogling.

Amaurosis (*am-aw-ro'-sis*) [*ἀμαυρόειν*, to darken]. A term that, from its vagueness, is happily becoming disused, signifying partial or total loss of vision. When partial, the word *amblyopia* is now used; when complete, *blindness*. The word is still sometimes used to express blindness when the cause is unknown or doubtful. **A., Albuminuric**, that due to renal disease. **A., Cerebral**, that due to lesion of the brain. **A., Congenital**, that form existing from birth. **A., Diabetic**, that associated with diabetes. **A., Hysteric**, that associated with hysteria, usually in the female. **A., Reflex**, that resulting from

a reflex action upon the optic nerve following some remote source of irritation. **A. Saburral**, sudden temporary blindness occurring in an attack of acute gastritis. **A. Uremic**, that due to an acute attack, or an exacerbation of a chronic form of nephritis.

Amaurotic (*am-aw-rot'-ik*) [ἀμαυρόειν, to darken]. Relating to, or affected with amaurosis. **A. Cats-eye**, a light-reflex through the pupil in suppurative choroiditis.

Amaxophobia (*am-aks-o-fo'-be-ah*) [ἅμαξα, a car; φόβος, fear]. Morbid dread of being in, or riding upon, a car or wagon.

Amazia (*ah-ma'-ze-ah*) [ἀ priv.; μαζός, the breast]. Congenital absence of the mammary gland. See *Amastia*.

Amber (*am'-ber*). See *Succinum*.

Ambergris (*am'-ber-gris*) [*amber*; Fr. *gris*, gray]. A substance excreted by the sperm whale, *Physeter macrocephalus*. It is not known whether it is a pathological product or not. It exhales a fragrant, musky odor when warmed, and is used in adynamic fevers, chronic catarrh, and nervous diseases. Dose, gr. j–iij. Unof. See *Ambrein*.

Ambidexter (*am-be-deks'-ter*) [*ambo*, both; *dexter*, the right hand]. An ambidextrous person.

Ambidextrous (*am-be-deks'-trus*) [*ambo*, both; *dexter*, the right hand]. Able to use both hands equally well.

Ambigenous (*am-bij'-en-us*) [*ambi*, both; *genus*, *born*]. In biology, having a perianth with parts resembling sepals and petals.

Ambiparous (*am-bip'-ar-us*) [*ambi*, on both sides; *parere*, to produce]. In biology, producing both kinds; as a bud that produces both leaves and flower.

Ambloma (*am-blo'-mah*) [ἀμβλωμα, an abortion: *pl.*, *Amblomata*]. An amblosis or abortion: an aborted fetus.

Amblosis (*am-blo'-sis*) [ἀμβλωσις, an abortion]. An abortion.

Amblothridium (*am-blo-thrid'-e-um*) [ἀμβλωθρίδιον, an aborted fetus: *pl.*, *Amblothridia*]. 1. An aborted fetus. 2. An abortifacient drug or agent.

Amblotic (*am-blot'-ik*) [ἀμβλώτικος. See *Amblosis*]. Abortifacient.

Amblyaphia (*am-ble-a'-fe-ah*) [ἀμβλύς, dull; ἁφή, touch]. Dulness of the sense of touch.

Amblyocarpous (*am-ble-o-kar'-pus*) [ἀμβλύς, blunt, dulled; καρπός, fruit]. In botany, possessing abortive seeds.

Amblyopia (*am-ble-o'-pe-ah*) [ἀμβλύς, dulled; ὤψ, eye]. Subnormal acuteness of vision, due neither to dioptric abnormalism nor to visible organic lesion. It may be *congenital*; from the use of *tobacco* (*A. nicotinica*), or *alcohol*, or other *toxic* influences; from *traumatism*; or it may be *hysterical*. *Nyctalopia* or day-blindness, and *hemeralopia* or night-blindness, are other forms; it may arise from *entoptic phenomena*, such as *muscæ volitantes*, *micropsia*, *megalopsia*, *metamorphopsia*, *etc.* It may take the form of *contracted fields of vision*, of *color-blindness*, or *anesthesia of the retina*. **A. exanopsia**, amblyopia from disuse, or from non-use: argamblyopia is a preferable term. **A. post-marital**, A. due to sexual excess, called *Burns's Amaurosis*.

Amblyopiatrics (*am-ble-o-pe-at'-riks*) [*amblyopia*; ἰατρικός, belonging to medicine]. The therapeutics of amblyopia.

Ambolic (*am-bol'-ik*) [ἀμβολή, a putting off]. Causing abortion; abortifacient.

Ambon (*am'-bon*) [ἄμβων, the lip of a cup]. The fibrocartilaginous ring that surrounds a socket in which the head of a large bone is received, such as the acetabulum, or the glenoid cavity.

Ambos (*am'-bos*) [Ger.]. The incus, or anvil bone.

Ambosexous (*am-bo-seks'-us*) [*ambo*, both; *sexus*, sex]. Hermaphroditic.

Amboyna Button (*am-boi'-nah but'-un*). See *Frambesia*.

Ambra Grisea (*am'-brah gris'-e-ah*). Synonym of *Ambergris*.

Ambrein (*am'-bre-in*) [Fr., *Ambre*]. A substance much resembling cholesterin; it is obtained from ambergris by digestion in hot alcohol.

Ambrette (*am-bret'*) [Fr]. The seed of *Abelmoschus moschatus*, *q. v.*; musk-seed. Used in perfumery, and formerly prescribed as a substitute for musk. Unof.

Ambrosia (*am-bro'-zhe-ah*) [ἀμβροσία, the food of the gods]. A genus of coarse composite-flowered herbs. *A. artemisiæfolia*, common hog-weed of North America; is stimulant, tonic, antiperiodic, and astringent. *A. trifida*, of the United States, has similar properties. The pollen of these plants is by some regarded as a cause of hay-fever. Unof.

Ambulacral (*am-bu-la'-kral*) [*ambulacrum*, a walk, alley]. In biology, related to an ambulacrum.

Ambulacrum (*am-bu-la'-krum*) [*ambulacrum*, a walk, alley: *pl.*, *Ambulacra*]. In biology, one of the radiating series of perforations in the shell of an echinoderm.

Ambulance (*am'-bu-lans*) [*ambulare*, to walk about]. In Europe the term is applied to the surgical staff and arrangements of an army in service. In the United States the word is restricted to a vehicle for the transference of the sick or wounded from one place to another.

Ambulatory (*am'-bu-lat-o-re*) [*ambulare*, to walk about]. Relating to walking. **A. Blister**, a blister that changes its location. **A. Clinic**, a clinic for patients that can walk. **A. Erysipelas**, erysipelas that shifts from place to place. **A. Tumor**, a pseudo-tumor. **A. Typhoid**, walking typhoid; enteric fever in which the patient does not, or will not take to his bed.

Ambulo (*am'-bu-lo*) [*ambulare*, to walk about]. A pseudo-tumor of the abdomen; a painful and shifting abdominal distention due to flatulence.

Ambury (*am'-ber-e*). See *Anbury*.

Ambustion (*am-bus'-chun*) [*ambustio*, a burn]. A burn or scald.

Ameba or **Amœba** (*am-e'-bah*) [ἀμοιβή, a change]. A colorless, single-celled, jelly-like protoplasmic organism found in sea and fresh waters, constantly undergoing changes of form, and nourishing itself by surrounding objects. The white corpuscles of the blood perform *ameboid movements*, *i.e.*, changes of form, consisting of protrusions and withdrawals of substance. *A. buccalis* and *A. dentalis* (perhaps identical species) have been found upon human teeth. *A. coli*, ameba of dysentery. *A. uro-genitalis*, has been observed in urine and in vaginal secretions.

Ameban (*am-e'-ban*) [ἀμοιβή, a change]. 1. Of the nature of or pertaining to an ameba. 2. Any organism that may be classed as an ameba.

Amebic (*am-e'-bik*) [ἀμοίβή, a change]. Pertaining to or characterized by amebæ.

Amebicidal (*am-e-bis-i'-dal*). See *Amebicide*.

Amebicide (*am-e'-bis-id*) [ἀμοιβή, a change; *cædere*, to kill]. 1. Destructive of amebæ. 2. A remedy that destroys amebæ.

Amebodont (*am-e'-bo-dont*) [ἀμοιβή, change; ὀδοντ, a tooth]. In biology, pertaining to molar teeth in which the ridges or crests are alternate; the opposite of antiodont.

Ameboid (*am-e'-boid*) [ἀμοιβή, a change]. Resembling an ameba in form or in changes; used of white blood-cells, *etc.*

Amel (*am'-el*) [Anglo-French, *amal*, enamel]. An old name for *Enamel.*

Amelectic (*am-el-ek'-tik*). Affected with ameleia; apathetic.

Ameleia (*am-el-i'-ah*) [ἀμέλεια, indifference]. Morbid apathy; indifference.

Amelia (*ah-me'-le-ah*) [ἀ priv.; μέλος, a limb]. Absence of the limbs from arrested development, or atrophy.

Amelification (*am-el-if-ik-a'-shun*) [M. E., *amell; facere*, to make]. The formation of the enamel of the teeth by means of the enamel cells—ameloblasts.

Amelioration (*am-el-yo-ra'-shun*) [*ad*, to; *melior*, better]. Improvement or amendment, as in symptoms.

Ameliorative (*am-el'-yo-ra-tiv*) [*ad*, to; *melior*, better]. Tending to produce an amendment of symptoms.

Ameloblast (*am-el'-o-blast*) [Anglo-French, *amal*, enamel; βλαστός, a germ]. In biology, an enamel-cell, one of the cylinder cells covering the papilla of the enamel organ, and forming a beautifully regular epithelial layer that produces the enamel, the *Membrana adamantina* of Raschkow.

Amelus (*am'-el-us*) [ἀ priv.; μέλος, a limb]. A monstrosity without limbs.

Amendment (*am-end'-ment*) [M. E., amendement]. Improvement or recovery of health, more or less complete.

Amenia (*ah-me'-ne-ah*). See *Amenorrhea.*

Amenomania (*am-en-o-ma'-ne-ah*) [*amœnus*, agreeable; μανία, madness]. A mild form of mania in which the symptoms are manifested under the form of gayety, fondness of dress, exaggeration of social condition, *etc.*; a cheerful, or joyous delirium; a morbid elevation of the spirits.

Amenorrhea (*ah-men-o-re'-ah*) [ἀ priv.; μήν, month; ῥέειν, to flow]. Absence, irregularity, or suppression of menstruation when it should normally be present. The secretion may be *retained*, the result of congenital or acquired atresia of some part of the lower genital tract; or it may not take place in consequence of an imperfect development of the ovaries or uterus; or it may be *suppressed* because of some form of constitutional disease, especially anemia. **Primitive**, is a term applied to those cases in which the catamenia have not appeared at the proper time, and **Secondary**, to those in which the discharge has been arrested after it has existed during the reproductive period of life.

menorrheal (*ah-men-o-re'-al*) [ἀ priv.; μήν, month; ῥέειν, to flow]. Pertaining to amenorrhea.

ment (*a'-ment*) [*ab*, from; *mens, mentis*, the mind]. A person affected with amentia; an idiot.

ment or Amentum (*am'-ent, am-ent'-um*) [*amentum*, a strap or thong]. In biology, a scaly spike or catkin.

mentaceous (*am-en-ta'-she-us*) [*amentum*, a strap or thong]. In biology, related in some way to an ament.

mentia (*ah-men'-she-ah*) [ἀ priv.; *mens*, mind]. Defective intellect; a vague term synonymous with idiocy or imbecility.

mentum (*am-ent'-um*). See *Ament.*

menty (*ah-men'-te*) [ἀ priv.; *mens*, mind]. Amentia.

merican (*am-er'-ik-an*) [*America*]. Peculiar, or belonging, to America. **A. Aloe.** See *Agave americana.* **A. Catarrh**, a synonym for chronic post-nasal catarrh. **A. Centaury**, the herb *Sabbatia angularis*, employed as a substitute for gentian. **A. Columbo**, the root of *Frasera carolinensis.* Tonic, aperient; in large doses, purgative. Dose of the fld. ext. ♏xx–℥j. *Fraserin*, a concentrated extract. Dose gr. j–iij. Unof. **A. Hellebore.** See *Veratrum viride.* **A. Ipecac.** See *Gillenia.* **A. Ivy**, the twigs and bark of *Ampelopsis quinquefolia.* Alterative, tonic, astringent, and expectorant. Dose of the fld. ext. ♏xxx–℥j. *Ampelopsin*, the concentrated ext. Dose gr. ij–iv. Unof. **A. Saffron.** See *Carthamus.* **A. Senna.** See *Senna.* **A. Spikenard**, the rhizome of *Aralia racemosa.* Aromatic, diuretic and alterative. Used in rheumatism, dropsy, and scrofulous affections. Dose of the decoction indefinite. Unof. **A. Swiss Food**, a variety of infant milk food with the following composition: Water 5.68, fat 6.81, grape-sugar and milk-sugar 5.78, cane-sugar 36.43, starch 30.85, soluble carbohydrates 45.35, albuminoids 10.54, ash 1.21. **A. Valerian.** See *Cypripedium.* **A. Wormseed.** See *Chenopodium.*

Amertume (*am-ar-tūm'*) [Fr.]. A disease of wine, characterized by bitterness, and caused by a specific bacillus.

Ametabolic (*ah-met-ab-ol'-ik*) [ἀ priv.; μεταβόλος, changeable]. Not due to, or causing, or undergoing, metabolism.

Ametria (*ah-met'-re-ah*) [ἀ priv.; μήτρα, womb]. Absence of the uterus.

Ametrometer (*ah-met-rom'-et-er*) [ἀ priv.; μέτρον, a measure; ὄψις, sight]. An instrument for measuring ametropia.

Ametropia (*ah-met-ro'-pe-ah*) [ἀ priv.; μέτρον, a measure; ὄψις, sight]. Ametropia exists when an imperfect image is formed upon the retina, due to defective refractive power of the media, or to abnormalities of form of the eye. In *myopia* the antero-posterior diameter is too great, or the power of the refractive media is too great; *hypermetropia* (or *hyperopia*) is the exact reverse of the last; *astigmatism* is due to imperfect curvature of the cornea, or of the retina, or to inequality of refracting power in different parts of the lens; *presbyopia* is due to inelasticity of the lens, producing insufficient accommodation; *aphakia*, or absence of the lens, produces both insufficient refracting power and loss of accommodation.

Ametropic (*ah-met-rop'-ik*) [ἀ priv.; μέτρον, a measure; ὄψις, sight]. Affected with or pertaining to ametropia.

Amianthium (*am-e-an'-the-um*) [ἀμίαντος, unspotted; ἄνθος, flower]. A genus of liliaceous or melanthaceous plants. *A. muscæ toxicum* ("fly poison"), a handsome flowering plant of the United States; has properties not unlike those of veratrum. Unof.

Amiantus (*am-e-an'-tus*), or **Amianthus** (*am-e-an'-thus*). See *Asbestos.*

Amic (*am'-ik*) [*ammonia*]. Pertaining to an amin, or having the nature of an amin.

Amici Prism (*am-e'-chē prism*). See *Prism.*

Amicrobic (*ah-mi-kro'-bik*) [ἀ priv.; *microbion*, microbe]. Not due to, or associated with, microbes.

Amid (*am'-id*) [*ammonia*]. A chemical compound produced by the substitution of an acid radical for one or more of the hydrogen atoms of ammonia. The amids are primary, secondary, or tertiary, according as one, two, or three hydrogen atoms have been so replaced. They are white crystalline solids, often capable of combining with both acids and bases. **A. Bases.** See *Amins, Primary.*

Amidin (*am'-id-in*) [Fr., *amidon*, starch]. Starch altered by heat into a horny, transparent mass; soluble starch; that part of starch which is soluble in water.

Amidins (*am'-id-inz*) [*ammonia*]. Mono-acid bases produced from the nitrites by heating with ammonium chlorid. In the free condition they are quite unstable. They contain the group $C.NH.NH_2$.

Amido-acetic Acid (*am'-id-o-as-e'-tik as'-id*). See *Glycocoll* and *Glycin.*

Amido-acid (*am'-id-o-as'-id*) [*ammonia; acetum*, vinegar]. An acid containing the amido-group, NH_2.

Amidogen (*am-id'-o-jen*) [*amid; γεννᾶν*, to produce]. The hypothetical radical, NH_2, regarded as an essential part of all amids. See *Amid.*

Amido-glycerol (*am'-id-o-glis'-er-ol*). See *Serin.*

Amido-kephalin (*am'-id-o-kef'-al-in*) [*amid; κεφαλή*, the head]. One of the modifications of kephalin found in the brain tissue. The name is sometimes extended to other similar principles, the amidokephalins.

Amido-lipotide (*am'-id-o-lip'-o-tid*). Any one of a very peculiar group of nitrogenous fats said to exist in the brain.

Amidomyelin (*am'-id-o-mi'el-in*) [*amid; μυελός*, marrow], $C_{44}H_{92}N_2PO_{10}$. A dipolar alkaloid or basic principle, derivable from brain tissue. It gives name to a group of similar bodies, the amidomyelins.

Amidoplast (*am'-id-o-plast*) [*ἄμυλον*, starch; *πλάσσειν*, to form]. In biology, a name proposed by Errera for leukoplastids. Proteid granules whose functions it is to form starch grains.

Amido-succinamic Acid (*am'-id-o-suk-sin-am'-ik as'-id*). Same as *Asparagin.*

Amidoxim, or Amidoxime (*am-id-oks'-im*). See *Oxamidin.*

Amidulin (*am-id'-u-lin*) [Fr., *amidon*, starch]. Soluble starch; prepared by the action of H_2SO_4 on starch, thus removing the starch-cellulose.

Amimia (*ah-mim'-e-ah*) [*ἀ* priv.; *μῖμος*, a mimic]. An aphasic symptom consisting in loss of the power of imitation or of pantomime speech. **A. Musical,** pathological loss of the power of playing musical instruments.

Amin (*am'-in*) [*ammonia*]. The *Amins* are chemical compounds produced by the substitution of a basic atom or radical for one or more of the hydrogen atoms of ammonia; or basic derivatives of carbon, containing nitrogen and viewed as ammonia derivatives. In deportment they bear some similarity to ammonia. The lower members are gases with ammoniacal odor and are readily soluble in water; they differ from ammonia in their combustibility. The highest members are liquids soluble in water, only the highest are sparingly soluble. They are called *Monamins, Diamins, Triamins, etc.*, according to the number of amidogen molecules, NH_2, substituted for H. **A. Colors.** Same as *Anilin Colors, q. v.* **A. Primary,** an amin in which one hydrogen atom is replaced by a monovalent alkyl. **A. Secondary,** an amin in which two hydrogen atoms are replaced by monovalent alkyls. **A. Tertiary,** an amin in which three hydrogen atoms are replaced by monovalent alkyls.

Aminol (*am'-in-ol*) [*amin*]. A gaseous substance derived from the methylamin of herring-brine mixed with milk of lime. This gas is cheap and powerfully disinfectant, and it has been used in the purification of sewage.

Amins Process. See *Sewerage, Disposal of.*

Amitosis (*ah-mit-o'-sis*) [*ἀ* priv.; *mitosis*, indirect cell-division, karyokinesis; *μίτος*, a thread; *osis*]. Cell multiplication by direct division, or simple cleavage, the nucleus usually assuming an hour-glass shape and dividing before the protoplasm. The opposite of *mitosis.*

Amitotic (*ah-mit-ot'-ik*) [*ἀ* priv.; *μίτος*, thread]. Of the nature of, or characterized by, amitosis. **A. Cell Division,** direct nuclear subdivision, as distinguished from karyokinesis.

Amixia (*ah-miks'-e-ah*) [*ἀ* priv.; *μῖξις*, mixing]. In biology, the formation of a new species without the mingling of two individuals or their germs; asexual reproduction, parthenogenesis.

Amma (*am'-ah*) [*ἄμμα*, a tie: *pl., Ammata*]. A truss or girdle for hernia.

Ammelid (*am'-el-id*) [*Ammonia; melamid*], $C_3H_4N_4O_2$. A substance produced by boiling melamin with alkalies or acids; it is a white powder that forms salts with both acids and bases.

Ammelin (*am'-el-in*) [*Ammonia; melam*], $C_3H_5N_5O$. A white powder, insoluble in water, soluble in alkalies and mineral acids. Produced by boiling melamin with alkalies and acids.

Ammeter (*am'-et-er*) [*ampere; μέτρον*, a measure]. A form of galvanometer in which the value of the current is measured directly in ampères.

Ammi (*am'-i*) [*ἄμμι*, an African plant]. A genus of umbelliferous herbs bearing aromatic seeds or fruits. The seeds of several species are locally used in medicine. Unof. *A. copticum.* See *Ajowan.*

Ammism (*am'-izm*) [*ἄμμος*, sand]. Ammotheraphy; psammism.

Ammonemia, (*am-o-ne'-me-ah*). See *Ammoniemia.*

Ammonia (*am-o'-ne-ah*) [L.]. A volatile alkali, NH_3. See *Ammonium.* **A. Carmin.** See *Stains, Table of*

Ammoniac (*am-o'-ne-ak*). See *Ammoniacum.*

Ammoniacal (*am-o-ni'-ak-al*) [*ammonia*]. Containing or relating to ammonia.

Ammoniacum (*am-o-ni'-ak-um*) [*ἀμμωνιάκός*, belonging to ammonia; *gen., Ammoniaci*]. Ammoniac. A gum obtained from a Persian plant, *Dorema Ammoniacum.* A stimulating expectorant and laxative resembling asafetida. Employed in chronic bronchial affections. Dose gr. x–xxx. **A. cum Hydrargyro Emplastrum,** ammoniac 72, mercury 18 per cent. oleate of mercury .8, dilute acetic acid 100, lead plaster, with sulphur, and oil, q. s. **A. Emplastrum** 100 parts of ammoniac, digested with 140 parts of acetic acid, diluted, strained, and evaporated. **A. Emulsum,** a four per cent. emulsion in water, the resin being suspended by the contained gum. Dose ʒss–j.

Ammoniameter (*am-o-ne-am'-et-er*) [*ammonia; μέτρον*, a measure]. An instrument for testing the strength of solutions of ammonia.

Ammoniemia, or Ammoniæmia (*am-o-ne-e'-me-ah*) [*ammonia; ἅιμα*, blood]. The theoretical decomposition of urea in the blood, yielding ammonium carbonate.

Ammoniorrhea (*am-o-ne-or-e'-ah*) [*ammonia; ῥεῖν*, to flow]. The passage of ammoniacal urine.

Ammonium (*am-o'-ne-um*) [from the name of Jupiter Ammon, because first discovered near his temple in Libya; *gen., Ammonii*]. A hypothetical alkaline base, having the composition NH_4. Exists only in combination. It occurs most commonly in the form of *ammonia gas,* NH_3, which, dissolved in water, is the water of ammonia of commerce. Inhalation of the gas causes suffocation and edema of glottis. The salts first stimulate and then paralyze the motor nerves. is useful as a stimulant, as an antagonist in cardiac depression, and locally in bites and stings of venomous reptiles and insects. **Ammonia Aqua,** water of ammonia, a solution containing ten per cent. of the gas in water. Dose ɱv–ʒss, well diluted. **A. Aqua Fortior,** contains 28 per cent. of the gas in solution. **A. Aromatic Spt.,** spirit of ammonia, with am. carb. am. aq., ol. lemon, lavender and pimenta, alcohol and water. Dose ʒss–ij. **Ammonii acetas liq.** Spirit of Mindererus, dilute acetic acid neutralized with ammonia. Dose ʒj–ʒj. **A. benzoas,** $NH_4C_7H_5O_2$. Dose gr. v–xv. **A. Bicarbonas** Dose gr. ij–x. **A. bromid,** NH_4Br. Dose gr. x–ʒss. **A. carbonas,** $NH_4HCO_3.NH_4NH_2CO_2$, a mixture of carbonate and dicarbonate. Dose gr. v–x. **A. chlorid,** NH_4Cl, sal ammoniac. Dose gr. j–xx. **A. chloridi trochisci,** each lozenge contains gr. ij of the salt. **A. fluorid,** used in hypertrophy of the spleen

Dose gr. $\frac{1}{24}$–$\frac{1}{2}$. **A. glycyrrhizas.** Unof. An expectorant. **A. iodidum,** NH_4I. Dose gr. ij–x. **A. liniment,** am. aq. 35, alcohol 5, cottonseed oil 60. **A. Molybdenate Test.** See *Tests, Table of.* The following *salts* and their preparations are official: **A. nitras,** NH_4NO_3, used only in preparing nitrous oxid. **A. phosphas,** $(NH_4)_2HPO_4$. Dose gr. v–xx. **A. picras,** $C_6H_2(NH_4)(NO_2)_3O$, a salt in yellow needles, of bitter taste; like other picrates it is explosive, and must be handled with care. It is antipyretic and antiperiodic, and tends to correct gastric disturbances. Dose gr. v in 24 hours; best given in wafers, each containing half a grain. **A. Spt.,** a ten per cent. solution of aqua ammoniæ in alcohol. Dose ♏x–℥j, diluted. **A. sulphas,** $(NH_4)_2SO_4$, used only in the preparation of other ammonium salts. **A. valerianas,** $NH_4C_5H_9O_2$. Dose gr. j–v. *Raspail's Eau Sedatif* (unof.), aqua ammoniæ ℥ij, sodium chlorid ℥ij, spt. vini camph. ℥iij, aq. ℥xxxij. For local use.

Ammon's Fissure. See *Fissure.* **A.'s Horn.** See *Hippocamp.* **A.'s Operation.** See *Operations, Table of.* **A.'s Posterior Scleral Protuberance,** a variety of posterior ectasia of the sclera of the eye.

Ammophilous (*am-off'-il-us*) [ἄμμος, sand; φίλος, loving]. In biology, inhabiting sandy places.

Ammotherapy (*am-o-ther'-a-pe*) [ἄμμος, sand; θεραπέυειν, to heal]. The use of sand-baths in the treatment of disease.

Amnemonic (*am-ne-mon'-ik*) [ἀ priv.; μνημονικός, relating to the memory]. Accompanied by or resulting in impairment of the memory.

Amnemosyne (*am-ne-mos'-en-e*) [ἀ priv.; μνεμοσύνη, memory]. Forgetfulness.

Amnesia (*am-ne'-se-ah*) [ἀμνησία, forgetfulness]. Defect of memory. Loss of the memory for words. **A. Acustica,** word-deafness. **A. Periodic.** See *Double Consciousness.*

Amnesic (*am-ne'-sik*). Relating to amnesia.

Amnestia (*am-nes'-te-ah*) [ἀμνηστία, forgetfulness]. Amnesia.

Amnestic (*am-nes'-tik*) [ἀμνηστία, forgetfulness]. 1. Amnesic. 2. Causing amnestia.

Amnia (*am'-ne-ah*) [ἀμνίον, a young lamb]. Plural of *Amnion, q. v.*

Amniac (*am'-ne-ak*) [ἀμνίον, a young lamb]. Amnionic.

Amnio-chorial (*am-ne-o-ko'-re-al*) [ἀμνίον; χόριον, a membrane]. Pertaining to both amnion and chorion.

Amnioclepsis (*am-ne-o-klep'-sis*) [ἀμνίον, amnion; κλεπτεῖν, to steal away]. The slow and unnoticed escape of the liquor amnii.

Amnion (*am'-ne-on*) [ἀμνίον, a young lamb]. The innermost of the fetal membranes; it is continuous with the fetal epidermis at the umbilicus, forming a complete sheath for the umbilical cord and a sac or bag in which the fetus is enclosed. It contains one or two pints of liquor amnii. It is a double non-vascular membrane, the inner layer or *sac* derived from the epiblast, the outer from the mesoblast. The cavity of the inner folds is called the *true amnion*, that of the outer, the *false.* **A., Dropsy of,** excessive secretion of liquor amnii.

Amnionic (*am-ne-on'-ik*) [ἀμνίον, a young lamb]. Relating to the amnion.

Amniorrhea, (*am-ne-o-re'-ah*) [ἀμνίος, amniotic liquor; ῥέειν, to flow]. The discharge of the liquor amnii.

Amniota (*am-ne-o'-tah*) [ἀμνίον, a young lamb]. Animals with an amnion and allantois, comprising mammals, birds, and reptiles. Those without an amnion are called *Anamnia.*

Amniotic (*am-ne-ot'-ik*) [ἀμνίον, a young lamb]. Relating to the amnion, as the *A. Fluid.* **A. Fluid.** Same as *Liquor amnii.*

Amniotis (*am-ne-o'-tis*) [ἀμνίον, a young lamb]. See *Amniotitis.*

Amniotitis (*am-ne-o-ti'-tis*) [ἀμνίον, a young lamb; ιτις, inflammation]. Inflammation of the amnion.

Amniotome (*am'-ne-o-tōm*) [ἀμνίον, a young lamb; τόμη, a cut]. An instrument for puncturing the fetal membranes.

Amnitis (*am-ni'-tis*). Same as *Amniotitis.*

Amœba (*am-e'-bah*). See *Ameba.*

Amœboid (*am-e'-boid*). See *Ameboid.*

Amœbodont (*am-e'-bo-dont*). See *Amebodont.*

Amœnomania (*am-e-no-ma'-ne-ah*). See *Amenomania.*

Amomum (*am-o'-mum*) [ἄμωμον, an Eastern spice plant]. A genus of scitaminaceous plants to which the cardamom (*A. cardamomum*) and Grains of Paradise (*A. granum paradisi*) belong.

Amorphia (*ah-mor'-fe-ah*) [ἀ priv.; μορφή, form]. Shapeless condition.

Amorphinism (*ah-mor'-fin-izm*) [ἀ priv.; *Morpheus,* the god of sleep]. The condition resulting from the withdrawal of morphine from one habituated to the drug.

Amorphism (*ah-mor'-fizm*) [ἀ priv.; μορφή, a form]. The state or quality of being amorphous or without shape; specifically, absence of crystallization; want of crystalline structure.

Amorphous (*ah-mor'-fus*) [ἀ priv.; μορφή, a form]. Formless, shapeless, non-crystallized. **A. Quinin,** quinoidin, its salts being non-crystallizable.

Amorphus (*ah-mor'-fus*) [ἀ priv.; μορφή, a form]. An acardiacus without head or extremities. See also *Anideus.* **A. Globulus.** See *Anideus.*

Amotio (*am-o'-she-o*) [L.]. A detachment. **A. Retinæ.** See *Ablatio Retinæ.*

Ampac (*am'-pak*) [*E. Indian*]. An East Indian rutaceous tree of the genus *Xanthoxylum* or *Ampacus.* Its leaves are used in medicating baths, and its odoriferous resin is a stimulant. Unof.

Ampelopsin (*am-pel-op'-sin*). See *American Ivy.*

Ampelopsis (*am-pel-op'-sis*). See *American Ivy.*

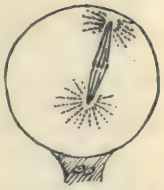
Ampelotherapy (*am-pel-o-ther'-a-pe*) [ἀμπελος, a grape-vine; θεραπέυειν, to heal]. The *Grape-cure, q. v.*

Ampèrage (*om'-pār-ahj*) [Fr.]. The number of ampères passing in a given circuit.

Ampère (*om-pār'*) [a French physicist]. See *Electrical Units.* **A.'s Laws** relate to the forces between conductors carrying electric currents. *Avogadro's law,* that equal volumes of a gas when under the same conditions contain the same number of molecules, is also called Ampère's Law. In honor of Ampère, the unit of measurement of an electric current is called an *Ampère.*

Ampèremeter (*am'-pār-me-ter*) [*Ampère*; μέτρον, to measure]. An instrument for estimating the current of an electric circuit in ampères.

Ampère's Law. See *Law.*



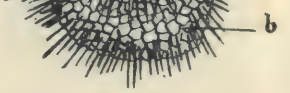
Amphanthium (*amf-an'-the-um*) [ἀμφί, about; ἄνθος, a flower]. See *Clinanthium.*

Amphemerina (*am-fe-mer'-in-ah*) [ἀμφημερινός, daily]. A hectic or intermittent fever that recurs daily.

Amphi- (*am'-fe*) [ἀμφί, around]. A prefix signifying *about, on both sides, around, etc.,* as amphiarthrosis, amphibia, *etc.*

Amphiarthrosis (*am-fe-ar-thro'-sis*) [ἀμφί, around; ἄρθρον, a joint]. A form of mixed articulation in which the surfaces of the bones are connected by broad discs of fibro-cartilage, or else they are covered with fibro-cartilage and connected by external ligaments. It is distinguished by limited flexion in every direction, as, *e.g.,* between the vertebræ.

Amphiaster (*am′-fe-as-ter*) [*ἀμφί*, around; *ἀστήρ*, a star]. In biology, the figure formed in both direct and indirect cell division, by the achromatin threads and chromatin granules united to form the so-called nuclear spindle, together with the threads of cell-protoplasm radiating from a rounded clear space at each end of the spindle known as the stars or suns.



AMPHIASTER IN AN OVARIAN EGG.

Amphibia (*am-fib′-e-ah*) [*ἀμφί*, both; *βίος*, life]. A class of the *Vertebrata*, living during their life both in the water and upon the land, as the frog, newt, *etc.*

Amphibious (*am-fib′-e-us*) [*ἀμφί*, both; *βίος*, life]. Living both on land and water.

Amphiblastic (*am-fe-blas′-tik*) [*ἀμφί*, on both sides; *βλαστός*, a germ]. In biology, pertaining to that form of complete segmentation that gives rise to an amphiblastula.

Amphiblastula (*am-fe-blas′-tu-lah*) [*ἀμφί*, on both sides; dim. of *βλαστός*, a germ]. In biology, the mulberry-mass or morula-stage in the development of a holoblastic egg. It follows the stage known as amphimorula.

AMPHIBLASTULA.

a, Granular cells which will form the epiblast. *b*, Ciliated cells which become invaginated to form the hypoblast. (*After Balfour.*)

Amphiblestritis (*am-fe-bles-tri′-tis*) [*ἀμφίβληστρον*, a net; *ιτις*, inflammation]. Inflammation of the retina.

Amphiblestroid (*am-fe-bles′-troid*) [*ἀμφίβληστρον*, a net; *εἶδος*, form]. Net-like. **A. Membrane**, the retina.

Amphibolia (*am-fe-bo′-le-ah*) [*ἀμφιβολία*, uncertainty]. The vacillating period of a fever or disease.

Amphibolic (*am-fe-bol′-ik*) [*ἀμφίβολος*, uncertain]. Uncertain; doubtful. A qualification applied by Wunderlich to a period in the febrile process occurring between the fastigium and the defervescence, and marked by irregular exacerbations and remissions.

Amphibranchia (*am-fe-brang′-ke-ah*) [*ἀμφί*, around; *βράγχια*, the gills]. The tonsils, pharynx, and nasopharynx.

Amphicarpic (*am-fe-kar′-pik*). Same as *Amphicarpous*.

Amphicarpous (*am-fe-kar′-pus*) [*ἀμφί*, on both sides, around; *καρπός*, fruit]. In biology, producing fruit of two kinds, either as regards form or season of ripening.

Amphicelous (*am-fe-se′-lus*) [*ἀμφί*, at both ends; *κοῖλος*, hollow]. In biology, biconcave, as the center of the vertebræ of fishes.

Amphicrania (*am-fe-kra′-ne-ah*) [*ἀμφί*, both; *κράνιον*, the skull]. Headache affecting both sides of the head.

Amphicreatin (*am-fe-kre′-at-in*) [*ἀμφί*, around; *κρέας*, flesh], $C_9H_{19}N_7O_4$. One of the muscle-leucomaïnes. It crystallizes in brilliant oblique prisms of a yellowish-white color. It is tasteless and faintly basic. It resembles creatin in its properties.

Amphicreatinin (*am-fe-kre-at′-in-in*) [*ἀμφί*, around; *κρέας*, flesh], $C_9H_{10}N_7O_4$. A member of the creatinin group of leucomaïnes said to have toxic qualities. It is derived from muscle.

Amphid (*am′-fid*) [*ἀμφί*, both]. In chemistry, a name given to a salt of an acid containing oxygen; that is, a name given to salts other than haloid.

Amphideum (*am-fid′-e-um*) [*ἀμφιδέα*, a ring: *pl.*, *Amphidea*]. The margin or edge of the os uteri.

Amphidiarthrosis (*am-fe-di-ar-thro′-sis*) [*ἀμφί*, both; *διάρθρωσις*, articulation]. The articulation of the lower jaw, as it partakes of the nature both of ginglymus and arthrodia.

Amphidisc, Amphidisk (*am′-fe-disk*) [*ἀμφί*, at both ends; *δίσκος*, a round plate]. In biology, a sponge-spicule consisting of an axil terminated by two toothed discs.

Amphigenous (*am-fij′-en-us*) [*ἀμφί*, both; *γένος*, kind]. In biology, growing indifferently on both sides, as certain parasitic fungi.

Amphigony (*am-fig′-o-ne*) [*ἀμφί*, on both sides; *γόνος*, offspring]. The sexual process in its broadest sense; gamogenesis.

Amphimixis (*am-fi-miks′-is*) [*ἀμφί*, on both sides; *μίξις*, mixing]. In biology, the mingling of two individuals or their germs; sexual reproduction.

Amphimonerula (*am-fe-mo-ner′-u-lah*) [*ἀμφί*, on both sides; *μονήρης*, single]. In biology, the monerula or cytode-stage of an unequally segmenting, holoblastic egg.

Amphimorula (*am-fe-mor′-u-lah*) [*amphi*, on both sides; *morula*, a mulberry]. In biology, the morula, or globular mass of cleavage cells resulting from unequal segmentation, the cells of the hemispheres being unlike in size.

Amphioxus (*am-fe-oks′-us*) [*ἀμφί*, both; *ὀξύς*, sharp]. A genus of fishes tapering at both ends, the lancelet.

Amphipyrenin (*am-fe-pi-re′-nin*) [*ἀμφί*, around; *πυρήν*, mass]. The nuclear membrane of a cell.

Amphismela (*am-fis-me′-lah*) [*ἀμφί*, both; *μήλη*, a probe]. A double-edged surgical knife.

Amphisphalsis (*am-fe-sfal′-sis*) [*ἀμφίσφαλσις*, a throwing or turning round]. Circumduction, as of a limb in reducing a luxation.

Amphistoma (*am-fis′-to-mah*) [*ἀμφί*, double; *στόμα*, mouth]. A genus of trematode worms, named from the mouth-like apparatus at either end. One species, *A. hominis*, has been found in the large intestine of man, in the tropical regions. See *Parasites, Table of*.

Amphistylic (*am-fe-sti′-lik*) [*ἀμφί*, on both sides; *στῦλος*, a pillar]. In biology, having styles or supports on both sides, as the mandibular arches of sharks.

Amphithect (*am′-fe-thekt*) [*ἀμφί*, on both sides; *θηκτός*, sharpened]. In biology, having unequal angles or surfaces.

Amphitoky (*am-fit′-o-ke*) [*ἀμφί*, both; *τόκος*, producing]. The production of both male and female forms in parthenogenesis.

Amphitropous (*am-fit′-ro-pus*) [*ἀμφί*, around; *τρέπειν*, to turn]. 1. In biology, having the funiculus attached to the ovule midway between the chalaza and micropyle. 2. Having a **C**-shaped embryo.

Amphodiplopia (*am-fo-dip-lo′-pe-ah*) [*ἀμφω*, both; *διπλόος*, double; *ὤψ*, eye]. Double vision affecting each of the eyes.

Ampho-peptone (*am-fo-pep′-tōn*). See *Peptones*.

Amphophile (*am′-fo-fil*) [*ἀμφω*, both; *φιλεῖν*, to love]. Readily stainable alike with acid and basic dyes (a qualification applied to certain histological and pathological elements).

Amphophilous (*am-fof′-il-us*) [*ἀμφω*, both; *φιλεῖν*, to love]. Staining with either alkaline or acid dyes.

Amphora (*am′-fo-rah*) [*ἀμφί*, on both sides; *φορεύς*, a bearer]. In biology, the lower portion of a seed capsule, or pyxidium.

Amphoric (*am-for'-ik*) [*amphora*, a two-handled vessel]. Like the sound produced by blowing across the mouth of a bottle. **A. Breathing,** breath sounds with an amphoric or musical quality heard in diseased conditions of the lung, as in phthisis with cavity-formation. **A. Resonance,** in auscultation, a metallic sound like that of blowing into a bottle, caused by the reverberation of sound in a cavity of the lung. **A. Respiration.** See *A. Breathing.*

Amphoricity (*am-for-is'-i-te*) [*amphora*, a two-handled vessel]. The quality of being amphoric; the giving forth of amphoric sounds.

Amphoriloquy (*am-for-il'-o-kwe*) [*amphora*, a bottle; *loqui*, to speak]. The production of amphoric sounds in speaking.

Amphorophony (*am-for-of'-o-ne*) [ἀμφορεύς, a jug; φωνή, a sound]. An amphoric resonance or sound.

Amphoteric (*am-fo-ter'-ik*) [ἀμφότερος, both of two]. Having the power of altering the color of both red and blue test paper, as milk. Neither acid nor alkaline; applied to such substances as glucose, gums, *etc.*

Amplectant (*am-plek'-tant*) [*amplecti*, embrace]. In biology, embracing; winding about, as a tendril or petiole.

Amplexation (*am-pleks-a'-shun*) [*amplexatio*, an embrace]. The treatment of a fractured clavicle by an apparatus that fixes the shoulder and covers a part of the chest and neck.

Amplexicaudate (*am-plex-e-kaw'-dāt*) [*amplexatio*, an embrace; *cauda*, a tail]. In biology, having the entire tail included in the interfemoral membrane.

Amplexicaul (*am-pleks'-e-kawl*) [*amplexus*, embracing; *caulis*, a stem]. In biology, clasping or embracing the stem, as a leaf.

Amplexifoliate (*am-pleks-e-fo'-le-āt*) [*amplexus*, embracing; *folium*, leaf]. In biology, plants, the leaves of which embrace the stem.

Ampliation (*am-ple-a'-shun*) [*ampliare*, to increase]. Dilatation or distention of a part or cavity.

Amplification (*am-plif-ik-a'-shun*) [*amplificare*, to enlarge]. 1. Increase of the visual area, in microscopy. 2. Enlargement, as of a diseased organ.

Amplifier (*am'-ple-fi-er*) [*amplificare*, to enlarge]. An apparatus sometimes used in microscopy for increasing the magnification. It consists of a diverging lens or combination placed between the objective and the ocular, and giving to the image-forming rays from the objective an increased divergence. **A., Tolles's,** an accessory used in magnification and first made effective by a manufacturer named Tolles.

Amplitude (*am'-ple-tūd*) [*amplitudo*, the extent of a thing]. The range or extent, as of vibrations and undulations, the pulse, etc.

Ampulla (*am-pul'-ah*) [L., A Roman wine jug]. The trumpet-mouthed or dilated extremity of a canal, as of the lachrymal canal, the receptaculum chyli, the Fallopian tubes, mammary ducts, semicircular canals, vas deferens, etc. Chemically, the term denotes a large-bellied bottle. **A. of Bryant,** the apparent distention of an artery immediately above a ligature, due to the contraction of the vessel above the ampulla where it is not completely filled with clot. **A. Chyli,** the receptaculum chyli. **A., Lieberkühn's,** the cecal terminus of one of the lacteals in the villi of the intestines. **A. of Rectum,** the portion above the perineal flexure. **A. of Vater,** the site of entrance of the common bile-duct and pancreatic duct into the duodenum.

Ampullula (*am-pul'-u-lah*) [dim. of *ampulla*, a Roman wine jug]. A small ampulla, as in the lymphatic or lacteal vessels.

Amputation (*am-pu-ta'-shun*) [*amputare*, to cut away]. The removal of a limb or part of the body by the knife, ligature, or other means, or as a result of gangrene, constriction (*e.g.*, of the cord, in the fetus), or the disease, *ainhum*. For special amputations see *Operations, Table of.* **A., Accidental,** the separation of a limb by some form of accident. **A., Bloodless,** one in which there is but slight loss of blood, on account of the circulation being controlled by mechanical means. **A., Central,** one in which the scar is situated at or near the center of the stump. **A., Circular,** that performed by making a single flap, by circular sweeps of a long knife, through skin and muscles, in a direction vertical to the plane of the limb. **A., Circular Skin Flap,** a modification of the circular, in which the skin flap is dissected up, and the muscles divided at a higher level. **A., Coat-sleeve,** a modification of the circular, in which the cutaneous flap is made very long, the end being closed by being gathered together by means of a tape. **A., Congenital,** amputation of fetal portions due to constriction by amniotic bands of lymph. **A. in the Contiguity,** amputation at a joint. **A. in the Continuity,** amputation of a limb elsewhere than at a joint. **A., Consecutive,** an amputation during the period of suppuration or later. **A., Cutaneous,** one in which the flaps are composed exclusively of the integuments. **A., Diclastic,** one in which the bone is broken with an osteoclast, and the soft tissues divided by means of an écraseur. Its object is to avoid hemorrhage and purulent infection. **A., Double Flap,** one in which two flaps are formed from the soft tissues. **A., Dry.** See *A., Bloodless.* **A., Eccentric,** one in which the scar is situated away from the center of the stump. **A., Elliptical,** one that may be performed by a single sweep, as in the circular method; the wound, however, having an elliptical outline, on account of the oblique direction of the incision. **A. of Expediency,** one performed for cosmetic effect. **A., Flap,** one in which one or more flaps are made from the soft tissues, the division being made obliquely. **A., Flapless,** one in which, on account of destruction of the soft parts, flaps cannot be formed, the wound healing by granulation. **A., Galvano-caustic,** one in which the soft parts are divided with the galvano-cautery, followed by division of the bone by the saw. **A., Immediate,** one done within twelve hours after the injury, during the period of shock. **A., Intermediary** or **Intermediate,** one performed during the period of reaction, and before suppuration. **A., Intrauterine.** See *A., Congenital.* **A., Major,** amputation of the extremities above the wrist or ankle joints. **A., Mediate.** See *A., Intermediary.* **A., Minor,** amputation of the extremities below the wrist or ankle joints. **A., Mixed,** a combination of the circular and flap methods. **A., Multiple,** amputation of two or more members at the same time. **A., Musculo-cutaneous,** one in which the flaps consist of skin and muscle. **A., Musculo-tegumentary.** See *A., Musculo-cutaneous.* **A., Natural.** See *A., Congenital.* **A., Oblique.** See *A., Oval.* **A., Osteoplastic,** one in which there is section and apposition of portions of bone, in addition to the amputation. **A., Oval,** a modification of the elliptical, in which the incision consists of two reversed spirals, instead of the one oblique. **A., Partial,** 1. One in which but a portion of the extremity is removed. 2. An incomplete congenital amputation. **A., Pathological,** one done for tumor or other diseased condition. **A., Primary,** one done after the period of shock and before the occurrence of inflammation. **A., Racket,** a variety of the oval amputation, in which there is a single longitudinal incision continuous below with a spiral incision on either side of the limb. **A., Secondary,** one performed during the period of sup-

puration. **A., Spontaneous.** See *A., Congenital.* Also occurs in the disease, ainhum. **A., Subperiosteal,** one in the continuity, the cut end of the bone being covered by periosteal flaps. **A., Surgical,** a formal amputation in contradistinction to accidental or congenital A. **A., Synchronous.** See *A., Multiple.* **A. by Transfixion,** one done by thrusting a long knife completely through a limb, and cutting the flaps from within out. **A., Traumatic,** one performed on account of injury.

Amputatura (*am-pu-tat-u'-rah*) [L.; *pl.*, *Amputaturæ*]. An amputation; loss of a member.

Amuck (*a-muk'*) [Malay]. In a state of murderous frenzy; in Oriental regions persons, mostly hashish eaters, often attack and kill those whom they meet while in a state of wild fury. In some cases the infuriated persons take this method of seeking death, for they are shot down at sight.

Amusia (*ah-mu'-se-ah*) [ἀ priv.; *musa*, μοῦσα, muse]. Pathological loss or subnormal ability to produce or comprehend music or musical sounds, an abnormality as regards music analogous to aphasia as regards the faculty of speech. **Motor A.,** the music is understood, but there is loss of the power of singing or of otherwise reproducing music. **Paramusia,** faulty and imperfect reproduction of music. **Sensory A.,** musical deafness, or the loss of the power of comprehension of musical sounds. See also *Alexia, Musical; Agraphia, Musical;* and *Amimia, Musical.*

Amussat's Operations. See *Operations, Table of.*

Amyelencephalia (*ah-mi-el-en-sef-a'-le-ah*) [ἀ priv.; μυελόν, marrow; κεφαλή, the head]. Congenital absence of both brain and spinal cord.

Amyelencephalus (*ah-mi-el-en-sef'-al-us*) [ἀ priv.; μυελόν, marrow; κεφαλή, the head]. A fetal monster having neither brain nor spinal cord.

Amyelia (*ah-mi-e'-le-ah*) [ἀ priv.; μυελός, marrow]. The congenital absence of the spinal cord.

Amyelinic (*ah-mi-el-in'-ik*) [ἀ priv.; μυελός, marrow]. Having no myelin; applied to certain nerve fibers, especially those seen in neuromata.

Amyelonervia (*ah-mi-el-o-ner'-ve-ah*). See *Amyeloneuria.*

Amyeloneuria (*ah-mi-el-o-nu'-re-ah*) [ἀ priv.; μυελός, marrow; νεῦρον, a nerve]. Paresis of the spinal cord.

Amyelotrophy (*ah-mi-el-ot'-ro-fe*) [ἀ priv.; μυελός, marrow; τροφή, nourishment]. Atrophy of the spinal cord.

Amyelus (*ah-mi'-el-us*) [ἀ priv.; μυελός, marrow]. A fetal monstrosity with partial or complete absence of the spinal cord.

Amyencephalus (*ah-mi-en-sef'-al-us*). See *Amyelencephalus.*

Amygdala (*am-ig'-dal-ah*) [L.: *gen.*, *Amygdalæ*]. **1.** Almond. The seeds of *Prunus Amygdalus*, var. *amara* and *dulcis*, containing the principle *Emulsin* or *Synaptase.* The former contains *Amygdalin.* The expressed oil of the sweet almond is a demulcent useful in skin-affections; in doses of ʒj–ij it is a mild laxative. The oil of *A. amara* is used in cosmetics. **2.** The tonsil. **A. amaræ, Aq.,** a 1 : 1000 solution of the oil in water Dose indefinite. **A. amaræ, Ol.,** a volatile oil, bitter to the taste. Contains 3–14 per cent. of hydrocyanic acid. Dose ♏¼–j. **A. amaræ, Spt.,** oil of bitter almond 1, alcohol 80, distilled water q. s. **A., Emulsum,** oil of sweet almonds 6 per cent., sugar, water, and acacia q. s. Dose ʒj–ʒss. **A. expressum, Ol.,** oil of sweet almonds. **A., Pulv., Comp.** (B. P.), contains sweet almonds, refined sugar, and gum acacia. Used to make *A., Emulsum.* **A., Syr.,** sweet almond 14, bitter almond 4, sugar 20, orange-flower water 10, water 13, syrup q. s.

Amygdalæ (*am-ig'-dal-e*) [L., *pl.*]. The tonsils.

Amygdalin (*am-ig'-dal-in*) [*Amygdala*], $C_{20}H_{27}NO_{11}$ + $3H_2O$. A substance that occurs in bitter almonds, and in various plants, as well as in the leaves of the cherry laurel. It forms white, shining leaflets, of a bitter taste, readily soluble in water and hot alcohol.

Amygdaline (*am-ig'-dal-in*) [ἀμυγδάλη, almond]. **1.** Almond-like. **2.** The fissure ectad of, or collocated with the amygdaloid tubercle. See *Fissure.*

Amygdalitis (*am-ig-dal-i'-tis*) [ἀμυγδάλη, almond; ιτις, inflammation]. Tonsillitis.

Amygdaloid (*am-ig'-dal-oid*) [ἀμυγδάλη, almond; εἶδος, form]. Like a tonsil, or almond. **A. Fossa,** the depression for the lodgment of the tonsil. **A. Tubercle,** a projection of gray or cortical matter at the end of the descending cornu of the lateral ventricle of the brain. It is attached to the temporal lobe, and appears to be nearly isolated by white substance.

Amygdalolith (*am-ig-dal'-o-lith*) [ἀμυγδάλη, an almond; λίθος, a stone]. A concretion or calculus found in the tonsils.

Amygdaloncus (*am-ig-dal-ong'-kus*) [ἀμυγδάλη, almond; ὄγκος, a mass]. Any tumor or swelling of the tonsil.

Amygdalopathy (*am-ig-dal-op'-a-the*) [ἀμυγδάλη, an almond; πάθος, a disease]. Any disease of the tonsils.

Amygdalotome (*am-ig'-dal-o-tōm*) [ἀμυγδάλη, an almond; τέμνειν, to cut]. An instrument used in cutting the tonsils.

Amygdalotomy (*am-ig-dal-ot'-o-me*) [ἀμυγδάλη, a tonsil; τέμνειν, to cut]. Tonsillotomy; partial or complete abscission of a tonsil.

Amykos (*ah-mi'-kos*) [ἀ priv.; μῦκος, a fungus]. An antiseptic fluid composed of boric acid, glycerin and infusion of cloves. Of reputed service in gonorrhea, dental caries, and catarrhs. Unof.

Amyl (*am'-il*) [ἄμυλον, fine starch]. The hypothetical radical C_5H_{11} of amyl alcohol, the fifth term of the series of alcohol radicals, C_nH_{2n+1}. **A. Alcohol.** See *Amylic Alcohol.* **A. Hydrate.** See *Amylic Alcohol.* **A. Nitrite,** nitrite of amyl, $C_5H_{11}NO_2$, a clear, yellowish liquid, ethereal, aromatic, volatile; produces vascular dilatation and great cardiac activity, and hence is useful in angina pectoris, respiratory neuroses, etc. Dose, *internally*, ♏¼–j dissolved in alcohol; by *inhalation*, ♏ ij–v. **A. Valerianate.** See *Apple Oil.*

Amylaceous (*am-il-a'-se-us*) [*amylum*, starch]. Containing starch; starch-like. See *Corpora amylacea.*

Amylene (*am'-il-ēn*) [ἄμυλον, starch], C_5H_{10}. A transparent, liquid hydrocarbon, having anesthetic properties, but dangerous to use. See *Anesthetic.* **A. Hydrate,** $C_5H_{12}O$, a tertiary alcohol having hypnotic effects, and antagonistic to strychnin. Dose ♏ xxx–ʒj. Unof.

Amylic (*am-il'-ik*) [ἄμυλον, starch]. Pertaining to Amyl. **A. Alcohol,** Fusel Oil, Potato Starch Alcohol, Amyl Hydrate. An alcohol having the composition $C_5H_{12}O$, occurring in the continued distillation of fermented grain. The pure substance has considerable value as a hypnotic. In large doses it suppresses tactile sensibility and produces motor paralysis. It is employed with advantage in mental disorders. It was formerly much used to adulterate whisky. Dose ♏ 15–75. Unof.

Amylo-dextrin (*am-il-o-deks'-trin*). Same as *Erythro-dextrin.* See *Soluble Starch.*

Amylogen (*am-il'-o-jen*) [ἄμυλον, starch; γενής, produce]. Soluble starch.

Amylogenic (*am-il-o-jen'-ik*) [ἄμυλον, starch; γενής produce]. Starch-producing.

Amyloid (*am′-il-oid*) [ἄμυλον, starch; εἶδος, form]. Starch-like. **A. Bodies**, pathological products resembling starch grains found in the membranes of the brain and other nervous tissues, the prostate, etc. **A. Degeneration**, waxy, fatty, or lardaceous degeneration; a disease occurring in most of the organs of the body, and indicative of impaired nutritive function. It is a nitrogenous, not starchy body, of uncertain composition. For staining see *Iodin*, *Methyl Violet*, *Safranin*, *Rose Bengale*, in *Table of Stains*. **A. Kidney**. See *Bright's Disease*.

Amylolysis (*am-il-ol′-is-is*) [ἄμυλον, starch; λύσις, solution]. The digestion of starch, or its conversion into sugar.

Amylolytic (*am-il-o-lit′-ik*) [ἄμυλον, starch; λύσις, solution]. Pertaining to or effecting the digestion of starch. Pertaining to ferments, like the saliva and pancreatic juice, that convert starch into sugar.

Amylometer (*am-il-om′-et-er*) [ἄμυλον, starch; μέτρον, a measure]. An apparatus for estimating the amount of starch in a solution.

Amyloplast (*am′-il-o-plast*) [ἄμυλον, starch; πλάσσειν, to form]. A leucoplast; a starch-forming protoplasmic granule.

Amylopsin (*am-il-op′-sin*) [ἄμυλον, starch; ὄψις, appearance]. A ferment said to exist in pancreatin. See *Ferments*.

Amylose (*am′-il-os*) [ἄμυλον, starch]. Any one of a certain group of the carbohydrates, comprising starch, glycogen, dextrin, inulin, gum, cellulose, and tunicin.

Amylum (*am′-il-um*) [L., *gen. Amyli*], $C_6H_{10}O_5$. Starch. The internal cells of *Triticum vulgaris*, common wheat, all other cereals, and many tubers, piths, and roots, such as potato, cassava, etc.; it constitutes nearly the whole of arrow-root, tapioca, and sago. It is converted into glucose by boiling with mineral acids. It is one of the most valuable nutrients known, but inert medicinally. **A. glyceritum**, a jelly for external application. Starch 10, water 10, glycerin 80. **A., Mucilago** (B. P.), used in making enemata. **A. iodatum**, contains starch 95, iodin 5 per cent., triturated with distilled water and dried. Dose ʒ j–ʒ ss. See *Table of Carbohydrates under Carbohydrate*.

Amyocardia (*am-i-o-kar′-de-ah*) [ἀ priv.; μῦς, muscle; καρδία, the heart]. Lack of muscular power in the heart's contractions.

Amyosthenia (*am-i-o-sthe′-ne-ah*) [ἀ priv.; μῦς, muscle; σθένος, force]. Deficient muscular power without obvious disease or lesion.

Amyosthenic (*am-i-o-sthen′-ik*) [ἀ priv.; μῦς, muscle; σθένος, force]. Pertaining to amyosthenia. Also, a medicine or agent depressing muscular action.

Amyotrophia (*am-i-o-tro′-fe-ah*) [ἀ priv.; μῦς, muscle; τροφή, nourishment]. Atrophy of a muscle.

Amyotrophic (*am-i-o-trof′-ik*) [ἀ priv.; μῦς, muscle; τροφή, nourishment]. Dependent on or relating to muscular atrophy. **A. Paralysis**, that which is due to muscular atrophy.

Amyotrophy (*am-i-ot′-ro-fe*). See *Amyotrophia*.

Amyous (*am′-i-us*) [ἀ priv.; μῦς, muscle]. Weak; deficient in muscle or muscular strength.

Amyrin (*am′-e-rin*) [*amyris*], $C_{40}H_{66}O$. A resinous principle derived from Mexican Elemi. *Amyris elemifera*, L.

Amyris (*am′-e-ris*) [L.]. A genus of tropical trees and shrubs producing fragrant resins and gums, such as Elemi, etc.

Amyxia (*ah-miks′-e-ah*) [ἀ priv.; μύξα, mucous]. Deficiency in the normal secretion of mucus.

Ana (*an′-ah*) [ἀνά, so much each]. A Greek preposition signifying *through*, *up*, *again*, etc. In prescriptions contracted to *āā*, meaning *of each*.

Anabamous (*an-ab′-am-us*) [ἀνά, upward; βάινειν, to go]. In biology, climbing, as certain fishes (*Anabas scandens*).

Anabasis (*an-ab′-as-is*) [ἀναβαίνειν, τὸ go up]. The increasing stage of a fever or other acute disease; the stage preceding the climax.

Anabatic (*an-ab-at′-ik*) [ἀναβατικός, ascending]. Increasing; growing more intense; as the anabatic stage of a fever.

Anabiosis (*an-ab-i-o′-sis*) [ἀναβιόειν, to come to life again]. The phenomenon of a restoration of vitality possessed by certain organisms after apparent death, or even after heating to 140° C.

Anabiotic (*an-ab-i-ot′-ik*) [ἀναβιόειν, to come to life again]. 1. Relating to anabiosis. 2. Restoring the strength or activity.

Anabole (*an-ab′-o-le*) [ἀναβάλλειν, to throw up]. A throwing up; what is thrown up; vomit; vomiting; expectoration; regurgitation.

Anabolergy (*an-ab-ol′-er-je*) [ἀναβάλλειν, to throw up; ἔργον, work]. The force expended or work performed in anabolism, or in anabolic processes.

Anabolic (*an-ab-ol′-ik*) [ἀναβάλλειν, to throw or build up]. Pertaining to or characterized by anabolism.

Anabolin (*an-ab′-o-lin*) [ἀναβάλλειν, to throw or build up]. Any substance formed during the anabolic process.

Anabolism (*an-ab′-o-lizm*) [ἀναβάλλειν, to throw or build up]. Synthetic or constructive metabolism. Activity and repair of function. Opposed to *Catabolism*. The process by which simpler elements are built up into more complex. See *Metabolism*.

Anabrosis (*an-ab-ro′-sis*) [ἀνάβρωσις, an eating up]. Corrosion, or superficial ulceration.

Anabrotic (*an-ab-rot′-ik*) [ἀνάβρωσις, an eating up]. Pertaining to anabrosis; corrosive.

Anacamptic (*an-ak-amp′-tik*) [ἀνακάμπτειν, to bend back]. Reflected, as sound or light; pertaining to or causing a reflection.

Anacanthous (*an-ak-an′-thus*) [ἀνάκανθος, spineless]. Without spines.

Anacardium (*an-ak-ar′-de-um*) [ἀνά, up; καρδία, the heart, from its heart-shaped seeds]. 1. A genus of tropical trees. *A. occidentale* yields cashew gum and the cashew nut. 2. The oil of the pericarp of the cashew nut, known as cardol, and used as an escharotic. Of reputed value in leprosy. **A. Tinct.**, 1 to 10 of rectified spirit. Dose, ɱij–x. **A. Ung.**, one part of the tar to eight of lard or vaselin. Used as a blistering ointment.

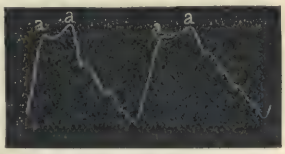
Anacatadidymous (*an-ak-at-ad-id′-im-us*) [ἀνά, up; κατά, down; δίδυμος, a twin]. Divided above and below, but jointed centrally into one; said of certain twin monsters.

Anacatadidymus (*an-ak-at-ad-id′-im-us*) [ἀνά, up; κατά, down; and δίδυμος, a twin]. An anacatadidymous monstrosity.

Anacatharsis (*an-ak-ath-ar′-sis*) [ἀνά, up; κάθαρσις, purgation]. Expectoration; vomiting.

Anacathartic (*an-ak-ath-ar′-tik*) [ἀνά, up; κάθαρσις, purgation]. Causing anacatharsis.

Anaclasis (*an-ak′-las-is*) [ἀνάκλασις, a breaking off, or back]. 1. Reflection or refraction of light or sound. 2. A fracture; forcible flexion of a stiff joint.



Anaclastic (*an-ak-las′-tik*) [ἀνάκλασις, a breaking off, or back]. Pertaining to refraction, or to anaclasis.

Anaclisis (*an-ak′-lis-is*) [ἀνάκλισις, a reclining]. Decubitus; the reclining attitude.

Anacroasia (*an-ak-ro-a′-ze-ah*) [ἀν priv.; ἀκρόασις, hearing]. Inability to understand words that are heard, while the same words if read by the patient are understood.

Anacrotic (*an-ak-rot'-ik*) [*ἀν* priv. ; *ἀκρόασις*, hearing]. Relating to or characterized by anacrotism.

Anacrotism (*an-ak'-ro-tizm*) [*ἀνακροτέειν*, to lift up and strike together]. A peculiarity of the pulse-curve, when a series of closely-placed elastic vibrations occur in the upper part of the line of ascent, so that the apex appears dentate and forms an angle with the line of descent. It is constant in the venous pulse ; is found in the arterial pulse when the systole of the left ventricle continues until the walls of the arteries begin to oscillate during the diastole. It occurs in hypertrophy and dilatation of the left ventricle (aortic insufficiency).

ANACROTIC RADIAL PULSE-TRACINGS
a, *a*, the anacrotic parts.

Anacusia (*an-ak-u'-se-ah*) [*ἀν* priv. ; *ἀκοίεν*, to hear]. Complete deafness ; abolition of the sense of hearing.

Anadenia (*an-ad-e'-ne-ah*) [*ἀν* priv.; *ἀδήν*, gland]. Insufficiency of glandular function. Chronic want of gastric secretion.

Anadicrotic (*an-ah-di-krot'-ik*) [*ἀνά*, upward; *δίς*, twice; *κρότος*, a stroke]. Characterized by anadicrotism.

Anadicrotism (*an-ah-di'-krot-izm*) [*ἀνά*, upward; *δίς*, twice; *κρότος*, a stroke]. Dicrotism of the pulse-wave occurring in the upward stroke.

Anadidymous (*an-ad-id'-im-us*) [*ἀνά*, up; *δίδυμος*, a twin]. Cleft upward into two, while single below—said of certain joined twins.

Anadidymus (*an-ad-id'-im-us*) [*ἀνά*, up; *δίδυμος*, a twin]. An anadidymous monster.

Anadiplosis (*an-ah-dip-lo'-sis*) [*ανά*, up, back ; *διπλόειν*, to double]. The reduplication or redoubling of a fever-paroxysm.

Anadiplotic (*an-ah-dip-lot'-ik*) [*ἀνά*, up; *διπλόειν*, to double]. Characterized by anadiplosis.

Anadipsia (*an-ah-dip'-se-ah*) [*ἀνά*, intensive; *δίψα*, thirst]. Intense thirst.

Anadipsic (*an-ah-dip'-sik*) [*ἀνά*, intensive; *δίψα*, thirst]. Causing or relating to great thirst.

Anadosis (*an-ad'-o-sis*) [*ανάδοσις*, distributing]. Vomiting ; upward determination of blood.

Anadrom (*an-ad'-rom*) [*ἀνά*, up; *δραμείν*, to run]. In biology, a fish that ascends rivers to spawn.

Anadromous (*an-ad'-ro-mus*) [*ἀνάδρομος*, running up]. Ascending ; moving upward. Said of pains, etc.

Anæmatopoiesis (*an-e-mat-o-poi-e'-sis*). See *Aneamatopoiesis.*

Anæmatosis (*an-e-mat-o'-sis*). See *Anematosis.*

Anæmia (*an-e'-me-ah*). See *Anemia.*

Anæmotrophy (*an-e-mot'-ro-fe*). See *Anemotrophy.*

Anaërobia (*an-a-er-o'-be-ah*) [*ἀν* priv. ; *ἀήρ*, air ; *βίος*, life]. Microörganisms having the power of living without either air or free oxygen. **A., Facultative,** applied to organisms normally or usually living in the presence of oxygen, but under certain circumstances becoming anaërobic.

Anaërobic (*an-a-e-ro'-bik*) [*ἀν* priv. ; *ἀήρ*, air ; *βίος*, life]. A term used of microörganisms, that live in the absence of free oxygen or air. See *Aërobic.*

Anaërobiosis (*an-a-er-o-bi-o'-sis*) [*ἀν* priv. ; *ἀήρ*, air ; *βίος*, life]. Life sustained in the absence of free oxygen ; the power of living where there is no free oxygen.

Anaërobiotic (*an-a-er-o-bi-ot'-ik*). Same as *Anaërobious.*

Anaerobious (*an-a-e-ro'-be-us*) [*ἀν* priv.; *ἀήρ*, air ; *βίος*, life]. In biology, capable of existing without free oxygen by a power of obtaining oxygen from organic substances.

Anaërophyte (*an-a'-e-ro-fit*) [*ἀν* priv.; *ἀήρ*, air ; *φυτόν*, a plant]. In biology, a plant capable of living without a direct supply of oxygen.

Anaëroplastic (*an-a-er-o-plas'-tik*) [*ἀν.*, priv. ; *ἀήρ*, air ; *πλάσσειν*, to shape]. Pertaining to anaëroplasty.

Anaëroplasty (*an-a'-er-o-plas-te*) [*ἀν* priv. ; *ἀήρ*, air ; *πλάσσειν*, to shape]. The treatment of wounds by immersion in warm water, so as to exclude the air.

Anæsthesia (*an-es-the'-ze-ah*). See *Anesthesia.*

Anæsthetic (*an-es-thet'-ik*). See *Anesthetic.*

Anætiological (*an-e-te-o-loj'-ik-al*). See *Anetiological.*

Anagallis (*an-ag-al'-is*) [L.]. A genus of plants. **A. arvensis,** Pimpernel. An herb having some local reputation as a remedy for rheumatism and as a preventive of hydrophobia. Dose of the fluid extract ʒj.

Anagennesis (*an-aj-en-e'-sis*) [*ἀναγέννησις*, regeneration]. Reparation or reproduction of tissues.

Anagnostakis's Operation. See *Operations, Table of.*

Anagraph (*an'-a-graf*) [*αναγραφή*, a writing out]. A physician's prescription or recipe.

Anagyrin (*an-aj-i'-rin*) [*Anagyris*, from *ἀνά*, backward; *γῦρος*, a circle], $C_{14}H_{18}N_2O_2$. An alkaloid from the seeds of *Anagyris fœtida*, L., a leguminous shrub of Southern Europe. Its hydrochlorate is poisonous, slowing the respiration, and interfering with the heart's action. Unof.

Anakroasia (*an-ak-ro-a'-ze-ah*). See *Anacroasia.*

Anakusis (*an-ak-u'-sis*). See *Anacusia.*

Anal (*a'-nal*) [*anus*, the fundament]. Pertaining to the anus.

Analepsia (*an-al-ep'-se-ah*). See *Analepsis.*

Analepsis (*an-al-ep'-sis*) [*ἀνάληψις*, a taking up.] Recovery of strength after disease.

Analepsy (*an'-al-ep-se*). See *Analepsis.*

Analeptic (*an-al-ep'-tik*) [*ἀναληπτικός*, restorative]. 1. Restorative. 2. Any agent restoring strength after illness, as nourishing foods and tonics.

Analgen (*an-al'-jen*) [*ἀν* priv. ; *ἄλγος*, pain], $C_{26}H_{14}N_2O_4$. A white, tasteless, crystalline powder, almost insoluble in water, soluble with difficulty in cold alcohol, but more readily in hot alcohol and dilute acids. It melts at 406.4° F. It is employed as an analgesic, antineuralgic, and antipyretic, in doses of from seven and a half to thirty grains. Unof.

Analgesia (*an-al-je'-ze-ah*) [*ἀν* priv. ; *ἄλγος*, pain]. Insensibility to or absence of pain.

Analgesic (*an-al-je'-sik*) [*ἀν* priv. ; *ἄλγος*, pain]. 1. Anodyne ; relieving pain. 2. Affected with analgesia. 3. A remedy that relieves pain either by depressant action on the nerve centers or by impairing the conductivity of nerve fibers.

Analgesin (*an-al-je'-sin*). See *Antipyrin.*

Analgia (*an-al'-je-ah*) [*ἀν* priv. ; *ἄλγος*, pain]. Paralysis of the sense of pain ; absence of pain.

Analgic (*an-al'-jik*) [*ἀν* priv.; *ἄλγος*, pain]. Analgesic.

Analogism (*an-al'-o-jism*) [*ἀναλογισμός*, reasoning ; *ἀνά*, through ; *λόγος*, ratio]. Diagnosis by analogy or by reasoning.

Analogous (*an-al'-o-gus*) [*ἀνάλογος*, conformable]. Conforming to, proportionate, answering to. See, also, *Analogue.* **A. Tissues,** morbid tissues similar to the elementary and normal tissues of the body.

Analogue (*an'-al-og*) [*ἀνάλογος*, conformable]. A part or organ having the same function as another, but with a difference of structure. The correlative term, *homologue*, denotes identity of structure with difference of function. The wing of the butterfly and that of the bird are *analogous*, but the wing of a bird and the arm of a man are *homologous.* **A., Non-homologous,** are parts that have a similarity of

function without any similarity as to relative position, *e.g.*, the legs of a lizard and those of a lobster. **A., Homologous,** is used of parts that are similar both as to function and relative position, *e.g.*, the wings of a bat and of a bird.

Analysis (*an-al'-is-is*) [ἀναλύειν, to unloose]. The resolution of compound bodies into simpler, or constituent parts. **A., Densimetric,** analysis of a subject by means of determining the specific gravity of the solution and thus estimating the amount of dissolved matter. **A., Gasometric,** the determination of the constituents of gaseous compounds, especially the determination of the amount of oxygen in samples of atmospheric air. **A., Gravimetric,** the quantitative determination by weight of the elements of a body. **A., Organic,** the determination of the elements of matter formed under the influence of life. The analysis of animal and vegetable tissues. **A., Proximate,** the determination of the simpler compound elements into which a substance may be resolved. **A., Qualitative,** the determination of the nature and number of elements that compose a body. **A., Quantitative,** the determination of the proportionate parts of the various elements of a compound. **A., Spectral,** the determination of the composition of a body by means of the spectroscope. **A., Ultimate,** the resolution of a compound, not into its simpler constituents, but its ultimate elements. **A., Volumetric,** the quantitative determination of a constituent by ascertaining the volume of a liquid required to complete a given reaction.

Analyzer (*an'-al-i-zer*) [ἀναλύειν, to unloose]. In microscopy, the Nicol prism placed at some level above the object which receives and exhibits the properties of light after polarization.

Anamirtin (*an-am-er'-tin*) [*Anamirta*, a genus of plants], $C_{19}H_{36}O_2$. A glycerid derived from Cocculus indicus, the berry-like fruit of *Anamirta paniculata*, L.

Anamnesia (*an-am-ne'-ze-ah*). See *Anamnesis.*

Anamnesis (*an-am-ne'-sis*) [ἀνάμνησις, a recalling to mind]. 1. The faculty of memory; recollection. 2. That which is recollected: information gained regarding the past history of a case from the patient or from his friends or from other persons.

Anamnestic (*an-am-nes'-tik*) [ἀνάμνησις, a recalling to mind]. 1. Recalling to mind; remembering. 2. Restorative of the memory.

Anamnia (*an-am'-ne-ah*). See *Amniota.*

Anamnionic (*an-am-ne-on'-ik*). Same as *Anamniotic.*

Anamniotic (*an-am-ne-ot'-ik*) [ἀν priv.; ἀμνίον, amnion]. In biology, without an amnion, as fishes.

Anamorphism (*an-am-orf'-izm*). Same as *Anamorphosis.*

Anamorphosis (*an-am-orf-o'-sis*) [ἀναμόρφωσις; ἀνα, again; μορφόειν, to form]. Distortion or anomaly of development. In biology, gradual change of form in successive members of a group.

Anamorphosy (*an-am-or'-fo-se*). See *Anamorphosis.*

Anam Ulcer. A form of phagedena such as is common in hot countries. It begins with an inflammation starting from a small abrasion of the skin, generally on the foot and leg, with sloughing of the inflamed skin, producing a sharp-cut ulcer that spreads slowly, preceded by an area of inflammation. Its course is remarkably slow, and its resistance to treatment obstinate. Syphilis and anemia are predisposing factors.

Anandria (*an-an'-dre-ah*) [ἀν priv.; ἀνήρ, man]. Lack of virility; male impotence.

Anandrous (*an-an'-drus*) [ἀν priv.; ἀνήρ, a male]. In biology, without stamens.

Anantherous (*an-an'-ther-us*) [ἀν priv.; *anthera*, anther]. In biology, without anthers.

Ananthous (*an-an'-thus*) [ἀν priv.; ἄνθος, a flower]. In biology, destitute of flowers.

Anantochasmus (*an-an-to-kaz'-mus*) [ἀνάντης, steep; χάσμα, a chasm]. Lissauer's term for a skull in which there is a forward inclination of the line connecting the basion and staphylion.

Anantocoryphus (*an-an-to-kor'-if-us*) [ἀνάντης, steep; κορυφή, the crown]. Lissauer's term for a skull in which the angle formed between the radius fixus and the line connecting the bregma and lambda is between 52° and 41°.

Anantopyl (*an-ant'-o-pil*) [ἀνάντης, steep, up-hill; πύλη, an entrance]. A term applied by Lissauer to skulls in which the foramen magnum looks slightly forward when referred to the radius fixus as a horizontal.

Ananturaniscus (*an-an-tu-ran-is'-kus*) [ἀνάντης, steep; οὐρανίσχος, canopy, vault]. Lissauer's term for a skull in which there is a forward inclination of the line joining the alveolar point and the posterior border of the incisive foramen.

Ananturanus (*an-an-tu-ra'-nus*) [ἀνάντης, steep; οὐρανός, the vault]. Lissauer's term for a skull in which the radius fixus being horizontal, there is a forward-looking of the palate.

Anapeiratic (*an-ap-i-rat'-ik*) [ἀναπειρᾶσθαι, to do again]. Due to frequent repetition; a general term for such affections as writers' and telegraphers' cramp, or paralysis.

Anaphalantiasis (*an-af-al-an-ti'-as-is*) [ἀνά, up; φάλανθος, bald in front]. The falling out of the eyebrows.

Anaphases (*an-af-a' sez*) [ἀνά, up; φάσις, a phase]. In biology, the phenomena of karyokinesis immediately preceding the formation of the daughter stars, and up to the formation of the resting daughter nuclei. See *Metaphases.*

Anaphia (*an-a'-fe-ah*) [ἀν priv; ἀφή, touch]. Defect in the sense of touch.

Anaphrodisia (*an-af-ro-diz'-e-ah*) [ἀν priv.; Ἀφροδίτη, Venus]. Absence or impairment of sexual appetite.

Anaphrodisiac (*an-af-ro-diz'-e-ak*) [ἀν priv.; Ἀφροδίτη, Venus]. 1. Relating to, affected by, or causing anaphrodisia. 2. An agent that allays the sexual desire.

Anaphroditic (*an-af-ro-dit'-ik*) [ἀν priv.; Αφροδίτη, Venus]. Asexually produced.

Anaphroditous (*an-af-rod'-it-us*) [ἀν priv.; Αφροδίτη, Venus]. Having no sexual impulses or appetite.

Anaplase (*an'-ap-lāz*) [ἀνά, up; πλάσσειν, to build]. The stage of growth and development; the period before full maturity.

Anaplast (*an'-ap-last*) [ἀναπλάσσειν, to shape]. See *Leucoplast.*

Anaplastic (*an-ap-las'-tik*) [ἀναπλάσσειν, to build up]. 1. Relating to anaplasty; restoring a lost or defective part. 2. An agent that facilitates repair by restoring or increasing the plastic elements of the blood.

Anaplasty (*an'-ap-las-te*) [ἀναπλάσσειν, to build up]. Operation for the renewal or restoration of lost parts, commonly called a plastic operation; plastic surgery.

Anaplerosis (*an-ap-le-ro'-sis*) [ἀνά, up; πληρόειν, to fill]. The restoration or repair of a wound, sore, or lesion in which there has been a loss of substance.

Anaplerotic (*an-ap-le-rot'-ik*) [ἀνά, up; πληρόειν, to fill]. 1. Promotive of repair, favoring granulation. 2. A remedy or application that promotes repair.

Anapneometer (*an-ap-ne-om'-et-er*) [ἀναπνοή, respiration; μέτρον, a measure]. An anapnograph.

Anapnograph (*an-ap'-no-graf*) [*ἀναπνοή*, respiration; *γράφειν*, to write]. An apparatus registering the movements of inspiration and expiration, together with the quantity of air inhaled.

Anapnoic (*an-ap-no'-ik*) [*ἀνά*, against; *ἄπνοια*, want of breath]. Favoring respiration; relieving dyspnea.

Anapnometer (*an-ap-nom'-et-er*) [*ἀναπνοή*, respiration; *μέτρον*, a measure]. An anapneometer.

Anapophysis (*an-ap-off'-is-is*) [*ἀνά*, back; *ἀπόφυσις*, an offshoot]. An accessory process of a lumbar or posterior dorsal vertebra, corresponding to the inferior tubercle of the transverse process of a typical dorsal vertebra.

Anarcotin (*ah-nar'-ko-tin*) [*ἀ* priv.; *ναρκωτικός*, narcotic]. Narcotin, so called from its lack of narcotic power.

Anargyrus (*an-ar'-jir-us*) [*ἀν* priv.; *ἄργυρος*, silver: *pl.*, *Anargyri*]. An old name for a practitioner who treated the sick gratuitously.

Anarrhea, or **Anarrhœa** (*an-ar-e'-ah*) [*ἀνά*, up; *ῥοία*, flow]. Afflux to an upper part, as of blood to the head.

Anarrhexis (*an-ar-eks'-is*) [*ἀνά*, up; *ῥῆξις*, fracture]. Surgical refracture of a bone.

Anarthria (*an-ar'-thre-ah*) [*ἀν* priv.; *ἄρθρον*, articulation]. 1. Partial aphasia from partial destruction of the paths of the motor tracts of speech, and characterized by defective articulation. 2. Without joints.

Anarthrous (*an-ar'-thrus*) [*ἀν* priv.; *ἄρθρον*, a joint]. Jointless. So corpulent that no joints are visible.

Anasarca (*an-ah-sar'-kah*) [*ἀνά*, through; *σάρξ*, the flesh]. An accumulation of serum in the areolar tissues of the body. If associated with effusion of fluid into serous cavities it is called *general dropsy*. If the affection is local, it is called *edema*. This local form is generally the result of some mechanical obstruction to the flow of blood in the part.

Anasarcous (*an-ah-sar'-kus*) [*ἀνα*, through; *σάρξ*, the flesh]. Affected with anasarca.

Anaspadias (*an-as-pa'-de-as*) [*ἀνά*, up; *σπάειν*, to draw]. An urethral opening upon the upper surface of the penis.

Anastaltic (*an-as-tal'-tik*) [*ἀναστολτικός*, checking, putting back, or up; *στέλλειν*, to send]. 1. Strongly astringent. 2. Centripetal; afferent; used of nerve-currents.

Anastasis (*an-as'-tas-is*) [*ἀνάστασις*, a setting up]. Recovery; convalescence; a state of improving health, vigor, or development.

Anastate (*an'-as-tāt*) [*ἀνάστατος*, caused to rise]. Any substance that appears in or is characteristic of an anabolic process.

Anastatic (*an-as-tat'-ik*) [*ἀνάστατος*, caused to rise]. Tending to recovery; restorative.

Anastole (*an-as'-to-le*) [*ἀναστολή*, retracted]. Retraction; shrinking away, as of the lips of a wound.

Anastom (*an'-as-tōm*) [*ἀνα*, above; *στόμα*, mouth]. Any mouthless organism; specifically, a member of the genus *Anastoma*, among the Gasteropods or Orthoptera, or *Anactomus* among the Salmonidæ.

Anastomosis (*an-as-to-mo'-sis*) [*ἀναστομόειν*, to bring to a mouth]. The intercommunication of vessels. *Anastomotic arteries of the thigh*, etc., branches of the brachial, femoral, etc., whereby the collateral circulation is established after ligature for aneurysm, etc. The term has been inaccurately used of the junction of the nerve-filaments. **A., Crucial**, an arterial anastomosis in the upper part of the thigh, formed by the anastomotic branch of the sciatic, the first perforating, the internal circumflex, and the transverse branch of the external circumflex. **A., Intestinal**, an operation consisting in establishing a communication between the intestine above and that below the obstruction, in cases of intestinal obstruction. In this way the impermeable portion of the bowel is excluded from the fecal circulation.

Anastomotic (*an-as-to-mot'-ik*) [*ἀναστομόειν*, to bring to a mouth]. Pertaining to anastomosis.

Anatherapeusis (*an-ath-er-ap-u'-sis*) [*ἀνά*, forward; *θεραπεύσις*, medical treatment]. Treatment by increasing doses.

Anathrepsis (*an-ath-rep'-sis*) [*ἀνάθρεψις*, a fresh growth]. A renewal of lost flesh after recovery.

Anathreptic (*an-ath-rep'-tik*) [*ἀνάθρεψις*, a fresh growth]. Restorative of lost flesh; nutritive.

Anatomical (*an-at-om'-ik-al*) [*ἀνατομία*, anatomy]. Pertaining to anatomy. **A. Tubercle.** See *Verruca necrogenica.*

Anatomism (*an-at'-om-izm*) [*ἀνατομία*, anatomy]. The theory that anatomical conditions determine all the phenomena of life, health, and disease.

Anatomist (*an-at'-om-ist*) [*ἀνατομία*, anatomy]. One who is expert in anatomy. **A.'s Snuff-box**, the triangular space between the tendons of the extensor of the metacarpal bone of the thumb and the extensor of the first phalanx on the back of the hand.

Anatomy (*an-at'-o-me*) [*ἀνά*, up, apart; *τέμνειν*, to cut]. The dissection of organic bodies in order to study their structure, the situations and uses of their organs, etc. **A., Applied**, anatomy as concerned in the diagnosis and management of pathological conditions. **A., Comparative**, the investigation and comparison of the anatomy of different orders of animals or of plants, one with another. **A., Descriptive**, a study of the separate and individual portions of the body, apart from their relationship to surrounding parts. **A., Gross**, anatomy of the macroscopic tissues. **A., Homological**, the study of the correlations of the several parts of the body. **A., Minute**, that studied under the microscope. **A., Morbid** or **Pathological**, a study of diseased structures. **A., Physiognomical**, the study of expressions depicted upon the exterior of the body, especially upon the face. **A., Regional**, a study of limited parts or regions of the body, the divisions of which are collectively or peculiarly affected by disease, injury, operations, etc. **A., Surgical**, the application of anatomy to surgery. **A., Topographical**, the anatomy of a single portion or part of the body. **A., Transcendental**, the study of the general design of the body, and of the particular design of the organs. **A., Veterinary**, the anatomy of domestic animals.

Anatripsis (*an-at-rip'-sis*) [*ἀνάτριψις*, a rubbing]. Rubbing; the removal of a part or growth by scraping or rubbing; inunction. Also an upward or centripetal movement in massage.

Anatripsology (*an-at-rip-sol'-o-je*) [*ἀνάτριψις*, a rubbing; *λόγος*, science]. The science of friction as a remedial agent.

Anatriptic (*an-at-rip'-tik*) [*ανάτριψις*, a rubbing]. A medicine to be applied by rubbing.

Anatropal (*an-at'-ro-pal*) [*ἀνατρέπειν*, to turn upside down]. See *Anatropous.*

Anatropous (*an-at'-ro-pus*) [*ἀνά*, up; *τρέπειν*, to turn]. In biology, inverted. Applied to the ovule when completely inverted, so that the hilum and micropyle are brought close together.

Anaudia (*an-aw'-de-ah*) [*ἀν* priv.; *αὐδή*, voice]. Loss of voice; dumbness; inability to articulate.

Anaxonia (*an-aks-o'-ne-ah*) [*ἀν* priv.; *ἄξων*, axle, axis]. In biology, organic forms wholly irregular or varying, and without axes.

Anazoturia (*an-az-ot-u'-re-ah*) [*ἀν* priv.; *azotum*, nitrogen; *οὖρον*, urine]. A name applied to that form of chronic diuresis in which urea is deficient or absent from the urine.

Anbury (*an'-ber-e*) [E. dialect]. A soft tumor or pendulous wart, chiefly on horses and cattle.

Ancecerite (*an-se'-ser-it*) [*ἀγκῶ*, bent; *κέρας*, a horn]. In biology, a curved process attached to the peduncle of the second pair of antennæ in certain crustacea.

Ancestral germ-plasms. Weismann's "*Ahnenplasmen.*" See *Id.*

Anchieta (*an-che-a'-tah*) [Anchietea, a Brazilian botanist]. A genus of violaceous plants. *A. salutaris*, vegetable mercury. The root of a violaceous plant growing in Brazil, highly recommended as a purgative, and as an alterative in syphilitic affections; it is possibly identical with *Manaca*, *q. v.*

Anchilops (*ang'-kil-ops*). See *Anchylops.*

Anchorage (*ang'-kor-āj*) [M. E., *ankren*, an anchor]. The fixation of a floating or displaced viscus, whether by a natural process or by surgical means.

Anchusa (*ang-ku'-sah*) [*ἄχουσα*, alkanet]. A genus of boraginaceous herbs. See *Alkanet.*

Anchusin (*ang'-ku-sin*) [*ἄχουσα*, alkanet], $C_{35}H_{40}O_8$. The red coloring matter characteristic of alkanet-root. See *Alkanet.*

Anchyloglossia (*ang-kil-o-glos'-e-ah*). See *Tongue-tie.*

Anchylops (*ang'-kil-ops*) [*ἀγχι*, near; *ὤψ*, the eye]. Abscess at inner angle of eye, prior to rupture.

Anchylosis (*ang-kil-o'-sis*). See *Ankylosis.*

Anchylostomiasis (*ang-kil-o-sto-mi'-as-is*). See *Dochmiasis.*

Anchylostomum (*ang-kil-os'-to-mum*) [*ἀγκύλος*, crooked; *στόμα*, mouth]. A genus of slender nematoid worms inhabiting the human intestines. *Dochmius* (*Anchylostoma*) *duodenalis*. Leuck. See *Parasites, Animal, Table of.*

Ancipital (*an-sip'-it-al*) [*anceps*, double]. In biology, two-edged.

Ancome (*an'-kum*) [E. dialect]. An inflammation or swelling that comes on suddenly.

Ancon (*ang'-kon*) [*ἀγκών*, the elbow]. Originally the olecranon process; applied to the elbow generally.

Anconad (*ang'-ko-nad*) [*ἀγκών*, the elbow]. Toward the olecranon, or elbow.

Anconagra (*ang-kon-a'-grah*) [*ἀγκών*, the elbow; *ἄγρα*, a seizure]. Arthritic pain at the elbow.

Anconal (*ang'-kon-al*) [*ἀγκών*, the elbow]. Pertaining to the elbow.

Anconeal (*ang-ko'-ne-al*). Same as *Anconal.*

Anconen (*ang'-kon-en*) [*ἀγκών*, the elbow]. Belonging to the ancon in itself.

Anconeus (*ang-ko-ne'-us*) [*ἀγκών*, the elbow]. A small muscle, an extensor of the forearm, inserted into the olecranon and upper third of the forearm. It arises from the external condyle of the humerus. See *Muscles, Table of.*

Anconoid (*ang'-kon-oid*) [*ἀγκών*, the elbow]. Resembling the elbow.

Ancora (*ang'-ko-rah*) [L., an anchor]. In biology, an anchor-shaped Synapta spicule.

Ancyloblepharon (*an-sil-o-blef'-ar-on*). See *Ankyloblepharon.*

Ancyloglossum (*an-sil-o-glos'-um*). See *Tongue-tie.*

Ancylomele (*an-sil-o-me'-le*). See *Ankylomele.*

Ancyroid (*an'-sir-oid*) [*ἄγκυρα*, anchor; *εἶδος*, form]. Shaped like an anchor.

Andersch's Ganglion. See *Ganglia, Table of.*

Anderson's Antipruritic Powder. A powder used in eczema. It consists of powdered starch, ʒvj; oxid of zinc, ʒiss; powdered camphor, ʒss.

Anderson's (*McCall*) **Ointment.** An ointment consisting of powdered bismuth oxid ʒj, oleic acid fʒj, white wax ʒiij, vaselin ʒix. These are heated together and when nearly cool a little oil of rose is added. It is an excellent soothing ointment for the skin.

Anderson's Pill. The compound gamboge pill.

Andira (*an-di'-rah*) [L.]. A genus of tropical leguminous trees. *A. araroba*, affords the Goa Powder (see *Araroba*). Several species yield active medicines, chiefly of local repute. *A. inermis* (Cabbage-tree). *A. anthelmintica*, of Brazil, and *A. retusa*, of Guiana, have barks efficacious against worms.

Andranatomy (*an-dran-at'-o-me*) [*ἀνήρ*, a man; *ἀνατομία*, anatomy]. Human anatomy; the anatomy or dissection of the male human subject.

Andrecium, or Androecium (*an-dre'-se-um*) [*ἀνήρ*, a man; *οἶκος*, a house]. In biology, a term applied to the stamens as a whole.

Androclinium (*an-dro-klin'-e-um*). See *Clinandrium.*

Andro-diecious (*an-dro-di-e'-she-us*) [*ἀνήρ*, male; *δίς*, two; *οἶκος*, a house]. In biology, flowers staminate on one plant, perfect on another.

Androgalactozemia (*an-dro-gal-ak-to-ze'-me-ah*) [*ἀνήρ*, man; *γάλα*, milk; *ζημία*, loss]. The presence of milk in the male mammæ.

Androgonidium (*an-dro-gon-id'-e-um*). See *Androspore.*

Androgyna (*an-droj'-in-ah*) [*ἀνήρ*, man; *γυνή*, woman]. An hermaphrodite; a female in whom the genital organs are similar to those of the male.

Androgyneity (*an-droj-in-e'-it-e*) [*ἀνήρ*, man; *γυνή*, woman]. Hermaphroditism.

Androgynism (*an-droj'-in-izm*) [*ἀνήρ*, man; *γυνή*, woman]. Hermaphroditism.

Androgynous (*an-droj'-in-us*) [*ἀνήρ*, man; *γυνή*, woman]. Hermaphrodite. In biology, having male and female flowers in the same inflorescence.

Androgynus (*an-droj'-in-us*) [*ἀνήρ*, man; *γυνή*, woman]. An hermaphrodite. A male with genital organs similar to those of the female.

Androgyny (*an-droj'-in-e*). See *Androgynism.*

Andrology (*an-drol'-o-je*) [*ἀνήρ*, man; *λόγος*, science]. 1. The science of man, especially of the male sex. 2. The science of the diseases of the male genito-urinary organs.

Andromania (*an-dro-ma'-ne-ah*) [*ἀνήρ*, a man; *μανία*, madness]. Nymphomania, *q. v.*

Andromeda (*an-drom'-e-dah*) ['Ανδρομέδη, a mythological character]. A genus of ericaceous shrubs having poisonous or narcotic properties. The leaves of *A. mariana* and *A. nitida*, of North America, and of *A. polyfolia* of both continents, are useful in the external treatment of old ulcers, a decoction being applied hot to the sore. Unof.

Andromonœcious (*an-dro-mo-ne'-she-us*) [*ανήρ*, male; *μόνος*, single; *οἶκος*, house]. In biology, of or pertaining to a plant that bears staminate and perfect, but no pistillate flowers.

Andromorphous (*an-dro-mor'-fus*) [*ἀνήρ*, man; *μορφή*, form]. Shaped like a man.

Androphobia (*an-dro-fo'-be-ah*) [*ἀνήρ*, man; *φόβος*, dread]. Fear or dislike of man.

Androphonomania (*an-dro-fo-no-ma'-ne-ah*) [*ἀνδροφόνος*, man-killing; *μανία*, madness]. Homicidal insanity.

Androphore (*an'-dro-fōr*) [*ἀνήρ*, man; *φέρειν*, to bear]. In biology, a stalk supporting an andrecium, a staminal column, or a body supporting an antheridium. In biology, a generative bud of a hydrozoan producing male elements only.

Andropogon (*an-dro-po'-gon*) [*ἀνήρ*, man; *πώγων*, beard]. A genus of coarse grasses of many species. *A. nardus* affords oil of citronella; *A. citratus*, lemon-grass oil; *A. schœnanthus*, oil of rusa, etc. These oils are employed in perfumery, and are said to be useful in rheumatism. The oil-bearing andropogons are chiefly S. Asiatic. Unof.

Androsporangium (*an-dro-spo-ran'-je-um*) [*ἀνήρ*, man; *σπορά*, a spore; *ἀγγεῖον*, a vessel]. In biology a sporangium producing androspores.

Androspore (*an'-dro-spōr*) [*ἀνήρ*, a man; *σπόρος*, seed]. In biology, the peculiar swarmspore of the *Œdogonieæ* which develops to a "dwarf male" and gives rise to antherozoids.

Androtomous (*an-drot'-o-mus*) [*ἀνήρ* a man; *τεμνεῖν*, to cut]. In biology, characterized by congenital division of the stamens into several parts.

Androtomy (*an-drot'-o-me*). See *Andranatomy.*

Andrum (*an'-drum*) [Guzerali *andrum*; *ἀνδρόμη*]. A form of elephantiasis Arabum characterized by edema of the scrotum.

Aneccrisia (*an-ek-ris'-e-ah*) [*ἀν* priv.; *ἐκ*, out; *κρίσις*, separation]. The suppression or deficiency of any excretion.

Anechinoplacid (*an-ek-i-no-plas'-id*) [*ἀν* priv.; *ἐχῖνος*, a hedgehog; *πλάξ*, a plate]. In biology, having the madreporic plate destitute of spines; the opposite of *Echinoplacid.*

Anectasia (*an-ek-ta'-se-ah*). See *Anectasis.*

Anectasis (*an-ek'-tas-is*) [*ἀν* priv.; *ἔκτασις*, extension]. Deficient size of an organ or part.

Aneilema (*an-i-le'-mah*) [*ἀνά*, up; *εἰλέειν*, to roll]. Flatulence; air or wind in the bowels; colic.

Anelectric (*an-el-ek'-trik*) [*ἀν* priv.; *ἤλεκτρον*, amber]. Readily giving up electricity.

Anelectrode (*an-el-ek'-trōd*) [*ἀνά*, upward; *ἤλεκτρον*, amber; *ὁδός*, a path]. The positive pole of a galvanic battery.

Anelectrotonic (*an-el-ek-tro-ton'-ik*) [*ἀν* priv.; *ἤλεκτρον*, electricity; *τόνος*, tension]. Relating to anelectrotonus. **A. Zone.** See *Zone.*

Anelectrotonos (*an-el-ek-trot'-o-nos*) [*ἀν* priv.; *ἤλεκτρον*, electricity; *τόνος*, tension]. Anodal electrotonus.

Anelectrotonus (*an-el-ek-trot'-o-nus*) [*ἀν* priv; *ἤλεκτρων*, electricity; *τόνος*, tension]. In electrotherapy, the decreased functional activity that occurs in a nerve in the neighborhood of the anode. See *Electrotonus* and *Catelectrotonus.*

Anel's Operation. See *Operations, Table of.* **A. Probe,** or **Sound,** a fine probe used in operations upon the lachrymal passages. **A. Syringe,** a syringe used in injecting fluids into the lachrymal passages.

Anelytrous (*an-el'-it-rus*) [*ἀν* priv.; *ἔλυτρον*, shard]. In biology, with membranous wings, and no elytra.

Anematopoiesis (*an-e-mat-o-poi-e'-sis*) [*ἀν* priv.; *αἷμα*, blood; *ποίησις*, a making]. Deficient formation of blood.

Anematosis, or **Anæmatosis** (*an-e-mat-o'-sis*) [*ἀναίματος*, bloodless]. 1. General, or idiopathic anemia; the morbid state or process that leads to anemia; that diathesis that is associated with an anemic tendency. 2. Anemia dependent on want of development of the red corpuscles of the blood.

Anemia (*an-e'-me-ah*) [*ἀν* priv.; *αἷμα*, blood]. Deficiency of blood, or deficiency of the relative number of its red corpuscles, the latter being the most generally understood meaning and use of the term. It may be *general* or *local.* Ischemia is a form of local anemia, and is the result of mechanical interference with the circulation of the affected part, either from vaso-motor spasm, thrombosis, embolism, or the action of styptics. The cause of general anemia is often obscure, or it may be due either to an insufficient food-supply and excessive drain or blood-waste, or from repeated hemorrhages or exhausting discharges. The action of certain poisons, as mercury and lead, will also produce a form of anemia. Prolonged anemia will give rise to fatty degeneration of the organs and tissues. *Idiopathic, pernicious, essential, progressive, malignant, etc.*, are terms denoting a type resisting all treatment and steadily progressing to a fatal termination. **A., Idiopathic,** advances to a fatal issue, and is associated with febrile symptoms; its causation is not evident; it is called also *Primary Anemia.* **A., Local.** See *Hyperemia, Ischemia,* and *Anemia.* **A. lymphatica.** Synonym of *Hodgkin's Disease.* See *Lymphadenoma.* **A., Primary.** See *A. Idiopathic.* **A., Secondary,** or **Symptomatic,** follows some ascertainable lesion or injury, or from some other disease. **A., Symptomatic.** See *A., Secondary.*

Anemiate, or **Anæmiate** (*an-e'-me-āt*) [*ἀν* priv; *αἷμα*, blood]. Affected with anemia.

Anemiated, or **Anæmiated** (*an-e'-me-a-ted*). See *Anemic.*

Anemied, or **Anæmied** (*an-e'-mid*) [*ἀν* priv.; *αἷμα*, blood]. Anemic.

Anemic, or **Anæmic** (*an-em'-ik, an-e'-mik*) [*ἀν* priv.; *αἷμα*, blood]. Pertaining to anemia. **A. Murmur,** a blood murmur, or soft murmur heard at the base of the heart over the great vessels. **A. Necrosis,** a necrosis or death of scattered patches of the heart muscle, due to a want of nourishment. It arises from atheroma occluding the cardiac arteries and their branches.

Anemometer (*an-e-mom'-et-er*) [*ἄνεμος*, wind; *μέτρον*, a measure]. An instrument for measuring the velocity of the wind.

Anemometry (*an-e-mom'-et-re*). [*ἄνεμος*, wind; *μέτρον*, a measure]. The art of measuring the velocity and direction of the wind, principally by means of the *anemometer.*

Anemone (*an-em'-o-ne*) [*ἀνεμώνη*, wind flower]. An important genus of ranunculaceous herbs, most of which have active medicinal and poisonous qualities, and some of which are used in medicine. See *Pulsatilla.*

Anemonin (*an-em'-o-nin*) [*ἀνεμώνη*, wind-flower], $C_{15}H_{12}O_6$. The active principle of the *Anemone.* It is given in bronchitis, asthma, and convulsive cough. Dose gr. ¼–¾ twice daily.

Anemonol (*an-em'-on-ol*) [*ἀνεμώνη*, wind-flower; *oleum*, oil]. The volatile oil extracted from anemone; it is a powerful vesicant.

Anemophilous (*an-em-off'-il-us*) [*ἄνεμος*, wind; *φίλος*, loving]. Depending for cross-fertilization upon the agency of the wind, as certain flowers.

Anemosis, or **Anæmosis** (*an-em-o'-sis*) [*ἀν* priv.; *αἷμα*, blood]. Defective supply of blood; anemia dependent on want of red blood corpuscles. See *Anematosis.*

Anemotrophy, or **Anæmotrophy** (*an-em-ot'-ro-fe*) [*ἀν* priv.; *αἷμα*, blood; *τροφή*, nourishment]. A deficiency of blood nourishment; an impoverished state of the blood.

Anencephalia (*an-en-sef-a'-le-ah*) [*ἀν* priv.; *ἐγκέφαλος*, brain]. Congenital absence of the brain.

Anencephalic (*an-en-sef-al'-ik*) [*ἀν* priv.; *ἐγκέφαλος*, brain]. Pertaining to or characterized by anencephalia.

Anencephalohemia (*an-en-sef-al-o-he'-me-ah*) [*ἀν* priv.; *ἐγκέφαλος*, brain; *αἷμα*, blood]. Insufficiency of blood in the brain.

Anencephaloid (*an-en-sef'-al-oid*) [*ἀν* priv.; *ἐγκέφαλος*, brain]. Pertaining to anencephalia.

Anencephaloneuria (*an-en-sef-al-on-u'-re-ah*) [*ἀν* priv.; *ἐγκέφαλος*, brain; *νεῦρον*, a nerve]. Imperfect nerve-action of the brain.

Anencephalotrophia, or **Anencephalotrophy** (*an-en-sef-al-o-tro'-fe-ah* or *-lot'-ro-fe*) [*ἀν* priv.; *ἐγκέφαλος*, brain; *τροφή*, nutrition]. Atrophy, or lack of nutrition of the brain.

Anencephalus (*an-en-sef'-al-us*) [ἀν priv.; ἐγκέφαλος, brain]. 1. A species of single autositic monsters in which there is neither a trace of the brain nor a rudimentary representative of it. 2. According to Saint-Hilaire, a variety of the above species in which there is extensive laying open of the spinal canal with absence of the spinal cord.

Anencephaly (*an-en-sef'-al-e*). See *Anencephalia.*

Anenergesia (*an-en-er-je'-se-ah*). See *Anenergia.*

Anenergia (*an-en-er'-je-ah*) [ἀν priv.; ἐνέργεια, energy]. Lack of vigor or power.

Anenteremia (*an-en-ter-e'-me-ah*) [ἀν priv.; ἔντερον, an intestine; αἷμα, blood]. Bloodless condition of the bowels.

Anenteroneuria (*an-en-ter-o-nu'-re-ah*) [ἀν priv.; ἔντερον, an intestine; νεῦρον, a nerve]. Intestinal atony.

Anenterotrophia (*an-en-ter-o-tro'-fe-ah*) [ἀν priv.; ἔντερον, an intestine; τροφή, nourishment]. Defective intestinal nutrition.

Anenterous (*an-en'-ter-us*) [ἀν priv.; ἔντερον, intestine]. In biology, having no intestine, as a tapeworm or a fluke.

Anepia (*an-ep'-e-ah*) [ἀνεπής, speechless]. Inability to speak.

Anepiploic (*an-ep-ip-lo'-ik*) [ἀν priv.; ἐπίπλοον, the caul]. Having no epiploön.

Anepithymia (*an-ep-e-thim'-e-ah*) [ἀν priv.; ἐπιθυμία, desire]. Loss of any natural appetite.

Anerethisia (*an-er-eth-iz'-e-ah*) [ἀν priv.; ἐρεθίζειν, to excite]. Imperfect irritability, as of a muscle or nerve.

Anergia (*an-er'-je-ah*) [ἀν priv.; ἔργον, work]. Sluggishness; inactivity.

Anergic (*an-er'-jik*) [ἀν priv.; ἔργον, work]. Characterized by sluggishness; as *anergic* dementia. **A. Stupor.** See *Insanity, Stuporous.*

Aneroid (*an'-er-oid*) [ἀ priv.; νηρός, wet; εἶδος, form]. Dispensing with a fluid, as quicksilver. **A. Barometer.** See *Barometer.*

Anerythroblepsia (*an-er-ith-ro-blep'-se-ah*). Same as *Anerythropsia.*

Anerythroblepsy (*an-er'-ith-ro-blep-se*). Same as *Anerythropsia.*

Anerythropsia (*an-er-ith-rop'-se-ah*) [ἀν priv.; ἐρυθρός, red; ὄψις, sight]. Subnormal color perception of red. See *Blindness.*

Anesis (*an'-es-is*) [ἄνεσις, remission]. An abatement or relaxation in the severity of symptoms.

Anesthesia, or **Anæsthesia** (*an-es-the'-ze-ah*) [ἀναισθησία, want of feeling]. A condition of insensibility or loss of feeling due to pathological conditions of the centers, conducting paths of the nerves, or the peripheral terminations of the same, or to artificial production by means of anesthetics. **A., Bulbar** or **Central,** due to central disease. **A., Crossed,** anesthesia on one side of the organism, due to a central lesion of the other side. **A., Doll's Head,** a form of anesthesia extending over the head, neck, and upper part of the chest. **A. dolorosa,** severe pain experienced after the occurrence of complete motor and sensory paralysis, a symptom observed in certain diseases of the spinal cord. **A., Local,** of a limited part of the body. **A., Muscular,** loss of the muscular sense. **A., Peripheral,** depending upon conditions of the end-organs of the nerves. **A., Surgical,** by means of anesthetics for the purpose of preventing pain, producing relaxation of muscles, or for diagnostic purposes.

Anesthesimeter (*an-es-thes-im'-et-er*) [ἀναισθησία, want of feeling; μέτρον, a measure]. An instrument to measure the amount of an anesthetic administered in a given time.

Anesthetic, or **Anæsthetic** (*an-es-thet'-ik*) [ἀν priv.; αἰσθάνεσθαι, to feel]. A substance that produces insensibility to feeling or to acute pain, diminished muscular action, and other phenomena. Anesthetics may be general, local, partial and complete. **A., General;** the following are the substances that have been used for general anesthesia: AMYLENE, C_5H_{10}, a mobile liquid, thin, colorless, translucent; action rapid, producing partial anesthesia. It is used in Germany under the name of *Pental;* it is best administered by means of Junker's inhaler, which modifies its unpleasant odor; it should not be brought near a flame. CARBON TETRACHLORID, not so irritating to the organs of respiration, but far more dangerous than chloroform. CHLORAL HYDRATE, action indirect and incomplete. Rarely, if ever, now used. CHLOROFORM, by inhalation. Largely employed in general surgery. It seems to have a selective action upon the nervous system, and also exercises a direct influence upon the muscular tissues of the heart. It paralyzes the vaso-motor system, and death results from cardiac paralysis. Chloroform should always be administered freely mixed with air. The *Method of definite mixtures,* however, as recommended by Clover, and Bert, while admirable in theory, is not entirely practical. The *Lister Method,* also known as the *Scotch* or *Open Method* of administering chloroform, consists in pouring a small amount of the anesthetic upon a common towel arranged in a square of six folds, and holding this as near to the face as can be borne without inconvenience. Various inhalers have been devised for the administration of chloroform, the best of which are *Clover's,* which consists of a large bag capable of containing a given volume of air, into which the vapor of a given quantity of chloroform is allowed to enter, the mixture being so arranged that the tension of chloroform vapor in the air is maintained below 4.5 per cent; *Junker's,* as modified by *Dudley Buxton,* which consists in the inhalation of air containing the chloroform vapor, the latter being taken up by pumping the air through a bottle containing half an ounce of the anesthetic; *Krohne and Sesemann* have modified the foregoing by doing away with the intermittent, jerky delivery of the vapor and by adding to the face-piece an expiration-valve guarded by a stiff feather, which, rising in expiration and falling in inspiration, registers the force and strength of respiration (*Feather respiration register*); *Sansom's* apparatus is a modification of *Snow's,* substituting a gutta-percha covering for the cold-water jacket of Snow; *Snow's inhaler* consists of a metallic cylindrical vessel, containing two coils of blotting paper, permitting free circulation of air, and surrounded by another cylinder containing water, the latter being for the purpose of equalizing the temperature. *Syncope* resulting from chloroform administration should be treated by lowering the head, artificial respiration, inhalation of nitrite of amyl, electrical stimulation, and possibly acupuncture of the heart. ETHENE CHLORID, formerly called *ethylene chlorid, Dutch liquid, chloric ether,* closely resembles chloroform, but is less of a cardiac depressant. It is considered safer than chloroform. Death results from paralysis of the respiratory centers. ETHER, by inhalation, is probably the safest known agent for the production of prolonged narcosis. Its action is directed largely to the nervous system, which becomes profoundly affected. It frequently causes spasmodic action and suspension of respiratory action. Death results from paralysis of respiration. It may be administered alone or in combination with nitrous oxid gas, in which case the patient is more rapidly narcotized. A variety of inhalers have been devised

for its administration, as follows: *Allis's* is probably the best form of open inhaler. It consists of a metal frame, so arranged that a flannel bandage can be stretched across and the whole surrounded with a leather case, which acts as a face-piece. *Clover's portable ether inhaler* consists of a dome-shaped receptacle pierced by a central shaft connecting with a rubber bag into which the patient breathes. Moving with the face-piece is a metal indicator to register the amount of ether admitted. A water chamber surrounds the ether vessel to regulate the temperature. *The Cone* is much used in America. A towel is folded into the shape of a cone, a sponge is placed at the apex, and the ether poured upon this. *Hewitt's apparatus* may be used for giving gas and ether. In his inhaler the inspiratory and expiratory valves are placed in a little chamber near the face-piece; a free draught of air is permitted. *Ormsby's inhaler* consists of a leather face-piece, crowned with a cone-shaped wire cage covered with leather and joined to a soft leather bag, covered by a loose net to prevent excessive expansion. The wire cage contains a sponge on which the ether is poured. *Rendle* adds to a cone containing a flannel cap a mask for the face. *Rectal etherization* may be resorted to in operations about the face and throat. The ether vapor is introduced into the bowel, the process taking longer for complete anesthetization than by the usual method. ETHIDENE CHLORID is similar in its action to chloroform. Patients take a longer time to recover consciousness than when chloroform is used, but they experience fewer after-effects, and recover rapidly. Anesthetization occurs in three to five minutes. HYDROBROMIC ETHER (*bromid of ethyl*) produces unconsciousness and anesthesia in one minute, and complete muscular relaxation in two or three minutes. The heart's action is somewhat weakened. Return to consciousness after withdrawal of the ether is very prompt. Its use may be followed by vomiting. According to some observers, death results from cardiac failure, while others believe it kills by direct action upon the respiratory center. It is best administered by an Allis inhaler, and is of most service in minor surgery for short operations. NITROUS OXID, by inhalation, is much used by dentists for extraction of teeth. The symptoms resemble those of asphyxia, hence it is more important to watch the respiration than the pulse. It may be employed in minor surgical operations. There are but few after-effects, those most often observed being headache and malaise. *Bert's method* of administering nitrous oxid consists in giving it in conjunction with oxygen under pressure; by this method the administration may be prolonged indefinitely. *Clover's Gas and Ether Inhaler* is intended for the administration of a mixture of these anesthetics; it is so arranged that gas can be given alone, or in combination with the ether. *Buxton's apparatus* is used for the administration of gas only, and possesses a special contrivance to filter the air. *Fontaine's chamber* is an apparatus devised to keep the patient under an atmospheric pressure equal to 26 inches mercury, so that the vapor inhaled would be 50 per cent. gas and 50 per cent. air, and asphyxia thus be prevented. The employment of *supplemental bags* has been advocated by Braine. The patient breathes into these bags, the gas supply being turned off and the expiratory valve closed. It is claimed that this method produces a more prolonged period of unconsciousness. Various accessory instruments are needed in the use of gas, such as gags, mouth openers, and mouth props, spoons, etc. **A., Local,** an anesthetic that, locally applied, produces absence of sensation in the organ or tissue so treated. ALCOHOL, locally, removes sensation to pain, while tactile sense persists. Cool the alcohol to about 10° below the freezing point, by placing it in ice and salt, and place the part to be numbed in it. BISULPHID OF CARBON, by spray or irrigation, has a disgusting odor, and is a powerful poison. CARBOLIC ACID, painted over the skin—its action, however, is caustic. CHLORETHYL, in vapor form, is useful in minor and dental surgery. CHLORID OF METHYL, CH_3Cl, allowing the liquid chlorid to drop on the skin or mucous membrane. Unless kept carefully under control the vitality of the tissues may be affected. COCAIN is used in subcutaneous injections, by painting over mucous surfaces, or by instillation into the eye. As a paint a 20 per cent solution is used, weaker preparations being of little value over cutaneous surfaces; several coats are necessary. A 10 per cent. solution should be used on mucous surfaces; for the eye a 4 per cent. solution will answer, and this solution is strong enough when cocain is employed as a spray. Hypodermatically, ♏ij-v of a 10 to 20 per cent. solution are usually injected, and this may be repeated two or three times during the operation. DRUMIN is oxalate of lime prepared from a euphorbiaceous plant. It was formerly suggested as a local anesthetic, but has been found not to possess anesthetic properties. ETHER, in spray, is recommended by Dr. B. W. Richardson. The anesthesia thus produced is confined to the skin, and is very transient. It may produce a slough from excessive freezing. FARADIC CURRENTS were formerly used by dentists, but are of no value. RHIGOLENE, in spray, its use being similar to that of ether. **A. Mixtures** contain combinations of substances for producing anesthesia. The following are the most important: A. C. E. MIXTURE:—alcohol, sp. gr. .838, 1 part; chloroform, sp. gr. 1.497, 2 parts; ether, sp. gr. .735, 3 parts. BILLROTH'S:—chloroform 3 parts, alcohol and ether each 1 part. It is best administered by the open method. LINHART'S:—alcohol 1, chloroform 4. It is administered similarly to chloroform. MARTINDALE'S:—a volumetric mixture, the ingredients of which evaporate almost uniformly; it consists of absolute alcohol, sp. gr. .795, one volume; chloroform, sp. gr. 1.498, two volumes; pure ether, sp. gr. .720, three volumes. MEDICO-CHIRURGICAL SOCIETY OF LONDON:—ether 3, chloroform 2, alcohol 1. METHYLENE, or BICHLORID OF METHYLENE, a mixture of methylic alcohol 30 per cent., and chloroform 70 per cent. The so-called "*Liquid of Regnauld*" consisted of 80 per cent. chloroform, 20 per cent. methylic alcohol. Methylene is not much used, several deaths from cardiac paralysis having occurred from its employment. NUSSBAUM'S, ether 3, chloroform 1, alcohol 1. RICHARDSON'S:—alcohol 2, chloroform 2, ether 3. SANFORD'S:—the so-called "CHLORAMYL" is a mixture of chloroform and amyl nitrate in the proportion of two drachms of the nitrate to the pound of chloroform. It is a dangerous mixture, both drugs depressing the heart. VIENNA GENERAL HOSPITAL:—ether 9, chloroform 30, alcohol 9. VIENNA MIXTURE:—ether 3, chloroform 1. VON MERING'S:—chloroform one volume, dimethylacetal two volumes. It is said to produce no failure of respiration or heart, and no lowering of the blood pressure. WACHSMUTH'S:—one-fifth part of oil of turpentine is added to the chloroform. It is said to prevent any danger of heart-failure.

Various methods have been suggested by means of which the influence of the anesthetic may be prolonged or its dangers and sequelæ largely averted. The following are the most important:—DASTRE-MORAT'S; con-

sists in the injection of 1 or 1.5 c.c. of the following mixture:—morph. hydrochlor. 10 centigrm., atropin. sulph. 5 milligrm., aq. destill. 10 grms. The atropin is said to lessen the after-sickness and abrogate salivation and bronchial secretion. FORNÉ'S:—the preliminary administration of chloral before using chloroform, 2 to 5 grams an hour before. KAPPELER'S:—a combination of chloral hydrate and ether, 40 grains of the former. The duration of anesthesia is prolonged and the recovery retarded, but the after-effects are more marked. NUSSBAUM'S:—injection of $\frac{1}{8}$ to $\frac{1}{2}$ grain of morphin previous to the administration of chloroform. Less of the anesthetic is needed, while the stupor is prolonged; vomiting is increased. OBALINSKI'S:—hypodermatic injection of cocain, 2 to 5 centigrams of a three per cent. solution during chloroform anesthetization. TRÉLAT'S:—administration of 2 to 4½ grams of chloral hydrate, and 10 to 20 grams of syrup of morphin in 60 grams of water, repeating the dose in 15 minutes, and following by chloroform anesthesia.

Attempts have repeatedly been made to estimate the comparative safety of the various anesthetics used for the production of general anesthesia. In 1879 the "GLASGOW COMMITTEE" of the British Medical Association concluded in favor of ether, declaring that chloroform lowered the blood tension and depressed the action of the heart. In 1889 the HYDERABAD COMMISSION arrived at the conclusion that chloroform produced an arrest of respiration before there was a stoppage of the heart. It is thought, however, that the climate—that of India—may have had some effect in producing this result, since in temperate climates the heart usually fails before there is a depression of respiration.

Anesthesia (*an-es-thet'-is-izm*) [ἀναίσθητος, insensible]. The quality of being anesthetic.

Anesthetization (*an-es-thet-iz-a'-shun*) [ἀναίσθητος, insensible]. The process of rendering insensible.

Anesthetize (*an-es'-thet-iz*) [ἀναίσθητος, insensible]. To put under the influence of an anesthetic.

Anesthetizer (*an'-es-thet-i-zer*) [ἀναίσθητος, insensible]. One who administers an anesthetic.

Anethol (*an'-eth-ol*) [ἀνά, up; αἴθειν, to burn; *oleum*, oil], $C_{10}H_{12}O$. The methyl ether of anol; it occurs in ethereal oils, from which it separates in the cold in the form of white, shining scales, melting at 21° and boiling at 232°. It is the chief constitutent of the essential oils of anise and fennel. It is employed in preparing the *Elixir anethi*, N. F., being more fragrant and agreeable than the anise oil.

Anethum (*an-e'-thum*) [ἄνηθον, anise: *gen.*, *Anethi*]. Dill; the dried fruit of *Peucedanum graveolens*, indigenous to Southern Europe. Aromatic, carminative, and stimulant. **A. Aqua** (B. P.). Dose ℥ i–ij. **A. Oleum** (B. P.). Dose ♏ i–iv.

Anetic (*an-et'-ik*) [ἀνετικός, relaxing]. Soothing; calmative; anodyne.

Anetiological (*an-e-te-o-loj'-ik-al*) [ἀν priv.; αἰτία, cause; λόγος, word]. Having no known cause; dysteleological.

Anetus (*an'-et-us*) [ἀνετός, loosened]. Any intermittent fever.

Aneuria (*an-u'-re-ah*) [ἀ priv.; νεῦρον, a nerve or fiber]. Lack of nervous power or stimulus.

Aneuric (*an-u'-rik*) [ἀ priv.; νεῦρον, a nerve or fiber]. Characterized by aneuria; impairing the nervous activity.

Aneurysm (*an'-u-rism*) [ἀνεύρυσμα, a widening]. A tumor consisting of a dilated artery, or communicating with an artery. In the early stages there is an expansile pulsation of the tumor generally associated with a systolic murmur or bruit. In the later stages the laminated coagulum increases, so that pulsation may be absent, and pressure of the growing aneurysm upon the adjacent organs may give rise to secondary troubles, as pain, dyspnea, dysphagia, paralysis, or spasm. Inequality in the pupils follows from pressure on the sympathetic in thoracic aneurysm. Aneurysm may be caused by rupture, wounding, disease, or weakness of the arterial walls, or by increased blood pressure following over-exertion. Embolism also may be a cause; gout and alcoholism act as predisposing causes. *Cardiac dilatation* is sometimes spoken of as aneurysm of the heart. **A., Abdominal,** one of the abdominal aorta. **A. by Anastomosis,** a dilatation of a large number of vessels—small arteries, veins, and capillaries—the whole forming a pulsating tumor under the skin. This form of aneurysm is especially seen upon the scalp. **A., Arterio-venous,** the formation of an abnormal communication between an artery and a vein. If the communication is direct it is termed *aneurysmal varix*, but when there is an intervening sac it is called a *varicose aneurysm*. **A., Bérard's,** a varicose aneurysm with the sac in the tissues immediately around the vein. **A., Cirsoid,** a tortuous lengthening and dilatation of a part of an artery. **A., Compound,** one in which one or several of the coats of the artery are ruptured and the others merely dilated. **A., Consecutive, or Diffused,** follows rupture of all the arterial coats with infiltration of surrounding tissues. **A., Dissecting,** when the blood forces its way between the media and adventitia. **A., Ectatic,** an expansion of a portion of an artery due to yielding of all the coats. It is merely a dilatation of the vessel. **A., Endogenous,** one formed by disease of the vessel walls. **A., Exogenous,** one due to traumatism. **A., False, or Spurious,** one in which there has occurred a rupture of all the coats, and the effused blood is retained by the surrounding tissues. **A., Fusiform,** a spindle-shaped dilatation of the artery. **A., Medical,** an internal aneurysm; *i. e.*, one situated within the thoracic or abdominal cavity. **A., Mixed.** See *A., Compound.* **A., Sacculated,** a sac-like dilatation of an artery communicating with the main arterial trunk by an opening that may be relatively large or small. **A., Park's,** a variety of arterio-venous aneurysm in which the arterial dilatation communicates with two contiguous veins. **A., Pott's.** Same as *Aneurysmal Varix.* **A., Rodrigues's,** a varicose aneurysm in which the sac is immediately contiguous to the artery. **A., Spurious.** See *A., False.* **A., Verminous,** one containing hematozoa.

Aneurysmal (*an-u-riz'-mal*) [ἀνεύρυσμα, a widening]. Of the nature of or pertaining to an aneurysm. **A. Varix.** See *Aneurysm.*

Aneurysmatic (*an-u-riz-mat'-ik*) [ἀνεύρυσμα, a widening]. Affected with or of the nature of aneurysm.

Aneuthanasia (*an-u-than-a'-ze-ah*) [ἀ priv.; εὐθανασία, an easy death]. A painful or difficult death.

Anfract (*an'-frakt*) [*anfractus*, a winding]. An anfractuosity or sinuosity; an anfractuous organ or structure.

Anfractuose (*an-frak'-tu-ōs*) [*anfractus*, a winding]. In biology, bent back and forth, winding, as certain stamens, or the brain fissures.

Anfractuosity (*an-frak-tu-os'-it-e*) [*anfractus*, a bending round]. Any one of the furrows or sulci between the cerebral convolutions.

Anfractuous (*an-frak'-tu-us*) [*anfractus*, a bending round]. Characterized by windings and turnings; sinuous.

Angeiectasis (*an-je-ek'-tas-is*). See *Angiectasis.*

Angeio- (*an'-je-o*). See *Angio-.*

Angelic Acid (*an-jel'-ik as'-id*). See *Acid.*

Angelica (*an-jel'-ik-ah*) [L.]. The seeds and root of *Archangelica officinalis* and other species. An aromatic stimulant and emmenagogue. Dose of the fld. ext.: Seeds ℥ v–x; root ʒ ss–j. Unof.

Angel's Wing (*ān'-jelz wing*). A deformity of the scapula in which it turns forward and then backward, giving the shoulder a peculiar dorsal bulge, as in a scoliotic chest.

Anger's Operation. See *Operations, Table of.*

Angiectasis (*an-je-ek'-tas-is*) [ἀγγεῖον, a blood-vessel; ἔκτασις, dilatation]. Abnormal dilatation of a vessel, as in aneurysm, etc.; enlargement of capillaries.

Angiectopia (*an-je-ek-to'-pe-ah*) [ἀγγεῖον, a vessel; ἐκτοπος, displaced]. Displacement or abnormal position of a vessel.

Angielcus, or **Angeielcus** (*an-je-el'-kus*) [ἀγγεῖον, a vessel; ἕλκος, an ulcer]. An ulcer in the walls of a vessel.

Angiemphraxis (*an-je-em-fraks'-is*) [ἀγγεῖον, a vessel; ἔμφραξις, obstruction]. Obstruction of a vessel, or of vessels.

Angiitis, or **Angeiitis** (*an-je-i'-tis*) [ἀγγεῖον, a vessel; ιτις, inflammation]. Inflammation of a lymph vessel or blood vessel.

Angina (*an'-jin-ah* or *an-ji'-nah*) [*angere*, to strangle]. A sense of choking or suffocation, a symptom of inflammatory affections of the pharynx. It is synonymous with *Cynanche*. **A. acuta** or **simplex**, simple sore-throat. **A. externa.** Synonym of *Mumps*. **A., Hogskin.** Synonym of *Diphtheria*. **A. laryngea.** Synonym of *Laryngitis*. **A. lingualis.** Same as *Glossitis*. **A., Ludwig's**, acute suppurative inflammation of the connective tissue surrounding the submaxillary gland. **A. membranacea.** Synonym of *Croup*. **A. parotidea**, the mumps, or *Parotitis, q. v.* **A. pectoris**, a paroxysmal neurosis with intense pain and oppression about the heart. It usually occurs in the male after forty years of age, and is generally associated with diseased conditions of the heart and aorta. There is a sense of impending death, and frequently there is a fatal termination. **A. pectoris-vasomotoria**, a term given by Nothnagel and Landois to an angina associated with vaso-motor disturbances, coldness of the surface, etc., but never resulting fatally. **A., Pseudo-**, is a neurosis occurring in young anemic females, characterized by a less grave set of symptoms and never resulting fatally. **A. simplex.** See *A. acuta*. **A. tonsillans**, *Quinsy, q. v.* **A. trachealis**, the *Croup, q. v.* **A. ulcero-membranous.** See *Tonsillitis, herpetic.*

Anginoid (*an'-jin-oid*) [*angere*, to strangle]. Resembling angina.

Angioasthenia (*an-je-o-as-the'-ne-ah*) [ἀγγεῖον, a vessel; ἀσθένεια, weakness]. Atony of the blood-vessels.

Angiocarditis (*an-je-o-kar-di'-tis*) [ἀγγεῖον, a blood-vessel; καρδία, the heart; ιτις, inflammation]. An inflammation of the heart and blood-vessels (hypothetical).

Angiocarpous (*an'-je-o-kar-pus*) [ἀγγεῖον, a vessel; καρπός, fruit]. In biology, having the fruit invested with a distinct covering or husk; having a closed apothecium; having the hymenium inclosed by the sporocarp.

Angiochalasis, or **Angeiochalasis** (*an-je-o-kal'-as-is*) [ἀγγεῖον, a vessel; χάλασις, relaxation]. Dilatation or relaxation of the blood-vessels.

Angiocholitis (*an-je-o-ko-li'-tis*) [ἀγγεῖον, a vessel; κολή, bile; ιτις, inflammation]. Inflammation of the biliary ducts.

Angioderma pigmenotosum (*an-je-o-der'-mah pig-men-to'-sum*). See *Atrophoderma.*

Angiodiastasis (*an-je-o-di-as'-tas-is*) [ἀγγεῖον, a vessel; διάστασις a separation]. 1. Displacement or dilatation of a vessel. 2. Retraction of the severed ends of a blood-vessel.

Angioembolus (*an-je-o-em'-bo-lus*) [ἀγγεῖον, a vessel; ἐμβολος, anything thrown in]. A plug (as of clotted blood) in a vessel.

Angiogenesis (*an-je-o-jen'-es-is*). See *Angiogeny.*

Angiogeny (*an-je-og'-en-e*) [ἀγγεῖον, a vessel; γεννάειν, to produce]. The development of the vessels.

Angioglioma (*an-je-o-gli-o'-mah*) [ἀγγεῖον, a vessel; γλία, glue; ὅμα, a tumor: *pl.*, *Angiogliomata*]. A gliomatous vascular tumor of the spinal cord.

Angiograph (*an'-je-o-graf*) [ἀγγεῖον, a vessel; γράφειν, to write]. A form of sphygmograph invented by Landois.

Angiography (*an-je-og'-ra-fe*) [αγγεῖον, a vessel; γράφη, a writing]. A description of the vessels; angiology.

Angiohemothrombus (*an-je-o-hem-o-throm'-bus*) [ἀγγεῖον, a vessel; αἷμα, blood; θρόμβος, thrombus]. A clot in a blood-vessel.

Angiohydrology (*an-je-o-hi-drol'-o-je*) [ἀγγεῖον, a vessel; ὕδωρ, water; λόγος, science]. The science of the lymphatic vessels, their contents, etc.

Angiokeratoma (*an-je-o-ker-at-o'-mah*) [αγγεῖον, a vessel; κέρας, horn; ὅμα, tumor]. Lymphangiectasis; Telangiectic warts; a very rare disease of the extremities characterized by warty-looking growths that develop on dilated vessels in persons with chilblain, etc. Dark spots the size of pins' points or pins' heads, evidently vascular, develop as an attack of chilblains is subsiding. The disease is peculiar to childhood, and especially occurs in females.

Angioleucitis (*an-je-o-lu-si'-tis*) [ἀγγεῖον, a vessel; λευκός, white; ιτις, inflammation]. Inflammation of the lymphatic vessels.

Angiolithic (*an-je-o-lith'-ik*) [ἀγγεῖον, a vessel; λίθος, a stone]. Literally, a qualification applied to a vascular and crystalline formation. Practically applied to neoplasms in which crystalline or mineral deposits take place, with hyaline degeneration of the coats of the vessels.

Angiology (*an-je-ol'-o-je*) [ἀγγεῖον, a vessel; λόγος, science]. The science of the blood-vessels and lymphatics.

Angiolymphitis (*an-je-o-limf-i'-tis*) [ἀγγεῖον, a vessel; *lympha*, lymph; ιτις, inflammation]. Same as *Angioleucitis.*

Angiolymphoma (*an-je-o-limf-o'-mah*) [ἀγγεῖον, a vessel; *lympha*, water; ὅμα, tumor: *pl.*, *Angiolymphomata*]. A tumor formed of lymphatic vessels.

Angioma (*an-je-o'-mah*) [ἀγγεῖον, a vessel; ὅμα, a tumor: *pl.*, *Angiomata*]. A tumor formed of blood-vessels. Called also *Erectile* or *Vascular Tumor*. **A., Cavernous**, with communicating alveolar spaces. See *Varix, Cirsoid.* Capillary and venous angiomata are called *Nevi*, or *Mothers' Marks*. **A., Cystic.** Synonym of *Lymphangioma circumscriptum*. **A., Infective.** See *A. serpiginosum*. **A. pigmentosum atrophicum.** See *Xeroderma pigmentosum*. **A. serpiginosum**, infective angioma; nevus lupus; a very rare disease of the skin in which minute vascular points are formed in rings or other groups, that spread at the borders, while fresh points are continually developing beyond them. The points look like grains of cayenne pepper. It occurs usually in girls, but its etiology and pathology are unknown.

Angiomalacia (*an-je-o-mal-a'-se-ah*) [ἀγγεῖον, a vessel; μαλακία, a softening]. Softening of the blood-vessels.

Angiometer (*an-je-om'-et-er*). See *Sphygmograph.*

Angiomonospermous (*an-je-o-mon-o-sper'-mus*) [*ἀγγεῖον*, a vessel; *μόνος*, alone; *σπέρμα*, seed]. In biology, producing seeds within a closed ovary.

Angiomyoma, or **Angimyoma** (*an-je-o-mi-o'-mah* or *an-je-mi-o'-mah*) [*ἀγγεῖον*, a vessel; *μῦς*, a muscle; *ὄμα*, a tumor: *pl.*, *Angiomyomata*]. A vascular and erectile muscular tumor.

Angioneoplasm (*an-je-o-ne'-o-plazm*). See *Angioneoplasma*.

Angioneoplasma (*an-je-o-ne-o-plaz'-mah*) [*ἀγγεῖον*, a vessel; *νέος*, new; *πλάσμα*, moulded substance: *pl.*, *Angioneoplasmata*]. A neoplasm made up of blood-vessels or lymph-vessels.

Angioneurosin (*an-je-o-nu'-ro-sin*). Synonym of *Nitroglycerin*.

Angioneurosis (*an-je-o-nu-ro'-sis*) [*ἀγγεῖον*, a vessel; *νεῦρον*, a nerve]. A neurosis of the blood-vessels; a disturbance of the vaso-motor system,—a symptom of many diseases.

Angio-neurotic (*an-je-o-nu-rot'-ik*) [*ἀγγεῖον*, a vessel; *νεῦρον*, a nerve]. Pertaining to angioneurosis. **A. Edema**, a swelling, with associated symptoms, probably due to vaso-motor lesion.

Angionoma (*an-je-on'-o-mah*) [*ἀγγεῖον*, a vessel; *νομή*, ulcer]. Ulceration of a vessel.

Angioparalysis (*an-je-o-par-al'-is-is*) [*ἀγγεῖον*, a vessel; *παραλύειν*, to disable on one side]. Vaso-motor paralysis.

Angioparalytic (*an-je-o-par-al-it'-ik*) [*ἀγγεῖον*, a vessel; *παραλύειν*, to disable on one side]. Relating to or characterized by angioparalysis.

Angioparesis (*an-je-o-par'-es-is*) [*ἀγγεῖον*, a vessel; *πάρεσις*, a letting go]. Paresis or partial paralysis of the vaso-motor apparatus.

Angiopathy (*an-je-op'-a-the*) [*ἀγγεῖον*, a vessel; *πάθος*, disease]. Any disease of the vascular system.

Angioplania (*an-je-o-pla'-ne-ah*) [*ἀγγεῖον*, a vessel; *πλάνη*, a wandering]. Irregularity or abnormality in the course of a vessel.

Angioplastic (*an-je-o-plas'-tik*). See *Vasifactive*.

Angiorrhagia or **Angeiorrhagia** (*an-je-or-a'-je-ah*) [*ἀγγεῖον*, a vessel; *ῥηγνύναι*, break]. Bleeding from a vessel.

Angiorrhea (*an-je-or-e'-ah*) [*ἀγγεῖον*, a vessel; *ῥεῖν*, to flow]. An oozing of blood.

Angiorrhexis (*an-je-o-reks'-is*) [*ἀγγειον*, a vessel; *ῥῆξις*, a bursting]. Rupture of a blood-vessel.

Angiosarcoma (*an-je-o-sar-ko'-mah*) [*ἀγγεῖον*, a vessel; *σάρξ*, flesh; *ὄμα*, a tumor: *pl.*, *Angiosarcomata*]. A vascular sarcoma.

Angiosarcomatous (*an-je-o-sar-ko'-mat-us*) [*ἀγγεῖον*, a vessel; *σάρξ*, flesh; *ὄμα*, a tumor]. Of the nature of or affected with angiosarcoma.

Angioscope (*an'-je-o-skōp*) [*αγγεῖον*, a vessel; *σκοπεῖν*, to inspect]. An instrument for examining the capillary vessels.

Angiosialitis (*an-je-o-si-al-i'-tis*) [*ἀγγεῖον*, a vessel; *σιαλον*, saliva; *ιτις*, inflammation]. Inflammation of the duct of a salivary gland.

Angiosis (*an-je-o'-sis*) [*ἀγγεῖον*, a vessel]. Any disease of blood-vessels or lymphatics.

Angiospasm (*an'-je-o-spazm*) [*ἀγγεῖον*, a vessel; *σπασμός*, a spasm]. A convulsive neurosis of the blood-vessels; a vaso-motor spasm.

Angiospastic (*an-je-o-spas'-tik*) [*ἀγγεῖον*, a vessel; *σπασμός*, spasm]. Characterized by or of the nature of angiospasm.

Angiosperm (*an'-je-o-sperm*) [*ἀγγεῖον*, a vessel; *σπέρμα*, seed]. In biology, a plant the seeds of which are produced within a closed vessel.

Angiosporous (*an-je-os'-po-rus*) [*ἀγγεῖον*, a vessel; *σπόρος*, a seed]. In biology, producing spores or asci within a hollow receptacle, said of fungi.

Angiostegnosis (*an-je-o-steg-no'-sis*) [*ἀγγεῖον*, a vessel; *στέγνωσις*, stoppage]. Stoppage or constriction of a vessel.

Angiostegnotic (*an-je-o-steg-not'-ik*) [*ἀγγεῖον*, a vessel; *στέγνωσις*, stoppage]. Relating to angiostegnosis; astringent; causing contraction of blood-vessels.

Angiostenosis (*an-je-o-ste-no'-sis*) [*ἀγγεῖον*, a vessel; *στένωσις*, a straitening]. Constriction or narrowing of a vessel.

Angiostomatous (*an-je-o-sto'-mat-us*) [*ἀγγεῖον*, a vessel; *στόμα*, mouth]. In biology, having the mouth or opening narrow or not dilatable.

Angiostrophe (*an-je-os'-tro-fe*) [*ἀγγεῖον*, a vessel; *στροφή*, twist]. Torsion of a vessel, as for the control of hemorrhage.

Angiotasis (*an-je-ot'-as-is*) [*ἀγγεῖον*, a vessel; *τάσις*, tension]. The tension of the vessels.

Angiotatic (*an-je-ot-at'-ik*) [*ἀγγεῖον*, a vessel; *τάσις*, tension]. Relating to angiotasis.

Angiotelectasia (*an-je-o-tel-ek-ta'-ze-ah*) [*ἀγγεῖον*, a vessel; *τέλος*, end; *ἔκτασις*, dilatation]. Dilatation of capillary vessels.

Angiotomy (*an-je-ot'-o-me*) [*ἀγγεῖον*, a vessel; *τόμη*, a cutting]. The incision or dissection of a vessel.

Angle (*ang'-gl*) or **Angulus** (*ang'-gu-lus*) [*angulus*, an angle]. The degree of divergence of two lines that meet each other; the space between two such lines. **A. a.**, that one of Lissauer's angles between the radius fixus and a line joining the alveolar and subnasal points. **A. of Aberration.** See *A. of Deviation*. **A., Ackermann's**, certain angles, characteristic of kyphosis, which mark the base of the skull in cases of encephalocele and hydrocephalus; for example, the occipito-sphenoidal angle is abnormally sharp. **A., Acromial**, that formed between the head of the humerus and the clavicle. **A., Alpha.** 1. In optics, that formed by the intersection of the visual line and optic axis. 2. In craniometry, that one of Lissauer's angles between the radius fixus and a line joining the hormion and subnasal point. **A., Alveolar**, that formed between a line passing through a spot beneath the nasal spine and the most prominent point of the lower edge of the alveolar process of the superior maxilla and the cephalic horizontal line. **A., Alveolo-condylar.** See *A., Orbito-alveolo-condylar*. **A., Anterior (of Ilium).** See *A., External (of Ilium)*. **A., Anterior (of Scapula).** See *A., Cervical (of Scapula)*. **A., Anterior Parietal.** See *A., Parietal (of Quatrefages)*. **A., Antero-external (of Ischium)**, in veterinary anatomy, the posterior extremity of the supracotyloid crest. **A., Antero-internal (of Ischium)**, in veterinary anatomy, the portion of the ischium that helps to close the obturator foramen inwardly. **A. of Aperture**, in optics, that included between two lines joining the opposite points of the periphery of a lens and the focus. **A.. Auricular**, in craniometry, those cephalic angles having their apices at Broca's auricular point. **A., Auriculo-cranial**, in craniometry, the auricular angles whose sides pass through the cranium. **A., Auriculo-facial**, in craniometry, those auricular angles whose sides pass through the face. **A., Auriculo-frontal.** See *A., Frontal*. **A., Auriculo-occipital**, in craniometry, the combined sub-occipital and supra-occipital angles. **A., Auriculo-parietal.** See *A., Parietal (of Broca)*. **A. b.**, that one of Lissauer's angles included between the radius fixus and a line joining the bregma and nasion. **A., Barclay's.** See *A., Orifacial*. **A., Basifacial**, in craniometry, that between the basi-cranial and basifacial axes. **A., Basilar**, in craniometry, that between the naso-basilar and basi-alveolar lines. **A., Beta**, that one of Lissauer's angles

included between the radius fixus and a line joining the hormion and bregma. **A., Bi-orbital,** in optics, that formed by the intersection of the axes of the orbits. **A., Broca's.** See *A., Facial, A., Occipital,* and *A., Parietal.* **A. c.,** that one of Lissauer's angles included between the radius fixus and a line joining the lambda and opisthion. **A., Camper's.** See *A., Facial,* and *A., Maxillary.* **A., Carpal,** in biology, the bend of the wing. **A., Cephalic,** in craniometry, a general term for the cranial and facial angles. **A., Cerebellar.** See *A., Suboccipital.* **A., Cerebral.** 1. In craniometry, that formed by the frontal, Broca's parietal, and the supra-occipital angles. 2. See *A. of Segond.* **A., Cervical (of Scapula),** in veterinary anatomy, the point of union of the anterior and superior borders of the scapula. **A., Chi,** that one of Lissauer's angles included between two lines running from the hormion to the basion and staphylion. **A., Cloquet's.** See *A., Facial.* **A., Condylar,** that between the planes of the basilar groove and the occipital foramen. **A., Co-orbital,** in craniometry, that formed by the crossing of the anatomical plane of the head by the bi-orbital plane. **A., Coracoscapular,** in biology, that between the axes of the coracoid and scapula. **A., Coronofacial (of Gratiolet),** in craniometry, the angle that the facial line of Camper forms with the plane passing through the coronal suture. **A., Costal.** See *A., Subcostal.* **A., Cotyloid,** in veterinary anatomy, the portion of the ilium included between the cotyloid foramen and the supra-cotyloid crest. **A., Cotyloidean.** See *A., Antero-external (of Ischium).* **A., Cranial,** in craniometry, angles corresponding to the auricular angles, but having their apices at the anterior border of the occipital foramen. **A., Craniofacial (of Ecker).** See *A., Metafacial.* **A., Craniofacial (of Huxley),** in craniometry, that formed at the middle of the anterior border of the jugum sphenoidale by lines drawn from the basion and nasal spine. **A., Critical,** that made by a beam of light passing from a rarer to a denser medium, with the perpendicular, without being entirely reflected. **A. of Cuvier.** See *A., Facial.* **A. of Daubenton.** See *A., Occipital.* **A., Deschamps's.** See *A., Inio-facial.* **A. of Deviation.** 1. In botany, that formed by a leaf, branch, or root with the axis upon which it is borne. 2. In magnetism, the angle traversed by the needle when disturbed by some magnetic force. 3. In optics, that formed by a refracted ray and the prolongation of the incident ray. **A. of Divergence,** in botany, that formed between succeeding organs in the same spiral or whorl. **A., Dorsal (of Scapula),** in veterinary anatomy, the junction of the superior and posterior borders of the scapula. **A. of Dürer.** See *A., Facial.* **A., Ecker's.** See *A., Sphenoidal* and *A., Craniofacial.* **A. of Elevation,** in optics, that made by the visual plane with its primary position when moved upward or downward. **A., Ephippial (Welcker's).** See *A., Sphenoidal.* **A., Ethmocranial.** See *A., Olfactory.* **A., External (of Ilium),** in veterinary anatomy, the anterior superior spine of the ilium. **A., External (of Mulder),** in craniometry, that produced by the junction of Camper's line and a line joining the basi-occipital bone and the nasion. **A., External (of Pubes),** in veterinary anatomy, the portion of the pubic bone constituting the chief part of the cotyloid cavity. **A. of the Eye.** See *Canthus.* **A. f.,** that one of Lissauer's angles included between the radius fixus and a line joining the inion and opisthion. **A., Facial (of Broca).** See *A., Ophryo-spinal Facial.* **A., Facial (of Camper),** in craniometry, that between the facial line of Camper and the line drawn through the auricular and subnasal points. **A., Facial (of Cloquet),** in craniometry, that between the line drawn through the ophryon and the alveolar point and the auricular-alveolar line. **A., Facial (of Cuvier).** See *A., Facial (of Geoffroy St. Hilaire).* **A., Facial (of Dürer),** in craniometry, that formed by a line tangent to the brow and the lobule of the nose and a line joining the lobe of the ear and the lower part of the nasal septum. **A., Facial (of Jacquart),** in craniometry, that between the line joining the subnasal point and the glabella and the line joining the subnasal and auricular points. **A., Facial (of Segond).** See *A. of Segond.* **A., Facial (of Geoffroy St. Hilaire),** in craniometry, that between the facial line of Camper and the line joining the auricular point and the edge of the incisors. **A., Facial (of Topinard.)** See *A., Ophryo-spinal Facial.* **A., Facial (of Virchow and Holder),** in craniometry, that formed by the union of a line joining the naso-frontal suture and the most prominent point of the lower edge of the superior alveolar processes, and a line joining the superior border of the external auditory meatus and the lower border of the orbit. **A., Fick's,** in craniometry, one formed by the intersection of the basilar groove, and a line joining the symphysis menti and the basion. **A., Frontal,** in craniometry, one formed by lines joining the auricular point and the ophryon and bregma. In ornithology, that formed between the forehead and the upper margin of the beak. **A., Frontal (of Lissauer),** that one included between lines joining the metopion and the bregma and nasion. **A., Fronto-glabellar,** the degree of inclination of the forehead. **A., Gamma,** in optics, that formed at the center of rotation of the eyes by the optic and visual axes. **A., Genal,** in biology, the posterior angle of the movable gena of trilobites. **A., Gratiolet's.** See *A., Coronofacial.* **A., Humeral (of the Scapula),** in veterinary anatomy, a name given to the head of the shoulder blade. **A., Huxley's.** See *A., Craniofacial.* **A. i.,** that one of Lissauer's angles included between the radius fixus and a line joining the posterior border of the incisor foramen and the alveolar point. **A., Ilio-ischial,** that between the ischium and the cotylo-sacral rib of the ilium. **A., Ilio-pubic,** in veterinary anatomy, that existing between the ilium and pubes. **A., Ilio-vertebral,** that existing between the iliac bones and the spinal column. **A. of Incidence,** in optics, the angle at which a ray of light strikes a denser medium and undergoes reflection or refraction. **A. of Inclination (of Pelvic Canal),** in obstetrics, that formed by the anterior wall of the pelvis with the conjugate diameter. **A. of Inclination (of Pelvis),** in obstetrics, that formed by the pelvis with the general line of the trunk, or that formed by the plane of the inferior strait with the horizon. **A., Inferior (of Scapula).** See *A., Humeral.* **A. of Inflexion,** in veterinary anatomy, that formed by the quarter of the hoof of a soliped with the commencement of the bar. **A., Inio-facial,** in craniometry, Deschamps's modification of Camper's line. It is the angle included between the two lines extending from the inion to the glabella and from the inion to the symphysis of the chin. **A., Internal (of Ilium),** in veterinary anatomy, the posterior superior spine of the ilium. **A., Internal (of Pubes),** in veterinary anatomy, the name for the angle of the pubes. **A., Internal (of Walther),** in craniometry, that included between a line joining the glabella and the nasion and another from the occipital protuberance to the crista galli. **A., Interradial,** in biology, that formed in the star-fish by the coming together of the lateral walls of two adjacent ambulacral grooves. **A. of the Ischio-pubic**

Arch, that formed by the junction of the ischio-pubic rami. **A. of Jacquart.** See *A.*, *Facial.* **A. of Jaw**, the junction of the lower border of the ramus of the mandible with its posterior border. **A. of Landzert**, that formed by the plane of the basilar groove and the horizontal line of the jugum sphenoidale. **A. of Lavater**, in craniometry, that contained between a line joining the point of the nose and the outer angle of the eye, and a line running from the same point to the angle of the mouth. According to Lavater, the greater the angle the more intelligent the individual. **A., Limiting.** See *A.*, *Critical.* **A. of the Lips**, those formed by the union of the lips at either extremity of the mouth. **A., Lissauer's**, in craniometry, a number of angles in the median plane of the skull included between lines radiating from a fixed line connecting the inion and hormion (*radius fixus.*) See also *A.*, *Frontal*, and *A.*, *Parietal.* **A., Louis's**, that between the manubrium and gladiolus of the sternum due to retraction in the upper part of the thorax. **A. of Ludovici.** See *A.*, *Louis's.* **A., Ludwig's.** See *A.*, *Louis's.* **A., Lumbo-iliac**, in veterinary anatomy, that formed by the junction of the sacrum and ilia. **A. m.**, that one of Lissauer's angles included between the radius fixus and a line joining the opisthion and the basion. **A., Maxillary (of Camper)**, in craniometry, that included between two lines extending from the point of contact of the upper and lower central incisor teeth, one to the ophryon and the other to the most prominent point of the lower jaw. **A., Metafacial (of Serres)**, that which the pterygoid processes form with the base of the skull. **A., Meter-**, in optics, the degree of convergence of the eyes when centered on an object one meter distant from each. **A. of the Mouth.** See *A. of the Lips.* **A., Mu**, that one of Lissauer's angles included between the radius fixus and a line joining the hormion and basion. **A., Mulder's.** See *A.*, *External.* **A. n.**, that one of Lissauer's angles included between the radius fixus and a line joining the nasion and alveolar point. **A. n′.**, that one of Lissauer's angles included between the radius fixus and a line joining the nasion and subnasal point. **A., Nasal (of Ranke)**, in craniometry, that included between the horizontal plane of the skull and a line passing through the middle of the alveolar border beneath the nasal spine and the center of the naso-frontal suture. **A., Nasal (of Welcker)**, in craniometry, that included between the naso-basilar and naso-subnasal lines. **A., Naso-basal (of Welcker).** See *A.*, *Nasal.* **A., Naso-malar**, in craniometry, that formed by two lines converging from the outer margins of the orbits to the base of the nose. **A. of the Neck.** See *A. of the Nucha.* **A. of the Neck of the Femur**, that formed between the neck and shaft of the femur. **A., Negative**, the name given to Quatrefages' parietal angle when it is inversed. **A. of the Nose**, that between the nose and the cheek. **A., Nu**, that one of Lissauer's angles included between the radius fixus and a line joining the hormion and nasion. **A. of the Nucha**, that formed by the junction of the nucha with the neck. **A. o.**, that one of Lissauer's angles included between the radius fixus and a line joining the lambda and bregma. **A. of Obliquity of Femur**, that formed by the shaft of the femur and a vertical line. **A., Occipital**, in craniometry, that formed by the intersection of the basicranial axis and the plane of the occipital foramen. **A., Occipital (of Broca)**, in craniometry, that between the lines joining the opisthion and the basion and nasal points. **A., Occipital (of Daubenton)**, in craniometry, the angle that Daubenton's line makes with the line joining the basion and opisthion. **A., Occipital, Second**, in craniometry, that formed by two lines joining the opisthion and the nasion and nasal spine. **A., Olfactory**, in craniometry, that formed by the intersection of the plane of the cribriform plate of the ethmoid and the basicranial axis. **A., Omega**, that one of Lissauer's angles between the radius fixus and a line joining the hormion and lambda. **A., Ophryo-alveolo-auricular.** See *A.*, *Facial (of Cloquet).* **A., Ophryo-spinal-facial**, in craniometry, that included between two lines from the nasal spine to the ophryon and auricular point. **A., Optic**, that included between lines joining the extremities of an object and the nodal point. The smallest is about 30 seconds. **A., Orbito-alveolo-condylar**, in craniometry, that included between the horizontal visual and alveolo-condylar planes. **A., Orbito-basilar**, in craniometry, that included between Barclay's basifacial plane and the plane of the orbital axes. **A., Orbito-facial.** See *A.*, *Orbito-maxillary.* **A., Orbito-maxillary**, in craniometry, that included between the two lines joining the auricular point and the glabella and alveolar border. **A., Orbito-occipital**, in craniometry, that included between the plane of the occipital foramen and the bi-orbital plane. **A., Orifacial (of Barclay).** 1. That included between Camper's line and the plane of mastication. 2. That included between the median antero-posterior line of the palatine arch and the median antero-posterior line of the plane of the lower border of the inferior maxilla. **A. p.**, that one of Lissauer's angles included between the radius fixus and a line joining the staphylion and alveolar point. **A., Palatine**, in craniometry, that included between Camper's line and a line on the plane of the alveolar arch. **A., Parietal (of Broca)**, in craniometry, that included between two lines joining the auricular point and the bregma and lambda. **A., Parietal (of Lissauer)**, that included between lines drawn from the bregma and lambda to the most prominent point of the parietal bone. **A., Parietal (of Quatrefages)**, in craniometry, that formed by the lines drawn through the extremities of the transverse maximum or bizygomatic diameter and the maximum transverse frontal diameter (called *positive* when it opens downward, *negative* when it opens upward). **A., Parietal, Posterior**, in craniometry, that included between two lines tangent to the parietal eminence and the most prominent points of the zygomatic arch. **A., Pi**, that one of Lissauer's angles included between the radius fixus and a line joining the hormion and alveolar point. **A. of Polarization**, in optics, the angle of reflection at which light is most completely polarized. **A., Positive.** See *A.*, *Parietal (of Quatrefages).* **A., Posterior (of Ilium).** See *A.*, *Cotyloid.* **A., Posterior (of Pubes)**, in veterinary anatomy, that portion of the pubes that helps to close in the obturator foramen internally. **A., Posterior (of Scapula).** See *A.*, *Dorsal (of Scapula).* **A., Postero-external (of Ischium)**, in veterinary anatomy, the tuberosity of the ischium. **A., Postero-internal (of Ischium)**, in veterinary anatomy, the ischiadic arch. **A., Premaxillary.** See *A.*, *Basifacial.* **A., Prepubic**, that formed by the male urethra in front of the pubes, the penis being in a flaccid state. **A. of Prognathism**, in craniometry, the angle indicating the degree of forward projection of the face. **A., Psi.** 1. That one of Lissauer's angles included between the radius fixus and a line joining the hormion and opisthion. 2. In optics, that between the optic axis and line of fixation. **A. of the Pubes**, that formed by the junction of the pubic bones at the symphysis. **A., Pyramidal.** See *A.*, *Positive.* **A. of Quatrefages.**

See *A., Parietal.* **A. of Ranke.** See *A., Nasal.* **A. of Reflection,** in optics, that which a reflected ray of light makes with a line drawn perpendicular to the point of incidence. **A. of Refraction,** in optics, that which exists between a refracted ray of light and a line drawn perpendicular to the point of incidence. **A. of Rib,** a line on the external surface of the shaft of the vertebral extremity of the rib, to which is attached the tendon of the sacro-lumbalis muscle. **A. s.,** that one of Lissauer's angles included between the radius fixus and a line joining the basion and staphylion. **A., Sacro-vertebral,** that which the sacrum forms with the last lumbar vertebra. **A. of Segond,** in craniometry, angles formed between lines drawn from the basion to the various other craniometrical points. The *Facial* angle of Segond is that between the line passing through the basion and mental points and the line passing through the basion and ophryon. The *Cerebral* angle of Segond is that between the line passing through the basion and ophryon, and the line passing through the basion and opisthion. **A. of Serres.** See *A., Metafacial.* **A. Sigma,** that one of Lissauer's angles included between the radius fixus and a line drawn from the hormion to the staphylion. **A., Sincipital.** See *A., External (of Mulder).* **A. Spal.** See *A. Summi Palati.* **A., Sphenoidal,** in craniometry, that included between two lines joining the nasion and the basion with the center of the transverse groove of the optic commissure, at the point where the sloping anterior surface of the sella turcica passes over into the horizontal surface of the olivary eminence. **A., Squinting,** that indicating the degree of divergence of the affected eye in strabismus. **A., Sterno-clavicular,** that existing between the clavicle and the sternum. **A. of St. Hilaire (Geoffroy).** See *A., Facial.* **A., Subcostal,** that formed by the outward inclination of the false ribs with the middle line of the body. **A., Suboccipital,** in craniometry, that included between two lines joining Broca's auricular point with the posterior border of the occipital foramen and the external occipital protuberance. **A., Subpubic,** that formed at the pubic arch. **A., Summi Occipitis,** Lissauer's angle included between lines connecting the most prominent point of the occipital squama and the lambda and inion. **A., Summi Palati,** Lissauer's angle included between lines drawn from the staphylion and alveolar point to the highest point of the arch of the palate. **A., Supra-occipital,** in craniometry, that formed by two lines joining Broca's auricular point with the lambda and the external occipital protuberance. **A., Symphysian,** that which the profile of the symphysis of the lower jaw makes with the plane of the inferior border of the lower jaw. **A., Tentorial,** in craniometry, that included between the plane of the tentorium and the basicranial axis. **A. of Topinard.** See *A., Facial.* **A. of Torsion,** the amount of twisting in the shaft of a bone. **A., Total Cranial,** in craniometry, that measuring the cranial cavity between lines drawn from the auricular point to the ophryon and opisthion. **A. of the Uterus,** that at the cornua of the uterus, where the oviducts enter. **A., Venosus,** that formed between the right and left brachio-cephalic veins. **A., Vertebro-iliac.** See *A., Ilio-vertebral.* **A., Vestibular,** that formed in the vestibule by the junction of its posterior and middle walls. **A. of Virchow and Holder.** See *A., Facial.* **A., Visual.** See *A., Optic.* **A. of Vogt,** in craniometry, that included between lines joining the nasion and the basion and alveolar point. **A., Walther's.** See *A., Internal.* **A., Welcker's.** See *A., Ephippial, A., Nasal,* and *A., Nasobasal.* **A., Xiphoid,** in anatomy, that formed by the sides of the xiphoid notch. **A. y.,** that one of Lissauer's angles included between the radius fixus and a line joining the lambda and inion.

Angleberry (*ang'-gl-ber-e*) [M. E., *angle; bery*]. Butchers' name for bovine tuberculosis. See *Grapes.*

Anglesey Leg (*ang'-gl-se leg*) [so called after the Marquis of Anglesey]. An artificial limb formed from a solid piece of wood hollowed out to receive the stump and provided with a steel joint at the knee. The ankle joint was made of wood, to which motion was communicated by strong cat-gut strings posteriorly and a spiral spring anteriorly.

Anglicus sudor (*ang'-lik-us su'-dor*) [L.]. English sweating fever. A contagious malignant fever, also known as *Ephemera maligna,* characterized by black or dark-colored sweat.

Anglo-Swiss Food, an artificial infant food with the following composition: Water, 6.54; fat, 2.72; grape-sugar and milk-sugar, 23.29; cane-sugar, 21.40; starch, 34.55; soluble carbohydrates, 46.43; albuminoids, 10.26; ash, 1.20.

Angophrasia (*ang-go-fra'-ze-ah*) [ἄγχειν, to choke; φράσις, utterance]. A speech-defect consisting of a choking, drawling, and agitated utterance, with repetitions and nasal sounds, occurring in paralytic dementia.

Angor (*ang'-gor*) [*angor,* a strangling]. Synonymous with *Angina.* Applied by some to epigastric pain.

Angry (*ang'-gre*) [M. E., *angerich*]. Characterized by acute inflammation and pain, as an *angry* sore.

Angström's Law. See *Law.*

Anguilulidæ (*ang-gwil'-u-lid-e*) [*anguilla,* an eel]. The small nematoid worms that live in vinegar and sour paste.

Anguilliform (*ang-gwil'-if-orm*) [*anguilla,* an eel; *forma,* form]. In biology, having the characters or form of an eel.

Anguillula (*ang-gwil'-u-lah*) [dim. of *anguilla,* an eel]. A genus of parasitic round worms. A. Stercoralis. See *Thread-worms* and *Parasites, Animal, Table of.*

Anguine (*ang'-gwin*) [*anguis,* a snake]. In biology, snake-like.

Anguish (*ang'-gwish*) [*angustia,* narrowness, distress]. Extreme bodily or mental distress.

Angular (*ang'-gu-lar*) [*angulus,* an angle]. Pertaining to an angle. **A. Artery and Vein,** the terminal branches of the facial artery and vein. **A. Gyrus, or Convolution,** the *pli courbe,* a convolution of the brain. **A. Movement,** the movement between two bones that may take place forward and backward, or inward and outward. **A. Processes,** the external and internal extremities of the orbital arch of the frontal bone.

Angularis scapulæ Muscle (*ang-gu-la'-ris skap'-u-le*). The *levator anguli scapulæ.* See *Muscles, Table of.*

Anguliferous (*ang-gu-lif'-er-us*) [*angulus,* an angle; *ferre,* to bear]. In biology, having the last whorl angled or cornered.

Angulinerved (*ang'-gu-lin-ervd*) [*angulus,* an angle; *nervum,* a nerve]. In biology, said of leaves in which the veins or nerves diverge from the midrib; pinnately nerved.

Angulo-dentate (*ang'-gu-lo-den'-tāt*) [*angulus,* an angle; *dentatus,* toothed]. With angular teeth.

Angulus (*ang'-gu-lus*) [L.]. See *Angle.*

Angustate (*ang-gus'-tāt*) [*angustare,* to straiten; to narrow]. Narrow.

Angustia (*ang-gus'-te-ah*) [L.]. Constriction; abnormal narrowness; distress.

Angusticollis (*ang-gus-te-kol'-is*) [*angustus,* narrow; *collum,* a neck]. In biology, with a slender neck.

Angustidentate (*ang-gus-te-den′-tāt*) [*angustus*, narrow; *dens*, a tooth]. In biology, with slender teeth.

Angustifoliate (*ang-gus-te-fo′-le-āt*) [*angustus*, narrow; *foliatus*, leaved]. In biology, with narrow leaves.

Angustirostrate (*ang-gus-te-ros′-trāt*) [*angustus*, narrow; *rostrum*, beak]. In biology, having a narrow or compressed beak.

Angustiseptate (*ang-gus-te-sep′-tāt*) [*angustus*, narrow; *septum*, a partition]. In biology, having a narrow septum.

Angustura (*ang-gus-tu′-rah*) [Sp., *Angostura*, a S. A. town]. Cusparia Bark. The bark of *Galipea cusparia*. A stimulant tonic and febrifuge used in malignant bilious fever, intermittent fever, and dysentery. In large doses emetic. Dose of fld. ext. ♏x–xxx; of the bark gr. x-xl. Unof. **Infus. Cusparіæ** (B. P.). Dose ℥i–ij.

Angusturin (*ang-gus′-tu-rin*) [Sp., *Angostura*, a S. A. town]. Synonym of Brucin, *q. v.*

Anhaloin (*an-hal′-o-in*) [*Anhalonium*]. An intensely poisonous alkaloid, derived from the fruit of *Anhalonium* (*Mamillaria*) *lewinii*, a cactus. It produces collapse, followed by tetanus. Unof.

Anhalonium lewinii (*an-ha-lo′-ne-um le-win′-e-i*) [L.]. The cactus of this name is a native of Mexico. Its active principle is intensely poisonous and resembles strychnin in action. Dose of the extract gtt. j. Unof.

Anhaphia (*an-ha′-fe-ah*). See *Anaphia*.

Anhela (*an-he′-lah*) [*anhelatio*, asthma]. A difficulty in breathing. **A. amphemerina, A. asinina, A. canina, A. clamosa, A. clangosa, A. delassans, A. perennis, A. puerilis, A. spasmodica, A. strangulans, A. suffocans, A. tussiculosa**, synonyms of *Pertussis*.

Anhelation (*an-he-la′-shun*) [*anhelare*, to pant]. Shortness of breath; dyspnea.

Anhematosis (*an-hem-at-o′-sis*) [ἀν priv.; αἱματόειν, to make bloody]. Defective formation of the blood.

Anhidrosis (*an-hid-ro′-sis*) [ἀν priv.; ἱδρώς, sweat]. Absence or deficiency of sweat excretion.

Anhidrotic (*an-hid-rot′-ik*) [ἀν priv.; ἱδρώς, sweat]. 1. Tending to check sweating. 2. An agent that checks sweating.

Anhistous (*an-his′-tus*) [ἀν priv.; ἱστός, a web]. Structureless; not organized; plasmic.

Anhydremia (*an-hi-dre′-me-ah*) [ἀν priv.; ὑδωρ, water; αἷμα, blood]. The opposite of hydremia; an abnormal decrease in the relative proportion of the water to that of the salts of the blood.

Anhydrid (*an-hi′-drid*) [ἀν priv.; ὑδωρ, water]. One of a class of chemic compounds that may be regarded as made up of one or more molecules of water in which the whole of the hydrogen is replaced by negative or acid radicals (that may themselves contain hydrogen).

Anhydro-ecgonin (*an-hi′-dro–ek′-go-nin*) [ἀν priv.; ὑδωρ, water; ἐκ, out of; γονός, born]. A basic substance in the cocain and ecgonin series, but more remote from cocain than ecgonin.

Anhydro-glycochloral (*an-hi′-dro-gli-ko-klo′-ral*). See *Chloralose*.

Anhydromyelia (*an-hi-dro-mi-e′-le-ah*) [ἀν priv.; ὑδωρ, water; μυελόν, marrow]. A deficiency of the fluid that normally fills the spinal cavity.

Anhydrous (*an-hi′-drus*) [ἀν priv.; ὑδωρ, water]. In chemistry, a term used to denote the absence of hydroxyl or of constitutional water.

Anhysteria (*an-his-te′-re-ah*) [ἀν priv.; ὑστέρα, the womb]. Absence of the uterus.

Anideus (*an-id′-e-us*) [ἀν priv.; εἶδος, form]. The lowest form of omphalosite, in which the parasitic fetus is reduced to a shapeless mass of flesh covered with skin.

Anidous (*an-i′-dus*) [ἀν priv.; εἶδος, form]. Formless, from general arrest of development; used of fetal monsters.

Anidrosis (*an-id-ro′-sis*). See *Anhidrosis*.

Anidrotic (*an-id-rot′-ik*). See *Anhidrotic*.

Anile (*an′-il*) [*anilis*, an old woman]. Imbecile.

Anilid (*an′-il-id*) [Arab., *al*, the; *nīl*, dark blue]. Compounds formed by the action of acid chlorids or acid anhydrids upon the anilins. They are very stable derivatives.

Anilin (*an′-il-in*) [Arab., *al*, the; *nīl*, dark blue], C_6H_7N. Amidobenzene; formed in the dry distillation of bituminous coal, bones, indigo, isatin, and other nitrogenous substances. It is made by reducing nitrobenzene. It is a colorless liquid with a faint peculiar odor, boiling at 183°; its sp. gr. at 0° is 1.036. When perfectly pure it solidifies on cooling, and melts at —8°. It is slightly soluble in water, but dissolves readily in alcohol and ether. Combined with chlorin, the chlorates, and hypochlorites, the various anilin dyes are produced. It is a powerful narcotic poison. It is used in chorea and epilepsy with benefit in one-half grain doses. Unof. **A. Black**, $C_{18}H_{15}N_3$, one of the indulins formed by the oxidation of anilin by means of potassium chlorate in the presence of copper or vanadium salts. It is a dark-green amorphous powder, insoluble in the ordinary reagents, and is used in calico printing as a black color. See *Conspectus of Pigments*, under *Pigment*. **A. Colors.** See *Conspectus of Pigments*, under *Pigment*. **A. Red.** See *Fuchsin*. **A. Sulphate**, $[C_6H_3NH_2]$ SO_4H_2, used as a test for lignin. See *Stains, Table of*. **A. Violet.** See *Tyrolin*.

Anilinophile (*an-il-in′-o-fil*) [*anilin*; φιλέειν, to love]. Readily stained with anilin.

Anilism (*an′-il-izm*) [*anilin*]. An acute or chronic disease produced in workmen in anilin factories by the poisonous fumes.

Anility (*an-il′-it-e*) [*anilis*, an old woman]. The state of being imbecile or childish.

Anima (*an′-im-ah*) [*animus*, spirit]. The soul; the vital principle; formerly, the active principle of a drug or medicine.

Animal (*an′-im-al*) [*anima*, the spirit, breath, or life]. An organic being having life and power of motion. Pertaining to the same. The animal kingdom is composed of the *Vertebrata*, *Mollusca*, *Articulata*, and *Radiata*. **A. Black.** See *Conspectus of Pigments*, under *Pigment*. **A. Charcoal**, bone-black, ivory-black, etc., is the product of calcining bones in close vessels. **A. Chemistry**, that concerning itself with the composition of animal bodies. **A. Electricity**, electricity generated in the body. **A. Function**, any physiological action or process. **A. Gum**, $C_{12}H_{20}O_{10}+2H_2O$. A substance prepared from mucin by Landwehr, and so named on account of its resemblance to the gum of commerce. It occurs in many tissues of the body, is soluble in water, and in alkaline solution readily dissolves cupric oxid, the solution not being reduced on boiling. It yields no coloration with iodin, and is very feebly dextrorotatory. **A. Heat**, the normal temperature of the body, about 98.5° F. **A. Kingdom**, a name for all animals considered collectively. **A. Magnetism**, mesmerism, hypnotism, etc. **A. Oil.** See *Dippel's Oil*. **A. Starch.** See *Glycogen*. **A. Tissue.** See *Tissue*.

Animalcule (*an-im-al′-kūl*) [*animalculum*, dim. of *animal*, a minute animal: *pl.*, *Animalcula*]. An organism so small as to require the microscope for its examination.

Animalculism (*an-im-al'-ku-lizm*) [*animalculum*, a little animal]. See *Spermism* and *Incasement.*

Animalculist (*an-im-al'-ku-list*) [*animalculum*, a little animal]. See *Incasement.*

Animalization (*an-im-al-iz-a'-shun*) [*animalis*, animate]. The process of assimilating food to the tissues of the body.

Animation (*an-im-a'-shun*) [*animare*, to have life or existence]. To be possessed of life. Formerly used to denote the effect of the vital principle by which the fetus acquires the power of continuing its existence. **A., Suspended**, a condition marked by interrupted respiration and consciousness; caused by strangulation, the inhalation of carbon dioxid or other gases, etc.

Anime (*an'-im-e*) [Fr., *animé*, origin doubtful]. A name of various resins, especially that of *Hymenæa courbaril*, a tree of tropical America; sometimes used in plaster, etc. Unof. See *Copal.*

Animism (*an'-im-izm*) [*anima*, soul]. Stahl's theory of life and disease, namely, that the soul is the source of both normal and pathologic activities.

Anion (*an'-e-on*) [ἀνά, up; ἰών, going]. In electrolysis, an electro-negative element. See *Ion.*

Anions (*an'-e-onz*) [ἀνιών, going up]. The atoms that collect around either pole when a compound is decomposed by electricity.

Aniridia (*an-ir-id'-e-ah*) [ἀν priv.; ἶρις, the rainbow]. Absence or defect of the iris.

Anisandrous (*an-is-an'-drus*) [ἄνισος, unequal; ἀνήρ, male]. Same as *Anisostemenous.*

Anisanthous (*an-is-an'-thus*) [ἄνισος, unequal; ἄνθος, flower]. In biology, varying as to the form of the perianth.

Anischuria (*an-is-ku'-re-ah*) [ἀν priv.; ἰσχουρία, retention of urine]. Enuresis or incontinence of urine.

Anise (*an'-is*). See *Anisum.*

Anisic (*an-is'-ik*) [*anisum*, anise]. Pertaining or belonging to anise. **A. Acid.** See *Acid.* **A. Aldehyd.** See *Aldehyd.*

Anisin (*an'-is-in*) [*anisum*, anise], $C_{22}H_{24}N_2O_3$. An artificial crystalline alkaloid, a derivative of anise.

Anisobryous (*an-is-ob'-re-us*) [ἄνισος, unequal; βρύον, growth]. Same as *Monocotyledonous.*

Anisocoria (*an-is-o-ko'-re-ah*) [ἄνισος, unequal; κορή, pupil]. Inequality in the diameter of the pupils.

Anisodont (*an-i'-so-dont*) [ἄνισος, unequal; ὀδούς, tooth]. In biology, having irregular teeth of unequal length.

Anisognathous (*an-is-og'-na-thus*) [ἄνισος, unequal; γνάθος, jaw]. In biology, having the two jaws unlike as to the molar teeth.

Anisogynous (*an-is-oj'-in-us*) [ἄνισος, unequal; γυνή, a female]. In biology, with fewer carpels than sepals.

Anisol (*an'-is-ol*) [*anisum*, anise], C_7H_8O. Methyl phenyl ether, produced by heating phenol with potassium and methyl iodid or potassium methyl sulphate in alcoholic solution. It is an ethereal-smelling liquid, boiling at 152°; its sp. gr. at 15° is 0.991.

Anisomelous (*an-is-om'-el-us*) [ἄνισος, unequal; μέλος, a limb]. With limbs of unequal length.

Anisomerous (*an-is-om'-er-us*) [ἄνισος, unequal; μέρος, part]. In biology, having the parts or organs unequal in successive series, as parts of the flowers in different whorls, or ridges, or successive molar teeth.

Anisometropia (*an-is-o-me-tro'-pe-ah*) [ἀν priv.; ἴσος, equal; μέτρον, a measure; ὤψ, the eye]. A difference in the refraction of the two eyes.

Anisometropic (*an-is-o-me-trop'-ik*) [ἀν priv.; ἴσος, equal; μέτρον, a measure; ὤψ, the eye]. Affected with anisometropia.

Anisopetalous (*an-is-o-pet'-al-us*) [ἄνισος, unequal; πέταλον, leaf]. In biology, with unequal petals.

Anisophyllous (*an-is-off'-il-us*) [ἄνισος, unequal; φύλλον, leaf]. In biology, applied to the leaves of a pair of whorls when they are unequal.

Anisopia (*an-is-o'-pe-ah*) [ἄνισος, unequal; ὤψ, eye]. Inequality of visual power in the two eyes.

Anisopleural (*an-is-o-plu'-ral*) [ἄνισος, unequal; πλευρά, the side]. In biology, bilaterally asymmetric.

Anisopogonous (*an-is-o-pog'-o-nus*) [ἄνισος, unequal; πώγων, beard]. In biology, applied to feathers the vanes of which are asymmetric.

Anisopterous (*an-is-op'-ter-us*) [ἄνισος, unequal; πτερόν, a wing]. In biology, with asymmetric or unequal wings.

Anisospore (*an-i'-so-spōr*) [ἄνισος, unequal; σπόρα, a spore]. In biology, one of the two varieties of spores produced by colonial species of Radiolarians.

Anisostemenous (*an-is-o-stem'-en-us*) [ἄνισος, unequal; στήμων, a thread]. In biology, applied to plants the stamens of which are not of the same number as the petals.

Anisosthenic (*an-is-o-sthen'-ik*) [ἄνισος, unequal; σθένος, strength]. Not of equal power; used of pairs of muscles, etc.

Anisostomous (*an-is-os'-tom-us*) [ἄνισος, unequal; στόμα, mouth]. With an irregular mouth or orifice.

Anisotropic (*an-is-o-trop'-ik*) [ἄνισος, unequal; τρόπος, turning]. Not possessing the same properties in all directions with respect to light. In biology, varying in irritability in different parts or organs.

Anisotropous (*an-is-ot'-ro-pus*) [ἄνισος, unequal; τρέπειν, to turn]. Not isotropous; not having the same refracting power in all directions. A term applied to doubly refracting bodies.

Anisum (*an'-is-um*) [L.; *gen.*, *Anisi*]. Anise. The fruit of *Anisum pimpinella.* Its properties are due to a volatile oil. It is slightly stimulant to the heart action. It is useful chiefly to liquefy bronchial secretions, and is therefore a favorite ingredient in cough mixtures. Dose gr. x–xx. **A. Aqua**, oil of anise 1, water 500 parts. Dose indefinite. **A. Essentia** (B. P.). Dose ♏x–xx. **A. Oleum**, an ingredient in tinct. opii camph. Dose, ♏j–v. **A. Spt.**, a ten per cent. solution of the oil in alcohol. Dose, ʒi–ij.

Anisyl (*an'-is-il*) [*anisum*, anise], $C_8H_7O_2$. A hypothetic radicle supposed to be found in anise and its derivatives.

Anitrogenous (*ah-ni-troj'-en-us*) [ἀ priv.; *nitrum*, niter; γενής, producing]. Non-nitrogenous.

Anixyus (*ah-niks'-e-us*) [ἀ priv.; ἰξύς, the loins]. In biology, without hips and thighs.

Ankle (*ang'-kl*) [M. E., *ancle*]. The joint between the tibia and fibula above and on the sides, and the astragalus below. It is a ginglymus joint, with three ligaments, the anterior, internal, and external. **A.-bone**, the astragalus. **A. Clonus**, the succession of a number of rhythmic muscular contractions in the calf of the leg, when the limb is extended and the foot flexed suddenly by a pressure upon the sole. It is a symptom of various diseases of the myelon, such as meningo-myelitis. See *Reflexes, Table of.* **A.-jerk.** See *A. Clonus.* **A.-joint.** See *Ankle.* In biology, the tarsal joint. **A. Reflex.** See *A. Clonus.*

Anklet (*angk'-let*) [M. E., *ancle*]. A leathern band to pass around and support the ankle.

Ankuroid (*ang'-ku-roid*). See *Ankyroid.*

Ankylenteron (*ang-kil-en'-ter-on*) [ἀγκύλη, a coil; ἔντερον, an intestine]. An adhesion between intestinal coils.

Ankyloblepharon (*ang-kil-o-blef'-ar-on*) [ἀγκύλη, a thong or loop; βλέφαρον, the eyelid]. The adhesion of the ciliary edges of the eyelids.

Ankylocheilia (*ang-kil-o-ki′-le-ah*) [ἀλκύλη, loop; χείλος, lip]. Adhesion of the lips.

Ankylocolpos (*ang-kil-o-kol′-pos*) [ἀγκύλη, a noose; κόλπος, the vagina]. Atresia or closure of the vagina or vulva.

Ankylocore (*ang-kil-ok′-o-re*) [ἀγκύλη, a noose; κόρη, the pupil]. Obliteration of the pupil by closure and adhesion.

Ankylodontia (*ang-kil-o-don′-she-ah*) [ἀγκύλη, a loop; ὀδούς, a tooth]. Irregularity in the position of the teeth.

Ankyloglossia (*ang-kil-o-glos′-e-ah*) [ἀγκύλη, a noose; γλῶσσα, the tongue]. Tongue-tie.

Ankyloglossotome (*ang-kil-o-glos′-o-tōm*) [ἀγκύλη, a noose; γλῶσσα, the tongue; τόμη, a cut]. An instrument used in treating tongue-tie.

Ankylomele (*ang-kil-o-mē′-le*) [ἀγκυλομήλη; ἀγκύλος, bent; μήλη, a probe]. A curved probe.

Ankylomerism (*ang-kil-om′-er-izm*) [ἀγκύλη, a tie; μέρος, a part]. Abnormal adherence of parts to each other.

Ankylopodia (*ang-kil-o-pō′-de-ah*) [ἀγκύλη, a loop; πούς, a foot]. Ankylosis of the ankle-joint.

Ankyloproctia (*ang-kil-o-prok′-te-ah*) [ἀγκύλη, a loop; πρωκτός, the anus]. Atresia of the anus.

Ankylorrhinia (*ang-kil-o-rin′-e-ah*) [ἀγκύλος, a loop; ῥίς, the nose]. Marked adhesion between the walls of a nostril.

Ankylose (*ang′-kil-ōs*) [ἀγκύλος, bent]. To be, or to become, consolidated or firmly united, as two bones; used commonly of pathologic, but sometimes of normal, union.

Ankylosis (*ang-kil-o′-sis*) [ἀγκύλος, a stiff joint]. Union of the bones forming a joint, resulting in a stiff joint. **A., False,** or **Spurious,** is due to the rigidity of surrounding parts. **A., True,** or **Bony,** when the connecting material is bone. **A., Ligamentous,** when the medium is fibrous.

Ankylostoma (*ang-kil-os′-to-mah*), or **Ankylostomum** (*ang-kil-os′-to-mum*) [ἀγκύλος, crooked; στόμα, a mouth]. A genus of nematoid worms, one species of which, *A. duodenale*, is found in the human intestine. This is now referred to the genus *Dochmius*. See *Ankylostomiasis*.

Ankylostomiasis (*ang-kil-os-to-mi′-as-is*) [ἀγκύλος, crooked; στόμα, a mouth]. A peculiar anemia produced by the parasite *Ankylostoma duodenale* (*Dochmius duodenalis*. Leuck), sucking the blood from the walls of the duodenum. It is especially prevalent among brickmakers and other workmen in Europe. It is called also Dochmiasis, Brickmakers' Anemia, Tunnel Anemia, Miners' Cachexia, Egyptian Chlorosis, Tropical Chlorosis, *etc.* Male fern and thymol expel the worm.

Ankylotia (*ang-kil-o′-she-ah*) [ἀγκύλη, a noose; οὖς, ear]. Union of the walls of the meatus auditorius.

Ankylotome (*ang-kil′-o-tōm*) [αγκύλη, a loop; τόμη, a cut]. 1. A knife for operating on tongue-tie. 2. Any curved knife.

Ankyrism (*ang′-kir-izm*) [ἀγκύρισμα, a hooking]. Articulation or suture by one bone hooking upon another.

Ankyroid (*ang′-kir-oid*) [ἄγκυρα, a hook]. Hook-shaped. **A. Cavity,** in the brain, the posterior cornu of the lateral ventricle. **A. Process,** the coracoid process.

Anlage (*an′-lag-e*) [Ger., "a laying out"]. In biology, a term adopted from the German to indicate (1) a primary constituent of the germ or organism; (2) a constitutional predisposition.

Annandale's Operation. See *Operations, Table of.*

Annatto (*an-at′-o*). See *Annotto.*

Anneal (*an-ēl′*) [Saxon, *annelan*, to heat]. To heat and cool slowly, as gold or other metals.

Annealing (*an-ēl′-ing*) [Saxon, *annelan*, to heat]. The process of applying heat to a metal for the purpose of removing brittleness and increasing its ductility and malleability.

Annectent (*an-ek′-tent*) [*ad*, to; *nectere*, to bind]. In biology, linking or binding together.

Annelism (*an′-el-izm*) [*anellus*, dim. of *annulus*, a ring]. In biology, possessing a ringed structure.

Annidalin (*an-id′-al-in*). See *Aristol.*

Annotin (*an′-o-tin*) [*annotinus*, of last year]. In biology, one year old.

Annotinous (*an-ot′-in-us*) [*annotinus*, of last year]. In biology, having distinct yearly growths.

Annotto (*an-ot′-o*) [native American]. Annatto, arnotto. A coloring matter obtained from the pellicles of the seeds of *Bixa orellana*. L. Used to color plasters. Also employed as an artificial color for butter. See *Pigments, Conspectus of.*

Annual (*an′-u-al*) [*annus*, a year]. Yearly. In biology, plants that mature and die in one year.

Annuens (*an′-u-enz*) [*annuere*, to nod]. The rectus capitis anticus minor muscle. See *Muscles, Table of.*

Annuent (*an′-u-ent*) [*annuere*, to nod]. Serving to bend the head forward; as annuent muscles.

Annular (*an′-u-lar*) [*annulus*, a ring]. Ring-like. A number of ligaments of the joints are called annular, as those of the ankle, wrist, etc. **A. Cartilage,** the cricoid cartilage. **A. Finger,** the ring finger. **A. Muscle of Müller,** the circular fibers of the ciliary muscle. **A. Process,** or **Protuberance,** the pons varolii. **A. Reflex** (of macula), a ring-like reflection sometimes seen with the ophthalmoscope surrounding the macula.

Annulism (*an′-u-lizm*) [*annulus*, a ring]. The state or quality of being ringed, as shown in certain worms.

Annulose (*an′-u-lōs*) [*annulus*, a ring]. In biology, possessing rings.

Annulus (*an′-u-lus*) [*annulus*, a ring]. A ring-shaped or circular opening. A circular or rounded margin. In biology, an encircling band, as those about the capsules of mosses; the spore-cases of ferns, the mantle. Cf. *Molluscs*, etc. **A. abdominalis,** the external and internal abdominal rings. **A. abdominis,** the inguinal ring. **A. ciliaris,** the boundary between the iris and choroid. **A. fibrosus,** the external part of the intervertebral discs. **A. membrani tympani,** an incomplete bony ring that forms the fetal auditory process of the temporal bone. **A. osseus,** the tympanic plate. **A. ovalis,** the rounded or oval margin of the *Foramen ovale*. **A. subgenitalis,** a firm, cartilaginous-like, subgenital ring, the supporting plate of the subumbrella in medusæ. **A. tracheæ,** any tracheal ring. **A. umbilicus,** the umbilical ring. **A. of Vieussens.** Same as *A. ovalis*.

Anocarpous (*an-o-kar′-pus*) [ἀνω, upward; καρπός, fruit]. In biology, bearing fruit on the upper side of the frond.

Anocathartic (*an-o-kath-ar′-tik*) [ἀνω, upward; καθαρτικός, purging]. Emetic.

Ano-coccygeal (*a-no-kok-sij′-e-al*) [*anus*, the fundament; κόκκυξ, the coccyx]. Pertaining to the anus and the coccyx. **A. Ligament,** connects the tip of the coccyx with the external sphincter ani muscle.

Anodal (*an′-o-dal*) [ἀνά, up; ὁδός, a way]. Relating to an anode; electrically positive. **A. Diffusion.** Same as *Cataphoresis*. **A. Opening Contraction.** See *Contraction*.

Anode (*an′-ōd*) [ἀνά, up; ὁδός, a way]. The positive pole of a galvanic battery.

Anodic (*an-od′-ik*) [ἀνά, upward; ὁδός, way]. In biology, applied to the upper edges of leaves arranged in ascending spirals.

Anodontia (*an-o-don'-she-ah*) [ἀν priv.; ὀδούς, tooth]. Absence of the teeth.

Anodyne (*an'-o-dīn*) [ἀν priv.; ὀδύνη, pain]. A medicine that gives relief from pain. From their tendency to produce sleep they are called *hypnotics*. **A., Hoffman's.** See *Ether*.

Anodynia (*an-o-din'-e-ah*) [ἀν priv.; ὀδύνη, pain]. Absence of pain.

Anœa (*an-e'-ah*). See *Anoia*.

Anoesia (*an-o-e'-ze-ah*) [ἀνοησία, a want of sense]. Want of understanding.

Anogenic (*an-o-jen'-ik*) [ἀνά, upward; γενής, produced]. In biology, of ascending or inward growth.

Anoia (*an-oi'-ah*) [ἄνοια, idiocy]. Synonym of *Idiocy*.

Anol (*an'-ol*) [see *Anethol*], $C_9H_{10}O$. A substance obtained from anethol by heating it with caustic alkali to 200–230° It consists of brilliant leaflets, melting at 92°.

Anomaliflorous (*an-om-al-if-lo'-rus*) [*anomalus*, irregular; *flos*, flower]. In biology, bearing irregular flowers.

Anomaliped (*an-om'-al-ip-ed*) [*anomalus*, irregular; *pes*, foot]. In biology, characterized by having one of the phalanges of the middle toe joined to the inner toe, and three to the outer toe, as in syndactylous birds, the kingfisher, etc.

Anomalocephalous (*an-om-al-o-sef'-al-us*) [ἀνώμαλος, strange; κεφαλή, the head]. Having a deformed head.

Anomalocephalus (*an-om-al-o-sef'-al-us*) [ἀνώμαλος, strange; κεφαλή, the head]. One who has a deformed head.

Anomalogonatous (*an-om-al-o-gon'-at-us*) [ἀνώμαλος, strange; γονάτιον, hip-joint]. In biology, said of birds (*Passeres*) having no ambiens muscle.

Anomalous (*an-om'-al-us*) [ἀνώμαλος, not ordinary]. Irregular; characterized by deviation from the common or normal order.

Anomalus (*an-om'-al-us*) [ἀνώμαλος, not ordinary]. A muscle or muscular slip sometimes occurring beneath the levator labii superioris alæque nasi.

Anomaly (*an-om'-al-e*) [ἀνωμαλία, irregularity]. A marked deviation from the normal or typical structure or occurrence.

Anomobranchiate (*an-o-mo-brang'-ke-āt*) [ἄνομος, irregular; βράγχια, gills]. In biology, characterized by having anomalous gills.

Anomo-carpous (*an-o-mo-kar'-pus*) [ἄνομος, irregular; καρπός, fruit]. In biology, producing anomalous or irregular fruits.

Anomocephalus (*an-o-mo-sef'-al-us*) [ἀ priv.; νόμος, law; κεφαλή, head]. See *Anomalocephalus*.

Anomophyllous (*an-o-mof'-il-us*) [ἀ priv.; νόμος, a law; φύλλον, a leaf]. In biology, with irregularly-arranged leaves.

Anomphalous (*an-om'-fal-us*) [ἀν priv.; ὀμφαλός, navel]. Having no navel, a condition that may result from disease or from a surgical operation.

Anomural (*an-o-mu' ral*) [ἄνομος, irregular; οὐρά, tail]. In biology, characterized by having a small, irregular tail.

Anonychia (*an-o-nik'-e-ah*) [ἀν priv.; ὄνυξ, nail]. Absence or defect of the nails.

Anonym (*an'-o-nim*) [ἀνώνυμος, nameless]. In biology, an insignificant or unscientifically formed name.

Anonyma (*an-on'-im-ah*) [ἀν priv.; ὄνυμα, name]. The innominate artery.

Anonymous (*an-on'-im-us*) [ἀν priv.; ὄνυμα, a name]. Nameless. **A. Bone.** See *Innominatum*.

Anoöpsia (*an-o-op'-se-ah*) [ἀνώ, upward; ὄψις, vision]. Strabismus in which the eye is turned upward.

Anophthalma (*an-off-thal'-mah*). See *Anophthalmia*.

Anophthalmia (*an-off-thal'-me-ah*) [ἀν priv.; ὀφθαλμός, eye]. Congenital absence of the eyes. **A. cyclopica**, a congenital malformation in which the eye-socket is very ill-developed and the orbit rudimentary or altogether absent.

Anophthalmos (*an-off-thal'-mus*) [ἀν priv.; ὀφθαλμός, eye]. 1. Congenital absence of the eyes. 2. A person born without eyes.

Anopia (*an-o'-pe-ah*) [ἀν priv.; ὤψ, the eye]. Absence or rudimentary development of the eye.

Anopluriform (*an-o-plu'-rif-orm*) [ἄνοπλος, unarmed; οὐρά, tail; *forma*, form]. Resembling or related to a louse.

Anopsia (*an-op'-se-ah*) [ἀν priv.; ὄψις, vision]. See *Amblyopia*.

Anopsy (*an'-op-se*). Same as *Anopsia*.

Anopylus (*an-o-pi'-lus*) [ἀνω, forward; πύλη, a gate]. Lissauer's term for a skull in which there is a strong forward inclination of the foramen magnum.

Anorchia (*an-or'-ke-ah*). See *Anorchism*.

Anorchism (*an'-or-kizm*) [ἀν priv.; ὄρχις, the testicle]. Absence of the testicles.

Anorchous (*an-or'-kus*) [ἀν priv.; ὄρχις, the testicle]. Without testicles.

Anorchus (*an-or'-kus*) [ἀ priv.; ὄρχις, the testicle]. A person in whom the testicles are absent or not descended.

Anorectic, Anorectous (*an-o-rek'-tik, an-o-rek'-tus*) [ἀν priv.; ὄρεξις, appetite]. Without an appetite.

Anorexia (*an-o-rek'-se-ah*) [ἀν priv.; ὄρεξις, appetite]. Absence or diminution of appetite, occurring in gastric diseases, fevers, and many chronic affections. **A., Hysteric.** See *Apepsia*, *Hysteric*. **A. nervosa**, an hysteric affection occurring chiefly in young neurotic females. It is characterized by extreme emaciation and a great aversion to food.

Anorganic (*an-or-gan'-ik*) [ἀ priv.; ὄργανον, an organ]. Not containing organs, as the epidermis.

Anorhin (*an'-or-in*) [ἀνω, upward; ῥίς, the nose]. A term applied by Lissauer to skulls in which the subnasal point lies above the *radius fixus* taken as a horizontal.

Anorophos (*an-o'-ro-fos*) [ἀ priv.; ὄροφος, a roof]. Not having the skull-cap.

Anorthopia (*an-or-tho'-pe-ah*) [ἀν priv.; ὀρθός, straight; ὄψις, vision]. 1. A defect in vision in which straight lines do not seem straight, and parallelism or symmetry is not properly perceived. 2. Squinting; obliquity of vision.

Anorthosis (*an-or-tho'-sis*) [ἀν priv.; ὄρθωσις, a making straight]. Absence or defect of erectility.

Anosia (*an-o'-se-ah*) [ἀ priv.; νόσος, disease]. Without disease; normal health.

Anosmia (*an-oz'-me-ah*) [ἀν priv.; ὀσμή, smell]. Partial or complete loss of the sense of smell, due either to local disease or disease of the olfactory nerves or bulb. It is associated with impairment or loss of the sense of taste.

Anosphrasia (*an-os-fra'-ze-ah*) [ἀν priv.; ὀσφρασία, smell]. Defect or absence of the sense of smell.

Anosphresia (*an-os-fre'-se-ah*). See *Anosphresis*.

Anosphresis (*an-os-fre'-sis*) [ἀν priv.; ὀσφρησις, odor]. Same as *Anosphrasia*.

Anosphresy (*an-os'-fre-se*). See *Anosphresia*.

Anospinal (*a-no-spi'-nal*) [*anus*, the fundament; *spina*, the backbone]. Relating to the anus and the spinal cord. **A. Center** is situated in the lumbar portion of the spinal cord; it controls the anal sphincters.

Anostomus (*an-o-sto'-mus*) [ἀνω, upward; στόμα, mouth]. Lissauer's term for a skull in which the alveolar point is elevated above the *radius fixus*, the latter being horizontal.

Anostosis (*an-os-to'-sis*) [*ἀν* priv.; *ὀστέον*, bone]. Defective development of bone.

Anotus (*an-o'-tus*) [*ἀν* priv.; *οὖς*, the ear]. An earless monstrosity.

Anovesical (*a-no-ves'-ik-al*) [*anus*, the fundament; *vesica*, the bladder]. Pertaining conjointly to the anus and urinary bladder.

Anoxyemia (*an-oks-e-e'-me-ah*) [*ἀν* priv.; *oxygen*; *αἷμα*, blood]. An abnormal condition due to the breathing of an insufficient amount of oxygen; mountain sickness; balloon sickness.

Ansa (*an'-sah*) [L., a "handle:" *pl.*, *Ansæ*]. A loop or curved structure suggesting by its form the handle of a vessel; a loop in a nerve, intestine, or vessel, or in a surgeon's thread. **A. capitis**, the zygomatic arch. **A., Haller's**, the loop formed by the nerve joining the facial and glosso-pharyngeal nerves. **A., Henle's.** See *Henle's Loop*. **A. hypoglossi**, a loop formed at the middle of the neck by the junction of the descendens noni nerve with branches of the second and third cervical nerves. **A. of Reil**, the name given to that portion of the brain just ventrad of the thalamus. **A. sacralis**, a loop joining the ganglion impar (G. Walteri) with the sympathetic trunks of the two sides. **A. of Vieussens**, a loop extending from the third cervical ganglion and surrounding the subclavian artery. **A. of Wrisberg**, the nerve joining the right great splanchnic and right pneumogastric nerves.

Anserine (*an'-ser-in*) [*anserinus; anser*, a goose]. Resembling a goose. **A. Disease**, an emaciation of the hands, rendering the tendons unduly prominent, and suggesting the appearance of a goose's foot. **A. Skin.** See *Cutis anserina*.

Anstie's Test. See *Tests, Table of*.

Ansulate (*an'-su-lāt*) [*ansula*, a little handle]. The coiled and bent-over extremity of a stem or tendril.

Ant-, Anti- (*ant-* or *an'-te*) [*ἀντί*, against]. Prefixes to compound words signifying opposed to, against, counteracting, etc.

Antacid (*ant-as'-id*) [*anti*, against; *acidus*, acid]. A substance counteracting or neutralizing acidity; an alkali.

Antacrid (*ant-ak'-rid*) [*anti*, against; *acer*, sharp]. Correcting acridity in the secretions. **A. Tincture.** See *Guaiac Mixture, Fenner's*.

Antadiform (*ant-ad'-if-orm*) [*anti*, opposite; *ad*, toward; *forma*, form]. In biology, having the dorsal and ventral contours inversely similar, as in certain fishes.

Antagonism (*an-tag'-o-nizm*) [*ἀνταγωνίζεσθαι*, to struggle against]. Opposed activity, as of two sets of muscles or of two remedial agents.

Antagonist (*an-tag'-o-nist*) [*ἀνταγωνιστής*, counteracting]. A term applied to a drug that neutralizes the therapeutic effects of another. In anatomy, a muscle that acts in opposition to another. Applied also to diseases that seem to exclude each other. See *Drug*. **A., Associated**, a name given to that muscle of a healthy eye that turns the globe in the same direction as the affected muscle of the opposite eye would, if normal, turn the eye to which it belongs.

Antagonistic (*an-tag-o-nis'-tik*) [*ἀνταγωνιστής*, counteracting]. Opposing. **A. Drugs, Table of.** See *Drug*.

Antalgic (*ant-al'-jik*) [*ἀντί*, against; *ἄλγος*, pain]. 1. Relieving pain. 2. A remedy relieving pain.

Antalkaline (*ant-al'-kal-in* or *-ēn*). An agent neutralizing alkalies, as acids.

Antambulacral (*ant-am-bu-la'-kral*) [*ἀντί*, against; *ambulacrum*, a walk]. In biology, located opposite or away from the ambulacra.

Antaphrodisiac (*ant-af-ro-diz'-e-ak*) [*ἀντί*, against; *ἀφροδίσια*, sexual desire]. 1. Lessening the venereal desires. 2. An agent that lessens the venereal impulse; an anaphrodisiac.

Antapoplectic (*ant-ap-o-plek'-tik*) [*ἀντί*, against; *ἀποπληξία*, apoplexy]. Efficient in preventing or treating apoplexy.

Antarthritic (*ant-ar-thrit'-ik*) [*ἀντί*, against; *ἀρθριτικός*, gouty]. 1. Relieving the gout. 2. A medicine for the relief of gout.

Antasthenic (*ant-as-then'-ik*) [*ἀντί*, against; *ἀσθένεια*, weakness]. Tending to correct debility and restore the strength.

Antasthmatic (*ant-az-mat'-ik*) [*ἀντι*, against; *ἀσθμα*, short breath]. 1. Relieving the asthma. 2. A medicine serving for the relief of asthma.

Antatrophic (*ant-at-rof'-ik*) [*ἀντί*, against; *ἀτροφία*, wasting]. 1. Preventing atrophy. 2. A drug that will prevent wasting or atrophy.

Antebrachium (*an-te-bra'-ke-um*) [*ante*, before; *brachium*, the arm]. The forearm.

Antechamber (*an'-te-chām-ber*) [*ante*, before; ME., *chamber*, a room]. In biology, the space between the guard-cells of a stoma.

Antecoxal (*an-te-koks'-al*) [*ante*, before; *coxa*, the hip joint]. In biology, located anterior to a coxa.

Antecurvature (*an-te-ker'-vat-chūr*) [*ante*, forward; *curvatus*, bent]. A forward curvature.

Antedisplacement (*an-te-dis-plās'-ment*) [*ante*, forward; O. F., *desplacer*, to put out of place]. Forward displacement of a part or organ.

Antedonin (*an-te-don'-in*) [*Antedon*, a crinoid, from *ἀνθηδών*, the Greek medlar]. A pigment obtained from *Comatula rosacea*, a crinoid echinoderm.

Anteflexion (*an-te-flek'-shun*) [*ante*, before; *flectere*, to bend]. A bending forward. **A. of Uterus**, a condition in which the fundus sinks between the cervix and the neck of the bladder.

Antefurca (*an-te-fer'-kah*) [*ante*, before; *furca*, a fork]. In biology, a Y-shaped chitinous prop affixed to the under surface of the thorax of insects and projecting into the thoracic cavity. Cf. *Medifurca* and *Postfurca*.

Antegrade (*an'-te-grād*) [*antegredi*, to precede]. Anabolic; not retrograde or catabolic.

Antehelix (*an-te-hē'-liks*). See *Anthelix*.

Antelocation (*an-te-lo-ka'-shun*) [*ante*, before; *locus*, a place]. The forward displacement of an organ or viscus.

Antembasis (*ant-em'-bas-is*) [*ἀντέμβασις*, interlocking]. The setting or locking of bones.

Antemetic (*ant-e-met'-ik*). See *Antiemetic*.

Ante mortem (*an'-te mor'-tem*) [L.]. Before death.

Antenarial (*an-te-na'-re-al*) [*ante*, before; *nares*, the nostrils]. Situated in front of the nostrils.

Antenna (*an-ten'-ah*) [*ἀντείνειν*, to stretch out]. In biology, one of the paired, articulated, sensory appendages of the head of an arthropod. One of a pair of long additions to the male flower in certain orchids.

Antennaria (*an-ten-a'-re-ah*). See *Everlasting*.

Anteocular (*an-te-ok'-u-lar*) [*ante*, before; *oculus*, the eye]. In biology, situated in advance of the eyes.

Anteoperculum (*an-te-o-per'-ku-lum*) [*ante*, before; *operculum*, a lid]. In biology, the *Preoperculum*, *q.v.*

Anteorbital (*an-te-or'-bit-al*) [*ante*, before; *orbita*, the track of a wheel]. In comparative anatomy, placed in advance of the eyes.

Ante partum (*an'-te par'-tum*) [L.]. Before delivery.

Antepectoral (*an-te-pek'-tor-al*) [*ante*, before; *pectus*, the breast]. Placed in front of the chest.

Antepectus (*an-te-pek'-tus*) [*ante*, before; *pectus*, the breast]. In biology, the sternal region of the prothorax.

Antephialtic (*ant-ef-e-al′-tik*) [*ἀντί*, against; *ἐφιάλτης*, nightmare]. Preventive of nightmare.

Antepileptic (*ant-ep-il-ep′-tik*) [*ἀντί*, against; *ἐπίληψις*, epilepsy]. Relieving epilepsy.

Anteprostatic (*an-te-pros-tat′-ik*) [*ante*, before; *προστάτης*, one who stands before]. Situated before the prostate. **A. Glands,** certain small accessory glands sometimes found between Cowper's gland and the prostate.

Anterethic (*an-ter-eth′-ik*) [*ἀντί*, against; *ἐρεθισμός*, irritation]. Soothing; allaying irritation.

Anterior (*an-te′-re-or*) [*anterius*, forward]. Situated ventrad or hemad of a corresponding organ, the latter being designated as *posterior* (or *posterius*). **A. Poliomyelitis,** inflammation in the anterior horns of the spinal cord, giving rise to a characteristic paralysis; common in children. **A. Rotation,** the forward turning of the presenting part in labor.

Antero- (*an′-te-ro-*) [*anterior*, before]. A prefix signifying position in front.

Anterograde (*an′-te-ro-grād*) [*anterior*, before; *gredi*, to go]. Proceeding from before; moving back.

Antero-inferior (*an′-te-ro-in-fē′-re-or*) [*anterior*, forward; *inferior*, lower]. Situated in front and below.

Antero-lateral (*an′-te-ro-lăt′-er-al*) [*anterior*, before; *latus*, a side]. In front and to or on one side; from the front to one side.

Antero-parietal (*an′-te-ro-par-ī′-et-al*) [*anterior*, before; *paries*, a wall]. Anterior and also parietal. **A Area,** the anterior part of the parietal area of the cranium. **A. Gyrus,** or **Convolution,** the ascending frontal convolution of the brain.

Antero-posterior (*an′-te-ro-pos-tē′-re-or*) [*anterior*, forward; *posterior*, backward]. From before backward. **A. Plane.** See *Median plane.*

Antero-superior (*an′-te-ro-su-pē′-re-or*) [*anterior*, forward; *superior*, upper]. In front and above.

Anterotic (*ant-e-rot′-ik*) [*ἀντί*, against; *ἐρωτικός*, pertaining to love]. Anaphrodisiac.

Ante-uterine (*an-te-u′-ter-in*) [*ante*, before; *uterus*, the womb]. In front of the womb.

Anteversion (*an-te-ver′-shun*) [*ante*, before; *vertere*, to turn]. A turning forward. **A. of Uterus,** the fundus is bent toward the symphysis pubis, the cervix toward the sacrum.

Anthela (*an′-the-lah*) [*ἀνθήλη*, the downy plume of the reed]. In biology, an open paniculate cyme.

Anthelicine (*an-thel′-is-in*) [*ἀνθέλιξ*, the inner curvature of the ear]. Pertaining to the anthelix.

Anthelix (*ant′-he-liks* or *an′-the-liks*) [*ἀνθέλιξ*, the inner curvature of the ear]. The ridge surrounding the concha of the external ear posteriorly.

Anthelmintic (*an-thel-min′-tik*) [*ἀντί*, against; *ἕλμινς*, a worm]. 1. Efficacious against worms. 2. A vermicide. An agent either killing or rendering powerless intestinal parasites; a *vermifuge* expels worms.

Anthemis (*an′-them-is*) [*ἀνθεμίς*, a flower]. Camomile. The flower-heads of *A. nobilis*, with properties due to a volatile oil, a camphor, and a bitter principle. Useful in coughs and spasmodic infantile complaints. An excellent stomachic tonic. Infusion of ʒiv to Oj, given in doses of ℥j–ij. No official preparations. **A., Extract** (B. P.), dose gr. ij–x. **A., Infus.** (B. P.), dose ℥j–iv. **A. Ol.,** the volatile oil of camomile. Dose ♏ij–x, in sugar.

Anthemoptyic (*ant-hem-op′-te-ik*) [*ἀντί*, against; *αἷμα*, blood; *πτύειν*, a spitting]. Checking pulmonary hemorrhage.

Anthemorrhagic (*ant-hem-or-aj′-ik*) [*ἀντί*, against; *αἷμα*, blood; *ῥαγία*, a bursting]. Checking or tending to prevent hemorrhage.

Anther (*an′-ther*) [*ἀνθηρός*, in full bloom]. In biology, the male sexual organ in plants; the summit and essential part of the stamen. It contains the pollen or fecundating substance of the flower.

Antheridia (*an-ther-id′-e-ah*). Plural of *Antheridium*, *q. v.*

Antheridium (*an-ther-id′-e-um*) [*anthera*, anther; Gr. dim., *ἰδιον*]. The male or fertilizing organ of higher cryptogams; the organ that produces antherozoids.

Antherozoid (*an′-ther-o-zo-id*) [*anthera*, anther; *zoöides*, zoöid]. In biology, one of the motile fertilizing bodies of higher cryptogams, analogous to the spermatozoid of animals. The male reproductive cell of cryptogams.

Anthesis (*an-thē′-sis*) [*ἄνθησις*, the full bloom of a flower]. The act of flowering; florescence.

Anthocarpous (*an-tho-kar′-pus*) [*ἄνθος*, flower; *καρπός*, fruit]. In biology, applied to collective or accessory fruits characterized by thickened floral envelopes.

Anthoclinium (*an-tho-klin′-e-um*) [*ἄνθος*, flower; *κλίνη*, a bed]. See *Clinanthium.*

Anthocyanin (*an-tho-sī′-an-in*) [*ἄνθος*, flower; *κύανος*, blue]. The soluble pigment of blue flowers.

Anthodium (*an-thō′-de-um*) [*ἄνθος*, a flower; *εἶδος*, form]. In biology, the so-called "flower" of the *Compositæ*, really a capitulum or head of flowers.

Anthogenesis (*an-tho-jen′-es-is*) [*ἄνθος*, a flower; *γένεσις*, production]. In biology, a phase of alternation of generations exhibited by certain hemipterous insects, plant lice, etc.

Antholeucin (*an-tho-lu′-sin*) [*ἄνθος*, a flower; *λευκός*, white]. The soluble pigment of white flowers.

Antholysis (*an-thol′-is-is*) [*ἄνθος*, a flower; *λύσις*, a breaking up]. In biology, that retrograde metamorphosis in which the normal character or location of the parts of a flower is altered.

Anthony's Fire, St. A popular name for *Erysipelas.*

Anthophilous (*an-thoff′-il-us*) [*ἄνθος*, a flower; *φίλος*, loving]. In biology, fond of flowers, as a bee.

Anthophore (*an′-tho-fōr*) [*ἄνθος*, a flower; *φέρειν*, to bear]. In biology, the stalk that bears the corolla, stamens, and pistil in certain flowers, formed by the elongation of the internode between the calyx and corolla.

Anthotaxis (*an-tho-taks′-is*) [*ἄνθος*, a flower; *τάξις*, order]. The arrangement of flowers in flower-clusters.

Anthoxanthin, Anthoxanthine (*an-tho-zan′-thin*) [*ἄνθος*, flower; *ξανθός*, yellow]. In biology, the yellowish pigments of fruits and flowers.

Anthozoöid (*an-tho-zo′-oid*) [*ἄνθος*, a flower; *ζῷον*, an animal; *εἶδος*, likeness]. A single zoöid of the flower-like animals, *Actinozoa; e. g.*, a coral polyp.

Anthracemia (*an-thras-ē′-me-ah*) [*ἄνθραξ*, a coal; *αἷμα*, blood]. Wool-sorter's disease; splenic fever of animals; the presence in the blood of *Bacillus anthracis*, the microbe of true anthrax or malignant pustule.

Anthracene (*an′-thra-sēn*) [*ἄνθραξ*, a coal], $C_{14}H_{10}$. A hydrocarbon formed from many carbon compounds when they are exposed to a high heat; also from coal-tar. It crystallizes in colorless, monoclinic tables, showing a beautiful blue fluorescence; dissolves with difficulty in alcohol and ether, but easily in hot benzene; melts at 213°. It is the base from which artificial alizarin is prepared. **A. Colors.** See *Pigments, Conspectus of.* **A. Oil,** the fraction of coal-tar distilling from 270° C. and over. It consists of that portion of the tar that is made up of bodies possessing the highest boiling points, and is distinguished from the heavy oil fraction by a separation, on cooling, of solid matters. In it has been found naphthalene, methyl-naphthalene, anthracene, phenanthrene, methyl-anthracene, pyrene, carbazol, etc.

Anthracia (*an-thra'-se-ah*) [ἄνθραξ, a coal]. A name for diseases characterized by the formation of carbuncles. **A. pestis,** the plague. **A. rubula.** Synonym of *Frambesia.*

Anthracic (*an-thras'-ik*) [ἄνθραξ, a coal]. Pertaining to or of the nature of anthrax.

Anthracite (*an'-thras-it*) [ἄνθραξ, a coal]. A variety of mineral coal containing but little hydrogen, and therefore burning almost without flame.

Anthracnosis (*an-thrak-no'-sis*) [ἄνθραξ, a coal; νόσος, disease]. Black rot, a fungus disease of vines, caused by the *Phoma uvicola,* or *Sphaceloma ampelium.*

Anthracoid (*an'-thrak-oid*) [ἄνθραξ, coal; εἶδος, form]. Resembling anthrax.

Anthracometer (*an-thrak-om'-et-er*) [ἄνθραξ, coal; μέτρον, a measure]. An instrument for estimating the amount of carbon dioxid in the air.

Anthracometry (*an-thrak-om'-et-re*) [ἄνθραξ, carbon; μέτρον, a measure]. The determination of the amount of carbon dioxid in air.

Anthraconecrosis (*an-thrak-o-ne-kro'-sis*) [ἄνθραξ, coal; νέκρωσις, death]. The necrotic transformation of a tissue into a black mass, as in dry gangrene.

Anthracosis (*an-thrak-o'-sis*) [ἄνθραξ, carbon; νόσος, disease]. A chronic interstitial pneumonitis with pigmentation of the lung, in coal-miners.

Anthracotyphus (*an-thrak-o-ti'-fus*) [ἄνθραξ, a coal; τῦφος, smoke, stupor]. Synonym of the *Plague.*

Anthrakokali (*an-thrak-o'-kal-e*) [ἄνθραξ, coal; Ar., *qalī,* soda ash]. An alkaline powder made by heating powdered mineral coal with a strong solution of caustic potash, with or without sulphur. It is used internally and externally in skin diseases, rheumatism, etc. Unof.

Anthranilic Acid (*an-thran-il'-ik*). See *Acid.*

Anthranol (*an'-thran-ol*) [ἄνθραξ, coal; *oleum,* oil], $C_{14}H_{10}O$. A body isomeric with anthrol. It is produced by the careful reduction of anthraquinone with tin and acetic acid. It crystallizes from alcohol in shining needles, melting with decomposition at 165°.

Anthraquinone (*an-thra-kwin-ōn'*) [ἄνθραξ, coal; Sp., *quina,* bark], $C_{14}H_8O_2$. Produced by oxidizing anthracene with HNO_3. It sublimes in yellow needles, melting at 277°, soluble in hot benzene and HNO_3.

Anthrarobin (*an-thra-ro'-bin*) [ἄνθραξ, coal; *aroba,* E. Ind. name for the bark of a leguminous tree]. A derivative of alizarin, similar to chrysarobin. A yellowish-white powder, insoluble in water, but soluble in alcohol and dilute alkaline solutions. Useful in psoriasis. Unof.

Anthrax (*an'-thraks*) [ἄνθραξ, a coal or carbuncle]. 1. A carbuncle; a painful, dark-colored tumor of the cellular tissue, ending in mortification of the part and the discharge of a fetid, bloody pus. The *benignant anthrax* has no fatal consequences. 2. The true or *malignant anthrax,* called also *malignant pustule,* is caused by the infection from animals suffering from splenic apoplexy, and is due to a specific bacillus, which, from a single center, may extend over the body and invade the intestinal tract, producing in this way, or by direct infection of diseased meat, the *intestinal type* of the disease. See *Bacillus* (*anthrax*). 3. The disease called black-leg, or quarter-evil (of sheep, cattle, etc.), is associated with what is called *symptomatic* anthrax. It is due to the microörganism called *Bacillus chauvæi,* (Arloing, Cornevin and Thomas). **A. Fever.** Synonym of *Anthrax.* **A., Internal.** See *Pustula maligna.* **A., Symptomatic.** See *Black-leg.*

Anthrol (*an'-throl*) [ἄνθραξ, a coal], $C_{14}H_{10}O$. A body obtained from anthracene-sulphonic acid. It crystallizes in leaflets, dissolving with a yellow color in the alkalies, and in H_2SO_4 with a blue color when heated.

Anthrophobia (*an-thro-fo'-be-ah*). See *Anthropophobia.*

Anthropiatrics (*an-thro-pe-at'-riks*) [ἄνθρωπος, man; ἰατρική, the art of medicine]. Ordinary human (non-veterinary) medicine.

Anthropobiology (*an-thro-po-bi-ol'-o-je*) [ἄνθρωπος, man; βίος, life; λόγος, word]. The science of the life-history of man.

Anthropocholic Acid (*an-thro-po-kol'-ik*). See *Acid.*

Anthropogenesis (*an-thro-po-jen'-es-is*) [ἄνθρωπος, man; γένεσις, generation]. The development of man, as a race (*phylogenesis*) and as an individual (*ontogenesis*).

Anthropogenous (*an-thro-poj'-en-us*) [ἄνθρωπος, man; γεννάειν, to produce]. Pertaining to *Anthropogenesis.*

Anthropogeny (*an-thro-poj'-en-e*) [ἄνθρωπος, man; γεννάειν, to produce]. The study or science of the descent of man.

Anthropoglot (*an'-thro-po-glot*) [ἄνθρωπος, man; γλῶσσα, the tongue]. Human-tongued, as a parrot.

Anthropography (*an-thro-pog'-ra-fe*) [ἄνθρωπος, man; γράφειν, to write]. A treatise upon the human structure or organism.

Anthropoid (*an'-thro-poid*) [ἄνθρωπος, a man; εἶδος, form]. Man-like, as an ape, or as all primates above the lemuroids.

Anthropology (*an-thro-pol'-o-je*) [ἄνθρωπος, man; λόγος, discourse]. The science of the nature, physical and psychological, of man and of mankind.

Anthropometalism (*an-thro-po-met'-al-izm*) [ἄνθρωπος, man; M.E., *metal*]. Hypnotism or the like condition, induced by looking at a metallic disc.

Anthropometer (*an-thro-pom'-et-er*) [ἄνθρωπος, man; μέτρον, a measure]. An instrument used in anthropometry.

Anthropometry (*an-thro-pom'-et-re*) [ἄνθρωπος, man; μέτρον, a measure]. The determination of the measurement, weight, strength, and proportions of the human body.

Anthropomorphic (*an-thro-po-mor'-fik*) [ἄνθρωπος, man; μορφή, form]. Man-like.

Anthroponosography (*an-thro-po-no-sog'-ra-fe*) [ἄνθρωπος, man; νόσος, sickness; γράφειν, to write]. A description of the diseases of mankind.

Anthropophagy (*an-thro-poff'-a-je*) [ἄνθρωπος, man; φαγεῖν, to devour]. 1. Cannibalism. 2. Sexual perversion leading to rape, mutilation, and cannibalism.

Anthropophobia (*an-thro-po-fo'-be-ah*) [ἄνθρωπος, man; φόβος, fear]. A symptom of mental disease consisting in fear of society.

Anthropophysiography (*an-thro-po-fiz-e-og'-ra-fe*) [ἄνθρωπος, man; φύσις, nature; γράφειν, to write]. The science or description of the natural characters of the human species.

Anthroposomatology (*an-thro-po-so-mat-ol'-o-je*) [ἄνθρωπος, man; σῶμα, body; λόγος, science]. The sum of what is known regarding the human body.

Anthropotomy (*an-thro-pot'-o-me*) [ἄνθρωπος, man; τομή, section]. Human anatomy, or dissection of the human body.

Anthropotoxin (*an-thro-po'-toks-in*) [ἄνθρωπος, man; τοξικόν, poison]. The toxic substance excreted by the lungs of human beings.

Anthropurgic (*an-thro-per'-jik*) [ἄνθρωπος, man; ἔργον, work]. Acted upon or influenced by man.

Anthydropic (*ant-hi-drop'-ik*) [ἀντί, against; ὕδωρ, water]. Effective against dropsy.

Anthypnotic (*ant-hip-not'-ik*) [ἀντί, against; ὕπνος, sleep]. 1. Preventive of sleep. 2. An agent that tends to induce wakefulness.

Anthypochondriac (*ant-hip-o-kon'-dre-ak*) [ἀντί, against; ὑποχονδριακός, affected in the hypochondrium]. Efficient in overcoming hypochondriasis.

Anthysteric (*ant-his-ter'-ik*) [*ἀντί*, against; *ὑστέρα*, the womb]. Overcoming hysteria.

Anti- (*an'-te-*) (sometimes contracted to *ant-*) [*ἀντί*, against]. A prefix of compound words signifying counteraction, opposition, etc.

Antiaditis (*an-ti-ad-i'-tis*) [*ἀντιάς*, a swollen tonsil; *ιτις*, inflammation]. Tonsillitis.

Antiadoncus (*an-ti-ad-ong'-kus*) [*ἀντιάς*, a swollen tonsil; *ὄγκος*, a heap]. Any tumor or swelling of the tonsils.

Antiæ (*an'-ti-e*) [*antiae*, the hair growing on the forehead]. In biology, the frontal points or feathers growing forward on the base of the upper mandible.

Antialbumate (*an-te-al'-bu-māt*) [*αντί*, against; *albumen*, white of egg]. Parapeptone; a product of hydrochloric-acid digestion on albumin. The pancreatic ferment changes it into antipeptone. When treated with acids it is converted into the substance called by Kühne *antialbumid*, which is identical with the *hemiprotein* of Schützenberger and the *dyspeptone* of Meissner, *q. v.*

Antialbumid (*an-te-al'-bu-mid*). See *Antialbumate.*

Anti-albumin (*an-te-al-bu'-min*) [*ἀντί*, against; *albumen*, white of egg]. An alleged product of the action of dilute hydrochloric acid upon albumin; it is probably one of the preformed substances existing in the proteid molecule. The other has been called *hemi-albumin.* Gastric juice first converts them into *anti-albumose* and *hemi-albumose*, and these finally into *anti-peptone* and *hemi-peptone.*

Anti-albumose (*an-te-al-bu'-mōs*) [*αντί*, against; *albumen*, white of egg]. One of the albumoses produced by the action of pancreatic juice on albumin. It resembles syntonin or acid albumin, and is convertible into antipeptone.

Antiaphrodisiac (*an-te-af-ro-dis'-e-ak*). See *Anaphrodisiac.*

Antiar (*an'-te-ar*). See *Antiarin.*

Antiarin (*an'-te-ar-in*) [Javanese, *antiar* or *antschar*], $C_{14}H_{20}O_5 + 2H_2O$. The active principle of *Antiaris toxicaria* or *Upas antiar*, the Javanese poison-tree. It is used as an arrow poison, and is intensely poisonous. It is a cardiac depressant. Dose gr. $\frac{1}{100}$.

Antiarthritic (*an-te-ar-thrit'-ik*) [*ἀντί*, against; *ἀρθρῖτις*, the gout]. A remedy against gout.

Antiasthmatic (*an-te-az-mat'-ik*) [*ἀντί*, against; *ἀσθμα*, short breath]. Relieving or preventing asthma.

Antibacterial (*an-te-bak-te'-re-al*) [*ἀντί*, against; *βακτηρία*, a staff, stick]. Opposed to the germ theory of disease.

Antibacteric (*an-te-bak-te'-rik*) [*ἀντί*, against; *βακτηρία*, a staff, stick]. Destructive to bacteria.

Antibechic (*an-te-bek'-ik*) [*ἀντί*, against; *βήξ*, a cough]. 1. Alleviating or curing cough. 2. A remedy for cough or hoarseness.

Antibilious (*an-te-bil'-yus*) [*ἀντί*, against; *biliosus*, full of bile]. Effective against bilious disorders.

Antibiotic (*an-te-bi-ot'-ik*) [*ἀντί*, against; *βίος*, life]. 1. Tending to destroy life. 2. Antagonistic to a belief in life.

Antiblenorrhagic (*an-te-blen-or-aj'-ik*) [*ἀντί*, against; *βλέννος*, mucus; *ῥηγνύμαι*, to burst]. Efficient in preventing gonorrhea.

Antibrachial (*an-te-bra'-ke-al*) [*ἀντί*, against; *βραχίων*, the arm]. Pertaining to the forearm.

Antibrachium (*an-te-bra'-ke-um*) [*ἀντί*, against; *βραχίων*, the arm]. The forearm; incorrectly antebrachium.

Antibromic (*an-te-bro'-mik*) [*ἀντί*, against; *βρῶμος*, a stench]. 1. Deodorant. 2. A drug that destroys offensive smells. A deodorizer.

Anticachectic (*an-te-kak-ek'-tik*) [*ἀντί*, against; *κακός*, bad; *ἕξις*, habit]. Effective in destroying cachexia.

Anticalcareous (*an-te-kal-ka'-re-us*) [*ἀντί*, against; *calx*, lime]. In veterinary medicine, preventing glanders.

Anticalculous (*an-te-kal'-ku-lus*) [*ἀντί*, against; *calculus*, a pebble]. Good against calculus; antilithic.

Anticarcinomatous (*an-te-kar-sin-o'-mat-us*) [*ἀντί*, against; *καρκίνωμα*, cancer]. Preventing carcinoma.

Anticardium (*an-te-kar'-de-um*) [*ἀντί*, over against; *καρδία*, the heart]. The scrobiculus cordis, or pit of the stomach; the infrasternal depression.

Anticarious (*an-te-ka'-re-us*) [*ἀντί*, against; *caries*, decay]. Preventing decay, as of the teeth.

Anticatarrhal (*an-te-kat-ar'-al*) [*ἀντί*, against; *κατάρροος*, a flowing down]. Counteracting catarrh.

Anticausotic (*an-te-kaw-sot'-ik*) [*ἀντί*, against; *καῦσος*, heat]. Counteracting fever.

Anticaustic (*an-te-kaws'-tik*) [*ἀντί*, against; *καυστικός*, caustic]. Arresting the action of a caustic agent.

Antichirotetanus (*an-te-ki-ro-tet'-an-us*) [*ἀντίχειρ*, the thumb; *τέτανος*, spasm]. Same as *Antichirotonus.*

Antichirotonous (*an-te-ki-rot'-o-nus*) [*ἀντίχειρ*, the thumb; *τόνος*, convulsive tension]. Affected with or manifesting antichirotonus.

Antichirotonus (*an-te-ki-rot'-o-nus*) [*ἀντίχειρ*, thumb; *τόνος*, tension]. Forcible and steady inflection of the thumb, seen in or before some attacks of epilepsy.

Antichlorotic (*an-te-klo-rot'-ik*) [*ἀντί*, against; *χλωρότης*, greenness]. Counteracting chlorosis.

Anticholeric (*an-te-kol-er'-ic*) [*ἀντί*, against; *χολέρα*, cholera]. Good against cholera.

Anticholerin (*an-te-kol'-er-in*) [*ἀντί*, against; *χολέρα*, cholera]. A product isolated by Klebs from cultures of cholera-bacilli, and thought to be bactericidal, curative, and immunifying.

Anticipating (*an-tis'-ip-a-ting*) [*anticipare*, to take before]. Applied to the occurrence of periodical phenomena in disease or health, before their customary time, as in intermittent fever or the catamenia.

Anticlinal (*an-te-kli'-nal*) [*ἀντί*, against; *κλίνειν*, to slope]. Sloping in opposite directions. **A. Vertebra,** in man, the tenth thoracic vertebra, where the thoracic vertebræ begin to assume the characters of the lumbar.

Anticnemion (*an-tik-ne'-me-on*) [*ἀντί*, against; *κνήμη*, leg]. The shin or front of the leg.

Anticolic (*an-te-kol'-ik*) [*ἀντί*, against; *κωλική*, colic]. Efficacious against colic.

Anticontagious (*an-te-kon-ta'-jus*) [*ἀντί*, against; *contagiosus*, contagious]. Counteracting contagion.

Anticonvulsive (*an-te-kon-vul'-siv*) [*ἀντί*, against; *convulsus*, convulsed]. Effective against convulsions.

Anticopometer (*an-te-ko-pom'-et-er*) [*ἀντικοπή*, resonance; *μέτρον*, a measure]. A plexímeter.

Anticous (*an-ti'-kus*) [*anticus*, that which is in front]. In biology, turned toward the center of the flower, as *introrse* anthers.

Anticritical (*an-te-krit'-ik-al*) [*ἀντί*, against; *κρίσις*, a crisis]. Preventing the crisis of a disease.

Anticryptic (*an-te-krip'-tic*) [*αντί*, against; *κρύπτειν*, to hide, to keep secret]. In biology, applied to such mimetic colors as enable animals to approach their prey, as in the frog, *Ceratophrys cornuta.*

Anticus (*an-ti'-kus*) [*anticus*, that in front]. Anterior, in front of.

Antidiarrheal (*an-te-di-ar-e'-al*) [*ἀντί*, against; *διαρρεῖν*, a flowing through]. Preventing or overcoming diarrhea.

Antidigestive (*an-te-di-jes'-tiv*) [*αντί*, against; *digestio*, digestion]. Preventing the proper digestion of the food.

Antidinic (*an-te-din'-ik*) [*ἀντί*, against; *δῖνος*, a whirl]. Curing or preventing vertigo.

Antidotal (*an-te-do'-tal*) [*ἀντί*, against; *δίδοναι*, to give]. Of the nature of an antidote.

Antidote (*an'-te-dōt*) [ἀντί, against; δίδοναι, to give]. An agent preventing or counteracting the action of a poison. The official **A., Arsenical,** of the German Pharmacopeia is prepared by dissolving 100 parts of the hydrated sulphate of iron in 250 parts of water, to which add (without heat) 15 parts of burnt magnesia and 250 parts of water. **A., Chemical,** changes the chemical nature of the poison so that it becomes insoluble or harmless. **A., Mechanical,** prevents absorption by holding the poison in mechanical suspension or by coating the stomach. **A., Physiological,** supplies its own peculiar and neutralizing effect upon the system. **A., Universal,** a mixture of one part of dissolved iron sulphate in two parts of magnesia water. See *Drug*.

Antidotum (*an-tid'-o-tum*). See *Antidote*.

Antidromy (*an-tid'-ro-me*) [ἀντί, against; δραμεῖν, to run]. In biology, having a spiral arrangement the opposite of that of contiguous parts. Cf. *Heterodromy*.

Antidynamic (*an-te-di-nam'-ik*) [ἀντί, against; δύναμις, force]. Weakening; depressing.

Antidyscratic (*an-te-dis-krat'-ik*) [ἀντί, against; δυσκρασία, bad temperament]. Tending to overcome, as a dyscrasia.

Antidysenteric (*an-te-dis-en-ter'-ik*) [ἀντί, against; δυσεντερία, dysentery]. 1. Serviceable against dysentery. 2. A remedy for dysentery.

Antidysuric (*an-te-dis-u'-rik*) [ἀντί, against; δυσουρια, difficult micturition]. Relieving dysury.

Antiemetic (*an-te-e-met'-ik*) [ἀντί, against; ἐμετικός, causing vomit]. Preventing emesis; relieving nausea. **A. Root.** See *Adrue*.

Antifat (*an'-te-fat*). See *Fucus vesiculosus*.

Antifebrile (*an-te-feb'-ril*) [ἀντί, against; *febris*, a fever]. An agent reducing a fever; a febrifuge.

Antifebrin (*an-te-feb'-rin*) [ἀντί, against; *febris*, a fever], $C_6H_5.C_2H_3O.NH$. Phenyl-acetamid acetanilid. A white, crystalline powder insoluble in water, freely soluble in alcohol. An antipyretic more powerful than quinin. Its effects are manifest in one hour, passing away in 3–10 hours. It is efficacious in fevers characterized by high temperature, and also is a valuable analgesic and antispasmodic. Dose gr. iv–xv. Unof. **A., Bromated.** See *Antisepsin*.

Antiferment (*an-te-fer'-ment*) [ἀντί, against; *fermentum*, leaven]. An agent that prevents fermentation.

Antigalactagogue (*an-te-gal-ak'-ta-gog*) [ἀντί, against; γάλα, milk; ἀγωγός, leading]. Same as *Antigalactic*.

Antigalactic (*an-te-gal-ak'-tik*) [ἀντί, against; γάλα, milk]. 1. Lessening the secretion of milk. 2. A drug that lessens the secretion of milk.

Antigeny (*an-tij'-en-e*) [ἀντί, against; γένος, race]. In biology, existing in two distinct sexual forms.

Antiguggler (*an-te-gug'-ler*) [ἀντι, against; *gurgle*]. A tube inserted into the mouth of a bottle to prevent the splashing or gurgling of liquid that is poured out.

Antihectic (*an-te-hek'-tik*) [ἀντί, against; ἑκτικός, consumptive]. A remedy preventing or overcoming a hectic condition.

Antihelix (*an-te-he'-lik*). See *Anthelix*.

Antiherpetic (*an-te-her-pet'-ik*) [ἀντί, against; ἕρπης, herpes]. Preventing herpes.

Antihidrotic (*an-te-hi-drot'-ik*) [ἀντί, against; ἱδρώς, sweat]. 1. Diminishing the excretion of sweat. 2. An agent lessening the secretion of sweat.

Antihydropic (*an-te-hi-drop'-ik*). See *Anthydropic*.

Antihydropin (*an-te-hi'-dro-pin*) [ἀντί, against; ὕδωρ, water]. A crystalline principle obtainable from the common cockroach, *Blatta* (*Periplaneta*) *orientalis*, said to be a good diuretic. Formerly used in dropsy.

Anti-icteric (*an-te-ik-ter'-ik*) [ἀντί, against; ἴκτερος, jaundice]. Serviceable against jaundice.

Antikamnia (*an-te-kam'-ne-ah*) [ἀντί, against; κάμνειν, to suffer pain]. A proprietary remedy said to be composed of sodium bicarbonate, antifebrin, and caffein. Used as a nervin in doses of gr. v–x. Unof.

Antikol (*an'-tik-ol*). A proprietary antipyretic mixture said to contain acetanilid, soda bicarbonate and tartaric acid.

Antilemic, or **Antilœmic** (*an-te-le'-mik*), or **Antiloimic** (*an-te-loi'-mik*) [ἀντί, against; λοιμός, the plague]. Efficacious against the plague or other pestilence.

Antilepsis (*an-til-ep'-sis*) [ἀντίληψις, a receiving in return]. The treatment of disease by the application of the remedy to a healthy part; revulsive treatment.

Antileptic (*an-til-ep'-tik*) [ἀντίληψις, a receiving in return]. Revulsive.

Antilithic (*an-te-lith'-ik*) [ἀντι, against; λίθος, a stone]. 1. Efficacious against calculus. 2. An agent preventing the deposit of urinary calculi or sediment.

Antilobium (*an-te-lo'-be-um*) [ἀντί, against; λοβός, the lobe of the ear]. The tragus or part of the ear opposite the lobe.

Antilœmic. See *Antilemic*.

Antiluetic (*an-te-lu-et'-ik*) [ἀντί, against; *lues*, the plague; syphilis]. Efficacious against syphilis.

Antilyssic (*an-te-lis'-ik*) [ἀντί, against; λύσσα, rabies]. 1. Tending to cure rabies. 2. A remedy for rabies.

Antilytic (*an-te-lit'-ik*) [ἀντί, against; λύειν, to loosen]. Antiparalytic.

Antimaniacal (*an-te-ma-ni'-ak-al*) [ἀντι, against; μανία, madness]. Overcoming insanity.

Antimephitic (*an-te-mef-it'-ik*) [ἀντί, against; *mephitis*, a pestilential exhalation]. Efficacious against foul exhalations or their effects.

Antimere (*an'-te-mēr*) [ἀντί, against; μέρος, a part]. Any one of the segments of the body that are bounded by planes typically at right angles to the long axis of the body.

Antimiasmatic (*an-te-mi-as-mat'-ik*) [ἀντί, against; μίασμα, exhalation]. Preventive of malaria.

Antimicrophyte (*an-te-mik'-ro-fīt*) [ἀντί, against; μικρός, small; φυτόν, plant]. A germicide.

Antimonial (*an-te-mo'-ne-al*) [*antimonium*, antimony]. Containing antimony.

Antimonic (*an-te-mon'-ik*) [*antimonium*, antimony]. A term applied to those compounds of antimony that correspond to its higher oxid.

Antimonii (*an-te-mo'-ne-i*). Genitive of *Antimonium*, *q.v.*

Antimonious (*an-te-mo'-ne-us*) [*antimonium*, antimony]. A term noting those compounds of antimony that correspond to its lower oxid.

Antimonium (*an-te-mo'-ne-um*) [L., *gen.*, *Antimonii*]. Sb = 122; quantivalence I, III, V. A non-metal, having a metallic luster. Only the combinations are used in medicine. Antimonial salts are cardiac depressants and promote rapid excretion of waste products of the body; in large doses they produce vomiting and purging, with symptoms similar to those of cholera. They are valuable in inflammatory ailments of the respiratory organs, puerperal peritonitis and muscular rheumatism. **A. chlorid.,** $SbCl_3$, the "butter" of antimony; a strong caustic. Unof. **A. Comp., Pil.,** Plummer's pills, contain calomel and antimony sulphuratum, āā gr. ss. **A. oxid.,** Sb_2O_3; soluble in hydrochloric and tartaric acids. Dose gr. j–ij. **A. oxychlorid.,** the "powder of algaroth"; now little used. Unof. **A. et Potass. tartras,** (**A. tartaratum**) (B. P.), $2KSbOC_4H_4O_6.H_2O$, tartrate of antimony and potassium, "tartar emetic." Dose gr. $\frac{1}{16}$–$\frac{1}{4}$. **A. pulvis,** powder of antimony, James' powder, consists of antimonious oxid 33, and calcium phosphate, 67 parts. A prompt diaphoretic. Dose gr. iij–viij. In larger doses, emetic and cathartic.

A. sulphid, Sb_2S_3, black sulphid of antimony. Dose gr. ¼–j. **A. sulphuratum,** the sulphid with a small but indefinite amount of the oxid. Dose gr. j–v. **A. sulph. purificatum.** Dose gr. ¼–j. **Syr. Scillæ Comp.,** Cox's hive mixture, hive syrup. Each ʒj contains gr. ¾ of tartar emetic. Dose ♏v–ʒj cautiously. **A. tartarato, Ung.** (B. P.), one part of tartar emetic to five of simple ointment. **A. vinum,** wine of antimony, boiling water 60, tartar emetic 4, stronger white wine 1000 parts. A good expectorant. Dose ♏v–xv.

Antimycotic (*an-te-mi-kot'-ik*) [ἀντί, against; μύκης, a fungus]. Destructive of fungal microörganisms.

Antinarcotic (*an-te-nar-kot'-ik*) [ἀντί, against; νάρκωσις, a benumbing]. Preventing narcosis.

Antinephritic (*an-te-nef-rit'-ik*) [ἀντί, against; νεφρός, the kidney; ιτις, inflammation]. Preventing or curative of renal disease.

Antinervin (*an-te-ner'-vin*) [ἀντί, against; *nervus*, a tendon or nerve]. Salbromalid, a mixture of bromacetanilid and salicylanilid; used for the relief of neuralgia. Unof.

Antineuralgic (*an-te-nu-ral'-jik*) [ἀντί, against; νεῦρον, a nerve; ἄλγος, pain]. Overcoming neuralgia.

Antineurotic (*an-te-nu-rot'-ik*) [ἀντί, against; νεῦρον, a nerve]. A remedy of service in nervous diseases.

Antiniad (*an-tin'-e-ad*) [ἀντί, against; ἰνίον, the nape of the neck]. Toward the antinion; glabellad.

Antinial (*an-tin'-e-al*) [ἀντί, against; ἰνίον, the nape of the neck]. Pertaining to the antinion.

Antinien (*an-tin'-e-en*) [ἀντί, against; ἰνίον, the nape of the neck]. Belonging to the antinion in itself.

Antinion (*an-tin'-e-on*) [ἀντί, against; ἰνίον, the nape of the neck]. See *Craniometrical Points.*

Antiodont (*an'-te-o-dont*) [ἀντί, opposite to; ὀδούς, tooth]. A form of dentition in which the crown ridges of the molar teeth are opposite, instead of alternate as in amebodont dentition.

Antiodontalgic (*an-te-o-don-tal'-jik*) [ἀντί, against; ὀδούς, tooth; ἄλγος, pain]. Curative of toothache.

Antiorgastic (*an-te-or-gas'-tik*) [ἀντί, against; ὀργασμός, swelling, excitement]. Anaphrodisiac.

Antiopelmous (*an-te-o-pel'-mus*) [ἀντίος, set against; πέλμα, the sole]. In biology, characterized by having the *flexor perforans* supply the third toe only and the *flexor hallucis* the first, second and fourth toes. Cf. *Sympelmous, Heteropelmous.*

Antiparasitic (*an-te-par-as-it'-ik*) [ἀντί, against; παράσιτος, a parasite]. 1. Destroying parasites. 2. An agent destroying or preventing increase of parasites. Insecticide.

Antiparastatitis (*an-te-par-as-tat-i'-tis*) [ἀντί, over against; παραστάτης, a testicle]. Inflammation of Cowper's glands.

Antipathetic (*an-te-path-et'-ik*) [ἀντί, against; πάθος, feeling, *i. e.*, antipathy or constitutional aversion]. In biology, applied to plants not easily grafted.

Antipathic (*an-te-path'-ik*) [ἀντί, against; πάθος, disease]. A synonym of *allopathic*, both terms alike being rejected by the advocates of rational medicine.

Antipathy (*an-tip'-a-the*) [ἀντί, against; πάθος, affection]. Aversion; an opposing property or quality.

Antipeduncular (*an-te-pe-dung'-ku-lar*) [ἀντί, against; *pedunculus*, a little foot]. In biology, placed opposite a peduncle.

Anti-peptone (*an-te-pep'-tōn*) [ἀντί, against; πέπτειν, to cook, digest]. A variety of peptone formed in the pancreatic digestion, and incapable of further peptonic change.

Antiperiodic (*an-te-pe-re-od'-ik*) [ἀντί, against; περίοδος, a paroxysm]. 1. Efficacious against periodic attacks of disease. 2. A remedy against periodic disease, especially intermittent fever. Quinin is the best known. **A. Tincture.** See *Warburg's Tincture.*

Antiperistalsis (*an-te-per-is-tal'-sis*) [ἀντί, against; περί, around; στάλσις, compression]. Reversed peristalsis; inverted or upward peristaltic action.

Antiperistaltic (*an-te-per-is-tal'-tik*) [ἀντί, against; περί, around; στάλσις, compression]. Relating to antiperistalsis.

Antipestilential (*an-te-pes-til-en'-shal*) [ἀντί, against; *pestilentia*, the plague]. Counteracting the influence of the plague.

Antipetalous (*an-te-pet'-al-us*) [ἀντί, against; πέταλον, a leaf]. In biology, inserted opposite to, instead of alternate with, the petals.

Antipharmic (*an-te-far'-mik*). See *Alexipharmac.*

Antiphlogistic (*an-te-flo-jis'-tik*) [ἀντί, against; φλόγωσις, inflammatory heat]. 1. Counteracting or directed against fever. 2. An agent subduing or reducing inflammation or fever. **A. Treatment,** consists in bloodletting, the application of cold, administration of antipyretics, etc.

Antiphysic (*an-te-fiz'-ik*) [ἀντί, against; φῦσα, wind]. Carminative; overcoming flatulence.

Antiplastic (*an-te-plas'-tik*) [ἀντί, against; πλάσσειν, to form]. 1. Unfavorable to granulation or the healing process. 2. An agent impoverishing the blood.

Antipleuritic (*an-te-plu-rit'-ik*) [ἀντί, against; πλευρῖτις, pleurisy]. Overcoming pleurisy.

Antipneumonic (*an-te-nu-mon'-ik*) [ἀντί, against; πνευμονία, pneumonia]. Of value in treating pneumonia.

Antipneumotoxin (*an-te-nu-mo-toks'-in*). See *Pneumotoxin.*

Antipodagric (*an-te-po-dag'-rik*) [ἀντί, against; ποδάγρα, gout in the feet]. Efficacious against gout.

Antipodal Cells (*an-tip'-o-dal*) [ἀντί, opposite; πόυς, foot]. A term applied to a group of four cells formed in the lower end of the embryo-sac opposite to the cells constituting the egg-apparatus.

Antipoison (*an'-te-poi-zn*) [ἀντί, against; ME., *poisoun*, a potion]. A counter poison.

Antipraxia (*an-te-praks'-e-ah*) [ἀντί, against; πράσσειν, to do]. Antagonism of functions or of symptoms.

Antiprostate (*an-te-pros'-tāt*). See *Anteprostate.*

Antipruritic (*an-te-pru-rit'-ik*) [ἀντί, against; *pruritus*, itching]. 1. Relieving the sensation of itching. 2. A drug that relieves the sensation of itching.

Antipsoric (*an-tip-so'-rik*) [ἀντί, against; ψώρα, the itch]. Effective against the itch.

Antiputrefactive (*an-te-pu-tre-fak'-tiv*). See *Antiseptic.*

Antipyic (*an-te-pi'-ik*) [ἀντί, against; πίον, pus]. Checking or restraining suppuration.

Antipyresis (*an-te-pi-re'-sis*) [ἀντί, against; πυρέσσειν, to be feverish]. The employment of antipyretics in fever.

Antipyretic (*an-te-pi-ret'-ik*) [ἀντί, against; πυρετός, fever]. 1. Cooling; lowering the temperature. 2. An agent reducing the temperature of fever; any antifebrile medicine, or febrifuge. Most such also reduce the normal bodily temperature slightly. They act either by preventing oxidation processes, or encouraging the radiation of heat.

Antipyrin (*an-te-pi'-rin*) [ἀντί, against; πυρετός, fever], $C_{20}H_{18}N_4O_2$. Phenazonum. Dimethyl-oxy-chinicin. An alkaloidal product of the destructive distillation of coal-tar. It may be produced by heating acetoacetic ester with methyl-phenyl hydrazin. It is a grayish or reddish-white crystalline powder, slightly bitter, soluble in water, alcohol, and chloroform, and crystallizes from ether in shining leaflets, melting at 113°. Adult dose gr. v–xv every hour for two or three hours. It

reduces the temperature three to five degrees in fevers, causes sweating, at times vomiting, but no serious result. Antipyrin is incompatible with nitrous compounds. It is a powerful antipyretic, a local anesthetic, and a general analgesic. It is efficient in hyperpyrexia from any cause, and in rheumatism. **Injectio antipyrin hypodermica**, gr. j in ℥ij. Dose ℥viij–xxx.

Antipyrotic (*an-te-pi-rot'-ik*) [*ἀντί*, against; *πύρωσις*, a burning]. 1. Efficacious against burns. 2. An agent curative of burns.

Antirabic (*an-te-rab'-ik*) [*ἀντί*, against; *rabies*, madness]. Effective against rabies; antagonistic to rabies.

Antirhachitic (*an-te-rak-it'-ik*) [*ἀντί*, against; *ῥάχις*, the spine]. Serviceable against rickets.

Antirheumatic (*an-te-ru-mat'-ik*) [*ἀντί*, against; *ῥευματικός*, of or pertaining to a flux]. Relieving or curing rheumatism.

Antirrhinum (*an-te-ri'-num*) [L.]. A genus of scrophulariaceous plants. *A. linaria*. Called also *Linaria vulgaris*, Toad-flax, Ramsted, Butter-and-Eggs; a herbaceous plant of Europe and North America; diuretic, cathartic, and irritant; used as a poultice and fomentation. Unof.

Antiscolic (*an-te-skol'-ik*) [*ἀντί*, against; *σκώληξ*, a worm]. Vermifuge. See *Anthelmintic*.

Antiscorbutic (*an-te-skor-bu'-tik*) [*ἀντί*, against; *scorbutus*, scurvy]. 1. Effective against scurvy. 2. A remedy for or preventive of scurvy; such are mainly vegetable acids.

Antisecosis (*an-te-sek-o'-sis*) [*ἀντί*, against; *σηκόειν*, to weigh, balance]. 1. A restoration to health, strength, etc. 2. Regulation of the food.

Antisepalous (*an-te-sep'-al-us*) [*ἀντί*, against; Fr., *sépale*]. In biology, placed opposite the sepals.

Antisepsin (*an-te-sep'-sin*) [*ἀντί*, against; *σήψις*, putrefaction], $C_6H_4BrNHC_2H_3O$. Asepsin; bromated antifebrin; soluble in alcohol and ether. Recommended for use as an antipyretic and analgesic but is dangerous as a febrifuge. It has antiseptic properties. Dose gr. j, four times daily.

Antisepsis (*an-te-sep'-sis*) [*ἀντί*, against; *σήψις*, putrefaction]. Exclusion of the germs that cause putrefaction; the totality of measures taken to prevent septic poisoning.

Antiseptic (*an-te-sep'-tic*) [*ἀντί*, against; *σήψις*, putrefaction]. 1. Having power to prevent or destroy putrefaction, or, what is the same thing, the bacteria upon which putrefaction depends. 2. A remedy or agent that prevents a septic process. The principal in use are corrosive sublimate, creolin, carbolic acid, iodoform, thymol, salicylic acid, boric acid, etc. **A. Gauze**, open cotton cloth charged with carbolic acid, resin, and paraffin. **A. Ligature**, catgut or other material rendered aseptic by soaking in antiseptic solutions. **The antiseptic treatment of wounds** looks to thorough asepsis and antisepsis as regards the wound, the instruments, the operator's hands, the dressings, etc. See, also, *Listerian Method*.

Antisepticism (*an-te-sep'-tis-izm*) [*ἀντί*, against; *σήψις*, putrefaction]. The theory or systematic employment of antiseptic methods.

Antisepticize (*an-te-sep'-tis-īz*) [*ἀντί*, against; *σήψις*, putrefaction]. To render antiseptic; to treat with antiseptics.

Antiseptin (*an-te-sep'-tin*) [*ἀντί*, against; *σήψις*, putrefaction]. Zinc boro-thymate iodid. Consists of 85 parts zinc sulphate, 2.5 parts each of zinc iodid and thymol, and ten parts boric acid. An antiseptic. Unof.

Antiseption (*an-te-sep'-shun*) [*ἀντί*, against; *σήψις*, putrefaction]. Same as *Antisepsis*.

Antiseptol (*an-te-sep'-tol*) [*ἀντί*, against; *σήψις*, putrefaction]. Cinchonin iodosulphate. An odorless and fairly effective substitute for iodoform.

Antisialagogue (*an-te-si-al'-a-gog*) [*ἀντί*, against; *σίαλον*, spittle; *ἀγωγός*, leading]. 1. Acting against ptyalism. 2. A remedy or a medicine that is effective against salivation.

Antisialic (*an-te-si-al'-ik*) [*ἀντί*, against; *σίαλον*, saliva]. 1. Checking the flow of saliva. 2. An agent that checks the secretion of saliva.

Antispadix (*an-te-spa'-diks*) [*ἀντί*, against; *σπάδιξ*, a palm branch]. In biology, a group of four tentacles on the right side of the male Nautilus, the *spadix*, an organ analogous to the hectocolylised arm, being on the left side.

Antispasis (*an-tis'-pas-is*) [*ἀντί*, against; *σπάειν*, to draw]. Revulsion; revulsive treatment.

Antispasmodic (*an-te-spas-mod'-ik*) [*ἀντί*, against; *σπασμός*, a spasm]. 1. Tending to relieve spasm. 2. An agent allaying or relieving convulsions or spasmodic pains, as the narcotics, the nitrites, etc.

Antispastic (*an-te-spas'-tik*) [*ἀντί*, against; *σπαστικός*, drawing]. 1. Revulsive; counter-irritant. 2. Antispasmodic. 3. A revulsive agent. 4. That which counteracts spasm. An antispasmodic.

Antisplenetic (*an-te-splen-et'-ik*) [*ἀντί*, against; *splen*, the spleen]. Remedial in diseases of the spleen.

Antistasis (*an-tis'-tas-is*) [*ἀντί*, against; *στάσις*, a standing]. Opposition; opposing effect.

Antistrumatic (*an-te-stru-mat'-ik*). Same as *Antistrumous*.

Antistrumous (*an-te-stru'-mus*) [*ἀντί*, against; *struma*, a scrofulous tumor]. Effective against struma or scrofula.

Antisudorific (*an-te-su-dor-if'-ik*) [*ἀντί*, against; *sudor*, sweat; *facere*, to make]. Checking the excretion of sweat.

Antisyphilitic (*an-te-sif-il-it'-ik*) [*ἀντί*, against; *Syphilus*, a Latin proper name]. 1. Effective against syphilis. 2. A remedy directed against, or used for the relief of, syphilis. Usually an alterative.

Antithenar (*an-tith'-en-ar*) [*ἀντί*, against; *θέναρ*, the hollow of the hand or foot]. 1. Opposite to the thenar. 2. A muscle that extends the thumb, or opposes it to the hand: an antithenar muscle. **A. Eminence**, the border of the palm of the hand from the base of the little finger to the wrist. **A. Muscles**, of the toe and of the thumb: the abductor pollicis pedis, and the flexor brevis pollicis manus; also, the first dorsal interosseous muscle. See *Muscles, Table of*.

Antithermic (*an-te-ther'-mik*) [*ἀντί*, against; *θέρμη*, heat]. Cooling; antipyretic.

Antithermin (*an-te-ther'-min*) [*ἀντί*, against; *θέρμη*, heat], $C_{11}H_{14}O_2N_2$. Phenylhydrazin-levulinic acid, a coal-tar derivative used in four to eight grain doses as an antipyretic, analgesic, and antiseptic. It is apt to give rise to gastralgia. Unof.

Antitoxic (*an-te-toks'-ik*) [*ἀντί*, against; *τοξικόν*, poison]. Antidotal; counteracting poisons.

Antitoxin (*an-te-toks'-in*) [*ἀντί*, against; *toxin*, a toxic ptomaïne; *τοξικόν*, poison]. A substance formed in the body of animals, either naturally or in consequence of inoculation with some pathogenic bacteria, that neutralizes the toxic products of these organisms.

Antitragic (*an-tit-raj'-ik*) [*ἀντί*, opposite to; *τράγος*, the tragus]. Pertaining to the antitragus.

Antitragicus (*an-tit-raj'-ik-us*) [*ἀντί*, opposite to; *τράγος*, the tragus]. Pertaining to the antitragus. **A. Muscle**, a mere rudiment in man; it arises from the antitragus, and extends to the cauda of the helix.

Antitragus (*an-tit'-rag-us*) [*ἀντί*, opposite to; *τράγος*, the tragus]. An eminence of the external ear opposite the tragus.

Antitrochanter (*an-te-tro-kan'-ter*) [*ἀντί*, opposite to; *τροχαντήρ*, the head of the hip bone]. An articulating surface on the ilium for the great trochanter.

Antitrope (*an'-te-trōp*) [*ἀντί*, against; *τρέπειν*, to turn]. Any organ set over against another to form a symmetric pair. Thus, the right eye is an antitrope to the left.

Antituberculotic (*an-te-tu-ber-ku-lot'-ik*) [*ἀντί*, against; *tuberculum*, a tubercle]. Good against tuberculosis.

Antitype (*an'-te-tīp*) [*ἀντί*, against, corresponding to; *τύπος*, a type]. In biology, same as *Antitrope*.

Antivaccinationist (*an-te-vak-sin-a'-shun-ist*) [*ἀντί*, against; *vaccinus*, of a cow.]. One who opposes vaccination.

Antivaccinist (*an-te-vak'-sin-ist*). Same as *Antivaccinationist*.

Antivenene (*an-te-ven'-ēn*) [*ἀντί*, against; *venenum*, poison]. A term given to the blood-serum of animals rendered immune against snake-poison, on account of its antidotal properties.

Antivenereal (*an-te-ven-e'-re-al*) [*ἀντί*, against; *venereus*, pertaining to Venus, or to sexual intercourse]. Antisyphilitic; anaphrodisiac.

Antivivisectionist (*an-te-viv-is-ek'-shun-ist*) [*ἀντί*, against; *vivus*, living; *sectio*, a cutting.] One who opposes the practice of vivisection.

Antizoötic (*an-te-zo-o'-tik*) [*ἀντί*, against; *ζῶον*, animal]. A substance poisonous or injurious to animals.

Antizymic, Antizymotic (*an-te-zi'-mik, an-te-zi-mot'-ik*) [*ἀντί*, against; *ζύμωσις*, fermentation]. 1. Preventing or checking fermentation. 2. An agent preventing the process of fermentation; an antiferment.

Antlia (*ant'-le-ah*) [*ἀνά*, up; *τλαεῖν*, to lift]. A syringe or pump. In biology, the flat spiral, suctorial tube or proboscis of lepidopterous insects. **A. lactea**, a pump for drawing milk from the breast. **A. mammaria**, same as *A. lactea*.

Antodontalgic (*an-to-don-tal'-jik*). See *Antiodontalgic*.

Antophthalmic (*ant-off-thal'-mik*) [*ἀντί*, against; *ὀφθαλμία*, ophthalmia]. Preventive or curative of ophthalmia.

Antorgastic (*ant-or-gas'-tik*). See *Antiorgastic*.

Antozenic (*ant-o-ze'-nik*) [*ἀντί*, against; *ὀζαινα*, a fetid nasal polypus]. Curative of ozena.

Antozone (*ant-o-zōn'*) [*ἀντί*, against; *ὀζειν*, to smell]. An imaginary allotropic modification of oxygen, now known to be only hydrogen peroxid.

Antozostomatic (*ant-o-zos-to-mat'-ik*) [*ἀντί*, against; *ὀζόστομος*, having a foul breath]. Corrective of a foul breath.

Antra (*an'-trah*). Plural of *Antrum*, *q. v.* **A. Gastralia**, four broad perradial niches or pouches in the gastric cavity of scyphomedusæ. **A. Rhopalaria**, niches formed on the umbrella margin of most Discomedusæ for the reception of sense-clubs or rhophalia.

Antracele (*an'-tras-ēl*) [*antrum*, a cavity; *κήλη*, a tumor]. Dropsy of the antrum; an accumulation of fluid in the maxillary sinus.

Antral (*an'-tral*) [*antrum*, a cave]. Relating to an antrum.

Antrectomy (*an-trek'-to-me*) [*ἄντρον*, antrum; *ἐκτομή*, excision]. Surgical removal of the walls of the antrum.

Antritis (*an-tri'-tis*) [*ἄντρον*, a cave; *itis*, inflammation]. Inflammation of any of the cavities of the body, especially the *A. highmorianum*.

Antrophore (*an'-tro-fōr*) [*ἄντρον*, a cavity; *φέρειν*, to bear]. A soluble, medicated bougie.

Antrorse (*an-trōrs'*) [*ante*, before; *versus*, turned]. In biology, directed upward or forward.

Antro-tympanic (*an-tro-tim-pan'-ik*) [*ἄντρον*, a cave; *τύμπανον*, a drum]. Relating to the cavity of the tympanum as well as to the tympanic antrum.

Antrum (*an'-trum*) [L.]. A physiological cavity or hollow place, especially in a bone. **A. ethmoidale**, the ethmoidal sinuses. **A. highmorianum**, Antrum of Highmore, a cavity in the superior maxillary bone. **A. highmori testis**. See *Mediastinum testis*. **A. of Malacarne**. See *Tarinus, Space of*. **A., Mastoidal**, the hollow space beneath the roof of the mastoid process. **A., Maxillary**. See *A. highmorianum*. **A. pyloricum willisii**, the cavity of the pylorus.

Antwerp Blue. Same as *Mineral Blue*. **A. Brown.** See *Conspectus of Pigments*, under *Pigment*.

Antyllus–Kuhnt's Operation. See *Operations, Table of*.

Antyllus's Operation. See *Operations, Table of*.

Anuresis (*an-u-re'-sis*) [*ἀν* priv.; *οὖρον*, urine]. Anuria.

Anuretic (*an-u-ret'-ik*) [*ἀν* priv.; *οὖρον*, urine]. Pertaining to or affected with anuria.

Anuria (*an-u'-re-ah*) [*ἀν* priv.; *urina*, urine]. Absence, deficiency, or retention of the urine.

Anuric (*an-u'-rik*) [*ἀν* priv.; *urina*, urine]. Pertaining to anuria.

Anurous (*an-u'-rus*) [*ἀν* priv.; *οὐρά*, a tail]. In biology, without a tail.

Anus (*a'-nus*) [*anus*, the fundament]. The extremity of the rectum; the lower opening of the alimentary canal. **A., Artificial**, an artificial opening, the natural for any reason being closed. **A., Fissure of**, rupture of the skin at the side, due to passage of hardened feces. **A., Fistula of**, a sinus, or fistulous ulcer opening from the rectum into the connective tissue about the rectum, or discharging externally. **A., Imperforate**, absence of the anus, the natural opening being closed by areolar tissue or a membranous septum. **A., Prolapse of**, protrusion of the rectum or its mucous membrane. **A., Pruritus of**, persistent itching of the anal orifice.

Anvil (*an'-vil*). See *Incus*.

Anxietas (*ang-zi'-et-as*). See *Anxiety*.

Anxiety (*ang-zi'-et-e*) [*anxius*, anxious]. Restlessness, agitation, and general malaise, or distress, often attended with precordial pain, and a noticeable appearance of apprehension or worry visible in the features.

Anydremia or **Anydræmia** (*an-id-re'-me-ah*) [*ἀν* priv.; *ὑδωρ*, water; *αἷμα*, blood]. A deficiency of water in the blood.

Anypnia (*an-ip'-ne-ah*) [*ἀν* priv.; *ὕπνος*, sleep]. Sleeplessness.

A. O. C. Anodic opening contraction.

Aochlesia (*ah-ok-le'-ze-ah*) [*ἀ* priv.; *ὀχλησις*, disturbance]. Rest; tranquillity; catalepsy.

Aorta (*a-ort'-ah*) [*ἀορτή*, aorta]. The great arterial vessel arising from the left ventricle and ending with its bifurcation into the two common iliacs at the fourth lumbar vertebra. *The arch*, that extending from the heart to the third thoracic vertebra, is divided into an *ascending*, a *transverse*, and a *descending* part. The *thoracic* portion extends to the diaphragm; the *abdominal*, to the bifurcation. The diseases of the aorta are *acute aortitis*, due to traumatism, thrombosis, etc.; and the *chronic* form, or *atheroma of the aorta; fatty degeneration; stenosis; aneurysm*. See *Artery*.

Aortal (*a-ort'-al*) [*ἀορτή*, the aorta]. Relating to the aorta.

Aortarctia (*a-ort-ark'-she-ah*) [*ἀορτή*, aorta; *arctare*, to constrict]. A constriction or stenosis of the aorta.

Aortectasia (*a-ort-ek-ta'-ze-ah*) [*ἀοστή*, aorta; *ἐκ*, out; *τάσις*, a stretching]. Aortic dilatation.

Aorteurysma (*a-ort-u-riz'-mah*) [*ἀορτή*, aorta; *εὐρυσμα*, a widening: *pl.*, *Aorteurysmata*]. Aortic aneurysm or dilatation.

Aortic (*a-ort'-ik*) [*ἀορτή*, the aorta]. Pertaining to the aorta. **A. Arch.** See *Aorta*. **A. Foramen.** See *A.*

Opening of Diaphragm. **A. Murmur.** See *Murmur.* **A. Opening of Diaphragm,** the lowest and most posterior of the three large apertures connected with this muscle. It is situated in the middle line, immediately in front of the bodies of the vertebra, and is behind the diaphragm, not in it. **A. Opening of Heart,** a small circular aperture in front and to the right side of the auriculo-ventricular opening, from which it is separated by one of the segments of the mitral valve. **A. Plexus,** the plexus of sympathetic nerves, situated on the front and sides of the aorta, between the origins of the superior and inferior mesenteric arteries. **A. Sinus,** a deep depression between each valve and the cylinder of the aorta.

Aortitis (*a-ort-i'-tis*) [ἀορτή, the aorta; ῖτις, inflammation]. Inflammation of the aorta.

Aortomalacia, or **Aortomalaxia** (*a-ort-o-mal-a'-se-ah,* or *-aks'-e-ah*) [ἀορτή, aorta; μαλακία, softening]. Softening of the aorta.

Aortostenosis (*a-ort-o-sten-o'-sis*) [ἀορτή, aorta; στενός, narrow]. Stenosis or narrowing of the aorta.

Aosmic (*a-os'-mik*) [ἀ priv.; ὀσμή, smell]. Having no odor.

Apagma (*ap-ag'-mah*) [ἀπό, from; ἀγνύμαι, to break: *pl.*, *Apagmata*]. 1. Separation, as of a fractured bone. 2. The part separated.

Apandria (*ap-an'-dre-ah*) [ἀπό, from; ἀνήρ, a man]. Morbid dislike of the male sex.

Apanthropia (*ap-an-thro'-pe-ah*). See *Apanthropy.*

Apanthropy (*ap-an'-thro-pe*) [ἀπό, from; ἄνθρωπος, man]. Aversion to society; morbid desire for solitude.

Aparthrosis (*ap-ar-thro'-sis*) [ἀπό, from; ἄρθρον, a joint]. 1. Dislocation; luxation of a joint. 2. In anatomy, diarthrosis.

Apastia (*ap-as'-te-ah*) [ἀπαστία, fasting]. Abstinence from food, as a symptom of mental disorder.

Apathetic (*ap-ath-et'-ik*) [ἀ priv.; πάθος, feeling]. Affected with apathy; listless; without emotion.

Apathy (*ap'-ath-e*) [ἀ priv.; πάθος, feeling]. Insensibility; want of passion or feeling.

Apatropin (*ap-at'-ro-pin*) [ἀπό, from; ἄτροπος, unchangeable], $C_{17}H_{21}NO_3$. A compound derivable from atropin by the action of nitric acid. It is said to produce peculiar convulsions.

Ape (*āp*) [ME., *ape*]. A man-like monkey. **A. fissures,** those fissures of the human brain that are also found in apes. See *Fissure.* **A.-hand,** wasting of the thumb-muscles, as seen in some cases of progressive muscular atrophy.

Apella (*ap-el'-lah*) [ἀ priv.; πέλλα, skin]. A circumcised person; one with a short prepuce.

Apellous (*ap-el'-us*) [ἀ priv.; πέλλα, skin]. Skinless; having no skin.

Apepsia (*ah-pep'-se-ah*) [ἀ priv; πέπτειν, to digest]. Cessation or absence of the digestive function. **A., Hysteric,** an hysterical condition with deficient nerve power, and impaired function of the stomach, and very possibly of the abdominal glands. Also called *Hysteric anorexia.* **A. nervosa.** See *Anorexia nervosa.*

Apeptic (*ah-pep'-tik*) [ἀ priv.; πέπτειν, to digest]. Affected with apepsia.

Aperient (*ap-e'-re-ent*) [*aperire*, to open]. 1. Laxative; deobstruent; mildly purgative. 2. A mild purgative; a laxative, or aperitive.

Aperinous (*ah-per'-in-us*) [ἀ priv.; πηρίν, the scrotum]. 1. Having no scrotum. 2. Castrated.

Aperispermic (*ah-per-is-per'-mik*) [ἀ priv.; περί, around; σπέρμα, seed]. See *Exalbuminous.*

Aperistalsis (*ah-per-is-tal'-sis*) [ἀ, without; περί, around; στάλσις, constriction]. Absence or cessation of the movements of the intestine, due to lack of stimulus to Auerbach's plexus.

Aperitive (*ap-er'-it-iv*) [*aperire*, to open]. Aperient.

Apertor (*ap-er'-tor*) [L., an opener or beginner]. In anatomy, anything that opens. **A. Oculi,** the levator palpebræ muscle.

Aperture (*ap'-er-chūr*) [*apertura*, an opening]. An opening. **A., Angular,** in the microscope, the angle formed between a luminous point placed in focus and the most divergent rays that are capable of passing through the entire system of an objective. **A. antri,** the aperture of the umbrella cavity in medusæ. **A., Numerical,** the capacity of an objective for admitting rays from the object and transmitting them to the image. A common measure is obtained as proposed by Abbé, by taking the product of the half angle into the refractive index of the medium employed. It is usually expressed n. a. $= n \sin u$., n the index of refraction and u the semi-angle of the aperture. **A. of Objective,** the capacity for receiving and transmitting rays.

Apetalous (*ah-pet'-al-us*) [ἀ priv.; πέταλον, a leaf]. In biology, without corolla or petals.

Apex (*a'-peks*) [*apex*, the extreme end of a thing]. The summit or top of anything; the point or extremity of a cone. **A. Beat,** the impulse of the heart felt in the fifth intercostal space about 3½ inches from the middle of the sternum. **A. Murmur,** a murmur heard over the apex of the heart. **Apices of the Lungs,** the upper extremities of the lungs behind the border of the first rib.

Aphacia (*ah-fa'-se-ah*). Same as *Aphakia.*

Aphacic (*ah-fa'-sik*) [ἀ priv.; φακός, the crystalline lens]. Relating to or affected with aphacia.

Aphæresis (*af-er'-es-is*). See *Apheresis.*

Aphagia (*ah-fa'-je-ah*) [ἀ priv.; φαγεῖν, to eat]. Inability to eat or to swallow.

Aphakia (*ah-fa'-ke-ah*) [ἀ priv.; φακός, a lentil, the crystalline lens]. The condition of an eye without the lens, whether the result of congenital defect, luxation, traumatism, or cataract operation.

Aphakic (*ah-fa'-kik*) [ἀ priv.; φακός, the lens]. Having no lens, as the eye after the removal of a cataract.

Aphalangiasis (*ah-fa-lan-je'-as-is*) [ἀ priv.; φάλαγξ, a line of battle; phalanx]. The loss or absence of fingers and toes, as in leprosy. Cf. *Ainhum.*

Apharyngeal (*ah-far-in'-je-al*) [ἀ priv.; φάρυγξ, throat]. In biology, without a pharynx.

Aphasia (*ah-fa'-ze-ah*) [ἀ priv.; φάσις, speech]. Partial or complete loss of the power of expression or of comprehension of the conventional signs of language, from no lesion of the peripheral organs or nerves, but from lesions of the cortical centers concerned. Aphasia may be either motor or sensory. **Motor** or **Ataxic Aphasia** consists in a loss of speech owing to inability to execute the various movements of the mouth necessary to speech, the muscles being not paralyzed but not coördinated, owing to disease of the cortical center. It is usually associated with *agraphia*, "aphasia of the hand," inability to write, and right-sided hemiplegia. Some aphasics can write, but are unable to articulate words or sentences; this variety is variously named **aphemia, alalia,** or **anarthria,** according as the impairment of speech is more or less marked. Charcot supposes the center for articulate language divided into four sub-centers, a visual center for words, an auditory center for words, a motor center of articulate language, and a motor center of written language. Lesions of one or more of these centers produce the characteristic forms of aphasia, all of which have clinical exemplifications. **Sensory Aphasia,** or **Amnesia** is the loss of memory for words, and may

exist alone or in association with the motor aphasia. Amnesia appears clinically in three distinct forms; 1. Simple loss of memory of words. 2. *Word-deafness*, or inability to understand spoken words (there is usually some paraphasia connected with this form). 3. *Word-blindness*, or inability to understand written or printed words. **Paraphasia**, a form of aphasia in which there is inability to connect ideas with the proper words to express the ideas. **Agrammatism**, a phenomenon of aphasia consisting in the inability to form words grammatically, or the suppression of certain words of a phrase. **Ataxaphasia**, inability to arrange words synthetically into sentences. **Bradyphasia**, abnormal slowness of speech, from pathological cause. **Tumultus sermonis**, a stuttering manner of reading, from pathological cause. **A., Conduction**, such as is due not to any central lesion, but to defect in some commissural connection between centers. **A., Gibberish**, aphasia in which the patient can utter many words, but uses them in such a way that they express no meaning

Aphasiac (*ah-fa'-ze-ak*) [ἀ priv.; φάσις, speech]. One who is aphasic.

Aphasic (*ah-fa'-zik*) [ἀ priv.; φάσις, speech]. Relating to, or affected with aphasia.

Aphelexia (*af-el-eks'-e-ah*). An incorrect form of the word *Aphelxia*, *q. v.*

Apheliotropism (*af-el-e-ot'-ro-pizm*) [ἀπό, from; ἥλιος, the sun; τρόπος, a turn]. In biology, turning away from the sunlight; negative heliotropism.

Aphelotic (*af-el-ot'-ik*) [ἀφέλκειν, to draw away]. Absent-minded; lost in reverie.

Aphelxia (*af-elks'-e-ah*) [ἀφέλκειν, to draw away]. Absence of mind; inattention to external impressions.

Aphemia (*ah-fe'-me-ah*) [ἀ priv.; φήμη, voice]. Motor aphasia; inability to articulate words or sentences, from focal and not from peripheral disease of the organs of speech (*Alalia*). This term is variously used; sometimes it is equivalent to *aphasia*; sometimes it means *loss of voice*, from local causes; sometimes hysterical or wilful refraining from speech. See *Aphasia*.

Aphemic (*ah-fem'-ik*) [ἀ priv.; φήμη, voice]. Relating to or affected with aphemia.

Aphephobia (*af-e-fo'-be-ah*) [ἀφή, touch; φόβος, fear]. Hyperesthetic dread of contact with other persons.

Apheresis, or **Aphæresis** (*af-er'-es-is*) [ἀπό, away; αἱρεῖν, to take]. Removal; amputation; abstraction, as of blood.

Apheter (*af'-et-er*) [ἀφετήρ, one who lets go or sends away]. A supposed impulse-carrying, or trigger-material, probably a catastate, which communicates to the inogen the nerve impulse that causes its destruction, and the consequent muscular contraction. In a larger sense, any trigger-material that takes part in any functional process may be called an apheter.

Aphidein (*af-id-e'-in*) [*aphis*, a plant louse]. A respiratory pigment obtained from the aphis.

Aphilanthropy (*ah-fil-an'-thro-pe*) [ἀ priv.; φιλεῖν, to love; ἄνθρωπος, man]. Absence of social feeling; a frequent sign of approaching melancholia.

Aphonia (*ah-fo'-ne-ah*) [ἀ priv.; φωνή, voice]. 1. Dumbness, due to some peripheral lesion. 2. Hysterical, or paralytic absence of the power of speech. 3. Voicelessness.

Aphonic (*ah-fon'-ik*) [ἀ priv.; φωνή, voice]. Speechless; dumb; voiceless.

Aphoresis (*ah-for-e'-sis*) [ἀ priv.; φόρησις, bearing (by error for *Apheresis*)]. 1. Separation or ablation of a part, either by excision or amputation. 2. Lack of the power of endurance, as of pain.

Aphoria (*ah-fo'-re-ah*) [ἀ priv.; φέρειν, to bear]. Sterility; unfruitfulness.

Aphrasia (*ah-fra'-ze-ah*) [ἀ priv.; φράζειν, to utter]. Absence of the power to utter connected phrases.

Aphrodisia (*af-ro-diz'-e-ah*) [ἀφροδίσια, venery]. Sexual desire, especially when morbid, or immoderate; sexual congress.

Aphrodisiac (*af-ro-diz'-e-ak*) [ἀφροδίσια, venery]. 1. Stimulating the sexual appetite; erotic. 2. An agent stimulating the sexual passion.

Aphtha (*af'-thah*) [ἀφθα, an eruption]. An eruption; an ulcer.

Aphthæ (*af'-the*) [ἀφθα, an eruption]. Also called *Aphthous stomatitis*. Small white ulcers, spots or vesicles of the mouth, chiefly occurring in children under three years of age, and generally associated with some febrile affection. It must not be confounded with thrush, in which disease the spots are smaller and are due to the presence of the parasitic fungus characteristic of that disease. **A., Bednar's**, two symmetrically placed ulcers seen on the hard palate of certain cachectic infants near the velum, one on either side of the mesial line. The prognosis is exceedingly grave. **A., Cachectic**, aphthæ appearing beneath the tongue, and associated with grave constitutional symptoms; Riga's disease.

Aphthaphyte (*af'-thah-fit*). See *Aphthophyte*.

Aphthenxia (*af-thengks'-e-ah*) [ἀ priv.; φθέγξις, utterance]. A form of aphasia with impaired expression of articulate sounds.

Aphthoid (*af'-thoid*) [ἄφθα, an eruption]. Like or resembling aphthæ.

Aphthongia (*af-thong'-ge-ah*) [ἀ priv.; φθόγγος, a sound]. A peculiar form of aphasia due to spasm of the muscles supplied by the hypoglossal nerve.

Aphthophyte (*af'-tho-fit*) [ἄφθα, aphtha; φυτόν, plant]. The *Oïdium albicans*, or *Saccharomyces albicans*, a yeast-fungus often seen on the mucous membrane of the mouths of infants; regarded by some as the cause of true aphthæ. See *Sprue*.

Aphthous (*af'-thus*) [ἄφθα, an eruption]. Pertaining to or affected with aphthæ or thrush.

Aphyllon (*ah-fil'-on*) [ἀ priv.; φύλλον, a leaf.]. A genus of orobanchaceous plants. **A. uniflorum**, a plant, the naked broom-rape or cancer-root of North America. It is astringent, and has been employed as a cure for cancer. Unof.

Aphyllous (*ah-fil'-us*) [ἀ priv.; φύλλον, a leaf]. In biology, naturally leafless.

Apical (*ā'-pik-al*) [*apex*, the top]. Pertaining to the apex. **A. Cell**, in biology, the cell at the apex of every branch, leaf or other organ, and from the division of which all succeeding cells are formed.

Apices (*a'-pis-ēz*) [L.]. Plural of *Apex*. Summits.

Apiculus (*ap-ik'-u-lus*) [*apic*, a point]. In biology, a short abrupt point formed by the mid-rib of a leaf projecting beyond the blade.

Apinoid (*ap'-in-oid*) [ἀ priv.; πίνος, dirt; εἶδος, form]. Clean; not foul. **A. Cancer**, schirrhus; so called from its cleanly section.

Apiol (*ap'-e-ol*) [*apium*, parsley; *oleum*, oil], $C_{12}H_{14}O_4$. A poisonous principle occurring in parsley seeds; it crystallizes in long white needles, with a slight parsley odor; melts at 30° C. (86° F.), and boils at 294° C (572° F.). It is used in dysmenorrhea and in genito-spinal atony. It acts upon the reflex and vaso-motor centers. It is also called *parsley-camphor*. Dose ♏iij-x. In doses of ♏xxx it is narcotic. Unof.

Apiolin (*ap'-e-o-lin*) [*apium*, parsley; *oleum*, oil]. A pseudo-apiic alcohol, the active principle of *Apium petroselinum*, and a reliable emmenagogue. Dose ♏ iij in capsule, night and morning.

Apios (*ap'-e-os*) [ἄπιος, a pear]. A genus of plants. **A. tuberosa**, a twining papilionaceous plant of North America, bearing tubers which when cooked are edible. It is called *ground-nut, wild-bean, Indian potato*, etc. Said to be alterative. Unof.

Apis (*a'-pis*) [L., a bee]. A genus of hymenopterous insects. **A. mellifica**, the honey-bee; in homeopathy the poison of the honey-bee's sting, or a preparation thereof.

Apium (*a'-pe-um*) [L.]. A genus of umbelliferous plants. **A. graveolens.** See *Celery*. **A. petroselinum**, is the common garden parsley; aperient, diuretic, somewhat antiperiodic; useful in dysmenorrhea. Dose of the fld. ext. (of the root) gtt. xv–ʒ j.

Apjohn's Formula. A formula for determining the dew-point by means of the elastic tension.

Aplacental (*ah-plas-en'-tal*) [ἀ priv.; *placenta*, a cake]. Destitute of placenta.

Aplanatic (*ah-plan-at'-ik*) [ἀ priv.; πλανάειν, to wander]. Not wandering; rectilinear. **A. Lens**, a lens corrected for all aberration of light and color. A rectilinear lens. See *Objective*.

Aplanogamete (*ah-plan-o-gam'-ēt-e*) [ἀ priv.; πλάνος, roaming; γαμετή, a wife]. In biology, the non-motile conjugating cell in certain green algæ, *i. e. Conjugatæ*. See *Planogamate*.

Aplanospore (*ah-plan'-o-spōr*). Same as *Aplanogamete*.

Aplasia (*ah-pla'-se-ah*) [ἀ priv.; πλάσσειν, to form]. A type of incomplete structure by reason of the non-formation of a necessary cell-group during the developmental stage. Called also *Hypoplasia*. **A., Laminar.** Synonym of *Facial Hemiatrophy*.

Aplastic (*ah-plas'-tik*) [ἀ priv.; πλάσσειν, to form]. 1. Structureless, formless. 2. Not characterized by plasticity: preventive of plastic process within the organism. **A. Lymph**, one of the products of inflammation or disease. A non-fibrinous material incapable of coagulation or organization.

Apleuria (*ah-plu'-re-ah*) [ἀ priv.; πλευρά, a rib]. Congenital absence of the ribs.

Aplotomia (*ap-lo-tom'-e-ah*), or **Aplotomy** (*ap-lot'-o-me*). See *Haplotomy*.

Aplysiopurpurin (*ap-liz-e-o-per'-pu-rin*) [ἀπλυσία, filthiness; πορφύρα, a purple dye]. A reddish pigment derived from the Aplysiidæ.

Apnea (*ap-ne'-ah*) [ἀ priv.; πνέειν, to breathe]. Formerly used as synonymous with asphyxia, meaning breathlessness; difficult respiration; partial or complete suspension of breathing. It is employed now only in the physiological sense, to denote the condition in which the blood is too highly oxygenized. The presence of an over-abundance of oxygen prevents stimulation of the medullary respiratory center, and respiration is arrested in consequence. **A. infantum.** Synonym of *Laryngismus stridulus*. **A. neonatorum**, apnea of the newborn child, caused by difficult labor, pressure upon the cord, etc.

Apneumatic (*ap-nu-mat'-ik*) [ἀ priv.; πνεῦμα, breath]. 1. Collapsed; uninflated, not inflatable: said of parts of the lung. 2. Carried on with the exclusion of air, as an apneumatic operation or process.

Apneumatosis (*ap-nu-mat-o'-sis*) [ἀ priv.; πνευμάτωσις, inflation]. Collapse of the air cells of some parts of the lung caused by blocking of the bronchial tubules, and resulting in a condition of non-inflation whereby the lung tissue is reduced to a condition similar to that of atelectasis, or congenital apneumatosis.

Apneumia (*ap-nu'-me-ah*) [ἀ priv.; πνεύμων, lung]. Congenital absence of the lungs

Apneumonervia (*ap-nu-mo-ner'-ve-ah*) [ἀ priv.; πνεύμων, lung; *nervus*, a nerve]. Deficient nerve stimulus in the lung.

Apneumoneuria (*ap-nu-mo-nu'-re-ah*). Same as *Apneumonervia*.

Apneustia (*ap-nūs'-te-ah*) [ἀ priv.; πνέειν, to breathe]. Apnea; breathlessness.

Apnœa (*ap-ne'-ah*). See *Apnea*.

Apo- (*ap'-o*) [ἀπό, from]. A prefix denoting *from, away, separation*.

Apoaconitin (*ap-o-ak-on'-it-in*) [ἀπό, from; *aconitum*, aconite], $C_{33}H_{41}NO_{11}$. An alkaloid prepared from aconitin by dehydration.

Apoatropin (*ap-o-at'-ro-pin*) [ἀπό, from; ἄτροπος, unchangeable], $C_{17}H_{21}NO_2$. An alkaloid obtained by the action of HNO_3 on atropin.

Apoblast (*ap'-o-blast*) [ἀπό, away; βλαστός, a germ]. In biology the unimpregnated ovum; an outcast cell. See *Outcast Cell*.

Apoblema (*ap-o-ble'-mah*) [ἀπόβλημα; ἀπό, away; βάλλειν, to throw]. The product of abortion.

Apobole (*ap-ob'-o-le*) [ἀποβολή, a throwing away]. Expulsion; abortion.

Apocarpous (*ap-o-kar'-pus*) [ἀπό, from; καρπός, fruit]. In biology, composed of separate or easily separable carpels.

Apocarteresis (*ap-o-kar-ter-e'-sis*) [ἀποκαρτέρησις, lack of fortitude]. Suicide by starvation.

Apocatastasis (*ap-o-kat-as'-tas-is*) [ἀποκατάστασις, restoration]. The subsidence of an abscess or tumor.

Apocatharsis (*ap-o-kath-ar'-sis*) [ἀπό, away; κάθαρσις, purgation]. Purgation; abevacuation.

Apocathartic (*ap-o-kath-ar'-tik*). Same as *Cathartic*.

Apocenosis (*ap-o-sen'-o-sis*) [ἀποκενόειν, to drain]. An increased flow or evacuation of blood or other humors.

Apocenotic (*ap-o-sen-ot'-ik*) [ἀποκενόειν, to drain]. Producing apocenosis.

Apochromatic (*ap-o-kro-mat'-ik*) [ἀπό, away; χρῶμα, color]. Without color. **A Lens**, a lens for microscopic and optical purposes, with high correction of spherical and chromatic aberrations, and better "definition." **A. Objective.** See *Objective*.

Apocodein (*ap-o-ko'-de-in*) [ἀπό, from; κώδεια, the head], $C_{18}H_{19}NO_2$. An alkaloid prepared from codein by dehydration. It is emetic and expectorant, with other qualities much like those of codein, and is recommended in chronic bronchitis. Unof.

Apocope (*ap-ok'-o-pe*) [ἀπό, from; κοπή, a cutting]. Amputation or abscission; an operation or a wound that results in loss of substance.

Apocrustic (*ap-o-krus'-tik*) [ἀποκρούειν, to beat off]. Repellent; defensive; astringent.

Apocynin (*ap-os'-in-in*) [*apocynon*, dogbane]. The precipitate from a tincture of *Apocynum cannabinum*; tonic, alterative, and evacuant. Dose gr. ¼–j. Unof.

Apocynum (*ap-os'-in-um*) [*apocynon*, dogbane]. Canadian Hemp. The root of *A. cannabinum*. Properties due to an alkaloid, *apocynin*. A good expectorant. In full doses an emetic and cathartic. Valuable in dropsy. Dose gr. v–xx; of the alkaloid, gr. ¼–½. **A. Ext., Fld.** Dose ♏v–xx. **A., Tinct.** Dose ♏v–xl. Should not be confounded with *Cannabis indica*. Unof. Another American species, **A. androsæmifolium**, has similar properties. Unof.

Apodemialgia (*ap-o-de-me-al'-je-ah*) [ἀποδημία, journey; ἄλγειν, to grieve]. A morbid dislike of home-life with a desire for wandering.

Apodia (*ah-po'-de-ah*) [ἀ priv.; πούς, a foot]. Absence of feet.

Apodous (*ap'-o-dus*) [ἀ priv.; πούς, a foot]. Footless; characterized by apodia.

Apogamy (*ap-og'-am-e*) [ἀπό, away from; γάμος, marriage]. In biology, 1. Asexual reproduction where

the opposite usually occurs. 2. The total and normal absence of sexual reproductive power.

Apogeotropism (*ap-o-je-ot'-ro-pizm*) [ἀπόγαιος, from the earth; τροπικός, turning]. In biology, tending to turn upward or away from the ground.

Apohyal (*ap-o-hi'-al*) [ἀπό, from; ὑοειδής, shaped like the letter upsilon]. Relating to the anterior (styloid) cornua of the hyoid bone.

Apokenosis (*ap-o-ken'-o-sis*). See *Apocenosis*.

Apokenotic (*ap-o-ken-ot'-ik*). See *Apocenotic*.

Apolar (*ah-po'-lar*) [ἀ priv.; πόλος, the end of an axis]. Having no pole. **A. Cells,** nerve cells without processes.

Apolepsis (*ap-o-lep'-sis*) [ἀπόληψις, a leaving off]. Suppression or retention of a secretion or excretion; cessation of a function.

Apolexis (*ap-o-leks'-is*) [ἀπόληξις, a declining]. The decline of life; the stage of catabolism or decay.

Apollinaris Water (*ap-ol-in-a'-ris*). A German alkaline mineral water, highly charged with carbonic acid, largely used for gout, rheumatism, etc., but possessing little medicinal value. See *Mineral Water*.

Apomorphia, or **Apomorphin** (*ap-o-mor'-fe-ah,* or *-mor'-fin*) [ἀπό, from; *Morpheus,* the god of sleep], $C_{17}H_{17}O_2N$, = *morphia* — H_2O. An artificial alkaloid, derived from morphin. The *hydrochlorate* is the salt used, and is a grayish crystalline powder. It is a systemic emetic acting directly upon the vomiting center, and is the quickest, most certain and least irritating of all emetics. Unof. Dose gr. $\frac{1}{20}$–$\frac{1}{10}$ hypodermatically, or gr. $\frac{1}{10}$–$\frac{1}{6}$ by the mouth. An expectorant in small doses. **A. injectio hypodermica** (B. P.). Dose as an *expectorant* by the mouth, gr. ss; as an *emetic,* by the mouth, gr. ½; hypodermatically, gr. ¼. **Syrupus apomorph. hydrochloratis.** Dose ℥ ss–j.

Apomyelin (*ap-o-mi'-el-in*) [ἀπό, from; μυελός, marrow]. A peculiar phosphatized principle reported to exist in the brain tissue and containing no glycerol.

Apomyttosis (*ap-o-mit-o'-sis*) [ἀπομύσσειν, to blow the nose]. Any disease marked by stertor; a sneezing.

Apone (*ap-ōn'*) [Fr.: ἀ priv.; πόνος, pain]. An anodyne; especially the concentrated tincture of capsicum; used externally for the relief of pain, and internally in small doses, diluted, for hemorrhoids, dyspepsia, and mania. Dose gtt. iij–x. Unof.

Aponeurography (*ap-o-nu-rog'-ra-fe*) [ἀπονεύρωσις, aponeurosis; γράφη, a writing]. A description of the fasciæ, or aponeuroses.

Aponeurology (*ap-o-nu-rol'-o-je*) [ἀπονεύρωσις, aponeurosis; λόγος, an account]. The science of the fasciæ or aponeuroses.

Aponeurosis (*ap-on-u-ro'-sis*) [ἀπό, from; νεῦρον, a tendon]. A fibrinous membranous expansion of a tendon giving attachment to muscles or serving to enclose and bind down muscles. Remarkable for their size or importance are the *infra-spinous,* enclosing the infraspinous muscle; that *of the arm, of the deltoid muscle, of the external oblique* or *abdominal, of the forearm, of the leg, of the transversalis, of the head,* etc., etc. **A. of Occipito-frontalis,** the tendinous aponeurosis that separates the two slips of the occipito-frontalis muscle. **A. of Soft Palate,** a thin but firm fibrous layer, attached above to the hard palate, and becoming thinner toward the free margin of the velum. **A. of Subscapular,** a thin membrane attached to the entire circumference of the subscapular fossa, and affording attachment by its inner surface to some of the fibers of the subscapularis muscle. **A., Supraspinous,** a thick and dense membranous layer that completes the osseo-fibrous case in which the supraspinatus muscle is contained, affording attachment by its inner surface to some of the fibers of the muscle. **A., Vertebral,** a thin aponeurotic lamina extending along the whole length of the back part of the thoracic region, serving to bind down the erector spinæ, and separating it from those muscles that connect the spine to the upper extremity.

Aponeurositis (*ap-on-u-ro-si'-tis*) [ἀπονεύρωφις, an aponeurosis; ιτις, inflammation]. Inflammation of an aponeurosis.

Aponeurotic (*ap-on-u-rot'-ik*) [ἀπονεύρωσις, aponeurosis]. Pertaining to or of the nature of an aponeurosis.

Aponeurotome (*ap-on-u'-ro-tōm*) [ἀπονεύρωσις, aponeurosis; τόμη, a cut]. An instrument for dividing fasciæ.

Aponeurotomy (*ap-on-u-rot'-o-me*) [ἀπονεύρωσις, aponeurosis; τόμη, a cut]. The incision, dissection, or anatomy of the fasciæ; fasciotomy.

Aponipsis (*ap-o-nip'-sis*) [ἀπονίψις, a washing]. A washing; especially an internal washing, anciently performed by copious draughts of milk whey.

Apopetalous (*ap-o-pet'-al-us*) [ἀπό, away from; πέταλον, leaf]. In biology, same as *Polypetalous*.

Apophlegmatic (*ap-o-fleg-mat'-ik*) [ἀπό, away; φλέγμα, phlegm]. Promoting the expulsion of mucus from the air passages.

Apophyllous (*ap-o-fil'-us*) [ἀπό, from; φύλλον, a leaf]. In biology, having distinct calyx or perianth leaves.

Apophysar (*ap-off'-is-ar*). See *Apophysary*.

Apophysary (*ap-off'-is-a-re*) [ἀποφύειν, to put forth]. Pertaining to or of the nature of an apophysis.

Apophyseal, Apophysial (*ap-o-fiz'-e-al*). Same as *Apophysary*.

Apophysis (*ap-off'-is-is*) [ἀπό, from; φύσις, growth]. In biology, a process, outgrowth, or swelling of some part or organ, as of a bone, the internal process of the mandible of a crustacean, or some part of a plant, *e. g.,* the seta of certain mosses. **A. lenticularis,** the orbicular process of the temporal bone. **A. raviana,** the processus gracilis of the malleus.

Apoplectic (*ap-o-plek'-tik*) [ἀποπλεξία, apoplexy]. Pertaining to or affected with apoplexy. **A. Equivalents,** a name given to the premonitory symptoms of apoplexy, indicating that the brain is subject to alterations in the blood pressure, a condition that may lead to serious consequences if the arterial walls are diseased.

Apoplectiform (*ap-o-plek'-tif-orm*) [ἀποπλεξία, apoplexy; *forma,* form]. Sudden, like apoplexy.

Apoplectigenous (*ap-o-plek-tij'-en-us*) [ἀποπλεξία, apoplexy; γεννάειν, to produce]. Producing apoplexy or cerebral hemorrhage.

Apoplectoid (*ap-o-plek'-toid*). Same as *Apoplectiform*.

Apoplexia (*ap-o-pleks'-e-ah*) [L.]. Apoplexy. **A. splenitis.** Synonym of *Anthrax*.

Apoplexy (*ap'-o-pleks-e*) [ἀποπληξία, a striking down]. The symptom-complex resulting from cerebral hemorrhage, effusion, or from the plugging of a cerebral vessel. Modern writers mostly describe the post-mortem appearances by other terms, as cerebral hemorrhage, effusion, thrombosis, etc. The chief symptom is sudden loss of motion, sensation and consciousness, the patient falling and lying as if dead. There is frequently a conjugate deviation of the eyes and a rotation of the head *away* from the paralyzed side, and *toward* the side on which the cerebral lesion exists. Death may result instantaneously, or shortly, or the patient may recover consciousness and then be found to be suffering from paralysis of one-half of the body (*Hemiplegia, q. v.*). The bursting of a vessel in the lungs, liver, etc., is sometimes called apoplexy of the lungs, liver, etc. **A., Capillary,** from rupture and effusion of capillaries. **A., Ingravescent,** a term applied to a form of apoplexy in which there is a slowly pro-

gressive loss of consciousness due to a gradual leakage of blood from a ruptured vessel. **A., Pulmonary,** escape of blood into the pulmonary parenchyma, with laceration of its substance. **A., Simple,** the name given to those cases of death from coma in which no cerebral lesion is found. **A., Spinal.** See *Hematomyelia.* **A., Splenic.** Synonym of *Anthrax.*

Apopsychia (*ap-op-sik'-e-ah*) [ἀπό, away; ψυχή, spirit]. Syncope; fainting; a faint.

Apoptosis (*ap-op-to'-sis*) [ἀπό, away; πτῶσις, a falling]. A falling off, as of a crust, or of the hair; loosening of a scab or crust.

Aporetin (*ap-o-re'-tin*) [ἀπό, from; ῥητίνη, a resin]. A resinous substance found in rhubarb.

Aporrhinosis (*ap-or-in-o'-sis*) [ἀπό, from; ῥίς, nose]. A discharge from the nostril

Aporrhipsis (*ap-or-ip'-sis*) [ἀπό, away from; ῥίπτειν, to throw]. The throwing off of the clothes or the bedclothes; a symptom seen in some cases of insanity and in delirium.

Aposcythisis (*ap-o-sith'-is-is*) [ἀποσκυθίξειν, to scalp in the Scythian manner]. The surgical or traumatic removal of the scalp.

Aposematic (*ap-o-sem'-at-ik*) [ἀπό, away from; σῆμα, a sign]. Applied to such colors as are used by animals as signals or warnings of some dangerous or unpleasant quality, in repelling enemies.

Aposepalous (*ap-o-sep'-al-us*). See *Polysepalous.*

Aposepsis (*ap-o-sep'-sis*) [ἀπόσηψις, putrefaction; see *Sepsis*]. Complete putrefaction.

Aposia (*ah-po'-se-ah*) [ἀ priv.; πόσις, a drinking]. Absence of thirst; adipsia.

Apositia (*ap-o-sit'-e-ah*) [ἀπό, from; σῖτος, food]. Aversion to or loathing of food.

Apositic (*ap-o-sit'-ik*) [ἀπό, from; σῖτος, food]. Impairing the appetite; affected with apositia.

Aposorbic Acid (*ap-o-sor'-bik*). See *Acid.*

Aposphacelisis (*ap-o-sfas-el'-is-is*) [ἀποσφακέλισις, a dying of gangrene]. Mortification; gangrene due to constriction.

Apospory (*ap-os'-po-re*) [ἀπό, away from; σπόρος, seed]. In biology, reproduction without the intervention of spores in cases where sporogenesis ordinarily occurs.

Apostasis (*ap-os'-tas-is*) [ἀπόστασις, a standing away from]. **1.** An abscess. **2.** The end or the crisis of an attack of disease; termination by crisis. **3.** An exfoliation. In biology, the separation of organs by unusual elongation of internodes.

Apostatic (*ap-os-tat'-ik*) [ἀπόστασις, a standing away from]. Relating to or of the nature of an apostasis.

Apostaxis (*ap-o-staks'-is*) [ἀπό, from; στάξις, a dropping]. A discharge of fluid by drops; epistaxis.

Apostem (*ap'-o-stem*), or **Apostema** (*ap-o-ste'-mah*) [ἀπόστημα, an abscess]. An abscess.

Apostematic (*ap-os tem-at'-ik*) [ἀπόστημα, an abscess]. Relating to or of the nature of an abscess.

Apostemation (*ap-os-tem-a'-shun*) [*apostematio*, abscess formation]. The formation of an apostem or abscess.

Apostematoid (*ap-os-tem'-at-oid*) [ἀπόστημα, an abscess; εἶδος, form]. Resembling an apostem or abscess.

Aposthia (*ah-pos'-the-ah*) [ἀ priv; πόσθη, penis, prepuce]. Absence of the penis or of the prepuce.

Apostoli's Method. The use of strong electrolytic or chemical galvano-caustic currents in the treatment of diseases of the female generative organs, especially uterine fibroids.

Apostrophe (*ap-os'-tro-fe*) [ἀπό, away; στρέφειν, to turn]. The arrangement of chlorophyll bodies along the side walls of the cells as a result of excess or deficiency of light. Cf. *Epistrophe* and *Dystrophe.*

Apostume (*ap'-os-tūm*) [ἀπόστημα, an abscess]. An abscess.

Aposyringosis (*ap-o-sir-in-go'-sis*) [ἀπό, from; σύριγξ, pipe]. The formation of or change into a fistula.

Apotelesm (*ap-ot'-el-ezm*) [ἀποτέλεσμα, result.] The termination of a disease.

Apothecaries' Weight. A system of weights and measures used in compounding medicines. The Troy pound of 5760 grains is the standard. It is subdivided into 12 ounces. The ounce is subdivided into eight drachms, the drachm into three scruples, and the scruple into 20 grains. For fluid measure the quart of 32 fluid ounces is subdivided into pints, the pint into 16 fluid ounces, the ounce into eight fluid drachms, and the fluid drachm into 60 minims. The following abbreviations are used:—

♏, *minim.*	ʒ, *uncia*, an ounce (480 grains).
gtt., *gutta*, a drop.	℔, *libra*, a pound.
℈, *scrupulus*, a scruple (20 grains)	O, *octarius*, a pint.
ʒ, *drachma*, a drachm (60 grains).	gr., *granum*, a grain.
	ss., *semissis*, one-half.

See *Weights and Measures.*

Apothecary (*ap-oth'-e-ka-re*) [ἀποθήκη, a storehouse]. A druggist. One who prepares and sells drugs, fills prescriptions, etc. In Great Britain the apothecary is also a physician, filling his own prescriptions. In the United States it frequently happens that an authorized practitioner is also an apothecary, but without the degree of M. D. the practice of medicine is illegal.

Apothecium (*ap-o-the'-se-um*) [ἀποθήκη, a storehouse]. In biology, the saucer-shaped fruiting organ, or ascocarp, of lichens and certain ascomycetous fungi.

Apothem, or **Apothema** (*ap'-o-them* or *ap-oth'-em-ah*) [ἀπό, from; θέμα, a deposit]. A brown powder formed by the open-air evaporation of a vegetable infusion or decoction.

Apothesis (*ap-oth'-es-is*) [ἀπόθεσις, a putting back]. The reduction of a fracture or luxation.

Apotheter (*ap-oth'-et-er*). A navel-string repositor devised by Braun, consisting of a staff with a sling attached in which the prolapsed funis is placed and carried up into the uterine cavity.

Apothymia (*ap-o-thi'-me-ah*) [ἀποθύμιος, distasteful, disagreeable]. An aversion.

Apotrepsis (*ap-o-trep'-sis*) [ἀπότρεψις, a turning away]. The resolution of an abscess.

Apozem, or **Apozema** (*ap'-o-zem*, or *ap-os'-em-ah*) [ἀπό, away; ξέειν, to boil]. A decoction, especially one to which medicines are admixed.

Apparatus (*ap-ar-a'-tus*) [*apparatus*, prepared]. The instruments used in any science, art, or surgical operation. Anatomically the word is used to designate collectively the organs effecting any specified work or action. **A. ligamentosus colli,** the *occipito-axoid ligament,* a broad band at the front surface of the spinal canal that covers the odontoid process.

Apparent (*ap-a'-rent*) [*apparere*, to appear]. Seeming; appearing to be like. **A. Death.** See *Death.*

Apparition (*ap-ar-ish'-un*) [*apparitio*, an appearance]. A visual delusion or hallucination.

Apparitor (*ap-ar'-it-or*) [L., a helper]. A small coiled tube worn at the ear to assist the hearing.

Appendage (*ap-en'-dāj*) [*appendere*, to weigh; hang]. That which is attached to an organ as a part of it. See *Appendix.* **A., Auricular,** the projecting part of the cardiac auricle. **A., Epiploic.** See *Appendix.* **A., Ovarian,** the parovarium.

Appendicectomy (*ap-en-dis-ek'-to-me*) [*appendix*; ἐκτομή, excision]. Excision of the appendix vermiformis.

Appendicitis (*ap-en-dis-i'-tis*) [*appendere*, to hang upon or to; ιτις, inflammation]. Inflammation of the appendix vermiformis; ecphyaditis.

Appendicular (*ap-en-dik'-u-lar*) [*appendicula*, a small appendix]. Pertaining to the appendix vermiformis. **A. Gland,** a biramose gland attached to the spermatheca of queen bees.

Appendix (*ap-en'-diks*) [*appendere*, to hang upon or to: *pl.*, *Appendices*]. What is accessory to or dependent upon another. An appendage. **A. auricularis,** the auricular appendage, a process of the auricles of the heart. **A. cæci vermiformis,** a worm-shaped process of the cecum. **A. cerebri,** the pituitary body. **A., Ensiform.** See *Xiphoid.* **A. epiploicæ,** pouch-like, fatty projections of the peritoneum of the large intestine. **A., Xiphoid.** See *Xiphoid.*

Apperception (*ap-er-sep'-shun*) [*appercipere*, to receive]. The conscious reception or perception of a sensory impression; the power of receiving and appreciating sensory impressions.

Appert's Process. The preservation ("canning") of meat, fruits, and vegetables by exclusion of air and germs; effected by hermetically sealing the substances in tin cans after heating the contents to 110° or more.

Appetence (*ap'-e-tens*) [*appetentia*, appetite]. An appetite, or desire; the attraction of a living tissue for those materials that are appropriate for its nutrition.

Appetency (*ap'-e-ten-se*). 1. See *Appetence.* 2. In biology, the doctrine propounded by Lamarck, in which it is maintained that new organs can be produced in animals by the simple assertion of the will called into action by new wants, and that the organs thus acquired can be transmitted by generation.

Appetite (*ap'-e-tit*) [*appetere*, to desire]. The desire for food; also any natural desire; lust. **A., Perverted,** that for unnatural and undigestible things, frequent in disease and pregnancy. *Anorexia*, loss of appetite; *Bulimia*, insatiable appetite; *Hunger*, the strong desire and need of food.

Appetizer (*ap'-e-ti-zer*) [*appetere*, to desire]. A medicine, or dose, taken to stimulate the appetite.

Applanate (*ap'-lan-āt*) [*ad*, to; *planus*, flat]. In biology, horizontally flattened.

Applanatio (*ap-lan-a'-she-o*) [L.]. A flattening. **A. corneæ,** flattening of the entire surface of the cornea from disease.

Applanation (*ap-lan-a'-shun*) [*applanatio*, a flattening]. A flattening, as of the cornea.

Apple (*ap'-l*) [AS., *æppel*, an apple]. The fruit of the tree, *Pyrus malus*. **A., Adam's.** See *Pomum adami.* **A.-brandy,** an alcoholic spirit distilled from cider; cider-brandy. **A. Extract.** See *Extractum ferri pomatum.* **A.-eye,** a synonym of *Exophthalmos.* **A. of the Eye,** the pupil; also, the eyeball. **A.-jack.** See *A.-brandy.* **A.-oil,** amyl valerianate; prepared from isoamyl-isovaleric ester.

Application (*ap-lik-a'-shun*) [*applicatio*, an application]. The act of applying anything, as a plaster, leech, bandage, lotion, pad, or compress; the thing so applied. **A. Colors.** See *Pigments, Colors, and Dyestuffs.*

Applicative (*ap'-lik-a-tiv*). See *Conduplicate.*

Applicator (*ap'-lik-a-tor*) [L.]. An instrument used in making applications; especially, one used in uterine or urethral surgery.

Applier (*ap-li'-er*) [*applicare*, to apply]. A dental instrument for making applications to teeth.

Appolito's Operation. See *Operations, Table of.*

Appolito's Suture. See *Suture.*

Apposition (*ap-o-zish'-un*) [*apponere*, to apply to]. The act of fitting together; the state of being fitted together. **A. Theory,** a theory concerning the growth of the cell-wall, as held by Schmitz, Strasburger, etc., *viz.*, that stratified and other cell-walls of plants grow in thickness by the deposition of new particles upon the inner face of the cell. Growth in surface is the result of a simple stretching of the wall by the pressure of the contents.

Approach (*ap-rōch'*) [ME., *approche*]. A drawing near. **A. Grafting,** to inarch.

Appropriation (*ap-ro-pre-a'-shun*) [*appropriatio*, a setting apart]. Assimilation of nutriment.

Approximal (*ap-roks'-im-al*) [*ad*, to; *proximus*, next]. That which is next to; contiguous. In dentistry, pertaining to contiguous surfaces, as approximal fillings.

Appun's Apparatus. A device for determining the overtones of a vowel by means of reeds.

Apraxia (*ah-praks'-e-ah*) [ἀ priv.; πράσσειν, to do]. Soul-blindness; mind-blindness; object-blindness; an affection in which the memory for the uses of things is lost, as well as the understanding for the signs by which the things are expressed.

Aprication (*ap-re-ka'-shun*) [*apricatio*, a basking in the sun]. The sun-bath; sun-stroke.

Aproctia (*ah-prok-te'-ah*) [ἀ priv.; πρωκτός, anus]. Imperforation of the anus.

Aproctosis (*ah-prok-tō'-sis*) [ἀ priv.; πρωκτός, anus]. See *Aproctia.*

Aproctous (*ah-prok'-tus*) [ἀ priv.; πρωκτός, the anus]. Having imperforation of the anus.

Apron (*a'-prun*) [ME., *apern*]. 1. In surgery, a protection or covering for the body in surgical operations. 2. The omentum. **A., Hottentot,** artificially elongated labia minora; *velamen vulvæ.* **A. of Succor,** a canvas appliance borne by two men, and used for the transportation of wounded persons.

Aprosexia (*ap-ro-seks'-e-ah*) [ἀ priv.; προσέχειν, to give heed]. A mental disturbance consisting in inability to fix the attention upon a subject. An inability to think clearly and to readily comprehend what is read or heard, sometimes observed in the course of chronic catarrh of the nose or of the nose and pharynx.

Aprosopa (*ap-ros'-o-pah*). See *Aprosopia*

Aprosopia (*ap-ro-so'-pe-ah*) [ἀ priv.; πρόσωπον, the face]. A form of fetal monstrosity with partial or complete absence of face.

Aprosopous (*ap-ros'-o-pus*) [ἀ priv.; πρόσωπον, the face]. Exhibiting aprosopia.

Aprosopus (*ap-ros'-o-pus*) [ἀ priv.; πρόσωπον, the face]. An aprosopous fetus.

Apselaphesia (*ap-sel-af-e'-ze-ah*) [ἀ priv.; ψηλάφησις, touch]. Paralysis of the tactile sense.

Apsithyria, or Apsithurea (*ap-sith-i'-re-ah*, or *-u'-re-ah*) [ἀ priv.; ψιθυρίζειν, to whisper]. A term suggested by Solis-Cohen for hysterical aphonia, in which the patient not only loses the voice, but is unable even to whisper. It is generally accompanied by double paralysis of the vocal cords, but there is no paralysis of the tongue, lips, or expiratory muscles. Charcot especially advocates hypnotism in the treatment of the condition.

Apsychia (*ap-sik'-e-ah*) [ἀ priv.; ψυχή, spirit]. Unconsciousness; a faint or swoon.

Apta viro (*ap'-tah vi'-ro*) [L.: *pl.*, *Aptæ viris*]. A young girl who by mechanical means has been rendered available for prostitution.

Apterium (*ap-te'-re-um*) [ἀ priv.; πτερόν, a feather]. In biology, a normally naked tract on a bird's skin.

Apterous (*ap'-ter-us*) [ἀ priv.; πτερόν, a wing, a feather]. In biology, destitute of wings or membranous expansions.

Aptitude (*ap'-te-tūd*) [*aptitudo*, fitness]. Fitness, tendency. The natural proneness of an organism toward certain functions or pathological conditions.

Aptyalia (*ap-ti-a'-le-ah*) [ἀ priv.; πτύαλον, saliva]. See *Aptyalism.*

Aptyalism (*ap-ti'-al-izm*) [ἀ priv.; πτυαλίξειν, to spit]. Deficiency or absence of saliva.

Aptystia (*ap-tis'-te-ah*) [ἀ priv.; πτύειν, to spit]. See *Aptyalism.*

Apulosis (*ap-u-lo'-sis*) [ἀπούλωσις; οὐλειν, to cicatrize]. Cicatrization, or a cicatrix.

Apulotic (*ap-u-lot'-ik*) [ἀπουλωτικός, healing]. Promoting cicatrization, or apulosis.

Apus (*a'-pus*) [ἀ priv., and πούς, foot]. 1. A monstrosity consisting in absence of the lower limbs, or feet. 2. An apodous fetus.

Apyonin (*ah-pi'-on-in*) [ἀ priv.; πῦον, pus]. A remedy introduced as a substitute for pyoktanin in ophthalmic practice. It is said to be identical with yellow pyoktanin. Unof.

Apyretic (*ah-pi-ret'-ik*) [ἀ priv.; πυρετός, fever]. Without fever or pyrexia.

Apyrexia (*ah-pi-reks'-e-ah*) [ἀ priv.; πυρεκτός, feverish]. The non-febrile stage of an intermittent fever; intermission or absence of fever.

Apyrexial (*ah-pi-reks'-e-al*) [ἀπύρεκτος, without fever]. Pertaining to, of the nature of, or characterized by, apyrexia.

Apyrexy (*ah'-pi-reks-e*). See *Apyrexia.*

Aqua (*a'-kwah*) [L.: *gen.* and *pl.*, *Aquæ*, *a'-kwe*]. Water. An oxid of hydrogen having the composition H_2O. It is a solid below 32°, a liquid between 32° and 212°, vaporizes at 212° at the sea level (bar. 760 mm.), giving off vapor of tension equal to that of the air. It covers four-fifths of the surface of the earth, but is never pure in nature, containing from a trace of soluble matter, in rain water, to 26 per cent. of soluble mineral salts, in the Dead Sea. Water is an essential constituent of all animal and vegetable tissues. In the human body it forms two per cent. of the enamel of the teeth, 77 per cent. of the ligaments, 78 per cent. of the blood, and 93 per cent. of the urine. Externally, water has a stimulating effect upon the skin, either by direct or reactionary means. Cold water when continued too long may lower the general temperature of the body so as to produce serious depression of the circulation and muscular power. When properly used it is a valuable antipyretic. Hot water and vapor increase circulation and produce diaphoresis. Its too long-continued use debilitates. Internally, water is a diuretic. It is the most useful of all the solvents in pharmacy. The following are the official preparations and forms: **A. bulliens,** boiling water. **A. communis,** common water. **A. destillata,** distilled water. **A. fervens,** hot water. **A. fluvialis,** river-water. **A. fontana,** well- or spring-water. **A. marina,** sea-water. **A. pluvialis,** rain-water. See also *Mineral Water.* Aqua in pharmacy also designates various medicated waters: as **A. ammoniæ,** water of ammonia; **A. anethi,** dill water; **A. chlori,** chlorin water; **A. rosæ,** rose water. **A. fortis.** See *Acid, Nitric.* **A. regia.** See *A. Nitrohydrochloric.* **A. tofana,** a celebrated secret poison, prepared in the 17th century at Palermo by a woman named Toffana. It was probably arsenical. **A. Vitæ,** *Brandy* or *Spirit, q. v.* In anatomy, **A. labyrinthi,** the clear fluid existing in the labyrinth of the ear.

Aquæcapsulitis (*a-kwe-kap-su-li'-tis*) [*aqua*, water; *capsula*, a capsule; ιτις, inflammation]. Serous iritis.

Aquæductus (*a-kwe-duk'-tus*). See *Aqueduct.*

Aquamalarial Fever (*a-kwa-mal-a'-re-al*). Synonym of *Malarial Fever.* See *Fever.*

Aquapuncture (*ak-wah-pungk'-chūr*) [*aqua*, water; *punctura*, a puncture]. Counter-irritation by means of a very fine jet of water impinging upon the skin; useful in neuralgia and other nerve disorders.

Aquatic (*a-kwat'-ik*) [*aqua*, water]. Pertaining to water. **A. Cancer.** Synonym of *Cancrum oris.*

Aqueduct, or **Aqueductus** (*ak'-we-dukt*, or *ak-we-duk'-tus*) [*aqua*, water; *ductus*, a leading]. Used of ducts or canals in various parts of the body. **A. cerebri,** the infundibulum. **A. cochleæ,** aqueduct of the cochlea. **A. of Cotunnius,** the aqueduct of the vestibule, extending from the utricle to the posterior wall of the pyramid in the brain. **A. Fallopii,** the canal of the portio dura in the petrous portion of the temporal bone. **A. Sylvii,** the aqueduct of Sylvius from the third to the fourth ventricle, the *iter a tertio ad quartum ventriculum.* **A. vestibuli,** aqueduct of the vestibule of the ear.

Aqueous (*a'-kwe-us*) [*aqua*, water]. Referring to water; watery. **A. Chamber of the Eye,** the space between the cornea and the lens; the iris divides it into an anterior and a posterior chamber. **A. Extract,** a solid preparation of a drug made by evaporation of its aqueous solution. **A. Humor,** the fluid filling the anterior chamber of the eye.

Aquiducous (*a-kwe-du'-kus*) [*aquiducus; aqua*, water; *ducere*, to lead]. Hydragogue.

Aquilaria (*a-kwil-a'-re-ah*) [L.]. A genus of trees. **A. agallocha,** a tree of S. E. Asia producing the true aloes-wood, or eagle-wood, valued in perfumery, but no longer employed in regular pharmacy or practice. **A. ovata** and **A. secundaria** also furnish varieties of aloes-wood. Unof.

Aquilegia (*ak-wil-e'-je-ah*) [L.]. A genus of ranunculaceous plants of many species. **A. vulgaris** has active medicinal qualities; but none of the species are now much used in regular practice.

Aquiparous (*a-kwip'-ar-us*) [*aqua*, water; *parere*, to bring forth]. Producing water, or affording watery secretions; said of glands, as the lachrymal and parotid.

Aquocapsulitis (*a-kwo-kap-su-li'-tis*) [*aqua*, water; *capsula*, a small box]. Serous iritis, *q. v.*

Aquosity (*a-kwos'-it-e*) [*aquositas*, watery]. The state or condition of being watery.

Aquula (*ak-wu'-lah*) [L.]. A small aqueous collection. **A. cotunnii,** the perilymph, *q. v.*

Arabic (*ar'-ab-ik*) [Αραβικός, Arabic]. Of or pertaining to Arabia. **A. Acid.** See *Arabin.* **A. Gum.** See *Acacia.*

Arabin (*ar'-ab-in*) [Αραβικός, Arabic], $(C_6H_{10}O_5)_2 + H_2O$. Arabic Acid. A transparent, glassy, amorphous mass, an exudate from many plants, making a clear solution in water. It is the principal constituent of gum arabic. See *Carbohydrates, Table of.*

Arabinose (*ar'-ab-in-ōs*) ['Αραβικός, Arabic], $C_5H_{10}O_5$. One of the glucoses. Made from gum arabic on boiling with dilute H_2SO_4. It crystallizes in shining prisms that melt at 100°; is slightly soluble in cold water, has a sweet taste, and reduces Fehling's solution, but is not fermented by yeast. See *Carbohydrates, Table of.*

Arabis (*ar'-ab-is*) ['Αραβικός, Arabic]. A genus of cruciferous herbs; rock cresses, or wall cresses. **A. chinensis,** of Asia, and **A. sagittata** and **A. thaliana,** of Europe, are stimulant and stomachic. The seeds of some species yield an oil much like that of rape-seed. Unof.

Arabite (*ar'-ab-it*) ['Αραβικός, Arabic], $C_5H_{12}O_5$. A substance formed from arabinose by the action of sodium amalgam. It crystallizes from hot alcohol in shining needles, melting at 102°. It has a sweet taste, but does not reduce Fehling's solution.

Arabonic Acid (*ar-ab-on'-ik*). See *Acid.*

Arachis (*ar'-ak-is*) [ἄραχος, a leguminous plant]. A genus of leguminous plants. **A. hypogæa.** See *Ground Nut.*

Arachnidium (*ar-ak-nid'-e-um*) [ἀράχνη, a spider]. In biology, the secreting spinning apparatus of spiders,

consisting of five kinds of glands, over one thousand in all, producing a secretion insoluble in water and with a nitrogenous basis, forming the fine, silky threads of the web.

Arachnitis (*ar-ak-ni'-tis*) [*ἀράχνη*, a spider's web; *ιτις*, inflammation]. Inflammation of the arachnoid membrane of the brain.

Arachnoid (*ar-ak'-noid*) [*ἀράχνη*, a spider's web; *εἶδος*, form]. Resembling a web. **A. Cavity**, the space between the arachnoid membrane and the dura mater. **A. Membrane**, the delicate serous membrane of the brain and cord between the dura and pia mater. **Sub-arachnoid fluid.** See *Cerebro-spinal Fluid.*

Arachnoidal (*ar-ak-noid'-al*) [*ἀράχνη*, a spider's web; *εἶδος*, form]. Pertaining to the arachnoid.

Arachnoiditis (*ar-ak-noid-i'-tis*). Same as *Arachnitis.*

Arachno-pia (*ar-ak'-no-pi'-ah*) [*ἀράχνη*, a spider's web; *pia, fem. of pius*]. The arachnoid and the pia considered together.

Arachnorrhinitis (*ar-ak-nor-in-i'-tis*) [*ἀράχνη*, spider; *ῥὶς*, nose; *ιτις*, inflammation]. A disease of the nasal passages supposed to be due to the presence of a spider.

Arachnotitis (*ar-ak-no-ti'-tis*) [*ἀράχνη*, spider; *οὖς*, ear; *ιτις*, inflammation]. Inflammation said to be caused by a spider in the auditory canal.

Arack (*ar'-ak*) [*Ind.*]. A spirituous liquor distilled from rice, dates, palm-sap, or cocoanut juice, used in Asia, etc.

Aræometer (*ar-e-om'-et-er*). See *Areometer.*

Aræotic (*ar-e-ot'-ik*). See *Areotic.*

Aralia (*ar-a'-le-ah*) [L.]. A genus of plants, order Araliaceæ, embracing several species, having aromatic, diaphoretic, and resolvent properties. Ginseng, wild sarsaparilla, petty morrel, and other plants esteemed in popular medicine belong here; few have active qualities of high value in any disease. Unof.

Aran-Duchenne's Disease. See *Diseases, Table of.*

Araneæ Tela (*ar-a'-ne-e tel'-lah*). See *Cobweb.*

Araneous (*ar-a'-ne-us*) [*aranea*, a spider's web]. Full of webs; resembling a cobweb. **A. Membrane**, the arachnoid.

Arantius, Bodies of. See *Corpora.* **A., Canal of.** See *Canal.* **A., Duct of.** See *Duct.* **A., Nodules of.** See *Arantius, Bodies of.* **A., Valves of.** See *Valvulæ arantii.* **A., Ventricle of,** a small cul-de-sac in the medulla oblongata.

Arar (*a'-rar*) [Barbary]. The tree *Callitris quadrivalvis* of N. W. Africa. It produces sandarac.

Araroba (*ar-ar-o'-bah*) [Brazil]. *Goa Powder.* An oxidation product of resin found deposited in the wood of the trunk of the *Andira araroba* of Brazil. Its active principle is *Chrysarobin* or *Chrysophanic acid, q. v.* It is largely used in skin affections.

Arasa (*ar-a'-sah*) [S. Am.]. The root of a plant native to Brazil and Uruguay. The active principle of the drug is found in the tuberosities of the root, especially in the bark, which is quite thick. In taste a decoction of the drug resembles that of cascarilla. It is an excellent remedy in metrorrhagia, acting where hydrastis is ineffectual. No unpleasant secondary effects have been noted. Unof.

Arbor (*ar'-bor*) [L.]. A name for the arbor vitæ of the cerebellum. **A. Vitæ**, a term applied to the arborescent appearance of a section of the cerebellum, and also to a similar appearance of the folds of the interior of the cervix uteri. See *Thuja.*

Arborization (*ar-bor-iz-a'-shun*) [*arbor*, a tree]. A form of nerve termination in which the nerve fibers are brought into contact with the muscle fiber by means of an expansion.

Arbuscula (*ar-bus'-ku-lah*) [L.]. A small shrub having the appearance of a diminutive tree.

Arbutin (*ar'-bu-tin*) [*arbutus*, the wild strawberry tree], $C_{12}H_{16}O_7$. A bitter glucosid obtained from *Uva ursi*, or bearberry. It is neutral, crystalline, and resolvable into glucose and hydroquinon. Arbutin is an efficient diuretic. Dose gr. xv–xxx. See *Uva ursi.*

Arbutus (*ar-bu'-tus*) [L.]. A genus of ericaceous shrubs and trees. **A. menziesii**, the madroño of California, has an astringent bark, useful in diarrheas. Unof. **A. unedo**, the European arbute, is astringent and narcotic. **A., Trailing.** See *Epigæa.*

Arc (*ark*) [*arcus*, a bow]. In craniometry, a measurement taken on the outside of the skull, following its curves. **A., Binauricular**, a measurement from the center of one auditory meatus to the other, directly upward across the top of the head. **A., Bregmato-lambdoid**, a measurement along the sagittal suture. **A., Naso-bregmatic**, from the root of the nose to the bregma. **A., Naso-occipital**, measurement from the root of the nose to the lowest occipital protuberance.

Arcanum (*ar-ka'-num*) [*arcanum*, a secret]. A medicine whose composition is kept secret.

Arcate (*ar'-kāt*) [*arcatus*, bow-shaped]. Bow-shaped; curved; arcuate.

Arch (*arch*) [*arcus*, a bow]. A term applied to the curved shape of several various parts of the body. **A. of Aorta.** See *Aorta.* **A., Branchial**, the cartilaginous arches that support the gills (branchiæ) of fishes. In the human fetus they are also present. See *Cleft.* **A. of Colon.** See *Colon.* **A. of Corti**, the arch that the pillars of the organ of Corti make over the basilar membrane of the cochlea. **A., Crural.** See *Poupart's Ligament.* **A. of Fallopius**, a name for the arch formed by Poupart's ligament. **A. Femoral**, same as *A. Crural.* **A., Palmar**, the arch formed by the radial artery in crossing the bones of the metacarpus. **A., Plantar**, the arch made by the external plantar artery. **A., Post-oral**, arches in the fetus, five in number, that develop into the lower jaw and throat. See *A., Branchial.* **A. of Pubes**, that part of the pelvis formed by the convergence of the rami of the ischia and pubes on each side. **A., Supra-orbital**, the curved and prominent margin of the frontal bone beneath the superciliary ridge, that forms the upper boundary of the orbit. **A. of a Vertebra**, the part of a vertebra formed of two pedicles and two laminæ and enclosing the spinal foramen. **A., Zygomatic**, the arch formed by the malar and temporal bones.

Archæocyte (*ar'-ke-o-sīt*) [*ἀρχαῖος*, ancient; *κύτος*, a hollow (a cell)]. In biology, one of the irregular ameboid cells—mesameboids—imbedded in a jelly-like matrix and occurring between the two primitive epithelia of the body, in the Porifera.

Archæostoma, Archæostome (*ar-ke-os'-to-mah, ar'-ke-o-stōm*). See *Archistome.*

Archæus (*ar-ke'-us*) [*ἀρχαῖος*, ancient]. In spagiric medicine, the invisible counterpart of the visible body; solar heat as a source of life.

Archamœba (*ark-am-e'-bah*) [*ἀρχή*, primitive; *ἀμοιβή*, change]. Haeckel's hypothetical progenitor of all amebæ and of all higher forms of life.

Archamphiaster, or **Archiamphiaster** (*ark-am-fe-as'-ter*, or *ar-ke-am-fe-as'-ter*) [*ἀρχή*, first; *αμφι*, around; *ἀστήρ*, star]. In biology, those amphiasters concerned in the production of the polar globules.

Archangelica (*ark-an-jel'-ik-ah*) [*ἀρχαγγελικός*, archangel]. A genus of umbelliferous plants; *A. abropurpurea, officinalis*, and *sativa* afford *Angelica Root, q.v.*

Archebiology (*ar-ke-bi-ol'-o-je*) [*ἀρχή*, beginning; *βίος*, life; *λόγος*, discourse]. The study of the simplest or most primitive forms or beginnings of life.

Archebiosis (*ar-ke-bi-o'-sis*) [*ἀρχή*, the beginning; *βίωσις*, life]. The theoretical origin of living organ-

isms from non-living matter. See *Generation, Spontaneous; Biogenesis*, and *Abiogenesis*.

Archecptoma (*ark-ek-to'-mah*) [ἀρχός, anus; ἐκ, out; πτῶμα, a falling]. Prolapse of the rectum.

Archegenesis (*ark-e-jen'-es-is*). The same as *Archebiosis*.

Archegonium (*ark-e-go'-ne-um*) [ἀρχή, first; γόνος, race]. The female reproductive organ of the higher cryptogams.

Archegony (*ar-keg'-o-ne*) [ἀρχέγονος, first of a race]. The doctrine of spontaneous generation.

Archenteric (*ark-en-ter'-ik*) [ἀρχή, first; ἔντερον, intestine]. Relating to the archenteron.

Archenteron (*ark-en'-ter-on*) [ἀρχή, a beginning; ἔντερον, intestine]. In biology, the embryonic alimentary cavity. The entodermal sac of the gastrula; archigaster; cœlenteron.

Archepyon (*ar-ke-pi'-on*) [ἀρχή, a beginning; πύον, pus]. Pus that has become caseated, or so thick that it does not flow. A term proposed by Roswell Park.

Archespore, Archesporium (*ar'-ke-spōr, -e-um*) [ἀρχή, a beginning; σπορά, a seed]. In biology, the cells that give rise to the lining of the anther-cell and to the mother-cells of the pollen.

Archesthetism (*ark-es'-thet-izm*) [ἀρχή, first; αἰσθάνεσθαι, to perceive]. The doctrine that animal movements are primitively determined by sensibility or consciousness.

Archet (*ar-chet'* or *ar-sha'*) [Fr.]. A bow formerly used to operate the drill in lithotrity.

Archetype (*ar'-ke-tīp*) [ἀρχή, a beginning; τύπος, a type]. In comparative anatomy, an ideal type or form with which the individuals or classes may be compared. A standard type.

Archhydra (*ark-hi'-drah*) [ἀρχή, first; ὕδωρ, water]. A primitive polyp.

Archiater (*ar-ke-a'-ter*) [ἀρχιατρός, a chief physician]. The head physician in a court, as in that of Russia.

Archiblast (*ar'-ke-blast*) [ἀρχή, first; βλαστός, germ]. In embryology, the granular areola surrounding the germinal vesicle. It is composed of three layers, the outer, or *epiblast*, from which the skin and its adnexa, the nervous system, and the terminal portions of the alimentary canal are formed; the middle, or *mesoblast*, from which the epithelium of the genito-urinary organs and the smooth and striated muscle-tissue is derived; and the inner, or *hypoblast*, for the development of the epithelium of the respiratory tract and of the alimentary canal.

Archiblastic (*ar-ke-blas'-tik*) [ἀρχή, first; βλαστός, germ]. Derived or supposed to be derived from the archiblast. The parenchymatous elements are regarded as archiblastic.

Archiblastoma (*ar-ke-blas-to'-mah*) [ἀρχή, first; βλαστός, germ; ὄμα, a tumor: *pl.*, *Archiblastomata*]. Any tumor composed of archiblastic or parenchymatous elements, such as myoma, neuroma, papilloma, epithelioma, adenoma, carcinoma, etc.

Archiblastula (*ar-ke-blas'-tu-lah*) [ἀρχή, first; βλαστός, a germ or bud]. In embryology, a ciliated, vesicular morula, resulting from complete and regular yelk-division and by invagination forming the archigastrula.

Archicercal (*ar-ke-ser'-kal*) [ἀρχή, chief; κέρος, tail]. In biology, having the tail primitive, without fin-folds.

Archicharp (*ar'-ke-karp*) [ἀρχή, first; καρπός, fruit]. See *Ascogonium*.

Archicytula (*ar-ke-sit'-u-lah*) [ἀρχή, a beginning; κύτος, a cell]. A fertilized egg cell in which the nucleus is discernible.

Archigaster (*ar-ke-gas'-ter*) [ἀρχή, first; γαστήρ, belly]. The primitive, perfectly simple intestine; archenteron.

Archigastrula (*ar-ke-gas'-tru-lah*) [ἀρχή, beginning; γαστήρ, belly]. The gastrula as it is observed in the most primitive types of animal development; called also bell-gastrula from its shape.

Archigenesis (*ar-ke-jen'-es-is*). See *Archebiosis*.

Archil (*ar'-kil*) [ME., *orchell*]. A coloring matter somewhat like litmus, chiefly obtained from the lichen, *Roccella tinctoria*; used for staining animal tissues. See *Conspectus of Pigments*, under *Pigment*.

Archimonerula (*ar-ke-mon-er'-u-lah*) [ἀρχή, first; μονήρης, single, solitary]. In embryology, a special name given by Haeckel to the monerula stage of an egg undergoing primitive and total cleavage.

Archimorula (*ar-ke-mor'-u-lah*) [ἀρχή, first; μόρον, a mulberry]. In embryology, the solid mass of cleavage cells, or mulberry mass, arising from the segmentation of an archicytula, and preceding the archiblastula and archigastrula.

Archinephric (*ar-ke-nef'-rik*) [ἀρχή, first; νεφρός, the kidney]. Pertaining to the archinephron.

Archinephron (*ar-ke-nef'-ron*) [ἀρχή, beginning; νεφρός, the kidney]. The primitive or embryonic stage of the kidney or renal apparatus.

Archipin (*ar-kip'-in*). See *Chibou*.

Archipterygium (*ar-kip-ter-ij'-e-um*) [ἀρχή, first; πτερόν, a wing]. In biology, a ground form, persisting in a few cases only, and representing the first and lowest stage of the skeleton of the anterior extremity of vertebrates.

Archistome (*ar'-kis-tōm*) [ἀρχή, first; στόμα, mouth]. The gastrula mouth or opening to the archenteron; blastoporus.

Architis (*ar-ki'-tis*) [ἀρχός, anus]. Proctitis; inflammation of the anus.

Architroch (*ar'-ke-trok*) [ἀρχή, first; τροχός, a disk]. The ciliated band about the mouth of a planula.

Archocele (*ar'-ko-sēl*, or *ar-ko-se'-le*) [ἀρχός, anus; κήλη, hernia]. Rectal hernia.

Archocystocolposyrinx, or **Archocolpocystosyrinx** (*ar-ko-sis-to-kol-po-sir'-ingks*, or *ar-ko-kol-po-sis-to-sir'-ingks*) [ἀρχός, anus; κύστις, bladder; κόλπος, vagina; σῦριγξ, fistula]. Recto-vesico-vaginal fistula.

Archometrum (*ar-ko-met'-rum*) [ἀρχός, anus; μέτρον, measure]. A device for ascertaining the caliber of the anus, or for dilating its sphincters.

Archoptoma (*ar-kop-to'-mah*) [ἀρχός, anus; πτῶμα, a fall]. A prolapse of the rectum.

Archoptotic (*ar-kop-tot'-ik*) [ἀρχός, anus; πτῶμα, a fall]. Relating to archoptoma or archoptosis.

Archoptosis (*ar-kop-to'-sis*) [ἀρχός, anus; πτῶσις, a falling]. Rectal prolapse.

Archorrhagia (*ar-ko-ra'-je-ah*) [ἀρχός, anus; ῥήγνυσθαι, to break out]. Rectal hemorrhage.

Archorrhagic (*ar-ko-raj'-ik*) [ἀρχός, anus; ῥήγνυσθαι, to break out]. Relating to rectal hemorrhage.

Archorrhea (*ar-ko-re'-ah*) [ἀρχός, anus; ῥεῖν, to flow]. A discharge of blood or of any pathologic fluid from the anus.

Archos (*ar'-kos*) [ἀρχός, the anus]. The anus.

Archostegnoma (*ar-ko-steg-no'-mah*) [ἀρχός, anus; στεγνόειν, to consolidate]. Archostenosis; a rectal stricture.

Archostegnosis (*ar-ko-steg-no'-sis*) [ἀρχός, anus; στέγνωσις, a stopping]. A rectal stricture.

Archostegnotic (*ar-ko-steg-not'-ik*) [ἀρχός, anus; στέγνωσις, a stopping]. Relating to a rectal stricture.

Archostenosis (*ar-ko-sten-o'-sis*) [ἀρχός, anus; στενός, narrow]. Stricture of the rectum.

Archostenotic (*ar-ko-sten-ot'-ik*) [ἀρχός, anus; στενός, narrow]. Relating to rectal stricture.

Archosyrinx (*ar-ko-sir'-ingks*) [ἀρχός, anus; σῦριγξ, a pipe]. 1. A syringe for the rectum. 2. Fistula in ano.

Arciform (*ar'-se-form*) [*arcus*, bow, arch; *forma*, form]. Bow-shaped; especially used to designate certain sets of fibers in the oblongata.

Arctation (*ark-ta'-shun*) [*arctatio; arctare*, to draw close together]. 1. Contraction or lessening of an opening or of the lumen of a canal. 2. Infibulation.

Arctium (*ark'-she-um*) [L.]. Burdock. See *Lappa*.

Arctostaphylos (*ark-to-staf'-il-os*). See *Uva ursi* and *Manzanita*.

Arcual (*ar'-ku-al*) [*arcualis*, arched]. Arched; bent or curved.

Arcuate (*ar'-ku-āt*) [*arcuatio*, a bowing]. Arched; curved; bow-shaped.

Arcuation (*ar-ku-a'-shun*) [*arcuatio*, a bowing]. Curvature of any bone, as of the tibia or sternum; curvature of the vertebral column.

Arcuatus (*ar-ku-a'-tus*) [*arcus*, a bow]. Bent or curved in an arched form. **A. morbus**, a former name for jaundice.

Arculus (*ar'-ku-lus*) [dim. of *arcus*, a bow]. An arching support for bed-clothes.

Arcus (*ar'-kus*) [*arcus*, a bow]. A bow or arch. **A. dentalis**, the dental arch. **A. senilis**, in the old, the ring of fatty degeneration of the corneal tissue about the periphery. **A. zygomaticus**, the zygomatic arch.

Ardent (*ar'-dent*) [*ardere, ardens*, to burn]. Burning; fiery; glowing; accompanied by a sensation of burning. **A. Fever**, heat fever or thermal fever. **A. Spirits**, alcoholic liquors. See *Spiritus*.

Ardor (*ar'-dor*) [*ardor*, heat]. Violent heat, burning; applied to fevers and the sexual passion. **A. urinæ**, burning pain in the inflamed urethra during micturition.

Area (*a'-re-ah*) [*area*, an open space]. Any space with boundaries. **A. celsi.** See *Alopecia areata*. **A's., Cohnheim's**, certain clear-cut areas seen in a transverse section of muscle-fiber. **A., Crural**, a space at the base of the brain included between the pons and chiasm. **A. germinativa**, or *embryonic spot*, the oval germinating spot of the embryo. **A. opaca**, the opaque circle about the *A. pellucida*. **A. pellucida**, the light central portion of the *A. germinativa*. **A., Postpontile**, the ventral aspect of the mesencephalon. **A. vasculosa**, the vascularization of the *A. opaca*.

Areca Nut (*ar'-ek-ah*). See *Betel*.

Arecane, Arekane (*ar'-ek-ān*) [Malay]. An oily and volatile basic substance obtainable from areca nut; said to be a purgative and sialagogue, and to slow the pulse. Unof.

Arecin (*ar'-es-in*) [Sp., *areca*], $C_{23}H_{26}N_2O$. A brown-red coloring matter, obtained from areca nuts; areca red.

Arecolin (*ar-e'-ko-lin*) [Sp., *areca*], $C_8H_{13}NO_2$. A liquid alkaloid isolated from the seeds of *Areca catechu*. It is strongly alkaline, very soluble in water, alcohol, ether, or chloroform, and boils at 220° C. It is a powerful poison, affecting the heart similarly to muscarin. It has anthelmintic properties. Dose gr. $\frac{1}{15}$–$\frac{1}{10}$.

Arefaction (*ar-e-fak'-shun*) [*arefactio; arefacere*, to make dry]. 1. Exsiccation or desiccation. The removal of the structural or constitutional water from a substance. 2. The drying of drugs before powdering them. 3. Dryness, as of the skin. 4. Withering, as of a paralyzed limb.

Arena (*ar-e'-nah*) [*arena*, sand]. 1. Brick-dust deposit from urine; gravel. 2. Sabulous matter; brain-sand.

Arenaceous (*ar-e-na'-se-us*) [*arenaceus; arena*, sand]. Of the nature of sand or gravel; sabulous.

Arenation (*ar-e-na'-shun*) [*arena*, sand]. A sand-bath. The application of hot sand to a limb or part of the body. See *Ammotherapy*.

Areola (*ar-e'-o-lah*) [dim. of *area*, an open space: *pl.*, *Areolæ*]. 1. The brownish space surrounding the nipple of the female breast. This is sometimes called *Areola papillaris*. A *secondary areola*, surrounding this, occurs during pregnancy. The pigmentation about the umbilicus is called the *umbilical areola*. 2. Any interstice or minute space in a tissue.

Areolar (*ar-e'-o-lar*) [*areola*, dim. of *area*, an open space]. Relating to or characterized by areolæ. **A. Tissue**, cellular tissue; connective tissue.

Areolate, or Areolated (*ar-e'-o-lāt*, or *ar-e'-o-la-ted*) [*areola*, dim. of *area*, an open space]. Marked or characterized by areolæ.

Areometer (*ar-e-om'-et-er*) [ἀραιός, thin, light; μέτρον, a measure]. An instrument for estimating the specific gravity or strength of liquids, especially alcoholic liquids.

Areometry (*ar-e-om'-et-re*) [ἀραιός, thin, light; μέτρον, a measure]. The use of the areometer; estimation of the specific gravity of fluids.

Areotic (*ar-e-ot'-ik*) [ἀραιός, thin]. 1. Attenuant; thinning the humors; increasing perspiration. 2. An attenuant remedy.

Arethusa (*ar-eth-u'-sah*) [Ἀρέθουσα, a fountain]. A genus of orchidaceous plants. **A. bulbosa**, of North America, has root-tubes that are popularly used as a material for poultices, and are said to form a useful application for toothache. Unof.

Arevareva (*ar-a-var-a'-vah*) [Tahitian]. A scaly skin-disease said to be caused by the habitual use of the drug *Kava, q. v.* It is accompanied by eye-disease, with dimness of vision.

Argal (*ar'-gal*). See *Argol*.

Argamblyopia (*ar-gam-ble-o'-pe-ah*) [ἀργός, idle, disused; ἀμβλυωπία, dim-sightedness]. Amblyopia due to disuse of the eye.

Argamblyopic (*ar-gam-ble-op'-ik*) [ἀργός, idle; ἀμβλυωπία, dim-sightedness]. Affected with argamblyopia.

Argand-lamp. A form of lamp with a tubular wick.

Argan-oil (*ar'-gan-oil*) [Arab., *argān*]. An oil derived from the seeds contained in the fruit of the argan-tree. It is a good substitute for olive-oil.

Argan-tree (*ar'-gan-tre*) [Arab., *argān*]. The *Argania sideroxylon*, an evergreen tree of the N. W. of Africa, order *Sapotaceæ;* it yields a useful oil.

Argel (*ar'-gel*) [Syrian]. A plant, *Solenostemma argel*, of the eastern Mediterranean region; also its leaves, which are used to adulterate senna; also the *Gomphocarpus fruticosus*, of Africa, whose leaves are similarly employed. Unof.

Argema (*ar'-jem-ah*) [ἄργεμα, an ulcer: *pl.*, *Argemata*]. A white ulcer of the margin of the cornea, following phlyctenula.

Argemone (*ar-jem-o'-ne*) [ἄργεμον, an ulcer]. A genus of plants. **A. mexicana**, the horned or prickly poppy, a plant native to North America. It is said to have hypnotic qualities, and its seeds afford a purgative oil. Unof.

Argentation (*ar-jen-ta'-shun*) [*argentum*, silver]. Staining with a preparation of silver.

Argentic (*ar-jen'-tik*) [*argentum*, silver]. Pertaining to, or of the nature of silver. Containing silver as a univalent radical.

Argentine (*ar'-jen-tin*) [*argentum*, silver]. Containing or resembling silver.

Argentum (*ar-jen'-tum*) [L.: *gen.*, *Argenti*]. Silver. Ag = 108; quantivalence, 1. A malleable and ductile metal of brilliant white luster. It tarnishes only in the presence of free sulphur, sulphur gases, and phosphorus. It is an excellent substance for vessels used in pharmacy and for sutures used in surgery. The following salts

are used: **A. cyanidum**, AgCN, used in the preparation of hydrocyanic acid. **A. iodidum**, AgI, sometimes used internally instead of A. nitras. Dose gr. ¼–j. **A. nitras**, $AgNO_3$, "nitrate of silver," argentic nitrate, "lunar caustic," a powerful astringent and an escharotic of moderate strength. It stains skin and other tissues black when applied in strength. In small doses it stimulates the heart and nerve centers. If too long continued, it leaves a slate-colored, insoluble deposit of silver under the skin (*Argyria*). Dose gr. ⅙–½. **A. nitras dilutus**, the mitigated caustic or *dilute stick* is fused with an equal weight of potassium nitrate. **A. nitras fusus**, "stick caustic." Contains four per cent. of silver chlorid. It is used locally. **A. oxidum**, Ag_2O, explosive when treated with ammonia. Dose gr. ½–ij. **A. vivum**, an old name for mercury or quicksilver.

Argiamblyopia (*ar-ge-am-ble-o'-pe-ah*) [ἀργία, disuse; ἀμβλυωπία, dim-sightedness]. See *Argamblyopia*.

Argilla (*ar-jil'-ah*) [ἀργιλλος, potter's clay]. White or potter's clay, alumina. See *Bole*.

Argol (*ar'-gol*) [ἀργός, white]. The impure tartar derived from wine. See *Tartar*.

Argyll-Robertson Pupil. See *Signs and Symptoms, Table of*, and *Pupil*.

Argyll-Robertson's Operation. See *Operations, Table of*.

Argyria (*ar-jir'-e-ah*) [*argentum*, silver]. A form of chloasma or discoloration of the skin and mucous membranes produced by the prolonged administration of nitrate of silver, the molecules of silver being deposited in much the same position as those of the natural pigment of the skin. It may be *general*, from internal administration, or *local*, from its local application.

Argyriasis (*ar-jir-i'-as-is*). See *Argyria*.

Argyrosis (*ar-jir-o'-sis*). Same as *Argyria*, *q.v.*

Arhinia (*ah-rin'-e-ah*) [ἀ priv.; ῥίς, nose]. Congenital absence of the nose.

Arhythmia (*ar-ith'-me-ah*). See *Arrhythmia*.

Aricin (*ar'-is-in*) [*Arica*, in Peru], $C_{23}H_{26}N_2O_4$. An alkaloid obtained from several varieties of cinchona bark.

Ariditas (*ar-id'-it-as*) [L., "dryness"]. A dried or withered condition of any part or organ.

Aridura (*ar-id-u'-rah*) [L.]. Dryness; a drying up, withering, or wasting of a part, or of the organism as a whole.

Aril, or **Arillus** (*ar'-il*, or *ar'-il-us*) [*aridus*, dry]. In biology, the accessory coat of certain seeds, growing from the funiculus, hilum, or placenta, as the mace of nutmegs.

Arisema (*ar-is-e'-mah*) [ἄρον, arum; σῆμα, a sign]. A genus of araceous herbs. **A. atrorubens**, the wild or Indian turnip, or Jack-in-the-Pulpit of Eastern N. America. Its corm is strongly stimulant and acrid, with emetic, expectorant, and sternutatory qualities. Other species have similar properties. Unof.

Arista (*ar-is'-tah*) [L.]. In biology, the awn or beard of certain flowers or animals.

Aristate (*ar-is'-tāt*) [*arista*, the awn or beard of grain]. In biology, awned. Tipped with a bristle.

Aristol (*ar'-is-tol*) [ἄριστος, best; *oleum*, oil], $(C_6H_2\text{-}CH_3OI.C_3H_7)_2$. Annidalin; Dithymol-iodid. An iodin compound used as a substitute for iodoform as an antiseptic dressing. It has the advantage of being odorless, and is used either in the powder form or as a five to ten per cent. ointment with vaselin or lanolin.

Aristolochia (*ar-is-to-lo'-ke-ah*) [ἄριστος, best; λοχεῖα, the lochia]. A genus of exogenous herbs, many species of which have active medicinal qualities. **A. clematitis**, of Europe, has been used as a tonic, stimulant, and diaphoretic. **A. cymbifera**, of S. America, furnishes a part of the drug called *Guaco* (*q.v.*), and is a good tonic and stimulant. **A. serpentaria** (see *Serpentaria*) is at present more used in medicine than any other species.

Aristolochic (*ar-is-to-lo'-kik*) [ἄριστος, best; λοχεῖα, the lochia]. 1. Having the property of expelling the placenta, or of exciting or promoting the lochial discharge. 2. A medicine used for expelling the secundines or for exciting the lochial flow.

Aristolochin (*ar-is-to-lo'-kin*) [ἄριστος, best; λοχεῖα, the lochia]. A bitter principle found in Virginia snake-root. See *Serpentaria*.

Aristotle's Experiment. The double feeling experienced by the fingers when a single pebble is placed between the crossed fingers of one hand.

Aristulate (*ar-is'-tu-lāt*) [*aristula*, dim. of *Arista*, awn or beard of grain]. In biology, having a short awn.

Arithmomania (*ar-ith-mo-ma'-ne-ah*) [ἀριθμός, a number; μανία, madness]. An insane anxiety with regard to the number of things that fall under the observation. Sometimes it consists in constant or uncalled-for counting, either of objects or in mere repeating of consecutive numbers.

Arlt-Jaesche's Operation. See *Operations, Table of*.

Arlt's Ointment. An ointment containing grs. viiss of belladonna to ℥j¼ of blue ointment, for use in blepharospasm.

Arlt's Operation. See *Operations, Table of*.

Arm (*arm*) [*armare*, to arm]. 1. That part of the upper extremity from the shoulder to the wrist. 2. That portion of the stand connecting the body or tube of a microscope to the pillar.

Armadillo (*ar-ma-dil'-o*) [Sp., dim. of *armado*, armed]. A trade-name for a proprietary arrangement of plates, straps, and buckles worn upon the person for its alleged electric effects.

Armamentarium (*ar-ma-men-ta'-re-um*) [L., an arsenal]. The outfit of medicines or instruments of the physician or surgeon.

Armarium (*ar-ma'-re-um*) [L.]. See *Armamentarium*.

Armature (*ar'-mat-chūr*) [*armatura*, equipment]. A mass of soft iron at the extremity of a magnet. Also, the core of iron around which coils of insulated wire are wound or disposed.

Arma urticaria (*ar'-mah er-tik-a'-re-ah*) [L.]. The urticating weapons of *Cœlenterates*.

Arm-chair, Charcot's. See *Shaking Cure*.

Armed Tape-worm. See *Tenia solium*.

Armenian (*ar-me'-ne-an*) [Armenia]. Of or belonging to Armenia. **A. Blue.** Same as *Ultramarine*. **A. Bole**, a reddish, unctuous earth or clay formerly much used in medicine, now used in tooth-powders and in veterinary practice. It is absorbent and astringent.

Armilla (*ar-mil'-ah*) [*armilla*, a bracelet, ring]. 1. In biology, the annular ligament of the wrist; a colored ring on the tibia of a bird or the plaited frill on the stipe of certain mushrooms. 2. The Gasserian ganglion.

Armpit (*arm'-pit*) [*armus*, shoulder; *puteus*, a well]. The axilla.

Armus (*ar'-mus*) [*armus*, ἀρμός, *the shoulder*]. The arm, or the arm and shoulder.

Army Itch (*ar'-me itch*). A distressing chronic form of itch prevalent in the United States at the close of the civil war. The itching was intense. The eruption was seen especially on the arms, forearms, chest, abdomen, and lower extremities, particularly on the ulnar side of the forearm and inner aspect of the thigh. It resembled prurigo associated with vesicles, pustules, and eczema.

Arnandon Green. Same as *Mittler's Green.*

Arnatto (*ar-nat'-o*). See *Annotto.*

Arnica (*ar'-nik-ah*) [L.: *gen.*, *Arnicæ*]. A genus of composite-flowered plants. The name in medicine denotes the plant commonly known as "Leopard's bane," *A. montana.* Both flowers and roots are used in medicine. Its properties are probably due to an alkaloid, *trimethylamin*, C_3H_9N. In small doses it is a cardiac stimulant; in larger doses a depressant. In toxic doses it frequently causes death. It is a popular remedy, when locally applied, for sprains, bruises and surface wounds, and is valuable also in typhus and typhoid fevers as an antipyretic. **A., Emplastrum,** contains ext. of root 33, resin plaster 67 parts. **A., Ext. Radicis.** Dose gr. j–iij. **A., Ext. Rad. Fld.** Dose ♏v–xx. **A., Infusum,** 20 parts flowers, 100 parts water. Superior to the tincture for local use. **A., Tinct.,** 20 per cent. Dose ♏v–xxx. **A., Tinct. Rad.,** 10 per cent. Dose ♏v–xxx. *Trimethylamin*, (unof.). Dose gr. ij–iij in syrup. **Arnicæ flores,** arnica flowers. **Arnicæ radix,** the root of arnica.

Arnicin (*ar'-nis-in*) [*arnica*], $C_{20}H_{30}O_4$. A brownish, bitter glucosid extracted from the flowers of *Arnica montana.*

Arnold's Convolution. See *Convolutions, Table of.* **A. Fold,** *valvula lachrymalis superior*, a fold of the mucous membrane seen in the lachrymal sac. **A. Ganglion.** See *Ganglia, Table of.* **A. Nerve.** See *Nerves, Table of.* **A. Plexus.** See *Plexus.*

Arnott's Method. See *Treatment, Methods of.* **A. Mixture.** See *Frigorific Mixture.* **A. Ventilator.** See *Ventilation.*

Aroma (*ar-o'-mah*) [ἄρωμα, spice]. The volatile fragrant or odorous emanation of certain vegetable substances.

Aromatic (*ar-o-mat'-ik*) [ἄρωμα, spice]. 1. Having a spicy odor. 2. A substance characterized by a fragrant, spicy taste and odor, as cinnamon, ginger, the essential oils, etc. A stimulant to the gastro-intestinal mucous membrane. 3. A qualification applied to a series of carbon compounds originating from a nucleus composed of six carbon-atoms, C_6H_6. Their stability is relatively great as compared to the fatty bodies. **A. Acids,** those of the benzin-group of hydrocarbons. **A. Compound,** any benzyl-derivative. **A. Fld. Ext.,** aromatic powder 100, alcohol q. s. **A. Group,** a series of hydrocarbons having the composition $C_{10}H_{16}$. **A. Powder.** See *Cinnamomum.* **A. Vinegar,** any mixture of aromatic oils with vinegar. It is used as a stimulating agent. See *Acetum.*

Aromin (*ar-o'-min*) [ἄρωμα, spice]. An alkaloid obtainable from urine, after creatinin, etc., have been removed from the mother-liquor. When heated it emits a fragrant odor.

Arquatus (*ar-kwa'-tus*) [L., a rainbow]. Showing several colors. **A. morbus,** an old name for jaundice, from the discoloration of the skin; rainbow disease.

Arrack (*ar'-ak*) [Ind.]. Any alcoholic liquor is called arrack in the East, but arrack proper is a liquor distilled from toddy, malted rice, or dates.

Arrak (*ar'-ak*). See *Arrack.*

Arrector (*ar-ek'-tor*) [L., an erector]. A name applied to certain muscles. **A. pili Muscle,** a fan-like arrangement of a layer of smooth muscular fibers surrounding the hair follicle, whose contraction erects the follicle and produces *cutis anserina* or "goose-skin."

Arrest (*ar-est'*) [*ad*, to; *restare*, to withstand]. Stoppage, detention. **Arrested development,** is when an organ or organism fails in its normal evolution, stopping at the initial or intermediate stages of the process. **Arrested head,** when in parturition the child's head is hindered but not impacted in the pelvic cavity.

Arrestation (*ar-es-ta'-shun*). Same as *Arrest.*

Arrhea (*ah-re'-ah*) [ἀ priv.; ῥοία, a flow]. The cessation or suppression of any discharge.

Arrhenotocia (*ar-en-o-to'-se-ah*) [ἄῤῥην, male; τόκος, a bringing forth]. A form of parthenogenesis in which without coitus male eggs are deposited, as in bees.

Arrhinia (*ah-rin'-e-ah*). Same as *Arhinia.*

Arrhizous (*ah-ri'-zus*) [ἀ priv.; ῥίζα, a root]. In biology, destitute of roots or rhizoids, as parasitic plants, certain mosses, hepaticæ, *etc.*

Arrhythmia (*ah-rith'-me-ah*) [ἀ priv.; ῥυθμός, rhythm]. Absence of rhythm; chiefly used in the expression *arrhythmia cordis*, denoting irregularity or lack of rhythm in the heart's action. See *Cardiac Rhythm.*

Arrhythmic (*ah-rith'-mik*) [ἀ priv.; ῥυθμός, rhythm]. Without rhythm; irregular.

Arrhythmous (*ah-rith'-mus*). See *Arrhythmic.*

Arrhythmy (*ah-rith'-me*). Same as *Arrhythmia.*

Arrow-poison (*ar'-o-poi'-zun*). See *Curare* and *Guachamaco.*

Arrowroot (*ar'-o-root*) [ME., *arow; roote*]. A kind of starch derived from *Maranta arundinacea* of the West Indies, Southern States, etc. It is a popular remedy for diarrhea, and is widely used as a food. Many other starchy preparations are sold as arrowroot.

Arsenate, or Arseniate (*ar'-sen-āt, ar-se'-ne-āt*) [*arsenium*]. Any salt of arsenic acid. **Ferrous arseniate,** arseniate of iron, sparingly used in medicine: it is the *ferri arsenias* of the B. P. It is a tasteless, greenish powder, combining the effects of iron and arsenic; used largely in anemia and skin diseases. Dose gr. $\frac{1}{16}$–$\frac{1}{2}$.

Arseniasis (*ar sen-i'-as-is*). Same as *Arsenism.*

Arsenic, Arsenicum, or Arsenum (*ar'-sen-ik, ar-sen'-ik-um*, or *ar-se'-num*). As = 75; quantivalence III, V. A non-metal having a metallic luster and crystalline structure. In small doses it is a stomachic and general tonic, promoting appetite and cardiac action, and stimulating mental activity. It is of great value in irritative dyspepsia, and is sometimes used internally to blanch and clear the skin. In larger doses it creates skin-eruptions and behaves as a violent corrosive poison, acting with cumulative effect. Externally, it is a powerful escharotic, used in cancer. Only the salts and oxids are used in medicine. **A. acid.,** arsenous acid, white arsenic, "ratsbane," As_2O_3. Dose gr. $\frac{1}{30}$–$\frac{1}{10}$. **A., acid., liquor.** (*Liq. arsenici hydrochlorici*, B. P.), a 1 per cent. solution of the acid in hydrochloric acid and distilled water. Dose ♏ij–x. **Ferri arsenas,** $Fe_3As_2O_8$. Dose gr. $\frac{1}{16}$–$\frac{1}{2}$. **Liq. Arsenici hydrochlor.** (B. P.). Dose ♏ij–viij. **Potassii arsenit., Liq.** (*Liquor Arsenicalis*, B. P.). Fowler's solution, contains A. acid 1, potass. bicarbonate 1, comp. tinct. lavender 3, and distilled water q. s. *ad* 100 parts. Dose ♏ij–x. **Sodii arsenas,** $Na_2HAsO_4.7H_2O$. Dose of the dried salt gr. $\frac{1}{24}$–$\frac{1}{12}$. **Sodii arsenat., Liq.,** Pearson's solution. Dose, ♏ij–xv. **A. iodid,** AsI_3. Dose gr. $\frac{1}{30}$–$\frac{1}{8}$. **A. et hydrargyri iod., Liq.,** liquor of the iodid of arsenic and mercury, Donovan's solution, contains A. iodid 1, mercuric iodid 1, distilled water 100 parts. Dose ♏ij–x. **A. bromas,** AsBr, valuable in diabetes. Dose gr. $\frac{1}{30}$. **A. brom., Liq.,** Clemens' solution, a one per cent. solution of the arsenite of bromin. Dose ♏j–iv. The tests for arsenic are Fleitmann's, Marsh's, and Reinsch's, for which see *Tests, Table of.*

Arsenical (*ar-sen'-ik-al*) [*arsenum*, arsenic]. Pertaining to arsenic. **A. Devitalizing Fiber,** used

in places where pastes would be dangerous, from leakage.

℞. Absorbent cotton (cross-cut fine)
Arsenous oxid, gr. v
Acetate of morphin, gr. x
Oily carbolic acid, q. s., to very thin paste.
Saturate cotton with paste and dry.

A. Paste (*Pâte Arsenicale*), a French composition, used as application for destroying the pulps of decayed teeth.

℞. Arsenous oxid, gr. v
Acetate of morphin, gr. x
Mull in mortar; moisten cotton pellet in either oil of cloves, eugenol, oily carbolic acid, or dental aconite, and dip into powder. See also *Frère Côrne.*

Arsenicalism (*ar-sen'-ik-al-izm*). Same as *Arsenism.*

Arsenicism (*ar-sen'-is-izm*). Same as *Arsenism.*

Arsenicophagy (*ar-sen-ik-off'-a-je*) [*arsenum*, arsenic; φαγεῖν, to eat]. The habitual eating of arsenic.

Arsenism (*ar'-sen-izm*) [*arsenum*, arsenic]. Chronic arsenical poisoning; arsenicalism.

Arsenite (*ar'-sen-īt*) [*arsenum*, arsenic]. Any salt of arsenous acid.

Arsenization (*ar-sen-iz-a'-shun*) [*arsenum*, arsenic]. Treatment with arsenical remedies.

Arsenoblast (*ar-sen'-o-blast*) [ἀρσην, male; βλαστός, germ]. In biology, the male element of the sexual cell, capable of multiplication by division; the opposite of the *thelyblast* or female element.

Arsenous, or Arsenious (*ar'-sen-us, ar-se'-ne-us*) [*arsenum*, arsenic]. Containing arsenic. **A. Acid.** See *Arsenic.*

Arse-smart (*ars'-smart*). See *Polygonum hydropiper.*

Arsins (*ar'-sinz*) [*arsenum*, arsenic]. Peculiar volatile arsenical bases found by Selmi to be produced by the contact of arsenous acid and albuminous substances.

Arsonium (*ar-so'-ne-um*) [*arsenum*, arsenic; *ammonium*], AsH_4. A univalent radical in which arsenic replaces the nitrogen of ammonium.

Arsura (*ar-su'-rah*) [L., a "burn"]. An old name for gonorrhea.

Art (*art*) [*ars, artis*, skill]. Skill; dexterity. **A., Dental,** the application of the rules of dental surgery to the treatment of the diseases of the teeth and the replacement of the loss of those organs.

Artanthe (*ar-tan'-the*) [L.]. A genus of piperaceous plants. **A. elongata,** the plant that affords the drug *Matico, q. v.* It is a vine of the pepper family, a native of Peru.

Artefact (*ar'-te-fakt*). See *Artifact.*

Artemisia (*ar-tem-is'-e-ah*) ['Αρτεμις, the goddess Diana]. A genus of plants of the order compositæ. **A. abrotanum,** *southern wood,* is stimulant, tonic, and vermifuge, and is popularly used as a vulnerary. It is similar in properties to wormwood. Dose of fld. ext. ♏x–xx. Unof. **A. absinthium.** See *Absinthe.* **A. maritima** affords pure *Wormseed, q. v.* **A. vulgaris,** mugwort, is a popular remedy in various diseases.

Arteria (*ar-te'-re-ah*) [ἀρτερία, the trachea]. Hollow tubes. The plural was applied to the bronchial tubes. The ancients supposed these filled with vital spirit during life. See *Artery.*

Arteriac (*ar-te'-re-ak*) [ἀρτερία, the trachea]. 1. Pertaining to the trachea, or to the arteries. 2. A remedy used in diseases of the trachea or of the arteries.

Arteriagra (*ar-ter-e-a'-grah*) [ἀρτερία, trachea; ἀγρα, a seizure]. Neuralgia of an artery.

Arterial (*ar-te'-re-al*) [ἀρτερία, the trachea]. Pertaining to an artery.

Arterialization (*ar-te-re-al-iz-a'-shun*) [ἀρτερία, the trachea]. The process of making or becoming arterial; the change from dark, venous blood into that which is bright-red, as in the arteries.

Arteriarctia (*ar-te-re-ark'-te-ah*) [ἀρτερία, trachea; *arctus*, bound]. Constriction or stenosis of an artery.

Arteriectasis (*ar-te-re-ek'-tas-is*) [ἀρτερία, trachea; ἔκτασις, a stretching out]. Arterial dilatation.

Arteriectopia (*ar-te-re-ek-to'-pe-ah*) [ἀρτερία, trachea; ἔκτοπος, out of place]. Displacement or abnormality in the course of an artery.

Arterin (*ar'-ter-in*) [ἀρτερία, trachea]. Hoppe-Seyler's term for the arterial blood-pigment as contained in the corpuscles.

Arterioarctia (*ar-te-re-o-ark'-te-ah*). See *Arteriarctia.*

Arterio-capillary (*ar-te-re-o-kap'-il-a-re*) [ἀρτερία, trachea; *capillus*, a hair]. Pertaining to arteries and capillaries. **A. Fibrosis,** the undue augmentation, or abnormal preponderance, of connective-tissue elements in the walls of capillaries and arteries.

Arteriodiastasis (*ar-te-re-o-di-as'-tas-is*) [ἀρτερία, trachea; διάστασις, separation]. The retraction of the two ends of a divided artery.

Arterio-fibrosis (*ar-te-re-o-fi-bro'-sis*) [ἀρτερία, trachea; *fibra*, a fiber]. A term applied to the condition of the arterial capillaries in chronic interstitial disease.

Arteriogram (*ar-te'-re-o-gram*). See *Sphygmogram.*

Arteriograph (*ar-te'-re-o-graf*) [ἀρτερία, trachea; γράφειν, to record]. A form of sphygmograph.

Arteriography (*ar-te-re-og'-ra-fe*) [ἀρτερία, trachea; γράφη, a writing]. 1. A description of the arteries. 2. The graphic representation of the pulse-waves or of the arterial blood-current.

Arteriola (*ar-te-ri'-o-lah*) [L.: *pl.*, *Arteriolæ*]. An arteriole.

Arteriolæ Rectæ (*ar-te-re-o'-le rek'-te*) [L.]. The small blood-vessels that supply the medullary pyramids of the kidneys.

Arteriole (*ar-te'-re-ōl*) [*arteriola*]. A very small artery.

Arteriology (*ar-te-re-ol'-o-je*) [ἀρτερία, trachea; λόγος, science]. The science of the arteries; the anatomy, physiology, and pathology of the arteries.

Arteriomalacia (*ar-te-re-o-mal-a'-se-ah*) [ἀρτερία, trachea; μαλακία, softness]. The softening of an artery.

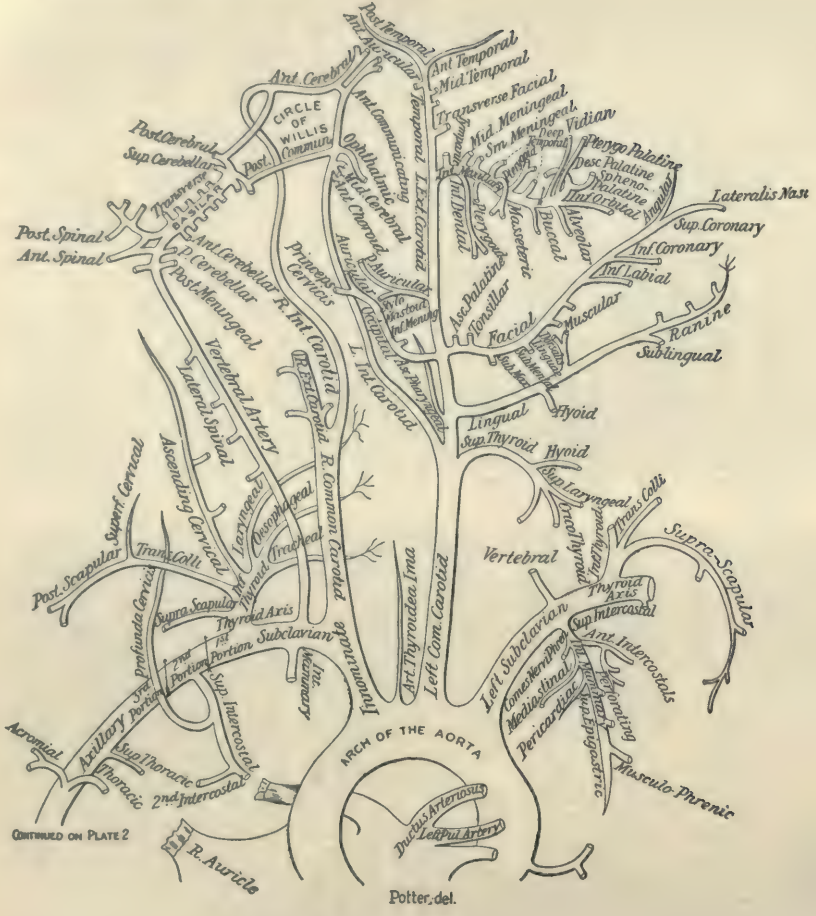
Arteriopathy (*ar-te-re-op'-a-the*) [ἀστερία, trachea; πάθος, illness]. Any disease of an artery or of arteries.

Arteriophlebotomy (*ar-te-re-o-fle-bot'-o-me*) [ἀρτερία, trachea; φλέψ, a vein; τέμνειν, to cut]. Local blood-letting.

Arterioplania (*ar-te-re-o-pla'-ne-ah*) [ἀρτερία, trachea; πλανᾶσθαι, to wander]. Deviation or tortuousness in the course of an artery.

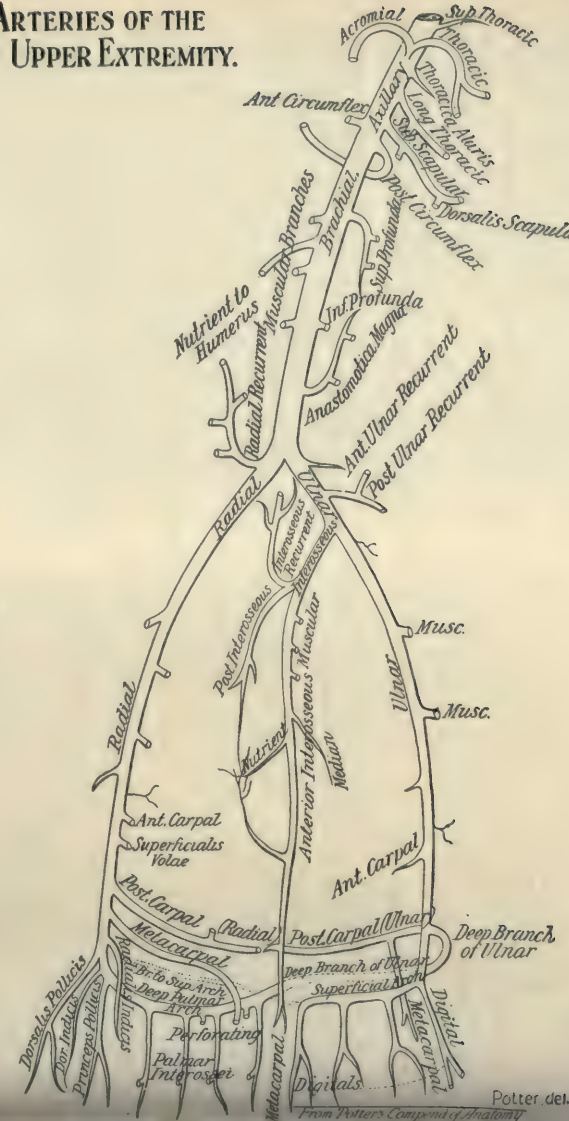
Arterio-renal (*ar-te-re-o-re'-nal*) [ἀρτερία, trachea; *ren*, the kidney]. Pertaining to the renal blood-vessels. **A. Disease,** a pathologic condition of middle life characterized by an early stage of renal cirrhosis due primarily to vascular lesions. Its symptoms are mainly high vascular tension, albuminuria, and tendency to apoplectic seizures.

Arteriorrhagia (*ar-te-re-or-a'-je-ah*) [ἀρτερία, trachea; ῥήγνυσθαι, to break forth]. Arterial hemorrhage.



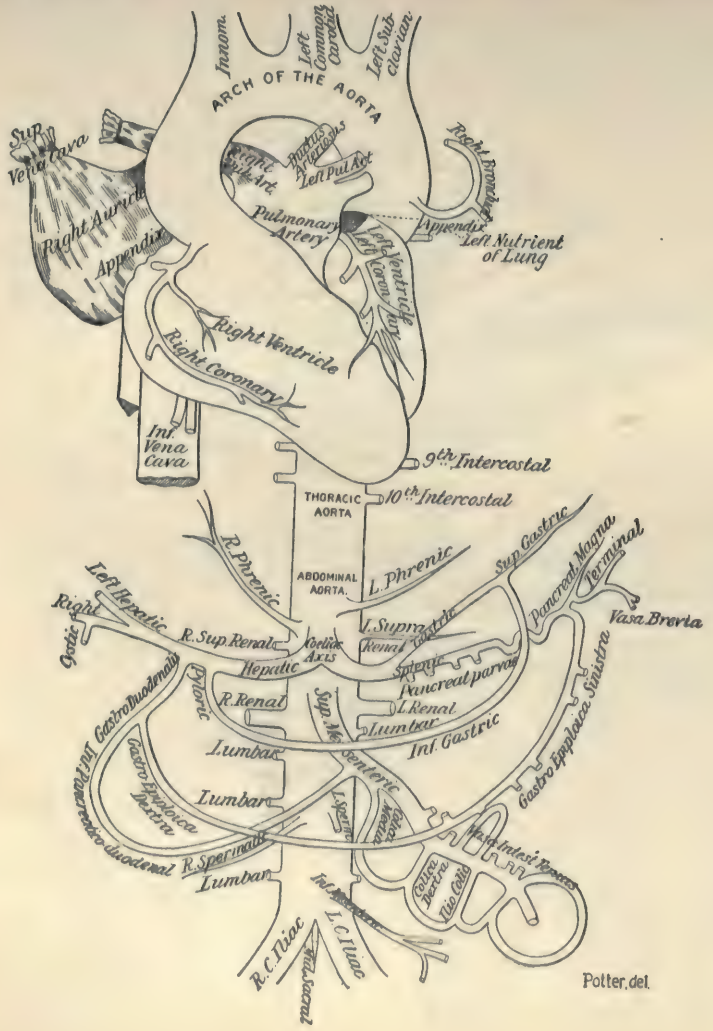
Arteriorrhexis (*ar-te-re-or-eks'-is*) [ἀρτερία, trachea; ῥῆξις, a bursting]. Rupture of an artery.

Arteriosclerosis (*ar-te-re-o-skle-ro'-sis*) [ἀρτερία, trachea; σκληρός, hard]. The hardening of the walls of an artery, and especially of the intima. See *Endarteritis.*



Arterio-sclerotic (*ar-te-re-o-skle-rot'-ik*) [ἀρτερία, trachea; σκληρός, hard]. Pertaining to arteriosclerosis. **A. Kidney.** See *Bright's Disease.*

Arteriosity (*ar-te-re-os'-it-e*) [ἀρτερία, trachea]. The quality of being arterious, or arterial.



Arteries of the Head and Neck.

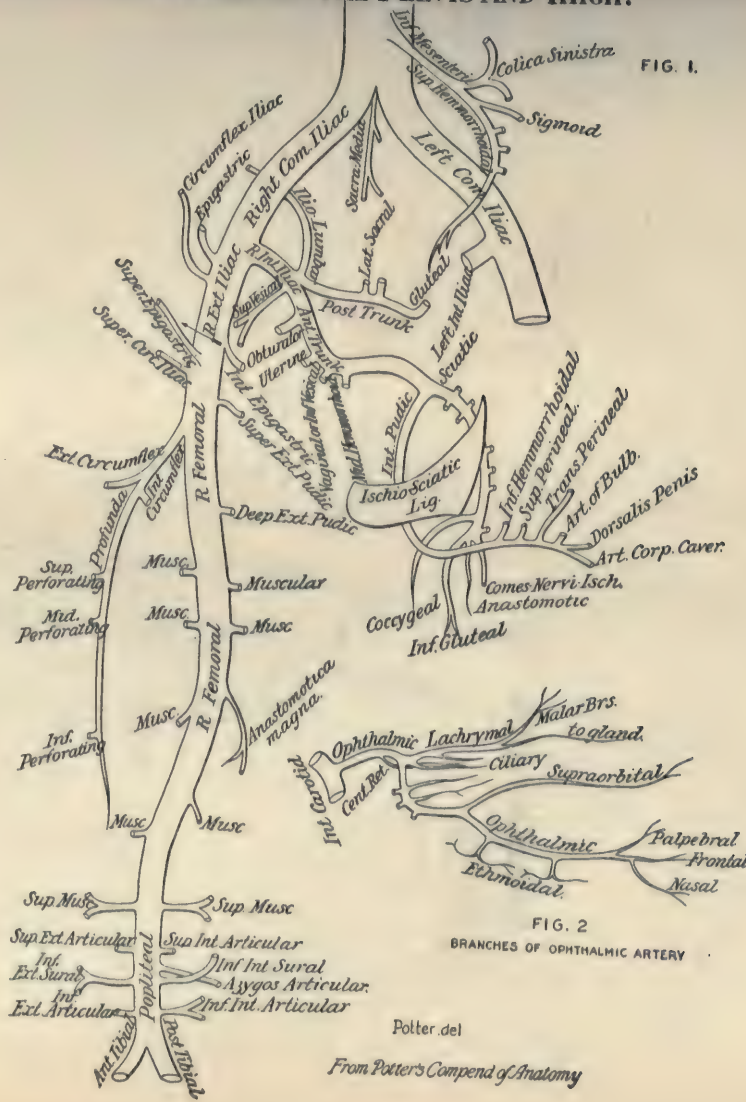
Arteries of the Upper Extremity.

BRANCHES OF THE AORTA

Potter, del.

ARTERIES OF THE PELVIS AND THIGH.

FIG. 1.



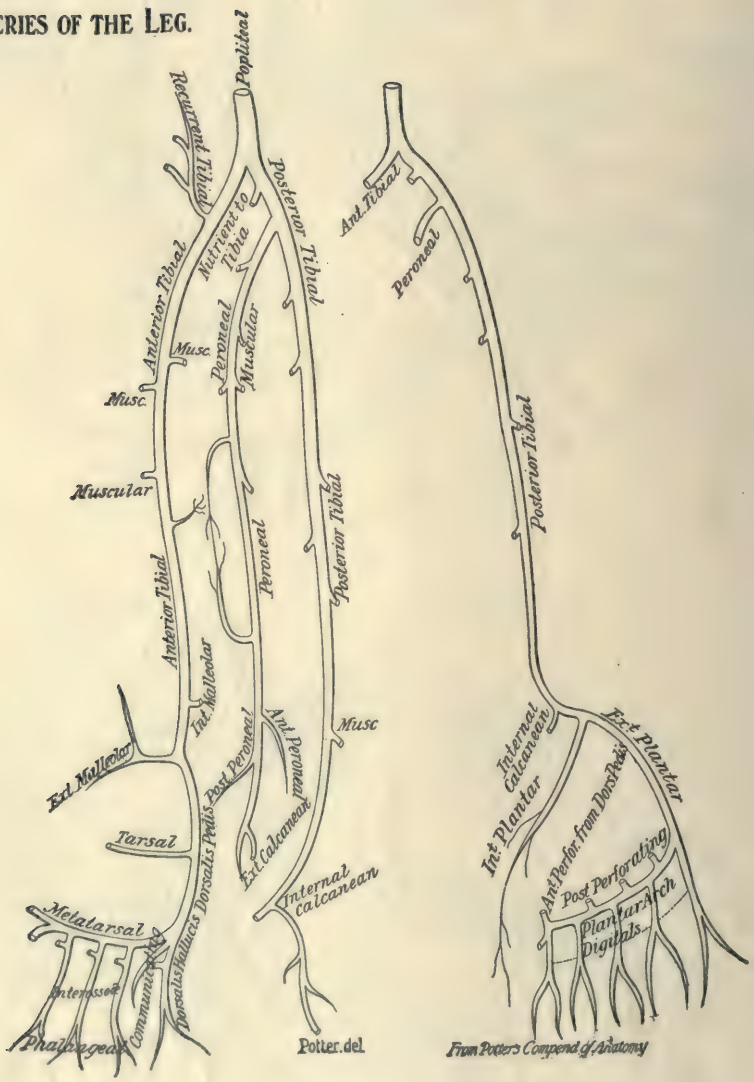


FIG. 2
BRANCHES OF OPHTHALMIC ARTERY

Potter. del

From Potter's Compend of Anatomy

Arteries of the Leg.

Arteriostenosis (*ar-te-re-o-ste-no'-sis*) [*ἀρτερία*, trachea; *στενός*, narrow]. The narrowing of the caliber of an artery in any part.

Arteriostrepsis (*ar-te-re-o-strep'-sis*) [*ἀρτερία*, trachea; *στρέψις*, a twisting]. The twisting of an artery for the purpose of staying a hemorrhage.

Arteriotome (*ar-te'-re-o-tōm*) [*ἀρτερία*, trachea; *τέμνειν*, to cut]. A knife for use in arteriotomy.

Arteriotomy (*ar-te-re-ot'-o-me*) [*ἀρτερία*, trachea; *τέμνειν*, to cut]. 1. The cutting or opening of an artery, as for the purpose of letting blood. 2. Dissection or anatomy of the arteries.

Arterious (*ar-te'-re-us*) [*ἀρτερία*, trachea]. Relating to anatomy or to the arteries; arterial.

Arterio-venous (*ar-te-re-o-ve'-nus*) [*ἀρτερία*, trachea; *vena*, vein]. Both arterial and venous; involving an artery and a vein, as an arterio-venous aneurysm.

Arterio-version (*ar-te-re-o-ver'-shun*) [*ἀρτερία*, trachea; *vertere*, to turn]. Weber's method of arresting hemorrhage by turning vessels inside out by means of an instrument called the *arterio-verter*.

Arterio-verter. See *Arterioversion*.

Arteritis (*ar-te-ri'-tis*) [*ἀρτηρία*, trachea; *ιτις*, inflammation]. Inflammation of an artery. The *acute form*, always local, is generally consecutive to trauma, thrombosis, or embolism, and may be purulent in character, and attended with ulceration; the *chronic*, more properly *Endarteritis*, *q. v.*, arterial sclerosis, leading to *atheroma* or *atheromatous changes*, is a frequent disease of the aged. **A. deformans**, the result of atheromatous changes producing crumpling or irregularities of the walls. See *Chronic Endarteritis*. **A. obliterans**, great inflammatory development of the endothelium of an artery, resulting in obliteration of the lumen by thrombosis. See *Endarteritis obliterans*.

Artery (*ar'-ter-e*) [*arteria*; *ἀρτηρία*, trachea]. Arteries are the tube-like vessels through which the blood is propelled by the heart to the peripheral organs. They end in arterioles and capillaries. They are composed of three layers: the outer, or *tunica adventitia;* the middle, or *tunica media*, the muscular coat; the internal, or *intima*, composed of nucleated endothelial cells, connective and elastic tissue. **A. Terminal**, an artery whose branches do not form anastomoses with other arteries. A table of the arteries is appended.

COATS OF A SMALL ARTERY. *a*, endothelium; *b*, internal elastic lamina; *c*, circular muscular fibers of the middle coat; *d*, the outer coat. (*Landois.*)

Arthragra (*ar-thra'-grah*) [*ἀρθρον*, a joint; *ἄγρα*, seizure]. Gout.

Arthral (*ar'-thral*) [*ἀρθρον*, a joint]. Articular; relating to an arthron.

Arthralgia (*ar-thral'-je-ah*) [*ἀρθρον*, a joint; *ἄλγος*, pain]. Pain in a joint; gout; arthritis; rheumatism.

Arthralgic (*ar-thral'-jik*) [*ἀρθρον*, a joint; *ἄλγος*, pain]. Relating to arthralgia.

Arthrectomy (*ar-threk'-to-me*) [*ἀρθρον*, a joint; *ἐκτομή*, a cutting out]. Surgical excision of a joint.

Arthrelcosis (*ar-threl-ko'-sis*) [*ἀρθρον*, a joint; *ἕλκωσις*, ulceration]. Ulceration of a joint.

Arthremia (*ar-thre'-me-ah*) [*ἀρθρον*, a joint; *αἷμα*, blood]. A congested condition of a joint.

Arthrempyema (*ar-threm-pi-e'-mah*) [*ἀρθρον*, a joint; *ἐμπύημα*, suppuration]. Suppuration or abscess of a joint.

Arthrempyesis (*ar-threm-pi-e'-sis*). See *Arthroempyesis*.

Arthritic (*ar-thrit'-ik*) [*ἀρθρον*, a joint]. Relating to arthritis or to gout.

Arthritis (*ar-thri'-tis*) [*ἀρθρον*, a joint; *ιτις*, inflammation]. Inflammation of a joint. **A. chlorotica.** Synonym of *Enteritis pseudomembranous*. **A. deformans**, chronic inflammation of a joint with deformity; rheumatoid arthritis. **A. fungosa**, scrofulous or tubercular disease of the joints; white swelling. **A. pauperum.** Synonym of *Rheumatoid arthritis*. **A. proliferating.** See *A. deformans*. **A. rheumatic**, *Chronic rheumatoid arthritis; Osteo-arthritis; Rheumatic gout; Nodular rheumatism; Arthritis deformans;* a chronic joint-affection characterized by inflammatory overgrowth of the articular cartilages and synovial membranes, with destruction of those parts of the cartilages subject to intra-articular pressure, and progressive deformity. The disease attacks those who present the rheumatic diathesis, and is chiefly seen in advanced life, though the young are not exempt. **A., rheumatoid.** See *A. deformans*. **A. uritica**, arthritis due to gout.

Arthritism (*ar'-thrit-izm*) [*ἀρθρον*, a joint]. Gout or the gouty diathesis.

Arthritolith (*ar-thrit'-o-lith*) [*ἀρθρον*, a joint; *λίθος*, a stone]. Gouty calcareous deposit or concretion in or around a joint.

Arthrobranchia (*ar-thro-brang'-ke-ah*) [*ἀρθρον*, a joint; *βράγχια*, gills]. In biology, a branchial plume attached to the membranous articulation between the coxa and the body of decapod crustaceans.

Arthrocace (*ar-throk'-as-e*) [*ἀρθρον*, a joint; *κακός*, ill]. Fungous, strumous, or tuberculous arthritis.

Arthrocacology (*ar-thro-kak-ol'-o-je*) [*ἀρθρον*, joint; *κάκη*, fault; *λόγος*, science]. The sum of knowledge regarding joint-diseases.

Arthrocele (*ar'-thro-sēl*, or *ar-thro-se'-le*) [*ἀρθρον*, a joint; *κήλη*, a tumor]. Swelling of a joint, especially of a knee-joint in gonorrheal rheumatism.

Arthrochondritis (*ar-thro-kon-dri'-tis*) [*ἀρθρον*, a joint; *χόνδρος*, a cartilage; *ιτις*, inflammation]. Inflammation of the cartilaginous parts of a joint.

Arthroclasia (*ar-thro-kla'-se-ah*) [*ἀρθρον*, a joint; *κλάειν*, to break]. The breaking down of ankyloses in order to produce free movement of a joint.

Arthroclasy (*ar'-thro-kla-se*). Same as *Arthroclasia*.

Arthroderm (*ar'-thro-derm*) [*ἀρθρον*, a joint; *δέρμα*, skin]. The parietes of an arthropod.

Arthrodesis (*ar-throd'-es-is*) [*ἀρθρον*, joint; *δέσις*, a binding]. Surgical fixation of paralyzed joints.

Arthrodia (*ar-thro'-de-ah*) [*ἀρθρωδία*, a kind of articulation]. A form of joint permitting a gliding movement. See *Diarthrosis*.

Arthrodial (*ar-thro'-de-al*) [*ἀρθρωδία*, a kind of articulation]. Pertaining to or of the nature of arthrodia.

Arthrodynia (*ar-thro-din'-e-ah*) [*ἀρθρον*, a joint; *ὀδύνη*, pain]. See *Arthralgia*.

Arthrodynic (*ar-thro-din'-ik*) [*ἀρθρον*, a joint; *ὀδύνη*, pain]. Relating to or affected by arthrodynia.

Arthroempyesis (*ar-thro-em-pi-e'-sis*) [*ἀρθρον*, a joint; *ἐμπύησις*, suppuration]. Suppuration in a joint.

Arthrography (*ar-throg'-ra-fe*) [*ἀρθρον*, a joint; *γράφειν*, to write]. A description of the joints.

Arthrogryposis (*ar-thro-grip-o'-sis*) [*ἀρθρον*, a joint; *γρύπωσις*, flexure]. 1. Permanent flexure of a joint; ankylosis. 2. Persistent idiopathic contracture of a joint. 3. Tetany or tetanilla.

TABLE OF ARTERIES.

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Aberrant (from brachial or axillary).	Connect the brachial or axillary with the radial usually, at times with the ulnar or interosseous.		
Acromial.	Acromio-thoracic.	Deltoid muscle (in part), assists in the formation of the acromial rete.	
Acromial.	Suprascapular.	Acromial rete.	
Acromio-thoracic (thoracic axis).	Second branch of first part of axillary.	Shoulder, arm, upper anterior part of chest, and mammary gland.	Acromial, humeral, pectoral, clavicular.
Adipose.	Thoracic aorta.	Adipose tissue of heart.	
Afferent.	Interlobular of kidneys.	Glomeruli.	
Alar thoracic.	Second part of axillary.	Lymphatic glands in axilla.	
Alveolar (gingival).	Posterior dental.	The gums.	
Anastomotic (of external plantar).	External plantar.	Outer border of foot.	Anastomoses with the tarsal and metatarsal branches of the dorsalis pedis.
Anastomotic (of internal plantar).	Internal plantar.	Inner side of foot.	Anastomoses with internal tarsal branch of the dorsalis pedis.
Anastomotic (of middle meningeal), also called *perforating*.	Middle meningeal.	Around greater wing of sphenoid.	Anastomose with deep temporal.
Anastomotic (of sciatic).	Sciatic.	External rotator muscles of thigh.	Assists in the formation of the crucial anastomosis.
Anastomotica magna (of brachial).	Brachial.	Elbow.	Posterior and anterior.
Anastomotica magna (of superficial femoral).	Superficial femoral (in Hunter's canal).	Knee.	Superficial and deep.
Angular.	The termination of the facial.	Lachrymal sac and lower part of orbicularis palpebrarum.	Anastomoses with infraorbital.
Anterior (of corpora quadrigemina).	Posterior cerebral.	Anterior portion of corpora quadrigemina.	
Anterior (of receptacle).	Internal carotid.	Dura mater of cavernous sinus and adjacent parts.	
Antral.	Posterior dental.	Antrum of Highmore.	
Aorta, abdominal.	Thoracic aorta.	Two common iliacs.	Phrenic (right and left), celiac axis, suprarenal or capsular (right and left), superior mesenteric, lumbar (four pairs), renal (right and left), spermatic (right and left), inferior mesenteric, right and left common iliac, middle sacral.
Aorta, arch.	Left ventricle of heart.	Thoracic aorta.	Two coronary, innominate, left common carotid, left subclavian.
Aorta, primitive.	That portion from the origin to the point at which the first branch is given off.		
Aorta, thoracic.	Arch of aorta.	Abdominal aorta.	Two or three pericardiac, three bronchial, four or five esophageal, twenty intercostal, subcostal (or twelfth dorsal), diaphragmatic, aberrans.
Aortæ, primitive (2).	Cardiac (in the embryo).	Pass through the first visceral arch.	Unite to form the dorsal.
Appendicular.	Ilio-colic.	Mesentery of vermiform appendix.	
Articular, middle (of knee).	Popliteal.	Crucial ligaments and joint.	
Articular, superior external (of knee).	Popliteal.	Crureus and knee.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Articular, superior, internal.	Popliteal.	Knee.	
Ascending.	External circumflex.	Deep structures of gluteal region and hip-joint.	
Asternal.	Internal mammary.	Inner surface of costal cartilages.	
Atrabiliary. See *Capsular.*			
Auditory, internal.	Basilar.	Internal ear.	
Auricular.	Occipital.	Pinna and concha.	
Auricular, anterior, inferior.	Superficial temporal.	Auricle and external auditory meatus.	
Auricular, anterior, superior.	Superficial temporal.	Auricle and external meatus.	
Auricular, deep.	Internal maxillary (first part).	Membrana tympani and skin of external auditory meatus.	
Auricular, left.	Left coronary artery.	Left auricle, pulmonary artery, and commencement of aorta.	
Auricular, posterior.	Fifth branch of external carotid.	Back of auricle, scalp, and part of neck.	Parotid, muscular, stylo-mastoid, anterior terminal or auricular, and posterior terminal or mastoid.
Auricular, right.	Right coronary artery.	Right auricle, aorta, auricular septum.	
Axillary.	Subclavian.	Brachial and seven branches.	Superior thoracic, acromio-thoracic, long thoracic, alar thoracic, subscapular, anterior and posterior circumflex.
Azygos (articular, of external plantar).	External plantar.	Articulations of tarsus.	
Azygos (articular, of internal plantar).	Internal plantar.	Articulations on inner side of foot.	Anastomoses with branches of external plantar.
Azygos (articular, of popliteal).	Popliteal.	Knee.	
Azygos (articular, of sciatic).	Sciatic.	Posterior part of capsule of hip-joint.	
Azygos (articular, of superior profunda).	Superior profunda.	Elbow-joint, posterior part.	Anastomoses with anastomotica magna and interosseous recurrent.
Azygos (articular, of suprascapular).	Suprascapular.	The acromio-clavicular and shoulder joints.	
Azygos (articular, of temporal).	Temporal.	Temporo-maxillary joint.	
Basilar.	By confluence of right and left vertebral.	Brain.	Transverse (or pontile), internal auditory, anterior cerebellar, superior cerebellar, two posterior cerebral.
Bicipital (or ascending).	Anterior circumflex.	Long tendon of biceps and shoulder-joint.	
Brachial.	Axillary.	Arm and forearm.	Superior and inferior profunda, anastomotica magna, nutrient, muscular, radial and ulnar.
Brachio-cephalic.	See *Innominate.*		
Bronchial (inferior).	Thoracic aorta.	Bronchi and parenchyma of the lungs.	
Bronchial (superior).	Arch of aorta.	Bronchi.	
Buccal.	Facial.	Muscles of cheek.	Anastomoses with buccal branch of internal maxillary, the transverse facial and infraorbital.
Buccal.	Internal maxillary.	Buccinator muscle and mucous membrane of mouth.	Anastomoses with the buccal branch of the facial, the transverse facial and infraorbital.
Buccal.	Posterior dental.	Buccinator muscle.	
Of the bulb.	First part of internal pudic.	Erectile tissue of the bulb and the corpus spongiosum.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Calcanean, external and internal.	Peroneal.	Over the os calcis and surrounding soft parts.	
Calcanean, inferior (of external plantar).	External plantar.	Over inner surface of os calcis.	Anastomoses with internal calcanean of peroneal.
Calcanean, middle.	Posterior tibial.	Os calcis.	
Callosal.	See *Calloso-marginal.*		
Calloso-marginal.	Anterior cerebral.	Callosal and upper part of marginal convolutions.	
Capsular (or atrabiliary).	Abdominal aorta.	Suprarenal capsule.	
Capsular.	See *Perirenal.*		
Cardiac.	Gastric.	Cardiac end of stomach.	
Cardiac, right. See *Coronary, right (of heart).*			
Carotid, common.	*Right side*, innominate; *left side*, arch.	External and internal carotid.	External and internal carotid.
Carotid, external.	Common carotid.	Anterior part of neck, face, side of head, integuments and dura mater.	Ascending pharyngeal, superior thyroid, lingual, facial, occipital, posterior auricular, temporal, internal maxillary.
Carotid, internal.	Common carotid.	Greater part of brain, the orbit, internal ear, forehead, and nose.	Tympanic, vidian, arteria receptaculi, pituitary, gasserian, meningeal, ophthalmic, posterior communicating, anterior choroid, anterior cerebral, middle cerebral.
Carotid, primitive. See *Carotid, common.*			
Carotid, superficial. See *Carotid, external.*			
Carpal.	Radial.	Branches to lower end of radius, wrist, and carpal-joints.	Enters into formation of anterior carpal rete.
Carpal.	Ulnar.	Carpus.	Enters into formation of the posterior carpal rete.
Caudate.	Middle cerebral.	Head of caudate nucleus.	
Caval.	Right phrenic.	Vena cava.	
Cecal, anterior.	Inferior mesenteric.	Anterior surface of cecum.	
Cecal, posterior.	Posterior mesenteric.	Posterior part of cecum.	
Celiac.	Abdominal aorta.	Stomach, duodenum, spleen, pancreas, liver and gall-bladder.	Gastric, hepatic, splenic.
Central (of retina).	Ophthalmic.	Retina.	
Central, of Zinn. See *Central (of retina).*			
Cerebellar, anterior.	Basilar.	Anterior inferior surface of cerebellum.	
Cerebellar, inferior.	Vertebral.	Vermiform process, and cortex of cerebellum.	Inferior vermiform and the hemispheral.
Cerebellar, superior.	Basilar.	Superior vermiform process and circumference of cerebellum.	Superior vermiform and hemispheral.
Cerebral, anterior.	Internal carotid.	Anterior portion of cerebrum.	Anterior communicating, ganglionic (or central), commissural, hemispheral (or cortical).
Cerebral, inferior.	See *Cerebral, posterior.*		
Cerebral, middle.	Internal carotid.	Middle portion of cerebrum.	Ganglionic (or central), hemispheral (or cortical).
Cerebral, posterior.	Basilar.	Temporo-sphenoidal and occipital lobes.	Ganglionic (or central), and hemispheral (or cortical).
Cervical.	Uterine.	Cervix uteri.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Cervical, anterior. See *Thyroid, anterior.*			
Cervical, ascending.	Inferior thyroid.	Deep muscles of neck and spinal canal.	Muscular, spinal and phrenic.
Cervical, deep.	Superior intercostal.	Deep muscles of neck and spinal canal.	Muscular, anastomotic, vertebral (or spinal).
Cervical, descending.	Deep cervical.	Tissues of neck.	
Cervical, superficial.	Transverse cervical.	Trapezius, levator anguli scapulæ, splenius muscles and posterior chain of lymphatic glands.	
Cervical, transverse (transversalis colli).	Thyroid axis.	Posterior cervical and scapular regions.	Posterior scapular and superficial cervical.
Chiasmic.	Anterior cerebral.	First portion of optic nerve.	
Choroid, anterior.	Internal carotid.	Hippocampus major and corpus fimbriatum.	
Choroid, posterior.	Posterior cerebral.	Velum interpositum and joins the choroid plexus.	
Ciliary, short and long, posterior and anterior.	Ophthalmic.	The eye.	
Circular, of uterus.	Uterine.	Cervix uteri.	
Circumflex, anterior (of axillary).	Axillary.	Pectoralis major, biceps, and shoulder-joint.	Bicipital and pectoral.
Circumflex, external.	Profunda femoris.	Muscles of thigh.	Ascending, transverse, and descending.
Circumflex iliac, deep.	External iliac.	Upper part of thigh and lower part of abdomen.	Muscular and cutaneous.
Circumflex iliac, superficial.	Common femoral.	Iliacus and sartorius muscles, inguinal glands, and skin of thigh.	
Circumflex, internal.	Profunda femoris.	Muscles of thigh.	
Circumflex, posterior (of axillary).	Axillary.	Deltoid, teres minor, triceps, and shoulder-joint.	Nutrient, articular, acromial, muscular.
Clavicular.	Acromio-thoracic.	Subclavius muscle.	
Of the clitoris, cavernous.	Internal pudic (in the female).	Corpus cavernosum of clitoris.	
Of the clitoris, profunda.	See *A., of the clitoris (cavernous)*		
Coccygeal.	Sciatic.	Integument over lower part of sacrum and coccyx.	
Cochlear.	Internal auditory.	Cochlea.	
Colic, left.	Inferior mesenteric.	Colon, descending.	
Colic, middle.	Superior mesenteric.	Transverse colon.	
Colic, right.	Superior mesenteric.	Colon, ascending.	
Colic, transverse.	Colic, middle.	Transverse colon.	
Comes nervi phrenici. See *Phrenic, superior*			
Commissural.	Anterior cerebral.	Callosum.	
Communicating.	Dorsalis pedis.	Enters into formation of plantar arch.	The fifth plantar digital, or princeps hallucis.
Communicating.	Occipital.	Muscles of posterior part of neck.	Anastomoses with branches of the vertebral.
Communicating (or perforating).	Deep palmar arch.	Join proximal ends of metacarpal and second and third dorsal interosseous arteries.	
Communicating.	Peroneal.	Anastomoses with communicating branch of posterior tibial.	
Communicating.	Posterior tibial.	Anastomoses with communicating of peroneal.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Communicating, anterior.	Anterior cerebral.	Assists in formation of anterior boundary of circle of Willis; sends branches to caudate nucleus.	
Communicating, posterior.	Posterior carotid.	Enters into formation of circle of Willis; uncinate convolution and optic thalamus.	Uncinate, middle thalamic.
Coronary. See *Gastric.*			
Coronary, inferior.	Facial.	Lower lip.	
Coronary, left.	Left anterior sinus of Valsalva.	Heart.	Left auricular, anterior interventricular, left marginal, terminal.
Coronary, right.	Right anterior sinus of Valsalva.	Heart.	Right auricular, preventricular, right marginal, posterior interventricular, transverse.
Coronary, right, of stomach. See *Pyloric.*			
Coronary, superior.	Facial.	Upper lip.	Arteria septum narium.
Of the corpus cavernosum.	Dorsal artery of the penis.	Corpus cavernosum.	
Costo-cervical.	That part of superior intercostal between its origin and first branch.		
Cremasteric.	Deep epigastric.	Cremaster muscle.	
Cremasteric.	Spermatic.	Cremaster muscle.	Anastomoses with cremasteric from deep epigastric.
Cremasteric. See *Spermatic, external.*			
Crico-thyroid.	See *Laryngeal, inferior*		
Crural, see *Femoral.*			
Cubital, see *Ulnar.*			
Cubital recurrent, anterior. See *Ulnar recurrent, anterior.*			
Cubital recurrent, posterior. See *Ulnar recurrent, posterior.*			
Cystic.	Hepatic.	Gall-bladder.	
Deferential.	Superior vesical.	Vas deferens.	
Dental, anterior.	Infraorbital.	Incisor and canine teeth, and mucous membrane of antrum.	
Dental, inferior.	See *Mandibular.*		
Dental, posterior (or alveolar).	Internal maxillary.	Antrum, teeth, gums, and cheek.	Antral, dental, alveolar, buccal.
Dental, superior.	Posterior dental.	Molar and bicuspid teeth of superior maxilla.	
Descending.	External circumflex.	Muscles of thigh.	
Descending, superficial.	External carotid.	Neck.	
Diaphragmatic.	Thoracic aorta.	Diaphragm.	
Digital.	External plantar.	Outer side of the 2d and 3d, 4th and 5th toes.	
Digital, palmar.	Superficial palmar arch.	Both sides of little, ring, and middle finger and ulnar side of index finger.	
Digital, plantar. See *Communicating, of dorsalis pedis.*			

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Digital, superficial.	Internal plantar.	Toes.	
Diploic.	Supraorbital.	Diploë of frontal sinuses.	
Dorsal.	Intercostal.	Spine and muscles of throat.	Spinal and muscular.
Dorsal.	Lumbar.	Muscles of back.	
Dorsal, interosseous.	Radial.	Contiguous of 2d, 3d, 4th, and 5th toes.	
Dorsal (of penis).	Termination of pudic.	Penis.	
Dorsal (scapular).	Subscapular.	Muscles of scapula and shoulder-joint.	Infrascapular.
Dorsal of tongue.	Lingual.	Dorsum of tongue, tonsils, and epiglottis.	
Dorsal (12th). See *Subcostal.*			
Dorsalis hallucis.	Continuation of dorsalis pedis.	Great and second toe.	
Dorsalis indicis.	Radial.	Index finger.	
Dorsalis linguæ.	Lingual.	Mucous membrane of tongue, pillars of fauces and tonsils.	
Dorsalis pedis.	Continuation of anterior tibial.	Assists to form plantar arch.	Tarsal, metatarsal, dorsalis hallucis, communicating.
Dorsalis pollicis.	Radial.	Thumb.	
Dorso-scapular.	See *Scapular, superior.*		
Duodenal, superior, right. See *Pancreatico-duodenal, superior.*			
Duodeno-gastric.	See *Gastro-duodenal.*		
Dural.	See *Meningeal.*		
Emulgent.	See *Renal.*		
Epicondyloid. See *Ulnar.*			
Epididymal.	Spermatic.	Epididymis.	
Epigastric, deep (or inferior).	External iliac.	Abdominal wall.	Cremasteric, pubic, muscular, cutaneous, terminal.
Epigastric, superficial.	Common femoral.	Inguinal glands, skin, superficial fascia, and abdominal wall.	
Epigastric, superior.	Internal mammary.	Abdominal wall and diaphragm, liver and peritoneum.	Phrenic, xiphoid, cutaneous, muscular, hepatic and peritoneal.
Epiploic.	Right and left gastro-epiploic.	Omentum.	
Epiploic. See *Omental.*			
Esophageal.	Gastric.	Esophagus.	
Esophageal.	Inferior thyroid.	Esophagus.	
Esophageal.	Left phrenic.	Esophagus.	
Esophageal (4 or 5).	Thoracic aorta.	Esophagus.	
Esophageal, inferior.	Coronary (of stomach).	Esophagus.	
Ethmoidal, anterior.	Ophthalmic.	Part of anterior portion of brain, nose, frontal sinuses and skin of face.	Ethmoidal, meningeal, nasal, frontal, cutaneous.
Ethmoidal, posterior.	Ophthalmic.	Posterior ethmoidal cells, dura mater, nose.	Ethmoidal, meningeal, nasal.
Eustachian.	Pterygo-palatine.	Eustachian tube.	
Facial.	Third branch external carotid.	Pharynx and face.	Ascending, or inferior palatine, tonsillar, glandular, muscular, submental, masseteric, buccal, inferior labial, inferior and superior coronary, lateralis nasi, angular.

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Facial, transverse.	Temporal.	Parotid gland, masseter muscle, skin of face.	
Fallopian.	Ovarian.	Isthmus, ampulla and fimbriated extremity of fallopian tube.	
Femoral, common.	Continuation of external iliac.	Lower part of abdominal wall, upper part of thigh and genitalia.	Superficial epigastric, superficial circumflex iliac, superficial external pudic, deep external pudic, profunda.
Femoral, deep. See *Femoral, profunda.*			
Femoral, profunda.	Common femoral.	Muscles of thigh.	External circumflex, internal circumflex and three perforating.
Femoral, superficial.	Continuation of common femoral.	Muscles of thigh and knee-joint.	Muscular, saphenous, anastomotica magna.
Fibular, superior.	Anterior or posterior tibial or popliteal.	Soleus and peroneus tertius muscles and integument.	
Of the frenum linguæ.	Sublingual.	Frenum of tongue.	
Frontal, anterior.	Anterior cerebral.	Inferior frontal convolutions.	
Frontal, ascending.	Middle cerebral.	Lower part of ascending frontal convolution.	
Frontal, internal.	Anterior cerebral.	Inferior frontal convolutions.	
Frontal, middle.	See *Medifrontal.*		
Funicular.	Superior vesical.	Round ligament.	
Gasserian.	Internal carotid.	Gasserian ganglion.	
Gasserian.	Middle meningeal.	Gasserian ganglion, and Meckel's space.	
Gastric (or coronary).	Celiac axis.	Stomach, liver, and esophagus.	Esophageal, cardiac, gastric, and hepatic.
Gastric, right. See *Gastro-epiploic, right.*			
Gastro-duodenal.	Hepatic.	Stomach and duodenum.	Right gastro-epiploic and superior pancreatico-duodenal.
Gastro-epiploic, left.	Splenic.	Stomach and omentum.	
Gastro-epiploic, right	Gastro-duodenal.	Stomach and omentum.	
Gastro-hepatic.	See *Coronary, of stomach.*		
Geniculate.	Posterior cerebral.	Geniculate convolution.	
Genital.	See *Pudic, internal.*		
Gingival. See *Alveolar.*			
Glandular.	Facial.	Submaxillary gland.	
Glaserian (or tympanic).	Internal maxillary.	Lining membrane of tympanum and laxator tympani muscle.	
Gluteal.	Internal iliac, posterior division.	Pelvic and glutei muscles, etc.	Muscular, superficial and deep.
Gluteal, deep.	Gluteal.	Deep muscles of posterior gluteal region.	
Gluteal, inferior.	Sciatic.	Gluteus maximus.	
Gluteal, superficial.	Gluteal.	Gluteus maximus and integument over sacrum.	
Gluteal, superior.	Deep gluteal.	Muscles adjacent.	
Gustatory (or lingual).	Inferior dental.	Lingual nerve.	
Guttural, superior. See *Thyroid, superior.*			

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Gutturo-maxillary. See *Maxillary, internal.*			
Helicine.		The arteries found in cavernous tissue, as in the uterus, ovary, etc.	
Hemispheral.	Inferior cerebellar.	Cortex of cerebellum.	
Hemispheral.	Superior cerebellar.	Cortex of cerebellum.	
Hemorrhoidal, inferior (or external).	Pudic.	Sphincter muscle, levator ani.	
Hemorrhoidal, internal. See *Hemorrhoidal, superior.*			
Hemorrhoidal, middle (rectal, middle).	Internal iliac, anterior division.	Middle part of rectum.	
Hemorrhoidal, superior.	Inferior mesenteric.	Upper part of rectum.	
Hepatic.	Celiac axis.	Liver, pancreas, part of duodenum, and stomach.	Pancreatic, sub-pyloric, gastro-duodenal, right and left terminal.
Hepatic.	Gastric.	Left lobe of liver.	
Hepatic.	Right phrenic.	Liver.	
Hepatic.	Superior epigastric.	Liver.	
Hepatic, right.	Hepatic.	Liver substance.	Cystic.
Humeral. See *Brachial.*			
Humeral, thoracic.	Acromio-thoracic.	Pectoralis major, deltoid and adjacent integuments.	Anastomoses with anterior and posterior circumflex.
Humeral, transverse. See *Suprascapular.*			
Hyaloid. Central artery of retina.	Crystalline lens.		
Hyoid. See *Infra-hyoid* and *Supra-hyoid.*			
Hypogastric.	Continuation of anterior branch of internal iliac.	Vesical branches, impervious in the adult.	
Ileo-colic.	Superior mesenteric.	Cecum and adjacent bowel.	
Iliac.	Ilio-lumbar.	Iliac fossa and ilium.	
Iliac.	Obturator.	Ilium.	
Iliac, circumflex deep. See *Circumflex iliac, deep.*			
Iliac, circumflex, superficial.	See *Circumflex iliac, superficial.*		
Iliac, common.	Terminal branch of abdominal aorta.	Peritoneum, subperitoneal fat, ureter, and terminates in external and internal iliac.	Peritoneal, subperitoneal, ureteric, external and internal iliac.
Iliac, external.	Common iliac.	Lower limb.	Deep epigastric, deep circumflex iliac, muscular, and continues as femoral.
Iliac, external, small. See *Circumflex iliac, external.*			
Iliac, internal.	Common iliac.	Pelvic and generative organs, and inner side of thigh.	Anterior and posterior trunk.
Iliac, internal, anterior trunk.	Internal iliac.	Pelvic and generative organs and thigh.	Hypogastric, superior middle and vesical, middle hemorrhoidal, uterine, vaginal, obturator, sciatic, internal pudic.
Iliac, internal, posterior trunk.	Internal iliac.	Muscles of hip and sacrum.	Ilio-lumbar, lateral sacral and gluteal.

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Iliac, primary. See *Iliac, common.*			
Iliac, primitive. See *Iliac, common.*			
Ilio-lumbar.	Internal iliac, posterior trunk.	Muscles of pelvis and pelvic bones.	Iliac and lumbar.
Incisive.	Mandibular.	Incisor teeth.	
Infracostal, labial.	Internal mammary.	Ribs.	
Infrahyoid.	Superior thyroid.	Infrahyoid bursa and thyro-hyoid muscle.	
Infraorbital.	Internal maxillary.	Upper lip, lower eye-lid, lachrymal sac, side of nose.	Orbital, anterior dental, nasal.
Infrascapular.	Dorsal scapular.	Subscapularis, scapula, and shoulder-joint.	
Infraspinous.	Posterior scapular.	Infraspinous fossa.	
Infraspinous.	Suprascapular.	Infraspinous fossa.	
Innominate.	Arch of aorta.	Right side of head and right arm.	Right common carotid, right subclavian, occasionally thyroidea ima.
Intercostal, anterior.	Internal mammary.	Intercostal muscles, ribs (upper 5 or 6), and pectoralis major.	
Intercostal, anterior.	Musculo-phrenic.	Lower 5 or 6 intercostal spaces.	
Intercostal, aortic. 10 pairs.	Thoracic aorta.	Lower intercostal spaces.	Dorsal, intercostal collateral, pleural, muscular, lateral cutaneous, mammary glandular.
Intercostal, first.	Superior intercostal.	First intercostal space.	
Intercostal, superior.	Subclavian.	Neck and upper part of thorax.	Deep cervical, first intercostal, arteria aberrans.
Interlobular (of kidney).	Renal.	Malpighian bodies and uriniferous tubules.	
Interosseous, anterior.	Interosseous (common).	Muscles of forearm.	
Interosseous, common.	Ulnar.	Interosseous membrane and deep muscles of the forearm.	Anterior and posterior interosseous.
Interosseous, dorsal (3).	Metatarsal.	Contiguous sides of 2d and 3d, and 4th and 5th toes.	
Interosseous, dorsal.	Posterior radial carpal.	Dorsal aspect of fingers.	
Interosseous, palmar (3).	Deep palmar arch.	Interosseous muscles, bones, and 2d, 3d, and 4th lumbricales.	
Interosseous, plantar.	Plantar arch.	Toes.	
Interosseous, posterior (forearm).	Common interosseous.	Muscles, back of forearm.	Posterior interosseous recurrent.
Interosseous, posterior, recurrent. See *Radial recurrent, posterior.*			
Interosseous, recurrent.	Interosseous, posterior.	Elbow-joint.	
Interpeduncular.	Posterior cerebral.	Posterior perforated space and lower part of peduncles.	
Interventricular, anterior.	Left coronary.	Both ventricles and interventricular septum.	
Interventricular, posterior.	Right coronary.	Both ventricles and interventricular septum.	
Intestinal (vasa intestini tenuis), 12 to 16.	Superior mesenteric.	Mesentery.	
Ischiadic. See *Gluteal, inferior.*			
Labial, inferior.	Facial.	Muscles and integuments of lower lip.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Labial, superior.	See *Coronary, superior.*		
Lachrymal (or orbital).	Middle meningeal.	Orbit.	
Lachrymal.	Nasal.	Lachrymal sac.	
Lachrymal.	Ophthalmic.	Lachrymal gland, muscles of eye and cheek, and upper and lower eyelids.	Recurrent lachrymal, muscular, palpebral, malar, ciliary.
Lachrymal, recurrent.	Lachrymal.	Lachrymal sac.	
Laryngeal, inferior.	Inferior thyroid.	Larynx.	
Laryngeal, inferior (or crico-thyroid).	Superior thyroid.	Crico-thyroid membrane and larynx.	
Laryngeal, internal. See *Laryngeal, superior.*			
Laryngeal, superior.	Superior thyroid.	Intrinsic muscles and mucous membrane of larynx.	
Lenticular.	Middle cerebral.	Lenticular nucleus.	
Lenticulo-optic.	Middle cerebral.	Posterior part internal capsule and anterior part of optic thalamus.	
Lenticulo-striate.	Middle cerebral.	Lenticular and caudate nuclei.	
Lenticulo-thalamic.	Posterior cerebral.	Posterior extremity of lenticular nucleus and the thalamus.	
Ligamentous.	Ovarian.	Round ligament.	
Lingual. See *Gustatory.*			
Lingual.	External carotid.	Tongue.	Hyoid, dorsalis linguæ, sublingual, ranine.
Lingual.	Mandibular.	Lingual nerve.	
Lumbar (4 pairs).	Abdominal aorta.	Bodies and ligaments of vertebræ, lumbar muscles, and capsules of kidneys.	Vertebral, muscular, dorsal, renal.
Lumbar.	Ilio-lumbar.	Psoas muscle, quadratus lumborum, and spinal canal.	
Malar.	Lachrymal.	Temporal fossa.	
Malleolar, external.	Anterior tibial.	External portion of ankle.	
Malleolar, internal.	Anterior tibial.	Internal portion of ankle.	
Malleolar, internal.	Posterior tibial.	Internal malleolus.	
Mammary, external. See *Thoracic, long.*			
Mammary glandular.	Dorsal branch of aortic intercostal.	Mammary gland.	
Mammary, internal.	Subclavian.	Structures of thorax.	Superior phrenic, mediastinal (or thymic), pericardiac, sternal, anterior intercostals, perforating, lateral infracostal, superior epigastric, internal mammary.
Mandibular.	Internal maxillary.	Teeth of lower jaw.	Incisive and mental.
Marginal.	Left coronary.	Walls of ventricle.	
Marginal.	Right coronary.	Right ventricle.	
Margino-frontal.	Anterior cerebral.	Marginal and frontal convolutions.	
Masseteric.	Facial.	Masseter.	
Masseteric.	Internal maxillary.	Masseter.	
Masseteric.	Temporal.	Masseter.	
Mastoid.	Occipital.	Dura, diploë, walls of lateral sinus, mastoid cells.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Mastoid.	Posterior auricular.	Occipito-frontalis muscle (posterior belly).	
Mastoid.	Stylo-mastoid.	Mastoid cells and mastoid antrum.	
Mastoid, middle. See *Sterno-mastoid.*			
Maxillary, external. See *Facial.*			
Maxillary, inferior. See *Dental, inferior.*			
Maxillary, internal (maxillary group).	External carotid.	Structures indicated by names of branches.	Deep auricular, tympanic, middle meningeal, mandibular, small meningeal.
Maxillary, internal (pterygoid group).	External carotid.	Structures indicated by names of branches.	Masseteric, posterior deep temporal, internal and external pterygoid, buccal, anterior deep temporal.
Maxillary, internal (spheno-maxillary group).	External carotid.	Structures indicated by names of branches.	Posterior dental (or alveolar), infraorbital, posterior (or descending) palatine, vidian, pterygo-palatine, nasal, or spheno-palatine.
Meatal.	Stylo-mastoid.	External auditory meatus.	
Median (arteria comes nervi mediani).	Anterior interosseous.	Median nerve and superficial palmar arch.	
Median anterior (of spinal cord).	Formed by union of the anterior spinal arteries.	Spinal cord.	
Mediastinal, anterior (or thymic).	Internal mammary.	Connective tissue, fat and lymphatics, in superior and anterior mediastina, thymus gland.	
Mediastinal, posterior (several).	Thoracic aorta.	Glands and loose areolar tissue in mediastinum.	
Medicerebellar.	Cerebellar, anterior, inferior.	Middle cerebellar crus.	
Medicerebral. See *Cerebral, middle.*			
Medichoroid.	See *Choroid, posterior.*		
Medidural. See *Meningeal, middle.*			
Medifrontal.	Anterior cerebral.	Callosal convolution and paracentral lobule.	
Medioptic (or median quadrigeminal).	Posterior cerebral.	Crus cerebri and optic lobes.	
Medullary.	Peroneal.	Fibula.	
Medullary.	Posterior tibial.	Tibia.	Ascending and descending.
Medullary.	Renal.	Malpighian pyramids.	
Meningeal.	Ascending pharyngeal.	Membranes of brain.	
Meningeal.	Posterior ethmoidal.	Dura mater.	
Meningeal, anterior.	Internal carotid.	Dura mater.	
Meningeal, inferior. See *Meningeal (of ascending pharyngeal).*			
Meningeal, middle or great.	Internal maxillary.	Cranium and dura mater.	Anterior and posterior.
Meningeal, posterior.	Occipital.	Dura mater.	
Meningeal, posterior.	Vertebral.	Dura mater.	
Meningeal, small.	Internal maxillary.	Gasserian ganglion, walls of cavernous sinus and dura mater.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Mental.	Facial.	Muscles of chin and lower lip.	
Mental.	Mandibular.	Muscles of chin and under lip.	Lingual and mylo-hyoidean.
Mesenteric accedens, præcipua. See *Mesenteric, superior.*			
Mesenteric, inferior.	Abdominal aorta.	Lower half of large intestine.	Left colic, sigmoid, superior hemorrhoidal.
Mesenteric, middle.	Common iliac (occasional branch).	Transverse and descending colon.	
Mesenteric, superior.	Abdominal aorta.	Whole of small intestine and upper half of large.	Inferior pancreatico-duodenal, middle right and ilio-colic, vasa intestina tenuis.
Meso-lobar. See *Cerebral, anterior.*			
Metacarpal (1st dorsal interosseous).	Radial.	Sides of fingers on dorsal aspect.	
Metatarsal.	Dorsalis pedis.	Toes.	Third dorsal interosseous.
Middle (of corpora quadrigemina).	Posterior cerebral.	Space between the corpora quadrigemina.	
Muscular, deep. See *Femoral, deep.*			
Musculo-phrenic.	Internal mammary.	Diaphragm, fifth or sixth lower intercostal spaces, oblique muscles of abdomen.	Phrenic, anterior intercostals, muscular.
Mylo-hyoidean.	Mental.	Mylo-hyoid muscle.	
Nasal.	Infraorbital.	Nose.	
Nasal.	Ophthalmic.	Lachrymal sac and integuments of nose.	Lachrymal, and transverse nasal.
Nasal.	Spheno-palatine.	Turbinated bones, lateral walls of nose, ethmoidal and frontal sinuses and lining membrane of antrum.	
Nasal, anterior.	Anterior ethmoidal.	Nose.	
Nasal, lateral.	Facial.	Integuments, muscles and cartilage of nose.	
Nasal, middle. See *Nasal, anterior.*			
Nasal, transverse.	Nasal.	Integuments of nose.	
Naso-palatine. See *Spheno-palatine.*			
Navel. See *Umbilical.*			
Neubauer's.	See *Thyroid, deep.*		
Nutrient.	Brachial.	Humerus.	
Nutrient.	Interosseous, anterior.	Radius.	
Nutrient.	Interosseous, anterior.	Ulna.	
Nutrient.	Middle perforating branch of profunda femoris.	Femur.	
Nutrient.	Obturator.	Ilium.	
Nutrient (of peroneal). See *Medullary.*			
Nutrient.	Posterior tibial.	Tibia.	
Nutrient.	Suprascapular.	Clavicle.	
Obturator.	Anterior division, internal iliac.	Pelvis and thigh.	Iliac (or nutrient), vesical, pubic, external and internal pelvic
Obturator, external.	Obturator.	Muscles about obturator foramen.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Obturator, internal.	Obturator.	Muscles about obturator foramen.	
Occipital.	Fourth branch of external carotid.	Muscles of neck, and scalp.	Sterno-mastoid, posterior meningeal, auricular, mastoid, princeps cervicis, communicating, muscular, terminal.
Occipito-meningeal.	Vertebral.	Dura mater.	
Omental (or epiploic).	Hepatic.	Omentum.	
Omphalo-mesenteric.	Primitive aorta.	Subsequently becomes the umbilical.	
Ophthalmic.	Internal carotid.	The eye, adjacent structures, portion of face.	Lachrymal, supraorbital, central artery of retina, muscular, ciliary, posterior and anterior ethmoidal, palpebral, frontal, nasal.
Optic, internal and anterior.	Posterior communicating.	Optic thalamus.	
Optic, posterior, internal.	Posterior communicating or posterior cerebral.	Optic thalamus.	
Orbital. See *Lachrymal.*			
Orbital (three or four).	Anterior cerebral.	First frontal convolution and olfactory bulb.	
Orbital.	Infraorbital.	Fat of orbit; inferior rectus and inferior oblique muscles.	
Orbital.	Temporal.	Orbicularis palpebrarum and orbit.	
Orbito-frontal.	Middle cerebral.	Inferior frontal convolutions.	
Ovarian.	Abdominal aorta.	Ovary, ureter, fallopian tube, uterus.	Ureteral, fallopian, uterine, ligamentous.
Palatine.	Ascending pharyngeal.	Soft palate and its muscles.	
Palatine, ascending (or inferior).	First branch of facial.	Upper part of pharynx, palate and tonsils.	Palatine, tonsillar.
Palatine, descending.	Internal maxillary.	To soft and hard palate.	Anterior and posterior.
Palatine, inferior. See *Palatine, ascending.*			
Palatine, posterior or descending.	Internal maxillary.	Hard palate.	Anterior and posterior.
Palatine, superior. See *Palatine descending.*			
Palato-maxillary.	See *Palatine, descending.*		
Palmar, digital. See *Digital, palmar.*			
Palmar, interosseous. See *Interosseous, palmar.*			
Palmar arch, deep.	Radial and communicating of ulna.	Palm and fingers.	Princeps pollicis, radialis indicis, palmar interosseous (3), recurrent carpal, posterior perforating.
Palmar arch, superficial.	Ulnar and superficialis volæ.	Palm and fingers.	Digital (4), muscular, cutaneous.
Palpebral.	Lachyrmal.	Eye-lids and conjunctivæ.	
Palpebral.	Supraorbital.	Upper eye-lid.	
Palpebral, external.	Ophthalmic.	Eye-lid.	
Palpebral, inferior.	Ophthalmic.	Conjunctiva, lachrymal sac, caruncle and lower lid.	
Palpebral, superior.	Ophthalmic.	Upper eye-lid.	
Pancreatic.	Hepatic.	Pancreas.	
Pancreatic.	Splenic.	Pancreas.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Pancreatico-duodenal, inferior.	Superior mesenteric.	Pancreas and duodenum.	
Pancreatico-duodenal, superior.	Gastro-duodenal.	Duodenum and pancreas.	
Parietal.	Middle cerebral.	Inferior and ascending parietal convolutions.	
Parietal, anterior.	Middle cerebral.	Second frontal convolution.	
Parietal, ascending.	Middle cerebral.	Ascending parietal convolution and superior parietal lobule.	
Parieto-sphenoidal.	Middle cerebral.	Inferior parietal lobule, angular gyrus, cortex of sphenoidal lobe.	
Parieto-temporal.	Middle cerebral.	Convolutions around posterior limb of fissure of Sylvius.	
Parotid.	Posterior auricular.	Parotid gland.	
Parotid.	Temporal.	Parotid gland.	
Parvidural. See *Meningeal, small.*			
Pectoral.	Acromio-thoracic.	Pectoral muscles and mammary gland.	
Pectoral.	Anterior circumflex.	Pectoralis major.	
Pedal. See *Dorsal of foot.*			
Peduncular, anterior.	Posterior cerebral.	Internal surface of peduncle.	
Peduncular, external.	Posterior, communicating.	Peduncles of the cerebellum.	
Peduncular, internal.	Posterior cerebral.	Internal surface of peduncle.	
Of the penis, perforating. See *A., of the corpus cavernosum.*			
Perforans stapedis (branch of internal carotid or stylo-mastoid).	Tympanum.	No branches.	
Perforating (or posterior communicating), (3).	Deep palmar arch.	Interosseous spaces.	
Perforating.	Middle meningeal.	Sphenoid.	
Perforating.	Profunda femoris.	Hamstring muscles.	
Perforating.	Spheno-palatine.	Ethmoidal cells.	Anastomoses with ethmoidal arteries.
Perforating.	Submental.	Mylo-hyoid.	
Perforating, anterior (5 or 6).	Internal mammary.	Pectoralis major and integument, and mammary gland.	
Perforating, posterior.	External plantar.	Dorsal interosseous muscles.	
Pericardiac.	Internal mammary.	Anterior surface of pericardium.	
Pericardiac.	Right and left phrenic.	Pericardium.	
Pericardiac.	Thoracic aorta.	Pericardium.	
Pericephalic. See *Carotid, external.*			
Perineal, superficial.	Pudic.	Muscles of perineum and integuments of scrotum.	Transverse perineal.
Perineal, transverse.	Perineal, superficial.	Muscles and integuments of perineum.	
Perirenal (or capsular).	Renal.	Capsule of kidney and perirenal fat.	
Peritoneal.	Iliac, common.	Peritoneum.	
Peritoneal.	Superior epigastric.	Peritoneum.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Peroneal.	Posterior tibial.	Muscles and integument of leg and foot.	Anterior peroneal, muscular, medullary, communicating, cutaneous, external calcaneum, terminal (or posterior peroneal).
Peroneal, anterior.	Peroneal.	Peroneus tertius and inferior tibio-fibular joint.	
Peroneal, posterior.	Peroneal.	External malleolus and heel.	
Petrosal.	Middle meningeal.	Tympanum.	
Pharyngeal.	Pterygo-palatine.	Roof of pharynx.	
Pharyngeal.	Spheno-palatine.	Roof and contiguous portions of pharynx.	
Pharyngeal.	Vidian.	Roof of pharynx.	
Pharyngeal, ascending.	First branch external carotid.	Pharynx, soft palate, tympanum, posterior part of neck, and membranes of brain.	Prevertebral, pharyngeal, palatine, tympanic, meningeal.
Pharyngeal, descending.	Spheno-palatine.	Roof of mouth and of pharynx.	
Pharyngeal, inferior. See *Pharyngeal, ascending.*			
Pharyngeal, superior See *Pterygo-palatine.*			
Phrenic.	Ascending cervical.	Phrenic nerve.	
Phrenic.	Musculo-phrenic.	Diaphragm.	
Phrenic.	Superior epigastric.	Diaphragm.	
Phrenic, inferior, left.	Aorta, abdominal.	Diaphragm and structures indicated by names of branches.	Esophageal, left superior suprarenal, splenic, pericardiac, terminal.
Phrenic, inferior right.	Aorta, abdominal.	Diaphragm and structures indicated by names of branches.	Right superior suprarenal, caval, hepatic, pericardiac, and terminal.
Phrenic, superior (or comes nervi phrenici).	Internal mammary.	Pleura, pericardium and diaphragm.	
Pituitary.	Internal carotid.	Pituitary body.	
Plantar arch.	External plantar artery.	Anterior part of foot and toes.	Articular and plantar digital.
Plantar, deep.	Metatarsal.	Assists in formation of plantar arch.	
Plantar, digital (4).	Plantar arch.	Third, fourth, and fifth toes, and outer side of second.	
Plantar, external.	External, tibial.	Sole and toes.	Muscular, calcaneal, cutaneous, anastomotic, posterior perforating, plantar arch.
Plantar, internal.	Posterior tibial.	Inner side of foot.	Muscular, cutaneous, articular, anastomotic, superficial digital.
Plantar, interosseous. See *Interosseous, plantar.*			
Plantar, metatarsal. See *Interosseous, plantar.*			
Plantar, pollicar.	Anterior tibial, or external plantar.	Great toe.	
Pleural.	Intercostal.	Pleura.	
Pontal.	Basilar.	Pons.	
Popliteal.	Continuation of femoral.	Knee and leg.	Cutaneous, muscular (superior and inferior) or sural, articular, superior and inferior external, superior and inferior internal and azygos, terminal (anterior and posterior tibial).

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Post-cerebellar. See *Cerebellar, posterior.*			
Post-cerebral. See *Cerebral, posterior.*			
Post-choroid. See *Choroid Posterior.*			
Post-communicant. See *Communicating, posterior.*			
Post-dural. See *Meningeal, posterior.*			
Postero-lateral.	Posterior cerebral.	Hind part of optic thalamus, crus and optic lobes.	
Postero-median.	Posterior central.	Inner part of thalamus, neighboring wall of third ventricle.	
Post-frontal.	Anterior meningeal.	Precuneus and part of occipital fissure.	
Post-temporal.	Posterior cerebral.	Basal surface of occipital lobe.	
Post-thalamic.	Posterior cerebral.	Thalamus.	
Precerebellar. See *Cerebellar, superior.*			
Precerebral. See *Cerebral, anterior.*			
Prechoroid. See *Choroid, anterior.*			
Precommunicant. See *Communicating, anterior.*			
Predural. See *Meningeal, anterior.*			
Prefrontal.	Anterior cerebral.	Mesal and convex surfaces of superfrontal and part of medi-frontal convolutions.	
Preoptic (or anterior quadrigeminal).	Posterior cerebral.	Optic lobe.	
Preperforant.	Anterior cerebral.	Caudate nucleus.	
Pretemporal.	Posterior cerebral.	Uncinate and basal surface of temporal lobe.	
Prethalamic.	Posterior communicating.	Thalamus.	
Preventricular (2)	Right and left coronaries.	Walls of ventricle, heart.	
Primitive, See *Aorta, primitive.*			
Princeps cervicis.	Occipital.	Muscles of neck.	Superficial and deep.
Princeps hallucis.	Communicating (of dorsalis pedis).	First and second toes.	
Princeps pollicis.	Radial.	Thumb.	
Profunda (or deep femoral).	Femoral.	Thigh.	External and internal circumflex, three perforating.
Profunda, inferior.	Brachial.	Triceps, elbow-joint	
Profunda, superior.	Brachial.	Humerus, muscles and skin of arm.	Ascending, cutaneous, articular, nutrient, muscular.
Pterygoid, external.	Internal maxillary.	External pterygoid muscle.	
Pterygoid. internal.	Internal maxillary.	Internal pterygoid muscle.	
Pterygo-palatine (or pterygo-pharyngeal)	Internal maxillary.	Pharynx, Eustachian tubes and sphenoidal cells.	Pharyngeal, Eustachian, sphenoidal.

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Pterygo-pharyngeal. See *Pterygo-palatine.*			
Pubic.	Epigastric, deep.	Pubic region.	
Pubic.	Obturator.	Pubic region.	
Pudic, accessory.	Inferior vesical.	When large, supplies the parts normally supplied by the internal pudic, prostate.	
Pudic, external, deep, (or inferior).	Femoral, common.	Skin of scrotum (or labia in female).	
Pudic, external, superficial (or superior).	Common, femoral.	Integument above pubes and external genitalia.	
Pudic, internal.	Iliac, anterior division of internal branch.	Generative organs.	External (or inferior) hemorrhoidal, superficial perineal, muscular, arteries of bulb, crus, and dorsal of penis.
Pulmonary.	Right ventricle.	Lungs.	Right and left.
Pyloric, inferior.	Gastro-duodenal or right gastro-epiploic.	Pyloric end of stomach.	
Pyloric, superior.	Hepatic.	Pyloric end of stomach.	
Quadrate.	Anterior cerebral.	Quadrate convolution of brain.	
Quadrigeminal, anterior. See *Preoptic.*			
Quadrigeminal, median. See *Medioptic.*			
Radial.	Brachial.	Forearm, wrist, hand.	Radial recurrent, muscular, anterior and posterior radial carpal, superficial volar, metacarpal, dorsalis pollicis, dorsalis indicis, deep palmar arch.
Radial carpal, anterior and posterior.	Radial.	Wrist and carpal joints.	
Radial, profunda.	Superior profunda of arm.	Back of elbow.	
Radial recurrent, anterior.	Radial.	Elbow-joint and muscles of forearm.	
Radial recurrent, posterior.	Posterior interosseous (forearm).	Elbow.	
Radialis indicis.	Radial.	Index finger.	
Radio-carpal, palmar transverse.	See *Radial carpal, anterior.*		
Radio-palmar. See *Volar, superficial.*			
Ranine.	Lingual.	Tongue and mucous membrane of mouth.	
Rectal.	Lateral sacral.	Rectum.	
Rectal.	Middle sacral.	Rectum.	
Rectal, middle. See *Hemorrhoidal, middle.*			
Recurrent.	Deep palmar arch.	Carpal joints.	
Recurrent, posterior interosseous.	Posterior interosseous.	Elbow.	
Recurrent, radial. See *Radial, recurrent.*			
Recurrent, tibial, anterior and posterior.	Anterior tibial.	Popliteus and ligaments of knee.	
Recurrent, ulnar, anterior and posterior.	Ulna.	Elbow-joint and contiguous structures.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Renal.	Abdominal aorta.	Kidney.	Inferior suprarenal, capsular (or perirenal), ureteral.
Rhachidian. See *Spinal.*			
Sacra media. See *Sacral, middle.*			
Sacral, lateral (1 or 2).	Internal iliac, posterior division.	Structures about sacrum.	Spinal, rectal, muscular.
Sacral, middle.	Continuation of aorta.	Sacrum and coccyx.	
Saphenous (occasional branch of common femoral).	Accompanies saphenous vein.		
Saphenous, small.	Popliteal (occasional).	External malleolus.	
Scapular, dorsal.	Subscapular.	Muscles of infraspinous fossa.	Infrascapular.
Scapular, external. See *Acromial.*			
Scapular, inferior. See *Subscapular.*			
Scapular, internal. See *Subscapular.*			
Scapular, posterior.	Continuation of transverse cervical.	Muscles of scapular region.	Supra-spinous and infra-spinous, subscapular, muscular.
Scapular, superficial. See *Suprascapular.*			
Scapular, superior. See *Suprascapular.*			
Scapular, transverse. See *Suprascapular.*			
Scapulo-humeral. See *Circumflex, posterior*			
Sciatic.	Internal iliac, anterior division.	Pelvic muscles and viscera, and branches.	Coccygeal, inferior gluteal, muscular, anastomotic, articular, cutaneous, comes nervi ischiadici, vesical, rectal, prostatic, etc.
Scrotal, anterior.	Inferior external pudic.	Anterior portion of scrotum.	
Scrotal, posterior.	Internal pudic.	Posterior part of scrotum.	
Septal, ascending.	Spheno-palatine.	Upper part of mucous membrane of nasal septum.	
Sigmoid.	Inferior mesenteric.	Sigmoid flexure.	
Spermatic.	Abdominal aorta.	Scrotum and testis.	Ureteral, cremasteric, epididymal, testicular.
Spermatic, external.	Deep epigastric.	Cremaster muscle, and spermatic cord.	
Sphenoidal.	Middle cerebral.	Sphenoidal lobe, lower part of cortex.	
Sphenoidal.	Pterygo-palatine.	Sphenoidal cells.	
Sphenoidal.	Spheno-palatine.	Sphenoidal cells.	
Spheno-palatine (or naso-palatine).	Internal maxillary.	Pharynx, nose, and sphenoidal cells.	Pharyngeal, sphenoidal, nasal, ascending septal.
Spheno-spinous. See *Meningeal, middle.*			
Spinal.	Ascending cervical.	Spinal canal.	
Spinal.	Intercostals.	Spinal canal and spine.	
Spinal.	Lateral sacral.	Spinal membranes and muscles and skin over sacrum.	
Spinal, anterior.	Vertebral.	Spinal cord.	
Spinal, lateral.	Vertebral.	Vertebræ and spinal canal.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Spinal, posterior.	Vertebral.	Spine.	
Splenic.	Celiac axis.	Spleen, pancreas, part of stomach, omentum.	Small and large pancreatic, left gastro-epiploic, vasa brevia, terminal.
Splenic.	Left phrenic.	Spleen.	
Splenico-pancreatic.	Splenic.	Spleen.	
Stapedic.	Stylo-mastoid.	Stapedius muscle.	
Staphylini.	See *Palatine, posterior.*		
Sternal.	Internal mammary.	Sternum and triangularis sterni.	
Sterno-mastoid.	Occipital.	Sterno-mastoid muscle.	
Sterno-mastoid (or middle mastoid).	Superior thyroid.	Sterno-mastoid, and other muscles of neck.	
Sterno-mastoid, inferior.	Suprascapular.	Sterno-mastoid muscle.	
Stylo-mastoid.	Posterior auricular.	Mastoid cells, tympanic cavity, etc.	Meatal, mastoid, stapedic, tympanic, vestibular, terminal.
Subcerebellar.	Basilar.	Inferior and anterior portion of cerebellum.	
Subclavian.	Right, innominate. Left, arch of aorta.	Neck, thorax, arms, brain, meninges, etc.	Vertebral, thyroid axis, internal mammary, superior intercostal.
Subclavian.	Suprascapular.	Subclavius muscle.	
Subclavian, right. A term sometimes given to the innominate.			
Subcostal (or 12th dorsal).	Thoracic aorta.	Intercostal space.	
Subdural. See *Meningeal (of ascending pharyngeal).*			
Subfrontal.	Anterior cerebral.	Olfactory groove.	
Sublingual.	Lingual.	Sublingual gland, side of tongue, and floor of mouth.	Artery of frenum.
Submaxillary. See *Glandular.*			
Submental.	Facial.	Tissues under jaw.	Muscular, perforating, cutaneous, mental.
Suborbital. See *Infra-orbital.*			
Subsacral. See *Sacral, lateral.*			
Subscapular.	Axillary.	Subscapularis, teres major, latissimus dorsi, serratus magnus, axillary glands.	Dorsal and infrascapular.
Subscapular.	Posterior scapular.	Subscapular fossa.	
Subscapular.	Suprascapular.	Subscapular fossa.	
Super-cerebellar. See *Cerebellar, superior.*			
Supermaxillodental. See *Dental, superior.*			
Superscapular. See *Suprascapular.*			
Supra-acromial.	Suprascapular.	Acromial region.	
Supra-dural.	External carotid.	Meninges.	
Supra-hyoid (or hyoid)	Lingual.	Muscles above hyoid bone.	
Supramaxillary. See *Dental, superior.*			

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Supraorbital.	Ophthalmic.	Orbit, frontal sinuses, diploë and upper eye-lid.	Periosteal, muscular, diploic, trochlear, palpebral.
Supra-renal, inferior.	Renal.	Supra-renal body.	
Supra-renal, middle (or supra-renal).	Aorta.	Supra-renal bodies.	
Supra-renal, superior.	Phrenic.	Supra-renal bodies.	
Suprascapular (or transversalis humeri).	Thyroid axis.	Muscles of shoulder.	Inferior sterno-mastoid, subclavian, nutrient, supra-sternal, acromial, articular, subscapular, supra-spinous and infraspinous.
Supraspinous.	Posterior scapular.	Supraspinous muscles and trapezius.	
Supraspinous.	Suprascapular.	Supraspinatus muscle.	
Suprasternal.	Suprascapular.	Skin of upper part of chest.	
Sural (or muscular).	Popliteal.	Muscles of popliteal space and calf.	
Tarsal, external and internal.	Dorsalis pedis.	Skin and joints, etc., of foot.	
Temporal.	External carotid.	Forehead, parotid gland, masseter, ear.	Parotid, articular, masseteric, anterior auricular, transverse facial, middle, temporal, and anterior and posterior terminal.
Temporal.	Posterior cerebral.	Inferior part of temporal lobe of brain.	
Temporal, deep, anterior.	Internal maxillary.	Anterior part of temporal fossa.	
Temporal, deep, external. See *Temporal, deep, anterior.*			
Temporal, deep, internal.	See *Temporal, deep, posterior.*		
Temporal, deep, posterior.	Internal maxillary, pterygoid portion.	Temporal fossa.	
Temporal, frontal. See *Temporal, anterior.*			
Temporal, middle.	Temporal.	Squamous portion temporal lobe.	
Temporal, posterior.	Superficial temporal.	Side of head and vertex.	
Temporal, superficial.	See *Temporal.*		
Temporo-occipital.	Posterior cerebral.	Cuneus, lingual, convolution and exterior of occipital lobe.	
Termatic.	Anterior communicating.	Cinerea and callosum.	
Testicular.	Spermatic	Testicle.	
Testicular, great. See *Spermatic, internal.*			
Testicular, small. See *Spermatic, external*			
Thalamic, middle.	Posterior communicating.	Optic thalamus.	
Thoracic, acromial (thoracic axis).	Axillary.	Muscles of shoulder, arm, and chest.	Acromial, humeral, pectoral, clavicular.
Thoracic, alar.	Axillary.	Axillary glands.	
Thoracic axis. See *Thoracic, acromial.*			
Thoracic, external. See *Mammary, external.*			
Thoracic, inferior. See *Mammary, external.*			

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Thoracic, internal. See *Mammary, internal.*			
Thoracic, long (external mammary).	Axillary.	Pectoral muscles, serratus magnus, mammary and axillary glands.	
Thoracic, short (or superior).	Axillary.	Intercostal muscles, serratus magnus.	
Thoracic twelfth. See *Subcostal.*			
Thymic.	Internal mammary.	Connective tissue, fat and lymphatics, or mediastinum and thymus.	
Thymic. See *Mediastinal.*			
Thyroid, ascending. See *Thyroid, inferior.*			
Thyroid axis.	Subclavian.	Shoulder, neck, thorax, spine, cord.	Inferior thyroid, suprascapular and transverse cervical.
Thyroid, deep.	Arch of aorta, innominate (occasional branch).	Same as inferior thyroid.	
Thyroid, descending. See *Thyroid, superior.*			
Thyroid, inferior.	Thyroid axis.	Larynx, esophagus and muscles of neck.	Muscular, ascending cervical, esophageal, tracheal and inferior laryngeal.
Thyroid, middle. See *Thyroidea ima.*			
Thyroid, superior.	External carotid.	Omo-hyoid, sterno-hyoid, sterno-thyroid, thyroid gland.	Hyoid, sterno-mastoid, superior laryngeal, crico-thyroid.
Thyroidea ima.	Innominate (usually).	Thyroid body.	
Thyro-laryngeal.	Thyroid superior.	Larynx and thyroid body.	
Tibial, anterior.	Popliteal.	Leg.	Posterior and anterior tibial recurrent, muscular, internal and external malleolar.
Tibial, anterior, recurrent.	Anterior tibial.	Tibialis anticus muscle.	
Tibial, posterior.	Popliteal.	Leg, heel and foot.	Peroneal, muscular, medullary, cutaneous, communicating, malleolar, calcanean, internal and external plantar.
Tibial, profunda (of foot).	Internal plantar, (innermost branch).	Abductor pollicis muscle.	Unites with the plantar pollicar.
Tibial, recurrent, posterior.	Anterior tibial.	Back of knee joint.	Anastomoses with the inferior articular arteries of knee.
Tonsillar.	Ascending palatine.	Tonsil and Eustachian tube.	
Tonsillar.	Facial.	Tonsil and root of tongue.	
Tracheal.	Inferior thyroid.	Trachea.	
Trachelo-muscular. See *Cervical, inferior.*			
Transversalis colli.	Thyroid axis.	Neck and scapular region.	Superficial cervical and posterior scapular.
Transversalis humeri. See *Suprascapular.*			
Transverse.	External circumflex.	Muscles of upper part of thigh.	
Transverse. See *Pontal.*			
Transverse.	Right coronary.	Heart muscle.	

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Transverse humeral. See *Suprascapular.*			
Transverse nasal.	Nasal (of ophthalmic).	Root of nose.	
Transverse perineal.	Superficial perineal.	Muscles and integuments of perineum.	
Tricipital.	Posterior circumflex.	Triceps muscle (of arm).	
Tympanic. See *Glaserian.*			
Tympanic.	Ascending pharyngeal.	Tympanum.	
Tympanic.	Middle meningeal.	Tensor tympani.	
Tympanic.	Stylo-mastoid.	Membrana tympani.	
Tympanic.	Vidian.	Tympanum.	
Tubal.	Ovarian.	Fallopian tube.	
Ulnar.	Brachial.	Forearm, wrist, and hand.	Anterior and posterior ulnar recurrent, common interosseous, muscular, nutrient, anterior and posterior ulnar carpal, palmar arch.
Ulnar carpal, anterior and posterior.	Ulnar.	Carpal region.	
Ulnar, recurrent, anterior and posterior.	Ulnar.	Muscles of arm and elbow-joint.	
Ulno-carpal, anterior.	Ulnar.	Muscles of hand.	
Umbilical.	Hypogastric.	Chorionic villi.	
Uncinate.	Posterior cerebral.	Uncinate convolution.	
Uracheric.	Superior vesical.	Urachus.	
Ureteral.	Ovarian.	Ureter.	
Ureteral.	Renal.	Ureter.	
Ureteral.	Spermatic.	Ureter.	
Ureteric.	Common iliac.	Ureter.	
Ureteric, inferior.	Superior vesical (or uterine).	Ureter and bladder.	
Ureteric, middle.	Of aorta, common iliac, or internal spermatic	Middle part of ureter.	
Ureteric, superior.	Renal.	Upper part of ureter.	
Urethro-bulbar.	See *Perineal, transverse.*		
Uterine.	Internal iliac, anterior branch.	Uterus.	Cervical, vaginal, azygos.
Uterine.	Ovarian.	Uterus.	
Utero-placental.	Uterine.	Gravid uterus and placenta.	
Uveal. See *Ciliary, posterior and short.*			
Vaginal (2 or 3).	Internal iliac, anterior division.	Vagina.	
Vaginal azygos.	Uterine.	Vagina.	
Vasa brevia.	Splenic.	Stomach.	
Vermiform, inferior.	Cerebellar, posterior inferior.	Vermiform process of cerebellum.	
Vermiform, superior.	Superior cerebellar.	Superior vermiform process of cerebellum.	
Vertebral.	Subclavian.	Neck of cerebrum.	Lateral spinal, muscular, anastomotic, posterior meningeal, posterior and anterior spinal, posterior cerebellar.

TABLE OF ARTERIES.—*Continued.*

NAME.	ORIGIN.	DISTRIBUTION.	BRANCHES.
Vertebral, posterior. See *aortæ, primitive.*			
Vesical, inferior.	Internal iliac, anterior division.	Bladder, prostate, seminal vesicles, and vagina (in female).	
Vesical, middle.	Superior vesical.	Bladder.	
Vesical, superior.	Internal iliac, anterior division.	Bladder.	Deferential, uracheric, ureteric, middle vesical (occasionally).
Vesico-prostatic.	Middle hemorrhoidal.	Prostate and seminal vesicles.	
Vesico-vaginal. See *Vaginal.*			
Vestibular.	Internal auditory.	Membranous labyrinth.	
Vestibular.	Stylo-mastoid.	Vestibule and semicircular canals.	
Vidian.	Internal maxillary.	Roof of pharynx, Eustachian tube, and tympanum.	Pharyngeal, Eustachian, tympanic.
Vitelline. See *Omphalo-mesenteric.*			
Volar, superficial.	Radial.	Ball of thumb.	Enters into formation of superficial palmar arch.
Volar, superior. See *Volar, superficial.*			
Xiphoid.	Superior epigastric.	Ensiform cartilage.	
Zygomatico-orbital. See *Orbital (of temporal).*			

Arthromeningitis (*ar-thro-men-in-ji'-tis*) [ἄρθρον, a joint; μήνιγξ, membrane]. Synovitis.

Arthromere (*ar'-thro-mēr*) [ἄρθρον, a joint; μέρος, a part]. In biology, one of the rings or somites characteristic of the articulated invertebrates.

Arthron (*ar'-thron*) [ἄρθρον, a joint]. A joint; especially a movable joint.

Arthronalgia (*ar-thron-al'-je-ah*). See *Arthralgia.*

Arthroncus (*ar-throng'-kus*) [ἄρθρον, a joint; ὄγκος, a swelling]. 1. A cartilaginous body such as occasionally forms within the knee-joint. 2. Swelling of a joint.

Arthropathia (*ar-thro-path'-e-ah*). See *Arthropathy.* **A. Tabidorum.** See *Charcot's Disease.*

Arthropathics (*ar-thro-path'-iks*) [ἄρθρον, a joint; πάθος, disease]. Disease of the joints.

Arthropathy (*ar-throp'-a-the*) [ἄρθρον, a joint; πάθος, disease]. 1. Any joint disease. 2. A peculiar disease of the joints similar to rheumatoid arthritis, but, according to Charcot, a distinct disease. It belongs to the prodromal stage of tabes, rapidly destroys the joint, is painless, without fever or inflammation, prefers the large joints, and is connected with hydrarthrosis and swelling of the joints.

Arthrophlogosis (*ar-thro-flo-go'-sis*) [ἄρθρον, joint; φλέγειν, to burn]. Inflammation of a joint.

Arthrophragm (*ar'-thro-fram*) [ἄρθρον, a joint; φράγμα, a fence]. Partitions between the articulations of arthropods.

Arthroplasty (*ar'-thro-plas-te*) [ἄρθρον, a joint; πλάσσειν, to form]. The making of an artificial joint.

Arthropleure (*ar'-thro-plūr*) [ἄρθρον, a joint; πλευρά, the side]. One of the pleurites or lateral pieces composing a somite of an arthropod.

Arthropodous (*ar-throp'-o-dus*) [ἄρθρον, a joint; πούς, a foot]. In biology, having jointed legs.

Arthropyosis (*ar-thro-pi-o'-sis*) [ἄρθρον, a joint; πύωσις, suppuration]. Pus-formation in a joint.

Arthrosia (*ar-thro'-ze-ah*) [ἄρθρον, a joint]. Painful inflammatory or other affection of a joint.

Arthrosis (*ar-thro'-sis*) [ἀρθρόειν, to fasten by a joint]. Articulation or jointing.

Arthrospore (*ar'-thro-spōr*) [ἄρθρον, a joint; σπόρος, a seed]. In biology, a spore formed by fission, as opposed to an *endospore.*

Arthrosterigma (*ar-thro-ster-ig'-mah*) [ἄρθρον, a joint; στήριγμα, a support: *pl.*, *Arthrosterigmata*]. In biology, a jointed sterigma, as in many lichens.

Arthrostome (*ar'-thro-stōm*) [ἄρθρον, a joint; στόμα, a mouth]. L. Agassiz's name for the mouth of articulates. Compare *Actinostome.*

Arthrosyrinx (*ar-thro-sir'-ingks*) [ἄρθρον, a joint; σῦριγξ, a pipe]. A fistulous opening into a joint.

Arthrotome (*ar'-thro-tōm*) [ἄρθρον, joint; τομός, a cutting]. A stout knife used in the surgery of the joints.

Arthrotomy (*ar-throt'-o-me*) [ἄρθρον, a joint; τέμνειν, to cut]. Incision of a joint.

Arthrous (*ar'-thrus*) [ἄρθρον, a joint]. Pertaining to a joint or joints; jointed.

Arthroxesis (*ar-throks'-es-is*) [ἄρθρον, joint; ξέσις, a scraping]. The surgical treatment of an articular surface by scraping.

Artiad (*ar'-te-ad*) [ἄρτιος, even]. In chemistry, a term used to designate atoms having an even quantivalence, as oxygen, which is bivalent, iron quadrivalent, and sulphur hexivalent.

Articular (*ar-tik'-u-lar*) [*articularis*, of the joints]. Pertaining to an articulation or joint.

Articulate (*ar-tik'-u-lāt*) [*articulare* to divide in joints]. Divided into joints, distinct. **A. Speech,** the communication of ideas by spoken words.

Articulation (*ar-tik-u-la'-shun*) [*articulus*, a joint]. 1. A joint or arthrosis; a connection between two or more bones, whether allowing movement between them or not. The articulations are divided into: (1) *Synarthroses*, immovable, subdivided into *schindyleses*, or grooved joints, *gomphoses*, in sockets, as the teeth, and *suturæ*, as in the bones of the skull; (2) *Diarthroses*, or movable joints, subdivided into the *arthrodia*, or gliding joints, the *ginglymus*, or hinge-like, the *enarthroses*, or ball-and-socket joints; (3) *Amphiarthroses*, or those of a mixed type. 2. The enunciation of spoken speech. **A. of Artificial Teeth,** the adjustment and arrangement of one or more artificial teeth, so that it, or they, when placed in the mouth, shall sustain the same relationship to the organs with which they antagonize, when the jaws are closed, as the natural teeth did previous to their loss. **A., Confluent,** the clipping of words, or running together of syllables—a symptom of certain cerebral diseases. **A. of Models.** See *Models for Artificial Teeth*, *Antagonizing*. **A. Positions.** See *Consonants*. **A. of the Teeth.** See *Teeth, Articulation of*.

Articulator (*ar-tik'-u-la-tor*) [*articulus*, a joint]. An instrument used in mechanical dentistry for holding the models in position while the artificial teeth are being arranged and antagonized upon the plates.

Articuli (*ar-tik'-u-li*). See *Lenticula*.

Articulo mortis, In (*ar-tik'-u-lo mor'-tis*) [L.]. At the moment of death. In the act of dying.

Artifact (*ar'-te-fact*) [*ars*, art; *facere*, to make]. In microscopy and histology, a structure that has been produced by mechanical, chemical, or other artificial means; a structure or tissue that has been changed from its natural state.

Artificial (*ar-te-fish'-al*) [*artificialis*]. Made or imitated by art. **A. Anus,** an opening in the abdomen to give exit to the feces; an opening made in case of *imperforate anus*. **A. Crowns,** porcelain crowns of teeth designed to be united to the roots of natural teeth; what is commonly called by the misnomer "pivot tooth." **A. Dentine,** a preparation composed of pure gutta-percha, while in a softened state, mixed with mineral substances, and used for temporary fillings. See *Temporary Stopping*. **A. Eye,** a film of glass, celluloid, rubber, etc., made in imitation of the front part of the globe of the eye and worn in the socket or over a blind eye for cosmetic reasons. **A. Feeding,** the feeding of an infant by other means than mother's milk. Various mixtures and foods are to be had, such as *Meigs's*, *Rotch's*, *Biedert's Mixtures*, etc., *q. v.* See *Table at end of this article.* **A. Joint,** or *false joint*, the non-united ends of a broken bone. **A. Leech.** See *Leech*. **A. Palate,** a mechanical contrivance for supplying the loss of the whole or a portion of the hard or soft palate, or both. **A. Pupil,** removal of a piece of the iris (*iridectomy*, *iridodialysis*, etc.), to allow the light to pass through the opening. **A. Respiration,** the aëration of the blood by artificial means. A method of inducing the normal function of respiration when from any cause it is temporarily in abeyance, as in asphyxia neonatorum, drowning, etc. *Bain's Method*, a modification of Sylvester's method, the axilla itself being seized so that the traction is made directly upon the pectoral muscles. *Byrd's (H.L.) Method;* the physician's hands are placed under the middle portion of the child's back with their ulnar borders in contact and at right angles to the spine. With the thumbs extended, the two extremities of the trunk are carried forward by gentle but firm pressure, so that they form an angle of 45 degrees with each other in the diaphragmatic region. Then the angle is reversed by carrying backward the shoulders and the nates. *Dew's Method;* the infant is grasped in the left hand, allowing the neck to rest between the thumb and forefinger, the head falling far over backward. The upper portion of the back and scapulæ rest in the palm of the hand, the other three fingers being inserted in the axilla of the babe's left arm, raising it upward and outward. The right hand grasps the babe's knees, and the lower portion of the body is depressed to favor inspiration. The movement is reversed to favor expiration, the head, shoulders, and chest being brought forward and the thighs pressed upon the abdomen. *Forest's Method;* the child is placed on its face and quick, violent pressure is made on the back; then it is placed in a pail of hot water, and the hands carried upward until the child is suspended by its arms, and mouth-to-mouth insufflation is practised; the arms are then lowered and the body doubled forward; these movements are repeated at the rate of 40 per minute. *Hall's Method;* by turning the body alternately upon the side or face to compress the chest, and then upon the back to allow the lungs to expand. *Howard's Method;* by pressure upon the lower ribs every few seconds. *Pacini's Method;* for resuscitating asphyxiated infants. The child lying on its back, the operator stands at its head, and grasps the axillæ, pulling the shoulders forward and upward to compress the thorax, and allowing them to fall in order to expand the chest. *Satterthwaite's Method;* pressure upon the abdomen alternating with relaxation to allow descent of the diaphragm. *Schræder's Method;* the babe while in a bath is supported by the operator on the back, its head, arms, and pelvis being allowed to fall backward; a forceful expiration is then effected by bending up the babe over its belly, thereby compressing the thorax. *Schultze's Method:* the child is seized from behind with both hands, by the shoulders, in such a way that the right index finger of the operator is in the right axilla of the child from behind forward, and the left index finger in the left axilla, the thumbs hanging loosely over the clavicles. The other three fingers hang diagonally downward along the back of the thorax. The operator stands with his feet apart and holds the child as above, practically hanging on the index fingers in the first position, with the feet downward, the whole weight resting on the index fingers in the axillæ, the head being supported by the ulnar borders of the hands. This is the first inspiratory position. At once the operator swings the child gently forward and upward. When the operator's hands are somewhat above the horizontal the child is moved gently, so that the lower end of the body falls forward toward its head. The body is not flung over, but moved gently until the lower end rests on the chest. In this position the chest and upper end of the abdomen are compressed tightly. The child's thorax rests on the tips of the thumbs of the operator. As a result of this forcible expiration the fluids usually pour out of the nose and mouth of the infant. The child is allowed to rest in this position (the first expiratory position) about one or two seconds. The operator gradually lowers his arms, the child's body bends back, and he again holds the infant hanging on his index fingers with its feet downward; this is the second inspiratory position. These movements are repeated 15 to 20 times in the minute. *Sylvester's Method*, chiefly by movements of the arms. This method is valueless in asphyxia neonatorum, owing to non-development of the pectoral muscles. **A. Urticaria,** a condition much resembling that seen in the *autographic skin q. v.* **A. Vitreous.** See *Evisceration*.

ARTIFICIAL FEEDING OF INFANTS.

TABLE OF QUANTITY REQUIRED.

AGE.	INTERVAL.	NUMBER OF FEEDINGS IN 24 HOURS.	AMOUNT OF FOOD AT EACH FEEDING.	TOTAL AMOUNT IN 24 HOURS.
1st week, ...	2 hours.	10	1 oz.	10 ozs.
2d to 4th week, . . .	2 "	9	1½ ozs.	13½"
2d to 3d month, . .	3 "	6	3 "	18 "
3d to 4th month, . .	3 "	6	4 "	24 "
4th to 5th month, . .	3 "	6	4–4½ "	24–27 "
6th month, ...	3 "	6	5 "	30 "
8th month, ...	3 "	6	6 "	36 "
10th month, ...	3 "	5	8 "	40 "

Artus (*ar'-tus*) [L.: *pl.*, *Artus*]. A joint; a limb; the joints collectively.

Aryepiglottic (*ar-e-ep-e-glot'-ik*). Same as *Arytenoepiglottic*.

Arytenoepiglottic (*ar-i'-ten-o-ep-e-glot'-ik*) [ἀρύταινα, a pitcher; εἶδος, likeness; ἐπί, upon; γλωττίς, glottis]. Relating to an arytenoid cartilage and to the epiglottis; as the aryteno-epiglottic fold (or folds), consisting of a fold of mucous membrane that extends from either arytenoid cartilage to the epiglottis.

Arytenoid (*ar-i-te'-noid*) [ἀρύταινα, a pitcher; εἶδος, likeness]. Resembling the mouth of a pitcher. **A. cartilages,** two cartilages of the larynx regulating, by the means of the attached muscles, the tension of the vocal cords. **A. Glands,** muciparous glands found in large numbers along the posterior margin of the aryteno-epiglottidean fold in front of the arytenoid cartilages. **A. Muscle,** arises from the posterior surface of one arytenoid cartilage and is inserted into the corresponding parts of the other. It is composed of three planes of fibers, two *oblique* and one *transverse*. It draws the arytenoid cartilages together.

Arythmia (*ar-ith'-me-ah*). See *Arrhythmia*.

Arythmic (*ar-ith'-mik*). See *Arrhythmic*

Asa (*a'-sah*) [Pers., *āzā*, mastic]. A gum. **A. dulcis,** benzoin; also the drug called *laser*.

Asafetida (*as-a-fet'-id-ah*) [*asa*, gum; *fœtida*, stinking]. A resinous gum obtained from the root of *Ferula fœtida* and *F. scordosoma*. It is somewhat soluble in alcohol and forms an emulsion with water. Its properties are due to *allyl sulphid*, $C_6H_{10}S$. It is a powerful antispasmodic, stimulant, and expectorant, and is very serviceable in hysteria and bronchial affections. Dose gr. v–xx. **A. tinct.,** strength 20 per cent. Dose ʒss–ij. **A. emplastrum,** asafetida 35, lead plaster 35, galbanum 15, yellow wax 15, alcohol 120 parts. **A., Enema** (B. P.), asafetida and distilled water. **A., Emulsum,** a 4 per cent. emulsion. Dose ℥ss–ʒij. **A. et magnesiæ mist.,** Dewees's carminative, magnesium carb. 5, tinct. asafetida 7, tinct. opii 1, sugar 10, aq. dest. ad 100 parts. Dose ʒss–ℨss. **A. pilulæ,** contain each gr. iij of asafetida and gr. j of soap. Dose j–iv. **A. et Aloes pil.,** have gr. 1½ of each ingredient. **A. pil. comp.** (B. P.). *Galbani pil. comp.* See *Galbanum*. *Ammoniæ fœtidus spt.*, contains asafetida 1½, liq. ammoniæ fort. 2, spirit 20 parts. Dose ʒss–j. Unof.

Asagrea, or **Asagræa** (*as-a-gre'-ah*) [Asa Gray, an American botanist]. A genus of melanthaceous herbs. **A. officinalis.** See *Cebadilla*.

Asak (*as'-ak*). See *Saraca indica*.

Asaphatum (*as-af'-at-um*) [Arab.]. An old name for comedones.

Asaphia (*as-af-i'-ah*) [ἀσάφεια, indistinctness]. Indistinctness of utterance, especially that due to cleft palate.

Asaprol (*as'-ap-rol*), $Ca(OH.C_{10}H_6SO_3)_2,3Aq$. Calcium-β-naphthol-α-mono-sulphonate, a substance readily soluble in water and alcohol, and recommended as an antiseptic in 5 per cent. solution. It is also used in acute articular rheumatism in doses of from 15 to 60 grains.

Asarabacca (*as-ar-ab-ak'-ah*) [ἀ priv.; σειρά, a band; *bacca*, a berry]. The plant *Asarum europæum*, an errhin, aperient, and emetic. Unof.

Asarcia (*ah-sar'-se-ah*) [ἀ priv.; σάρξ, flesh]. Emaciation; leanness.

Asarin (*as'-ar-in*). Same as *Asarone*.

Asarkia (*ah-sar'-ke-ah*). See *Asarcia*.

Asarol (*as'-ar-ōl*) [ἄσαρον, asarabacca; *oleum*, oil], $C_{10}H_{18}O$. A camphor-like body derived from asarum.

Asarone (*as'-ar-ōn*) [ἄσαρον, asarabacca], $C_{20}H_{26}O_5$. Asarin. The solid component of the oil from *Asarum europæum*. It forms monoclinic prisms, melting at 61°, and boils at 295°. It has an aromatic taste, and smells like camphor.

Asarum (*as'-ar-um*) [ἄσαρον, asarabacca]. A genus of aristolochiaceous plants. **A. europæum** has diaphorectic, emetic, purgative, and diuretic qualities, but is now little used except in veterinary practice. **A. canadense,** called wild ginger, Canada snakeroot, with other N. American species, are used chiefly in domestic practice. *A. canadense* is a fragrant, aromatic stimulant. Dose of fld. ext. ♏ xv–ʒss. Unof.

Asbestos (*as-bes'-tos*) [ἀσβεστος, unquenchable]. A mineral more or less flexible and fibrous. It is used in mechanical dentistry, mixed with plaster, as a substitute for sand, to form the investment preparatory to soldering. In surgery, it has also a limited use.

Ascariasis (*as-kar-i'-as-is*) [ἀσκαρίζειν, to jump]. The symptoms produced by the presence of ascarides in the gastro-intestinal canal.

Ascaricide (*as-kar'-is-īd*) [*ascaris*, a mite; *cædere*, to kill]. A medicine that kills ascarides.

Ascarides (*as-kar'-id-ēz*). See *Thread-worms*.

Ascaridiasis (*as-kar-id-i'-as-is*) [ἀσκαρίζειν, to jump]. The presence of ascarides in the intestine.

Ascaris (*as'-kar-is*) [ἀσκαρίζειν to jump: *pl.*, *Ascarides*]. A genus of the family *Ascaridæ*. Parasitical worms inhabiting the bodies, and especially the intestines, of most animals. **A. lumbricis,** is found in the ox, hog and man. It inhabits the small intestine, especially of children. **A. mystax,** the round-worm of the cat, and **A. alata** have rarely been found in man. **A. vermicularis,** a synonym of *Oxyuris vermicularis*. See *Parasites, Table of*.

Ascending (*as-end'-ing*) [*ascendere*, to rise]. Taking an upward course (as parts of the aorta, and colon, and as one of the venæ cavæ). **A. Current,** in electricity, one going from the periphery to a nerve-center. **A. Metamorphosis.** Same as *Anabolism*. **A. Paralysis.** See *Paralysis*.

Ascherson's Vesicles. The peculiar small globules formed when oil and an albuminous fluid are agitated together. Formerly thought to be cells.

Ascheturesis (*as-ket-u-re'-sis*) [ἀσχετος, resistless; οὔρησις, urination]. An uncontrollable desire to urinate; irrepressible urination.

Aschistodactylism (*as-kis-to-dak'-til-izm*) [ἀσχιστος, uncloven; δάκτυλος, a finger]. A synonym of *Syndactylism*.

Ascia (*a'-se-ah* or *as'-ke-ah*) [ἀ priv.; σκιά, shadow]. *Fascia spiralis; dolabra currens;* a spiral bandage applied without reverses, each turn of which overlaps the preceding for about a third of its width. *Dolabra repens*, is the same as the preceding, in which, however, the spirals are formed more obliquely, and do not overlap each other, but are separated by a greater or less interval.

Ascidium (*as-id'-e-um*) [ἀσκίδιον, dim. of ἀσκός, a wine-skin]. In biology, a pitcher, or a pitcher-shaped organ, as in the pitcher plant or bladder wort.

Asciferous (*as-if'-er-us*) [ἀσκός, a bladder (spec., a spore case); *ferre*, to bear]. Producing asci.

Ascigerous (*as-ij'-er-us*) [*ascus*, a spore case; *gerere*, to bear]. Ascus-bearing.

Ascites (*as-i'-tēz*) [ἀσκίτης, a kind of dropsy; from ἀσκός, a bag]. An abnormal collection of serous fluid in the peritoneal cavity; dropsy of the peritoneum. It is either local in origin or a part of a general dropsy. The *ascitic fluid* is usually clear, yellow, coagulating on standing, and if renal in origin contains urea. It may be turbid, blood-stained, and contain lymph-particles or shreds. There is a uniform enlargement of the abdomen, fluctuation, percussion-dulness, etc. **A. adiposus.** A milky appearance of ascitic fluid due to the presence in it of numerous cells that have undergone fatty degeneration and solution. It is seen in certain cases of cancer, tuberculosis, or chronic inflammation of the peritoneum. **A. chylosus.** The presence of chyle in a greater or less degree of purity in ascitic fluid. It follows rupture of the chyle duct.

Ascitic, Ascitical (*as-it'-ik, as-it'-ik-al*) [ἀσκίτης, a kind of dropsy]. Pertaining to or affected with ascites.

Asclepiad (*as-kle'-pe-ad*) ['Ασκληπιάδης, a Greek poet]. In ancient Greece, any priest of Asclepias (Æsculapius), of the family or class that claimed descent from that hero or demigod. The Asclepiads were also physicians, at least in some period of their history.

Asclepiadin (*as-kle-pi'-ad-in*) [ἀσκληπιάς]. A bitter glucosid obtainable from various species of *Asclepias*. It is poisonous, with emetic, purgative, and sudorific effects. Unof.

Asclepias (*as-kle'-pe-as*) [ἀσκληπιός]. Pleurisy Root. The root of *Asclepias tuberosa*. A popular remedy in the Southern States for pleurisy. A powerful diaphoretic and a moderate emetic and cathartic. The infusion recommended has a strength of ʒj of the powdered root to ℥ xxxij of water. Dose, a teacupful every 3 or 4 hours. Also, **A. curassavica**, Blood-flower, an herb common to tropical America; astringent, styptic, and anthelmintic against the tapeworm. A popular remedy for checking capillary hemorrhage. Dose of fld. ext. ʒj–ij; of the drug, gr. xx–xl. Unof. Many other species of this genus have active medicinal qualities, at present but little understood. **A., Ext., Fld.**, the fluid extract. Dose ʒ i–ij.

Asclepin (*as-kle'-pin*) [ἀσκληπιός]. 1. A poisonous principle obtainable from asclepiadin by the separation of glucose from the latter. It is a heart paralyzant, with reputed alterative, purgative, and diaphoretic effects. It is offensive to the taste and smell. Unof. 2. The precipitate from a tincture of *Asclepias tuberosa;* alterative, evacuant, tonic, sedative. Dose grs. ij–iv. Unof.

Ascocarp (*as'-ko-karp*) [ἀσκός, a bag; καρπός, fruit]. In biology, the organ that in Ascomycetes and Lichenes produces ascospores.

Ascococcus (*as-ko-kok'-us*) [ἀσκός, a leather bag; κόκκος, a kernel]. A genus of the family of Schizomycetes. The ascococci are microörganisms made up of round or ovoid cells; with elements united in massive colonies, surrounded by tough, thick, gelatinous envelops. **A. Billrothii**, found in putrefied meat; its natural habitat is the air; zymogenic, probably not pathogenic. See *Bacteria, Table of.*

Ascogenous (*as-koj'-en-us*) [ἀσκός, a bag; γενής, producing]. In biology, producing asci.

Ascogonium (*as-ko-go'-ne-um*) [ἀσκός, a bag; γονός, producing]. In biology, the corkscrew-shaped female organ of the mould-fungi. It is formed by several fine branches given off from a mycelium; an archicarp, or, generally, an imperfectly developed carpogonium.

Ascomyceter (*as-ko-mi-se'-ter*) [ἀσκός, a bag; μύκης, mushroom]. In biology, a group of fungi including morchella, helvella, leotia, etc., which have cup-shaped depressions, lacunæ, and sinuosities. Aspergillus, penicillium, and oïdium belong here.

Ascophora (*as-koff'-o-rah*) [ἀσκός, a bag; φερεῖν, to bear]. A genus of fungi. **A. elegans**, a vegetable growth occasionally found in the ear; bread-mould. **A. mucedo**, a microscopic fungus, of which the mould of bread is an example.

Ascophore (*as'-ko-fōr*) [ἀσκός, a bag; φερεῖν, to bear]. The spore-bearing stage, surface, or hyphæ of a fungus.

Ascospore (*as'-ko-spōr*) [ἀσκός, a bag; σπόρος, seed]. In biology a spore produced by or in an ascus.

Ascus (*as'-kus*) [ἀσκός, a bag, or bladder]. In biology, the characteristic spore case of some fungi and lichens, usually consisting of a single terminal cell containing eight spores.

Ascyphous (*as'-if-us*) [ἀ priv.; σκίφος, a cup]. In botany, without *scyphi* or cup-shaped fruiting organs, as some lichens.

Asecretory (*ah-se'-kret-o-re*) [ἀ priv.; *secretus*, separate]. Dry; without secretion.

Asellus (*as-el'-us*) [L.]. An old name for the cod. *Oleum jecinoris aselli*, cod-liver oil.

Asemasia (*as-em-a'-ze-ah*) [ἀ priv.; σημασία, a signaling]. Absence of the power to communicate either by signs or language.

Asemia (*ah-se'-me-ah*) [ἀ priv.; σῆμα, a sign]. Inability to form, express, or understand any sign, token, or symbol of thought or feeling, whether speech, writing or gesture.

Asepsable (*ah-sep'-sa-bl*) [ἀ priv.; σῆψις, putrefaction]. A less correct form of the word Aseptizable.

Asepsin (*ah-sep'-sin*). See *Antisepsin.*

Asepsis (*ah-sep'-sis*) [ἀ priv.; σήπειν, to putrefy]. The condition of non-putrefaction; absence of all septic material or pathogenic microörganisms.

Aseptic (*ah-sep'-tik*) [ἀ priv.; σῆψις, putrefaction]. Free from pathogenic bacteria, or septic matter. The antiseptic treatment of wounds, including aseptic and antiseptic dressings, renders the wound aseptic.

Asepticism (*ah-sep'-tis-izm*) [ἀ priv.; σηπτός, septic]. The doctrine or principles of aseptic surgery.

Asepticity (*ah-sep-tis'-it-e*) [ἀ priv.; σηπτός, septic]. Quality of being aseptic.

Asepticize (*ah-sep'-tis-īz*) [ἀ priv.; σηπτός, septic]. To render aseptic; to free from the power of conveying septic poison.

Aseptin (*ah-sep'-tin*) [ἀ priv.; σηπτός, septic]. A secret preparation containing boric acid, used for preserving articles of food.

Aseptizable (*ah-sep'-tiz-a-bl*) [ἀ priv.; σηπτός, septic]. Susceptible of being rendered aseptic.

Aseptol (*ah-sep'-tol*) [ἀ priv.; σηπτός, septic], $C_6H_6 \cdot SO_4$. Sulphocarbolic acid; sozolic acid. A reddish liquid, with an odor of carbolic acid, recommended as a disinfectant and antiseptic. It is used externally (1 : 1000), and internally in about the same dose as carbolic acid.

Asexual (*ah-seks'-u-al*) [ἀ priv.; *sexus*, sex]. Without sex; non-sexual.

Ash (*ash*) [ME. *asch*]. See *Fraxinus*. **A. manna.** See *Fraxinus*. **A., Poison.** See *Chionanthus*. **A., Prickly.** See *Xanthoxylum*.

Asialia (*as-e-a′-le-ah*) [ἀ priv.; σίαλον, spittle]. Defect or failure of the secretion of saliva.

Asialorrhea (*as-e-al-or-e′-ah*). Same as *Asialia*.

Asiatic (*a-ze-at′-ik*) [Asia]. Pertaining or belonging to Asia. **A. Cholera.** See *Cholera*. **A. Pill,** a method of administering arsenic in skin diseases. The formula is, arsenious acid gr. ij; black pepper, powdered licorice, each gr. xxxij; mucilage q. s. M. et ft. pil. no. xxxij. S. One to be taken t. d. after meals.

Asimina (*as-im-e′-nah*) [L.]. A genus of trees. **A. triloba.** The papaw or pawpaw tree of North America, bearing an edible fruit.

Asiminin (*as-im′-in-in*) [*asimina*]. An alkaloid derived from the seeds of *Asimina triloba*. It has active medicinal properties but is not much used. Unof.

Asitia (*ah-sish′-e-ah*) [ἀ priv.; σῖτος, food]. The want of food. Also a loathing for food.

Asmegmatia (*ah-smeg-ma′-she-ah*) [ἀ priv.; σμῆγμα, an unguent]. Deficiency or lack of smegma.

Asomata (*ah-so′-mat-ah*) [ἀ priv.; σῶμα, body]. A species of omphalositic monster characterized by an absence of the trunk. The head is never well-formed, and the vessels run from it to the placenta in the membranes. Beneath the head is a sac in which rudiments of body organs may be found. This is the rarest form of omphalosites. Also called *Acardiacus acormus*.

Asomia (*ah-so′-me-ah*). See *Acormus*.

Aspalasoma (*as-pal-as-o′-mah*) [ἀσπάλαξ, mole; σῶμα, body]. A variety of single autositic monsters of the species celosoma, in which there is a lateral or median eventration occupying principally the lower portion of the abdomen, with the urinary apparatus, the genital apparatus, and the rectum opening externally by three distinct orifices.

Asparagin (*as-par′-ag-in*) [ἀσπάραγος, asparagus], $C_4H_8N_2O_3.H_2O_3$. An alkaloid isomeric with malamid. It is found in the seeds of many plants, in asparagus, beet root, peas and beans. It forms shining, four-sided, rhombic prisms, readily soluble in hot water, but not in alcohol or ether. It is an amid of aspartic acid, and forms compounds with both acids and bases. It is diuretic and sedative to the circulation. Dose gr. j–vj.

Asparagus (*as-par′-ag us*) [ἀσπάραγος, asparagus]. The green root of *Asparagus officinalis*, a mild diuretic. Dose of fld. ext. ʒss–j. Unof.

Aspartic Acid (*as-par′-tik*). See *Acid*.

Asper-artery (*as′-per-ar′-ter-e*) [*arteria aspera*, rough artery]. The trachea.

Aspergilliform (*as-per-jil′-if-orm*) [*aspergere*, to sprinkle; *forma*, shape]. In biology, shaped like the brush used to sprinkle holy water; as the stigmas of many grasses.

Aspergillus (*as-per-jil′-us*) [*aspergere*, to scatter]. A nominal genus of fungi, probably containing only the conidial forms of *Eurotium*. **A. auricularis,** a fungus found in the wax of the ear. **A. fumigatus,** found in the ear, nose, and lungs. **A. glaucus,** the bluish mould found, *e. g.*, upon dried fruit. **A. mucoroides,** a species found in tuberculous or gangrenous lung tissue.

Aspergillusmycosis (*as-per-jil′-us-mi-ko′-sis*). See *Otomycosis*.

Asperifoliate (*as-per-if-o′-le-āt*) [*asper*, rough; *folium*, a leaf]. With leaves producing a sensation of roughness when handled.

Aspermatia (*ah-sper-ma′-she-ah*), [ἀ priv.; σπέρμα, seed]. Aspermatism.

Aspermatic (*ah-sper-mat′-ik*) [ἀ priv.; σπέρμα, seed]. Affected with or relating to aspermatism.

Aspermatism (*ah-sper′-mat-izm*) [ἀ priv.; σπέρμα, seed]. Non-emission of semen, whether owing to non-secretion or non-ejaculation.

Aspermous (*ah-sper′-mus*) [ἀ priv.; σπέρμα, seed]. Without seed.

Aspersion (*as-per′-zhun*) [*aspersio*, *aspergere*, to sprinkle]. Treatment of disease by sprinkling with a medicinal agent, or by dropping a medicine slowly upon the body or part affected.

Asperula (*as-per′-u-lah*) [L.]. A genus of rubiaceous plants, of which the European woodruff (*A. odorata*) is an example. This plant is a fragrant aromatic, rich in coumarin, and has diaphoretic and astringent qualities. The *Maitrank* or *Maiwein* of the Germans is flavored with this herb. Unof.

Asphalt (*as′-falt*) [ἄσφαλτον, bitumen]. Bitumen (*q. v.*). Asphalt is now scarcely used in medicine, but a varnish prepared with it is employed in making cells for use in microscopy.

Asphyctic (*as-fik′-tik*), or **Asphyctous** (*as-fik′-tus*) [ἀ priv.; σφύξις, pulsation]. Affected with asphyxia.

Asphyxia (*as-fiks′-e-ah*) [ἀ priv.; σφύξις, the pulse]. The effect upon the body of the non-oxygenation of the blood; the suspension of vital phenomena when the lungs are deprived of air. The excess of carbon dioxid in the blood at first stimulates, then paralyzes the respiratory center of the medulla. Artificial respiration is therefore required in cases of sudden asphyxia. Asphyxia is characterized by extreme lividity of the features, and prominence of the eyeballs, with obstruction to respiration. It is the cause of death in suffocation, drowning, obstruction of the larynx, etc. **A. neonatorum,** the inability of new-born infants to begin respiration spontaneously, or to continue it.

Asphyxiant (*as-fiks′-e-ant*) [ἄσφυκτος, pulseless]. 1. Producing asphyxia. 2. An agent capable of producing asphyxia.

Asphyxiate (*as-fiks′-e-at*) [ἀ priv.; σφύξειν, to pulsate]. To produce or cause asphyxia; to suffocate, or to nearly suffocate.

Aspic (*as′-pik*) [*a* and *spic*, lavender spike]. The great lavender, or spike lavender, *Lavandula spica*. Its oil is at present used in veterinary practice and occasionally in liniments. Unof.

Aspidium (*as-pid′-e-um*) [L.: *gen. Aspidii*]. A genus of ferns, known as shield-ferns. There are many recognized species. The rhizome of *Dryopteris filix mas*, and of *D. marginalis* or male fern. Its properties are due to a resin containing filicic acid. It is valuable chiefly as a vermicide against tapeworm. Dose ʒss–ʒss. **A., Oleoresina,** an ethereal extract. Dose ʒss–j. **Ext., filicis Liq.,** (B. P.). Dose ♏xv–ʒj.

Aspidosamin (*as-pid-os′-am-in*) [ἀσπίς, a shield; σπέρμα, a seed]. $C_{22}H_{28}N_2O_2$. A basic principle, from quebracho-bark. Emetic. Unof.

Aspidosperma (*as-pid-o-sper′-mah*) [ἀσπίς, a shield; σπέρμα, seed]. The bark of *Aspidosperma quebracho-blanco*. **A., Ext., Fld.,** an alcoholic preparation. Dose ʒj.

Aspidospermatin (*as-pid-o-sper′-mat-in*) [ἀσπίς, a shield; σπέρμα, seed]. A basic substance, from quebracho bark, said to be isomeric with aspidosamin and to depress the temperature when administered. Unof.

Aspidospermin (*as-pid-o-sper′-min*) [ἀσπίς, shield; σπέρμα, seed], $C_{22}H_{30}N_2O_2$. An alkaloid extracted from *Quebracho*, *q. v.* (*Aspidosperma quebracho*). It has the general effects of quebracho. Unof.

Aspirate (*as′-pir-āt*) [*ad*, to; *spirare*, to breathe]. Any consonant sound that is aspirated or pronounced with a rough breathing. See *Consonants*.

Aspiration (*as-pir-a'-shun*) [*ad*, to; *spirare*, to breathe]. Used as a synonym of inspiration, also of imbibition. The act of using the aspirator. A method of withdrawing the fluids and gases from a wound, organ or cavity. **A. of Cataract Extraction.** See *Extraction of Cataract*, *Suction Method*. **A. Theory (of Weber and Hasner)**, the theory that accounts for the transmission of tears into the nose by suction into the lachrymal sac through the rarefaction of the air in the nose during inspiration.

Aspirator (*as'-pir-a-tor*) [*ad*, to; *spirare*, to breathe]. An instrument for withdrawing the contents of an abscess, tumor, etc., without the admission of air.

Asplenium (*ah-splē'-ne-um*) [*ἀ* priv.; *σπλήν*, spleen; a plant of this name was once thought to destroy the spleen]. A genus of ferns called spleen-worts, or miltwastes. **A. ceterach** and **A. filix-femina** formerly had a great repute as medicines, but are now little used. Unof.

Asporogenic (*ah-spōr-o-jen'-ik*) [*ἀ* priv.; *σπορά*, seed; *γενής*, producing]. Not reproducing by means of spores; not producing spores.

Assafetida (*as-a-fet'-id-ah*). See *Asafetida*.

Assalini's Operation. See *Operations*, *Table of*.

Assault (*as-awlt'*) [*assalire*, to assail]. An attack. **A., Criminal**, in medical jurisprudence, the touching or attempting to touch, on the part of a male, any of the sexual organs (the breasts included) of a female, against her will, even though they be covered by clothing.

Assibilation (*as-ib-il-a'-shun*) [*assibilare*, to whisper to]. The utterance of sounds with a sibilant or hissing quality.

Assideration (*as-id-er-a'-shun*) [*ad*, intensive; *sideratio*, an evil influence]. In forensic medicine, infanticide by immersing in ice-water.

Assimilable (*as-im'-il-a-bl*) [*assimulare*, to make like]. Capable of being assimilated; nutritious.

Assimilation (*as-im-il-a'-shun*) [*assimulare*, to make like]. The process of transforming food into such a nutrient condition that it is taken up by the circulatory system, to form an integral part of the economy; synthetic or constructive metabolism; anabolism. In biology, the formation of carbohydrate from water and carbon dioxid by the agency of chlorophyll. **A., Mental**, the mental reception of impressions and their assignment by the consciousness to their proper place. **A., Primary**, that concerned in the conversion of food into chyle and blood. **A., Secondary**, that relating to the formation of the organized tissues of the body.

Associated (*as-o'-se-a-ted*) [*associatus*, united]. Joined. **A. Antagonist.** See *Antagonist*. **A. Movements**, coincident or consensual movements of other muscles than the leading one, and which by habit or unity of purpose are involuntarily connected with its action. Both eyeballs move alike in reading, though one be a blind eye. Movement of the normal arm will sometimes produce slight motion of the opposite paralyzed arm. Uniformity of innervation is usually the cause of these movements. **A. Paralysis**, a common paralysis of associated muscles.

Assurgent (*as-er'-jent*). See *Ascending*.

Assurin (*as'-u-rin*), $C_{46}H_{94}N_2P_2O_9$. A name given by Thudichum to a complex substance occurring in brain tissue, classed as a di-nitrogenized diphosphatid.

Astacolith (*as-tak'-o-lith*) [*ἀστακος*, a lobster; *λίθος*, a stone]. A concretion obtainable from the stomach of a European craw-fish, *Astacus fluviatilis*, and often gathered from brooks. These are called *Crabs' Eyes*, and *Eye-stones*, *q. v.*

Astasia (*as-ta'-se-ah*) [*ἀ* priv.; *στάσις*, standing]. Motor incoördination for standing. See *Abasia*. **A. Abasia**, a symptom consisting in inability to stand or walk in a normal manner.

Asteatodes (*as-te-at-o'-dēz*) [*ἀ* priv.; *στέαρ*, tallow; *ώδης*, fullness]. Deficient in the secretion of the sebaceous glands.

Asteatosis (*as-te-at-o'-sis*) [*ἀ* priv.; *στέαρ*, tallow; *ώδης*, fullness]. 1. A deficiency or absence of the sebaceous secretion. 2. Any skin disease (as xeroderma) characterized by scantiness or lack of the sebaceous secretion. **A. cutis**, a condition of diminished sebaceous secretion, as the result of which the skin becomes dry, scaly, and often fissured.

Aster (*as'-ter*) [*aster*, a star]. 1. An extensive genus of composite flowered plants, mainly N. American. **A. cordifolius** is a nervine and antispasmodic. **A. puniceus** is a stimulant and diuretic. Unof. 2. See *Karyokinesis*, *Mother-star*, *Dyaster*, *Amphiaster*, and *Cytaster*.

Asterion (*as-te'-re-on*). See *Craniometric Points*.

Asternal (*ah-ster'-nal*) [*ἀ* priv.; *στέρνον*, the breast-bone]. Not connected with the sternum. **A. Ribs**, the five lower pairs, because not joined directly to the sternum. Also called false ribs.

Asternia (*ah-ster'-ne-ah*) [*ἀ* priv.; *στέρνον*, the breast-bone]. Absence of the sternum.

Asteroid (*as'-ter-oid*) [*ἀστήρ*, a star; *εἶδος*, resemblance]. 1. Shaped like a star. 2. In biology, with radiate lobes.

Asthenia (*as-the'-ne-ah*, or *as-then-i'-ah*) [*ἀσθένεια*; *ἀ* priv.; *σθένος*, strength]. General loss or absence of strength; adynamia.

Asthenic (*as-then'-ik*) [*ἀ* priv.; *σθένος*, strength]. Characterized by asthenia.

Asthenometer (*as-then-om'-et-er*) [*ἀσθένεια*, want of strength; *μέτρον*, a measure]. An instrument for detecting and measuring asthenia; especially, a device for measuring muscular asthenopia.

Asthenopia (*as-then-o'-pe-ah*) [*ἀ* priv.; *σθένος*, strength; *ὤψ*, eye]. Weakness, speedy fatigue of the ocular muscles or visual powers, due to errors of refraction, insufficiency, over-use, anemia, etc. **A., Accommodative**, due to hyperopia, astigmatism, or a combination of the two, producing strain of the ciliary muscle. **A., Muscular**, due to weakness, incoördination (heterophoria), or strain of the external ocular muscles. **A., Retinal, or Nervous**, a rare variety, caused by retinal hyperesthesia, anesthesia, or other abnormality, or by general nervous affections.

Asthenopic (*as-then-op'-ik*) [*ἀ* priv.; *σθένος*, strength; *ὤψ*, eye]. Characterized by asthenopia.

Asthma (*az'-mah*) [*ἄσθμα*, panting]. Paroxysmal or intermittent dyspnea, generally accompanied by cough, bronchial secretion, and a feeling of constriction and suffocation. The etiology is obscure, being ascribed to heredity, nasal disease, gout, exhalations of plants and atmospheric impurities, colds, etc. It is undoubtedly a neurosis, the spasm of the muscular tissue of the bronchial tubes being due either to central or to peripheral nervous irritation. The duration of a paroxysm may be from two to six hours to four or five nights. When dependent upon disease of the heart, the kidneys, stomach, thymus, etc., it has been designated, *cardiac*, *renal*, *peptic*, *thymic*, etc. **A. convulsivum.** Synonym of *Bronchial Asthma*. **A. Crystals**, acicular crystals contained in the sputum of asthmatic patients. **A. dyspepticum**, is due to nervous reflexes through the vagus. **A., Grinders'.** Same as *Fibroid Phthisis*. **A., Hay.** See *Hay Fever*. **A., Heberden's**, angina pectoris. **A., Kopp's**, spasm of the glottis. **A., Marine.** See *Beriberi*. **A., Millar's.** See *Laryngismus stridulus*. **A., Miner's.** See *Anthracosis*. **A. nervosum**

Synonym of *Bronchial Asthma*. **A., Thymic.** Synonym of *Laryngismus stridulus*. **A. uteri.** Synonym of *Hysteria*.

Asthmatic (*as-mat'-ik*) [ἄσθμα, panting]. Relating to or affected with asthma.

Astigmagraph (*as-tig'-ma-graf*) [ἀ priv.; στίγμα, a point; γράφειν, to write]. An instrument for illustrating the phenomena of astigmatism.

Astigmatic (*as-tig-mat'-ik*) [ἀ priv.; στίγμα, a point]. Pertaining to or affected with astigmatism.

Astigmatism (*as-tig'-mat-izm*) [ἀ priv.; στίγμα, a point, because rays of light from a point are never brought to a point by the refractive media of the eye]. That condition of the eye wherein homocentric rays of light are not brought to a focus by the media. It is usually due to inequality of curvature of the different meridians of the cornea (**corneal A.**), but may be caused by imperfections of the lens (**lenticular**), unequal con-

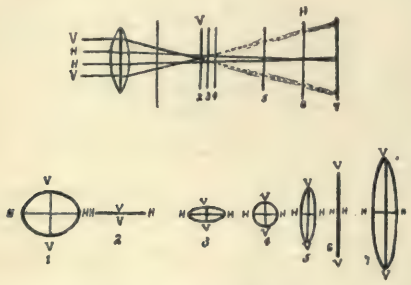

Diagram Illustrating the Formation of Astigmatic Images.

The figures below give the images corresponding to the positions of the perpendicular lines above. The vertical rays are brought to a focus anterior to the horizontal. V. = vertical rays; H. = horizontal.

traction of the ciliary muscle, or may perhaps be due to retinal imperfection. It may be **acquired** or **congenital**, and may complicate hypermetropia or myopia, producing either **simple hypermetropic A.**, in which one principal meridian is emmetropic, the other hypermetropic; or **compound hypermetropic A.**, in which both meridians are hypermetropic, but one more so than the other. Complicating myopia, we may in the same way have **simple myopic** or **compound myopic A.** In **mixed A.**, one principal meridian is myopic, the other hypermetropic. **Regular A.** is when the two principal meridians are at right angles to each other. **Irregular A.**, when different parts of a meridian have different refracting powers.

Astigmatometer (*as-tig-mat-om'-et-er*) [ἀ priv.; στίγμα, a point; μέτρον, a measure]. An instrument for measuring the degree of astigmatism.

Astigmometer (*as-tig-mom'-et-er*). See *Astigmatometer*.

Astigmometry (*as-tig-mom'-et-re*) [ἀ priv.; στίγμα, a point; μέτρον, a measure]. The measurement of astigmatism.

Astomous (*ah-sto'-mus*) [ἀ priv.; στόμα, mouth]. In biology, without a mouth or aperture.

Astragalectomy (*as-trag-al-ek'-to-me*) [ἀστράγαλος, astragalus; ἐκτομή, excision]. Surgical excision of the astragalus.

Astragaloscaphoid (*as-trag-al-o-skaf'-oid*) [ἀστράγαλος, astragalus; σκαφοειδής, like a boat]. Relating to the astragalus and the scaphoid bone.

Astragalotibial (*as-trag-al-o-tib'-e-al*) [ἀστράγαλος, astragalus; *tibia*, the shin-bone]. Relating to the astragalus and the tibia.

Astragalus (*as-trag'-al-us*) [ἀστράγαλος, a dice; the analogous bones of the sheep were used by the ancients as dice]. The ankle-bone, upon which the tibia rests. Also, a genus of leguminous plants from some varieties of which gum tragacanth is derived. **A. mollissimus**, Loco Plant. The active principle of this plant has mydriatic properties. Unof.

Astrapaphobia (*as-trap-af-o'-be-ah*) [ἀστραπή, lightning; φόβος, fear]. Morbid and unreasonable fear of lightning.

Astraphobia (*as-trah-fo'-be-ah*). See *Astrapaphobia*.

Astriction (*as-trik'-shun*) [*astrictio; ad*, to; *stringere*, to bind]. Constipation or any condition resulting from the use of astringents.

Astringency (*as-trin'-jen-se*) [*ad*, to; *stringere*, to bind]. The quality of being astringent.

Astringent (*as-trin'-jent*) [*ad*, to; *stringere*, to bind]. 1. Causing contraction; binding. 2. An agent producing contraction of organic tissues, or that arrests hemorrhages, diarrheas, etc. Tannin, alum, opium, alcohol, the salts of silver, lead, etc., are examples.

Astrokinetic (*as-tro-kin-et'-ik*) [ἀστρον, a star; κινεῖν, to move]. In biology, applied by Ryder to the phenomena of motion as exhibited by the centrosomes of cells.

Astrostatic (*as-tro-stat'-ik*) [ἀστρον, a star; ἱστασθαι, to stand]. In biology, applied by Ryder to the resting condition of the centrosomes of cells.

Asylum (*as-i'-lum*) [*asylum*, a place of refuge]. An institution for the support, safe-keeping, cure, or education of those incapable of caring for themselves, such as the insane, the blind, etc. **A. Ear.** See *Hematoma auris*, and *Ear Deformities*.

Asymbolia (*ah-sim-bo'-le-ah*) [ἀ priv.; σύμβολον, symbol]. The loss of all power of communication, even by signs or symbols.

Asymmetry (*ah-sim'-et-re*) [ἀ priv.; συμμετρία, symmetry]. 1. Unlikeness of corresponding organs or parts of opposite sides of the body that are normally of the same size, etc., as *e.g.*, asymmetry of the two halves of the skull or brain. 2. The linking of carbon atoms to four different groups; the combination of carbon atoms with different atoms or atomic groups.

Asynergia (*ah-sin-er'-je-ah*) [ἀ priv.; συνεργία, cooperation]. Faulty coördination of the different organs or muscles normally acting in unison.

Asynesia (*as-in-e'-ze-ah*) [ἀσυνεσία, stupidity]. Stupidity; loss or disorder of mental power.

Asynodia (*ah-sin-o'-de-ah*) [ἀ priv.; συνοδία, a travelling together]. Impotence.

Asystematic (*ah-sis-tem-at'-ik*) [ἀ priv.; σύστημα, system]. Diffuse; not restricted to any one or several systems of nerve fibers; applied to nervous diseases that are general.

Asystole (*ah-sis'-to-le*) [ἀ priv; συστολή, a shortening]. Absence or imperfection of the cardiac systole, due to feebleness, dilatation, etc., of the heart.

Asystolic (*ah-sis-tol'-ik*) [ἀ priv; συστολή, a shortening]. Marked by, due to, or suffering from asystole.

Asystolism (*ah-sis'-tol-izm*) [ἀ priv.; συστολή, a shortening]. Inability of the right ventricle of the heart to empty itself of its contents, a condition encountered in the last stages of mitral incompetence. See *Asystole*.

Asystoly (*ah-sis'-to-le*). Same as *Asystole*.

Atactic (*at-ak'-tic*) [ἄτακτος, irregular]. Irregular, incoördinate. Pertaining to muscular incoördination, especially in aphasia. Also applied to atypical fevers.

Atavic (*at-av'-ik*) [*atavus*, a forefather]. Relating to or characterized by atavism.

Atavism (*at'-av-izm*) [*atavus*, a forefather]. The reappearance of an anomaly, physical, mental, or pathologic, in an individual whose more or less remote

progenitors were similarly affected, but in whose immediate ancestors it had not been shown.

Atavistic (*at-av-is'-tik*). Same as *Atavic*.

Ataxaphasia (*at-aks-af-a'-ze-ah*). See *Aphasia*.

Ataxia (*at-aks'-e-ah*) [ἀταξία, want of order]. The word means primarily irregularity or want of order, but it is most commonly used to express incoördination of muscular action; an excess or deficiency in contraction of the various muscles concerned in a given action. Both static and locomotor ataxia are prominent symptoms of tabes or disease of the posterior columns of the cord, but it is absurd to speak of ataxia as if it were a disease itself, instead of being only one of many symptoms of many diseases. **A., Briquet's,** a hysterical state marked by loss of sensation in the skin and in the leg muscles. **A. cordis.** See *Delirium cordis*. **A. of Drunkards.** See *Polyneuritis potatorum*. **A., Family.** See *A., Hereditary*. **A., Hereditary,** Friedreich's ataxia, a family disease of children and the young. See *Friedreich's Disease*. **A., Locomotor,** the failure of muscular coördination as regards movements, and especially in walking. **A., Motor,** inability to coördinate the muscles in walking. **A., Signs of.** 1. *Romberg* (or *Brach-Romberg sign*), swaying of the body with closed eyes. 2. *Signe de cloche-pied;* standing on one leg with open eyes, and with closed eyes. The ataxic finds difficulty in standing upon one foot while the other is raised from the ground, particularly when the eyes are closed. 3. *Sign of crossing the legs;* in crossing the legs a normal person raises the one leg to the level of the other knee and deposits the former upon the latter. The ataxic raises the one leg a considerable distance above the other knee, and in depositing the former upon the latter makes the arc of a large circle. 4. *Sign "de l'escalier;" sign of descending stairs;* difficulty in descending stairs experienced by the ataxic. 5. *Marching at command; a.* march! *b.* halt! *c.* about face! *a.* When an ataxic that has been seated is told to walk, he manifests uncertainty or hesitation in his effort, first on rising, to gain his equilibrium. *b.* The marching ataxic finds great difficulty and is likely not to succeed in halting with precision when commanded to do so. *c.* The ataxic patient cannot turn about face with the same promptitude and the same certainty as the normal individual. 6. *Westphal's sign;* abolition of the knee-jerk. **A., Static,** the failure of muscular coördination in standing still, or in fixed positions of the limbs. **A., Thermal,** peculiar large and irregular fluctuations of the body temperature, due to a condition of incoördination, or a disordered or weakened thermotaxic mechanism. This may give rise to the so-called *paradoxic* or *hysterical temperatures*, rising occasionally to 108° or 110° F., without grave or permanent injury.

Ataxiagram (*at-aks'-e-a-gram*) [ἀταξία, want of order; γράμμα, a marking]. A line drawn by a patient suffering with an ataxial disease. The patient's eyes are open or closed and he attempts to make a straight line. The character of the deviations from a straight line that result are conceived to have a certain diagnostic value.

Ataxiamnesia (*at-aks-e-am-ne'-ze-ah*) [ἀταξία, want of order; ἀμνησία, forgetfulness]. Muscular ataxia with loss of or impairment of memory.

Ataxic (*at-aks'-ik*) [ἀταξία, want of order]. 1. Pertaining to or affected with ataxia. 2. A person affected with ataxia. **A. Aphasia.** See *Aphasia*. **A. Fever.** Synomyn of *Typhus Fever*, *q. v.*

Ataxophemia (*at-aks-o-fe'-me-ah*) [ἀταξία, want of order; φήμι, to speak]. Lack of coördination in speech.

Ataxy (*at-aks'-e*). See *Ataxia*.

Atelectasis (*at-el-ek'-tas-is*) [ἀτελής, imperfect; ἔκτασις, expansion]. Pulmonary collapse, with failure of the air to enter the vesicles. It may be either *acquired* (apneumatosis), or *fetal*. The condition is due not to disease of the lungs, but to nerve injuries, weakness, etc. In fetal cases the lung has never been inflated, whilst in *apneumatosis* it has been inflated.

Atelectatic (*at-el-ek-tat'-ik*) [ἀτελής, imperfect; ἔκτασις, expansion]. Relating to or characterized by atelectasis.

Ateleocephalous (*at-el-e-o-sef'-al-us*) [ἀτελής, imperfect; κεφαλή, head]. Having the skull or head more or less incomplete.

Atelia (*at-el-i'-ah*) [ἀτέλεια, imperfection]. A teratologic term for imperfection or failure of development of some part of the fetus. The word is compounded with others to designate the member wanting, as *atelocardia*, etc., expressing such a defect of the heart, etc.

Atelocardia (*at-el-o-kar'-de-ah*) [ἀτελής, imperfect; καρδία, heart]. An imperfect or undeveloped state of the heart; cardiatelia.

Atelocheilia (*at-el-o-ki'-le-ah*) [ἀτελής, imperfect; χεῖλος, lip]. Defective development of a lip.

Atelochiria (*at-el-o-ki'-re-ah*) [ἀτελής, imperfect; χείρ, hand]. Deficiency in the development of the hand.

Ateloencephalia (*at-el-o-en-sef-a'-le-ah*) [ἀτελής, incomplete; ἐγκέφαλον, brain]. Incomplete development of the brain.

Ateloglossia (*at-el-o-glos'-e-ah*) [ἀτελής, imperfect; γλῶσσα, tongue]. Congenital defect in the tongue.

Atelognathia (*at-el-og-na'-the-ah*) [ἀτελής, imperfect; γνάθος, jaw]. Imperfect development of a jaw, especially of the lower jaw.

Atelomyelia (*at-el-o-mi-e'-le-ah*) [ἀτελής, imperfect; μυελός, marrow]. Congenital defect or incompleteness of the spinal cord.

Atelopodia (*at-el-o-po'-de-ah*) [ἀτελής, imperfect; ποίς, foot]. Defective development of the foot.

Ateloprosopia (*at-el-o-pro-so'-pe-ah*) [ἀτελής, incomplete; πρόσωπον, face]. Incomplete facial development.

Atelorrhachidia (*at-el-o-rak-id'-e-ah*) [ἀτελής, imperfect; ῥάχις, spine]. Imperfect development of the spinal column, as in spina bifida.

Atelostomia (*at-el-o-sto'-me-ah*) [ἀτελής, incomplete; στόμα, mouth]. Incomplete development of the mouth.

Athalamous (*ah-thal'-am-us*) [ἀ priv.; θάλαμος, a bed] Absence of the optic thalamus. In biology, without apothecia, as certain lichens.

Athalline (*ah-thal'-in*) [ἀ priv.; θαλλός, a frond]. In biology, destitute of a thallus.

Athelasmus (*ah-thel-as'-mus*) [ἀ priv.; θηλασμός, a suckling]. Inability to give suck, from defect or want of the nipples.

Athelia (*ah-the'-le-ah*) [ἀ priv.; θηλή, a nipple]. Absence of the nipple.

Athermasia (*ah-ther-ma'-ze-ah*) [ἀ priv.; θερμασία, heat]. Lack or deficiency of heat.

Atheroma (*ath-er-o'-mah*) [ἀθήρη, gruel; ὄμα, tumor]. Primarily, a soft encysted tumor; more commonly, the fatty degeneration of the walls of the arteries in consequence of chronic arteritis, and called *atheromatous degeneration*. *Atheromatous abscess*, resulting from chronic arteritis, is a collection of soft matter beneath the intima, while an *atheromatous ulcer* is formed by the abscess breaking through the intima.

Atheromasia (*ath-er-o-ma'-ze-ah*) [ἀθήρωμα, an atheromatous tumor]. Atheromatous degeneration; the condition of atheroma.

Atheromatous (*ath-er-o'-mat-us*) [*ἀθήρωμα*, an atheromatous tumor]. Characterized by or affected with atheroma.

Atherosperma (*ath-er-o-sper'-mah*) [*ἀθήρ*, beard; *σπέρμα*, seed]. A genus of trees. **A. moschatum**, *Australian sassafras*, a diaphoretic and diuretic sometimes used in pulmonary affections and asthma. Dose of the tincture, ʒss–j. Unof.

Athetoid (*ath'-et-oid*) [*ἄθητος*, unfixed]. Pertaining to or affected with athetosis. **A. Spasm**, a symptom of hemiplegia and some cerebral lesions.

Athetosis (*ath-et-o'-sis*) [*ἀθητος*, unfixed; changeable]. A symptom most frequently occurring in children, and characterized by continual change of position of the fingers and toes, and inability to keep them still, save in sleep. It is due to some lesion or derangement of the brain or cord. It is also called "post-hemiplegic chorea," from its occurrence after hemiplegia, in adults. **A., Double Congenital.** See *Paraplegia, Infantile Spasmodic*; also *Double Athetosis*.

Athlete (*ath-lēt'*) [*ἀθλεῖν*, to contend with]. Robust; vigorous. **A.'s Heart**, incompetency of the aortic valves, a condition frequently found in athletes.

Athletics (*ath-let'-iks*) [*ἀθλεῖν*, to contend]. The art of physical exercise for development or for health.

Athrepsia (*ah-threps'-e-ah*) [*ἀ* priv; *τρέφειν*, to nourish]. The symptom-complex resulting from imperfect nutrition in children.

Athroisemia (*ath-roi-se'-me-ah*) [*ἄθροισμα*, accumulation; *αἷμα*, blood]. Congestion or accumulation of blood.

Athymia (*ah-thi'-me-ah*) [*ἀ* priv.; *θύμος*, mind]. 1. Despondency. 2. Loss of consciousness. 3. Insanity.

Athymic (*ah-thi'-mik*) [*ἀ* priv.; *θύμος*, mind]. Affected with athymia.

Atlantad (*at-lan'-tad*) [Ἄτλας, a Greek hero]. Toward the atlas in situation or direction.

Atlantal (*at-lan'-tal*) [Ἄτλας, a Greek hero]. Relating to the atlas.

Atlanten (*at-lan'-ten*) [Ἄτλας, a Greek hero]. Belonging to the atlas in itself.

Atlanti-obliquus (*at-lan'-ti-ob-li'-kwus*) [L.]. The obliquus capitis superior muscle.

Atlanti-rectus (*at-lan'-ti-rek'-tus*) [L.]. The muscle called rectus capitis posticus minor.

Atlanto- (*at-lan'-to*) [Ἄτλας, a Greek hero]. A prefix signifying relation to the atlas; seen in the words *Atlanto-axial*, (relating to the atlas and the axis) *Atlanto-occipital*, *Atlanto-odontoid*, etc.

Atlas (*at'-las*) [*ἄτλας*, able]. The uppermost of the cervical vertebræ. It articulates with the occipital bone of the skull. **A. Silk.** See *Silk*.

Atlee's Operation. See *Operations, Table of.*

Atlodidymus (*at-lo-did'-im-us*). Same as *Atlodymus*.

Atlodymus (*at-lod'-im-us*) [*ἄτλας*, able; *δίδυμος*, double]. A monosomic dual monstrosity; with two heads and a single body.

Atloido- (*at-loi'-do*) [*ἀτλας*, able]. In composition, the same as *atlanto*; seen in such examples as *atloido-axoid*, *atloido-odontoid*, etc.

Atmiatry (*at-mi'-at-re*) [*ἀτμίς*, vapor; *ἰατρεία*, medical treatment]. Treatment of diseases of the lungs or mucous membranes, by inhalation, fumigation, or by directing a current of vapor or gas upon the part.

Atmid-albumose (*at-mid-al'-bu-mōs*) [*ἀτμίς*, vapor; *albumen*]. Neumeister's term for the albumose formed by the action of superheated steam.

Atmidometer (*at-mid-om'-et-er*). See *Atmometer*.

Atmidoscope (*at-mid'-o-skōp*) [*ἀτμίς*, vapor; *σκοπεῖν*, to view]. See *Atmometer*.

Atmograph (*at'-mo-graf*) [*ἀτμός*, breath; *γράφειν*, to record]. A form of self-registering respirometer.

Atmometer, or Atmidometer (*at-mom'-et-er; at-mid-om'-et-er*) [*ἀτμίς*, vapor; *μέτρον*, a measure]. An instrument to measure the amount of water exhaled from a given surface in a given time, in order to determine the humidity of the atmosphere.

Atmosphere (*at'-mos-fēr*) [*ἀτμός*, vapor; *σφαῖρα*, a sphere]. The mixture of gases, vapor of water, and other suspended matters, surrounding the earth, as an elastic fluid envelop, to the height of about 200 miles.

Atmospheric (*at-mos-fer'-ik*) [*ἀτμός*, vapor; *σφαῖρα*, a sphere]. Pertaining to the atmosphere. **A. Moisture**, the vapor of water mingled with the atmosphere. It varies in quantity according to the temperature. **A. Pressure Cavity**, a cavity formed on the palatine surface of a set of artificial teeth to retain them in the mouth. **A. Tension**, the pressure of the air per square inch on the surface of a body. Normally, at the sea level it is about 14.7 lbs. per square inch, or equal to that of a column of mercury about 30 in. in height. It decreases about $\frac{1}{10}$ in., or $\frac{1}{20}$ lb. per square inch for every 90 feet of altitude. Above 10,000 feet, the rarity of the atmosphere is usually noticeable in quickened breathing and pulse rate.

Atocia (*at-o'-se-ah*) [*ἄτοκος*, barren]. Sterility of the female.

Atom (*at'-um*) [*ἀ* priv.; *τέμνειν*, to cut]. The ultimate unit of an element; that part of a substance incapable of further division, or the smallest part capable of entering a chemical compound, or uniting with another to form a **Molecule**—which last is the smallest quantity of a substance that can exist free or uncombined. See *Elements, Table of.*

Atomic (*at-om'-ik*) [*ἀ* priv.; *τέμνειν*, to cut]. Of or pertaining to atoms. **A. Heat** of an atom is its specific heat multiplied by its atomic weight. **A. Theory**, the theory of Dalton, that all matter is composed of atoms, the weight of each atom differing for the different substances. **A. Valence, Equivalence,** or the **Atomicity** of an element, is the saturating power of its atom as compared with that of hydrogen. **A. Weight**, the weight of an atom of an element as compared with the weight of an atom of hydrogen.

Atomicity (*at-om-is'-it-e*) [*ἀ* priv.; *τέμνειν*, to cut]. Chemical valence; quantivalence.

Atomization (*at-om-iz-a'-shun*) [*ἀ* priv.; *τέμνειν*, to cut]. The mechanical process of breaking up a liquid into fine spray.

Atomizer (*at'-om-i-zer*) [*ἀ* priv.; *τέμνειν*, to cut]. An instrument for transforming a liquid into a spray or mist.

Atonia (*at-o'-ne-ah*) [*ἀτονία*, want of tone]. Atony.

Atonic (*at-on'-ik*) [*ἀτονία*, want of tone]. Relating to or characterized by, atony.

Atony (*at'-o-ne*) [*ἀ* priv.; *τόνος*, tone]. Want of tone. Debility. Loss or diminution of muscular or vital energy.

Atopomenorrhea (*at-o-po-men-or-e'-ah*) [*ἄτοπος*, out of place; *μήν*, month; *ῥέειν*, to flow]. Vicarious menstruation.

Atoxic (*ah-toks'-ik*) [*ἀ* priv.; *τοξικόν*, poison]. Not venomous; not poisonous.

Atrabiliary (*at-rah-bil'-e-a-re*) [*ater*, black; *bilis*, bile]. An obsolescent term relating to melancholy and hypochondriasis; also referring to the renal and supra-renal glands, once believed to produce black bile, or atrabilis, the cause of the gloomy disposition. **A., Capsules**, an old name for the supra-renal capsules.

Atractylis (*at-rak'-til-is*) [*ἀτρακτυλίς*]. A genus of composite-flowered plants, nearly related to the safflower (*Carthamus*). **A. gummifera**, of the Mediterranean region, affords *acanthomastic*. **A. lancea**, of

China and Japan, is stomachic and tonic. **A. ovata**, of the same regions, is tonic, diuretic, sudorific, and stimulant.

Atramental (*at-ram-en'-tal*) [*atramentum*, ink]. Of an inky-black color.

Atremia (*ah-tre'-me-ah*) [ἀ priv.; τρέμειν, to tremble]. 1. An absence of tremor. 2. An hysterical condition in which there is an imaginary inability to walk, stand, sit, or read.

Atreselytria (*at-res-el-i'-tre-ah*). See *Atretelytria*.

Atresenteria (*at-res-en-te'-re-ah*). See *Atretenteria*.

Atresia (*ah-tre'-ze-ah*) [ἀ priv.; τρῆσις, perforation]. Imperforation, either congenital or acquired, of a normal opening or canal, as of the anus, vagina, meatus auditorius, pupil, etc. The word is often compounded with the name of the organ affected; *e.g.*, *atrestocystia*, *atretenteria*, etc., denoting, respectively, imperforation of the bladder, intestine, etc.

Atresic (*ah-tre'-sik*) [ἀ, priv.; τρῆσις, perforation]. Marked by atresia or imperforation. See *Teratism*.

Atresoblepharea (*at-res-o-blef-a'-re-ah*). See *Atretoblepharea*.

Atresocysia (*at-res-o-sis'-e-ah*). See *Atretocysia*.

Atresocystia (*at-res-o-sis'-te-ah*). See *Atretocystia*.

Atresogastria (*at-res-o-gas'-tre-ah*). See *Atretogastria*.

Atresometria (*at-res-o-me'-tre-ah*). See *Atretometria*.

Atresopia (*ah-tres-o'-pe-ah*). See *Atretopsia*.

Atretelytria (*at-ret-el-i'-tre-ah*) [ἄτρητος, imperforate; ἐλύτρον, sheath]. Atresia of the vagina.

Atretenteria (*at-ret-en-te'-re-ah*) [ἄτρητος, imperforate; ἔντερον, intestine]. Atresia, or imperforation of the intestinal canal.

Atreto- (*at-ret'-o*). As a prefix, represents the Gr. ἄτρητος, imperforated.

Atretoblepharia (*at-ret-o-blef-a'-re-ah*) [ἄτρητος, imperforate; βλέφαρον, lid]. Symblepharon, *q. v.*

Atretocysia (*at-ret-o-sis'-e-ah*) [ἄτρετος, imperforate; κυσός, anus]. Atresia of the anus.

Atretocystia (*at-ret-o-sis'-te-ah*) [ἄτρετος, imperforate; κυστις, bladder]. Atresia of the bladder.

Atretometria (*at-ret-o-me'-tre-ah*) [ἄτρετος, imperforate; μήτρα, womb]. Atresia of the uterus.

Atretopsia (*at-ret-op'-se-ah*) [ἄτρητος, imperforate; ὤψ, eye]. Imperforation of the pupil.

Atrial (*a'-tre-al*) [*atrium*, the fore-court, or hall]. Relating to an atrium.

Atrichia (*ah-trik'-e-ah*) [ἀ priv.; θρίξ, hair]. Loss or absence of the hair.

Atrichosis (*ah-trik-o'-sis*) [ἄτριχος, hairless]. Failure of the hair to grow; a condition characterized by absence of hair.

Atrioventricular (*a-tre-o-ven-trik'-u-lar*) [*atrium*, the hall; *ventriculus*, ventricle]. Relating both to the atrium (or auricle) and to the ventricle of the heart.

Atrium (*a'-tre-um*) [*atrium*, the fore-court, or hall]. 1. That part of the auricle of the heart into which the venous blood is poured. 2. The principal part of the tympanic cavity of the ear, exclusive of the attic. **A. cordis**, the auricle of the heart. **A. vaginæ**, the vestibule of the vulva.

Atrocha (*ah-tro'-kah*) [ἀ priv.; τροχός, a wheel]. In biology, wheelless, as certain annelid embryos, rotifers, etc.; destitute of cilia.

Atrolactinic Acid (*at-ro-lak-tin'-ik*). See *Acid*.

Atropa (*at'-ro-pah*) [Ἄτροπος, "she who turns not," undeviating; one of the three Fates, who cut the thread of life, in allusion to the poisonous effects of the plant]. A genus of the natural order *Solanaceæ*. **A. belladonna**, the deadly nightshade, whence is obtained *atropin*. See *Belladonna*.

Atropal, or Atropous (*at'-ro-pal; at'-ro-pus*). See *Orthotropous*.

Atrophia (*at-ro'-fe-ah*) [ἀ priv.; τροφή, nourishment]. Atrophy, *q. v.* A term applied to a condition marked by wasting or innutrition. **A. cordis**, atrophy of the heart, following senile changes, or occurring in cachectic conditions, or as a result of pressure exerted by mediastinal tumors, etc. **A. cutis**, Atrophoderma; a term applied to various changes in the skin characterized by the diminution or disappearance of certain of its elements, especially seen in advanced age. The skin becomes thin, loose, wrinkled, and discolored. **A. cutis senilis**, Senile Atrophoderma; an atrophy of the skin usually associated with general signs of senile degeneration. The whole skin may be affected, together with its appendages and the subcutaneous tissues. The skin is in folds, slightly shrunken, wrinkled, and dry. It feels thin, and is transparent and shining. Pruritus is sometimes present, and there is usually an increased pigmentation, with warty developments. **A. infantum.** Synonym of *Tabes mesenterica*. **A. mesenterica.** Synonym of *Tabes mesenterica*. **A. pilorum propria**, atrophy of the hair, either symptomatic or of idiopathic origin. It may be local or generalized. The hair becomes lusterless, brittle, fibrillated, readily cleft, and readily fractured. **A. unguis**, atrophy of the nails; marked by pitting, brittleness, furrowing, thinning, crumbling, etc. It may be symptomatic of such disorders as lepra and syphilis, or it may be idiopathic.

Atrophic (*at-ro'-fik*) [ἀ priv.; τροφή, nourishment]. Pertaining to, affected with, due to, characterized by, or causing atrophy. **A. Catarrh**, a chronic form of rhinitis in children characterized by marked atrophy and anemia of the pituitary membrane, with the formation of crusts in the nasal and naso-pharyngeal cavities and a peculiar and offensive odor. **A. Forms**, the name suggested by His for those malformations that are characterized by want of general development, and, in some instances, by subsequent atrophy, whereby all resemblance to the human embryo is lost.

Atrophicum melanosis progressiva (*at-ro'-fik-um mel-an-o'-sis pro-gres'-iv-ah*). See *Atrophoderma*.

Atrophied (*at'-ro-fid*) [ἀ priv.; τροφή, nourishment]. Wasted; affected with atrophy.

Atrophoderma (*at-ro-fo-der'-mah*) [ἀ priv.; τροφή, nourishment; δέρμα, the skin]. Atrophia cutis, atrophy of the skin, a wasting of the skin due to innutrition. See *Atrophia cutis*. **A. albidum**, a type of xeroderma in which the skin from the middle of the thigh to the sole, more rarely from the upper arm to the palm, is in places very white, stretched, and difficult to pick up, with the epidermis extremely thinned, faintly glistening, wrinkled, and peeling off in thin, shining flakes. There is extreme sensibility on the finger-tips, palms, and soles. The condition remains stationary from the earliest childhood. **A. neuriticum**, Glossy Skin; an atrophy of the skin in the area of a nerve affected by disease or injury. It chiefly attacks the extremities. The skin of the affected part becomes very dry, smooth, and glossy, like a thin scar; the fingers are tapering, hairless, and almost void of wrinkles and of a pink or deep-red color. A severe and persistent burning pain precedes and accompanies this condition. The nails become curved both longitudinally and transversely, and there is some thickening of the cutis beneath the free end. **A. pigmentosum.** See *Xeroderma pigmentosum*. **A., Senile.** See *Atrophia cutis senilis*. **A. striatum et maculatum**, an atrophic condition of the skin of adults characterized by streaks of a pearly or bluish-white color, glistening, scar-like, from one inch to several inches long and a quarter of an inch or more wide, and which follow the natural cleavage of the

skin, and are situated chiefly about the buttocks, anterior border of the ilium, trochanters, and thighs. The "spots" are less common, small, usually isolated, and are seen mostly on the trunk and neck.

Atrophy (*at'-ro-fe*) [*ἀτροφία*, want of nourishment]. A retrogressive change in parts originally well-formed and well-nourished, consisting in loss of weight, size, and function of an organ or tissue, owing to some disorder of nutrition, disuse, continuous pressure, or a diminished blood-supply to the part. **A., Active,** due to the inherent inability of the cells of a tissue to assimilate the nutriment brought to them. **A., Acute Yellow.** See *Icterus gravis.* **A., Brown,** a form of atrophy in which the normal pigment of the organ is retained, and in which there is also frequently the addition of new pigment from the blood and disintegrated albuminates. It occurs most frequently in the heart, muscles, and liver, and is caused by chronic congestion; also called *Pigmented Atrophy.* **A. of the Bulb,** progressive shrinking of the eyeball. **A., Correlated,** an atrophy of certain portions of the body following the removal or destruction of other portions. Thus amputation of an arm will be followed by an atrophy of the scapula; of a leg, of the corresponding os innominatum, together with a diminution in the size of the heart and large blood-vessels. **A., Cruveilhier's.** See *Diseases, Table of.* **A., Gray,** a degenerative change in the optic disc in which the latter assumes a grayish color. **A. of Hair,** a wasting or deficient growth of the hair. **A., Idiopathic Muscular,** primary muscular dystrophy; muscular wasting, with or without an initial hypertrophy, beginning in various groups of muscles, usually progressive in character, and dependent on primary changes in the muscles themselves. There is a strong hereditary predisposition to the disease. **A., Muscular,** affects the muscles and may be hereditary or acquired, idiopathic, myelopathic, myopathic, neuropathic, primary, secondary, simple, or progressive. **A., Passive,** caused by diminished nutrition supplied to the part. **A., Pigmentary,** so called from a deposit of pigment (yellow or yellowish-brown) in the atrophied fat-cells. **A., Pigmented.** See *A., Brown.* **A., Progressive Muscular;** Chronic Anterior Poliomyelitis; Wasting Palsy. A chronic disease characterized by progressive wasting of individual muscles or physiologic groups of muscles, and by an associated and proportional amount of paralysis. It is due to a degeneration and atrophy of the multipolar cells in the anterior gray matter of the cord, with consecutive degeneration of the anterior nerve-roots and muscles. The right hand is usually the part first attacked, and it takes on a peculiar claw-like form (*main en griffe*). The disease is most frequent in males of adult life, and follows excessive muscular exertion. **A., Progressive Unilateral Facial,** a disease characterized by progressive wasting of the skin, connective tissue, fat, bone, and more rarely the muscles of one side of the face. It is most common in females; its course is slow and generally progressive. Opinions vary as to whether the disease is central or peripheral in origin. **A., Red,** a form of cirrhosis of the liver due to chronic congestion, as seen in mitral and tricuspid valvular lesions. It is also seen in emphysema and chronic pleurisy with contraction. The cut surface of the liver presents a nutmeg appearance, and is therefore called the *nutmeg liver.* **A., Serous,** that characterized by a transudation of serum into the tissue after the fat has gone, giving it a gelatinous appearance. **A. Senile,** the physiological variety of *Simple Atrophy.* **A., Simple,** the retrogressive processes and shrinking due to pathologic causes, allied to the physiologic retrogression of senility, but occurring, as it were, prematurely. **A. of the Teeth,** a name formerly used to designate erosion of the teeth, an affection characterized either by perforations in, or discolored spots of a shriveled, yellowish, or brownish aspect, on the enamel, of two, four, or more teeth in each jaw. **A., Trophoneurotic,** that dependent upon abnormality of the nervous supply or control of an organ or tissue, best illustrated in muscular atrophy from injury of the proper nerves of the muscle, or in disease of the anterior horns of gray matter of the cord.

Atropina, or **Atropin** (*at-ro-pi'-nah; at'-ro-pin*) [Ἄτροπος, one of the Fates who cut the thread of life: *gen., Atropinæ*], $C_{17}H_{23}NO_3$. A crystalline alkaloid derived from *Atropa belladonna.* The sulphate is a white powder of bitter taste, neutral reaction, soluble in water. *Homatropin,* $C_{16}H_{21}NO_3$, is a derivative alkaloid, the hydrobromate being used by ophthalmologists as a mydriatic, principally because its effects pass off more quickly than those of atropin. Homatropin slows the heart, atropin quickens it. Atropin is an irritant narcotic, a mydriatic, antispasmodic, and anodyne; in small doses a cardiac, respiratory, and spinal stimulant, in large doses a paralyzant of the cardiac and respiratory centers, the spinal cord, motor nerves, and voluntary muscles. It produces congestion and dryness of the mucous membrane of the mouth, nose, pharynx, and larynx, at first lessening the gastric and intestinal secretion, to be followed by an increase of the same. It is extensively used in ophthalmic practice to dilate the pupil, paralyze accommodation, and also in various corneal, iritic, and other ocular diseases. Its therapeutic use in general medicine is also manifold; *e.g.,* in inflammatory affections and the pain of cerebral and spinal hyperemia, atonic constipation, cardiac failure, hypersecretions, etc., and as a physiologic antagonist in opium poisoning. Dose of atropin sulphate gr. $\frac{1}{120}$–$\frac{1}{60}$. **Injectio Homatropina Hypodermica,** 1 in 120. Dose gr. $\frac{1}{120}$–$\frac{1}{60}$. **A.-catarrh.** See *Conjunctivitis, Atropin.* **A.-conjunctivitis.** See *Conjunctivitis.*

Atropinism (*at'-ro-pin-izm*). See *Atropism.*

Atropinize (*at'-ro-pin-īz*) [Ἄτροπος]. To bring under the influence of, or treat with atropin.

Atropism (*at'-ro-pizm*) [Ἄτροπος]. Poisoning with, or the morbid condition induced by, atropin.

Attachement (*at-tash'-mon(g)*) [Fr.]. In massage, concentric curves eccentric; starting from a point taken as a center, one describes, by circular movements, circumferences wider and wider till the outside of the part is reached; return is then made by circles smaller and smaller till the starting point is reached.

Attack (*at-tak'*) [Fr., *attaque*]. The onset of a seizure or of a disease.

Attar (*at'-ar*) [Pers., *ātar*]. A general name for any of the volatile oils. **A. of Rose,** Oil of Rose. The volatile oil distilled from the fresh flowers of the Damascene rose. It comes mainly from E. Roumelia and is generally adulterated with other volatile oils. It is used only as a perfume.

Attendant (*at-ten'-dant*) [*attendere,* to attend]. A non-professional attaché of an asylum or hospital, especially of an insane asylum.

Attention (*at-ten'-shun*) [*attentio,* a giving heed to]. The direction of the will or thought upon an object or to a particular sensation. **A. Time.** See *Time.*

Attenuant (*at-ten'-u-ant*) [*attenuare,* to make thin]. A medicine or agent increasing the fluidity or thinness of the blood or other secretion.

Attenuating (*at-ten'-u-a-ting*) [*attenuare,* to make thin]. Making thin. **A. Medium.** See *Fractional Cultivation.*

Attenuation (*at-ten-u-a'-shun*) [*attenuare*, to make thin]. A thinning, narrowing, or reduction of the strength or size of a substance. **A. of Microbes**, weakening the pathogenic virulence of microbes by successive cultures and other methods, so that they may be used as a vaccine to confer immunity from future attacks of the disease. **A., Sanderson's Method of**, by passing the virus through the system of another animal (*e.g.*, the guinea-pig, in anthrax), so that it becomes modified in virulency. Toussaint and Chauveau have shown that heat is a valuable means of attenuation; oxygen, chemical reagents, exposure to sunlight, etc., have also been used.

Atterminal (*at-er'-min-al*). See *Adterminal*.

Attic (*at'-ik*) [*Atticus*, Attic]. Part of the tympanic cavity situated above the atrium. **A. Disease**, chronic suppurative inflammation of the attic of the tympanum.

Attitude (*at'-e-tūd*) [*aptitudo*, aptitude]. See *Posture*. **A., Crucifixion**, in hystero-epilepsy, a rigid state of the body, the arms stretched out at right angles. **A., Frozen**, a peculiar stiffness of the gait characteristic of disease of the spinal cord, especially of amyotrophic lateral sclerosis. **A., Passionate**, the assumption of a dramatic or theatrical expression, a position assumed by some hysterical patients.

Attollens (*at-ol'-enz*) [*attollere*, to rise up]. Applied to muscles raising or elevating the part, as the **A. Auris**, a muscle raising the external ear. See *Muscles, Table of*.

Attraction (*at-rak'-shun*) [*attrahere*, to draw to]. The tendency of one particle of matter to approach another. Affinity. As existing between celestial bodies it is termed *gravitation*, while *molecular attraction* or *cohesion* expresses the force aggregating molecules into masses. **A., Chemical**, *the attraction of affinity*, relates to the attraction of atoms of one element to those of others, resulting in chemical compounds. **A., Capillary**, the tendency of a curved surface or a tube to exert traction on a liquid. **A., Electrical**, the tendency of bodies toward each other when charged with opposite electricities. **A., Magnetic**, the influence of a magnet upon certain metallic substances, chiefly iron.

Attrahens (*at'-rah-enz*) [*attrahens*, drawing]. Applied to muscles as **Attrahens aurem**, a muscle drawing the ear forward and upward. See *Muscles, Table of*. Also applied to medicines attracting fluids to a part, as stimulants, epispastics, etc.

Attrahent (*at'-rah-ent*) [*attrahens*, drawing]. 1. Drawing to; adducent. 2. A drawing application; an epispastic or rubefacient.

Attrition (*at-rish'-un*) [*atterere*, to rub against]. An abrasion or chafing of the skin. In physics, any rubbing or friction that breaks or wears the surface.

Attypic (*at-ip'-ik*) [*at*, to; *τύπος*, a type]. In biology, possessing by acquisition or specialization the characters of a prototype.

Atypic (*ah-tip'-ik*) [*ἀ* priv.; *τύπος*, a type]. Irregular; not conformable to the type. **A. Fever**, an intermittent fever with irregularity of the paroxysm.

Atypical (*ah-tip'-ik-al*). See *Atypic*.

Auante (*aw-an'-te*) [*αὐαντή*; *αὐαίνειν*, to dry]. A wasting or atrophy.

Auantic (*aw-an'-tik*) [*αὐαντικός*, wasted]. Characterized by wasting; atrophic.

Aubernage (*o-bār-nahzh'*) [Fr.]. A contagious disease of the vine, called by the Italians the *Black Disease*. It is doubtful whether it is due to a fungus or a bacterium. Cf. *Bacterium gummis, comes*, under *Bacteria, Synonymatic Table of*.

Auburn System. See *Ventilation*.

Auctioneers' Cramp. See *Cramp*.

Audimeter (*aw-dim'-et-er*). See *Audiometer*.

Audiometer (*aw-de-om'-et-er*) [*audire*, to hear; *μέτρον* a measure]. An instrument for measuring the acuteness of hearing.

Audiometric (*aw-de-o-met'-rik*) [*audire*, to hear; *μέτρον*, a measure]. Relating to audiometry.

Audiometry (*aw-de-om'-et-re*) [*audire*, to hear; *μέτρον*, a measure]. The measurement, or testing, of the sense of hearing.

Audiphone (*aw'-dif-ōn*) [*audire*, to hear; *φωνή*, a sound]. An instrument for improving the power of hearing by conveying sounds through the bones of the head to the labyrinth.

Audition (*aw-dish'-un*) [*audire*, to hear]. The act of hearing. **A. colorée**, a peculiar association between the auditory and optic nerves, by which a certain sound or musical note will give rise to a subjective sensation of color, the same note in the same person being always associated with the same color.

Auditory (*aw'-dit-o-re*) [*audire*, to hear]. Pertaining to the act or the organs of hearing. **A. After-Sensations**, the sensations of sounds continuing or occurring after the cessation of the stimulus. **A. Amnesia**. See *Mind-deafness*. **A. Area**, the cerebral center for hearing; its location is not definitely determined. **A. Aura**, auditory sensation preceding an attack of epilepsy. **A. Center**, same as *A. Area*. **A. Hairs**, the processes of the crista acustica, at present of indeterminate function. **A. Meatus** (external and internal), the external and internal canals or openings of the ear. **A. Nerve**, the *portio mollis* of the seventh pair of cranial nerves. **A. Ossicles**, the chain of small bones of the middle ear. **A. Sac**, the labyrinth, pit, or depression in the epiblast on both sides of the embryologic after-brain. When cut off from the epiblast it is called the vesicle of the labyrinth, or **Primary Auditory Vesicle**. **A. Teeth**. See *Teeth*. **A. Vertigo**, dizziness due to pathologic conditions of the ear. See *Vertigo* and *Ménière's Disease*.

Auditus (*aw-di'-tus*) [L.]. Hearing; the sense or power of hearing.

Auerbach's Ganglia. See *Ganglia, Table of*.

Auerbach's Plexus. See *Plexuses, Table of*.

Augment (*awg'-ment*) [*augmentum*, increase]. The increasing stage of a fever or other acute disease.

Augmentation (*awg-men-ta'-shun*) [*augmentatio*, an increasing]. 1. Same as *Augment*. 2. Increase in the violence of symptoms.

Augnathus (*awg-na'-thus*) [*αὐ*, besides; *γνάθος*, the jaw]. A monster with two lower jaws. See *Diprosopus*.

Aula (*aw'-lah*) [*αὐλή*, a hall or open court]. 1. The common mesal cavity of the cerebrum, it being also the anterior portion of the third ventricle. 2. In biology, a space or cavity formed by a colony of infusorians.

Aulatela (*aw-lat-e'-lah*) [*aula*, a hall; *tela*, a web]. The roof or covering membrane of the aula.

Aulic (*aw'-lik*) [*αὐλή*, a hall]. Belonging or pertaining to the aula. **A. Recess**, a triangular depression between the precommissure and the two fornicolumns of the brain.

Auliplexus (*aw-le-pleks'-us*) [*aula*, hall; *plexus*, a network]. The choroid plexus of the aula.

Aulix (*aw'-liks*) [*aulix*, a furrow]. The sulcus of Monro, a groove on the mesal surface of the thalamus just ventrad of the medicommissure.

Aulophyte (*aw'-lo-fit*) [*αὐλός*, a pipe or tube; *φυτόν*, a plant]. In biology, a symbiotic plant; one that lives within another, but not as a parasite.

Aura (*aw'-rah*) [*αὔρα*, a breath]. A breath of wind; a soft vapor. A sensation sometimes like a gentle

current of air rising from the limbs or body to the head; a frequent forerunner of an epileptic attack,—*aura epileptica*. Also applied to any slight symptom preceding an attack of any disease or paroxysm, as the *aura hysterica*, *aura vertiginosa*, etc. **A. seminalis theory**, a theory of Swammerdam, who, observing a strong odor from drone bees, supposed that this, permeating the body of the queen, fertilized the eggs.

Aural (*aw'-ral*) [*auris*, the ear]. Relating to the ear or to hearing. **A. Vertigo**. See *Ménière's Disease*.

Aurally (*aw'-ral-e*) [*auris*, the ear]. By means of the ear.

Auramin (*aw'-ram-in*) [*aurum*, gold; *amin*]. Yellow Pyoktanin, *q. v.*; a yellow anilin color used to some extent as a bactericide and preventive of suppuration. Unof. See *Conspectus of Pigments*, under *Pigment*.

Aurantia (*aw-ran'-she-ah*) [*aurantium*, an orange]. An orange coal-tar dye; an ammonium salt of hexanitro-diphenyl-amin. The use of this dye has been said to produce skin-diseases. See *Conspectus of Pigments*, under *Pigment*.

Aurantium (*aw-ran'-she-um*) [L.: *gen.*, *Aurantii*]. Orange. The fruit of *Citrus vulgaris* and *C. aurantium*. Both the flowers and the rind of the fruit are employed in medicine. The volatile oil from the rind is aromatic and a mild tonic but is used mainly as a flavor. **A. amara, Ext. Fld.**, bitter orange peel, alcohol, and water. Used as a flavor. Dose ʒss-j. **A. amara, Tinct.**, bitter orange peel 20, dilute alcohol, q. s. ad 100. Dose ʒj–ij. **A. corticis, Ol.**, the volatile oil expressed from the rind of the orange. Dose gtt. j–v. **A. dulcis, Tinct.**, sweet orange peel 20, dilute alcohol, q. s. ad 100. Dose ʒj–ij. **A., Elixir**, oil of orange 1, sugar 100, alcohol and water, q. s. ad 300. **A. flores, Aq.**, fresh orange flowers 40, water 200. Distil to 100 parts. **A. florum, Ol.**, "oil of neroli," a volatile oil distilled from fresh orange flowers. Dose gtt. j–v. **A. florum, Syr.**, sugar 85, orange-flower water q. s. A flavoring-agent. **A., Infus.** (B. P.). Dose ʒj–ij. **A., Infus., Comp.** (B. P.). Dose ʒj–ij. **A., Spt.**, oil of orange 6, alcohol 94. Dose according to quantity of alcohol desired. **A., Spt., Comp.**, oil of orange-peel, 20, oil of lemon 5, oil of coriander 2, oil of anise 5, deodorized alcohol q. s. **A., Syr.**, sweet-orange peel, precipitated calcium phosphate, each 5, sugar 70, alcohol and water q. s. **A., Tinct.** (B. P.). Dose ʒj–ij. **A., Tinct. Recentis** (B. P.), tinct. of fresh orange-peel. Dose ʒj–ij. **A., Vinum** (B. P.), 12 per cent. of alcohol.

Auricle (*aw'-rik-l*) [*auricula*, the outer ear]. The pinna and external meatus of the ear. The auricles of the heart are the two cavities between the veins and the ventricles. See *Circulation*, and *Heart*.

Auricular (*aw-rik'-u-lar*) [*auricula*, the outer ear]. Relating to the auricle, or to the ear; as the auricular nerve, arteries, veins, etc. The *Auricular arteries*, anterior and posterior, are branches of the temporal and external carotid, supplying the auricle of the ear. **A. Finger**, the little finger. **A. Fissure**. See *Fissure*. **A. Foramen**, the outlet of the meatus of the ear. **A. Lymphatics**, small lymphatic glands near the upper end of the sterno-mastoid muscle. **A. Point**, the central point of the auricular foramen. See *Craniometrical Points*.

Auriculars (*aw-rik'-u-larz*) [*auricula*, the ear]. In biology, the feathered area that conceals the ears in most birds; regio-auricularis.

Auriculo-bregmatic (*aw-rik'-u-lo-breg-mat'-ik*) [*auricula*, the ear; *βρέγμα*, a soft spot]. Relating to the auricle and to the bregma.

Auriculo-occipital (*aw-rik'-u-lo-ok-sip'-it-al*) [*auricula*, the ear; *occiput*, the back of the head]. Pertaining both to the ear and the back of the head. **A. Triangle**. See *Triangle*.

Auriculo-parotidean (*aw-rik'-u-lo-par-ot-id'-e-an*) [*auricula*, the ear; *παρωτίς*, the parotid gland]. Relating to the auricle and to the parotid gland.

Auriculo-temporal (*aw-rik'-u-lo-tem'-po-ral*) [*auricula*, the ear; *tempora*, the temples]. Relating to the auricle and to the temporal region. **A. nerve**, a branch of the inferior maxillary, supplying superficial parts about the auricle.

Auriculo-ventricular (*aw-rik'-u-lo-ven-trik'-u-lar*) [*auricula*, the ear; *ventriculus*, the ventricle]. Relating to an auricle and a ventricle of the heart. **A. opening**, the opening between the auricles and the ventricles of the heart.

Auriform (*aw'-rif-orm*) [*auris*, the ear; *forma*, shape]. Ear-shaped.

Aurigo (*aw-ri'-go*) [L.]. An incorrect form of the word *aurugo*.

Aurilave (*aw'-ril-āv*) [*auris*, the ear; *lavare*, to wash]. An ear-brush or ear-sponge mounted upon a handle.

Aurin (*aw'-rin*) [*aurum*, gold], $C_{19}H_{14}O_3$. Pararosolic acid; a body produced on boiling the diazo-hydrochlorid of para-rosanilin with water. It dissolves in glacial acetic acid and alcohol, crystallizes in dark-red needles or prisms with metallic luster, and decomposes when heated above 220°. It is a dye-stuff used in printing calicoes and woolens, and for pigments, and produces orange-red colors. See *Conspectus of Pigments*, under *Pigment*.

Auripigment (*aw-rip-ig'-ment*) [*auripigmentum*, golden pigment]. See *Orpiment*.

Auripuncture (*aw'-re-punkt-chūr*) [*auris*, ear; *punctura*, puncture]. Surgical or traumatic puncture of the membrana tympani.

Auris (*aw'-ris*) [L.]. The ear.

Auriscalp (*aw'-ris-kalp*) [*auris*, the ear; *scalpare*, to scrape]. An ear-pick or probe for the ear.

Auriscope (*aw'-ris-kōp*) [*auris*, the ear; *σκοπεῖν*, to examine]. An instrument for examining the ear, and especially the Eustachian passage; an otoscope.

Aurist (*aw'-rist*) [*auris*, the ear]. A specialist in diseases of the ear.

Aurugo (*aw-ru'-go*) [L.]. Yellowness; jaundice; icterus.

Aurum (*aw'-rum*) [L.: *gen.*, *Auri*]. Gold. Au = 196.7; quantivalence, III. One of the metals characterized as "noble" by the ancients, because of its weight and luster. It has a brilliant yellow color and will not tarnish. The metal is sometimes used as a plate on which artificial teeth are set. The chlorid locally is an escharotic. Internally its action resembles that of mercuric chlorid. In small doses it promotes digestion and stimulates the functions of the brain; in large doses it is a violent poison. It is useful in certain forms of dyspepsia, hypochondriasis, amenorrhea, and functional impotence. Poisoning is treated by albumen (eggs) or flour, and evacuation of the stomach. **A. brom.**, $AuBr_3$, is used in epilepsy and migraine. Dose gr. $\frac{1}{20}$–$\frac{1}{6}$. **A. et sodii chlor.**, soluble in water. Dose gr. $\frac{1}{30}$–$\frac{1}{10}$. **A. chloridum** (unof.). Soluble. Dose gr. $\frac{1}{60}$–$\frac{1}{30}$. Gold chlorid is also valued as a stain for sections of brain-tissue and of nerve-ganglia; it has been vaunted as a cure for the alcoholic habit.

Auscult, or **Auscultate** (*aws-kult'*; *aws'-kul-tāt*) [*auscultare*, to listen to]. To perform or practise auscultation; to examine by auscultation.

Auscultation (*aws-kul-ta'-shun*) [*auscultare*, to listen to]. A method of investigation of the functions and condition of the respiratory, circulatory, digestive, and other organs by the sounds they themselves give out, or

that are elicited by percussion. It is called *immediate*, when the ear is directly applied to the part, and *mediate*, if by the aid of the stethoscope. *Obstetric auscultation* is practised in pregnancy to detect or study the fetal heart-sounds or the placental murmur. See *Murmur*, *Respiration*, *Râles*, *Rhonchus*, *Bronchophony*, *Pectoriloquy*, *Egophony*, *Bruit*, *Souffle*, etc. **A.-tube**, in otology, an instrument for listening to the forced passage of air through the ear of another.

Auscultatory (*aws-kul'-tat-or-e*) [*auscultare*, to listen to]. Relating to auscultation. **A. Percussion**, the practise of auscultation by one person, while another practises percussion.

Australian (*aws-trāl'-yan*) [Australia]. Of or belonging to Australia. **A. Blight.** See *Angio-neurotic Edema*. **A. Sassafras.** See *Atherosperma moschata*.

Autacanthid (*aw-tak-an'-thid*) [αὐτός, self; ἄκανθα, a spine]. In biology, applied to a star-fish having many of the spines on special plates.

Autechoscope (*aw-tek'-o-skōp*) [αὐτός, self; ἦχος, sound; σκοπεῖν, to inspect]. A device for enabling a person to listen to sounds produced within his own body.

Autecious, or Autœcious (*aw-te'-shus*) [αὐτός, self; οἶκος, dwelling]. In biology, same as *Monecious*; also applied to parasitic fungi that pass through all the stages of their existence on the same host.

Autenrieth and Hinsberg's Test. See *Tests*, *Table of*.

Autocarpous (*aw-to-kar'-pus*) [αὐτός, self; καρπός, fruit]. In biology, said of a fruit consisting of a superior and free ovary.

Autocatheterism (*aw-to-kath'-et-er-izm*) [αὐτός, self; καθετήρ, a catheter]. The passage of a catheter by a person upon himself.

Autocatheterist (*aw-to-kath'-et-er-ist*) [αὐτός, self; καθετήρ, a catheter]. One who practises autocatheterism.

Autocatheterization (*aw-to-kath-et-er-iz-a'-shun*). The process of catheterizing one's self.

Autochthon (*aw-tok'-thun*) [αὐτόχθων, sprung from the land]. An aboriginal inhabitant.

Autochthonous (*aw-tok'-thon-us*) [αὐτόχθων, sprung from the land]. Aboriginal; formed (as a clot) in the place where it is found.

Autocinesis (*aw-to-sin-e'-sis*) [αὐτός, self; κίνησις, motion]. Motion that is voluntary, or apparently so.

Autocinetic (*aw-to-sin-et'-ik*) [αὐτός, self; κίνησις, motion]. Possessed of the power of spontaneous motion.

Autoclave (*aw'-to-klāv*) [αὐτός, self; *clavis*, a key]. 1. Self-fastening; closing itself. 2. An instrument for sterilizing or killing germ-life by steam-heat, the gauge indicating automatically the pressure, and therefore the degree of heat, to which the microörganism is subjected.

Autodiagnosis (*aw-to-di-ag-no'-sis*) [αὐτός, self; διάγνωσις, a discovering]. Self-diagnosis; the morbid impression sometimes possessed by a patient that he is affected with some particular disease. This impression may amount to a fixed and dominant idea.

Autodidact (*aw'-to-di-dakt*) [αὐτός, self; διδακτός, taught]. One who is self-taught in his profession.

Autodigestion (*aw-to-di-jes'-chun*) [αὐτός, self; *digere*, to digest]. Digestion of the walls of the stomach by the gastric juice consequent upon loss of the epithelium, or upon other gastric disease. Autopepsia.

Autogamous (*aw-tog'-am-us*) [αὐτός, self; γάμος, marriage]. In botany, a name applied to flowers that are habitually self-fertilizing.

Autogenesis (*aw-to-jen'-es-is*) [αὐτός, self; γένεσις, production]. Spontaneous generation; self-production.

Autogenetic (*aw-to-jen-et'-ik*) [αὐτός, self; γένεσις, production]. Developed by or due to autogenesis; produced, as disease, within the organism; not enthetic.

Autogenous (*aw-toj'-en-us*) [αὐτός, self; γένεσις, production]. Pertaining to diseases or conditions self-producing within the body and not derived from external or objective sources; applied to poisons generated in the body by its inherent processes,—*e. g.*, puerperal fever has been falsely supposed to be due to self-generation of the septic material.

Autographic (*aw-to-graf'-ik*) [αὐτός, self; γράφειν, to write]. Self-registering. **A. Skin**, a condition of vaso-motor paralysis, usually in hysterical patients, in which markings made upon the skin form quite persistent and intensely red traces. **A. Woman**, one with an *Autographic Skin*.

Autographism (*aw'-to-graf-izm*) [αὐτός, self; γράφειν, to write]. The condition observed in the so-called autographic skin; dermographism. See *Urticaria factitia*.

Autographist (*aw'-to-graf-ist*) [αὐτός, self; γράφειν, to write]. One who has an autographic skin.

Autohypnotism (*aw-to-hip'-not-izm*) [αὐτός, self; ὕπνος, sleep]. Mental stupor induced by dwelling intensely upon some all-absorbing delusion. See also *Statuvolence*.

Autoinoculation (*aw-to-in-ok-u-la'-shun*) [αὐτός, self; *inoculare*, to implant]. Reinoculation by virus obtained from the same person.

Autointoxication (*aw-to-in-toks-ik-a'-shun*). See *Autotoxic*.

Autokinesis (*aw-to-kin-e'-sis*) [αὐτός, self; κίνησις, movement]. 1. Voluntary movement; movement not reflex or allokinetic. 2. Movement that is apparently not volitional, but that arises from causes within the organism.

Autokinetic (*aw-to-kin-et'-ik*) [αὐτός, self; κίνησις, movement]. Pertaining to, or of the nature of, autokinesis.

Autolaryngoscopy (*aw-to-lar-ing-gos'-ko-pe*) [αὐτός, self; λάρυγξ, the larynx; σκοπεῖν, to examine]. The examination of one's larynx by himself.

Auto-massage (*aw-to-mas-sahzh'*) [αὐτός, self; μάσσειν, to knead]. Self-massage; therapeutic manipulations of the body performed by the patient himself.

Automatic (*aw-to-mat'-ik*) [αὐτοματίζειν, to act spontaneously]. Performed without the influence of the will. **A. Plugger**, an instrument adapted for pounding gold foil in the cavities of teeth.

Automatism (*aw-tom'-at-izm*) [αὐτοματίζειν, to act spontaneously]. The performance of acts without apparent volition, as seen in certain somnambulists and in some hysterical and epileptic patients.

Automatograph (*aw-to-mat'-o-graf*) [αὐτοματίζειν, to act spontaneously; γράφειν, to record]. An instrument for registering involuntary movements of the hand.

Automaton (*aw-tom'-at-on*) [αὐτόματος, spontaneous]. One who acts in an involuntary or mechanical manner. **A. Blowpipe.** See *Blowpipe*.

Automysophobia (*aw-to-mis-o-fo'-be-ah*) [αὐτός, self; μύσος, filth; φόβος, fear]. Insane dread of personal uncleanliness.

Autonomy (*aw-ton'-o-me*) [αὐτός, self; νόμος, law]. The independent existence of a disease or of a *materies morbi* within the organism.

Autonyctobatesis (*aw-to-nik-to-bat-e'-sis*) [αὐτός, self; νύξ, night; βαίνειν, to walk]. Somnambulism.

Autopathic (*aw-to-path'-ik*) [αὐτός, self; πάθος, suffering]. The same as *Endopathic*.

Autopepsia (*aw-to-pep'-se-ah*) [αὐτός, self; πέπτειν, to digest]. Autodigestion.

Autophagia (*aw-to-pha'-je-ah*) [αὐτός, self; φαγεῖν, to eat]. Self-consumption; emaciation.

Autophagous (*aw-toff'-ag-us*) [*αὐτός*, self; *φαγεῖν*, to eat]. In biology, self-feeding as soon as hatched.

Autophagy (*aw-toff'-a-je*) [*αὐτός*, self; *φαγεῖν*, to eat]. In starvation the absorption of the tissues themselves for nutrition. Life may be thus continued until about half the body-weight has been consumed.

Autophilia (*aw-to-fil'-e-ah*) [*αὐτός*, self; *φιλεῖν*, to love]. Morbid self-esteem.

Autophobia (*aw-to-fo'-be-ah*) [*αὐτός*, self; *φόβος*, fear]. A morbid dread of one's self, or of solitude.

Autophonia (*aw-to-fo'-ne-ah*). See *Autophony*.

Autophonomania (*aw-to-fo-no-ma'-ne-ah*) [*αὐτοφονία*, suicide; *μανία*, madness]. Suicidal mania.

Autophonous (*aw-toff'-on-us*) [*αὐτός*, self; *φωνή*, voice]. Having the character of autophony.

Autophony (*aw-toff'-o-ne*) [*αὐτός*, self; *φωνή*, voice]. In auscultation, the peculiar quality of the physician's own voice while listening to the patient's chest-sounds.

Autophthalmoscope (*aw-toff-thal'-mo-skōp*). See *Ophthalmoscope*.

Autophyllogeny (*aw-to-fil-oj'-en-e*) [*αὐτός*, self; *φύλλον*, leaf; *γένεσις*, production]. In biology, the production of leaves by leaves.

Autoplast (*aw'-to-plast*) [*αὐτός*, self; *πλάσσειν*, to form]. In biology: 1. The chlorophyll body. 2. A cell of independent spontaneous origin.

Autoplasty (*aw'-to-plas-te*) [*αὐτός*, self; *πλάσσειν*, to form]. A method of repairing the effects of a wound or lesion involving loss of tissue by grafting or implanting fresh parts taken from other portions of the patient's body.

Autopsic (*aw-top'-sik*) [*αὐτός*, self; *ὄψις*, a seeing]. Relating to an autopsy.

Autopsy (*aw'-top-se*) [*αὐτός*, self; *ὄψις*, a seeing]. 1. Examination, or seeing one's own self; self-inspection. 2. The post-mortem study of the body of another. The use of the word in this sense, however, is etymologically absurd. See *Necropsy*..

Autoscope (*aw'-to-skōp*) [*αὐτός*, self; *σκοπεῖν*, to see]. An instrument, *e. g.*, the ophthalmoscope, arranged for the examination of an organ by oneself.

Autoscopy (*aw-tos'-ko-pe*) [*αὐτός*, self; *σκοπεῖν*, to see]. The examination of one's own organs or disease by means of an autoscope.

Autosite (*aw'-to-sīt*) [*αὐτός*, self; *σίτος*, food]. 1. A monster capable of an independent existence after birth. 2. That member of a double fetal monstrosity that nourishes itself by its own organs as well as the other member, which is called the parasite.

Autositic (*aw-to-sit'-ik*) [*αὐτός*, self; *σίτος*, food]. Of the nature of an autosite.

Autostethoscope (*aw-to-steth'-o-skōp*) [*αὐτός*, self; *στῆθος*, the breast; *σκοπεῖν*, to examine]. A stethoscope so arranged that by it one may listen to his own chest-sounds.

Autosuggestion (*aw-to-sug-jes'-chun*) [*αὐτός*, self; *suggestio*, an intimation]. A term suggested by Page for that peculiar mental condition, often developing after railway accidents; it is intimately associated with the hypnotic state. In both of these conditions the mental spontaneity, the will, or the judgment, is more or less suppressed or obscured, and suggestions become easy. Thus the slightest traumatic action directed to any member may become the occasion of a paralysis, of a contracture, or of an arthralgia. It is also called *traumatic suggestion*.

Autotemnon (*aw-to-tem'-non*) [*αὐτός*, self; *τέμνειν*, cut]. In biology, the self-dividing unicellular organism.

Autotherapy (*aw-to-ther'-a-pe*) [*αὐτός*, self; *θεραπεία*, a waiting on]. The spontaneous or self-cure of a disease.

Autotoxemia (*aw-to-toks-e'-me-ah*) [*αὐτός*, self; *τοξικόν*, a poison; *αἷμα*, blood]. Toxemia from poisons derived from the organism itself.

Autotoxis (*aw-to-toks'-is*) [*αὐτός*, self; *τοξικόν*, poison]. Self-empoisonment through the absorption of noxious products of katabolism, as in *uremia*. Cf. *Autointoxication*.

Autotoxin (*aw-to-toks'-in*) [*αὐτός*, self; *τοξικόν*, a poison]. Any product of tissue-metamorphosis within the organism that has a toxic effect upon that organism.

Autotransfusion (*aw-to-tranz-fu'-zhun*) [*αὐτός*, self; *transfusio*, a pouring from one vessel into another]. The transfer of the blood to the brain and other central organs by elevating the hips and legs, and by the use of elastic bandages.

Autovaccination (*aw-to-vaks-in-a'-shun*) [*αὐτός*, self; *vaccinare*, to vaccinate]. The reinsertion of fresh vaccine-lymph upon the same person from whom it is taken, either by the vaccinated person himself or by some other person, whether intentionally or by accident.

Autumn (*aw'-tum*) [*autumnus*, autumn]. The fall of the year. **A. Catarrh.** Synonym of Hay-fever, occurring in August and the fall of the year.

Autumnal (*aw-tum'-nal*) [*autumnus*, autumn]. Pertaining to the fall of the year. **A. Fever.** Synonym of Typhoid Fever, *q. v.*

Auxanometer (*awks-an-om'-et-er*) [*αὐξάνειν*, to grow; *μέτρον*, measure]. An instrument used in biologic study for measuring the growth of young organisms.

Auxe (*awks'-e*) [*αὔξη*, increase]. Enlargement in bulk or volume.

Auxesis (*awks-e'-sis*) [*αὔξησις*, enlargement]. Increase in size or bulk. Hypertrophy is a word often incorrectly used where Auxesis is meant.

Auxetic (*awks-et'-ik*) [*αὐξητικός*. enlargement]. Characterized by auxesis.

Auxiliary (*awks-il'-e-a-re*) [*auxilium*, a helper]. Aiding.

Auxilium (*awks-il'-e-um*) [L., "help"]. A wheeled vehicle or ambulance with couch and mattresses, for use in the service of field military hospitals.

Auxocardia (*awks-o-kar'-de-ah*) [*αὔξη*, an increase; *καρδία*, the heart]. The normal increase of the volume of the heart during diastole, in distinction from meiocardia, the diminution during systole.

Auxospore (*awks'-o-spōr*) [*αὔξειν*, to grow; *σπόρος*, seed, offspring]. A large spore produced, either asexually, or by conjugation, in the Diatomaceæ.

Auxotonic (*awks-o-ton'-ik*) [*αὔξειν*, to grow; *τόνος*, tension]. Determined by growth. **A. Movements,** in biology, movements due to growth rather than to stimulation.

Ava Kava (*ah'-vah kah'-vah*). See *Kava-Kava*.

Avalanche Theory. Pflüger's opinion that nerve-energy gathers intensity as it passes toward the muscles.

Aveling's Apparatus. An apparatus employed in the immediate transfusion of blood. **A. Curve.** The S-shaped curve of the handles of obstetric forceps. **A. Operation.** See *Operations, Table of*.

Avena (*av-e'-nah*) [L.]. A genus of plants. Oat. **A. farina,** oatmeal. **A. sativa,** the embryo of the the seed of the common oat plant. It contains starch, gluten, a ferment called diastase, and a small amount of alkaline phosphates, and is a nutritious food. Dose of the concentrated tinct. or fld. ext. ♏x–℥ij. The pericarp contains an alkaloid possessed of slight narcotic powers. Unof.

Avenin (*av-e'-nin*) [*avena*, the oat]. 1. A precipitate made from a tincture of *avena sativa*, or the oat. It is a nerve-stimulant and tonic. Unof. 2. A

nitrogenous principle obtained from the oat, and nearly identical with legumin; the gluten-casein of oats.

Avens (*av'-enz*) [Welsh, *afans*]. A name given to several plants of the genus *Geum*. **A. Root**, the root of *Geum rivale*, a tonic and astringent. It contains gallic and tannic acids. Dose of fld. ext. ʒss–j. Unof.

Avery's Operation. See *Operations, Table of.*

Aviation (*a-ve-a'-shun*) [*avis*, a bird]. Artificial flight.

Avidity (*av-id'-it-e*) [*avidus*, greedy]. In chemistry, the tendency of certain weak acids, in suitable conditions, to dispossess even the strongest acids and to unite with their bases.

Avocado Pear (*av-o-ka'-do*). See *Alligator Pear.*

Avogadro, Law of. See *Law* and *Ampère.*

Avoirdupois Weight (*av-or-du-poiz' wāt*) [Fr., *avoir*, to have; *du poids*, of weight]. The common English weight used for all commodities except precious metals, gems and medicines. The pound is equal to 7000 grains Troy, or 453.54 grams, or 16 ounces. The ounce is divided into 16 drams, each of 27.34 grains. See *Weights and Measures.*

Avulsion (*av-ul'-shun*) [*avulsio; avellere*, to tear away]. A traumatic or surgical tearing or wrenching away of a part, as a polypus, a limb, etc.

Awn (*awn*) [*ἄχνα*, chaff]. The bristle or beard of barley, oats, etc; or any other similar appendage.

Axial (*aks'-e-al*) [*axis*, axis]. Pertaining to or situated in an axis. **A. Current.** Same as *A. Stream.* **A Hypermetropia.** See *Hypermetropia.* **A. Stream.** The name given to the red column in a vessel at the seat of inflammation. The blood-corpuscles are separated, the red being packed together in the center of the vessel, while between this and the walls of the vessel is a clear layer of serum in which the white corpuscles roll along. See *Poiseuille's Space.*

Axiferous (*aks-if'-er-us*) [*axis*, axis; *ferre*, to bear]. In biology, producing a stem-like, leafless axis, as certain fungi and algæ.

Axilemma (*aks'-il-em-ah*) [*axis*, axis; *λέμμα*, husk, skin]. In histology, an elastic sheath composed of neurokeratin enclosing the axis cylinder of medullated nerve-fibers.

Axilla (*aks-il'-ah*) [L.: *pl.*, *Axillæ*]. The armpit.

Axillar (*aks'-il-ar*) [*axilla*, axil]. In biology, one of the tufts of soft feathers growing from the axilla, and forming part of the under wing-coverts of a bird.

Axillary (*aks'-il-a-re*) [*axilla*, axil]. Pertaining to the axilla. **A. Artery**, the continuation of the subclavian artery, extending from the lower border of the first rib to the insertion of the pectoralis major muscle, where it becomes the brachial. See *Arteries, Table of.* **A. Glands**, the lymphatic glands in the axilla. **A. Plexus**, the brachial plexus, formed by the last three cervical and the first dorsal nerves. **A. Space**, the irregular conical space of the axilla. **A. Vein**, a continuation of the brachial, corresponding with the artery and terminating in the subclavian vein.

Axin (*aks'-in*) [*axinus*]. A fatty and varnish-like substance produced in Mexico by an insect, *Coccus axinus*. It is used in the arts and locally in medicine, being regarded as a good vulnerary and resolvent.

Axis (*aks'-is*) [L. for axletree]. 1. An imaginary line passing through the center of a body. 2. The second cervical vertebra. **A., Basicranial**, in craniometry, a line drawn from the basion to the middle of the anterior border of the cerebral surface of the sphenoid bone. **A., Basifacial**, in craniometry, a line drawn from the anterior border of the cerebral surface of the sphenoid to the alveolar point. **A., Binauricular**, in craniometry, the imaginary line joining the two auricular points. **A., Cerebrospinal**, the central nervous system. **A. Cylinder** (of a nerve), the conducting or essential part of a nerve lying in the center and surrounded by the sheath of Schwann. It is also called the axis-cylinder of Purkinje. **A., Frontal** (of the eye), an imaginary line running through the eyeball from right to left, and corresponding with the movements of elevation and depression of the eyeball. **A., Optic**, the line from the corneal apex to the macula lutea. **A., Optical**, an imaginary line passing from the center of the eye-piece of a microscope through the body, objective, stage and sub-stage, to the mirror. **A., Sagittal** (of the eye), an imaginary line running through the eyeball from before backward, and coinciding with the line of vision. **A., Visual**, the line from the object through the nodal point to the macula.

Axle Teeth (*aks'-l tēth*). See *Azzle Teeth.*

Axogaster (*aks'-o-gas-ter*) [*ἄξων*, axis; *γαστήρ*, stomach]. In biology the principal intestine, the *gaster principalis.*

Axon (*aks'-on*) [*ἄξων*, an axis]. The axis of the body; especially the bony axis of the neuro-skeleton.

Axospermous (*aks-o-sperm'-us*) [*ἄξων*, axis; *σπέρμα*, seed]. In biology, applied to fruits the seeds of which are attached to an axial placenta.

Axungia (*aks-un'-je-ah*) [L.: *gen.*, *Axungiæ*]. Fat; lard; adeps.

Ayres's Operation. See *Operations, Table of.*

Azale (*az-āl'*). See *Conspectus of Pigments*, under *Pigment.*

Azalein (*az-a'-le-in*). Same as *Rosanilin.* See also *Conspectus of Pigments*, under *Pigment.*

Azarin (*az'-ar-in*). See *Conspectus of Pigments*, under *Pigment.*

Azedarach (*az-ed'-ar-ak*) [Pers. *āzād*, free; *dirakht*, a tree]. Pride of China, the bark of *Melia azedarach*, an Asiatic tree naturalized in the southern U. S. It occurs in curved pieces or quills, having a sweetish taste. The decoction, ℥ij to Oj, is a gastro-intestinal irritant and anthelmintic against the round-worm. Dose ℥ss–j. **A., Ext. Fld.** Dose ʒj. **A., Tinctura,** 1 to 8. Dose ʒss–ij. Unof.

Azerin (*az'-er-in*) [badly formed from *ἀ* priv.; *ξηρός*, dry]. A ferment analogous to ptyalin and found in the digestive secretions of *Drosera*, *Nepenthes*, and probably all other insectivorous plants. It is actively antiseptic and strongly deliquescent, and hastens rapidly the wetting of flies that fall into its solution.

Azobenzene (*az-o-ben'-zēn*) [*ἀ* priv.; *ζωτός*, living; *benzoin*], $C_{12}H_{10}N_2$. A compound formed by the action of sodium amalgam upon the alcoholic solution of nitro-benzene. It forms orange-red, rhombic crystals, readily soluble in alcohol and ether, but sparingly soluble in water. It melts at 68°, and distils at 293°.

Azo-compounds. In chemistry, compounds intermediate between the nitro-compounds and the amido-compounds, and made from the former by partial reduction, or from the latter by partial oxidation.

Azodiphenyl Blue. Same as *Coupier's Blue.*

Azo-dyes. A well defined group of the coal-tar colors, all containing the diatomic group —N = N—, bound on either side to a benzene radical. They may be prepared by reduction of the nitro-compounds in alkaline solutions, or by acting on diazo-compounds with phenols or amins of the aromatic series. The azo-dyes are the amido-derivatives of simple azo-compounds, and are to be distinguished as amidoazo-dyes and oxyazo-dyes. See *Conspectus of Pigments*, under *Pigment.*

Azoic (*az-o'-ik*) [*ἀ* priv.; *ζωή*, life]. In biology, destitute of living organisms.

Azolitmin (*az-o-lit'-min*) [*ἀ* priv.; *ζωή*, life; Dan. *lak*, lac; *moes*, pulp], $C_7H_7NO_4$. A deep blood-red coloring matter obtained from litmus. See *Conspectus of Pigments*, under *Pigment*.

Azoöspermia (*ah-zo-o-sper'-me-ah*) [*ἀ* priv.; *ζωή*, life; *σπέρμα*, seed]. Want of, or deficient vitality of, the spermatozoids.

Azoöspermism (*ah-zo-o-sperm'-izm*) [*ἀ* priv.; *ζωή*, life; *σπέρμα*, seed]. Absence of the spermatic elements from the seminal fluid.

Azorella (*az-o-rel'-ah*) [L.]. A genus of umbelliferous plants. **A. glebaria.** See *Balsam Bog*.

Azoresorcin (*az-o-rez-or'-sin*) [*ἀ* priv.; *ζωτός*, living; Fr., *résorcine*], $C_{12}H_9NO_4$. A derivative of resorcin, occurring as dark-red and greenish crystals.

Azote (*az'-ōt*) [*ἀ* priv.; *ζωή*, life]. A synonym of nitrogen. *Azotic acid*, nitric acid.

Azotemia (*az-o-te'-me-ah*) [*azotum*, nitrogen; *αἷμα*, blood]. The presence of nitrogenous compounds in the blood; uremia.

Azotenesis (*az-o-ten-e'-sis*) [*azotum*, nitrogen]. Any one of a class of diseases said to be due to a superabundance of nitrogen in the system, such as carcinoma, scurvy, gangrene, etc.

Azotometer (*az-o-tom'-et-er*) [*azotum*, nitrogen; *μέτρον*, a measure]. A device for the measurement of nitrogen.

Azoturia (*az-o-tu'-re-ah*) [*azotum*, nitrogen; *urina*, the urine]. An increase of the urea and urates in the urine.

Azoxybenzene (*az-oks-e-ben'-zēn*) [*azotum*, nitrogen; *ὀξύς*, sharp; *benzene*], $C_{12}H_{10}N_2O$. A compound obtained by the reduction of nitrobenzene. It forms long yellow needles, easily soluble in alcohol and ether, but not in water. It melts at 36°.

Azulene (*az'-u-lēn*). Same as *Cerulein*.

Azulin (*az'-u-lin*). See *Conspectus of Pigments*, under *Pigment*.

Azure (*az'-ūr*) [ME., *azure*, blue]. Sky-blue. **A. Blue.** Same as *Cobalt Blue*, and *Ultramarine*. **A. Malachite.** See *Azurite* in *Conspectus of Pigments*, under *Pigment*.

Azurin (*az'-ūr-in*). Same as *Azulin*.

Azurite (*az'-ūr-it*). See *Conspectus of Pigments*, under *Pigment*.

Azygomatous (*ah-zi-gom'-at-us*) [*ἀ* priv.; *ζύγωμα*, the zygomatic arch]. Destitute of zygomatic arches, as the shrews.

Azygos (*az'-ig-os*) [*ἀ* priv.; *ζυγός*, a yoke]. Applied to parts that are single, not in pairs. **A. uvulæ**, a small muscle of the uvula. **A. Vein**, a vein connecting the superior and inferior venæ cavæ.

Azygospore (*az-i'-go-spōr*) [*ἀ* priv.; *ζυγόν*, yoke; *σπορά*, seed]. An asexually produced spore, but resembling the sexual spore or zygospore.

Azygous (*az'-ig-us*) [*ἀ* priv.; *ζυγός*, a yoke]. Not paired; or, if paired, so blended as to seem one organ.

Azymia (*ah-zim'-e-ah*) [*ἀ* priv.; *ζύμη*, a ferment]. Absence or lack of ferment.

Azymic (*ah-zim'-ik*) [*ἀ* priv.; *ζύμη*, a ferment]. Not giving rise to fermentation.

Azzle Teeth (*az'-l-tēth*) [E. dial., *assal teeth*]. A name given to the molar teeth.

B

B. In chemical terminology the symbol of *Boron*.

Ba. The chemical symbol of *Barium*.

B. A. A contraction of *Balneum aquæ*, a water-bath; also, of *Balneum arenæ*, a sand-bath, and of *Artium Baccalaureus*, Bachelor of Arts.

B. M. A contraction of *Balneum maris* a sea-water bath; also of *Medicinæ Baccalaureus*, Bachelor of Medicine.

B. V. A contraction of *Balneum vaporis*, a vapor-bath.

Babbitt Metal, a compound of metals used in prosthetic dentistry for dies in swaging plates.

Babe (*bāb*) [ME., *babe*]. An infant.

Babes' Method. See *Stains, Table of*. **B. Oven.** See *Oven*.

Babul Gum (*ba-bool'*) [Bengal]. The gum of the tree *Acacia arabica*, or babul; an inferior sort of gum arabic.

Baby (*ba'-be*). Same as *Babe*. **B.-farm.** An institution for raising orphan and pauper infants. **B.-farming**, the business of receiving and caring for the infants of those who, for any reason, may be unable or unwilling to bring up their own children.

Baccaceous (*bak-a'-she-us*) [*bacca*, a berry]. Like a berry; baccate.

Baccate (*bak'-āt*) [*bacca*, a berry]. Berry-like, or bearing berries.

Baccelli's Method. A method of treating aneurysm by passing a wire thread into the sac. See *Treatment*. **B. Sign.** See *Signs and Symptoms, Table of*.

Baccharis (*bak'-ar-is*) [*βάκκαρις*, a fragrant herb]. A genus of composite trees. **B. halimifolia**, the groundsel tree, a composite-flowered shrub of N. America; a decoction of the leaves and bark is a popular demulcent and pectoral medicine. Unof.

Bacchia (*bak-'e-ah*, or *bak-i'-ah*) [*Bacchus*, the god of wine]. A synonym of *Acne rosacea*, a condition often found in drunkards. **B. rosacea.** Synonym of *Acne rosacea*.

Bacillar, or Bacillary (*bas'-il-ar; bas'-il-a-re*) [*bacillum*, a rod; *bacillus*]. 1. Relating to bacilli or to a bacillus. 2. Consisting of or containing rods.

Bacilli (*bas-il'-i*) [*bacillum*, a rod]. 1. Plural of *Bacillus*, *q. v.* 2. In pharmacy, cylindrical lozenges made by cutting the lozenge mass, and rolling it into a soft cylinder, on a pill-machine.

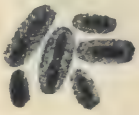
Bacillicidal (*bas-il-is-īd'-al*) [*bacillum*, a rod; *cædere*, to kill]. Destructive to bacilli.

Bacillicide (*bas-il'-is-īd*) [*bacillum*, a rod; *cædere*, to kill]. 1. Destructive to bacilli. 2. An agent that destroys bacilli.

Bacilliculture (*bas-il'-e-kul-chūr*) [*bacillum*, a rod; *cultura*, cultivation]. The artificial culture of bacilli for the purpose of studying their nature and life.

Bacilliform (*bas-il'-if-orm*) [*bacillum*, rod; *forma*, form]. Having the shape or appearance of a bacillus.

Bacillum (*bas-il'-um*) [L., a rod, a stick]. A stick; a cylindrical troche; an instrument for carrying a sponge; any one of the rods in the layer of rods and cones of the retina.



Bacilluria (*bas-il-u'-re-ah*) [*bacillum*, a rod; *οὖρον*, urine]. The presence of bacilli in the urine.

B. zopfii (various stages of growth) (× 1000).

Bacillus (*bas-il'-us*) [dim. of *baculum; bacillum*, a small staff: *pl.*, *Bacilli*]. (*a*) A genus of the *Schizomycetes* established by Cohn; synonym, *Bacteridium*, Davaine; *Bacterium*, Delafond; *Vibrio*, Cohn; and including all the elongated forms except such as are spiral and have a gyratory motion, which are classed in the genus *Spirillum*. The bacilli are rigid or flexible, motile or non-motile, and reproduce either by direct fission or by endogenous spore-formation. See *Bacteria, Synonymatic Table of.* (*b*) An individual of the genus *Bacillus*. (*c*) A medicated rod or bougie. (*d*) Any rod-like body, or specifically, one of the retinal rods. (*e*) In botany, the term applied to the cotyledon of certain plants, *e.g.*, the hyacinth; or to the basal portion of some flower-clusters.

Back (*bak*) [ME., *bak*]. Dorsum; posterior aspect. **B. Combination.** See *Combination*. **B. Draught** (*bak' draft*), the inspiration of whooping-cough. **B. Posture.** See *Postures*. **B. Stroke of the Heart.** See *Diastole*.

Backache (*bak'-āk*) [ME., *bak; aken*]. Pain in the back.

Backbone (*bak'-bōn*) [ME., *bak; boon*]. The vertebral column.

Back-cut of Salmon. See *Salmon*, and *Operations, Table of.*

Bacony Infiltration (*ba'-kon-e in-fil-tra'-shun*). Same as *Albuminoid Infiltration.*

Bacteremia (*bak-ter-e'-me-ah*) [*bacterium*, rod; *alma*, blood]. The presence of bacteria in the blood.

Bacterium (*bak-te'-re-um*) [βακτήριον, a little stick: *pl.*, *Bacteria*]. 1. A genus of schizomycetous fungi established by Ehrenberg (1838) and Dujardin (1841); characterized by short, linear, inflexible, rod-like forms, without tendency to unite into chains or filaments. 2. The distinction between the genus *Bacterium* (Dujardin), and the genus *Bacillus* (Cohn) is not well founded, and all straight, elongated forms should be referred to the latter genus. The word bacteria as now employed is practically synonymous with Schizomycetes, Microörganisms, or Microbes, and includes those minute Thallophytes, with or without chlorophyll, related on the one hand to the *Nostocaceæ*, and on the other to the *Flagellata*. Morphologically, bacteria are either spherical (**cocci**); in the form of straight rods (**bacilli**); or of twisted rods (**spirilli**). They occur either free, as filaments in layers, or in cube-like packets. Frequently large gelatinous masses called *Zoöglœa* are formed. As regards growth they are grouped either as **Endosporous bacteria**, including those that form spores endogenously; or as **Arthrosporous bacteria**, including those that multiply by fission. Bacteria are either **aërobic**, *i.e.*, dependent upon the presence of free oxygen for the purpose of vegetation, or **anaërobic**, in which free oxygen is not essential, as they possess the power of appropriating the oxygen of unstable organic combinations, thus acting as disorganizing, fermentative, or putrefactive agents. Again, certain forms appear to possess the ability to flourish in either condition, and are known as **facultative anaërobic.** Bacteria are either motile or non-motile; they may exist as **saprophytes, facultative parasites, strict, obligate,** or **true parasites.** Those that produce pigment are known as **chromogenic**; those that produce fermentation as **zymogenic**; those that affect adversely the health of plants or animals as **pathogenic.** See *Bacteria, Synonymatic Table of*, and special terms under appropriate headings.

SYNONYMATIC TABLE OF BACTERIA.*

Actinobacter du lait visqueux, Duclaux. Found in ropy milk. *aër., nliqf., npg.* **Actinobacter polymorphus.** See *Bacillus butyricus*, Prazmowski. **Actinomyces bovis,** Harz. Syn. *Cladothrix bovis, Cladothrix canis,* Rabe (?) Found in Actinomycosis and in sputum of tuberculous patients. Discovered by Langenbeck (1845); first correctly described by Israel (1878). Bollinger first to recognize it in cattle. Considered by Paltauf, Israel, and Wolf as a pleomorphic schizophyte. Occurs in grains the size of a poppy-seed; composed of radiating threads. Stains with anilin dyes; is not decolorized by Gram's method. Grows on egg albumin, gelatin, potato, and bouillon. *liqf., pg., chg.* (Sulphur-yellow.) **Æthylbacillus de Fitz.** See *Bacillus subtilis*, Ehrenberg, etc. *Amylobacter clostridium*, Trecul. See *Bacillus butyricus*, Prazmowski. **A New Bacillus of Malignant Edema,** Klein. See *Bacillus œdematis aërobicus*, Klein. **Anthrax bacillus.** See *Bacillus anthracis*, Pollender and Davaine. **Arthrobacterium aceti,** De Bary. See *Bacillus aceti*, Kützing. **Arthrobacterium chlorinum,** De Bary. See *Bacillus chlorinus*, Engelmann. **Arthrobacterium merismopœdioides,** De Bary. See *Bacillus merismopœdioides*, Zopf. **Arthrobacterium pastorianum,** De Bary. See *Bacillus pasteurianus*, Hansen. **Arthrobacterium viride,** De Bary. See *Bacilius viridis*, Van Tieghem. **Arthrobacterium zopfii.** See *Bacillus zopfii.* **Arthro-kokkaceen,** Ger. Arthrospore bacteria forming only cocci and cocci-chains. **Ascobacillus citreus,** Unna and Tommasoli. Syn. *Ascococcus citreus.* On the skin, in cases of eczema seborrhœicum. *aër., liqf., mot., chg.* (lemon-yellow), *npg.* **Ascobacterium ulvina,** Van Tieghem. Short rods occurring in liquids containing decaying leguminous seeds. **Ascococcus billrothii,** Cohn. Lobulated masses, producing a viscous fermentation of saccharine fluids and evolving butyric acid in solution of ammonium tartrate. **Ascococcus citreus,** Unna and Tommasoli. See *Ascobacillus citreus.* **Ascococcus johnei,** Cohn. See *Micrococcus botryogenus*, Rabe. **Ascococcus mesenteroides,** Cienkowski. See *Leuconostoc mesenteroides*, Cienkowski. **Ascococcus vibrans,** Van Tieghem. Upon water containing *Beggiatoæ;* distinguished from *A. billrothii* by the whirling and oscillating of the cells. **Aussatzbacillus,** Ger. See *Bacillus lepræ*, Hansen. **Bacille aérogène,** Fr. See *Bacillus lactis aërogenes*, Miller. **Bacille aérophile,** Fr. See *Bacillus aërophilus*, Liborius. **Bacille brun de la pomme de terre,** Fr. See *Spirillum choleræ asiaticæ*, Koch. **Bacillus** *a*, Vignal. See *Bacillus buccalis*, Vignal. **Bacillus aceti,** Kützing, Sommer. Syn., *Arthrobacterium aceti*, De Bary. *Bacillus aceticus*, Flügge; Bactérie du vinaigre; *Bacterium aceti*, Lanzi. Bacterium der Essiggährung; Essigferment; Essigpilz; *Micrococcus aceti; Mycoderma aceti*, Pasteur. Mycoderme du vinaigre. *Ulvina aceti*, Kützing. Found in air and vinegar; common. Large cylindrical cells of varying size. Absorbs oxygen from air and oxidizes alcohol to acetic acid; produces vinegar; may, by further oxidation, convert this into carbonic acid and water. *aër., nliqf., mot., npg., pleom.* Cf. *Bacillus pasteurianum*, Hansen; *Bacterium xylinum*, A. J. Brown. **Bacillus aceticus,** Flügge. See *Bacillus aceti*, Kützing. **Bacillus acidiformans,** Sternberg. Obtained from the liver of a yellow fever cadaver. *aër., facanaër., nliqf., nmot., pg.* **Bacillus acidi lactici,** Hueppe. Syn., *Bacterium lactis*, Lister. Bactérie ou Bacille de la fermentation lactique, Fr.; Bacterium der Milchsäuregährung, Ger. Found in the air and in sour milk. *aër., facanaër., nliqf., nmot., npg.* **Bacillus actinobacter,** Duclaux. Syn., *Actinobacter polymorphus.* A minute capsulated bacillus, rendering milk gelatinous and ropy. *aër., nmot.* See *Bacillus butyricus*, Prazmowski. **Bacillus aërogenes,** I, II, III, Miller. Syn., *Bacterium aërogenes*, Miller. *Helicobacterium aërogenes*, Miller. Three small bacilli from the alimentary tract of healthy persons. *aër., nliqf., mot., npg.* See *Bacillus lactis aërogenes*, Escherich. **Bacillus aërogenes capsulatus,** Welch and Nuttall. Found in the blood-vessels in a case of thoracic aneurysm. *anaër., nliqf., nmot., npg.* **Bacillus aërophilus,** Liborius. Obtained from the air. *aër., liqf., nmot., npg.* Syn., *Bacille aërophile*, Fr. *Bacillus aëruginosum.* See *Bacillus pyocyaneus*, Gessard. **Bacillus albuminis,** Bienstock. Found abundantly in feces. Decomposes albumin, hence its name. *aër., mot., npg.* **Bacillus albus,** Becker, Eisenberg. The white bacillus of water. Weisser Bacillus aus Wasser, Ger. *aër., nliqf., mot., npg.* **Bacillus albus anaërobiescens,** Vaughan. Found in water. *aër., facanaër., nliqf., nmot., npg.* **Bacillus albus cadaveris,** Strassmann and Stricker. Found in blood of cadaver. *aër., liqf., mot., pg.* **Bacillus albus putridis,** De Bary. Found in water. *aër., liqf., mot., npg.* **Bacillus allantoides,** Klein. Obtained from the air. *aër., mot., npg.* Not sufficiently studied. **Bacillus allii,** Griffiths. Syn., *Bacterium allii.* Found on surface of decaying onions. *aër., chg.* (green), *npg.* **Bacillus alvei,** Cheshire and Cheyne. Syn., *Bacillus preussii*, Ciesielski. *Bacillus melittopthorus*, Cohn. Bacillus of foul brood. Bacillus der Faulbrut, Ger. Obtained from bee larvæ infected with "foul brood." *aër., facanaër., liqf., mot., pg.* Also pathogenic for mice and guinea pigs. Cf. Bacillus of Canestrini. **Bacillus amylobacter,** Van Tieghem. See *Bacillus butyricus*, Prazmowski. *Bacillus amylovorous*, Burrill. See *Bacillus butyricus*, Botkin, Prazmowski. **Bacillus amylozyma,** Perdrix. Found in hydrant water (Paris). *anaër., nliqf., mot.* Pathogenesis not determined. **Bacillus anaërobicus liquefaciens,** Sternberg. Obtained from contents of intestine of yellow fever cadaver. *anaër., liqf., nmot.* Pathogenesis not determined. **Bacillus anthracis,** Pollender and Davaine. Syn., *Bacterium anthracicum*, Bollinger. *Bacterium anthracis*, Zopf. *Bacterium carbunculare*, Pollender, Brauell, Delafond, Davaine. *Metallacter anthracis*, Trevisan. Bacille du charbon, Fr.; Bactéridie charbonneuse, Fr.; Bactéridie du charbon, Fr.; Bacillus anthracis e carbonchio, Bacillo del carbonichio, It.; Milzbrandbacillus, Ger. Bacillus of Braxy. Found in the blood of animals and persons infected with anthrax. *aër., facanaër., liqf., nmot., pg.* **Bacillus aquaticus liquefaciens,** Pokrowsky. Found in river water (Kura), and hydrant water (Tiflis). **Bacillus aquatilis,** Frankland. Found in well-water in the chalk-formations of Kent, Eng. *aër., liqf., mot., npg.* **Bacillus aquatilis sulcatus,** I, II, III, IV, V, Weichselbaum. Found in hydrant water (Vienna). *aër., facanaër., nliqf., mot., npg.* **Bacillus arborescens,** Frankland. Found in hydrant water (Lon-

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liq f.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

don). *aër.*, *liqf.*, *oscl.*, *chg.* (orange red), *npg.* **Bacillus argenteo-phosphorescens,** I, II, III, Katz. Obtained respectively from sea-water, phosphorescent pieces of fish, and cuttle-fish (Sydney, N. S. W). *aër.*, *nliqf.*, *mot.* (except II), *phos.*, *npg.* **Bacillus argenteo-phosphorescens liquefaciens,** Katz. Obtained from sea-water, near Sydney, N. S. W. *aër.*, *facanaër.*, *liqf.*, *mot.*, *phos.*, *npg.* **Bacillus aurantiacus,** Frankland. Found in well-water. *aër.*, *nliqf.*, *mot.*, *chg.* (orange), *npg.* **Bacillus aureus,** Adametz. Found in water; also on the skin in cases of eczema seborrhœicum, Unna and Tommasoli. *aër.*, *nliqf.*, *mot.*, *chg.* (golden yellow). **Bacillus** *b*, Vignal. See *Bacillus buccalis*, Vignal. **Bacillus B.,** Hofmann. Found in the larvæ of *Liparis monacha*. The cause of Flacherie, or Schlaffsucht. **Bacillus bei Diphtherie des Menschen,** Ger. See *Bacillus diphtheriæ*, Klebs and Löffler. **Bacillus bei Erysipel am Kaninchen, Bacillus bei Erysipel am Kaninchenohr,** Ger. See *Bacillus erysipelatosus leporis*, Koch. **Bacillus bei Lichen ruber,** Ger. See Bacillus of Lichen ruber, Laser. **Bacillus bei Keuchhusten,** Ger. See *Bacillus tussis convulsivæ*, Afanassiew. **Bacillus beri-beri-cus,** Lacerda. Syn., *Micrococcus of beri-beri*, Lacerda, Neisseria, Winkleri, Bacille du beri-beri, Fr. Bacillus of Beri-beri, Eykmann. Found by Lacerda, Pekelharing, and Winkler, in the blood of persons affected with beri-beri. Negative results were obtained by Eykmann and Sternberg. The disease is now held to be identical with dochmiasis, produced by the nematode worm *Dochmius duodenalis*, Leuckart. See Beri-beri. **Bacillus berolinensis indicus,** Clässen. Found in water of the Spree. *aër.*, *nliqf.*, *mot.*, *chg.* (indigo-blue), *npg.* **Bacillus bienstockii,** Bienstock. Found in human feces. *mot.*, *pg.* **Bacillus brassicæ,** Pommer. Found in infusions of cabbage-leaves. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *npg.* **Bacillus brunneus,** Adametz and Weichmann. Found in water. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *npg.* **Bacillus buccalis,** Vignal. Syn., *Bacillus ulna*, Vignal. *Bacillus a*, Vignal; *Bacillus b*, Vignal; *Bacillus f*, Vignal; *Bacillus g*, Vignal; *Bacillus j*, Vignal. *Bacillus buccalis fortuitus*, Vignal. *Bacillus buccalis minutus*, Vignal. *Leptothrix buccalis*, Vignal. From the salivary secretions of healthy persons. *aër.*, *liqf.*, *npg.*, *chg.* (golden yellow). **Bacillus buccalis maximus,** Miller. Found in the mouth of man. Common. Biologic characters undetermined. **Bacillus buccalis minutus,** Vignal. See *Bacillus buccalis*, Vignal. **Bacillus butylicus,** Fitz. Syn., Bacille butylique, Fr. See *Bacillus butyricus*, Hueppe. **Bacillus butyricus,** Botkin, Hueppe, Prazmowski. Obtained from milk, hydrant water and well-water, old cheese, garden earth, dust, etc. Syn., *Actinobacter polymorphus*, Duclaux. *Amylobacter clostridium*, Trecul. *Bacillus actinobacter*, Duclaux. *Bacillus amylobacter*, Van Tieghem. *Bacillus butylicus*, Fitz. *Bacterium navicula*, Reinke and Berthold. *Clostridium butyricum*, Prazmowski. *Micrococcus amylovorous*, Burrill. *Vibrione butyrique*, Pasteur. Bacille de la fermentation butyrique, Bacille de Liborius, Bacille de Prazmowski, Bactérie de la fermentation butyrique, Fr.; Bacillo buterrico, Ital. Bacterium der Buttersäuregährung, Butterbacillus, Buttersäurebacillus, Fettbacillus, Liborius' Buttersäure bildender Bacillus, Kartoffelfäulebacillus, Ger. Butylbacillus; Bacillus of butyric acid fermentation; Bacillus of fire-blight; Bacillus of pear-blight; Micrococcus of apple-blight; Micrococcus of pear-blight. One of the most widely diffused forms, exceedingly important and varied in its powers of decomposition. It is typically anaërobic and the chief of all the ferments giving rise to butyric acid as a primary product. It plays an important part in the human economy and in the destruction of plant cellulose. Botkin regards the form observed by him as distinct. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.*, *pleom.* **Bacillus butyri fluorescens,** Lafar. Occurring in every sample of natural butter examined. See *Bacterium butyri colloideum*, Lafar. *Bacillus melochloros*, Winkler and Schröter. **Bacillus butyri viscosus,** Lafar. Found in butter. *aër.*, *nliqf.*, *npg.* **Bacillus cadaveris,** Sternberg; obtained from yellow fever cadavers. *obl.*, *anaër.* (strict), *nmot.*, *pg.* **Bacillus canalis capsulatus,** Mori. Found in sewer water. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *pg.* (for mice; guinea pigs, and rabbits immune). **Bacillus canalis parvus,** Mori. Found in sewer water. *aër.*, *nliqf.*, *nmot.*, *pg.* (for mice and guinea pigs). **Bacillus candicans,** Frankland. Found in soil. *aër.*, *nliqf.*, *nmot.*, *npg.* **Bacillus capsulatus,** Pfeiffer. Obtained from the blood of a guinea pig. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *pg.* (for white mice and house mice, guinea pigs, rabbits and pigeons (septicemia). Cf. Capsule bacillus of Loeb. **Bacillus capsulatus mucosus,** Fasching. Found in the nasal secretions of man in cases of influenza. *aër.*, *facanaër.*, *nmot.*, *nliqf.*, *pg.* (for white mice and field mice), *npg.* (for rabbits and pigeons). **Bacillus capsulatus smithii,** *a*, *b*, *c*, Theobald Smith. Syn., Capsule bacillus of Smith. Found in the intestines of swine. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *npg.* According to Smith, possibly identical with *Bacillus lactis aërogenes*, Escherich. **Bacillus carabiformis,** Kaczynsky. Found in the stomach of meat-fed dogs. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus carotarum,** A. Koch. Obtained from cooked carrots and sugar beets. *aër.*, *liqf.*, *nmot.*, *npg.* **Bacillus catenula,** Duclaux. Syn., *Tyrothrix catenula*. Found in cheese. *anaër.* (will however grow in air), *nmot.*, *npg.* **Bacillus caucasicus,** Kern. Syn., *Bacterium caucasicum*. *Dispora caucasica*, Kern. Grains de Kephyr, Fr.; Kefirbacillus, Kefirferment, Kefirpilzglomerat, Hirse des Propheten, Ger. Used in the preparation of the peculiar milk-wine, "Kefir." *aër.*, *facanaër.*, *nmot.*, *npg.* **Bacillus cavicida,** Brieger. See *Bacillus cavicidus*, Brieger. **Bacillus cavicida havaniensis,** Sternberg. Obtained from intestine of yellow fever cadaver. *aër.*, *facanaër.*, *nliqf.*, *mot.* **Bacillus cavicidus,** Brieger. Syn., *Bacillus cavicida*. Brieger's bacillus. Bacillus de Brieger, bacterie de la fermentation propionique, Fr. Obtained from human feces. *aër.*, *facanaër.*, *nliqf.*, *pg.* (not for rabbits or mice). Perhaps identical with *Bacillus neapolitanus*, Emmerich. **Bacillus caviæ fortuitus,** Sternberg. Found in exudates of guinea pig inoculated with liver from yellow fever cadaver. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus chauvæi,** Bollinger and Feser, Arloing, Cornevin, and Thomas. Syn., Bacillus of symptomatic anthrax. Bacille du charbon symptomatique, Bactéridie du charbon symptomatique, Fr.; Rauschbrandbacillus, Bacillus des Rauschbrandes, Ger.; Bacillo del carbonchio sintomatico, Ital. Clostridium of symptomatic anthrax, Neelsen and Ehlers. Found in tissues of cattle suffering from symptomatic anthrax, "black leg," or "quarter evil." *anaër.*, *liqf.*, *mot.*, *pg.* **Bacillus chlorinus,** Engelmann. Syn., *Arthrobacterium chlorinum*, De Bary. *Bacterium chlorinum*, Engelmann. Found in infusions of decaying vegetable matter. *aër.*, *sap.*, *chg.* (green), *npg.*

Bacillus choleræ asiaticæ, Koch. See *Spirillum choleræ asiaticæ*, Koch. **Bacillus choleræ gallinarum**, Flügge. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus chromo-aromaticus**, Galtier. Obtained from the carcass of a diseased pig. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* (for rabbits). **Bacillus circulans**, Jordan. Found in the water of Merrimac River. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus citreus.** See *Ascobacillus citreus*, Unna and Tommasoli. **Bacillus citreus cadaveris**, Strassmann. Found in cadaver. *aër.*, *liqf.*, *nmot.*, *chg.* (yellow). **Bacillus claviformis**, Duclaux. Syn., *Tyrothrix claviformis*, Duclaux. Found in fermenting casein. *anaër.*, *pg.* **Bacillus cloacæ**, Jordan. One of the most common microbes in sewage. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus cœruleus**, Smith. Found in river water (Schuylkill). *aër.*, *liqf.*, *chg.* (blue), *npg.* **Bacillus coli communis.** See *Bacillus neapolitanus*, Emmerich. **Bacillus coli similis**, Sternberg. Obtained from human liver. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *npg.* **Bacillus constrictus**, Zimmermann. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *chg.* (cadmium yellow), *npg.* **Bacillus coprogenes fœtidus**, Schottelius. Syn., Darmbacillus von Schottelius, Ger.; Bacille coprogène fetide, Fr. Obtained from intestinal contents of pigs dead of malignant erysipelas. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus coprogenes parvus.** Syn., Mäuseseptikämieähnlicher Bacillus, Eisenberg. Obtained from human feces. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus crassus**, Van Tieghem. The broadest known bacterium, 4 μ. *mot.*, *npg.* **Bacillus crassus sputigenus**, Kreibohm. Syn., *Bacillus sputigenus crassus*. From the sputum and tongue of man. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus crystallosus. Bacillus cuneatus.** Syn., *Bacterium cuneatum*, Rivolta. Found in the blood and viscera of horses, cattle, and dogs dead of septic processes. *pg.* **Bacillus cuniculicida**, Flügge. **Bacillus cuniculicidus**, Koch. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus cuniculicida havaniensis**, Sternberg. Found in viscera of yellow fever cadavers. *aër.*, *facanaër.*, *nliqf.*, *pg.* **Bacillus cuticularis**, Tils. Found in water. *aër.*, *liqf.*, *mot.*, *chg.* (yellow), *npg.* **Bacillus cyaneo phosphorescens**, Katz. Obtained from sea water (Australia). *aër.*, *facanaër.*, *liqf.*, *mot.*, *phos.*, *chg.* (greenish), *npg.* **Bacillus cyanofuscus**, Beyerinck. Obtained from glue and Edam cheese. *aër.*, *chg.*, (green, changing to blue, brown, black), *liqf.*, *mot.*, *npg.* **Bacillus cyanogenus**, Fuchs. Hueppe, Neelsen. Syn., *Bacillus lactis cyanogenus. Bacillus syncyanum. Bacterium cyanogenum*, Fuchs, *Bacterium syncyanum*, Ehrenberg, Schröter. *Vibrio cyanogenus*, Fuchs. *Vibrio syncyanus*, Ehrenberg. Bacille du lait blue, Bacille cyanogène, Microbe du lait blue, Fr. Pilz der blauen Milch, Ger. Bacillus of blue milk. Found in milk. *aër.*, *nliqf.*, *mot.*, *chg.* (grayish blue), *npg.* **Bacillus cystiformis**, Clado. Found in urine of patient with cystitis. *aër.*, *nliqf.*, *mot.*, *npg.* **Bacillus delicatulus**, Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus dentalis viridans**, Miller. Syn., Miller's bacillus. Found in carious dentine. *aër.*, *facanaër.*, *nliqf.*, *pg.* **Bacillus denitrificans**, Giltay and Aberson. Obtained from the soil, air, and sewage. *aër.*, *nliqf.*, *mot.*, *npg.* Cf. *Bacterium denitrificans*, Gayon and Dupetit. **Bacillus der Akne contagiosa des Pferdes.** See Bacillus of horse pox. **Bacillus der amerikanischen Rinderseuche**, Canerva. See Bacillus of swine plague, Marseilles. **Bacillus des Bindehautcatarrhs**, Koch. See Bacillus of conjunctival catarrh. **Bacillus der blauen Milch.** See *Bacillus cyanogenus*, Fuchs. **Bacillus der Büffelseuche**, Oreste, Armenni. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus der Buttersäuregährung.** See *Bacillus butyricus*, Prazmowski. **Bacillus der Chyluria.** See Bacillus of chyluria, Wilson. **Bacillus der Dachsleber**, Marpmann. Found in the necrotic portions from the abscesses in the liver of a badger. **Bacillus der Eiweisszersetzung.** See *Bacillus putrificus coli*, Bienstock. **Bacillus der Faulbrut.** See *Bacillus alvei*, Cheshire and Cheyne. **Bacillus der Frettchenseuche** (ferret disease), Eberth and Schimmelbusch. See Bacillus of swine plague, Marseilles. **Bacillus des gelben Fiebers.** See Bacilius of yellow fever. **Bacillus der Hadernkrankheit.** See *Bacillus hominis capsulatus*, Bordoni-Uffreduzzi. **Bacillus der Harnstoffgährung.** See *Bacillus ureæ*, Leube. **Bacillus der Hühnercholera.** See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus der Jequirity Opthalmie**, Ger. See Bacillus of jequirity ophthalmia, De Wecker. **Bacillus der Kälberdiphtherie**, Ger. See *Bacillus diphtheriæ vitulorum*, Löffler. **Bacillus der Kaninchenseptikämie**, Koch. Abbreviations.—*aër.* = aërobic. *anaër* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Milchfaeces, Bacillus des Milchkotes, Ger. See *Bacillus neapolitanus*, Emmerich, and *Bacillus lactis aërogenes*, Escherich. **Bacillus des Pseudo-schweinerotlaufs,** Ger. See *Bacillus parvus ovatus*, Löffler. **Bacillus des Rauschbrandes,** Ger. See *Bacillus chauvœi*, Bollinger and Feser. **Bacillus des Rhinoscleroms,** Ger. See *Bacillus rhinoscleromatis*, Cornil and Alvarez. **Bacillus des roten Brodes,** Ger. See *Bacillus prodigiosus*, Ehrenberg. **Bacillus des Rotzes.** See *Bacillus mallei*, Löffler. **Bacillus des Schweinerotlaufs,** Löffler and Schütz, Ger. Syn., *Bacillus erysipelatos suis*, Sternberg. **Bacillus des Wundstarrkrampfes,** Ger. See *Bacillus tetani*, Nicolaier. **Bacillus devorans,** Zimmermann. Found in well water. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus diffusus,** Frankland. Found in the soil. *aër.*, *liqf.*, *npg.* **Bacillus diphtheriæ,** Klebs and Löffler. Syn., *Bacillus diphtheriticus*, *Bacillus diphtheritidis*, *Micrococcus diphtheriticus*, Cohn. Bacillus bei Diphtherie des Menschen, Bacterie der Diphtherie, Ger. Bacille de la diphtherie, Bactérie de la diphtherie, Fr. Found in diphtheritic false membranes. *aër.*, *nliqf.*, *nmot.*, *facanaër.*, *pg.* **Bacillus diphtheriæ columbarum,** Löffler. Bacillus der Taubendiphtherie, Bacterium der Diphtherie bei Menschen und Tauben, Ger. Bacille de la diphtherie des pigeons, Fr. From the pseudomembranes in the mouths of pigeons infected with pigeon diphtheria. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus diphtheriæ vitulorum,** Löffler. Bacille de la diphtherie des veaux, Fr. Bacillus der Kälberdiphtherie, Ger. From the pseudomembranes in the mouths of calves infected with epidemic diphtheria; culture experiments unsuccessful. *pg.* Rabbits and guinea pigs immune. **Bacillus diphtheriticus, Bacillus diphtheridis, Bacillus diphtheritis.** See *Bacillus diphtheriæ*, Klebs and Löffler. **Bacillus distortus,** Duclaux. Syn., *Tyrothrix distortus*. Found in milk and cheese. *aër.*, *mot.*, *npg.* **Bacillus dysenteriæ,** Chantemesse and Widal. Syn., Bacille de la dysenterie epidemique; Microbe de la dysenterie epidemique, Fr. Found in the intestinal contents and viscera of dysentery cadavers. *aër.*, *nliqf.*, *pg.* **Bacillus dysodes,** Zopf. Syn., *Bacterium dysodes*. Found in yeast, inducing fermentative changes in bread, causing it to smell disagreeably and to become greasy and unfit for use. **Bacillus Emmerich.** See *Bacillus neapolitanus*, Emmerich. **Bacillus endocarditidis capsulatus,** Weichselbaum. From viscera of man who died of endocarditis with thrombi. *aër.*, *nliqf.*, *pg.* **Bacillus endocarditidis griseus,** Weichselbaum. From the heart in a case of endocarditis recurrens ulcerosa. *aër.*, *nliqf.*, *mot.*, *pg.* **Bacillus enteritidis,** Gärtner. Obtained from the tissues of a cow killed on account of sickness attended with mucous diarrhea, and from the spleen of a man who died shortly after eating of the flesh of this cow. *aër.*, *nliqf.*, *mot.*, *pg.* Dogs, cats, chickens, and sparrows are immune. **Bacillus epidermidis,** Bizzozero. Syn., *Leptothrix epidermidis*. *Microsporon minutissimum*, Burchart. From the epidermis between the toes. *aër.*, *nliqf.*, *npg.* **Bacillus epidermidis,** Bordoni-Uffreduzzi. See Bacillus of Scheurlen. **Bacillus Epsilon, von Miller.** See *Spirillum*, Finkler-Prior. **Bacillus erysipelatos suis,** Koch, Löffler, Schütz, Pasteur. Syn., *Bacillus erysipelas malignum*, *Bacillus minimus*, *Bacillus murisepticus*, Flügge. *Bacillus septicus*, Koch. Bacille de la septicèmie de la souris, Bacille du èrysipèle du porc, Bacille du mal rouge, Bacille du rouget du porc, Pasteur, Bacille muriseptique, Fr. Bacillus der Mäuseseptikämie, Koch. Bacillus des Rotlaufs, Bacillus des Schweinerotlaufs, Löffler, Schütz. Rotlauf bacillus, Ger. Bacillus of mouse septicemia. Bacillus of hog erysipelas. First obtained by Koch by injecting putrefying flesh beneath the skin of mice, afterward by Löffler and Schütz from carcasses of swine dead of "Rotlauf." *aër.*, *facanaër.*, *nliqf.*, *pg.* **Bacillus erysipelatos leporis,** Koch. Syn., Bacillus bei Erysipel am Kaninchen, Bacillus bei Erysipel am Kaninchenohr, Ger. Bacille de l'erysipèle du lapin, Fr. Bacillus of erysipelas in the rabbit. Found in the erysipelatous inflammation in a rabbit's ear caused by the injection of mouse's dung. **Bacillus erythrosporus,** Eidam, Cohn, and Miflet. Syn., Bacille érythrosopore, Fr. Found in putrefying albuminous fluids, water, etc. *aër.*, *nliqf.*, *mot.*, *chg.* (greenish yellow, fluorescent), *npg.* **Bacillus ethaceticus,** Frankland. Cause of fermentation of arabinose. **Bacillus ex pneumo-enteritide suis,** E. Klein, Schütz, Salmon, Cornil, Chantemesse, Selander. Syn., Microbe der Schweinspocken, Ger.; Bacille de la pneumo-entérite du porc, Fr. Bacillus of hog cholera. Found in the intestinal contents, blood, and viscera of swine dead of hog cholera. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus *f*,** Vignal. See *Bacillus buccalis*, Vignal. **Bacillus facultatus,** Sadebeck and E. Fränkel. Found in non-malignant pharyngeal mycosis. **Bacillus figurans,** Crookshank. See *Bacillus mesentericus vulgatus*. **Bacillus figurans,** Vaughan. Found in water. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus filiformis,** Duclaux. Syn., *Tyrothrix filiformis*. Found in cheese and milk. *aër.*, *mot.*, *npg.* **Bacillus filiformis,** Tils. Found in water. *aër.*, *liqf.*, *oscl.*, *npg.* **Bacillus filiformis havaniensis,** Sternberg. From the liver of a yellow fever cadaver. *anaër.*, *facanaër.*, *nliqf.*, *nmot.*, *npg.* **Bacillus fitzianus,** Zopf. See *Bacillus subtilis*, Cohn. **Bacillus flavescens,** Pohl. Found in swamp water. *aër.*, *nliqf.*, *chg.* (yellow). **Bacillus fœtidus,** Liborius. Syn., *Bacterium fœtidum*. *Clostridium fœtidus*, Liborius. Corpuscles brillants, Micrococci of S. Le. M. Moore. Obtained from soil. *anaër.*, *liqf.*, *mot.* **Bacillus fœtidus lactis,** Jensen. From milk. *aër.*, *nliqf.*, *npg.* **Bacillus fœtidus ozænæ,** Hajek. Obtained from nasal secretions of patients with ozena. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* **Bacillus flavocoriaceus,** Eisenberg. Syn., Sulphur yellow bacillus (Adametz). Found in water. *aër.*, *nliqf.*, *nmot.*, *chg.* (sulphur yellow), *npg.* **Bacillus flavus,** Macé. Found in drinking water. *aër.*, *liqf.*, *chg.* (golden yellow), *nmot.* **Bacillus fluorescens aureus,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nliqf.*, *mot.*, *chg.* (ocher yellow), *npg.* **Bacillus fluorescens longus,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nliqf.*, *mot.*, *chg.* (grayish yellow), *npg.* **Bacillus fluorescens liquefaciens,** Flügge. Common in water and putrefying infusions. *aër.*, *liqf.*, *mot.*, *chg.* (greenish yellow), *npg.* Cf. *Bacillus viscosus*, Frankland. **Bacillus fluorescens liquefaciens minutissimus,** Unna and Tommasoli. Found upon skin in cases of eczema seborrhœicum. *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.*, (greenish yellow), *npg.* Possibly identical with the preceding species. **Bacillus fluorescens nivalis,** Schmolck. Syn., *Bacillus nivalis*, Gletscher bacillus, Glacier bacillus. Found in snow and ice water from Norwegian glaciers. *aër.*, *liqf.*, *mot.*, *chg.* (bluish green), *npg.* **Bacillus fluorescens non-liquefaciens,** Schiller.

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Found in water. *aër.*, *nliqf.*, *nmot.*, *chg.* (greenish yellow), *npg.* According to Baumgarten identical with the Bacillus of Lesage. **Bacillus fluorescens putidus,** Flügge. Found in water. *aër.*, *nliqf.*, *mot.*, *chg.* (greenish), *npg.* **Bacillus fluorescens tenuis,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *nliqf.*, *nmot.*, *chg.* (greenish yellow), *npg.* **Bacillus fœtidus,** Passet. Syn., *Bacterium fœtidum*, Thin. *Clostridium fœtidum*, Liborius. Corpuscles brillants. Found in cases of fetid sweating feet, in the exudations of mice inoculated with garden earth, and in cases of malignant edema. *anaër.*, *liqf.*, *mot.*, *npg.* **Bacillus fœtidus lactis,** Jensen. Found in milk. *aër.*, *nliqf.*, *npg.* Resembles *Bacillus neapolitanus*, Emmerich. **Bacillus fulvus,** Zimmermann. Found in hydrant water, (Chemnitz). *aër.*, *liqf.*, *nmot.*, *chg.* (gamboge yellow), *npg.* **Bacillus fuscus.** Obtained from a putrefying infusion of maize, from the air, etc. Cf. *Bacterium brunneum*, Schröter. **Bacillus fuscus limbatus,** Scheibenzuber. Obtained from rotten eggs. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *chg.* (brown), *npg.* **Bacillus galinarum,** Klein. Found in blood of chickens dead of a disease resembling chicken cholera. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus gasoformans,** Eisenberg. Found in water. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus gaytoni,** Cheshire. The cause of a disease of honey-bees. Cf. *Bacillus alvei*, Cheshire and Cheyne. **Bacillus geniculatus,** De Bary. Syn., *Tyrothrix geniculatus*, Duclaux, Bacterium en zigzag, Fr. Found in the contents of the stomach. *aër.*, *nliqf.*, *mot.*, *npg.* **Bacillus gingivæ,** Miller. **Bacillus gingivæ pyogenes,** Miller. See *Bacterium gingivæ pyogenes*, Miller. Found in a filthy mouth, and in purulent dental pulp. *aër.*, *facanaër.*, *liqf.*, *pg.* (for white mice, guinea pigs, and rabbits). **Bacillus glaucus,** Maschek. Found in water. *aër.*, *liqf.*, *nmot.*, *chg.* (gray), *npg.* **Bacillus gliscrogenum.** See *Bacterium gliscrogenum*, Malerba. **Bacillus glycerinæ,** Buchner. See *Bacillus subtilis*, Cohn. **Bacillus gracilis,** Zimmermann. Found in hydrant water, (Chemnitz). *aër.*, *facanaër.*, *liqf.*, *oscl.*, *npg.* **Bacillus gracilis anærobiescens,** Vaughan. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus gracilis cadaveris,** Sternberg. Obtained in human liver. *aër.*, *facanaër.*, *nmot.*, *nliqf.*, *pg.* **Bacillus granulosus,** Russel. Found in mud (Bay of Naples). *aër.*, *facanaër.*, *liqf.*, *nmot.* Pathogenesis not determined. **Bacillus graveolens,** Bordoni and Uffreduzzi. Syn., Bacille de la sueur des pieds, Fr. Compare *Bacillus saprogenes, II*, Rosenbach, and *Bacillus fœtidus*, Passet. Found on epidermis between the toes of man. *aër.*, *liqf.*, *npg.* **Bacillus guttatus,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus halophilus,** Russel. Obtained from water and mud (Bay of Naples). *aër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus hansenii,** Raspmussen. Found in various nutrient liquids. *aër.*, *mot*, *chg.* (chrome yellow to yellowish brown). **Bacillus havaniensis,** Sternberg. Syn., *Micrococcus havaniensis*, (?) Sternberg. **Bacillus havaniensis liquefaciens,** Sternberg. Obtained from the surface of the body of patients in the hospital at Havana. *aër.*, *nliqf.*, *chg.* (blood-red). **Bacillus helvolus,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *liqf.*, *mot.* (rotary only), *chg.* (Naples yellow), *npg.* **Bacillus heminecrobiophilus,** Arloing. Found in a caseous lymphatic gland of a guinea pig. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus hepaticus fortuitus,** Sternberg. Obtained from the exudations of a guinea pig inoculated with liver from a yellow fever patient. *aër.*, *nliqf.*, *mot.*, *npg.* **Bacillus hessii,** Guillebeau. Found in cow's milk. *aër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus hominis capsulatus,** Bordoni-Uffreduzzi. Syn., *Proteus capsulatus septicus*, Banti. *Proteus hominis capsulatus*, Bordoni-Uffreduzzi. Bacillus der Hadernkrankheit, Bacillus of rag-picker's disease. Obtained from persons dead from rag-picker's disease. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus hyacinthi septicus,** Heinz. Found in diseased hyacinths. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* Cf. *Bacterium hyacinthi*, Wakker. **Bacillus hyalinus,** Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* Reduces nitrates rapidly. **Bacillus hydrophilus fuscus,** Sanerelli. Syn., *Bacille de la septicémie gangrèneuse de la grenouille*, Legrain. From the lymph of diseased frogs. *aër.*, *liqf.*, *mot.*, *pg.* **Bacillus implexus,** Zimmermann. Found in hydrant water (Chemnitz). *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus incanus,** Pohl. Found in swamp water. *aër.*, *liqf.*, *mot.* Not sufficiently studied. **Bacillus indicus,** Koch. Syn., *Bacillus indicus ruber*, Koch. *Micrococcus indicus*, Koch. Found in the intestinal contents of a monkey. *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.* (brick-red), *pg.* (for rabbits). **Bacillus indigoferus,** Classen. Found in river water (Spree). *aër.*, *nliqf.*, *mot.*, *chg.* (deep indigo blue), *npg.* **Bacillus indigogenus,** Alvarez. Found in an infusion of the leaves of the indigo plant. (*Indigofera tinctoria*, L.). *aër.*, *mot. chg.* (indigo blue), *pg.* **Bacillus inflatus,** A. Koch. Obtained from the air. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus intestinus motilis,** Sternberg. From the intestinal contents of yellow fever cadavers. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus inunctus,** Pohl. Found in swamp water. *aër.*, *facanaër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus invisibilis,** Vaughan. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus iodococcus vaginatus,** Miller. See *Iodococcus vaginatus.* **Bacillus iris,** Frick. *aër.*, *nliqf.*, *nmot.* (green), *npg.* **Bacillus janthinus,** Zopf. Syn., *Bacterium janthinus*, Zopf. Violet bacillus, found in sewage (Lawrence, Mass.). *aër.*, *liqf.*, *mot.*, *chg.* (bluish violet), *npg.* **Bacillus kaukasicus,** Ger. See *Bacillus caucasicus*, Kern. **Bacillus klebsii.** See *Bacillus syphilidis*, Lustgarten. **Bacillus lacticus,** Pasteur. See *Bacillus acidi lactici*, Hueppe. **Bacillus lactis aërogenes,** Escherich and Abelous. Syn., *Bacillus aërogenes*, *Bacillus capsulatus*, Smith. *Bacterium lactis aërogenes*, Escherich. Bacille aérogène, Fr.; Bacillus des Milchkotes, Bacillus des Milchfaeces, Ger. Found in the stomach and intestine of healthy adults. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Bacillus lactis albus,** Löffler. Found in milk. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus lactis cyanogenus.** See *Bacillus cyanogenus*, Hueppe. **Bacillus lactis erythrogenes,** Hueppe and Baginsky. Syn., Bacillus of red milk. Found in milk and the feces of a child. *aër.*, *liqf.*, *nmot.*, *chg.* (yellow and red), *npg.* **Bacillus lactis pituitosi,** Löffler. Syn., *Bacillus lactis viscosus*, Adametz, Löffler'che Bacillus der schleimigen Milch. Found in milk. *aër.*, *nliqf.*, *npg.* **Bacillus lactis viscosus,** Adametz. Found in ropy milk. *aër.*, *nliqf.*, *nmot.*, *npg.* Capsulated. **Bacillus latericeus,** Eisenberg. Syn., Ziegelroter bacillus, Adametz. Found in water. *aër.*, *nliqf.*, *nmot.*, *chg.* (brick red), *npg.* **Bacillus leiodermos,** Löffler. Syn., *Bacillus liodermos*, Flügge.

Glatthautbildender Kartoffelbacillus, Gummibacillus. Found in milk. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus leporis lethalis,** Gibier and Sternberg. From the intestinal contents of yellow fever patients. *aer.*, *liqf.*, *mot.*, *pg.* **Bacillus lepræ,** Armauer and Hansen. Syn., Aussatzbacillus, Bacillus der Lepra, Bacillus des Aussatzes, Ger.; Bacille de la lèpre, Fr.; Bacillo della lebbra, It. Found in leprous tubercles. Cannot be cultivated in ordinary media. Specific pathogenesis settled by inoculation of a condemned criminal. **Bacillus leptosporus,** L. Klein. Obtained from the air. *aër.*, *mot.*, *npg.* **Bacillus lethalis,** Babes. Syn., *Proteus lethalis.* Proteus bei Lungengangräne des Menschen. Obtained from spleen and lung of patient dead of septicemia. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* **Bacillus limbatus acidi lactici,** Marpmann. Found in cow's milk. *aër.*, *nliqf.*, *nmot.*, *npg.* **Bacillus limosus,** Russel. Obtained from mud (Bay of Naples). *aër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus lineola.** See *Bacterium lineola,* Cohn. **Bacillus liodermos,** Flügge. See *Bacillus leiodermos,* Löffler. **Bacillus liquefaciens,** Eisenberg. Found in water. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens bovis,** Arloing. Syn., *Pneumobacillus liquefaciens bovis.* From the lungs of a diseased ox. *aër.*, *facanaër.*, *liqf.*, *nmot.*, *pg.* **Bacillus liquefaciens communis,** Sternberg. Obtained from the feces of yellow fever patients. *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens magnus,** Lüderitz. Found in the exudates of mice inoculated with garden earth. *anaër.*, *liqf.*, *mot.*, *npg.* **Bacillus liquefaciens parvus,** Lüderitz. Source same as last. *anaër.*, *liqf.*, *nmot.*, *npg.* **Bacillus liquidus,** Frankland. Found in river water (Thames). Common. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus litoralis,** Russel. Obtained from mud (Bay of Naples). *aër.*, *facanaër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus lividus,** Plagge and Proskauer. Found in hydrant water (Berlin). *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.* (brick red), *npg.* **Bacillus lucens,** Van Tieghem. Syn., *Bacterium lucens,* Van Tieghem. Found on the surface of water. *aër.*, *nmot.* Brilliant. **Bacillus luteus,** Flügge. Syn., *Bacterium luteum,* List. Gelber Bacillus, Ger. Found in superficial layers of gelatin plate culture. *aër.*, *nmot.*, *nliqf.*, *chg.* (yellow), *npg.* **Bacillus luteus suis,** Salmon and Smith. Found in the perivisceral fluids of swine. *aër.*, *liqf.*, *mot.*, *chg.* (yellow red). Smells like glue. **Bacillus lyssæ,** Pasteur. Syn., *Coccobacterium lyssæ,* Rivolta. *Lissophyton suspectum,* Hallier. Micrococci della rabbia, Ital. Bacille de la rage, Fr.; Hundswutbacillus, Ger. Cf. *Bacterium septicum sputigenum,* Fraenkel. Found in saliva of hydrophobic patients and animals. Cf. *Bacillus septicus sputigenus,* Flügge. **Bacillus maïdis,** Cuboni. From macerated corn and the feces of pellagra patients. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus malandriæ,** Israel. See *Bacillus mallei,* Löffler. **Bacillus malariæ,** Klebs and Tommasi-Crudeli. Syn., Bacille de la malaria, Bacille du sang, Fr.; Bacillus der Malaria, Bacillus des Blutes, Blutbacillus, Ger.; Bacillo della malaria, It. Bacillus of the blood. Obtained from the soil and air of the Campagnia, from swamps, from the blood of malarial patients, etc. Pathogenesis disputed. **Bacillus mallei,** Löffler. Syn., *Bacillus malandriæ,* Israel; Rotzbacillus, Bacillus des Rotzes, Ger.; Bacille de la morve, Fr. Found in the nasal discharges, nodules, etc., of animals with glanders. *aër.*, *facanaër.*, *nmot.* (strictly parasitic), *pg.* (proven by inoculation).

Bacillus martinez, Sternberg. Obtained from th liver of a yellow fever cadaver. *aër.*, *facanaër nliqf.*, *nmot.*, *npg.* **Bacillus maydis.** See *Bacillu maidis,* Cuboni. Syn., *Bacterium maydis,* Cuboni Batterio della pellagra, It. **Bacillus megaterium** De Bary. Found on the leaves of boiled cabbag *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus melanosporus** Eidam. Obtained from the air. *aër.*, *facanaër chg.* (black), *npg.* **Bacillus melittopthorus.** S *Bacillus alvei,* Cheshire and Cheyne. **Bacillus melc chloros,** Winkler and Schrötter. Syn., *Bacillu butyri fluorescens,* Lafar. Obtained from the deje tions of the larva in a wormy apple. *aër.*, *liqf.*, *mot chg.* (emerald green), *pg.* (for rabbits). **Bacillu membranaceus amethystinus,** Eisenberg. Foun in well water (Spalato). *aër.*, *liqf.*, *nmot.*, *ch* (dark violet), *npg.* **Bacillus meningitidis puru lentæ,** Naumann and Schäffer. Obtained from p taken from beneath the pia mater in a person dead purulent meningitis. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *p* **Bacillus merismopœdioides,** Zopf. Syn., *Arthr bacterium* or *Bacterium merismopœdioides,* De Bar Obtained from sewage mud; the type of the so-calle "tablet cocci." **Bacillus mesentericus fuscu** Flügge. Syn., Kartoffelbacillus, Ger.; Bacil brun de la pomme de terre, Fr. Potato bacillu Obtained from the air, hay dust, water, etc. Commo *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus mesentericu ruber,** Globig. Syn., Kartoffelbacillus; Roter Ka toffelbacillus, Ger.; Bacille rouge de la pomme terre, Bacille rouge de Globig, Fr. Potato bacillu Found upon potatoes. *aër.*, *liqf.*, *mot.*, *chg.* (reddi yellow or pink), *npg.* **Bacillus mesentericus vu gatus,** Flügge. Syn., *Bacillus figurans,* Croo shank. *Proteus vulgaris.* Bacille commun de pomme de terre, Bacille des pomme de terre, Fr Kartoffelbacillus, Ger. Potato bacillus. Commo Found in potatoes, water, milk, intestinal contents man, etc. *aër.*, *liqf.*, *npg.* **Bacillus miniaceu** Zimmermann. See *Bacillus ruber,* Frank and Coh **Bacillus minimus,** Klebs. See *Bacillus erysip latos suis,* Koch, etc. **Bacillus miriabilis,** Ha ser. Syn., *Proteus mirabilis.* Bacille de Hauser, F Obtained from decaying animal matter. *aër.*, *faca aër.*, *liqf.*, *mot.*, *pg.* **Bacillus mollusci,** Domenic Syn., Bacillo del mollusco contagioso, Dominic Ital. Found in molluscum contagiosum; resembl somewhat *Bacillus lepræ* and *Bacillus malariæ.* thogenesis disputed, the disease being attributed some to psorosperms. **Bacillus multipediculosu** Flügge. Syn., *Bacillus multipediculus.* Found air and water. *aër.*, *nliqf.*, *nmot.*, *npg.* **Bacillu murisepticus,** Flügge. See *Bacillus erysipelatos su* Koch. **Bacillus murisepticus pleomorphus,** Ka linski. Found in purulent uterine discharges. *aë facanaër.*, *liqf.*, *mot.*, *pg.* Probably identical wi *Proteus vulgaris,* Hauser. **Bacillus muscoide** Liborius. Found in soil, old cheese, cow dung, et *anaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus mycoide** Flügge. Syn., Erdbacillus, Ger.; Bacille mycoid Fr. Common in soil and water. *aër.*, *nliqf.*, *mo npg.* **Bacillus mycoides roseus,** Scholl. Fou in the soil. *aër.*, *liqf.*, *chg.* (red), *npg.* **Bacillu neapolitanus,** Emmerich. Syn., *Bacillus coli co munis, Bacterium coli commune,* Escherich, *Bacteriu neapolitanum,* Colon bacillus of Escherich, Emme ich's Bacillus, Emmerich's Neaplerbacillus; Baci neapolitaine, Fr.; Bacillus des Milchkotes, Bacill des Milchfaeces, Ger.; Bacillus of Booker, *a* to

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefa tive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogeni *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophyti

Found in the air, in putrefying infusions and constantly in the alvine discharges of healthy and unhealthy human beings, also in those of many animals. From the blood, various organs and feces of cholera patients at Naples, hence the name. *aër., facanaër., nliqf., pg.* **Bacillus necrophorus,** Löffler. Obtained from rabbits after inoculation in the anterior chamber of the eye with portions of condyloma. *aër., facanaër., nliqf., pleom., pg.* **Bacillus nivalis,** Schmolck. See *Bacillus fluorescens nivalis,* Schmolck. **Bacillus nodosus parvus,** Lustgarten. From the healthy urethra of man. *aër., facanaër., nliqf., nmot., npg.* **Bacillus nubilus,** Frankland. From hydrant water (London). *aër., facanaër., liqf., npg.* **Bacillus ochraceus,** Zimmermann. From hydrant water (Chemnitz). *aër., liqf., mot., chg.* (ocher-yellow), *npg.* **Bacillus œdematis aërobicus.** A new bacillus of malignant edema, Klein. Found in the exudates of guinea pigs after inoculating with garden earth. *aër., facanaër., nliqf., mot., pg.* **Bacillus œdematis maligni,** Koch. Syn., *Bacillus œdematis,* Koch; *Bacillus septicus,* Pasteur; Vibrion septique, Vibrion pyogenique, Pasteur; Bacille de l'œdème, Bacille de l'œdème malin, Bacille de la gangrène emphysemateuse progressive, Bacille de la gangrène gazeuse, Fr.; Microben der gasigen Gangräne, Ger. Bacillus of gangrene, Bacillus of gangrenous septicemia. Pink bacillus of spreading edema, A. B. Harris. A widely scattered species, obtained from surface soil, dust, putrefying matter, foul water, etc., and from the exudates produced by inoculating animals with garden earth. *anaër., liqf., mot., pg.* **Bacillus of Acne Contagiosa of Horses.** See Bacillus of horse pox. **Bacillus of Afanassiew.** See *Bacillus tussis convulsivæ,* Afanassiew. **Bacillus of Albuminous Decomposition.** See *Bacillus putrificus coli,* Bienstock. **Bacillus of Allantiasis,** Müller, Hoppe-Seyler. See also *Sarcina botulina,* Van den Corput. Cf. Bacillus of choleraic diarrhea from meat poisoning, Klein. Found in poisonous sausages, particularly in "Blunzen." *aër., liqf., pg.* **Bacillus of Alopecia areata,** Kasauli. Found attached to the hairs from the diseased patches; easily cultivated. See Micrococcus of Alopecia areata, Robinson, and *Bacterium decalvans,* Thin. **Bacillus of Babes and Oprescu.** Obtained from a case presenting symptoms of typhus fever. *aër., facanaër., nliqf., mot., pg.* **Bacillus of Belfanti and Pascarola.** Syn., Impftetanusbacillus, Ger. From the pus of wounds in a person dead of tetanus. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Beri-beri,** Eykmann. See *Bacillus beribericus,* Lacerda. **Bacillus of Blue Milk.** See *Bacillus cyanogenus,* Hueppe. **Bacillus of Blue or Green Pus.** See *Bacillus pyocyaneus,* Gessard. **Bacillus of Booker,** *a* to *n.* Found in alvine discharges of children suffering from cholera infantum; probably varieties of *Bacillus neapolitanus,* Emmerich. **Bacillus of Bovet.** Obtained from the intestines of a woman dead of acute choleraic enteritis. *aër., nliqf., mot., pg.* **Bacillus of Braxy.** See *Bacillus anthracis,* Pollender and Davaine. **Bacillus of Bronchitis,** Lumnitzer. Syn., Bacillus of Lumnitzer. From the bronchial secretions in cases of putrid bronchitis. *aër., mot.* Cf. Micrococcus of bronchitis, Picchini. **Bacillus of Butyric Acid Fermentation.** See *Bacillus butyricus,* Prazmowski. **Bacillus of Carcinoma,** Rappin and Scheurlen and Domingo-Freire. Syn., Bacille du cancer, Fr. See Bacillus of Scheurlen. **Bacillus of Canestrini.** Found in larvæ and bees suffering from a malady common among bees in certain parts of Italy. *aër., liqf., mot., chg.* (pink), *pg.* **Bacillus of Canon and Pielicke.** See Bacillus of measles. **Bacillus of Cattle Plague,** Metschnikoff. See *Bacillus septicæmiæ hæmorrhagicæ,* Sternberg. **Bacillus of Cazal and Vaillard.** Obtained from cheesy nodules upon the peritoneum and in the pancreas. *aër., facanaër., liqf., mot., pg.* **Bacillus of Chancroid,** Ducrey. Found in pustules developed upon the arm from the inoculation of chancroidal virus; does not grow in artificial cultures. Cf. *Micrococcus ulceris mollis.* **Bacillus of Cheese.** See *Spirillum tyrogenum,* Denecke. **Bacillus of Chicken Cholera.** See *Bacillus septicæmiæ hæmorrhagicæ,* Sternberg. **Bacillus of Cholera.** See *Spirillum choleræ asiaticæ,* Koch. **Bacillus of Choleraic Diarrhea from Meat Poisoning,** Klein. Found in the blood and feces of persons poisoned with tainted meat. Cf. Bacillus of allantiasis, Müller and Hoppe-Seyler. **Bacillus of Cholera in Ducks,** Cornil and Toupet. Obtained from the blood of ducks that had died of an epidemic disease characterized by choleraic symptoms. *aër., nliqf., nmot., pg.* (for ducks, but not for chickens or pigeons). **Bacillus of Chyluria,** Wilson. Syn., Bacillus der Chyluria, Ger.; Bacille de la chylurie, Fr.; Found in the coagulum of chylous urine. *aër., facanaër., mot.* **Bacillus of Colomiatti.** Obtained from cases of conjunctivitis and xerotic masses in the eye. *aër., nliqf., nmot., npg.* Cf. Bacillus of xerosis epithelialis conjunctivæ, Leber. **Bacillus of Conjunctival Catarrh,** Koch. Syn., Bacille du catarrhe conjonctival, Fr.; Bacillus des Bindehautcatarrhs, Ger.; Bacillus of conjunctivitis, Bacillus of pink eye, Weeks. *aër., nliqf., pg.* Resembles *Bacillus xerosis.* **Bacillus of Dantec.** Syn., Bacille du rouge de morue, Fr. Obtained from salted codfish to which it gives a red color. *aër., liqf., mot., chg.* (red), *npg.* **Bacillus of Davaine's septicemia.** See *Bacillus septicæmiæ hæmorrhagicæ,* Sternberg. **Bacillus of Demme.** Obtained from the contents of tumors and pustules and from the blood of patients suffering from erythema nodosum. *aër., facanaër.,* (?) *nliqf., pg.* (to guinea pigs; rabbits, dogs and goats refractory). **Bacillus of Diphtheria in Calves.** See *Bacillus diphtheriæ vitulorum,* Löffler. **Bacillus of Diphtheria in Doves.** See *Bacillus diphtheriæ columbarum,* Löffler. **Bacillus of Diphtheria in Man.** See *Bacillus diphtheriæ,* Klebs and Löffler. **Bacillus of Döderlein.** See *Bacillus vaginalis,* Döderlein. **Bacillus of Endocarditis.** See *Bacillus pyogenes fœtidus,* Fränkel and Saenger. **Bacillus of Egyptian Catarrhal Conjunctivitis.** See Bacillus of Kartulis. **Bacillus of Erysipelas in the Rabbit,** Koch. See *Bacillus erysipelatos leporis,* Koch. **Bacillus of False Hog Cholera.** See *Bacillus parvus ovatus,* Löffler. **Bacillus of False Tuberculosis in Rabbits.** See Bacillus of pseudo-tuberculosis in rabbits, Malassez and Vignal. **Bacillus of Fiocca.** Found in the saliva of cats and dogs. *aër., facanaër., nliqf., nmot., pg.* (for rabbits, guinea pigs, rats, mice). **Bacillus of Foot Sweat.** Syn., Fussschweissbacillus, Ger.; Bacille de la sueur des pieds, Fr. See *Bacillus fœtidus, Bacillus saprogenes No. II,* and *Bacterium graveolens.* **Bacillus of Foul Brood of Bees.** See *Bacillus alvei,* Cheshire and Cheyne. **Bacillus of Fowl Cholera.** See *Bacillus septicæmiæ hæmorrhagicæ,* Sternberg. **Bacillus of Friedländer.** See *Bacillus pneumoniæ friedländeri.* **Bacillus of Fulles, III.**

Found in the soil. *aër., nliqf., mot., npg.* **Bacillus of Gangrene.** See *Bacillus œdematis maligni*, Koch. *Bacillus saprogenes, III*, Rosenbach, and Bacillus of senile gangrene. **Bacillus of Gangrenous Septicemia.** Syn., Bacille de la gangrène gazeuse. See *Bacillus œdematis maligni*, Koch. **Bacillus of Gessner.** See *Bacterium tholoideum*, Gessner. **Bacillus of Glanders.** See *Bacillus mallei*, Löffler. **Bacillus of Green Diarrhea in Children,** Lesage. See Bacillus of Lesage. **Bacillus of Green Pus.** See *Bacillus pyocyaneus*, Gessard. **Bacillus of Grouse Disease,** Klein. Obtained from the lungs and liver of grouse that had died of an epidemic disease. *aër., nliqf., nmot., pg.* (for mice, guinea pigs, linnets, green finches, sparrows; chickens, pigeons and rabbits immune). **Bacillus of Hay Infusions.** See *Bacillus subtilis*, Ehrenberg. **Bacillus of Heminecrobiophilus,** Arloing. Obtained from the callous lymphatic glands of a guinea pig. *aër., facanaër., nliqf., mot., pleom., pg.* **Bacillus of Hog Cholera,** Salmon and Smith. See *Bacillus ex pneumo-enteritide suis*, Klein. **Bacillus of Hog Erysipelas.** See *Bacillus erysipelatos suis*, Koch, etc. **Bacillus of Horse Pox,** Dieckerhoff and Grawitz. Syn., Bacillus of acne contagiosa of horses. Bacillus der Akne contagiosa des Pferdes, Ger. Obtained from the pustules of horses suffering from acne contagiosa. *aër., nliqf., pg.* **Bacillus of Hydrophobia.** See *Bacillus lyssæ*, Pasteur. **Bacillus of Icterus,** Karlinsky and Ducamp. Found in the blood during an attack of infectious icterus. Did not thrive on ordinary culture media. **Bacillus of Influenza,** Pfeiffer, Kitasato and Canon. Syn., Bacille de Pfeiffer, Bacille de l'influenza, Influenza bacillus. Found in the purulent bronchial secretions and in the blood of persons suffering from epidemic influenza. *aër., nmot., pg.* Cf. *Micrococcus influenzæ*, Letzerich. **Bacillus of Intestinal Diphtheria in Rabbits,** Ribbert. Syn., Bacille de la diphthérie intestinale chez les lapins, Fr. Obtained from the viscera of rabbits dead of a disease characterized by a diphtheritic inflammation of the intestinal mucous membrane. *aër., nliqf., nmot.* (?) *pg.* **Bacillus of Jeffries.** A group (A, G, J, K, P, S, Z,) of bacilli, resembling *Bacillus neapolitanus*, Emmerich, and *Bacillus lactis aërogenes*, Escherich. Found in the alvine discharges of children suffering from summer diarrhea. *anaër., npg.* **Bacillus of Jequirity Ophthalmia,** DeWecker and Sattler. Syn., Bacille du jequirity, Fr.; Jequiritypilz, Ger. Found in cases of jequirity ophthalmia and in infusions of jequirity seeds (*Abrus precatorius*), the supposed source of Abrin. *aër., liqf., mot., npg.* The disease is now held to be caused by a soluble poison, *jequiritin*. **Bacillus of Karlinski.** See *Bacillus murisepticus pleomorphus*, Karlinski. **Bacillus of Kartulis,** Koch and Kartulis. Obtained from the conjunctiva in cases of Egyptian catarrhal conjunctivitis. *aër.* Pathogenesis not well determined. **Bacillus of Koubasoff.** Obtained from carcinomatous growth in the human stomach. *aër., facanaër., nliqf., mot., pg.* (for guinea pigs and rabbits). Cf. Bacillus of Scheuerlen. **Bacillus of Lactic Acid Fermentation.** See *Bacillus acidi lactici*, Hueppe. **Bacillus of Laser.** Obtained from mice infected with an epidemic disease. *aër., facanaër., nliqf., mot., pg.* (for field mice, guinea pigs, rabbits and pigeons). **Bacillus of Leprosy.** See *Bacillus lepræ*, Hansen. **Bacillus of Lesage.** Syn., Bacille de la diarrhéa verte infantile, Fr. Bacillus of green diarrhea in children. Obtained in the green alvine discharges of infants suffering from green diarrhea. *aër., nliqf., mot., pg.* According to Baumgarten identical with *Bacillus fluorescens non-liquefaciens*, Schiller. **Bacillus of Letzerich.** Obtained from the urine of children suffering from nephritis interstitialis primaria. *aër., liqf., pg.* **Bacillus of Liborius.** See *Bacillus amylobacter*, Prazmowski. **Bacillus of Lichen Ruber,** Laser. Syn., Bacillus bei Lichen ruber, Ger. Found in the lymph passages in cases of lichen ruber. **Bacillus of Lucet.** Syn., Bacille de la dysenterie epizoötique des poules et des dindes, Fr. Obtained from chickens and turkeys suffering from an infectious form of septicemia characterized by dysenteric discharges. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Lumnitzer.** See Bacillus of Bronchitis. **Bacillus of Lupus.** See *Bacillus Tuberculosis*, Koch. **Bacillus of Lustgarten.** See *Bacillus syphilidis*, Lustgarten. **Bacillus of Lymph in Fishes,** Oliver and Richet. Observed in the lymph of certain fishes. *aër., mot., npg.* **Bacillus of Malaria.** See *Bacillus malariæ*, Klebs and Tommasi-Crudeli. **Bacillus of Malignant Edema.** See *Bacillus œdematis maligni*, Koch. **Bacillus of Measles,** Canon and Pielicke. Syn., Bacillus of Canon and Pielicke. Found in the blood and in the secretions of the nose and conjunctiva of persons with measles. Cf. Micrococcus of measles, Klebs and Keating. **Bacillus of Mouse Septicemia.** See *Bacillus erysipelatos suis*, Pasteur. **Bacillus of Necrosis of the Liver in Badgers,** Eberth. Found in the necrotic liver of a badger. **Bacillus of Necrosis of the Liver in Guinea Pigs,** Eberth. Found in the necrotic liver of a guinea pig. **Bacillus of Nephritis,** Letzerich. See Bacillus of Letzerich. **Bacillus of Nocard.** Syn., Bacille du farcin du bœuf, Fr.; Bacillus der Wurmkrankheit, Ger. Found in the superficial abscesses of cattle suffering from farcy. *aër., nmot., pg.* **Bacillus of Okada.** Obtained from the dust between the boards of a floor. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Osteomyelitis,** Kraske and Becker. Found in cases of osteomyelitis. *aër., liqf.* (or in some forms *nliqf.*), *mot., pleom., pg.* Held by Pasteur as identical with the micrococcus of furuncle, q. v. **Bacillus of Phthisis.** See *Bacillus tuberculosis*, Koch. **Bacillus of Pink Eye,** Weeks. See Bacillus of conjunctival catarrh, Koch. **Bacillus of Potato Rot,** Kramer. Syn., Nassfäulebacillus. Obtained from potatoes affected with wet rot. *aër., liqf., mot., npg.* Putrefies the albuminous substances of potatoes. **Bacillus of Pseudo-tuberculosis in Rabbits,** Eberth, Malassez, and Vignal. Syn., Bacille de la tuberculose zoögléique, Bacille de la pseudo-tuberculose du lapin, Fr.; Bacillus der Pseudo-tuberculose der Kaninchen, Ger. Found in the nodular deposits characteristic of this disease. **Bacillus of Puerperal Fever.** See *Bacillus puerperalis*, Engel and Spillmann. **Bacillus of Purpura Hæmorrhagica of Babes.** Obtained from the viscera of a patient dead of purpura hæmorrhagica. *aër., facanaër., liqf., nmot., pg.* Resembles the next two forms. **Bacillus of Purpura Hæmorrhagica of Kolb.** Obtained from the viscera of patients dead of purpura. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Purpura Hæmorrhagica of Tizzoni and Giovannini.** Obtained from the blood of two children dead of purpura hæmorrhagica. *aër., facanaër., nliqf., nmot., pg.* **Bacillus of Pyemia,** Beltzow. Syn., Bacille de la pyémie, Fr.; Bacillus der Pyämie, Ger. Two forms found in pyemia, one of which resembles *Bacillus œdematis*

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

maligni, Koch. **Bacillus of Rabbit Septicemia.** See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus of Rabies.** See *Bacillus lyssæ*, Pasteur. **Bacillus of Rag Pickers' Disease.** See *Bacillus hominis capsulatis*, Bordoni-Uffreduzzi. **Bacillus of Red Bread.** See *Bacillus prodigiosus*, Ehrenberg. **Bacillus of Red Milk.** See *Bacillus lactis erythrogenes*, Hueppe; and *Bacillus prodigiosus*, Ehrenberg. **Bacillus of Rheumatism.** See *Bacillus rheumarthritidis*, Kussmaul. **Bacillus of Rhinoscleroma.** See *Bacillus rhinoscleromatis*, Cornil and Alvarez. **Bacillus of Roth, I, II.** Obtained from old rags. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *pg.* Resembles *Bacillus neapolitanus*, Emmerich; and *Bacillus cavicidus*, Burger. **Bacillus of Rouget.** See *Bacillus erysipelatos suis*, Koch, etc. **Bacillus of Scarlet Fever,** Crooke. Syn., Bacille de la scarlatine, Fr. Found in the nasal mucus and tissues of the throat in a case of anginose scarlet fever. *mot.* Resembles *Bacillus ædematis maligni*, Koch, and the Proteus of Hauser. According to Dœhle the parasite of this disease is a protozoön. Cf. *Micrococcus Scarlatinæ*. **Bacillus of Scheurlen,** Scheuerlen, Rapin, and Domingo-Freire. Syn., *Bacillus epidermidis*, Bordoni-Uffreduzzi. From cancerous tissues and from mammary epithelia of healthy persons. According to Macé possibly identical with a variety of *Bacillus mesentericus vulgatus*, Flügge. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus of Schimmelbusch.** Obtained from the necrotic tissues of a case of cancrum oris or noma. *aër.*, *nliqf.*, *pg.* **Bacillus of Schou.** See *Bacillus pneumonicus agilis*, Schou. **Bacillus of Senile Gangrene,** Tricomi. Syn., Bacille de la gangrene sénile, Fr. Bacillus of gangrene, Bacillus of Tricomi. Found in the blood, in the tissues along the line of demarcation, in the subcutaneous tissue and the lymph spaces of the skin, and in the ichorous discharge. *aër.*, *liqf.*, *nmot.*, *pg.* Cf. *Bacillus ædematis maligni*, Koch, and *Bacillus saprogenes, III*, Rosenbach. **Bacillus of Septicemia in Man,** Klein. Syn., Bacille de la septicémie, Fr. **Bacillus of Southern Cattle Plague,** F. S. Billings. Syn., Bacillus of Texas fever in cattle. Bacillus der amerikanischen Rinderseuche, Canerva. Found in the blood, viscera, and manure of cattle infected with cattle plague or Texas fever; also in the ticks (*Boöphilus bovis*, Curtice) infecting the cattle, and in their discharges. The spread of the disease is largely due to the manure of the cattle and also indirectly to the ticks. *aër.*, *nliqf.*, *mot.*, *pleom.*, *pg.* Smith and Kilborn now attribute this disease to the psorosperm *Pyrosoma bigeminum*. **Bacillus of Spontaneous Rabbit Septicemia,** Eberth. See Bacillus of swine plague, Marseilles. **Bacillus of Symptomatic Anthrax.** See *Bacillus chauvæi*, Bollinger and Feser. **Bacillus of Swine Pest,** Selander. See *Bacillus ex pneumo-enteritide suis*, Klein. **Bacillus of Swine Plague, Marseilles,** Reitsch, and Jobert. Syn., *Bacillus suis*, Detmers. Bacillus der Schweineseuche, Marseilles; Bacillus der Frettchenseuche (ferret disease), Eberth and Schimmelbusch; Bacille de la pest porcine, Fr.; Bacillus of spontaneous rabbit septicemia; Bacillus of swine plague, Detmers and Billings; Swine plague, Schizophyte, Detmers. First obtained from swine attacked by a fatal epidemic disease in Marseilles. *aër.*, *nliqf.*, *mot.*, *pg.* Canerva and others identify this with the Bacillus of ferret disease and with that of American swine plague; also with the Bacillus of Southern cattle plague, Billings; but this latter seems to be a distinct species. See *Bacillus tardigradus*. **Bacillus of Syphilis.** See *Bacillus syphilidis*, Lustgarten. **Bacillus of Tetanus.** See *Bacillus tetani*, Nicolaier. **Bacillus of Texas Cattle Fever,** F. S. Billings. See Bacillus of Southern cattle plague. **Bacillus of the Blood.** Syn., Bacille du sang, Fr.; Blutbacillus, Bacillus des Blutes, Hoffmann, Ger. **Bacillus of the Lungs of Cattle,** Lüstig. Found in the lungs of healthy and diseased cattle. *aër.*, *liqf.* **Bacillus of the Meconium,** Escherich. Found in the meconium. **Bacillus of the Pneumo-enteritis of the Pig.** See *Bacillus ex pneumo-enteritide suis*, Klein. **Bacillus of the Smegma.** Syn., Bacille du smegma préputial, Fr.; Smegmabacillus, Ger. Found in the smegma of the male and female genitals. **Bacillus of Tommasoli.** See *Bacillus sycosiferus fatidus*, Tommasoli. **Bacillus of Tricomi.** See Bacillus of senile gangrene. **Bacillus of Tuberculosis of Vines.** Syn., Bacille de la tuberculosis des vignes, Corvo, Fr. Regarded by Corvo as the cause of the diseased condition of vines usually attributed to *Phylloxera vastatrix*, Planchon. **Bacillus of Ulcerative Stomatitis of Cattle,** Lingard and Batt. Found on the skin, the mucous membranes, and in the lungs of young cattle. Cf. Streptocytus of eczema epizootica, Schottelius. **Bacillus of Ulcus Molle,** Krŏfting. Identical with that described by Ducrey as the Bacillus of Chancroid. **Bacillus of Utpadel,** Utpadel and Gessner. Obtained from the stuffing of the bed quilts in a military hospital (Augsburg), and from the intestinal contents of man. *aër.*, *nliqf.*, *mot.*, *pg.* **Bacillus of Vagus Pneumonia.** See *Bacillus pneumonicus agilis*, Schou. **Bacillus of Verruga Peruana,** Izquierdo. Found in the intercellular spaces and blood-vessels in the nodules characteristic of Peruvian wart. **Bacillus of Vignal.** See *Bacillus buccalis minutus*, Vignal. **Bacillus of Whooping Cough.** See *Bacillus tussis convulsivæ*, Afanassiew. **Bacillus of Xerosis Epithelialis Conjunctivæ,** Leber, Kuschbert, Fränkel, and Neisser. Syn., *Bacillus xerosis*, Fränkel; Bacillus of Colomiatti, Bacillus of xerosis, Schreiber; Xerosebacillus, Bacillus der Xerosis epithelialis conjunctivæ, Ger.; Bacille du xerosis conjonctivæ, Fr. Found in the white, fatty scales of the conjunctivæ in cases of Xerophthalmia. *nmot.* Does not grow on gelatin or potato. Pathogenesis not fully determined. **Bacillus oxytocus perniciosus,** Wyssokowitsch. Found in milk left standing a long time. *aër.*, *nliqf.*, *pg.* **Bacillus ovatus minutissimus,** Unna. Found upon the skin in cases of eczema seborrhœicum. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Bacillus of Yellow Fever.** Bacille de la fièvre jaune, Fr.; Bacillus des gelben Fiebers, Ger. Found in the mucous membrane of the small intestine in two cases of yellow fever. Sternberg has found many forms in the intestinal contents and viscera of yellow fever cadavers, the most frequent and abundant being the *Bacillus neapolitanus*, Emmerich; *Bacillus cadaverus*, Sternberg; and *Bacillus X*, Sternberg. This latter is held by Sternberg as being possibly concerned in the etiology of yellow fever. Cf. Microbe de la fièvre jaune, Freire et Rebougeon. **Bacillus of Yellow Milk.** See *Bacillus synxanthus*, Ehrenberg and Schröter. **Bacillus panificans,** Laurent. Claimed as the active agent in the raising of bread. Found especially in black bread. Dunnenberger considers it a mere impurity and not concerned in the leavening processes. **Bacillus parvus ovatus,** Löffler. Syn., Pseudorotlaufbacillus, Ger. Bacillus of false hog

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

cholera. Found in the carcass of a pig dead of a disease resembling rouget. It resembles *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus pasteurianus,** Hansen. Syn., *Bacterium pasteurianum*, *Arthrobacterium pasteurianum*, *Micrococcus pasteurianus*. Found in beer-wort and beer, especially that poor in alcohol. Resembles *Bacillus aceti*, Kützing and Sommer. **Bacillus pestifer,** Frankland. Found in the air. *aër., liqf., mot., npg.* **Bacillus phosphorescens,** Fischer. Syn., *Bacillus phosphorescens indicus*, Fischer; *Photobacterium indicum*, Fischer; Indischer Leuchtbacillus, Ger. Found in sea water (Gulf of Mexico). *aër., liqf., mot., phos., npg.* **Bacillus phosphorescens gelidus,** Forster. See *Bacillus phosphoreus*, Cohn. **Bacillus phosphorescens indicus,** Fischer. See *Bacillus phosphorescens*, Fischer. **Bacillus phosphorescens indigenus,** Fischer. Syn., Einheimischer Leuchtbacillus, Ger. Found in sea water (Harbor of Kiel) and upon herring. *aër., liqf., mot., phos., npg.* **Bacillus phosphoreus,** Cohn. Syn., *Micrococcus phosphoreus*, Cohn; *Bacterium phosphorescens*, Hermes; *Bacillus phosphorescens gelidus*, Forster. Found on sea fish, raw and cooked (cooked salmon, Cohn). *aër., nliqf., phos., npg.* **Bacillus plicatus,** Zimmermann. Found in hydrant water (Chemnitz). *aër, liqf., nmot., chg.* (grayish yellow), *npg.* **Bacillus pneumoniæ,** Flügge. See *Bacillus pneumoniæ friedländeri.* **Bacillus pneumoniæ friedländeri.** Syn., *Bacillus pneumoniæ*, Flügge; *Diplococcus pneumoniæ fibrinosæ*, Friedländer; *Micrococcus pneumoniæ infectiosæ*, Friedländer; Bacille de pneumonie, Fr.; Bacillus of Friedländer; Microbe of Friedländer. Occasionally obtained from the exudates in the pulmonary alveoli in cases of croupous pneumonia. *aër., facanaër., nliqf., nmot., pg.* **Bacillus pneumonicus agilis,** Schou. Syn., Bacillus of Schou; Bacillus of Vagus pneumonia; Bacille pneumonique, Fr. Obtained from rabbits suffering from pneumonia induced by section of the vagi. *aër., liqf., mot., pg.* **Bacillus pneumosepticus,** Babes. Obtained from the blood and tissues of a person dead of septic pneumonia. *aër., facanaër., nliqf., nmot., pg.* **Bacillus polymyxa,** Prazmowski. Syn., *Claustridium polymyxa*, Prazmowski. Found in infusion of potatoes, lupin seeds, etc. *aër., facanaër., npg.* **Bacillus polypiformis,** Liborius. Found in cow dung and in the exudates of mice inoculated with garden earth. *anaër., nliqf., mot., npg.* **Bacillus preussii,** Ciesielski. See *Bacillus alvei*, Cheshire and Cheyne. **Bacillus prodigiosus,** Ehrenberg. Syn., *Bacteridium prodigiosum*, Schröter; *Bacterium prodigiosum*, *Micrococcus prodigiosus*, Cohn; *Micrococcus imetrophus*, Trevisan; *Monas prodigiosa*, Ehrenberg; *Palmella prodigiosa*, Mont; *Zoogalactina imetropa*, Sette; Bacille du lait rouge, Bacille du pain rouge, Fr.; Bacillus der roten Milch, Bacillus des roten Brotes, Hostienblut, Wunderblut, Blutpilz, Ger. Frequently found upon food-stuffs, boiled potatoes, hard-boiled eggs, moist bread, etc. *aër., facanaër., liqf., mot., chg.* (red), *npg.* Acts as a protective to rabbits against anthrax. **Bacillus pseudœdema,** Liborius. Syn., Bacillus pseudosepticus, Macé; Pseudo-œdembacillus, Ger. Obtained from the exudates of mice, after inoculation with garden earth. *anaër., liqf., pg.* Resembles *Bacillus œdematis maligni*, Koch. **Bacillus pseudopneumonicus,** Passet. Syn., *Bacterium pseudo-pneumonicum.* Found in pus. *aër., nliqf., nmot., pg.* Resembles *Micrococcus pneumoniæ crouposæ*, Fränkel. **Bacillus pseudosepticus,** Macé. See *Bacillus pseudœdema*, Liborius. **Bacillus pseudosepticus of Mice,** Bienstock. Syn., Bacillus of pseudosepticemia of mice. Found in feces. *aër., nliqf., nmot., pg.* Found after inoculation, mostly in the edematous fluid and not in the blood. **Bacillus pseudo-tuberculosis,** Pfeiffer. Obtained from the viscera of a horse killed on suspicion of having glanders. *aër., nliqf., nmot., pg.* **Bacillus puerperalis,** Engel and Spillmann. Syn., *Leptothrix puerperalis*, Fettz; Bacillus des Puerperal-Fiebers, Ger.; Bacille puerpérale, Fr.; Leptothrix of puerperal fever; Bacillus of puerperal fever. Found in two cases of puerperal sepsis. *pg.* (for mice and rabbits). Considered by Pasteur to be identical with *Bacillus anthracis.* **Bacillus pulpæ pyogenes,** Miller. Obtained from gangrenous tooth-pulp. *aër., facanaër., liqf., pg.* **Bacillus punctatus,** Zimmermann. Found in hydrant water (Chemnitz). *aër., liqf., npg.* **Bacillus putrificus coli,** Bienstock. Syn., Bienstock's putrefactive bacillus from the feces; Bienstock's putrefactive bacillus; Bacillus of albuminous decomposition; Drumstick bacillus; Trommelschlägelbacillus; Bienstock's Bacillus aus Faeces; Bacillus der Eiweisszersetzung, Ger.; Bacille de la decomposition de l'albumine, Fr. Found in human feces. *aër., facanaër., nliqf., mot., npg.* **Bacillus pyocyaneus** *α*, Gessard. Syn., *Bacillus aëruginosus*, *Bacterium aëruginosum*, Schröter; *Micrococcus pyocyaneus*, Gessard. Bacillus of blue or green pus. Bacille, Bactérie ou Microbe du pus bleu, Bacille du pus vert, Bacille pyocyanique, Fr.; Bacillus des grünblauen Eiters. A widely distributed form, found in purulent and serous wounds, in perspiration, and in the viscera of human cadavers. *aër., facanaër., liqf., mot., chg., pg.* Two pigments, one fluorescent green, the other blue, pyocyanin. **Bacillus pyocyaneus** *β*, Ernst. Found in pus from bandages stained green. *aër., liqf., mot., chg.* (yellowish green), *npg.* **Bacillus pyogenes fœtidus,** Passet. Syn., bacille pyogêne fétide, Fr. Obtained from an ischio-rectal abscess. *aër., nliqf., mot., pg.* **Bacillus pyogenes soli,** Bolton. Obtained from the exudates of a rat after inoculation with garden earth. *aër., facanaër., nliqf., nmot., npg.* **Bacillus radiatus,** Lüderitz. Obtained from the exudates of mice and guinea-pigs after inoculation with garden earth. *anaër., liqf., mot., npg.* **Bacillus radiatus aquatilis,** Zimmermann. Found in hydrant water (Chemnitz). *aër., liqf., mot., npg.* **Bacillus ramosus,** Eisenberg. Syn., Wurzelbacillus. Common in soil and water. *aër., liqf., npg.* **Bacillus ramosus liquefaciens.** Obtained from the air. *aër., liqf., mot., npg.* **Bacillus reticularis,** Jordan. Found in hydrant water (Lawrence, Mass.). *aër., liqf., mot., npg.* **Bacillus rheumarthritidis,** Kussmaul. Syn., *Bacillus rheumarthritis*, *Micrococcus rheumarthritis*, Leyden. Bacillus of rheumatism. Bacille du rhumatisme, Fr. Gelenkrheumatismus Mikro-organismen, Mikrokokken bei Gelenkrheumatismus, Ger. Found in the effusions in the joints in articular rheumatism. **Bacillus rhinoscleromatis,** Cornil and Alvarez, Von Frisch, Paltauf, Von Eiselsberg, Dittrich, Stepanow, etc. Syn., Bacille du rhinosclérome, Fr. Found in the newly formed tubercles of rhinoscleroma. *aër., facanaër., nliqf.*, usually *nmot.* (becomes motile on cultivation), *pg.* Etiologic relations not established. Considered by many as identical with *Bacillus pneumoniæ friedländeri.* It is less virulent, gelatin cultures more transparent and the capsules more persistent. **Bacillus rosaceum metalloides,** Dowdeswell.

See *Bacillus ruber*, Frank and Cohn. **Bacillus rubefaciens,** Zimmermann. Found in hydrant water (Chemnitz). *aër., nliqf., mot., chg.* (pale pink), *npg.* **Bacillus rubellus,** Okada. Found in the exudates of guinea-pigs after inoculation with street dust. *anaër., liqf., mot., chg.* (red), *npg.* **Bacillus ruber,** Frank, Cohn, and Becker. Syn., *Bacillus miniaceus*, Zimmermann. *Bacillus* (or *Bacterium*) *rosaceum metalloides*, Dowdeswell. The red bacillus of water. Found in water and on boiled rice. *aër., liqf., mot., chg.* (magenta red), *npg.* **Bacillus ruber indicus.** See *Bacillus indicus*, Koch. **Bacillus rubescens,** Jordan. Found in sewage (Lawrence, Mass.). *aër., nliqf., mot., chg.* (pale pink), *npg.* **Bacillus rubidus,** Eisenberg. Found in water. *aër., liqf., mot., chg.* (brownish red), *npg.* (Lustig describes a red bacillus from river water which he claims to be different from this). **Bacillus salivarius septicus,** Biondi. See *Bacillus septicus sputigenus*, Flügge. **Bacillus sanguinis typhi,** Brannan and Cheesman. Obtained from the blood of typhus-fever patients. *aër., facanaër., nmot.* **Bacillus saprogenes,** I, II, III, Rosenbach. Syn., Bacille saprogène, Bacille de la sueur des pied, Fr. Fäulnisbacillus, Ger. Found in putrefying matter on fetid feet, the white plugs of the pharyngeal follicles, etc. *aër., facanaër., pg.* **Bacillus scaber,** Duclaux. Syn., *Tyrothrix scaber.* Found in cheese. *aër., nliqf., mot.* (in early stages becoming non-motile), *npg.* **Bacillus schäfferi,** Freudenreich. Obtained from cheese and fermenting potato infusion. *aër., facanaër., nliqf., mot., npg.* Closely resembles *Bacillus neapolitanus*, Emmerich. **Bacillus scissus,** Frankland. Found in the soil. *aër., nliqf., nmot., npg.* **Bacillus septicæmiæ hæmorrhagicæ,** Sternberg. *Bacillus choleræ gallinarum*, Flügge. *Bacillus cuniculicida*, Flügge. *Bacillus cuniculicidus*, Koch. *Bacterium septicæmiæ*, Koch. *Bacterium morbilli*, Lanzi. *Coccobacteria septica*, Billroth. *Micrococcus septicus*, Cohn. *Micrococcus choleræ gallinarum*, *Micrococcus gallicidus*, *Microsporon septicus*, Klebs. Bacillus der Hühnercholera, Bacillus der Kaninchenseptikämie (Koch). Bacterium der Septikämie bei Kaninchen, Bacillus der Rinderseuche, Kitt. Bacillus der Schweineseuche, Löffler and Schütz. Bacillus der Wildseuche, Hueppe. Bacillus der Büffelseuche, Oreste-Armanni. Rinderpestbacillus, Ger. Bacille de la septicémie du lapin. Bacille du choléra des poules. Microbe du choléra des poules, Pasteur, Fr. **Bacillus septicus,** Koch. See *Bacillus erysipelatos suis*, Koch. **Bacillus septicus,** Pasteur. See *Bacillus œdematis maligni*, Koch. Cf. *Proteus septicus.* **Bacillus septicus acuminatus,** Babes. Obtained from the umbilical stump, blood and viscera of a five days old child, dead of septic infection. *aër.* (no growth on gelatin), *pg.* (for rabbits and guinea-pigs, not for mice). **Bacillus septicus agrigenus,** Nicolaier. Obtained from manured garden soil. *aër., nliqf.* (?) Resembles *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus septicus aus Speichel.** See *Bacillus septicus sputi*, I, II, Kreibohm. **Bacillus septicus keratomalaciæ,** Babes. Obtained from the corneal tissues and viscera of a child that died of septicemia following keratomalacia. *aër., facanaër., nliqf., pg.* (for rabbits and mice, slightly for birds, not for guinea-pigs). **Bacillus septicus sputi,** I, II, Kreibohm. Syn., Bacillus septicus aus Speichel, Ger. Obtained from human buccal secretions. Does not grow in any known culture-medium. Resembles *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacillus septicus sputigenus,** Flügge. Syn., *Bacillus salivarius septicus*, Biondi. *Bacterium septicum sputigenum*, Fränkel. *Micrococcus pneumoniæ crouposæ*, Fränkel. *Micrococcus pasteuri*, Sternberg. *Diplococcus pneumoniæ*, Weichselbaum. *Streptococcus lanceolatus pasteuri*, Gamaleia. Microbe of Pasteur. Micrococcus of Salvioli. Micrococcus of sputum septicemia, Fränkel. Fränkel'scher Diplococcus. Fränkel'scher Pneumobacillus. Fränkel'scher Pneumonie-Diplococcus. Lancet-shaped micrococcus, Talamon. Lanceolatecoccus, Talamon. Found both in healthy and in pneumonic sputum, in the fibrinous exudates of croupous pneumonia, and in the pus of meningitis. *aër., facanaër., nmot., nliqf., pg.* Held to be the cause of croupous pneumonia in man, and by some to be identical with *Bacillus lyssae*, Pasteur. **Bacillus septicus ulceris gangrænosi,** Babes. Found in the blood and viscera of a boy dead of septicemia following gangrene of the skin. *aër., liqf., mot., pg.* **Bacillus septicus vesicæ,** Clado. Found in the urine of a patient with cystitis. *aër., facanaër., nliqf., mot., pg.* **Bacillus sessilis,** L. Klein. Found in the blood of a cow supposed to have died of anthrax. *aër., mot.* (convulsive jerking), *npg.* **Bacillus similis,** Bienstock. See *Bacillus subtilis simulans*, I, II, Bienstock. **Bacillus smaragdinus fœtidus,** Reimann. Found in the nasal secretions in a case of ozena. *aër., facanaër., liqf., pg.* **Bacillus smaragdino phosphorescens,** Katz. Obtained from a herring in fish market (Sidney, N. S. W.). *aër., nliqf., nmot., phos.* (emerald green), *npg.* Resembles *Photobacterium phosphorescens*, Cohn, and *Photobacterium pflügeri*, Ludwig. **Bacillus solidus,** Lüderitz. Found in the exudates of mice inoculated with garden earth. *aër., nliqf., mot., npg.* **Bacillus spiniferus,** Unna. Found upon the skin in cases of eczema seborrhœicum. *aër., nliqf., chg.* (grayish yellow), *npg.* **Bacillus sputigenus crassus.** See *Bacillus crassus sputigenus*, Kriebohm. **Bacillus stolonatus,** Adametz. Found in water. *aër., nliqf., mot., npg.* **Bacillus stoloniferus,** Pohl. Found in swamp water. *aër., liqf., mot.* Pathogenesis not determined. **Bacillus striatus albus,** Von Besser. Found in the nasal secretions of healthy persons. *aër., nliqf., npg.* **Bacillus striatus flavus,** Von Besser. Occasionally found in nasal mucus. *aër., nliqf., chg.* (sulphur yellow), *npg.* **Bacillus subflavus,** Zimmermann. Found in hydrant water (Chemnitz). *aër., nliqf., mot., chg.* (pale yellow), *npg.* **Bacillus subtilis,** Ehrenberg, Cohn, Brefeld, Prazmowski, and Fitz. Syn. *Bacillus glycerinæ*, Fitz; *Bacillus fitzianus*, Zopf; *Bacterium subtile*, Zopf; *Metallacter subtile*, Pertz; *Vibrio subtilis*, Ehrenberg; Bacille du foin, Fr.; Bacillo del fieno, Ital.; Heubacillus; Fitz'scher Aethylbacillus, Ger. DeBary confines *B. subtilis* to the form described by Brefeld and Prazmowski. The relation of the starch fermentation species of Fitz remains doubtful. An abundant form obtained from the air, water, soil, and on plants. *aër., liqf., oscl., npg.* **Bacillus subtiliformis,** Bienstock. See *Bacillus subtilis simulans*, I, II, Bienstock. **Bacillus subtilis simulans,** I, II, Bienstock. Syn., *Bacillus similis*, Bienstock. Heubacillusähnlicher Bacillus, Ger. Bacille de Bienstock, I, II, Fr. Found in human feces. *aër., nliqf., nmot., npg.* **Bacillus suis,** Detmers. See *Bacillus tardigradus.* **Bacillus sulf-hydrogenus,** Miquel. Found in water. *aër., mot.* Decomposes albumin with evolution of H_2S. **Bacillus sulfureum,** Holschewnikoff and Rosenheim. Two forms found in urine and in mud.

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

(1) *aër.*, *facanaër.*, *nliqf.*, (2) *liqf.*, *mot.*, *chg.* (reddish brown), *npg.* Syn., *Proteus sulfureus*, Lindenborn. Found in water. **Bacillus superficialis,** Jordan. Common in sewage (Lawrence, Mass.). *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus sycosiferus fœtidus,** Tommasoli. Syn., *Bacillus sycosiferus.* Bacillus of Tommasoli. Found on the hairs of the head of a patient affected with sycosis. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus syncyanum.** See *Bacillus cyanogenus*, Hueppe. **Bacillus synxanthus,** Ehrenberg and Schröter. Syn., *Bacillus xanthogenus*, Fuchs and Ehrenberg. *Bacterium xanthinum*, Schröter. *Vibrio synxanthus*, Ehrenberg. *Vibrio xanthogenus*, Fuchs. Bacillus of yellow milk. Bacille du lait jaune, Fr. Found in milk that has been boiled. *aër.*, *mot.*, *chg.*, (golden yellow), *npg.* Precipitates the casein, renders the milk alkaline. **Bacillus syphilidis,** Lustgarten. Syn., *Bacillus syphilis*, Lustgarten. Bacille de la syphilis, Bacille de Lustgarten, Fr.; Syphilis bacillus, Luesbacillus, Ger.; Bacillo del sifilide, Ital.; Bacillus of Lustgarten. Found in syphilitic new growths and secretions; does not develop in ordinary culture media. In staining, reaction seems to be identical with that of the Bacillus of the Smegma. Doehle describes parasitic infusoria as the causative agents of syphilis. Cf. *Helicomonas*, Klebs, and Syphilis of bacillus of Eve and Lingard. **Bacillus tardigradus.** Syn., *Bacillus suis*, Detmers. *Micrococcus suis*, Burrill. Found in dew, water, and in the fluids of pigs affected with swine plague. *aër.*, *mot.*, *npg.* Cf. Bacillus of Swine plague, Marseilles, Rietsch and Jobert. **Bacillus tenuis,** Duclaux. Syn., *Tyrothrix tenuis*, Duclaux. Found in decomposing albuminoid matter, cheese, etc. *aër.*, *facanaër.*, (?) *mot.*, *npg.* Used in ripening certain French cheeses. **Bacillus tenuis sputigenus,** Pansini. Obtained from sputum. *aër.*, *nliqf.*, *nmot.*, *pg.* **Bacillus termo,** Dujardin and Ehrenberg. See *Bacterium termo*, Cohn. **Bacillus tetani,** Nicolaier. Syn., *Bacillus tetani traumatici*, Rosenbach; Bacille du tétanos, Bacille de la tétanie, Fr.; Tetanusbacillus, Bacillus des Wundstarrkrampfes, Ger.; Bacillus of tetanus. Found in garden earth and in the wounds of persons dead of tetanus. *anaër.*, *liqf.*, *mot.*, *pg.* Specific etiologic relations determined by Carle and Rattome. **Bacillus tetani traumatici,** Rosenbach. See next preceding. **Bacillus thalassophilus,** Russel. Obtained from mud (Bay of Naples). *anaër.*, *liqf.*, *mot.* Pathogenesis not determined. **Bacillus thermophilus,** Miquel. Found in the intestinal tract of man and animals, in sewage and in the soil. *aër.*, *nmot.*, *npg.* **Bacillus tremelloides,** Schottelius. Found in hydrant water (Freiburg). *aër.*, *liqf.*, *chg.* (golden yellow); *npg.* **Bacillus tremulus,** Koch. Syn., *Metallacter tremulus*, Trevisan. Found as a surface pellicle on decomposing plant infusions. Resembles *Bacillus subtilis*, Ehrenberg. **Bacillus tuberculosis,** Koch. Syn., *Bacterium tuberculosis*, Zopf; *Bacterium tuberculosum*, *Bacillus tuberculi*, *Bacillus tuberculosus*, Bacille de la tuberculeux. Bacille de la tuberculose; Bacille de Koch, Fr.; Tuberkelbacillus, Bacillus der Tuberculose, Ger.; Bacillo tubercolare, Bacillo della tuberculose, Ital.; Bacillo de la tuberculosi, Sp. Found in the sputum, in tuberculous organs, and elsewhere in persons and animals affected with tuberculosis. Parasitic. *aër.*, *facanaër.*, *nmot.*, *pg.* **Bacillus tuberculosis gallinarum,** Maffucci. Obtained from cases of spontaneous tuberculosis in fowls. This seems to be a distinct species, characterized by its staining reactions, etc., its growth in pure cultures, and its pathogenic qualities, Koch. **Bacillus tumescens,** Zopf. Syn., *Bacterium tumescens*, Zopf. Found upon beets. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus turgidus,** Duclaux. Syn., *Tyrothrix turgidus*, Duclaux. Found in cheese. *aër.* Produces alkaline reaction (carbonate and butyrate of ammonia) in milk. **Bacillus tussis convulsivæ,** Afanassiew. Syn., *Bacillus of Afanassiew*, Bacille de la coqueluche, Fr., Keuchhustenpilz, Ger., Burger. Found in the sputum of persons affected with pertussis. *aër.*, *nliqf.*, *mot.*, *pg.* **Bacillus typhi abdominalis,** Eberth, Gaffky, Klebs, Eppinger, Brautlecht. Syn., *Bacillus typhosus*, *Bacterium typhosum*, Bacille typhique, Bacille de la fièvre typhoide, Microbe de la fièvre typhoide, Fr.; Typhusbacillus, Ger.; Bacillo tifoso, Ital. Found in water and in milk, and in the feces and organs in typhoid fever. *aër.*, *nliqf.*, *facanaër.* **Bacillus typhi murium,** Löffler. Obtained from mice affected with an epidemic disease. *aër.*, *facanaër.*, *nliqf.*, *mot.* **Bacillus typhosus.** See *Bacillus typhi abdominalis*, Eberth, etc. **Bacillus ubiquitus,** Jordan. Found in air, water, sewage (Lawrence, Mass.). *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *npg.* Resembles *Bacillus candicans*, Frankland. **Bacillus ulna,** Cohn, and Prazmowski. Syn., Vibrio *b*, Ehrenberg. *Bacterium ulna*, Miller. Vibrio bacillus, Müller, Ehrenberg. Found in egg albumin. *aër.*, *mot.*, *npg.* **Bacillus ulna of Vignal.** Found in saliva of healthy persons; perhaps identical with the preceding form. *aër.*, *liqf.*, *npg.* **Bacillus ureæ,** Miquel. Found in the air. *aër.*, *facanaër.*, *nliqf.*, *npg.* Perhaps identical with the preceding form. **Bacillus ureæ,** Leube. Found in old urine, three varieties. *aër.*, *nliqf.*, *npg.* Converts urea into ammonium carbonate. **Bacillus urocephalus,** Duclaux. Syn., *Tyrothrix urocephalus*, Duclaux. One of the commonest forms associated with putrefaction of animal matter. *aër.*, *facanaër.*, *npg.* **Bacillus vasculosis,** Sternberg. Obtained from the intestine and stomach of yellow-fever cadavers. *aër.*, *liqf.*, *mot.*, *npg.* **Bacillus vaginalis,** Döderlein. Syn., Döderlein'scher Scheidenbacillus, Döderleins Bacillus, Scheidenbacillus, Ger. Constantly found in the normal vaginal secretions of adults. *aër.*, *facanaër.*, *nmot.* (no growth in gelatin), *npg.* **Bacillus varicosus conjunctivæ,** Gombert. Found in the healthy conjunctival sac of man. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus venenosus,** Vaughan. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus venenosus brevis,** Vaughan. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus venenosus invisibilis,** Vaughan. Found in water. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *pg.* **Bacillus venenosus liquefaciens,** Vaughan. Found in water. *aër.*, *facanaër.*, *liqf.*, *mot.*, *pg.* **Bacillus ventriculi,** Raczynssky. Obtained from the stomach of meat-fed dogs. *aër.*, *facanaër.*, *nliqf.*, *mot.*, *npg.* **Bacillus vermicularis,** Frankland. Found in river water. *aër.*, *liqf.*, *oscl.*, *npg.* **Bacillus vermiculosus,** Zimmermann. Found in water. *aër.*, *liqf.*, *oscl.*, *npg.* **Bacillus violaceus,** Becker. Found in river water. *aër.*, *facanaër.*, *liqf.*, *mot.*, *chg.* (dark violet). **Bacillus violaceus laurentius,** Jordan. Found in hydrant water (Lawrence, Mass.). *aër.*, *facanaër.*, *liqf.*, *mot.*, *npg.* **Bacillus virens,** Van Tieghem. Syn., *Sporonema gracile.* Found in stagnant water. *aër.*, *mot.*, *chg.* (green, held by some to be chlorophyll,

but not sufficiently studied), *npg.* **Bacillus virescens,** Frick. Found in green sputum. *aër., nliqf., mot., chg.* (green), *npg.* **Bacillus virgula,** Duclaux. Syn., *Tyrothrix virgula,* Duclaux. Found in albuminous solutions. *aër., nmot., npg.* **Bacillus virgula.** See *Spirillum choleræ asiaticæ,* Koch. **Bacillus viridis flavus,** Frick. Syn., *Bacillus viridis pallescens,* Frick. *aër., nliqf., mot., chg.* (yellowish green), *npg.* Resembles *Bacillus virescens,* Frick. **Bacillus viridis,** Van Tieghem. Syn. *Bacterium viride,* Van Tieghem, *Arthrobacterium viride,* De Bary. Found in water collected in the hollow of a polyporous fungus. *aër., chg.* (green). Not thoroughly investigated. **Bacillus viridis pallescens,** Frick. See *Bacillus viridis flavus,* Frick. **Bacillus viscosus,** Frankland. Found in river water. *aër. liqf. mot. chg.* (fluorescent green). Perhaps identical with *Bacillus fluorescens,* Flügge. **Bacillus viscosus,** I, II, Van Laer. Found in ropy milk. *aër., nliqf., npg.* **Bacillus viscosus cerevisiæ,** Van Laer. Found in viscous beer and in milk. *aër., liqf., npg.* **Bacillus viscosus sacchari,** Kramer. Found in viscous saccharine fluids. *aër., liqf., npg.* **Bacillus von Denecke.** See *Spirillum tyrogenum,* Denecke. **Bacillus von Finkler-Prior.** See Spirillum Finkler-Prior. **Bacillus vulgaris,** Hauser; Syn., *Proteus vulgaris. Proteus sulfureus,* Holschenikoff. Proteus of Hauser. Commonly associated with putrefaction. *aër., facanaër., liqf., mot., pg.* This species is probably one of those formerly included under *Bacterium termo.* **Bacillus X,** Sternberg. Found in yellow-fever cadavers. Sternberg thinks it possible that this form is concerned in the etiology of yellow fever. *pg.* (for rabbits). **Bacillus xanthogenus,** Fuchs and Ehrenberg. See *Bacillus synxanthus,* Ehrenberg. **Bacillus xerosis,** Fränkel. Syn., *Xerose bacillus.* See Bacillus of xerosis epithelialis conjunctivæ, Leber. **Bacillus zenkeri,** Hauser. Syn., *Proteus zenkeri.* Bacille de Hauser, Fr. Found in putrefying animal matter. *aër., facanaër., nliqf., mot., pg.* **Bacillus zopfii.** Syn., *Bacterium zopfii,* Kurth. *Arthrobacterium zopfii,* De Bary. Knäuelbildender Bacillus, Ger. Found in the intestinal tract of fowls. *aër., nliqf., mot., npg.* **Bacillus zurnianum,** List. Found in water. *aër., nliqf., nmot., npg.* **Bacilo virgula, Bacilo virgulado,** Sp. See *Spirillum choleræ asiaticæ,* Koch. **Bacteria of pus.** Syn., Eitermicroben, Ger. **Bacteria of putrefaction.** Syn., Bactéries de la putrefaction, Fr.; Fäulnisbacterien, Ger. **Bacteria of sea water.** Syn., Bactéries de l'eau de mer, Fr.; Bacterien des Meerwassers, Ger. **Bacteria of the air.** Syn., Bactéries de l'air, Fr.; Luftbacterien, Ger.; micrococci of the air. **Bacteria of the mouth.** Syn., Bactéries de la bouche, Fr. Bacterien der Mundhöhle. **Bacteria of the soil.** Syn., Bactéries de la terre, Fr.; Erdebacterien, Ger. **Bacteria of urine.** Syn., Bactéries de l'urine, Fr.; Bacterien des Harns, Ger. **Bacteria of water.** Bactéries de l'eau, Fr.; Wasserbacterien, Ger. **Bactéridie charbonneuse.** See *Bacillus anthracis,* Pollender and Davaine. **Bactéridie du charbon.** See *Bacillus anthracis,* Pollender and Davaine. **Bactéridie du charbon symptomatique.** See *Bacillus chauvæi,* Arloing, Cornevin, Thomas. **Bacteridium prodigiosum,** Schröter. See *Bacillus prodigiosus,* Ehrenberg. **Bactérie chainette.** See *Bacterium catenula,* Dujardin. **Bactérie chromogène.** Chromogenic bacteria. **Bactérie commune,** Miquel. See *Bacillus termo,* Dujardin. **Bactéries de la bouche.** Bacteria of the mouth. **Bactéries de la diphtherie,** Emmerich. See *Bacillus diphtheriæ,* Klebs. **Bactérie de la fermentation butyrique.** See *Bacillus butyricus,* Prazmowski. **Bactérie de la fermentation lactique.** See *Bacillus acidi lactici,* Hueppe. **Bactérie de la fermentation propionique.** See *Bacillus cavicidus,* Brieger. **Bactéries de l'eau.** Microbes of water. **Bactéries de la putrefaction.** Microbes of putrefaction. **Bacterium der Brustseuche des Pferdes.** See *Streptococcus coryzæ contagiosæ equorum,* Schütz. **Bacterium der Buttersäuregährung.** See *Bacillus butyricus,* Prazmowski. **Bacterium der Diphtherie,** Emmerich. See *Bacillus diphtheriæ,* Klebs. **Bacterium der Milchsäuregährung.** See *Bacillus acidi lactici,* Hueppe. **Bactérie du pus bleu.** See *Bacillus pyocyaneus a,* Gessard. **Bactérie point.** *Bacterium lineola,* Cohn. **Bacterium des Sauerteigs.** See *Bacterium farinaceum,* Wigand. **Bactérie du vinaigre.** See *Bacillus aceti,* Kützing. **Bactérie lumineuse de la mer du Nord.** See *Photobacterium luminosum,* Beyerinck. **Bactéries de la terre.** Microbes of the soil. **Bacterien der Mundhöhle.** Microbes of the mouth. **Bacterien des Meerwassers.** Microbes of sea water. **Bacterium aceti,** Lanzi. See *Bacillus aceti,* Kützing. **Bacterium aërogenes,** Miller. See *Bacillus aërogenes,* II, Miller. **Bacterium aëruginosum,** Schröter. See *Bacillus pyocyaneus a,* Gessard. **Bacterium allii.** See *Bacillus allii,* Griffiths. **Bacterium anthracis,** Zopf. See *Bacillus anthracis,* Pollender and Davaine. **Bacterium articulatum,** Ehrenberg. See *Bacterium lineola,* Cohn. **Bacterium aurantiacum,** Trelease; a chromogenic form. **Bacterium bacillus,** Pasteur. See *Bacillus termo,* Davaine. **Bacterium aus Diphtherie bei Menschen.** See *Bacillus diphtheriæ,* Klebs. **Bacterium aus der Diphtherie bei Tauben.** See *Bacillus diphtheriæ columbarum,* Löffler. **Bacterium brunneum,** Schröter. Found in a putrid infusion of Indian corn, *chg.* (brown). Perhaps identical with *Bacillus fuscus,* Zimmermann. **Bacterium butyri colloideum,** Lafar. Found in every sample of natural butter examined. Cf. *Bacillus butyri fluorescens,* Lafar. **Bacterium candidum,** Trelease. A chromogenous form, identical with *Bacillus mesentericus fuscus,* Flügge. **Bacterium capitatum,** Davaine. Found in an infusion of albuminous matter. *aër., mot.* **Bacterium carbuncolare,** Pollender, Brauell, Delafond, and Davaine. See *Bacillus anthracis,* Pollender and Davaine. **Bacterium carlsbergense,** Hansen. Found in the air. Cf. *Bacterium kochii,* Hansen. **Bacterium catenula,** Dujardin. Syn., *Bacterium chainette.* Bactérie chainette, Fr. Observed especially in putrid wine or putrefying blood, generally in albuminous liquids in contact with air. Coze and Feltz found it in typhoid fever in man and rabbits. It resembles *Bacillus acidi lactici,* Davaine, Hueppe. **Bacterium caucasicum.** See *Bacillus caucasicus,* Kern. **Bacterium chainette.** See *Bacterium catenula,* Dujardin. **Bacterium chlorinum,** Engelmann. Found in water. *aër., chg.* (green). Engelmann holds this to be chlorophyll, as a small amount of oxygen is given off, indicating the assimilation of carbon. **Bacterium coli commune,** Escherich. See *Bacillus neapolitanus.* **Bacterium commune,** Pasteur. See *Bacterium termo,* Dujardin. **Bacterium cuneatum,** Rivolta. See *Bacillus cuneatus.* **Bacterium cyanogenum,** Fuchs. See *Bacillus cyanogenus,* Hueppe. **Bacterium**

decalvans, Thin. See *Micrococcus area celsii*, Buchner and Sehlen. **Bactérie de la pourriture.** See *Bacterium putredinis.* **Bacterium denitrificans**, *α β*, Gayon and Dupetit. See *Bacillus denitrificans*, Giltay and Aberson. **Bacterium der Brustseuche des Pferdes.** See *Streptococcus coryzæ contagiosæ equorum*, Schütz. **Bacterium der Essiggährung.** See *Bacillus aceti*, Kützing. **Bacterium der Milchsäuregährung.** See *Bacillus acidi lactici*, Davaine and Hueppe. **Bacterium der Septikämie bei Kaninchen.** See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacterium dysodes**, Zopf. See *Bacillus dysodes*, Zopf. **Bacterium enchelys**, Ehrenberg. Found in river water. Thought by Ehrenberg to be an infusorian. **Bactérie en zigzag**, Fr. See *Bacillus geniculatus*, De Bary. **Bacterium farinaceum**, Wigand. Syn., Bacterium des Sauerteigs. Found in sour sponge or dough. **Bacterium fitzianum**, Zopf. See *Bacillus subtilis*, Ehrenberg. **Bacterium fœtidum**, Thin. See *Bacillus fœtidus*, Passet. **Bacterium fusiforme**, Warming. Found in sea water. **Bacterium gingivæ pyogenes**, Miller. See *Bacillus gingivæ pyogenes.* **Bacterium gliscrogenum**, Malerba. See *Bacillus gliscrogenus.* Found in viscid acid urine. *aër.*, *nliqf.*, *mot.*, *npg.* **Bacterium griseum**, Warming. Syn., *Micrococcus griseus*, Winter, a doubtful form. **Bacterium gummis**, Commes. Syn., Microbe de la mal nero, Ital. The cause of the gummous disease of the fig, almond, and orange trees, and the mal nero of vines. Cf. *Bacterium putredinis*, Davaine. **Bacterium gummosum**, Ritsert. Found to produce the viscosity of infusions of Digitalis. *aër.*, *liqf.*, *pleom.* **Bacterium hessii**, Guillebeau. One of the two forms found by Gillebeau to cause milk to become ropy. Thrives best in Pasteurized milk. *aër.*, *liqf.*, *mot.*, *npg.* Cf. *Micrococcus freudenreichii.* **Bacterium hyacinthi**, Wakker. Found in the bulbs and leaves of the hyacinth and causing the yellows of hyacinths. Cf. *Bacterium hyacinthi septicus*, Heinz. **Bacterium janthinum**, Zopf. See *Bacillus janthinus*, Zopf. **Bacterium kochii**, Hansen. Found in the air of Carlsberg. Cf. *Bacterium carlsbergense*, Hansen. **Bacterium lactis**, Lister. See *Bacillus acidi lactici*, Hueppe. **Bacterium lactis aërogenes**, Escherich. See *Bacillus lactis aërogenes*, Abelous. **Bacterium lineola**, Müller, Cohn. Syn., *Bacterium punctum*, Rivolta. *Bacterium tremulans*, Trevisan. *Bacterium triloculari*, Ehrenberg. *Bacterium articulatum*, Ehrenberg. *Vibrio lineola* (Müller), Ehrenberg. *Vibrio tremulans*, Ehrenberg. *Bacillus lineola*, Bactérie point, Fr. Found in well and other water, in infusions, soil on vegetables, etc. *aër.*, *mot.* (trembling and darting back and forth), *pleom.*, *npg.* Probably represents several species, or a developmental form of a spirillum. **Bacterium litoreum**, Warming. Found only in sea water. *aër.*, *mot.*, *npg.* **Bacterium lucens**, Van Tieghem. See *Bacillus lucens*, Van T. **Bacterium luteum**, Trelease. See *Bacillus luteus*, Flügge. **Bacterium maidis**, Cuboni. See *Bacillus maidis*, Cuboni. **Bacterium merismopœdioides**, Zopf. See *Bacillus merismopœdioides*, Zopf. **Bacterium morbilli**, Lanzi. Syn., Microbe di morbillo. Found in the urine of persons with measles. Cf. *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacterium navicula**, Reinke and Berthold. See *Bacillus butyricus*, Prazmowski. **Bacterium neapolitanum.** See *Bacillus neapolitanus.* Emmerich. **Bacterium oblongum**, Boutroux. Syn., *Micrococcus oblongus*, Boutroux. Found in beer; the agent of gluconic fermentation. **Bacterium of Butyric Acid Fermentation.** See *Bacillus butyricus*, Prazmowski. **Bacterium of Diphtheria**, Emmerich. Syn., Bactérie de la diphthérie, Fr. Bacterium der Diphtherie, Ger. Found in cases of diphtheria in man and doves. **Bacterium of Fire Blight.** See *Bacillus butyricus*, Prazmowski. **Bacterium of Infectious Pneumonia in the Horse.** See *Streptococcus coryzæ contagiosæ equorum*, Schütz. **Bacterium of Kefir.** See *Bacillus caucasicus*, Kern. **Bacterium of Pear Blight.** Cf. *Bacillus butyricus*, Prazmowski, and *Micrococcus amylovorus*, Burrill. **Bacterium of Sheep Pox.** Syn., Microbe de la clavelée. Found in cases of sheep pox, or "Schafblattern." **Bacterium of variola**, Cose and Feltz. Syn., Bactérie de la petite variole, Fr. Bacterium der Variola (oder der Blattern). Found in the vesicles of smallpox; pathogenic for rabbits. **Bacterium oleæ**, Arcangeli. Said to cause the so-called tuberculosis ("Maladie de la loupe;" "Rogner") of olives. **Bacterium ovatum**, Lebert. See *Nosema bombycis*, Nägeli. **Bacterium pasteurianum**, or **Bacterium pastorianum.** See *Bacillus pasteurianus*, Hansen. **Bacterium periplanetæ**, Tichomirow. Found in the common cockroach (*Periplanetæ orientalis*), and producing in it a specific disease. **Bacterium pflügeri**, Lüdwig. See *Photobacterium pflügeri*, Ludwig. **Bacterium phosphorescens**, Hermes. See **Bacillus phosphoreus**, Cohn. **Bacterium Phosphorescens**, Cohn. See *Photobacterium phosphorescens.* **Bacterium photometricum**, Engelmann. Found in water; motion dependent on light; possibly not a bacterium at all. **Bacterium pneumoniæ**, **Bacterium pneumoniæ crouposæ**, Friedländer. See *Bacillus pneumoniæ friedländeri.* **Bacterium porri**, Tommasi-Crudeli. Found in warts. **Bacterium prodigiosum.** See *Bacillus prodigiosus*, Ehrenberg. **Bacterium pseudopneumonicum.** See *Bacillus pseudopneumonicus*, Flügge. **Bacterium punctum**, Rivolta. See *Bacterium lineola* (Müller), Cohn. **Bacterium putredinis**, Davaine. Syn., Bactérie de la pourriture. Found in rapidly-decaying plants. Cf. *Bacterium gummis*, Comes. **Bacterium pyriforme**, Hansen. Found in the air. **Bacterium radicicola**, Prazmowski. Syn., *Bacillus radicicola*, Beyerinck; *Rhizobium leguminosarum*, Frank. Found in the soil, particularly in the roots of the *Leguminosæ*, where they are held to stimulate the cells to unusual growth, affect nitrification, constitute the "bacteroids" of Woronin, and form the so-called "bacteroid tissue." **Bacterium rosaceum metalloides**, Dowdeswell. See *Bacillus ruber*, Frank, Cohn. **Bacterium rubescens**, Lankester. See *Beggiatoa roseo-persicina*, Zopf. **Bacterium septicæmiæ**, Koch. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Bacterium septicum sputigenum.** See *Bacillus septicus sputigenus*, Flügge. **Bacterium subtile**, Buchner. See *Bacillus subtilis*, Ehrenberg. **Bacterium sulfuratum**; **Bacterium sulphuratum**, Warming. See *Beggiatoa roseo-persicina*, Zopf. **Bacterium sulfureum**, Rosenheim. Found in wine. *nliqf.* Evolves H_2S. **Bacterium syncyaneum**, Ehrenberg, Schröter. See *Bacillus cyanogenus*, Hueppe. **Bacterium synxanthum**, Schröter. See *Bacillus synxanthus.* **Bacterium termo**, Dujardin and Ehrenberg. Syn., *Bacillus termo*, Davaine. *Bactèrie* (*Bacterium*) *commune*, Pasteur. *Bacterium bacillus*, Pasteur. *Cryptococcus natans*, Kützing. *Cryptococcus nebulosus*, Kützing. *Micrococcus crepusculum*, Cohn. *Zooglœa termo* (Müller), Cohn. *Monas*

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

termo, Müller. *Palmella infusionum*, Ehrenberg. Long considered the most characteristic microbe of filth and putrefaction; but shown by Hauser to be a collective species. The name is now reserved for Vignal's species, while *Bacillus termo* may perhaps be reserved for the flagellate forms studied by Dallinger and Drysdale, or discarded entirely. **Bacterium termo**, Vignal. Found in the saliva of healthy persons. *aër.*, *liqf.*, *mot.*, *chg.* (yellowish gray), *npg.* **Bacterium tholoideum**, Gessner. Syn., Bacillus of Gessner. Found in the intestinal contents of healthy persons. Resembles *Bacillus lactis aërogenes*, Escherich. *pg.* (for mice and guinea-pigs). **Bacterium tremulans**, Trevisan. See *Bacterium lineola*, Cohn. **Bacterium triloculare**, Ehrenberg. See *Bacterium lineola*, Cohn. **Bacterium tuberculosis**, Zopf. **Bacterium tuberculosum**, Koch. See *Bacillus tuberculosis*, Koch. **Bacterium tumescens**, Zopf. See *Bacillus tumescens*, Zopf. **Bacterium typhosum.** See *Bacillus typhi abdominalis*, Eberth and Gaffky. **Bacterium ulna.** See *Bacillus ulna*, Cohn. **Bacterium ulna**, Cohn. See *Micrococcus ureæ*. **Bacterium ureæ**, Jaksch. Found in ammoniacal urine. *aër.*, *facanaër.*, *nliqf.* Not sufficiently investigated. **Bacterium vermiforme**, Ward. Found in fermented ginger beer. **Bacterium viride**, See *Bacillus viridis*, Van Tieghem. **Bacterium violaceum**, Bergonzini. Syn., *Chromobacterium violaceum*, Bergonzini. Found in putrefying solutions of egg albumen. *chg.* (violet). **Bacterium xanthinum.** See *Bacillus synxanthus*, Ehrenberg and Schröter. **Bacterium xylinum**, A. J. Brown. Found in solutions of carbohydrates, giving rise to acetic acid, and converting dextrose into gluconic acid, and mannitol into levulose. **Bacterium zopfii**, Kurth. See *Bacillus zopfii*. **Bacteroides**, Woronin. Microorganisms forming tubercles in the roots of leguminous plants, and assisting in the fixing of nitrogen. **Batteria chromogène**, Ital. Chromogenic microbes. **Batterio della pellagra**, Ital. See *Bacillus maidis*, Cuboni. **Beggiatoa alba**, Vaucher. Syn., *Beggiatoa punctata*, Trevisan. *Beggiatoa leptomitiformis*, Meneghi. *Oscillaria alba*, Vaucher. *Hygrocrocis vandelli*, Meneghi. Next to Cladothrix the most common bacterium of water, forming a superficial layer in the mud called *barègine* or *glairine*, *q. v.* **Beggiatoa alba**, var. **marina**, Cohn. Syn., *Beggiatoa ærstedtii*, Rabenhorst. See *Beggiatoa marina*, Cohn. **Beggiatoa arachnoidæ**, Agardh. Syn., *Oscillaria arachnoidea*, Agardh. *Oscillaria versatilis*, Kutz. Found in swamps and sulphur springs. **Beggiatoa leptomitiformis**, Meneghi and Trevisan. Syn., *Oscillaria leptomitiformis*, Meneghi. Found in sulphur springs. **Beggiatoa marina**, Cohn. Syn., *Beggiatoa alba*, var. *marina*, Cohn. *Beggiatoa ærstedii*, Rabenhorst. Found in a salt water aquarium, forming a whitish slimy layer on dead fish. **Beggiatoa minima**, Warming. Found in sea water; gray. **Beggiatoa mirabilis**, Cohn. Found in a salt water aquarium; snow white. **Beggiatoa multisepta.** See *Pragmidiothrix multisepta*, Engler. Held by Zopf to be identical with *Beggiatoa alba*, Vaucher. **Beggiatoa nivea**, Rabenhorst. Syn., *Leptonema niveum*, *Symphiothrix nivea*, Brugger. Found in sulphur springs. **Beggiatoa nodosa**, Van Tieghem. A doubtful form characterized by nodes in the filaments, which differ from other members of the genus in the absence of sulphur grains and of motion. **Beggiatoa ærstedtii**, Rabenhorst. See *Beggiatoa alba*, var. *marina*, Cohn. **Beggiatoa pellucida**, Cohn. Found in a marine aquarium; sulphur grains few. **Beggiatoa punctata**, Trevisan. See *Beggiatoa alba*, Cohn. **Beggiatoa roseo-persicina**, Zopf. Syn., *Bacterium rubescens*, Lankester. *Bacterium sulfuratum* or *Bacterium sulphuratum*, Warming. *Clathrocystis roseo-persicina*, Cohn. *Cohnia roseo-persicina*, Winter, Kützing. *Microhaloa rosea*, Kutz. *Ophidiomonas sanguinea*, Ehrenberg. *Pleurococcus roseo-persicina*, Rabenhorst. Peach-colored bacterium. Morphologically identical with *Beggiatoa alba*, Vaucher. Forms rose-colored to violet pellicles on putrid matter. Produces bacterio-purpurin. **Beggiatoa tigrina**, Rabenhorst. Syn., *Oscillaria tigrina*, Rœmer. Found in swamps on submerged wood. Forms a thin white layer. **Bienenfaulbrutbacillus.** See *Bacillus alvei*, Cheshire and Cheyne. **Bienstock's Bacillus. Bienstock's Bacillus aus Fæces. Bienstock's Putrefactive Bacillus. Bienstock's Putrefactive Bacillus from the Feces.** See *Bacillus putreficus coli*, Bienstock. **Blutbacillus.** Microbe of the blood. **Blutpilz.** See *Bacillus prodigiosus*, Ehrenberg. **Bodenbacillus.** Microbe of the soil. **Bollingera equi**, Saccardo. See *Micrococcus botryogenes*, Rabe. **Brauner Kartoffelbacillus**, Ger. See *Bacillus mesentericus fuscus*, Flügge. **Brieger's Bacillus.** See *Bacillus cavicidus*, Brieger. **Brunnenfaden.** See *Crenothrix kühniana* Rabenhorst. **Buff Bacillus of Spreading Edema**, A. B. Harris. *nliqf.*, *aër.*, *chg.* (buff), *pleom.* **Butterbacillus**, Ger., **Buttersäurebacillus, Butylbacillus**, Ger. See *Bacillus butyricus*, Prazmowski. **Capsule Bacillus of Loeb.** Obtained from a case of keratomalacia infantum. *aër.*, *facanaër.*, *nliqf.*, *nmot.*, *pg.* Resembles *Bacillus capsulatus*, Pfeiffer. **Capsule Bacillus of Ozena**, Marano. Found in the nasal secretions in ten cases of ozena. Resembles *Bacillus pneumoniæ friedländerii*. Cf. *Micrococcus lœwenbergii*. **Capsule Bacillus of Smith.** See *Bacillus capsulatus smithii*. **Champignon du tube digestif du lapin et autres herbivores**, Remack. See *Saccharomyces guttulatus*, Robin. **Cheese Spirillum.** See *Spirillum tyrogenum*, Denecke. **Chromobacterium violaceum**, Bergonzini. See *Bacterium violaceum*, Bergonzini. **Chromogene Bacterien**, Ger. Syn., Bactéries chromogènes, Fr. Batteria chromogeni, It. Chromogenic bacteria. **Chromogenic Micrococci. Chromogenous Micrococci.** Microcoque chromogène, Fr. Chromogenic micrococci. **Chromogenous Bacteria.** Bactéries chromogènes, Fr. Batteria cromogeni, Ital. Chromogenic bacteria. **Cladothrix bovis.** See *Actinomyces bovis*, Harz. **Cladothrix canis.** Held by Rabe to be very like *Actinomyces bovis*. **Cladothrix dichotoma**, Cohn and Zopf. See *Leptothrix ochracea*, Kützing. *Myconostoc gregarium*, Cohn. **Cladothrix fœrsteri**, Cohn. Syn., *Crenothrix fœrsteri*, *Streptothrix fœrsteri*, Cohn. Leptrothrix der Thränenröhrchen, Graefe, Ger. Forms yellowish or grayish concretions in the human lachrymal ducts. **Cladothrix intricata**, Russel. Obtained from sea mud (bay of Naples). *aër.*, *liqf.*, *mot.* **Clathrocystis roseo-persicina**, Cohn. See *Beggiatoa roseo-persicina*, Zopf. **Clostridium butyricum**, Prazmowski. See *Bacillus butyricus*, Prazmowski. **Clostridium fœtidum**, Liborius. See *Bacillus fœtidus*, Passet. **Clostridium of Symptomatic Anthrax (or Charbon)**, Neelsen and Ehlers. See *Bacillus chauvæi*, Bollinger and Feser. **Clostridium polymyxa**, Prazmowski. See *Bacillus polymyxa*, Prazmowski. **Coccobacillus pyogenes ureæ**, Rör-

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

sing. See *Diplococcus pyogenes ureæ*, Rörsing. **Coccobacteria septica**, Billroth. The single term under which Billroth includes all putrefactive bacteria. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Coccobacteria ureæ**, Rörsing. See *Diplococcus pyogenes ureæ*, Rörsing. **Coccobacterium lyssæ**, Rivolta. See *Bacillus lyssæ*, Pasteur. **Cohnia roseo-persicina**, Winter and Kützing. See *Beggiatoa roseo-persicina*, Zopf. **Colon Bacillus of Escherich.** See *Bacillus neapolitanus*. **Comma Bacillus, Comma bacillus of Koch, Comma-shaped Bacillus**, Waten. Bacillo en virgule, bacille virgule, Fr. Kommabacillus, Ger. Bacillo virgola, bacillo virgolato, Ital. Bacillo vergula, bacillo virgulado, Sp. See *Spirillum choleræ asiaticæ*, Koch. **Cornalian Corpuscles.** See Microbe de la pebrine. **Corpuscles brillants.** See *Bacillus fœtidus*, Passet. **Corpuscles du ver du soie.** See *Micrococcus ovatus*. **Coryza diplococci.** See *Micrococcus cereus aureus*, Schröter and Winckler. **Crêmefarbiger Micrococcus**, List, Ger. See *Micrococcus citreus*, List. **Crenothrix fœrsteri**, Cohn. See *Cladothrix fœrsteri*. **Crenothrix kühniana**, Saccardo and Rabenhorst. Syn., *Crenothrix polyspora*, Cohn. *Hypæothrix kühniana*, *Leptothrix kühniana*, Brunnenfaden. Found in drinking water, to which they impart a disagreeable taste. **Crenothrix polyspora**, Cohn. See *Crenothrix kühniana*, Saccardo and Rabenhorst. **Cryptococcus alveareus.** See *Bacillus alvei*. Cheshire and Cheyne. **Cryptococcus clava**, Wedl. Found in the stomachs of ruminants. **Cryptococcus cerevisiæ**, Robin. **Cryptococcus fermentatum**, Kützing. See *Saccharomyces cerevisiæ*, Reess and Robin. **Cryptococcus glutinis**, Fersen. See *Saccharomyces glutinis*. **Cryptococcus guttulatus**, Robin. See *Saccharomyces guttulatus*. **Cryptococcus natans, cryptococcus nebulosus**, Kützing. See *Bacterium termo*, Dujardin and Davaine. **Cryptococcus of Yellow Fever.** See *C. xanthogenicus*, Freire. **Cryptococcus xanthogenicus**, Domingo-Freire. Considered by D. Freire to be the cause of yellow fever. Cf. Bacillus of yellow fever. **Darmbacillen.** Bacilli of the intestine. **Darmbacillen von Schottelius.** See *Bacillus coprogenes fœtidus*, Schottelius. **Denecke's Cheese Bacillus.** See *Spirillum tyrogenum*. **Dengue Micrococci.** See *Scheutzia laughlini*. **Detionella ochracea**, Saccardo. See *Leptothrix ochracea*, Kützing. **Diplococcus albicans amplus**, Bumm; Grayish white micrococcus. Found in mucus from the healthy vagina. *aër.*, *facanaër.*, *liqf.*, *npg.* **Diplococcus albicans tardus**, Unna and Tommasoli. Found in eczema. *aër.*, *nliqf.*, *nmot.* **Diplococcus albicans tardissimus.** Morphologically identical with the Gonococcus; but more adherent, forming small masses. *aër.*, *nliqf.*, *npg.* **Diplococcus citreus conglomeratus**, Bumm. Obtained from the air, in dust, and from gonorrheal pus. *aër.*, *facanaër.*, *liqf.*, *chg.* (lemon-yellow), *npg.* **Diplococcus citreus liquefaciens**, Unna and Tommasoli. Found on the skin in cases of eczema seborrhœicum. *aër.*, *liqf.*, *nmot.*, *chg.* (lemon-yellow), *npg.* **Diplococcus coryzæ**, Klebs and Hajek. Obtained from the nasal secretions in cases of acute nasal catarrh. *aër.*, *nliqf.*, *npg.* **Diplococcus der Pferdepneumonie.** See Diplococcus of pneumonia in horses, Schütz. **Diplococcus des Pemphigus acutus**, Demme. See Diplococcus of pemphigus acutus, Demme. **Diplococcus flavus liquefaciens tardus**, Unna and Tommasoli. Found on the skin in cases of eczema seborrhœicum. *aër.*, *facanaër.*, *liqf.*, *chg.* (chrome-yellow), *npg.* **Diplococcus fluorescens fœtidus**, Klamann. Obtained from the posterior nares. *aër.*, *facanaër.*, *liqf.*, *chg.* (grass-green to violet), *npg.* **Diplococcus intercellularis meningitidis**, Goldschmidt and Weichselbaum. Found within the cells of the exudates in cerebro-spinal meningitis. *aër.*, *nliqf.*, *pg.* **Diplococcus jaune blanc.** See *Micrococcus subflavus*, Bumm. **Diplococcus lacteus faviformis**, Bumm. Found frequently in the vaginal secretions. *aër.*, *nliqf.*, *npg.* **Diplococcus luteus**, Adametz. Found in water. *aër.*, *liqf.*, *mot.*, *chg.* (yellow), *npg.* **Diplococcus of Gonorrhea.** See *Micrococcus gonorrhœæ*, Neisser. **Diplococcus of Orchitis**, Hugouneng and Eraud. Syn., Orchiococcus. Frequently found in gonorrheal pus during the first few days. *aër.*, *nliqf.*, *pg.* The specific microbe of blennorrhagic epididymitis. **Diplococcus of Ozena**, Loewenberg. Found in the secretions in cases of ozena. **Diplococcus of Pemphigus, Diplococcus of Pemphigus Acutus**, Demme. Syn., Micrococcus of Demme. Diplococcus des Pemphigus acutus, Ger. Found in the bullæ of pemphigus. *aër.*, *nliqf.*, *pg.* Resembles the Gonococcus. **Diplococcus of Pneumonia in Horses**, Schütz. Syn., Diplococcus der Pferdepneumonie. Obtained from the lungs of a horse affected with acute pneumonia. *aër.*, *nliqf.*, *pg.* **Diplococcus pneumoniæ fibrinosæ**, Friedländer. See *Bacillus pneumonie friedländeri*. **Diplococcus pneumoniæ**, Weichselbaum. See *Bacillus septicus sputigenus*, Flügge. **Diplococcus pyogenes ureæ**, Rörsing. Syn., *Diplococcus ureæ*, Rörsing. *Coccobacillus pyogenes ureæ*, Rörsing. *Coccobacterium ureæ*, Rörsing. Found in purulent urine. Cf. *Diplococcus ureæ trifoliatus*, Rörsing. *Micrococcus pyogenes ureæ flavus*, Rörsing. **Diplococcus roseus**, Bumm. Found in the air. *aër.*, *facanaër.*, *liqf.*, *chg.* (pink), *npg.* **Diplococcus ureæ**, Rörsing. See *Diplococcus pyogenes ureæ*, Rörsing. **Diplococcus ureæ trifoliatus**, Rörsing. Found in purulent urine. Cf. *Diplococcus pyogenes ureæ*, Rörsing. *Micrococcus pyogenes ureæ flavus*, Rörsing. **Dispora caucasica**, Kern. See *Bacillus caucasicus*, Kern. **Drumstick Bacillus.** See *Bacillus putrificus coli*, Bienstock. **Einheimischer Leuchtbacillus.** See *Bacillus phosphorescens indigenus*, Fisher. **Eisbacillen.** Bacilli of ice. **Eiterbacillen, Eiterkokken, Eitermikroben.** Microbes of pus. **Eiterkettenkokkus.** See *Micrococcus pyogenes*, Rosenbach. **Emmerich's Bacillus, Emmerich's Neapler Bacillus.** See *Bacillus neapolitanus*. **Endosporous bacteria.** Syn., *Bactéries endospores*, Fr. Endosporen-Bacterien, Ger. Bacteria that produce by endogenous spore formation. **Epsilon Bacillus**, Miller. See Spirillum finkleri. **Erdbacillus.** See *Bacillus myocoides*, Flügge. **Erdebacillen, Erdebacterien.** Microbes of the soil. **Erythroconus litoralis**, Œrstedt. See *Sarcina litoralis*, Œrstedt. **Essigferment, Essigpilz.** See *Bacillus aceti*, Kützing. **Fæcesbacillen**, Ger. Bacilli of the feces. **Fäulnisbacillen**, Ger. See *Bacillus saprogenes*, I, II, III, Rosengarten. **Fäulnisbacterium**, Ger. See *Bacterium termo*. Dujardin and Davaine. **Fäulnisbacterien.** Bacteria of putrefaction. **Feet-sweat Bacillus.** See *Bacillus fœtidus*. *Bacillus saprogenes*, II, and *Bacterium graveolens*. **Ferment de la fermentation butyrique**, Fr. See *Bacillus butyricus*, Prazmowski. **Fettbacillus**, Ger. See *Bacillus butyricus* Prazmowski. **Finkler-Prior's Bacillus.**

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

See Spirillum Finkler-Prior. **Fiore del vino e della birra,** Ital. See *Saccharomyces mycoderma*, Reess. **Fitz'scher Aethylbacillus,** Ger. Bacilli of the feces. **Krankheiterregende Bacillen** (or **Bacterien**). Pathogenic bacilli. **Lanceolate Coccus, Lancet-shaped Micrococcus,** Talamon. See *Bacillus septicus sputigenus*, Flügge. **Leprabacillus.** See *Bacillus lepræ*, Hansen. **Leptonema niveum.** See *Beggiatoa nivea*, Rabenhorst. **Leptothrix buccalis,** Robin. Pilz der Zahncaries, Ger. Syn. *Leptothrix gigantea*, Miller. *Leptothrix pulmonalis*, *Rasmussenia buccalis*, Saccardo. Found in the mouth of man and animals. Falsely considered the cause of dental caries. **Leptothrix buccalis of Vignal.** See *Bacillus buccalis* (*a*), Vignal. **Leptothrix epidermidis.** Syn., *Bacillus epidermidis*, Bizzozero. *Microsporon minutissimum*, Burchart. Found on the epidermis between the toes, and held by Bizzozero to be non-pathogenic, but by Boeck as the cause of erythrasma. **Leptothrix der Thränenröhrchen.** See *Cladothrix fœrsteri*, Cohn. **Leptothrix gigantea,** Miller. Found on the teeth of dogs, sheep, cattle and other animals affected with *Pyorrhœa alveolaris*. Some consider it identical with *Leptothrix buccalis*, Robin. **Leptothrix hyalina,** Reinsch. Found on marine algæ. **Leptothrix innominata,** Miller. See, *Leptothrix buccalis*, Robin. **Leptothrix kühniana.** See *Crenothrix kühniana* Saccardo. **Leptothrix lacrimalis.** Syn. Leptothrix der Thränenröhrchen. See *Cladothrix fœrsteri*, Cohn. **Leptothrix lanugo,** Kützing. Found on marine algæ near Heligoland. **Leptothrix maxima buccalis,** Miller. See *Bacillus buccalis maximus*, Miller. **Leptothrix muralis,** Kützing. See *Leptothrix parasitica*. **Leptothrix natans.** See *Sphærotilus natans*, Saccardo. **Leptothrix ochracea,** Kützing. Syn. *Detionella ochracea*, Saccardo. *Cladothrix dichotoma*, Zopf. According to Zopf, this represents filaments of Cladothrix stained with oxid of iron. **Leptothrix of Puerperal Fever, Leptothrix puerperalis,** Fettz. See *Bacillus puerperalis*, Engel and Spillman. **Leptothrix parasitica,** Kützing. Parasitic on fresh

water algæ. This and *Leptothrix muralis* are genetically connected with *Drilosiphon julianus*, Kützing, the ordinary hormogones of which produce filaments known as *Nostoc parietinum*, Rabenhorst; the cells of these Nostoc filaments eventually separate and produce slender filaments constituting *Leptothrix parasitica* and *muralis*, Kützing (Bennet and Murray). **Leptothrix pulmonalis.** See *Leptothrix buccalis*, Robin. **Leptothrix pusilla,** Rabenhorst. Found on fresh water algæ, also in the mouth, Klebs. **Leptothrix symplacoides,** Dickie. Found on marine algæ. **Leptothrix vaginalis.** Found in the vagina of animals and women. **Leptothrix variabilis,** Saccardo. Found in saliva of healthy persons. **Leuconostoc mesenteroides,** Van Tieghem. Syn., *Ascococcus mesenteroides*, Cienkowski. Gomme de Sucrerie, Fr. Froschlaich, Froschlaichpilz, Pilz der Dexträngährung, Ger. Frog spawn bacterium of sugar factories, Frog spawn fungus. A source of great loss to the manufacturers of beet sugar, frequently and rapidly converting large quantities of the beet juice into a mucilagino-gelatinous mass. **Liborius's Bacillus of Butyric Acid Fermentation,** Liborius. Buttersäurebildender Bacillus, Ger. See *Bacillus butyricus*, Prazmowski. **Lissophyton suspectum,** Hallier. See *Bacillus lyssæ*, Pasteur. **Luësbacillus.** See *Bacillus syphilides*, Lustgarten. **Luftbacillen.** Syn., Bacilli of the air. Bacilles de l'air. **Luftbacterien.** Bacteria of the air. **Lungenseuchemicrococcus.** See Micrococcus of bovine pneumonia, Poels and Nolen. **Lupusbacillen.** Bacilli of lupus, identical with *Bacillus tuberculosis*, Koch. **Mäuseseptikämieähnlicher Bacillus,** Eisenberg. See *Bacillus coprogenes parvus.* **Melunella flexuosa,** Borg. See *Spirillum rugula*, Müller. **Merismopedia chondroidea,** With, **Merismopedia glauca.** See *Sarcina renis*, Hepworth. **Merismopedia goodsirii.** See *Sarcina ventriculi*, Goodsir. **Merismopedia hyalina,** Kützing. *Sarcina hyalina*, Kützing. **Merismopedia litoralis,** Rabenhorst. See *Sarcina litoralis*, Œrstedt. **Merismopedia reitenbachii,** Caspary. See *Sarcina reitenbachii*, Caspary. **Merismopedia urinæ,** Rabenhorst. See *Sarcina urinæ*, Welcker. **Merismopedia ventriculi,** Husem. See *Sarcina ventriculi*, Goodsir. **Merismopedia violacea,** Kützing. See *Sarcina violacea*, Kützing. **Meerschweinchenbacillus,** Ger. See *Bacillus cavicidus*, Brieger. **Metallacter anthracis,** Trevisan. See *Bacillus anthracis*, Pollender and Davaine. **Metallacter tremulus,** Trevisan. See *Bacillus tremulus*, Koch. **Metallacter ulna,** Trevisan. See *Bacillus ulna*, Cohn. **Micoderma cerevisiæ,** Trecul. See *Saccharomyces mycoderma*, Reess. **Microbe de l'hémoglobinurie du bœuf,** Zimmerman. See *Hæmatococcus bovis*, Babes. **Microbe de l'araignée.** See *Micrococcus mastobius*, Nocard and Mollereau. **Microbe de la bouton d'Alep, Microbe de la bouton de Nil, Microbe de la bouton d'Orient, Microbe de la clou de Biskra, Microbe de la clou de Gafsa** (Poncet). See Micrococcus of Heydenreich. **Microbe de la clavelée.** See Bacterium of Sheep-pox. **Microbe de la dysenterie epidèmique,** Chantemesse and Widal. See *Bacillus dysenteriæ*, C. & W. **Microbe de la fièvre jaune,** Freire, Rebougeon and Carmona y Valle. Syn., *Micrococcus* (*Cryptococcus*) *xanthogenicus* Freire, Micrococcus of Freire. Obtained from the blood of yellow fever patients; attenuated by heat, and used by permission of the Emperor of Brazil (Nov., 1882) to inoculate several hundred persons. The organism described Carmona y Valle, appears to be a fungus not related to the bacteria. Cf. Bacillus of yellow fever, Babes. **Microbe de la fièvre typhoide,** Tayon. See *Bacillus typhi abdominalis*, Eberth. **Microbe de la flacherie, Microbe de la maladie des morts-plats.** See *Micrococcus bombycis*, Cohn. Microbe de l'hémoglobinurie du boeuf, Zimmermann. See *Hæmatococcus bovis.* **Microbe de la pébrine.** Syn., *Bacterium ovatum*, Lebert; *Bacillus pasteurianus*, Hansen; *Micrococcus ovatus; Micrococcus pasteurianus; Nosema bombycis*, Nägeli; *Panhystophyton ovatum;* Lebert; Micrococcus of pebrine; Cornelian corpuscles; Cornelian bodies; Micrococcus der Fleckenkrankheit, Ger.; Corpuscles du ver a soie, Fr. The specific microbe of a disease of silkworms known for hundreds of years, called *pebrine, gattine, petechia, maladie des corpuscles*, and spotted disease. It was particularly destructive between 1850 and 1875. According to the investigations of Cornalia, Leydig, Balbiani, Pasteur, and Metschnikoff, these bodies belong to the *Psorospermiæ* and are not bacteria at all. **Microbe del mal nero,** Ital. See *Bacterium gummis*, Comes; or *Bacterium putredinis*, Davaine. **Microbe des gasigen Gangräns,** Ger. See *Bacillus œdematis maligni*, Koch. **Microbe des pus blennorrhagique,** Weiss, Fr. See *Micrococcus gonorrhœæ*, Neisser. **Microbe der Schweinspocken,** Ger. See *Bacillus ex pneumo-enteritide suis*, Klein. **Microbe di morbillo,** Lanzi, Ital. **Microbe du cholera des poules,** Fr., Pasteur. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Microbe du lait bleu,** Fr. See *Bacillus cyanogenus*, Fuchs. **Microbe du pus bleu,** Fr. See *Bacillus pyocyaneus*, Gessard. **Microbe of Friedländer.** See *Bacillus pneumoniæ friedländerii.* **Microbe of Pasteur.** Microbe septicémique du salive, Fr. See *Bacillus sputigenus septicus*, Flügge. **Micrococci della rabbia,** Ital. See *Micrococcus lyssæ*, and *Bacillus lyssæ*, Pasteur. **Micrococco dell afta epizoötica,** Ital. See Streptocytus of eczema epizoötica, Schottelius. **Micrococcus aceti.** See *Bacillus aceti*, Kützing. **Micrococcus acidi lactici,** Marpman. Found in milk; resembles in its action *Bacillus acidi lactici*, Hueppe. *aër., nliqf., nmot., npg.* Cf. *Sphærococcus acidi lactici*, Marpman. **Micrococcus acidi lactici liquefaciens,** Krüger. Found in butter and cheese. *aër., facanaër., liqf., nmot.* **Micrococcus aërogenes,** Miller. Found in the intestinal tract of man. *aër., liqf., nmot., npg.* **Micrococcus agilis,** Ali-Cohen. Found in drinking water. *aër., liqf., mot., npg.* A motile coccus, provided with a flagellum; described by Menge. **Micrococcus agilis citreus,** Menge. **Micrococcus** (**Diplococcus**) **albicans amplus,** Bumm. Syn., *Neisseria albicans.* Frequently found in the vaginal secretions. *aër., liqf., npg.* **Micrococcus** (**diplococcus**) **albicans tardus,** Unna and Tommasoli. Found in eczema. *aër., nliqf., nmot.* **Micrococcus albicans tardissimus,** Eisenberg, Bumm. Found in the vaginal secretions of puerperal women. *aër., facanaër., nliqf., npg.* **Micrococcus liquefaciens,** Von Besser. Found in the nasal secretions of healthy persons. *aër., facanaër., liqf., npg.* **Micrococcus albus urinæ.** See *Micrococcus urinalbus.* **Micrococcus amylovorus,** Burrill and Arthur. Syn., Micrococcus of apple blight. Bacterium of pear blight. Produces fermentation in saccharine fluids. *aër., nliqf., mot., pg.* (for apple and pear trees). Cf. *Bacillus, butyricus*, Prazmowski. **Micrococcus aquatilis,** Bolton. Found frequently in water. *aër., nliqf., npg.* **Micrococcus aquatilis**

invisibilis, Vaughan. Found in water. *aër.*, *nliqf.*, *npg.* **Micrococcus arei celsii**, Buchner and Sehlen. Syn., *Bacterium decalvans*, Thin. Found on the diseased hairs in *Alopecia areata*. Cf. *Bacillus of alopecia areata*, Kasauli, and *Micrococcus of alopecia areata*, Robinson. **Micrococcus ascoformans**, Johne. See *Micrococcus botryogenus*, Rabe. **Micrococcus aurantiacus**, Cohn. Syn., *Pediococcus aurantiacus*. Found in water. *aër.*, *nliqf.*, *chg.* (orange-yellow), *npg.* **Micrococcus bei hepatitis enzoötica porcellorum.** See *Micrococcus porcellorum*. **Micrococcus biskræ.** See Micrococcus of Heydenreich. **Micrococcus blennorrhœus.** See *Micrococcus gonorrhœæ*, Neisser. **Micrococcus bombycis**, Cohn, Bechamp. Syn., *Streptococcus bombycis*, Bechamp. Micrococcus de la maladie des morts plat, Fr. Microbe de la flacherie, Fr. Micrococcus der Schlafsucht der Seidenraupen, Ger. Found in the intestinal tract of silkworms and other Lepidoptera dead of the epidemic disease known in France as *la flacherie;* etiologic relation demonstrated by Pasteur. **Micrococcus botryogenes**, Bollinger, Rabe. Syn., *Bollingera equi*, Saccardo; *Ascococcus johnei*, Cohn; *Micrococcus ascoformans*, Johne; Micrococcus of myko-desmoids of the horse. Found in colonies in the connective tissue of horses affected with "myko-desmoids." *aër.*, *liqf.*, *pg.* **Micrococcus candicans**, Flügge. Found abundantly in air and water. *aër.*, *nliqf.*, *npg.* **Micrococcus candidus**, Cohn. Found in water. *aër.*, *nliqf.*, *npg.* **Micrococcus capillorum.** Found on the scalp and said to alter the color of the hair. *aër.*, *chg.* (reddish-yellow). **Micrococcus carneus**, Zimmermann. Found in water. *aër.*, *nliqf.*, *chg.* (red to violet), *npg.* **Micrococcus cerasinus siccus**, List. *aër.*, *nliqf.*, *chg.* (cherry red), *npg.* **Micrococcus cereus albus**, Passet. Syn., *Staphylococcus cereus albus*, Passet. Found in the pus of acute abscesses, and by Tils, in hydrant water (Freiburg). *aër.*, *nliqf.*, *npg.* **Micrococcus cereus aureus**, Schröter and Winkler. Syn., *Staphylococcus cereus aureus*, S. and W. Found in the thin secretions of coryza. *aër.*, *nliqf.*, *chg.* (orange-red), *npg.* **Micrococcus cereus flavus**, Passet. Syn., *Staphylococcus cereus flavus*, Passet. *Staphylococcus passetii.* Found in an acute abscess. *aër.*, *nliqf.*, *chg.* (lemon-yellow), *npg.* **Micrococcus chlorinus.** Occurs in zooglœa masses. *aër.*, *chg.* (greenish-yellow), *npg.* **Micrococcus choleræ gallinarum**, Pasteur. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Micrococcus cinnabareus**, Flügge. Syn., *Streptococcus cinnabareus*, Flügge. Found in air and water. *aër.*, *nliqf.*, *chg.* (reddish-brown), *npg.* **Micrococcus citreus**, List. Syn., *Staphylococcus citreus*, List. Micrococcus couleur crème, Fr. Crèmefarbiger Micrococcus, Ger. Found in water, also by Lannelongue and Achard in the seat of an old osteomyelitis. *aër.*, *nliqf.*, *chg.* (pale-yellow), *npg.* **Micrococcus citreus conglomeratus**, Bumm. See *Diplococcus citreus conglomeratus*, Bumm; **Micrococcus concentricus**, Zimmermann. Found in water. *aër.*, *nliqf.*, *sap.*, *npg.* **Micrococcus conglomeratus**, Weichselbaum. Syn., *Neissera conglomerata*, W. **Micrococcus coronatus**, Flügge. Syn., *Streptococcus coronatus*, Flügge. Found in the air. *aër.*, *liqf.*, *npg.* **Micrococcus couleur crème**, List. See *Micrococcus citreus*, List. **Micrococcus cremoides**, Zimmermann. Found in water. *aër.*, *liqf.*, *chg.* (yellowish-white), *npg.* **Micrococcus crepusculum**, Cohn. See *Bacillus termo*, Ehrenberg and Dujardin. **Micrococcus cumulatus tenuis**, Von Besser. Found in abundance in the nasal mucus of man. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Micrococcus cyaneus**, Schröter. Obtained from the air, on boiled potatoes. *aër.*, *chg.* (cobalt blue, altered to carmine by acids, restored by alkalies). **Micrococcus decalvans**, Schröter. Syn., *Bacterium decalvans*, Saccardo. Cf. Bacillus of Alopecia areata, Kasauli, *Micrococcus arei celsii*, Buchner and Sehlen; Micrococcus of Alopecia areata, Robinson. **Micrococcus de la mammite gangréneuse de la brebis, Micrococcus de la mammite contagieuse de la vache**, Fr. See *Micrococcus mastobius*, Nocard and Mollereau. **Micrococcus de la nécrose progressive du tissue connective de la souris**, Fr. See Micrococcus of progressive tissue necrosis of mice, Koch. **Micrococcus de la pyémie du lapin**, Fr. See Micrococcus of pyemia in rabbits, Koch. **Micrococcus de le rage**, Fr. See *Micrococcus lyssæ*, Neisser. **Micrococcus de la septicémie consecutive du charbon**, Charrin. Found in the blood and tissues of a rabbit inoculated with blood from another rabbit dead of anthrax. *aër.*, *mot.*, *pg.* **Micrococcus de la septicémie du lapin**, Fr. See Micrococcus of septicemia of rabbits, Koch. **Micrococcus de la suppuration progressive du lapin**, Fr. See Micrococcus of progressive abscess-formation in rabbits. **Micrococcus der Mastitis der Kühe**, Ger. See *Micrococcus mastobius*, Nocard and Mollereau. **Micrococcus der Maul- und Klauenseuche.** See Streptocytus of eczema epizoötica, Schottelius. **Micrococcus des mort plats**, Fr. See *Micrococcus bombycis*, Cohn. **Micrococcus der Osteomyelitis**, Becker. See *Staphylococcus pyogenes aureus*, Ogston, Becker. **Micrococcus der Fleckenkrankheit**, Ger. See Microbe de la pébrine, Pasteur. **Micrococcus des Pende'schen Geschwürs.** See Micrococcus of Heydenreich. **Micrococcus desidens**, Flügge. See *Micrococcus flavus desidens*, Flügge. **Micrococcus des roten Schweisses.** See *Micrococcus hæmatodes*, Babes. **Micrococcus diffluens**, Schröter. Found in the air, dust, and in excrement; common. *aër.*, *nliqf.*, *chg.* (yellow, with a greenish fluorescence; not modified by acids). Resembles *Bacillus fluorescens putidus*, Flügge. **Micrococcus diphtheriticus**, Oertel, Cohn, Löffler. Syn., *Streptococcus articulorum*, Löffler. Micrococcus en chaines, Fr. Kettenbildender Bacillus, Ger., Löffler. Found in the false membranes, and in the tissues of diphtheria patients; Cornil identifies this with *Micrococcus pyogenes*, Rosenbach. *aër.*, *nliqf.*, *pg.* **Micrococcus doyenii.** See *Micrococcus urinæ albus olearius*, Doyen. **Micrococcus en chaines**, Löffler. See *Micrococcus diphtheriticus*, Oertel, Cohn. **Micrococcus endocarditicus.** Syn., *Streptococcus endocarditicus.* **Micrococcus endocarditidis rugatus**, Weichselbaum. Found in a case of ulcerative endocarditis. *aër.*, *nliqf.*, *pg.* **Micrococcus erysipelatis, Micrococcus erysipelatos, Micrococcus erysipelatosus**, Fehleisen. See *Micrococcus pyogenes*, Rosenbach. **Micrococcus fermenti.** See *Micrococcus viniperda.* **Micrococcus fervidosus**, Adametz. Found in water. *aër.*, *nliqf.*, *ngp.* **Micrococcusfickii.** Found in healthy and diseased eyes. **Micrococcus finlayensis**, Sternberg. Obtained from the viscera of a yellow-fever cadaver. *aër.*, *liqf.*, *chg.* (pale-yellow), *npg.* **Micrococcus flavus.** See *Micrococcus flavus liquefaciens*, Flügge. **Micrococcus flavus desidens**, Flügge. Found in air and water. *aër.*, *liqf.*, *chg.* (yellowish-brown), *npg.* **Micrococcus flavus liquefaciens**, Flügge. Syn., *Micrococcus flavus*, *Micrococ-*

cus liquefaciens. Found in air and water. *aër., liqf., chg.* (yellow), *npg.* **Micrococcus flavus tardigradus,** Flügge. Syn., *Micrococcus tardigradus.* Found in the air and water. *aër., nliqf., chg.* (dark olive-green), *npg.* **Micrococcus fœtidus,** Klamann, Rosenbach. Found in the posterior nares of man. *aër., liqf., npg.* **Micrococcus fervidosus,** Adametz. Found in water. *aër., nliqf., npg.* **Micrococcus freudenreichii,** Guillebeau. One of the two forms found by Guillebeau to produce ropiness in milk. *aër., liqf., npg.* Cf. *Bacterium hessii,* Guillebeau. **Micrococcus friedländerii.** See *Bacillus pneumoniæ friedländerii.* **Micrococcus fulvus,** Cohn. Syn., *Staphylococcus fulvus.* Found in horse and rabbit dung. *aër., nmot., nliqf., chg.* (rose), *npg.* **Micrococcus fuscus,** Maschek. Found in water. *aër., nmot., liqf., chg.* (sepia-brown), *npg.* **Micrococcus gallicidus.** See *Bacillus septicæmiæ hæmorrhagicæ,* Sternberg. **Micrococcus gelatinosus.** Found in milk, which it causes to coagulate at about 22° C. **Micrococcus gingivæ pyogenes,** Miller. Found in the mouth of a man affected with alveolar abscess. *aër., facanaër., nliqf., pg.* **Micrococcus gonorrhœæ,** Neisser. *Micrococcus blennorrhœus, Neissera gonorrhœæ, Micrococcus gonococcus,* Microbe du pus blennorrhagique, Weiss, Fr. Trippercoccus, Gonorrhoëcoccus, Ger. Found in gonorrheal pus. *aër.* No growth on gelatin; an obligate parasite. *pg.* **Micrococcus griseus,** Winter. See *Bacterium griseum,* Warming. **Micrococcus hæmatodes,** Babes. Syn., Micrococcus of red sweat. Micrococque de la sueur rouge, Fr. Micrococcus des roten Schweisses, Ger. Found in foul sweat from the axilla, *aër., chg.* (red), *npg.* **Micrococcus havaniensis,** Sternberg. Syn., *Bacillus havaniensis,* Sternberg. Obtained by Sternberg in his investigation of yellow fever. *aër., nliqf., chg.* (blood-red). Only found in the presence of free oxygen. **Micrococcus imetrophus,** Trevisan. See *Bacillus prodigiosus,* Ehrenberg. **Micrococcus indicus,** Koch. See *Bacillus indicus,* Koch. **Micrococcus influenzæ,** Letzerich. Syn., *Streptococcus seiferti,* Micrococcus of influenza, Seifert. See Bacillus of influenza, Pfeiffer. **Micrococcus insectorum,** Burrill, *Streptococcus insectorum.* Found in the cecal appendages or pancreatic organs in the Chinch bug (*Blissus leucopterus,* Say) and the higher Hemiptera. Especially recommended as a remedy for the Chinch bug and for *Halticus minutus,* so damaging to the peanut. **Micrococcus intercellularis meningitidis,** Neumann and Schäffer. Syn., *Micrococcus meningitidis,* Neumann. *Neisseria Weichselbaumii.* Found in the tissues of the brain and spinal cord in cases of cerebro-spinal meningitis. **Micrococcus lacteus faviformis,** Bumm. Syn., *Neisseria lactea.* Frequently found in normal vaginal mucus. *aër., nliqf., npg.* **Micrococcus lactis viscosus,** Conn. Syn., Micrococcus of bitter milk, Conn. The cause of the bitter taste of milk and cream. *aër., liqf., nmot., npg.* **Micrococcus liquefaciens.** See *Micrococcus flavus liquefaciens,* Flügge. **Micrococcus lœwenbergii.** Syn., Micrococcus of ozena, Micrococque de l'ozène, Fr. Found in the secretions, in cases of ozena. *aër., liqf., pg.* **Micrococcus luteus,** Cohn. Found in water, the superficial soil, dust of bed-rooms, moist foods, etc. *aër., nliqf., chg.* (yellow), *npg.* **Micrococcus lyssæ,** Neisser. Syn., *Neisseria lyssæ,* Micrococcus of hydrophobia, Micrococcus of rabies, Fol. Micrococcus de la rage, Fr. Found in the spinal cord of rabid animals. Cornil and Babes throw doubt on the culture experiments of Fol. **Micrococcus major,** Doyen. See *Micrococcus urinæ major,* Doyen. **Micrococcus manfredii.** Syn., *Streptococcus manfredii.* Micrococcus of progressive granuloma formation. Found in the sputum of two cases of pneumonia following measles; *aër., nliqf., pg.* **Micrococcus mastobius,** Nocard, Mollereau and Kitt. Syn., *Streptococcus nocardi.* Micrococcus of bovine mastitis, Kitt. Micrococcus of mastitis in cows. Streptococcus of mastitis in cows. Micrococcus of contagious mammitis. Micrococcus of gangrenous mastitis in sheep, Nocard. Microbe de la mal de pis, Microbe de l'araignée, Micrococcus de la mammite contagieuse de la vache, Nocard and Mollereau, Fr. Micrococcus der Mastitis der Kühe, Ger. Obtained from the milk of cows and sheep affected with mastitis. *aër., facanaër.* The form found in cattle is said to be non-liquefactive; that of sheep liquefies both gelatin and blood serum. Sternberg recognizes three distinct forms producing mastitis. **Micrococcus meningitidis,** Neumann. See *Micrococcus intercellularis meningitidis,* Neumann and Schäffer. **Micrococcus meningitidis purulentæ,** Heydenreich. **Micrococcus morbillosus.** Syn., *Streptococcus morbillosus.* **Micrococcus nasalis,** Hack. Found in the cavum pharyngonasale. *aër., mot., nliqf., npg.* **Micrococcus nitrificans,** Van Tieghem. Syn., Micrococque de la fermentation de l'ammoniaque. Found in water. *aër., npg.* Micrococcus, II, of Fischel. Found in the blood of two cases of influenza. *aër., facanaër., liqf., pg.* **Micrococcus oblongus.** See *Bacterium oblongum,* Boutroux. **Micrococcus ochroleucus,** Prove and Legrain. Syn., *Streptococcus ochroleucus.* Found in urine. *aër., nliqf., chg.* (sulphur yellow), *npg.* **Micrococcus of Acute Infectious Osteomyelitis.** See *Micrococcus pyogenes aureus,* Rosenbach. **Micrococcus of Alopecia areata,** Von Sehlen, Robinson, Vaillard and Vincent. Found on the hairs from the diseased patches. *aër., liqf., pg.* Cf. Bacillus of Alopecia areata, and *Micrococcus decalvans.* Schröter. **Micrococcus of Ammoniacal Urine.** See *Micrococcus ureæ,* Cohn, and *Micrococcus ureæ liquefaciens,* Flügge. **Micrococcus of Apple Blight.** See *Bacillus butyricus,* Botkin, Prazmowski, etc. **Micrococcus of Beri-beri,** Lacerda. See *Bacillus beribericus,* Lacerda. **Micrococcus of Biskra Button.** See Micrococcus of Heydenreich. **Micrococcus of Bitter Milk.** See *Micrococcus lactis viscosus,* Conn. **Micrococcus of Bronchitis,** Picchini. Three distinct forms. *aër., nliqf.* Cf. Bacillus of Lumnitzer. **Micrococcus of Bovine Mastitis,** Kitt. See *Micrococcus mastobius,* Nocard, Mollereau and Kitt. **Micrococcus of Bovine Pneumonia,** Poels and Nolen. Syn., Lungenseuchemicrococcus, Micrococcus of cattle pneumonia. Found in the lungs of cattle suffering from infectious pleuro-pneumonia. *aër., nliqf., pg.* **Micrococcus of Cerebro-spinal Meningitis.** See *Micrococcus Intercellularis Meningitidis.* Neumann and Schäffer. **Micrococcus of Chicken Pox.** See *Staphylococcus viridis flavescens,* Guttmann. **Micrococcus of Contagious Mammitis.** See *Micrococcus mastobius,* Nocard, Mollereau, and Kitt. **Micrococcus of Cow Pox.** See *Micrococcus variolæ et vaccinæ,* Cohn. **Micrococcus of Dantec.** Obtained from salted codfish which had turned red. *aër., nliqf., chg.* (yellow, changing to deep red), *npg.* **Micrococcus of Demme.** See Diplococ-

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

cus of pemphigus acutus, Demme. **Micrococcus of Dental Caries.** See *Leptothrix vulgaris*, Robin; *Leptothrix gigantea*, Miller; Miller's Epsilon Bacillus, and *Spirillum dentium*, Arnt. **Micrococcus of Dengue,** McLaughlin. See *Scheutzia laughlini.* **Micrococcus of Diphtheria.** *Streptococcus articulorum*, Löffler. **Micrococcus of Disse and Taguchi.** Syn., Tokiobacillen. Obtained from the blood, the secretions of broad condyloma, as well as the primary indurations of syphilitics. Etiologic relations not confirmed. **Micrococcus of Drinking Water.** See *Micrococcus aquatilis*, Bolton. **Micrococcus of Egyptian Ophthalmia.** See Micrococcus of Trachoma, Sattler and Michel. **Micrococcus of Endocarditis.** See *Streptococcus endocarditicus* and *Micrococcus endocarditicus rugatus*, Weichselbaum. **Micrococcus of Erysipelas,** Fehleisen. See *Micrococcus pyogenes*, Rosenbach. **Micrococcus of Foot and Mouth Disease.** Syn., Streptocytus of eczema epizoötica, Schottelius, *Streptocytus apthicola*, Hallier. Micrococcus der Maul- und Klauenseuche, Ger. Micrococco dell afta epizootica, Ital. Found in the vesicular eruptions about the mouth and feet of cattle, pigs, and sheep. Communicable to man. *aër.*, *facanaër.* Pathogenesis not fully settled. Cf. Bacillus of ulcerative stomatitis of cattle. **Micrococcus of Forbes.** Found in the bodies of larvæ of the cabbage butterfly, *Pieris rapæ*, affected with an infectious disease. **Micrococcus of Fowl Cholera.** See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Micrococcus of Freire.** See *Microbe de la fièvre jaune*, Domingo Freire. **Micrococcus of Furuncle,** Pasteur. See *Bacillus osteomyelitidis*, Becker and Kraske. **Micrococcus of Gangrenous Mastitis in Sheep, Micrococcus of Gangrenous Mammitis.** See *Micrococcus mastobius.* Nocard, Mollereau and Kitt. **Micrococcus of Gonorrhea.** See *Micrococcus gonorrhœæ*, Neisser. **Micrococcus of Gray Parrot Disease.** See *Micrococcus psittaci*, Eberth und Wolff. **Micrococcus of Heydenreich.** Syn., *Streptococcus biskræ.* Micrococcus of Biskra Button. Clou de Biskra, Duclaux. Microbe de la bouton de Nil, Chantemesse, Microbe de la clou de Gafsa. Microbe de la bouton d'Alep, Poucet. Microbe de la bouton d'Orient, Fr. Micrococcus of Biskra button, Fr. Pendjehgeschwür, Ger. Found in the tumors and ulcers characteristic of Aleppo boil or Biskra button. *aër.*, *liqf.*, *pg.* **Micrococcus of Hydrophobia.** See *Micrococcus lyssæ*, Pasteur. **Micrococcus of Infectious Osteomyelitis.** See **Micrococcus pyogenes aureus,** Rosenbach, and *Micrococcus osteomyelitidis*, Becker and Kraske. **Micrococcus of Influenza,** Seifert, *Streptococcus seiferti.* See *Micrococcus influenzæ*, Letzerich. **Micrococcus of Kirchner.** Obtained from the sputum of patients suffering with influenza. *aër.*, *pg.* **Micrococcus of Manfredi.** See *Micrococcus manfredii.* **Micrococcus of Mastitis,** Kitt. See *Micrococcus mastobius*, Nocard and Mollereau. **Micrococcus of Measles,** Klebs and Keating. Syn. *Streptococcus morbillosus*, *Micrococcus morbillosus.* Found in the blood and exudates of persons afflicted with measles. Flügge considers them unimportant. **Micrococcus of Myko-desmoids of the Horse.** See *Micrococcus botryogenes*, Rabe. **Micrococcus of Osteomyelitis.** See *Micrococcus pyogenes aureus*, Ogston. **Micrococcus of Ozena.** See *Micrococcus lœwenbergii.* **Micrococcus of Pear Blight,** Burrill. See *Bacillus butyricus*, Prazmowski. **Micrococcus of Pebrine.** See Microbe de la pébrine, Pasteur. **Micrococcus of Pneumonia.** See *Bacillus pneumoniæ friedländerii* and *Micrococcus septicus*, Flügge. **Micrococcus of Progressive Abscess Formation in Rabbits,** Koch. Syn., Micrococcus de la suppuration progressive du lapin. Fr. Found in the exudates of rabbits inoculated with putrefying blood. *pg.* **Micrococcus of Progressive Granuloma Formation.** See *Micrococcus manfredii.* **Micrococcus of Progressive Tissue Necrosis in Mice,** Koch. Syn., Micrococcus de la nécrose progressive du tissue connective de la souris. Found in the exudates of mice inoculated with putrid blood. *pg.* **Micrococcus of Pyemia in Rabbits,** Koch. Found in the exudates of rabbits inoculated with putrefying flesh infusion. *pg.* **Micrococcus of Rabies,** Fol. See *Micrococcus lyssæ*, Neisser. **Micrococcus of Red Sweat.** See *Micrococcus hæmatodes*, Babes. **Micrococcus of S. Le M. Moore.** See *Bacillus fœtidus*, Liborius. **Micrococcus of Salvioli.** See *Bacillus septicus sputigenus*, Flügge. **Micrococcus of Scarlet Fever,** Pohl and Pincus. See *Micrococcus scarlatinæ.* **Micrococcus of Septicemia in Rabbits,** Koch. Syn., *Streptococcus Kochii.* Micrococcus de la septicémie du lapin. Fr. Found in the exudates of rabbits inoculated with putrefying flesh-infusion. *pg.* **Micrococcus of Smallpox.** See *Micrococcus variolæ et vaccinæ*, Cohn. **Micrococcus of Sputum Septicemia.** See *Bacillus septicus sputigenus*, Flügge. **Micrococcus of Swine Plague or Hog Cholera.** See Bacillus of swine plague, Marseilles, Rietsch and Jobert, and *Bacillus ex pneumo-enteritide suis*, Klein. **Micrococcus of Syphilis,** Haberkorn and Marcus. Found in the white blood corpuscles in cases of syphilis. *aër.*, *osc.*, *chg.* (red). **Micrococcus of Trachoma,** Sattler and Michel. Syn., *Neisseria rebellis.* Trachomcoccus, Ger. Micrococcus of Egyptian ophthalmia. Found in the secretions and nodules of the conjunctiva in cases of trachoma. *aër.*, *nliqf.*, *pg.* Researches of Baumgarten and Kartulis go to show that this form has no etiologic relation to the diseases mentioned. **Micrococcus of Vaccinia.** See Micrococcus variolæ et vaccinæ, Cohn. **Micrococcus of whooping cough,** Letzerich. Found in the sputum in cases of whooping cough. See *Bacillus tussis convulsivæ*, Afanassiew. **Micrococcus olearius.** See *Micrococcus urinæ flavus olearius.* **Micrococcus osteomyelitidis,** Becker. Syn., Micrococcus of acute infectious osteomyelitis. See *Micrococcus pyogenes aureus*, Rosenbach. **Micrococcus ovalis,** Escherich. Found in the meconium and feces of infants. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Micrococcus ovatus.** See *Microbe de la pébrine*, Pasteur. **Micrococcus pasteuri,** Sternberg. See *Bacillus septicus sputigenus*, Flügge. **Micrococcus petechialis.** Syn., *Neisseria petechialis.* **Micrococcus pflügeri,** Ludwig. See *Photobacterium pflügeri*, Ludwig. **Micrococcus phosphoreus,** Cohn. See *Bacillus phosphoreus*, Cohn. **Micrococcus plumosus,** Bräutigam. Found in water. *aër.*, *nliqf.*, *npg.* **Micrococcus pneumoniæ crouposæ,** Sternberg. See *Bacillus septicus sputigenus*, Flügge. **Micrococcus pneumoniæ infectiosæ,** Friedländer. See *Bacillus pneumoniæ friedländerii.* **Micrococcus porcellorum.** Syn., Micrococcus bei Hepatitis enzoötica porcellorum. Ger. Found in hogs affected with hepatitis (Russia). *aër.*, *liqf.*, *pg.* **Micrococcus prodigiosus,** Cohn. See *Bacillus prodigiosus*, Ehrenberg. **Micrococcus pseudo-cyanus,** Cohn. Found in boiled potatoes exposed to air. *aër.*, *chg.* (verdigris green), *npg.*

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

Not sufficiently known. **Micrococcus psittaci**, Wolf. Syn., *Streptococcus perniciosus psittacorum*, Eberth and Wolf. Micrococcus of gray parrot disease. Micrococcus der Papageimycose. Ger. The cause of a disease of parrots resembling fowl cholera; fatal to many of the parrots imported from Guinea into Europe. **Micrococcus putridus.** A form emitting a fetid gas from gelatin when mixed with iodoform. **Micrococcus pyocyaneus**, Gessard. See *Bacillus pyocyaneus a*, Gessard. **Micrococcus pyogenes**, Rosenbach. Syn., *Streptococcus pyogenes*, *Streptococcus erysipelatos*, *Streptococcus longus*, Von Lingelsheim. *Micrococcus erysipelatis* (*tos*) (*tosus*), Streptococcus of pus. *Streptococque pyogène*, Vrai Streptococque de l'erysipéle, Fr., Eiterkettenkokkus, Ger., Micrococcus of erysipelas, Fehleisen. Found in the pus of acute abscesses, and in the skin in cases of erysipelas. *aër.*, *facanaër.*, *nliqf.*, *pg.* **Micrococcus pyogenes albus**, Rosenbach. Syn., *Staphylococcus pyogenes albus*, Passet. *Staphylococcus epidermidis albus*, Welch. Frequently found in company with *Micrococcus pyogenes aureus*. The cause of "stitch abscesses." *aër.*, *liqf.*, *pg.* **Micrococcus pyogenes aureus**, Rosenbach. Syn., *Staphylococcus pyogenes aureus*. Stafilococco piogeno aureo, Ital. Staphylococque doré, Fr. Gelber Traubencoccus, Ger. Micrococcus of infectious osteomyelitis. The species most frequently found in pus. Obtained from various suppurations, boils, anthrax, osteomyelitis, ulcerative endocarditis, phlegmon, etc. *aër.*, *facanaër.*, *liqf.*, *chg.* (brilliant golden yellow), *pg.* **Micrococcus pyogenes citreus**, Passet. Syn., *Staphylococcus citreus*, Passet. *Micrococcus pyogenes flavus*. Found associated with the forms first described in acute abscesses and with *Bacillus tuberculosis*, Koch. *aër.*, *facanaër.*, *liqf.*, *chg.* (lemon yellow), *pg.* Held by some to be but a variety of *Micrococcus pyogenes aureus*. **Micrococcus pyogenes tenuis**, Rosenbach. Syn., *Micrococcus rosenbachii*. Found in pus. Culture thin, varnish-like; pathogenesis not settled. Cf. *Micrococcus septicus*, Flügge. **Micrococcus pyogenes ureæ flavus**, Rörsing. Found in purulent urine. Cf. *Diplococcus pyogenes ureæ*, Rörsing; *Diplococcus ureæ trifoliatus*, Rörsing. **Micrococcus pyosepticus**, Richet. Syn., *Staphylococcus pyosepticus*, Hericourt and Richet. Obtained from a carcinomatous tumor in a dog. *aër.*, *liqf.*, *pg.* Resembles *Micrococcus pyogenes albus*, Rosenbach. **Micrococcus radiatus**, Flügge. Syn., *Streptococcus radiatus*, Flügge. Found in air and water. *aër.*, *liqf.*, *npg.* **Micrococcus rheumarthritidis**, Küssmaul. See *Bacillus rheumarthritidis*, Küssmaul. **Micrococcus rosenbachii.** See *Micrococcus pyogenes tenuis*, Rosenbach. **Micrococcus rosettaceus**, Zimmermann. Found in water. *aër.*, *nliqf.*, *npg.* **Micrococcus roseus**, Eisenberg. Found in the sputum of a person suffering from influenza. *aër.*, *facanaër.*, *liqf.*, *chg.* (pink), *npg.* **Micrococcus roseus**, Bumm. See *Diplococcus roseus*, Bumm. **Micrococcus roseus**, Maggiora, Flügge. Syn., *Neisseria rosea*. Found on the skin. *aër.*, *npg.* **Micrococcus salivarius pyogenes**, Biondi. Syn., *Staphylococcus varius pyogenes*, Biondi. Found in an abscess produced in a guinea-pig by inoculation with saliva from a child affected with anginose scarlatina. *aër.*, *liqf.*, *pg.* **Micrococcus salivarius septicus**, Biondi. Obtained from animals after inoculation with saliva from a person with puerperal septicemia. *aër.*, *nliqf.*, *pg.* Cf. *Micrococcus sialosepticus*. **Micrococcus scarlatinæ, Micrococcus scarlatinosus**, Coze and Feltz. Syn., *Perroncitoa scarlatinosa*. Micrococcus of scarlet fever, Pohl and Pincus. Found in the blood on the desquamating skin, and on the palate of scarlet fever patients; resembles *Micrococcus septicus*, Flügge. Cf. *Streptococcus rubiginosus*, Edington, and Bacillus of scarlet fever, Crooke. **Micrococcus septicus**, Cohn. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Micrococcus septicus**, Flügge. Syn., *Streptococcus septicus*, Flügge, and *Streptococcus pyogenes*, Saccardo, *Streptococcus pneumoniæ*, Weichselbaum. Found in soil. *aër.*, *nliqf.*, *pg.* **Micrococcus septopyæmicus.** Syn., *Streptococcus septopyæmicus*. Obtained from cases of phlegmonous angina and erysipelas of the larynx. *aër.*, *nliqf.*, *pg.* Resembles *Micrococcus septicus*, Flügge. **Micrococcus sialosepticus.** Found in the saliva in a case of puerperal septicemia. *aër.*, *nliqf.*, *pg.* Cf. *Micrococcus salivarius septicus*, Biondi. **Micrococcus subflavus**, Flügge, Neisser. Syn., *Neisseria subflava*. Yellowish-white micrococcus or diplococcus, Bumm. Diplococcus jaune blanc, Fr. Obtained from the lochia of puerperal women, and from vaginal mucus. *aër.*, *liqf.*, *pg.* **Micrococcus suis**, Burrill. See *Bacillus tardigradus*. **Micrococcus tardigradus.** See *Micrococcus flavus tardigradus*, Flügge. **Micrococcus tetragenes, Micrococcus tetragenus**, Gaffky. Syn., *Gaffkya tetragenus*, Saccardo. Obtained from a cavity in the lung of a person with pulmonary tuberculosis. *aër.*, *facanaër.*, *nliqf.*, *pg.* **Micrococcus tetragenus**, Marotta. Constantly found in smallpox vesicles and pustules. *aër.*, *liqf.*, *pg.* Produces vaccinia in calves. **Micrococcus tetragenus febris flavæ**, Finlay. Syn., *Micrococcus tetragenus versatilis*, Sternberg. Obtained from the excrements of mosquitoes which had drawn blood from yellow fever patients; also from the surface of the body in the same disease, (Sternberg). *aër.*, *liqf.*, *chg.* (lemon-yellow), *npg.* **Micrococcus tetragenus subflavus**, Von Besser. Found in nasal mucus. *aër.*, *facanaër.* (no growth in gelatin), *npg.* **Micrococcus tetragenus mobilis ventriculi**, Mendosa. Found in the contents of the stomach of man. *aër.*, *nliqf.*, *mot.*, *npg.* **Micrococcus tetragenus versatilis**, Sternberg. See *Micrococcus tetragenus febris flavæ*, Finlay. **Micrococcus toxicatus**, Burrill. Syn., *Micrococcus variolæ et vaccinæ*, Cohn. *Streptococcus toxicatus*, Burrill. Found in the poison of the poison ivy, *Rhus toxicodendron*. **Micrococcus ulceris mollis.** See Bacillus of chancroid, Ducrey. **Micrococcus ureæ**, Cohn. Syn., *Bacterium ureæ*, Cohn. *Streptococcus ureæ*. *Torula ureæ*, Pasteur. Found in urine, in which it produces ammoniacal fermentation. **Micrococcus ureæ**, Pasteur and Van Tieghem. Found in the air and in ammoniacal urine. *aër.*, *facanaër.*, *nliqf.*, *npg.* Possibly the last two forms and the *Bacterium ureæ*, Jaksch, are identical. **Micrococcus ureæ liquefaciens**, Flügge. Syn., *Streptococcus æthebius*. Found in ammoniacal urine. *aër.*, *facanaër.*, *liqf.*, *npg.* **Micrococcus urinalbus.** Syn., *Micrococcus albus urinæ*. Found in the urine in cases of pyelonephritis and cystitis. **Micrococcus urinæ albus olearius**, Doyen. Syn., *Micrococcus doyenii*. Found under the same circumstances as the last form. *aër.*, *liqf.* **Micrococcus urinæ flavus olearius**, Doyen. Syn., *Micrococcus olearius*. Found in the urine of cystitis, with the two preceding forms. *aër.*, *liqf.*, *chg.* (golden-yellow). **Micrococcus urinæ major**, Doyen. Syn., *Micrococcus major*. Found in same circumstances as the three preceding forms. **Micrococcus variolæ, Micrococcus variolæ et vaccinæ,**

Cohn. Syn., *Streptococcus variolæ*, Micrococcus of smallpox, Micrococcus of vaccinia. Obtained by Cohn, Guttmann, Marotta, Hlava and others from the lymph of vaccine pustules in man and animals; by Coze and Feltz from the blood of persons affected with variola; by Cornil and Babes, in the lacunæ of the mucous bodies of variola papules; by Quist and Voigt from vaccine; (Pfeiffer and Loeff find certain ameboid or coccidian protozoans which they regard as specific; also a ferment). Cf. *Saccharomyces vaccinæ*. *Micrococcus viridis flavescens*, Guttmann. **Micrococcus versatilis.** Found on the skin of healthy persons, also in the liver, spleen and kidneys after death by yellow fever. Not sufficiently studied. **Micrococcus versicolor,** Flügge. Found in water. *aër.*, *nliqf.*, *chg.* (yellow), *npg.* **Micrococcus vini perda.** Syn., *Streptococcus fermenti*, *Micrococcus fermenti.* Found in spoiled wine. **Micrococcus violaceus,** Cohn. Found in water. *aër.*, *nliqf.*, *chg.* (violet), *npg.* **Micrococcus viridis flavescens,** Guttmann. Found in the lymph of a varicella pustule. *aër.*, *nliqf.*, *npg.* **Micrococcus viscosus,** Pasteur. Found in the disease of wine known as *la graisse.* **Micrococcus viticulosus,** Flügge, Katz. Found in air and water. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Micrococcus xanthogenicus.** *Cryptococcus xanthogenicus*, Freire. Found in cases of yellow fever. Cf. Microbe de la fiévre jaune. **Micrococque de la fermentation de l'ammoniaque,** Fr. See *Micrococcus nitrificans*, Van Tieghem. **Micrococque chromogène,** Fr. Any Chromogenic Micrococcus. **Micrococque de la mammite gangrèneuse des brebis laitères.** See *Micrococcus mastobius*, Nocard, Mollereau, and Kitt. **Micrococque de la sueur rouge.** See *Micrococcus hæmatodes*, Babes. **Micrococque de l'ozène.** See *Micrococcus lœwenbergii.* **Microhaloa rosea,** Kützing. See *Beggiatoa roseo-persicina*, Zopf. **Microsporon minutissimum,** Burchardt. See *Bacillus epidermidis*, Bizzozero. **Microsporon septicum,** Klebs. See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Microzyma bombycis,** Béchamp. See *Micrococcus bombycis*, Cohn, Beck. **Milchsäurebacillus.** See *Bacillus acidi lactici*, Hueppe. **Milkwhite Micrococcus,** Bumm. See *Micrococcus albicans tardissimis*, Eisenberg. **Milk Yeast.** See *Saccharomyces lactis*, Adametz. **Miller's Bacillus.** See *Bacillus dentalis viridans*, Miller, and Spirillum of Miller. **Miller's Bacillus of the Intestine.** See *Bacillus aërogenes*, *I*, *II*, *III*, Miller. **Miller's Epsilon Bacillus.** See Epsilon Bacillus, Miller. **Milzbrandbacillus.** See *Bacillus anthracis*, Pollender and Davaine. **Monas prodigiosa,** Ehrenberg. See *Bacillus prodigiosus*, Ehrenberg. **Monas termo,** Müller. See *Bacillus termo*, Dujardin. **Mundhöhlebacillen,** Bacilli of the mouth. **Mycoderma aceti, Mycoderm du vinaigre,** Pasteur. See *Bacillus aceti*, Kützing. **Myconostoc gregarium,** Cohn. A spiral or crumpled condition of a filamentous schizomycete, perhaps *Cladothrix dichotoma*, Cohn. **Mycoderma cerevisiæ et vini,** Desm. **Mycoderma mesentericum,** Pers. **Mycoderma vini,** Pasteur. See *Saccharomycetes mycoderma*, Reess. **Nasenschleim vibrio,** Weibel. See *Spirillum nasale*, Weibel. **Nassfaulebacillus.** See Bacillus of potato rot, Kramer. **Neapler Bacillus.** See *Bacillus neapolitanus*, Emmerich. **Neisseria albicans.** See *Micrococcus albicans amplus*, Neisser. **Neisseria citrea.** See *Micrococcus citreus conglomeratus*, Bumm. **Neisseria conglomerata.** See *Micrococcus conglomeratus*, Weichselbaum. **Neisseria gonorrhœæ.** See *Micrococcus gonorrhœæ*, Neisser. **Neisseria lactea.** See *Micrococcus lacteus faviformis*, Neisser. **Neisseria lyssæ.** See *Micrococcus lyssæ*, Neisser. **Neisseria petechialis.** See *Micrococcus petechialis*, Neisser. **Neisseria rebellis.** See Micrococcus of trachoma, Sattler. **Neisseria rosea.** See *Micrococcus roseus*, Maggiora. **Neisseria subflava.** See *Micrococcus subflavus*, Flügge. **Neisseria tardissima.** See *Micrococcus albicans tardissimus*, Bumm. **Neisseria weichselbaumii.** See *Micrococcus intercellularis meningitidis*, Neumann and Schäffer. **Neisseria winckleri.** See *Bacillus beribericus*, Lacerda. **Nitrifying Bacillus of Winogradsky, Nitromonas of Winogradsky.** Obtained from the soil. No growth on ordinary culture media. One of the very few nitrifying ferments. **Nosema bombycis,** Nägeli. See Microbe de la pébrine, Pasteur. **Obermeier'scher Recurrensfaden,** Weigert. **Obermeier'scher Recurrensspirillum,** Engelmann. See *Spirillum obermeierii.* **Ophidomonas jenensis, Ophidomonas sanguinea,** Ehrenberg. See *Beggiatoa roseo-persicina*, Zopf. **Orchiococcus.** See Diplococcus of Orchitis, Hugouneng and Eraud. **Oscillaria alba,** Vaucher. See *Beggiatoa alba*, Trevisan. **Oscillaria arachnoidea,** Agardh. See *Beggiatoa arachnoidea*, Trevisan. **Oscillaria leptomitiformis,** Meneghi. See *Beggiatoa leptomitiformis*, Trevisan. **Oscillaria tigrina.** See *Beggiatoa tigrina*, Rabenhorst. **Oscillaria versatilis,** Kützing. See *Beggiatoa arachnoidea*, Trevisan. **Osteo-myelitis-kokken,** Becker. See *Staphylococcus pyogenes aureus*, Ogston. **Palmella infusionum,** Ehrenberg. See *Bacillus termo*, Dujardin. **Palmella prodigiosa,** Mont. See *Bacillus prodigiosus*, Ehrenberg. **Palmellina capillorum** (Radlkoffer), Bulh. Syn., *Zoöglœa capillorum*, Bulh. Found in the epidermis of the head; supposed to affect the color of the hair. **Panhystophyton ovatum,** Lebert. See Microbe de la pébrine, Pasteur. **Passet's Fäulnissbacillus. Passet's Putrefying Bacillus of Pus.** See *Bacillus pyogenes fœtidus*, Passet. **Peach-colored Bacterium,** Lankester. See *Beggiatoa roseo-persicina*, Zopf. **Pediococcus acidi lactici,** Lindner. Found in hay infusion and in mash from malt. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Pediococcus albus,** Lindner. Found in well water. *aër.*, *liqf.*, *npg.* **Pediococcus aurantiacus,** Cohn. See *Micrococcus aurantiacus*, Cohn. **Pediococcus cerevisiæ,** Balcke. Syn., *Sarcina cerevisiæ*, Lindner. Found in beer and in the air of breweries. *aër.*, *facanaër.*, *nliqf.*, *npg.* **Peroncitoa scarlatinosæ.** See *Micrococcus scarlatinæ*, Pohl-Pincus. **Pfeiffer's Bacillus.** See *Bacillus capsulatus*, Pfeiffer. **Photobacterium balticum,** Fischer. Found in the waters of the Baltic. *aër.*, *liqf.*, *phos.*, *npg.* Cf. *Bacillus phosphorescens indigenus*, Fischer. **Photobacterium fischeri,** Katz. Found in the waters of the Baltic. *aër.*, *liqf.*, *phos.*, *npg.* **Photobacterium indicum,** Fischer. See *Bacillus phosphorescens*, Fischer. **Photobacterium luminosum,** Beyerinck. Syn., Bactérie lumineuse de la mer du nord. Found on many of the phosphorescent animals, crustaceous polyps, infusoria, of the North Sea. *aër.*, *liqf.*, *phos.*, *npg.* **Photobacterium pflügeri,** Ludwig. Syn., *Bacterium pflügeri*, *Micrococcus pflügeri.* Found upon butcher's meat and upon market fish. The most phosphorescent of all light-producing bacteria. *aër.*, *liqf.*, *phos.*, *ngp.* **Photobacterium phosphorescens,** Fischer. See *Bacillus phosphoreus*, Cohn. **Photobacterium phosphorescens,** Cohn. Syn., *Bacterium phosphorescens*,

Cohn. Found upon fish and in sea water. *aër., nliqf., npg.* **Pilz der blauen Milch.** See *Bacillus cyanogenus*, Fuchs. **Pilz der Dexträngährung.** See *Leuconostoc mesenteroides*, Cienkowski. **Pilz der Zahncaries.** See *Leptothrix buccalis*, Robin. **Pink Bacillus of Spreading Edema,** A. B. Harris. *aër., nliqf., pleom., chg.* (pink), *npg.* Cf. *Bacillus œdematis*, Koch. **Pleurococcus roseo-persicina,** Rabenhorst. See *Beggiatoa roseo-persicina*, Zopf. **Pneumobacillus von Friedländer, Pneumobacillus friedländeri.** See *Bacillus pneumoniæ friedländeri.* **Pneumobacillus liquefaciens bovis.** See *Bacillus liquefaciens bovis*, Arloing. **Pneumococcus von Fränkel.** See *Bacillus septicus sputigenus*, Flügge. **Pneumococcus, Friedländer. Pneumonia-coccus of Friedländer,** Sternberg. See *Bacillus pneumoniæ friedländeri.* **Pneumococque de Fraenkel.** See *Bacillus septicus sputigenus*, Flügge. **Pneumococcenähnliche Bacillen,** Ger. See *Bacillus pseudopneumonicus*, Passet. **Potato Bacillus.** Applied to *Bacillus mesentericus fuscus*, Flügge. *Bacillus mesentericus vulgatus*, Flügge. *Bacterium mesentericus ruber*, Globig. **Pragmidiothrix multisepta,** Engler. Syn., *Beggiatoa multisepta.* Found in sea water upon crustaceans (Kieler Bucht). It is distinguished from *Beggiatoa* by the absence of sulphur grains. **Prazmowski's Bacillus of Butyric Acid Fermentation, Prazmowski's Buttersäurebacillus,** Ger. See *Bacillus butyricus*, Botkin, Prazmowski. **Proteus bei Lungengangrän des Menschen,** Babes. *Bacillus lethalis*, Babes. **Proteus capsulatus septicus, Proteus hominis capsulatus.** See *Bacillus hominis capsulatus*, Banti, Bordoni-Uffreduzzi. **Proteus lethalis.** See *Bacillus lethalis*, Babes. **Proteus mirabilis.** See *Bacillus mirabilis*, Hauser. **Proteus of Karlinski.** See *Bacillus murisepticus pleomorphus*, Karlinski. **Proteus septicus.** See *Bacillus septicus*, Pasteur. **Proteus sulfureus.** See *Bacillus sulfureus*, Lindenborn. **Proteus sulfureus of Holochenikoff, Proteus vulgaris,** Hauser. See *Bacillus vulgaris*, Hauser. **Proteus zenkeri.** See *Bacillus zenkeri*, Hauser. **Pseudodiphtheric Bacillus,** Löffler, Von Hoffmann, Roux, Yersin and Abbott. Found in the mucus from the pharynx and tonsils of children suffering from non-diphtheric throat affections. *Pseudodiplococcus pneumoniæ*, Bonome. Obtained from the sero-fibrinous exudate of a person dead of cerebro-spinal meningitis. *aër., nliqf., pg.* Cf. *Micrococcus meningitidis*, Neumann, and *Bacillus meningitidis purulentæ*, Neumann. **Pseudoödembacillus.** See *Bacillus pseudœdematis*, Liborius. **Pseudorotlaufbacillus,** Ger. See *Bacillus parvus ovatus*, Löffler. **Pseudotuberkulöser Bacillus,** Ger. See Bacillus of pseudo-tuberculosis of rabbits, Eberth. **Rasmussenia buccalis,** Saccardo. See *Leptothrix buccalis*, Robin. **Rauschbrandbacillus.** See *Bacillus chauvæi*, Bollinger and Feser. **Recurrensspirochæte,** Birsch-Hirschfeld. See *Spirillum obermeierii.* **Red Bacillus of Water.** See *Bacillus ruber*, Frank and Becker. **Rhinosclerombacillus.** See *Bacillus rhinoscleromatis*, Cornil and Alvarez. **Rinderpestbacillus.** See *Bacillus septicæmiæ hæmorrhagicæ*, Sternberg. **Rod Bacteria,** Bactéries en bâtonet, Fr. **Rosenbach's Putrefaction Bacilli, Rosenbach's Fäulnisbacillen,** Ger. See *Bacillus saprogenes, I, II, III,* Rosenbach. **Roter Bacillus aus Wasser.** See Red bacillus of water. **Roter Kartoffelbacillus,** Globig. See *Bacillus mesentericus ruber*, Globig. **Rotlaufbacillus.** See *Bacillus erysipelatos suis*, Koch and Löffler. **Rotzbacillus.** See *Bacillus mallei*, Löffler. **Saccharomyces albicans,** Robin. Syn., *Oïdium albicans*, Robin. **Saccharomyces apiculatus,** Reess. Occurs in fermented wine and beer, and, in the hot seasons, on sweet succulent fruits; in winter, in the soil beneath the trees that bear these fruits; a bottom yeast. **Saccharomyces cerevisiæ,** Reess and Robin. Syn., *Cryptococcus cerevisiæ*, Kützing, *Cryptococcus fermentatum, torula cerevisiæ*, yeast plant. Under this heading are included a series of different over and under yeasts. **Saccharomyces conglomeratus,** Reess. As the result of Hansen's investigations this species has been dropped by recent writers. **Saccharomyces ellipsoideus I, II,** Hansen, a "wild" species of wine ferment, II; gives rise to the muddiness of beer. **Saccharomyces exiguus,** Hansen. Found in German yeast; acts toward sugar exactly as does *Saccharomyces marxianus.* **Saccharomyces glutinis.** Syn., *Cryptococcus glutinis*, Fersen. A pullulating yeast that forms beautiful rose-colored patches on cooked potatoes. **Saccharomyces guttulatus,** Robin. Syn., *Cryptococcus guttulatus*, Robin, Winter. Champignon du tube digestif du lapin et autres herbivores, Remack. Found in the esophagus, stomach and intestines of mammals, birds, and reptiles. The feces of patients suffering from tunnel anemia, or anchylostomiasis, frequently contain this species of saccharomyces. **Saccharomyces inequalis,** a doubtful species. **Saccharomyces lactis,** Adametz. Syn., Milk-yeast. Found in milk, of which it ferments the milk-sugar. **Saccharomyces marxianus.** Found in wine; acts vigorously on saccharose, inverting and fermenting it with great activity; it also acts on dextrose. **Saccharomyces membranifaciens.** Forms a bright yellow, tough scum on beer-wort; liquefies gelatin; has no fermentative action on ordinary carbohydrates, and does not invert cane-sugar. **Saccharomyces minor,** Engel. According to Engel this is the cause of fermentation in bread. **Saccharomyces mycoderma,** Reess. Syn., *Mycoderma mesentericum*, Pers. *Mycoderma cerevisiæ et vini*, Desm. *Hormiscium vini et cerevisiæ*, Bonard. *Mycoderma vini*, Pasteur. *Mycoderma cerevisiæ*, Trecul. Fiore del vino e della birra, Ital. Found on the surface of wine and beer, forming the so-called "flowers of wine." **Saccharomycetes nebulosus,** a doubtful species. **Saccharomyces pasteurianus,** Reess. According to Hansen, this represents a group of three forms that cause disease in beer and wine. **Saccharomyces pyriformis,** Ward. Found in the fermentation of ginger-beer. A bottom yeast which develops much CO_2 but little alcohol; it inverts cane-sugar and ferments the products; does not ferment milk-sugar. *aër., facanaër.* **Saccharomyces ruber,** Demme. Found in milk and cheese, forming red spots in the latter, and a red sediment in the former. *nliqf.* **Saccharomyces vaccinæ,** Pfeiffer. Found in the lymph of a vaccinia pustule; nothing known of its action. **Saprogenic bacillus.** Syn., Bacille saprogène, Fr. Any bacillus which produces putrefaction, *e. g., Bacillus saprogenes*, Rosenbach, *q. v.* **Sarcina alba,** Eisenberg. Found in air and water. *aër., liqf., npg.* **Sarcina aurantiaca.** Syn., Orange Sarcina, Koch. Found in air and water. *aër., liqf., chg.* (orange yellow), *npg.* **Sarcina aurea,** Macé. Found in the pulmonary exudates of a person dead of a bastard pneumonia complicated with purulent pleurisy. *aër., liqf., chg.* (brilliant

golden yellow). **Sarcina botulina,** Van den Corput. Found in cases of poisoning with tainted sausage, (*botulismus*) and believed to be the active agent. Cf. Bacillus of allantiasis. **Sarcina candida,** Reinke. Found in the air of breweries. *aër., liqf., npg.* **Sarcina cerevisiæ,** Lindner. Syn., *Pediococcus cerevisiæ,* Balcke. Found in beer and the air of breweries. *aër., facanaër., nliqf., npg.* **Sarcine de l'estomac.** See *Sarcina ventriculi,* Goodsir. **Sarcina flava,** De Bary. Found in beer. *aër., liqf., chg.* (yellow), *npg.* **Sarcina fuscescens,** Falkenheim. Found in the human stomach. **Sarcina hyalina,** Kützing. Syn., *Merismopedia hyalina,* Kützing. Found in swamps. **Sarcina intestinalis,** Zopf. Found in the intestines of chickens and turkeys, principally in the cecum. **Sarcina in the Mouth and Lungs,** Fischer. According to De Bary the original description is not sufficiently clear for comparison. **Sarcina litoralis,** Œrstedt. Syn., *Merismopedia litoralis,* Rabenhorst, *Erythroconis,* Œrstedt. Found in sea water; forms a thin reddish layer between decomposing algæ on the shore. **Sarcina lutea,** Schröter. Found in the air, and in fungus cultures. *aër., liqf., chg.* (yellow), *npg.* **Sarcina minuta,** De Bary. Occurred spontaneously in a culture of sour milk on a microscopic slide; resembles *Sarcina welckeri.* **Sarcina mobilis,** Maurea. Found in old ascitic fluid. *aër., liqf., mot., chg.* (brick-red). **Sarcina morrhuæ.** Obtained from codfish. **Sarcina of the Lungs.** See *Sarcina pulmonum,* Hauser. **Sarcina of the Urine.** See *Sarcina urinæ,* Welcker. **Sarcine paludosa,** Schröter. Found in bog water. **Sarcina pulmonum,** Hauser. Syn., Sarcina of the lungs. Lungensarcine, Ger. Found in sputum. *aër., nliqf., npg.* **Sarcina reitenbachii,** Caspary. Syn., *Merismopedium reitenbachii,* Caspary—(also misprinted *Reichenbachii*). Found in fresh water on decaying plants. **Sarcina renis,** Hepworth. Found in the lungs of persons dead of pulmonary tuberculosis. **Sarcina rosea,** Menge. Found in milk and other food-stuffs. Held to be distinct from the form described by Schröter. *aër., liqf., chg.* (rose-red), *npg.* **Sarcina rosea,** Schröter. Found in the air. *aër., liqf., chg.* (intense red, giving same reaction as the pigment of *Sarcina aurantiaca*), *ngp.* **Sarcina urinæ,** Welcker. Syn., *Merismopedia urinæ,* Rabenhorst. Sarcina of the urine; sarcine de la urine, Fr., Hartze. Found in the bladder; appears to be destitute of zymotic action. **Sarcina ventriculi,** Goodsir. Syn., Sarcine de l'estomac, Fr. Harnsarcine, Ger. Common in the stomach of man and animals. De Bary finds two forms side by side, but offers no information as to their genetic relations. *aër., nliqf., npg.* **Sarcina welckeri,** Rossmann. Repeatedly found in the human bladder and voided for months at a time in the urine, which is usually abnormally rich in phosphates, the patient retaining good health. **Scheidenbacillus.** See *Bacillus vaginalis,* Döderlein. **Scheutzia laughlini.** Syn., Micrococcus of Dengue, Staphylococcus of Dengue, Dengue Micrococci. Found in the blood of patients suffering from dengue. Pathogenetic relations not determined. **Schweinerotlaufbacillus.** See *Bacillus erysipelatos suis,* Koch. **Septischer Erdbacillus.** See *Bacillus septicus agrigenus,* Nicolaier. **Septischer Sputumbacillus.** See *Bacillus septicus sputigenus,* Flügge. **Smegma bacillus.** See Bacillus of the Smegma. **Sphærococcus acidi lactici,** Marpmann. Found in fresh cow's milk. *aër., nliqf., npg.* **Sphærotilus natans,** Kützing, Saccardo. Syn., *Leptothrix natans.* Found in running and stagnant water. Old portions yellowish, younger portions colorless. **Spirille du choléra.** See *Spirillum choleræ asiaticæ,* Koch. **Spirille du mucus nasal.** See *Spirillum nasale,* Weibel. **Spirillo colerogeno di Koch,** Ital. See *Spirillum choleræ asiaticæ,* Koch; **Spirillum amyliferum,** Van Tieghem. Found in water. Forms granulose at certain developmental stages; gives the blue reaction with iodin. Cf. *Bacillus butyricus,* Prazmowski. **Spirillum anserum.** Syn., *Spirochæte anserina,* Sakharoff. Found in the blood of geese affected with a fatal form of septicemia due to this microbe. A disease prevalent in the swampy regions of Caucasia. *aër., mot., pg.* (not for chickens). **Spirillum α of Weibel.** See *Spirillum saprophiles α,* Weibel. **Spirillum attenuatum,** Warming. Found in sea water. **Spirillum aureum.** Syn., *Vibrio aureus,* Weibel. Found in the air and the slime of sewers. *aër., nliqf., nmot., chg.* (golden yellow), *npg.* **Spirillum β of Weibel.** See *Spirillum saprophiles β,* Weibel. **Spirillum choleræ asiaticæ,** Koch. Syn., *Spirillum choleræ.* Spirillum of cholera, Bacillus of cholera, Comma bacillus of Koch, Spirille du choléra, Bacille du choléra, Bacille en virgule, Bacille virgula cholérégène, Fr. Bacillo a virgola, Bacillo virgulato, Ital. Found in the discharges of cholera patients and in the intestines of cholera cadavers. *aër., facanaër., liqf., mot., pg.* **Spirillum concentricum,** Kitasato. Found in putrefying blood. *aër., nliqf., mot., npg.* **Spirillum denticola,** Miller; or, **Spirillum dentium,** Arnt. Syn., *Spirochæta denticola, Spirochæta dentium.* Found under the margins of the gums in the mouths of healthy persons; biologic characters unknown, as it does not thrive in culture fluids. **Spirillum endoparagogicum,** Sorokin. Found in a glairy liquid exuding from a poplar tree. **Spirillum finkleri, Spirillum Finkler-Prior.** Syn., *Vibrio proteus.* Bacillus von Finkler-Prior, Bacillus Epsilon von Miller. Found in the feces of persons affected with cholera nostras, after allowing the discharge to stand for some time. *aër., facanaër., liqf., mot.* Pathogenetic relation not confirmed. **Spirillum flavescens.** Syn., *Vibrio flavescens,* Weibel. Found in the slime of sewers. *aër., nliqf., nmot., chg.* (yellowish-green), *npg.* **Spirillum flavum.** Syn., *Vibrio flavescens,* Weibel. Found in the slime of sewers. *aër., nliqf., nmot., chg.* (ocher yellow), *npg.* **Spirillum jenensis,** Ehrenberg. Syn., *Ophidomonas jenensis,* Ehrenberg. A doubtful species. **Spirillum leucomelænum,** Perty. Found in water containing decaying algæ. **Spirillum linguæ.** Syn., *Vibrio lingualis,* Zungenbelagvibrio, Weibel. Found in the deposit on the tongue of a mouse, after inoculation. *aër., facanaër., nliqf., nmot., npg.* (for mice). **Spirillum litorale,** Warming. Syn., *Vibrio spirillum,* Müller; *Melunella spirillum,* Borg. Found in bog water. **Spirillum metschnikovi.** Syn., Vibrio metschnikovi, Gameleia. Found in the intestinal contents of chickens affected, in Russia, with an epidemic infectious disease resembling fowl cholera. *aër., facanaër, (?)liqf., mot., pg.* **Spirillum nasale.** Syn., *Vibrio nasale,* Weibel. Nasenschleimvibrio, Ger. Spirille du mucus nasale, Fr. Found in nasal mucus. *aër., facanaër, nliqf., nmot., npg.* **Spirillum obermeieri,** Cohn. Syn., *Spirochæta obermeieri.* Spirillum of relapsing fever. Recurrensspirochæte, Obermeier'scher Recurrensfaden, Weigert, Obermeier'scher Recurrensspirillum, Engel. Found in the blood

of persons affected with relapsing fever. *aër., mot.* (efforts to cultivate thus far unsuccessful), *pg.* **Spirillum of Asiatic cholera.** Spirillum of cholera. See *Spirillum choleræ asiaticæ*, Koch. **Spirillum of Denecke.** See *Spirillum tyrogenum*, Denecke. **Spirillum of Finkler and Prior.** See *Spirillum finkleri.* **Spirillum of Miller.** Syn., Miller's bacillus. Found in carious teeth. *aër., facanaër., liqf., mot., npg.* **Spirillum of Relapsing Fever.** See *Spirillum obermeieri*, Cohn. **Spirillum of Smith.** Found in the intestines of swine. *aër., nliqf., mot., npg.* **Spirillum plicatile,** Dujardin. Syn., *Spirochæte plicatilis*, Ehrenberg; *Spirulina plicatilis*, Cohn. Found in water containing decomposing algæ. Biologic characters undetermined. **Spirillum rosaceum.** Observed upon excrement in water. *aër., chg.* (red), *npg.* **Spirillum rosenbergii,** Warming. Found in brackish water. Contains refractive sulphur grains. *aër., mot.* **Spirillum roseum,** Macè. Found in a tube culture of blennorrhagic pus. *aër., nliqf., mot., chg.* (rose-red), *npg.* **Spirillum rubrum,** von Esmarch. Obtained from the putrefying body of a mouse. *aër., facanaër., nliqf., mot., chg.* (pink), *npg.* **Spirillum rufum,** Perty. Found in cistern water. *aër., mot., chg.* (rose-red), *npg.* **Spirillum rugula,** Müller. Syn., *Vibrio rugula.* Found in swamp water and frequently in the alimentary canal, on the teeth, etc. *aër., facanaër., mot., npg.* According to Prazmowski this species gives rise to decomposition of cellulose. **Spirillum sanguineum.** See *Beggiatoa roseopersicina*, Zopf. **Spirillum saprophiles α of Weibel.** Syn., *Vibrio saprophiles α* of Weibel. Found in rotting hay infusion and in the slime of sewers. *aër., nliqf., mot., npg.* **Spirillum saprophiles β of Weibel.** Syn., *Vibrio saprophiles β*, Weibel. Found in rotting hay infusion. *aër., nliqf., mot., npg.* **Spirillum saprophiles γ of Weibel.** Syn., *Vibrio saprophiles γ*, Weibel. Found in the slime of sewers. *aër., nliqf., mot., npg.* **Spirillum serpens,** Müller. Syn., *Vibrio serpens*, Müller. Found in stagnant water containing decaying plants, etc. Biologic characters not determined. **Spirillum sputigenum,** Miller. Common in the neglected mouths of healthy persons. Does not grow on culture media. **Spirillum tenue,** Ehrenberg. Found in putrefying plant infusions. Biologic characters undetermined. **Spirillum tyrogenum,** Denecke. Syn., Bacille de Denecke, Fr. Bacillus von Denecke, Käsespirillum, Ger. Spirillum of Denecke, Bacillus of cheese, Denecke's cheese spirillum. Found in old cheese. *aër., facanaër., liqf., mot., pg.* (for guinea pigs). **Spirillum undula,** Cohn, Müller. Syn., *Vibrio undula*, Müller; *Vibrio prolifer*, Ehrenberg. Found in zoöglea masses in swamp water, vegetable infusions, etc. *aër., mot., npg.* **Spirillum violaceum,** Warming. Found in brackish water; cell contents violet, with a few sulphur grains. **Spirillum volutans,** Ehrenberg. Syn., *Vibrio spirillum*, Müller; *Melunella spirillum*, Borg. Found in infusions and in bog water. Biologic characters undetermined. **Spirochæte anserina,** Sakharoff. See *Spirillum anserum.* **Spirochæte denticola,** Miller. **Spirochæte dentium,** Arnt. See *Spirillum dentium.* **Spirochæte obermeieri.** See *Spirillum obermeieri*, Cohn. **Spirochæte plicatilis,** Ehrenberg. See *Spirillum plicatile*, Dujardin. **Spiromonas cohnii,** Warming. Found in foul water. **Spiromonas volubilis,** Pertz. Found in putrefying infusions and in bog water. **Sporonema gracile.** See *Bacillus virens*, Van Tieghem. **Sputumbacillus,** Ger. See *Bacillus septicus sputigenus*, Flügge. **Stafilococco piogeno aureo,** Ital. See *Micrococcus pyogenes aureus*, Rosenbach. **Staphylococcus albus liquefaciens,** Escherich. Syn., White liquefying staphylococcus. Found in the alvine discharges of healthy infants. *aër., liqf., npg.* **Staphylococcus biskræ.** See Micrococcus of Heydenreich. **Staphylococcus cereus albus,** Passet. See *Micrococcus cereus albus*, Passet. **Staphylococcus cereus aureus,** Schröter and Winkler. See *Micrococcus cereus aureus*, S. and W. **Staphylococcus cereus flavus,** Passet. See *Micrococcus cereus flavus*, Passet. **Staphylococcus citreus.** See *Micrococcus citreus*, List. **Staphylococcus epidermidis albus,** Welch. See *Micrococcus pyogenes albus*, Rosenbach. **Staphylococcus pulvus.** See *Micrococcus pulvus*, Cohn. **Staphylococcus of Dengue,** McLaughlin. See *Scheutzia lauhglini.* **Staphylococcus of pemphigus,** De Michele. Obtained from the skin, kidney and spleen of a case of pemphigus chronica. **Staphylococcus passetti.** See *Micrococcus cereus flavus*, Passet. **Staphylococcus pyogenes albus,** Rosenbach. See *Micrococcus pyogenes albus*, Rosenbach. **Staphylococcus pyogenes aureus,** Ogston, Becker. Syn., Staphylococco pyogeno aureo, Ital. See *Micrococcus pyogenes aureus*, Rosenbach. **Staphylococcus pyogenes citreus,** Passet. See *Micrococcus pyogenes citreus*, Passet. **Staphylococcus pyosepticus,** Hericourt and Richet. See *Micrococcus pyosepticus*, Richet. **Staphylococcus salivarius pyogènes,** Biondi. See *Micrococcus salivarius pyogenes*, Biondi. **Staphylococcus viridis flavescens,** Guttmann. Syn., Micrococcus of chicken-pox. Found in the vesicles of varicella. *aër., nliqf., chg.* (greenish yellow), *npg.* **Streptococcus acidi lactici,** Grotenfeldt. Found in coagulated milk in Finland. *anaër.* (not strictly), *nliqf., npg.* **Streptococcus aethebius.** See *Micrococcus ureæ liquefaciens*, Flügge. **Streptococcus albus,** Maschek. Syn., Weisser Streptococcus, Ger. Found in hydrant water (Freiburg). *aër., liqf., npg.* **Streptococcus apthicola,** Hallier. See *Streptocytus of eczema epizoötica*, Schottelius. **Streptococcus articulorum,** Löffler. Syn., Micrococcus of diphtheria. Obtained from the affected mucous membrane in cases of diphtheria. Possibly a variety of *Micrococcus pyogenes. pg.* (for mice). **Streptococcus bombycis.** See *Micrococcus bombycis*, Cohn. **Streptococcus brevis,** Von Lingelsheim. Obtained from normal human saliva. *aër., facanaër., nliqf., npg.* **Streptococcus cadaveris,** Sternberg. Found in the liver of a yellow-fever cadaver. *aër., facanaër., nliqf., npg.* Probably identical with the preceding species. **Streptococcus cinnabareus.** See *Micrococcus cinnabareus*, Flügge. **Streptococcus coli gracilis,** Escherich. Found in the feces of healthy children living on a meat diet. *aër., facanaër., liqf., npg.* **Streptococcus conglomeratus,** Kurth. Obtained from cases of scarlet fever. *pg.* (for mice). **Streptococcus coronatus,** Flügge. See *Micrococcus coronatus*, Flügge. **Streptococcus coryzæ contagiosæ equorum,** Schütz. Syn., Streptococcus der Druse des Pferdes. Bacterium der Brustseuche des Pferdes, Ger. Bacterium of infectious pneumonia in the horse. Found in the pus from diseased lymphatic glands in horses suffering with infectious pneumonia, the disease being known in Germany as Druse des Pferdes. *aër., facanaër., pg.* (for horses and mice),

npg. (for rabbits, guinea pigs and pigeons). **Streptococcus des Gelenkrheumatismus,** Leyden. See *Bacillus rheumarthritidis*, Kussmaul. **Streptococcus endocarditicus.** See *Micrococcus endocarditicus rugatus*, Weichselbaum. **Streptococcus erysipelatis (erysipelatos),** Fehleisen. See *Micrococcus pyogenes*, Rosenbach. **Streptococcus fermenti.** See *Micrococcus viniperda.* **Streptococcus giganteus urethræ,** Lustgarten and Manneberg. Found in the healthy human urethra. *aër., npg.* **Streptococcus havaniensis,** Sternberg. Found in the acid vomit of a yellow-fever patient. Biologic characters undetermined. **Streptococcus insectorum,** Burrill. See *Micrococcus insectorum*, Burrill. **Streptococcus kochii.** See Micrococcus of septicemia in rabbits, Koch. **Streptococcus lanceolatus pasteuri,** Gamaléia. See *Bacillus septicus sputigenus*, Flügge. **Streptococcus liquefaciens,** Sternberg. Obtained from the intestines and livers of yellow-fever cadavers. *aër., facanaër., liqf., npg.* **Streptococcus longus,** von Lingelsheim. See *Micrococcus pyogenes*, Rosenbach. **Streptococcus lucæ.** See *Micrococcus ulceris mollis.* **Streptococcus manfredii.** See *Micrococcus manfredii.* **Streptococcus meningitidis.** See *Micrococcus intercellularis meningitidis*, Naumann and Schäffer. **Streptococcus monomorphus,** Bujwid, Heryng. Found in benign pharyngeal ulcers. *npg.* **Streptococcus morbillosus.** See *Micrococcus of measles.* **Streptococcus nocardi.** See *Micrococcus mastobius*, Nocard. **Streptococcus ochroleucus.** See *Micrococcus ochroleucus*, Prove and Legrain. **Streptococcus of Bonome.** Obtained from the exudations in the cerebro-spinal meninges and from hemorrhagic extravasations in the lungs, in cases of epidemic cerebro-spinal meningitis. *pg.* (for white mice and rabbits). **Streptococcus of granuloma fungoides,** Rindfleisch and Auspetz. See Streptococcus of mycosis fungoides. **Streptococcus of Manneberg.** Obtained from the urine in cases of acute nephritis. *aër., facanaër., nliqf., pg.* (for dogs and rabbits). **Streptococcus of mastitis in cows.** See *Micrococcus mastobius*, Nocard and Mollereau. **Streptococcus of mycosis fungoides.** Streptococcus of granuloma-fungoides, Rindfleisch and Auspetz. Found in the capillaries and subcutaneous tissue in the parts affected by this disease. Not sufficiently investigated. **Streptococcus of pus.** See *Micrococcus septicus*, Flügge. **Streptococcus perniciosus psittacorum,** Eberth and Wolf. See *Micrococcus psittaci*, Wolf. **Streptococcus pneumoniæ,** Weichselbaum. See *Micrococcus pyogenes*, Flügge. **Streptococcus putrefaciens.** Micrococcus of putrefaction. Refers to any one of the many micrococci found in putrefying substances. **Streptococcus pyogenes,** Rosenbach. See *Micrococcus pyogenes*, Rosenbach. **Streptococcus pyogenes,** Saccardo. See *Micrococcus septicus*, Flügge. **Streptococcus pyogenes maligni,** Krause and Flügge. Found in necrotic masses in a leukemic spleen. *pg.* (for mice and rabbits). **Streptococcus pyogenes ureæ,** Rörsing. Found in purulent urine. Cf. *Micrococcus pyogenes ureæ flavus*, Rörsing. **Streptococcus radiatus.** See *Micrococcus radiatus*, Flügge. **Streptococcus rubiginosus,** Edington. Found in cases of scarlatina. *npg.* Does not appear till late in the disease. **Streptococcus seiferti.** See *Micrococcus influenzæ*, Letzerich. **Streptococcus septicus,** Flügge. See *Micrococcus septicus*, Flügge. **Streptococcus septicus liquefaciens,** Babes. Obtained from the blood and viscera of a child who died of septicemia following scarlatina. *aër., liqf., pg.* (for mice and rabbits). **Streptococcus septopyæmicus.** See *Micrococcus septopyæmicus*, Biondi. **Streptococcus toxicatus.** See *Micrococcus toxicatus*, Burrill. **Streptococcus ureæ.** See *Micrococcus ureæ*, Cohn. **Streptococcus ureæ rugosus,** Rörsing. Found in urine. **Streptococcus variolæ.** See *Micrococcus variolæ et vaccinæ*, Cohn. **Streptococcus vermiformis,** Maschek. Syn., wurmförmiger Streptococcus, Ger. Found in hydrant water (Freiburg). *aër., liqf., npg.* **Streptococque de l'érysipèle, Streptococque pyogène vrai.** See *Micrococcus septicus*, Flügge. **Streptocytus puerpérale,** Doléris. See *Bacillus puerperalis*, Engel and Spillman. **Streptocytus of Eczema epizoötica,** Schottelius. Syn., *Streptococcus apthicola*, Hallier. Micrococcus of foot-and-mouth disease. Micrococcus der Maul- und Klauenseuche, Ger., Micrococco del afta epizootica, Ital. Found in vesicular eruptions about the mouth and feet of cattle, pigs and sheep. Communicable to man. *aër., facanaër.* Pathogenesis not fully settled. Cf. Bacillus of ulcerative stomatitis of calves. **Streptothrix fœrsteri,** Cohn. See *Cladothrix fœrsteri*, Cohn. **Swine Plague Schizophyte,** Detmers. See Bacillus of swine plague, Marseilles, Rietsch and Jobert. **Syphilis Bacillus.** See *Bacillus syphilidis*, Lustgarten. **Syphilis Bacillus of Eve and Lingard.** Obtained in cultures from the blood and diseased tissues of syphilitics who have not undergone mercurial treatment. *aër., chg* (pale yellow or brown). Pathogenetic relations not settled. Not stained by Lustgarten's method; capable of development on blood-serum. **Tetanus Bacillus.** See *Bacillus tetani*, Nicolaier. **Thiothrix nivea.** See *Beggiatoa nivea*, Rabenhorst. **Thiothrix tenuis,** Winogradsky. Found in sulphur springs. **Thiothrix tenuissima,** Winogradsky. Found in sulphur springs. **Torula cerevisiæ.** See *Saccharomyces cerevisiæ*, Reess and Robin. **Torula ureæ,** Pasteur. See *Micrococcus ureæ*, Cohn. **Trachomcoccus,** Ger. See Micrococcus of Trachoma, Sattler and Michel. **Trippercoccus,** Ger. See *Micrococcus gonorrhœæ*, Neisser. **Trommelschlägerbacillus,** Ger. See *Bacillus putrificus coli*, Bienstock. **Tubercle-bacillus.** See *Bacillus tuberculosis*, Koch. **Typhus bacillus.** See *Bacillus typhi abdominalis*, Eberth. **Tyrothrix catenula,** Duclaux. See *Bacillus catenula*, Duclaux. **Tyrothrix claviformis,** Duclaux. See *Bacillus claviformis*, Duclaux. **Tyrothrix distortus,** Duclaux. See *Bacillus distortus*, Duclaux. **Tyrothrix filiformis,** Duclaux. See *Bacillus filiformis*, Duclaux. **Tyrothrix geniculatus,** Duclaux. See *Bacillus geniculatus*, Duclaux. **Tyrothrix scaber,** Duclaux. See *Bacillus scaber*, Duclaux. **Tyrothrix tenuis,** Duclaux. See *Bacillus tenuis*, Duclaux. **Tyrothrix turgidus,** Duclaux. See *Bacillus turgidus*, Duclaux. **Tyrothrix urocephalus,** Duclaux. See *Bacillus urocephalus*, Duclaux. **Tyrothrix virgula,** Duclaux. See *Bacillus virgula*, Duclaux. **Ulvina aceti,** Kützing. See *Bacillus aceti*, Kützing. **Urobacillus duclauxi,** Miquel. Found in sewage and river water. *aër., facanaër., mot., liqf.* Pathogenesis not determined. **Urobacillus freudenreichii,** Miquel, Obtained from air, dust, sewage. *aër., liqf., mot.* Pathogenesis not determined. **Urobacillus maddoxi,** Miquel. Obtained from sewage and river water. *aër., liqf., mot.* Pathogenesis not determined. **Urobacillus pasteuri,** Miquel. Obtained from decomposing urine. *aër., liqf., mot.* Pathogenesis not

Abbreviations.—*aër.* = aërobic. *anaër.* = anaërobic. *chg.* = chromogenic. *facanaër.* = facultative anaërobic. *liqf.* = liquefactive. *monom.* = monomorphic. *mot.* = motile. *nliqf.* = non-liquefactive. *nmot.* = non-motile. *npg.* = non-pathogenic. *obl.* = obligate. *oscl.* = oscillating. *pg.* = pathogenic. *phos.* = phosphorescent. *pleom.* = pleomorphic. *sap.* = saprophytic.

determined. **Urobacillus schützenbergii,** Miquel. Obtained from sewage and river water. *aër., liqf., mot.* Pathogenesis not determined. **Verflüssigender Bacillus aus Wasser,** Ger. Liquefying bacillus of water. See *Bacillus aquaticus liquefaciens,* Pokrowsky. **Vibrio aureus,** Weibel. See *Spirillum aureum.* **Vibrio bacillus,** Müller, Ehrenberg. See *Bacillus ulna,* Cohn. **Vibrio choleræ.** See *Spirillum choleræ asiaticæ,* Koch. **Vibrio cyanogenus,** Ehrenberg. See *Bacillus cyanogenus,* Fuchs. **Vibrio flavescens,** Weibel. See *Spirillum flavescens,* Weibel. **Vibrio flavus,** Weibel. See *Spirillum flavum,* Weibel. **Vibrio lineola,** Müller and Ehrenberg. See *Bacterium lineola,* Cohn. **Vibrio lingualis.** See *Spirillum linguæ,* Weibel. **Vibrio metschnikovi,** Gamaleia. See *Spirillum metschnikovi,* Gamaleia. **Vibrio nasalis,** Weibel. See *Spirillum nasale,* Weibel. **Vibrio proteus.** See *Spirillum finkleri.* **Vibrio rugula,** Müller. See *Spirillum rugula,* Müller. **Vibrio saprophiles** *α,* Weibel. See *Spirillum saprophiles α,* Weibel. **Vibrio saprophiles** *β,* Weibel. See *Spirillum saprophiles β,* Weibel. **Vibrio saprophiles** *γ,* Weibel. See Spirillum saprophiles *γ,* Weibel. **Vibrio serpens,** Müller. See *Spirillum serpens,* Müller. **Vibrio syncyanus,** Ehrenberg. See *Bacillus cyanogenus,* Fuchs. **Vibrio synxanthus,** Ehrenberg. See *Bacillus synxanthus,* Ehrenberg and Schröter. **Vibrio tremulans,** Ehrenberg. See *Bacterium lineola,* Cohn. **Vibrio undula,** Müller. See *Spirillum undula,* Müller. **Vibrio Xanthogenus,** Fuchs. *Bacillus synxanthus,* Ehrenberg and Schröter. **Vibrion butyrique,** Pasteur. See *Bacillus butyricus,* Prazmowski. **Vibrion septique.** See *Bacillus œdematis maligni,* Koch. **Violet Bacillus.** See *Bacillus janthinus,* Zopf. **Violetter Bacillus aus Wasser,** Ger. See *Bacillus violaceus,* Becker. **Wasserbacillen, Wasserbacterien,** Ger. Bacilli and bacteria of water. **Weisser Bacillus aus Wasser.** Ger. See *Bacillus albus,* Becker. **Weisser Streptococcus,** Ger. See *Streptococcus albus,* Maschek. **White Bacillus of Water.** See *Bacillus albus,* Becker. **White Liquefying Staphylococcus.** See *Staphylococcus albus liquefaciens,* Escherich. **Wunderblut,** Ger. See *Bacillus prodigiosus,* Ehrenberg. **Wurzelbacillus,** Ger. See *Bacillus ramosus,* Eisenberg. **Wurzelbacillus aus Erde.** See *Bacillus mycoides,* Flügge. **Xerosebacillus,** Ger. See Bacillus of xerosis epithelialis conjunctivæ, Leber. **Yellowish-white Micrococcus,** Bumm. See *Micrococcus subflavus,* Flügge. **Ziegelroter Bacillus,** Adametz. See *Bacillus latericeus,* Eisenberg. **Zoöglœa capillorum,** Buhl. See *Palmellina capillorum,* Radlkofer. **Zoöglœa termo,** Müller, Cohn. See *Bacillus termo,* Dujardin. **Zoöglœa ramigera.** A tree-like variety of *Cladothrix dichotoma, q. v.* **Zoögalactina imetropa,** Sette. See *Bacillus prodigiosus,* Ehrenberg. **Zungenbelagvibrio,** Ger. See *Spirillum linguæ,* Weibel.

Bacteriaceæ (*bak-te-re-a'-se-e*) [*βακτήριον,* a little stick]. A group or order of microscopic fungi; the same as *Schizomycetes.*

Bacterial (*bak-te'-re-al*) [*βακτήριον,* a little stick]. Resembling or of the nature of bacteria.

Bactericidal (*bak-te-ris-id'-al*) [*βακτήριον,* a little stick; *cædere,* to kill]. Destructive to bacteria.

Bactericide (*bak-te'-ris-id*) [*βακτήριον,* a little stick; *cædere,* to slay]. 1. Destructive to bacteria. 2. An agent that destroys bacteria.

Bacteridium (*bak-ter-id'-e-um*) [*βακτήριον,* a little stick: *pl., Bacteridia*]. According to Davaine, a genus of Bacteriaceæ characterized by immobility of the elements at all periods of their existence. The distinction does not now obtain.

Bacteriemia (*bak-te-re-e'-me-ah*) [*βακτήριον,* a little stick; *αἷμα,* blood]. The presence of bacteria in the blood.

Bacterioid (*bak-te'-re-oid*) [*βακτήριον,* a little stick; *εἶδος,* form]. Applied to certain microörganisms flourishing in and around the roots of leguminous plants, assisting in the accumulation of nitrogen, and giving rise to tubercles. They may be cultivated in artificial media like ordinary bacteria. (Brunchoist, Nobbe, etc.)

Bacteriologist (*bak-te-re-ol'-o-jist*) [*βακτήριον,* a little stick; *λόγος,* science]. One who makes a special study of bacteriology.

Bacteriology (*bak-te-re-ol'-o-je*) [*βακτήριον,* a little stick; *λόγος,* science]. That department of science that is concerned with the study of bacteria.

Bacterio-protein (*bak-te-re-o-pro'-te-in*) [*βακτήριον,* a little stick; *πρῶτος,* first]. A protein contained in bacteria.

Bacterio-purpurin (*bak-te-re-o-per'-pu-rin*) [*βακτήριον,* a little stick; *purpura,* purple]. A peach-colored pigment found by Lankester in the protoplasm of *Beggiatoa roseo-persicina.* It is insoluble in water, alcohol, chloroform, ammonia, acetic and sulphuric acids, etc.

Bacterioscopic (*bak-te-re-o-skop'-ik*) [*βακτήριον,* a little stick; *σκοπεῖν,* to view]. Pertaining to bacterioscopy.

Bacterioscopy (*bak-te-re-os'-ko-pe*) [*βακτήριον,* a little stick; *σκοπεῖν,* to inspect]. The microscopic study of bacteria.

Bacterio-therapeutic (*bak-te-re-o-ther-ap-u'-tik*) [*βακτήριον,* a little stick; *θεραπεία,* treatment]. Relating to bacterio-therapy.

Bacteriotherapy (*bak-te-re-o-ther'-ap-e*) [*βακτήριον,* a little stick; *θεραπεία,* treatment]. The treatment of disease by the introduction of bacteria into the system.

Bacterious (*bak-te'-re-us*) [*βακτήριον,* a little stick]. Bacterial.

Bacterium (*bak-te'-re-um*) [*βακτήριον,* a little stick; dim. of *βακτηρία,* a stick, staff: *pl., Bacteria*]. 1. A term used to distinguish in a general way some of the simplest microscopic fungi, the *Bacteriaceæ,* Fission-fungi, or Schizomycetes, and other closely allied microbes. 2. A genus of short, cylindrical, motile Fission-fungi.

Bacteriuria (*bak-te-re-u'-re-ah*) [*βακτήριον,* a little stick; *οὖρον,* urine]. The presence of bacteria in the urine.

Bacteroid (*bak'-ter-oid*) [*βακτήριον,* a little stick; *εἶδος,* form]. Resembling bacteria.

Bad Disorder. Synonym of *Syphilis.*

Bader's Operations. See *Operations, Table of.*

Badiaga (*bah-de-ah'-gah*) [Rus., *badyaga*]. A Russian fresh-water sponge, *Spongia lacustris,* valued as a discutient and as a remover of the marks of bruises. Unof.

Badian (*ba'-de-an*) [*badius,* bay]. The Star-anise. See *Illicium.*

Bael (*ba'-el*). Same as *Bela.*

Baer's Law. See *Law.* **B. Operations.** See *Operations, Table of.* **B. Plane.** See *Plane.*

Bag (*bag*) [AS., *bælg*]. 1. A sac. 2. The scrotum. **B., Barnes's.** See *Barnes's Dilators.* **B., Politzer's,** a soft rubber bag for inflating the internal ear. **B. of**

Waters, the fetal membranes enclosing the liquor amnii, projecting through the *os uteri* early in labor. The sac usually ruptures when the cervix is dilated.

Bagnio (*ban'-yo*) [It., *bagno*]. 1. A house of prostitution. 2. A bath-house.

Bailey's Flask. In dentistry, an apparatus for making metal dies. It consists of two semi-elliptic rings of iron—one nearly straight, the other a truncated cone with four keys—jointed so as to fit together. The straight ring is used as a casting-box for the sand as well as a form for the lead; the other gives the proper shape to the zinc.

Baillarger's Lines. See *Lines, Table of.* **B. Streak.** Same as *Baillarger's Lines.*

Bain-Marie (*bān-mah-re'*) [Fr.]. An instrument for immersing solutions, microörganisms, etc., in water or chemical solutions, thus keeping them at a desired temperature.

Bain's Method. See *Treatment, Methods of;* also *Artificial Respiration.*

Bakers' Itch. An eczematous affection of the hands, caused by the irritation of the yeast. **B. Salt**, a synonym of smelling salts, or the subcarbonate of ammonia; it is sometimes used by bakers in leavening cakes.

Baker's Leg, knock-knee, or *genu valgum.* **B. Operations.** See *Operations, Table of.* **B. Pins**, heavy pins used to hold bone surfaces in apposition after resection of a joint.

Balance (*bal'-ans*) [*bilanx*, a balance]. 1. A device or apparatus for weighing; an indispensable adjunct of the art of pharmacy. 2. The harmonious adjustment of corresponding parts.

Balanic (*bal'-an-ik*) [βάλανος, the glans penis]. Pertaining to the gland of the penis or of the clitoris.

Balanism (*bal'-an-izm*) [βάλανος, acorn; pessary; the glans penis]. The application of a pessary or suppository.

Balanitis (*bal-an-i'-tis*) [βάλανος, the glans penis; ιτις, inflammation]. Inflammation of the glans penis, sometimes called *Balano-posthitis.* Phimosis is a frequent complication. See *Posthitis.*

Balanoblennorrhea (*bal-an-o-blen-o-re'-ah*) [βάλανος, the glans; βλέννος, mucus; ῥοία, a flow]. Gonorrheal balanitis.

Balano-chlamyditis (*bal-an-o-klam-id-i'-tis*) [βάλανος, the glans penis; χλαμύς, cloak; ιτις, inflammation]. Inflammation of the glans and preputium of the clitoris.

Balanoplasty (*bal'-an-o-plas-te*) [βάλανος, the glans penis; πλάσσειν, to form]. Plastic surgery of the glans penis.

Balanoposthitis (*bal-an-o-pos-thi'-tis*) [βάλανος, the glans penis; πόσθη, prepuce; ιτις, inflammation]. Inflammation of the glans penis and of the prepuce.

Balanorrhagia (*bal-an-or-a'-je-ah*) [βάλανος, the glans penis; ῥήγνυσθαι, to burst out]. Gonorrheal balanitis, with copious discharge of pus.

Balanorrhea (*bal-an-or-e'-ah*) [βάλανος, the glans penis; ῥοία, a flow]. Balanitis.

Balantidium (*bal-an-tid'-e-um*) [βαλαντίδιον, dim. of βαλάντιον, a bag]. A genus of Protozoa. **B. coli**, a protozoan parasite that inhabits the pig, and has been found in the human intestine. See *Parasites, Animal, Table of.*

Balanus (*bal'-an-us*) [βάλανος, an acorn]. 1. The glans of the prepuce or of the clitoris. 2. A pledget, suppository, or pessary.

Balata (*bal'-at-ah*) [Native Guiana]. The dried, milky juice of the bully-tree (*Sapota milleri*) of Guiana. In its properties it is intermediate between caoutchouc and gutta-percha, and is used chiefly in England as a substitute for these materials.

Balaustine (*bal-aws'-tin*) [βαλαύστιον, the flower of the wild pomegranate]. The flower of the *Pomegranate, q. v.*, formerly used in medicine.

Balbuties (*bal-bu'-she-ēz*) [*balbutire*, to stammer]. Stammering.

Bald (*bawld*) [ME., *balde*, bald]. Wanting hair. A term applied to one who has lost the hair of the scalp. **B. Ringworm.** See *Tinea tonsurans.*

Baldness (*bawld'-nes*) [ME., *balde*, bald]. Alopecia, whether congenital or acquired. When the loss of hair is circumscribed it is called *tinea decalvans;* when general, it is called *alopecia.* Senile baldness is called *calvities. Premature baldness* is caused by disease. See *Alopecia.*

Bâle Blue. See *Pigments, Conspectus of.* **B. Green.** Same as *Schweinfurt Green.*

Balfour's Test. See *Death, Signs of.* **B.'s Treatment.** See *Treatment, Methods of.*

Ball (*bawl*) [ME., *bal*]. 1. In veterinary medicine, a pill or bolus. 2. Vulgarly, a testicle. **B.-blue.** Same as *Prussian Blue.* **B.-and-Socket Joint.** See *Diarthrosis* and *Enarthrosis.* **B. Thrombus.** See *Thrombus.*

Ballast Fever (*bal'-ast fe'-ver*). See *Fever.*

Ballet-dancer's Cramp. See *Cramp.*

Balling's Saccharometric Beer-test. As by fermentation, 100 parts of malt-extract yield 50 parts of alcohol, twice the quantity of alcohol found will indicate the quantity of malt-extract necessary for its formation. This quantity of malt-extract added to that still existing in the beer indicates the whole of the malt-extract existing in the wort before fermentation.

Ballingall's Operation. See *Operations, Table of.*

Ballismus (*bal-iz'-mus*) [βαλλισμός, a leaping]. 1. Chorea. 2. Paralysis agitans.

Ballonnement (*bal-lōn-mon(g)*) [Fr.]. The ballooning or distending of a part for operative or diagnostic purposes.

Balloon (*bal-oon'*) [Mod. E., *baloon*, a large bag]. In chemistry, a spherical glass receiver with a short neck. **B. Sickness.** See *Anoxyemia* and *Hypsonosus.*

Ballooning (*bal-oon'-ing*) [Mod. E. *baloon*, a large bag]. Surgical distention of the vagina by air-bags or water-bags.

Ballota (*bal-o'-tah*) [βαλλωτή, black hoarhound]. A genus of labiate plants. **B. nigra**, or black hoarhound, was formerly much used in medicine. **B.** (or **Hyptis**) **suaveolens**, of the E. and W. Indies, has been lately introduced into general practice as a powerful and yet safe nervin, antilithic, diuretic, evacuant, and laxative remedy. Unof. **B. lanata**, of N. Asia, has similar uses. Unof.

Ballottement (*bal-ot'-mon(g)*) [Fr., from *ballotte*, a ball]. A method of diagnosticating pregnancy from the fourth to the eighth month. A push is given the uterus by the finger inserted into the vagina, and if the fetus be present, it will rise and fall again like a heavy body in water.

Ball's Operations. See *Operations, Table of.*

Balm (*bahm*) [*balsamum*, a balsam]. A popular synonym of *balsamum.* Any soothing application or ointment. **B. of Gilead.** See *Balsam, Abies,* and *Melissa.*

Balmony (*bal'-mo-ne*) [origin uncertain]. The herb *Chelone glabra;* cathartic and anthelmintic. Dose of the fld. ext. ʒ ss–j. *Chelonin*, the concentrated ext. Dose gr. j–iv. Unof.

Balneography (*bal-ne-og'-ra-fe*) [*balneum*, a bath; γράφη, a writing]. A treatise on bathing.

Balneology (*bal-ne-ol'-o-je*) [*balneum*, a bath; λόγος, science]. The science of baths and their effects upon the system.

Balneotherapeutics (*bal-ne-o-ther-ap-u'-tiks*). See *Balneotherapy*.

Balneotherapy (*bal-ne-o-ther'-ap-e*) [*balneum*, a bath; *θεραπεία*, healing]. Systematic bathing for therapeutic purposes, or the treatment of disease by baths or bathing.

Balneum (*bal'-ne-um*) [L.]. A bath. See *Bath*. **B. arenæ**, a sand bath. See *Ammotherapy*. **B. lacteum**, a milk bath. **B. luteum**, a mud-bath. See *Illutation*. **B. pneumaticum**, an *Air-bath*, *q. v.*

Balonea (*bal-o'-ne-ah*). See *Valonia*.

Balsam (*bawl'-sam*) [*βάλσαμον*, the resin of the balsam tree]. The resinous, volatile, aromatic substance, liquid or concrete, obtained from certain trees by natural exudation or by artificial extraction. Balsams are divided into two classes, those with, and those without, benzoic and cinnamic acids. In general they are mixtures of various essential oils, resins, and acids. **B. Apple**, the plant *Momordica balsamina*, and its warty, gourd-like fruit. It is purgative, but its tincture is chiefly used in domestic medicine as a vulnerary. Unof. **B. Bog**, a singular stone-like, woody, umbelliferous plant, *Bolax* or *Azorella glebaria*, of the Falkland Islands and Patagonia. Its aromatic gum is locally prized as a vulnerary, desiccative, and anti-gonorrheal remedy. Unof. **B., Canada**, a turpentine gathered from the natural blisters of the bark of *Abies balsamum*. It is much used as a mounting medium by microscopists. **B. of Copaiba.** See *Copaiba*. **B. of Fir.** Same as *Canada Balsam*. See *Abies*. **B., Friar's.** See *Benzoin*. **B. of Gilead**, the balm of the Old Testament; an oleo-resin obtained from the *Balsamodendron gileadense*. **B. of Peru**, the balsam obtained from *Toluifera pereiræ;* antiseptic, stimulant to the circulation, and sedative to the nervous system; generally a tonic, and expectorant in bronchitis. Applied locally it is useful in chronic inflammatory skin-diseases. Dose of the emulsion ♏x–xxv. **B.-root**, a popular name for certain composite-flowered plants of the genus *Balsamorrhiza*. *B. hookerii*, *B. macrophylla*, *B. sagittata* are common in the Pacific States and are rich in a resinous balsam. Unof. **B. of Tolutan, or of Tolu**, obtained from *Toluifera balsamum*. Its properties are due to a volatile oil, *toluene*. It possesses an agreeable odor, and is a basis for many cough-mixtures. It is a fair expectorant. *T. Tinct.* contains ten per cent. of the balsam in 90 per cent. of alcohol. Dose ♏x–xxx. *T. Syr.*, balsam four parts; simple syrup 96. Dose ʒj–ij.

Balsamation (*bawl-sam-a'-shun*) [*βάλσαμον*, the resin of the balsam tree]. Embalmment with balsamic or aromatic spices.

Balsamic (*bawl'-sam-ik*) [*βάλσαμον*, the resin of the balsam tree]. Having the nature or qualities of a balsam.

Balsamine (*bawl-sam-in*) [*βάλσαμον*, balsam]. Any plant of the genus *Impatiens*, *q. v.*

Balsamito (*bawl'-sam-e'-to*) [Sp.]. A tincture of balsam of Peru in rum; anthelmintic, diuretic, and tonic; it is used externally as a cosmetic and a stimulant wash for sores. Unof.

Balsamodendron (*bawl-sam-o-den'-dron*). See *Myrrh* and *Bdellium*.

Balsams (*bawl'-samz*) [*βάλσαμον*, the resin of the balsam tree]. The natural, thick solutions of the gum resins in the essential oils and turpentines. See *Resins*.

Balsamum (*bal'-sam-um*) [*βάλσαμον*, balsam: *gen.*, *Balsami*]. A balsam, *q. v.* **B. dipterocarpi.** See *Gurjun Balsam*.

Balser's Fatty Necrosis. See *Diseases, Table of*.

Bambalia (*bam-ba'-le-ah*) [L.]. Stammering; thickness of speech, or other impediment to utterance.

Bamberger's Fluid. An albuminous mercuric compound used in the treatment of syphilis. It is made as follows: To 100 c.c. of a filtered solution of white of egg (containing 40 c.c. of albumin and 60 c.c. of water) there are added 60 c.c. of a solution of mercuric chlorid (containing 5 per cent., or 3 grams, of bichlorid of mercury) and 60 c.c. of a solution of sodium chlorid (containing 20 per cent.); finally, 80 grams of distilled water are added, which brings the bulk of the solution up to 300, containing 0.010 • mercuric chlorid in every cubic centimeter.

Bamboo (*bam-boo'*) [E. Ind., *bambu*]. A popular name for many tree-like, woody-stemmed grasses, especially those of the genus *Bambusa*. Apart from a limited use in surgery, none of the bamboos is employed in regular medicine. Locally, *B. arundinacea* is employed as an alterative, anthelmintic, and depurative. Unof. See also *Tafasheer*. **B. Brier**, the root of *Smilax sarsaparilla*, habitat, Southern United States. Its properties are identical with those of sarsaparilla. Dose of the fld. ext. ʒ ss–ij. Unof.

Banana (*ban-an'-ah*) [Sp.]. The root of the common banana, *Musa sapientum*, said to be a valuable alterative, and useful in strumous affections. Dose of the fld. ext. ♏x–xxx. Unof.

Band (*band*) [ME., *bande*]. That which binds. A stripe. A ligament. **B., Axis**, Baer's primitive streak. **B., Belly**, a band to pass around the abdomen. **B., Head**, a strap for securing a mirror to the forehead. **B., Horny, of Tarinus**, the fore part of the tenia semicircularis. **B., Moderator.** See *B., Reil's*. **B., Reil's**, a fibrous muscular fillet that frequently extends across the right ventricle of the heart; it is called also the *moderator band*. **B. of Remak.** See *Fiber, axial;* also *Purkinje, Axis Cylinder of*. **B. of Tarinus.** See *B., Horny*.

Bandage (*ban'-dāj*) [Fr., *bande*, a strip]. Bandages are usually strips of muslin or other material, of varying widths and lengths, used in surgery for the purpose of protecting, compressing, etc., a part, or for the retention of dressings and applications. A *simple bandage* or *roller* consists of one piece; a *compound*, of two or more pieces. *Starch*, *plaster-of-Paris*, *silica*, *dextrin*, *tripolith*, etc., etc., are used or recommended for making stiff and *immovable dressings or bandages*. According to their direction bandages are classed as: 1. *Circular*, circular turns about the part. 2. *Figure-of-8*, the turns crossing each other like that figure. 3. *Oblique*, covering the part by oblique turns. 4. *Recurrent*, the turns returning successively to the point of origin. 5. *Spica*, the turns resembling the arrangement of the husks of an ear of corn. 6. *Spiral*, each turn covering one-half of the preceding. 7. *Spiral reverse*, the bandage is reversed in order to better adapt it to the part. Bandages are also classed according to the part to which they are applied. Of **Bandages of the head** we have: 1. *Circular, of the forehead*, to retain dressings upon the head. 2. *Circular, of the eyes*. 3. *Crossed, of the eyes*, to hold dressings upon one or both eyes. 4. *T., of the eye*, a small piece of muslin cut in the shape of a right-angled triangle, and sufficiently large to cover the eye, is sewn by its base, with the perpendicular toward the ear, to a horizontal strip of a length to encircle the head. The apex of the triangle is sewn to a vertical strip long enough to pass under the jaw and meet the horizontal strip on the opposite side. 5. *Crossed, of the angle of the jaw*, to support the parts in fracture of the angle of the jaw. 6. *Knotted, of the head*, a double-headed roller with compress, to make compression in wound of the temporal artery. 7. *Recurrent, of the head*, a single-headed or double-headed roller, to

Spiral Bandage of the Finger.

Spica of the Foot.

retain dressings upon the head. 8. *Four-tailed, of the head*, a piece of cloth eight inches wide and long enough to pass over the head and under the chin, is torn from either end to within three or four inches of the middle. The body of the bandage is placed on the top of the head, the posterior ends are tied under the chin, and the two anterior ends carried backward and tied at the nape of the neck. 9. *Gibson's, for the body of the lower jaw*, to support the parts in fracture. 10. *Rhea Barton's*, for the same purpose. 11. *Capeline* or *Mitra Hippocratis ;* made by a *double-headed roller* (one which is rolled from each end, the two heads lying on the same side of the bandage and being of equal size). One roll being taken in each hand, the intervening strip is applied low down over the center of the forehead, and the bandage unrolled on either side until the two heads meet posteriorly below the occipital protuberance. From this point the two rollers are applied in different directions, one passing continuously around the head in a circle, the other forward and backward over the cranium until the latter is entirely covered. 12. *Galen's six-tailed bandage;* the bandage is so arranged that it has three strips at each end. The middle portion is placed on the crown of the head, the anterior ends are tied at the back of the neck, the middle under the chin, and the posterior at the forehead. 13. *Garretson's*, a bandage for the lower jaw, passing above the forehead and back again to cross under the occiput, and finally ending in front of the chin. 14. *Pressure-bandage*, an eye-bandage applied with a considerable degree of firmness in order to afford pressure. 15. *Protective-bandage*, a bandage for the eye, lightly applied. 16. *Hamilton's*, a form of compound bandage for the lower jaw, consisting mainly of a firm leather strap to support the jaw. 17. *Liebreich's*, a variety of bandage for the eye, made from a knitted-cotton band. 18. *Thillaye's*, a compound bandage for joining the edges of the wounds in hare-lip operation. Of **Bandages of the trunk** there are: 1. *Circular, of the neck.* 2. *Figure-of-8, of the neck and axilla*, to retain dressings upon the shoulder or in the axilla. 3. *Anterior figure-of-8, of chest*, to draw the shoulder forward and to retain dressings on the anterior surface of the chest. 4. *Posterior figure-of-8, of chest*, to draw the shoulders back in fractured clavicle, or to retain dressings on the posterior surface of the chest. 5. *Crossed, of one or both breasts*, to support the breasts in excessive lactation or in mammary disease. 6. *Spica, of shoulder*, to retain the head of the humerus in place after dislocation. 7. *Spiral, of the chest*, to make compression in fracture of the sternum or ribs. 8. *Circular, of the abdomen*, to support the abdominal walls. 9. *Spiral, of the abdomen*, to compress the abdominal walls or to retain dressings. 10. *Spica, of one or both groins*, to compress groin or retain dressings. 11. *Spiral reverse, of the penis*, to retain dressings upon this organ. The **Bandages of the arm** are: 1. *Circular, of the wrist.* 2. *Figure-of-8, of wrist*, to compress the joint or retain dressings. 3. *Figure-of-8, of elbow.* 4. *Circular, of arm or forearm.* 5. *Oblique, of arm or forearm.* 6. *Spiral, of arm*, to retain dressings. 7. *Spiral reverse, of upper extremity*, to support the arm in dislocations, fractures, etc. 8. *Velpeau's*, used to support the arm in fracture of the clavicle, the neck, or acromial process of the scapula. The hand of the injured side being placed on the sound shoulder, an oblique turn is made from the axilla of the sound side, across the back of the chest to the opposite shoulder, covering the fracture, down under the elbow in front to axilla of the sound side, then across the back over the outside of the point of the elbow to the axilla of the sound side, thus continuing the oblique and circular turns alternately and advancing over the arm till it is held firmly. 9. *Desault's Apparatus*, consists of an axillary pad held by tapes about the neck, a sling for the hand, and two single-headed rollers. The forearm is placed at right angles with the humerus, held in place by many circular and oblique turns about the shoulder and body. 10. *Boyer's*, a form of apparatus consisting of a chest-belt, an arm-belt, and an axillary pad. It is used in treating fractured clavicles. The **Bandages of the hand** are: 1. *Spiral, of the finger.* 2. *Spiral, of all the fingers*, or *gauntlet.* 3. *Spiral, of palm*, or *demi-gauntlet.* 4. *Spica, of thumb.* All the bandages of the hand are used in cases of fracture or to retain dressings. The **Bandages of the lower extremity** are: 1. *Figure-of-8, of ankle*, to cover the part or retain dressings. 2. *Figure-of-8, of knee*, to cover the part or compress it. 3. *Figure-of-8, of thighs*, to compress the part after wounds or operations. 4. *Spica, of instep*, to compress the parts. 5. *Spiral reverse, of whole lower extremity*, to support the limb after fracture, etc. 6. *Baynton's*, a series of straps of adhesive plaster used in the treatment of chronic leg ulcers. 7. *Ribbail's*, a spica bandage of the foot. **B., Genga's.** See *B., Theden's.* **B., Heliodorus's.** The T-bandage. **B., Hippocrates'.** See *B., Capeline.* **B., Hueter's,** a spica bandage for the perineum. **B., Langier's,** a many-tailed paper bandage. **B., Larrey's,** a form of many-tailed bandage, the edges being glued together. **B., Maisonneuve's,** a variety of Plaster-of-Paris bandage, formed from cloths folded, these being supported by other bandages. **B. of the Poor.** See *Galen's Bandage.* **B., Recurrent,** *for stumps*, is used after amputations, to support the flaps. **B., Richet's,** a form of Plaster-of-Paris bandage to which a small amount of gelatin has been added. **B. of Scultetus,** a compound bandage, similar to a spiral reverse in appearance and action, used in compound fractures, so that the short pieces of which it is composed may be removed without motion of the limb. **T-Bandages** are compound, and resemble that letter; the menstrual napkin is an example. **B., Theden's,** a form of roller bandage applied from below upward over a graduated compress, to control hemorrhage from a limb. See *Handkerchief Dressing.*

Bandager (*ban'-da-jer*) [Fr., *bande*, a strip]. One skilled in the application of bandages. See *Dresser.*

Bandagist (*ban'-da-jist*) [Fr., *bande* a strip]. A maker of trusses, bandages, and other surgical appliances to be worn upon the person.

Banded Hair (*ban'-ded hār*). See *Ringed Hair.*

Bandl, Operation of. See *Operations, Table of.* **B., Ring of,** the superior limit of the cervical canal, in pregnancy at a level with the pelvic inlet, marking the boundary between the lower uterine segment and the rest of the uterus. It is about six inches above the os externum.

Bandolin (*ban'-do-lin*) [origin uncertain]. A mucilage made usually of quince-seeds, or of gum-tragacanth, used mainly as a paste for confining the hair and making it lustrous; it is called also *fixature.* See *Cydonium.*

Bandy Leg (*ban'-de leg*). Bow-leg, *q. v.*

Baneberry (*bān'-ber-e*). See *Actæa.*

Bang, Bhang, or **Bangue** (*bang*). See *Cannabis indica.*

Banian (*ban'-yan*) [Ar., *banyān*, a trader]. A South Asiatic fig-tree, *Ficus bengalensis*, remarkable for the development of roots and secondary trunks from its branches. Its juice is antodontalgic; the bark and seeds tonic, diuretic, and antipyretic. Unof.

Banks's Operations. See *Operations, Table of.*

Banting Treatment. See *Treatment, Methods of.*

Bantingism (*ban'-ting-izm*). [From *Banting*, the name of the inventor]. A method proposed for the reduction of corpulence, by abstinence from saccharine and farinaceous foods. See *Treatment, Methods of.*

Banyan (*ban'-yan*). See *Banian.*

Baobab Tree. See *Adansonia digitata.*

Baptin (*bap'-tin*) [βάπτισις, a dipping]. A moderately purgative glucosid, obtainable from *Baptisia tinctoria.*

Baptisia (*bap-tiz'-e-ah*) [βάπτισις, a dipping]. Wild Indigo. The root bark of *B. tinctoria* with properties due to an impure glucosid, the so-called *Baptisin.* It is laxative and stimulant in moderate doses; emetic and cathartic in large doses, and is valuable in amenorrhea, typhus and typhoid fevers. It is excellent for local application to indolent ulcers and gangrenous sores. **B., Extract.** Dose gr. j–x. **B., Ext. Fld.** Dose ɱij–xx. **B., Tinct.** Dose ɱv–xxx. Dose of the resin gr. j–v. All unof.

Baptisin (*bap'-tiz-in*) [βάπτισις, a dipping]. 1. A precipitate from the tincture of *Baptisia tinctoria*; antiseptic, evacuant, ecbolic, resolvent. Dose one to three grains. Unof. 2. A bitter glucosid obtainable from the plant, *Baptisia tinctoria*; it has little medicinal activity.

Baptitoxin (*bap-tit-oks'-in*) [βάπτισις, a dipping; τοξικόν, a poison]. A poisonous alkaloid obtained from *Baptisia tinctoria.* It hastens respiration and exaggerates vasomotor activity.

Baptorrhea (*bap-tor-e'-ah*) [βάπτος, infected; ῥέειν, to flow]. Any infectious discharge from a mucous surface, as gonorrhea.

Baptothecorrhea (*bap-to-the-kor-e'-ah*) [βάπτος, infected; θήκη, vagina; ῥέειν, to flow]. Gonorrhea in women.

Bapturethrorrhea (*bap-tu-rĕth-ro-re'-ah*) [βάπτος, infected; οὐρήθρα, urethra; ῥέειν, to flow]. Urethral gonorrhea; gonorrhea of men.

Baranilin (*bar-an'-il-in*) [βαρύς, heavy; *anilin*]. Heavy anilin oil. See *Heavy Oil* and *Creasote Oil.*

Baraquet (*bar-ah-kwet'*) [Fr.]. Synonym of *Influenza.*

Barb (*barb*) [*barba*, a beard]. 1. In biology, the retrorse tooth of an awn or prickle. 2. One of the narrow acute plates diverging from the rachis and going to form the vane of a feather.

Barba (*bar'-bah*) [L.]. The beard.

Barbadoes Leg (*bar-ba'-dōz leg*). See *Elephantiasis Arabum.* **B. Nut.** See *Purging Nut.* **B. Tar,** a form of bitumen (*q. v.*) formerly employed in medicine.

Barbaloin (*bar-bal'-o-in*) [*Barbadoes*; ἀλόη, aloe], $C_{17}H_{20}O_7$. The aloin derived from Barbadoes aloes.

Barbarossa's Pills. A mercurial preparation containing in addition rhubarb, scammony, musk, etc.

Barbasco (*bar-bas'-ko*) [*verbascum*, mullein]. A composite-flowered plant of tropical America, the *Clibadium biocarpum.* The stalks are used in preparing hair-washes, and are said to restore gray hair to its natural color. The plant is also used in eye-troubles. It is said to be very poisonous. Unof.

Barbellate (*bar-bel'-āt*) [*barbella*, dim. of *barba*, a beard]. In biology, applied to the bristles of the pappus of some compositæ when beset with short, stiff hairs, longer than when denticulate, but shorter than when plumose.

Barben Cholera (*bar-ben kol'-er-ah*). A form of poisoning resulting, in Central Europe, from the eating of the barb.

Barber's Itch (*bar'-berz ich*). The disease called *Tinea barbæ, Sycosis parasituria,* or *Tinea sycosis, q. v.*

Barberry (*bar'-ber-e*). See *Berberis.* **B. Gum,** a commercial name of certain varieties of gum-arabic.

Barber-Surgeon (*bar'-ber ser'-jun*) [*barba*, a beard; ME., *sourgeon*]. Formerly, a barber who also practised surgery.

Barbicel (*bar'-bis-el*) [*barbicella*, dim. of *barba*, a beard]. In biology, one of the fringes of a barbule of a feather.

Barbiers (*bar'-bērz*) [E. Ind.]. A paralytic affection common in India, and probably a myelitis. It is often confounded with beriberi.

Barbigerous (*bar-bij'-er-us*) [*barba*, a beard; *gerere*, to carry]. In biology, bearded; hirsute; coarsely pubescent; applied to petals.

Barbotine (*bar-bo-teen'*) [Fr., wormwood]. Levant worm-seed.

Barbule (*bar'-būl*) [*barbula*, dim. of *barba*, beard]. In biology, one of the fringes of the barb in a feather, going to make up the vane of the barb, as the barbs make the vane of the feather.

Barclay's Angles. See *Angle.* **B.'s Plane.** See *Plane.*

Barcoo (*bar'-koo*) [Australian]. A peculiar disease, marked by nausea and vomiting, common in Australia. Its cause is unknown. It is also called "Fly-sickness."

Bardana (*bar-da'-nah*) [L.]. The burdock. See *Lappa.*

Bardeleben's Operation. See *Operations, Table of.*

Bardenheuer's Operations. See *Operations, Table of.*

Barden's Operation. See *Operations, Table of.*

Baregin (*bar-a'-zhin*). See *Glaisin.*

Baresthesiometer (*bar-es-the-ze-om'-et-er*) [βάρος, weight; αἰσθησις, perception; μέτρον, a measure]. An instrument for estimating the weight-sense in disturbances of sensibility.

Baresthesiometric (*bar-es-the-ze-o-met'-rik*) [βάρος, weight; αἰσθησις, perception; μέτρον, a measure]. Relating to the baresthesiometer.

Bareswill's Solution. A solution for the detection of sugar in the urine. It consists of sulphate of copper, acid potassium tartrate and sodic hydrate. *See Tests, Table of.*

Barford's Test. See *Tests, Table of.*

Baric (*ba'-rik*) [βάρος, heavy]. Pertaining to or containing barium.

Barilla (*bar-il'-ah*) [Fr., *barille*, impure soda]. Impure sodium carbonate; being the ashes obtained by burning various chenopodiaceous plants of the genera *Salicornia* and *Salsola.*

Barium (*ba'-re-um*) [βάρος, heavy]. Ba = 136.8; quantivalence II. A metal of the alkaline group, of pale yellow color, characterized by a strong affinity for oxygen. Neither the metal nor its salts are much employed in medicine; all are poisonous. **B. Carbonate,** $BaCO_3$, used in the preparation of the chlorid. **B. Chlorid,** $BaCl_2.2H_2O$, soluble, used as a reagent, and also as a cardiac and vasomotor stimulant in the treatment of aneurysm. Dose gr. ss–v. **B. Chlorid Test.** See *Tests, Table of.* **B. dioxid.** BaO_2, used for making aqua hydrogenii dioxid. **B. Iodid,** formerly used as an alterative. Dose gr. ½. Mainly employed in ointments. Unof. **B. monohydrate,** caustic baryta; reagent. **B. oxid,** BaO, baryta. **B. sulphate,** $BaSO_4$, used as a pigment; formerly used in the treatment of skin-diseases, and in lotions.

Bark (*bark*) [ME., *barke*]. The cortex or covering surrounding the wood of exogens. It is sometimes used as a synonym of cinchona or calisaya bark. **B. Peruvian.** See *Cinchona.* (For other barks, see the names of the plants or trees that produce them.)

Barker's Operations. See *Operations, Table of.*

Barking (*bar'-king*). [ME., *barken*, to bark.] The uttering of a peculiar sharp, short cry, as a dog. See

Aboiement. **B. Disease,** a guttural, barking cough, with nervous disorder and impairment of the will; cynobex hebetis.

Barleria (*bar-le'-re-ah*) [L.]. A genus of acanthaceous plants. **B. buxifolia** and **B. ciliata,** of India, are aperient. **B. prionitis,** of S. Asia, is employed as a polychrest. Unof.

Barley (*bar'-le*) [ME., *barly*]. A cereal belonging to the order *Gramineæ;* the most common variety, *Hordeum distichon,* is much used as a food, and also in the preparation of malt. **B. Decoct.** (B. P.). Dose ℥j–iv. **B. Pearl,** is the decorticated grain, rounded and polished. **B. Water,** *decoctum hordei,* a decoction consisting of two ozs. of Pearl B. boiled in one and one-half pints of water and afterward strained. See *Ptisan.* **B. Sugar,** *saccharum hordeatum;* practically a glucose. Applied also to an amorphous mass obtained by melting cane-sugar.

Barnes's Curve. In obstetrics, the segment of a circle, having for its center the sacral promontory, its concavity looking backward. **B.'s Dilators,** graduated rubber bags used for dilating the cervix uteri in the induction of abortion or premature labor. **B.'s Method.** See *Treatment, Methods of.*

Barograph (*bar'-o-graf*) [βάρος, weight; γράφειν, to record]. A self-registering barometer.

Baromacrometer (*bar-o-mak-rom'-et-er*) [βάρος, weight; μακρός, long; μέτρον, measure]. An apparatus for ascertaining the weight and length of new-born infants.

Barometer (*bar-om'-et-er*) [βάρος, weight; μέτρον, a measure]. An instrument for determining the weight and tension of the atmosphere. It consists essentially of a glass tube about 36 inches long, closed at one end, filled with mercury, and inverted in a basin of mercury. The mercury will sink in the tube until it rests at a height of about 30 inches at the sea-level, the height varying as the atmospheric pressure increases or diminishes. **B., Aneroid,** a metallic box from which the air has been exhausted, the tension being indicated by the collapsing or bulging of the thin corrugated cover, which is connected with a movable index. **B.-maker's Disease,** a form of chronic mercurial poisoning among the workmen who make barometers. It is due to the inhalation of the fumes of mercury.

Barometrograph (*bar-o-met'-ro-graf*). See *Barograph.*

Baroscope (*bar'-o-skōp*) [βάρος, weight; σκοπεῖν, to observe]. An instrument used for determining the loss of weight of a body in air, compared with its weight in a vacuum. A form of baroscope has been invented by Esbach for the quantitative determination of urea.

Barosma (*bar-oz'-mah*) [βάρος, heavy; ὀσμή, smell]. A plant of the order *Rutaceæ,* native to the Cape of Good Hope and vicinity; several species of which yield the Buchu of commerce.

Barosmin (*bar-oz'-min*) [βάρος, heavy; ὀσμή, smell]. A precipitate from the tincture of *Barosma crenata.* Dose grs. ij–iij. Unof.

Barras (*bar'-as*) [Fr.]. Turpentine obtained in the S. of France, chiefly from *Pinus pinaster.*

Barrel-shaped Chest. See *Emphysema.*

Barrenness (*bar'-en-nes*) [ME., *bareynesse*]. Sterility in the female.

Barrier's Method. See *Treatment, Methods of.*

Barruel's Apparatus. An arrangement for charging water with carbonic acid.

Barsac (*bar-sahk'*) [Fr.]. A white French wine, often with a bitter-sweet, resinous flavor.

Bartholin, Canal of. See *Duct.* **B., Duct of.** See *Duct.* **B., Foramen of.** See *Foramina, Table of.* **B., Glands of.** See *Gland.*

Bartholinitis (*bar-tho-lin-i'-tis*) [*Bartholin,* a Danish physician; ιτις, inflammation]. Inflammation of the vulvo-vaginal gland.

Bartisch's Operation. See *Operations, Table of.*

Bartlett's Apparatus. A splint or dressing for fracture of the clavicle with dislocation.

Barton's Bandage. See *Bandage.* **B. Fracture.** See *Fracture and Diseases, Table of.* **B. Handkerchief,** a form of temporary dressing for a wound. See *Handkerchief Dressing.* **B. Operations.** See *Operations, Table of.*

Baruria (*bar-u'-re-ah*) [βάρος, heavy; οὖρον, urine]. Abnormally high specific gravity of the urine; also the condition of the body associated therewith.

Barwell's Apparatus. An apparatus for the treatment of talipes by means of continuous traction on the foot. **B. Operations.** See *Operations, Table of.*

Barwood Red. See *Pigments, Conspectus of.*

Baryacoia (*bar-e-ak-oi'-ah*). See *Baryecoia.*

Baryecoia (*bar-e-ek-oi'-ah*) [βαρυηκοία, hardness of hearing]. Hardness of hearing; partial deafness.

Baryencephalia (*bar-e-en-sef-a'-le-ah*) [βαρύς, heavy; ἐγκέφαλος, brain]. Dulness of intellect.

Baryglossia (*bar-e-glos'-e-ah*) [βαρύς, heavy; γλῶσσα, a tongue]. Thick, slow utterance.

Barylalia (*bar-e-la'-le-ah*) [βαρύς, heavy; λαλιά, speech]. Thickness and dulness of speech; baryphonia.

Barymastia (*bar-e-mas'-te-ah*) [βαρύς, heavy; μαστός, breast]. Same as *Barymazia.*

Barymazia (*bar-e-ma'-ze-ah*) [βαρύς, heavy; μαζός, breast]. Heaviness or large size of the mammæ.

Baryodmia (*bar-e-od'-me-ah*) [βαρύς, heavy; ὀδμή, odor]. A heavy, disagreeable odor; also a subjective sensation as of a disagreeable smell.

Baryodynia (*bar-e-o-din'-e-ah*) [βαρύς, heavy; ὀδύνη, pain]. Severe pain.

Baryphonia (*bar-e-fo'-ne-ah*) [βαρύς, heavy; φωνή, a voice]. A difficulty of speech.

Baryphonic (*bar-e-fon'-ik*) [βαρύς, heavy; φωνή, voice]. Affected with baryphonia.

Barysomatia (*bar-e-so-ma'-she-ah*) [βαρύς, heavy; σῶμα, body]. Excess in the weight of the body.

Baryta, or **Barytes** (*bar-i'-tah,* or *bar-i'-tes*) [βαρύς, heavy]. Oxid of barium. See *Barium.* **B. Green.** Same as *Manganese Green.*

Barythymia (*bar-e-thim'-e-ah*) [βαρύς, heavy; θυμός, mind]. A melancholy, gloomy, or sullen state of mind.

Basaal (*ba'-sa-al*) [Malay]. An East Indian tree, *Embelia basal;* its fruit is a vermifuge; its leaves are soothing and demulcent. Unof.

Basad (*ba'-sad*) [βάσις, a foundation]. Toward the basal aspect.

Basal (*ba'-sal*) [βάσις, a foundation]. Pertaining to or located at the base. See *Basilar.* **B. Ganglia.** See *Ganglion.*

Basanastragala (*bas-an-as-trag'-al-ah*) [βάσανος, torture; ἀστράγαλος, heel, ankle]. Gout in the heel or ankle.

Basculation (*bas-ku-la'-shun*) [Fr., *basculer,* to swing]. The movement by which retroversion of the uterus is corrected when the fundus is pressed upward and the cervix drawn downward.

Bascule Movement (*bas'-kūl moov'-ment*) [Fr., *bascule,* a swing]. The recoil of the heart in its systolic motion.

Base (*bās*) [βάσις, a foundation]. The lower part, as, the *base* of the brain. In chemistry, an element or radicle that combines with an acid to form a salt. The electro-positive molecule or radicle of a compound. In dentistry, the plate upon which artificial teeth are held. In pharmacy, the most important part of the prescription.

In microscopy, the portion of the stand of a microscope upon which it rests. It is important for steadiness. In electro-therapeutics, the part of a battery upon which are fastened the coil-posts and switches. **B., for Artificial Teeth;** in the construction of a base for artificial teeth, a transfer or model of plaster-of-Paris is first obtained. Then a metallic die and counter-die, if the base is to be of metal, are procured, and between these a plate of suitable size and thickness is swaged. See *Metallic Base* and *Vulcanite Base.* **B., Organic,** a term including a large number of organic compounds, especially nitrogen compounds, which, like ammonium, unite with acids to form salts. They are commonly called *alkaloids.*

Base-ball Pitcher's Arm, a peculiar condition of the arm arising from over-use, characterized by loss of strength, tenderness, neuralgic pains, and inflammation and hypertrophy of the bone.

Basecphysis (*bas-ek'-fiz-is*) [βάσις, a base, a foot; ἐκφύσις, a growing out, a shoot]. In biology, a branch springing from the basal joint, as in the limbs of crustacea. Synonyms *Exognathite, Exopodite.*

Basedow's Disease. An exophthalmic bronchocele; called also, Exophthalmic Goiter, and Graves' Disease. See *Goiter* and *Diseases, Table of.*

Basement (*bās'-ment*) [Fr., *bassement*]. The fundamental portion. **B. Membrane.** See *Membrane.* **B. Tissue.** See *Tissue.*

Bas Fond (*bah fon(g)*) [Fr.]. The floor of the urinary bladder.

Basham's Mixture. Mistura ferri et ammonii acetatis. **B. Test.** See *Tests, Table of.*

Basial (*ba'-ze-al*) [βάσις, a foundation]. Relating to a base, as to the basion.

Basi-alveolar (*ba-se-al-ve'-o-lar*) [βάσις, foundation; *alveolus*, a little trough]. Relating to the basion and the alveolar point.

Basiarachnitis (*ba-se-ar-ak-ni'-tis*) [βάσις, foundation; ἀράχνη, a spider; ιτις, inflammation]. Inflammation of that part of the arachnoid that corresponds to the base of the skull.

Basiator (*ba-ze-a'-tor*) [*basiare*, to kiss]. The orbicularis oris muscle. See *Muscles, Table of.*

Basibracteolate (*ba-se-brak'-te-o-lāt*) [*basis*, a base; *bracteola*, a little bract]. In biology, having the base surrounded by bracts, as the dandelion.

Basibranchial (*ba-se-brang'-ke-al*) [*basis*, a base; *branchiæ*, gills]. In biology, applied to the one or more skeletal pieces forming the base of gills or branchiæ.

Basic (*ba'-sik*) [βάσις, a foundation]. Having properties the opposite of those of acids. An acid capable of uniting with a single monad atom or radical is called *monobasic.* One that will unite with two monad or one dyad atom or radical, etc., is said to be *dibasic.* This measure of the power of an acid is called its **basicity. B. Blue.** Same as *Spirit Blue.*

Basicerite (*bas-is'-er-īt*) [βάσις, base; κέρας, horn]. The second joint of the antenna in a crustacean.

Basicity (*bas-is'-it-e*) [βάσις, foundation]. 1. The quality of being basic. 2. The combining power of an acid.

Basicranial (*ba-se-kra'-ne-al*) [βάσις, foundation; κρανίον, the skull]. Relating to the base of the skull. **B. Axis,** a line running from a point midway between the occipital condyles through the median plane to the junction of the ethmoid and presphenoid.

Basidigital (*ba-se-dij'-it-al*) [βάσις, foundation; *digitus*, a finger]. Pertaining to the bases of the digits. **B. Bone,** any metacarpal, or metatarsal bone.

Basidiogenetic (*bas-id-e-o-jen-et'-ik*) [*basidium*, a spore-producing cell; γένεσις, origin]. In biology, produced on a basidium.

Basidiospore (*bas-id'-e-o-spōr*) [*basidium*, a spore-producing cell; σπορά, seed]. One of the spores produced upon a basidium.

Basidium (*bas-id'-e-um*) [dim. of βάσις, a base: *pl.*, *Basidia*]. In biology, a large cell in the higher fungi, borne on the hymenium and producing spores at its free end.

Basifacial (*bas-e fa'-shal*) [*basis*, foundation; *facies*, face]. Pertaining to the lower portion of the face. **B. Axis,** in craniometry, a line from the anterior point of the premaxilla to the anterior point of the basicranial axis.

Basifixed (*ba'-se-fikst*) [*basis*, base; *fixus*, fixed]. In biology, attached by the base.

Basifugal (*bas-if'-u-gal*) [*basis*, a base; *fugere*, to flee]. In biology, derived from, or proceeding away from the base; acropetal; centrifugal.

Basigynium (*bas-ij-in'-e-um*) [βάσις, a base; γυνή, a female: *pl.*, *Basigynia*]. See *Gynophore.*

Basihyal (*bas-e-hi'-al*) [*basis*, base; ὑοειδής, shaped like the letter upsilon]. Either one of the two bones, one on each side, that form the principal part of the body of the hyoid arch.

Basihyoid (*bas-e-hi'-oid*). See *Basihyal.*

Basil (*ba'-sil*) [βασιλικός, royal]. A kind of mint, *Ocymum basilicum*; aromatic and carminative. The name is given to other related plants. Unof.

Basilad (*bas'-il-ad*) [βάσις, foundation]. Toward or to the base or basilar aspect.

Basilar (*bas'-il-ar*) [βάσις, base]. Pertaining to the base, usually of the skull. **B. Artery,** the artery extending between the borders of the Pons Varolii; through its branches it supplies the substance of the pons. See *Arteries, Table of.* **B. Aspect,** the view of the head looking toward the base of the skull. **B. Membrane,** a membranous division-wall separating the scala vestibuli from the scala tympani, extending from the base to the apex of the cochlea, and supporting the organ of Corti. **B. Process,** a strong quadrilateral plate of bone in front of the foramen magnum. **B. Suture,** the suture formed by the junction of the basilar surface of the occipital bone with the posterior surface of the body of the sphenoid.

Basilary (*bas'-il-a-re*). See *Basilar.*

Basilateral (*bas-e-lat'-er-al*) [*basis*, base; *latus*, side]. Both basilar and lateral.

Basilen (*bas'-il-en*) [*basis*, base]. Belonging to the basilar portion in itself.

Basilic (*bas-il'-ik*) [*basilicus; βασιλικός*, royal]. Any structure or medicine of importance (obsolescent). **B. Vein,** a large vein of the arm on the inner side of the biceps. See *Vein.*

Basilicon Ointment (*bas-il'-ik-on oint'-ment*). An ointment composed of yellow wax, yellow resin, and Burgundy pitch āā 1 lb., olive oil fl. ℥xvj, to which, when melted, turpentine ℥iij are added. It is called also the "four drug" ointment. There are several other ointments bearing this name. See *Resina.*

Basilo-bregmatic (*bas-il-o-breg-mat'-ik*) [βάσις, foundation; βρέγμα, the sinciput]. Pertaining to the base of the skull and the bregma.

Basilo-mental (*bas-il-o-men'-tal*) [*basis*, base; *mentum*, the chin]. Pertaining to the base of the skull and to the chin.

Basil-thyme (*ba'-sil-tīm*) [βασιλικόν, royal; θύμον, thyme]. A European species of mint, *Calamintha acinos*; aromatic and calmative. Unof.

Basilysis (*bas-il'-is-is*) [βάσις, base; λύσις, a loosening]. The breaking up of the fetal skull in craniotomy.

Basilyst (*bas'-il-ist*) [βάσις, a base; λύσις, a loosening]. An instrument for use in craniotomy, designed

to perforate the cranial vault and break up the basé of the skull.

Basin (*ba'-sin*) [ME., *basin*]. 1. The third ventricle of the brain. 2. The pelvis. **B.-Trap.** A trap or seat in the outlet of the basin of a water-closet, placed there to prevent the entrance into the apartment of noxious and offensive vapors and gases.

Basinasal (*bas-e-na'-sal*) [*basis*, base; *nasus*, the nose]. Relating to the basion and the nasion.

Basinerved (*bas'-in-ervd'*) [*basis*, a base; *nervus*, nerve]. In biology, applied to a leaf having all the veins or nerves springing from the base.

Basi-occipital (*bas-e-ok-sip'-it-al*) [βάσις, base; *occiput*, the back of the head]. A bone, separate in many of the lower vertebrate animals, forming the central axis of the skull. In adult human life, it is the basilar process of the occipital bone.

Basiocestrum (*bas-e-o-ses'-trum*) [βάσις, base; κέστρον, a point]. A perforator for use in opening the fetal head in craniotomy.

Basio-glossus (*bas-e-o-glos'-us*) [βάσις, base; γλῶσσα, the tongue]. That part of the hyoglossus muscle that is attached to the base of the hyoid bone.

Basion (*ba'-se-on*) [βάσις, base]. In biology, a point of measurement in craniometry, located at the middle of the anterior margin of the foramen magnum. See *Craniometric Points.*

Basiophthalmite (*bas-e-off-thal'-mīt*) [βάσις, a base; ὀφθαλμός, eye]. In biology, the basal joint of the eye-stalk in a stalk-eyed crustacean.

Basiotic (*bas-e-ot'-ik*) [βάσις, base; οὖς, ear]. Relating to the base of the ear.

Basiotribe (*bas'-e-o-trīb*) [βάσις, base; τρίβειν, to grind or crush]. An instrument used in craniotomy for perforating or crushing the fetal head.

Basiotripsy (*bas-e-ot'-rip-se*) [βάσις, base; τρίβειν, to grind or crush]. The operation of crushing the fetal head.

Basipetal (*bas-ip'-it-al*) [*basis*, a base; *petere*, to seek]. In biology, applied to growth in plants from the apex toward the base.

Basipodite (*bas-ip'-o-dīt*) [βάσις, base; πούς (ποδ), foot]. The basal joint of an arthropod limb, or the joint between the first and third.

Basipterygial (*bas-ip-ter-ij'-e-al*) [βάσις, a base; πτερύγιον, a little wing, a fin]. At the base of the fin.

Basipterygoid (*bas-ip-ter'-ig-oid*) [βάσις, base; πτερύγιον, a little wing]. Relating to the base of the alisphenoid bone.

Basirostral (*bas-e-ros'-tral*) [*basis*, a base; *rostrum*, a beak]. In biology, having to do with the base of a bird's beak.

Basirrhinal (*bas-ir-i'-nal*) [βάσις, base; ῥίς, nose]. Relating to the base of the brain and to the nose. Applied to a cerebral fissure located at the base of the olfactory lobe.

Basis (*ba'-sis*) [βάσις, base]. Base, *q. v.* The Latin form is used to designate the lower or fundamental part of any organ, as *B. cerebri*, *B. cordæ*, etc.

Basiscopic (*bas-is-kop'-ic*) [βάσις, base; σκοπεῖν, to see]. Looking toward or on the side of the base.

Basi-sphenoid (*bas-e-sfe'-noid*) [βάσις, base; σφήν, wedge; εἶδος, form]. The lower part of the sphenoid bone.

Basisylvian (*bas-e-sil'-ve-an*) [*basis*, base; *Sylvius*, an anatomist]. Applied by Wilder to the transverse basilar portion or stem of the Sylvian fissure. See *Fissure*, *Table* (and *Diagram*).

Basitemporal (*bas-e-tem'-po-ral*) [*basis*, base; *tempora*, the temples]. Relating to the base or lower part of the temporal bone.

Basivertebral (*bas-e-ver'-te-bral*) [*basis*, base; *vertebra*, a joint]. Relating to the basis or centrum of a vertebra.

Basophile (*bas'-o-fil*). See *Basophilous.*

Basophilic (*bas-o-fil'-ic*) [βάσις, base; φιλέειν, to love]. Combining readily with bases; stainable by means of basic dyes.

Basophilous (*bas-off'-il-us*) [βάσις, base; φιλέειν, to love]. Stained by basic rather than by acid dyes (applied to certain cells and tissue-elements).

Bassalia (*bas-a'-le-ah*) [βάσσων-βάθυς, very deep; ἅλία, an assemblage]. In biology, a deep-sea realm distinguished by a characteristic fauna.

Bass-deafness (*bās-def'-nes*) [OF., *basse*, low; ME., *defen*]. Deafness to certain bass-notes, the perception of the higher notes being retained.

Bassia (*bas'-e-ah*) [*Bassi*, an Italian botanist]. A genus of E. Indian and African sapotaceous trees. The mahua, *B. latifolia*, is cultivated in India for its edible flowers, which afford on distillation an alcoholic drink. *B. longifolia* and *B. butyracea* afford a sort of vegetable butter. The bark and leaves of these three species are used in rheumatism. Unof.

Bassini's Operation. See *Operations, Table of.*

Bassora Gum (*bas'-o-rah-gum*). An inferior gum, much used in adulterating tragacanth.

Bassorin (*bas'-o-rin*) [*Bassora*, an Asiatic city], $C_6H_{10}O_5$, or $2C_6H_{10}O_5$. A tasteless, odorless vegetable mucilage, insoluble in cold water, but rendered soluble by alkalies; it is found in gum tragacanth (of Bassora) and in cherry and plum gums. See *Carbohydrates, Table of.*

Bast (*bast*) [AS., *bæst*, a lime-tree]. The inner bark of exogenous plants. The fibrous parts of the bark are used in making cordage, and have a limited use in surgery.

Bastard (*bas'-tard*) [*bastardus*, a bastard]. 1. Illegitimate. 2. In biology, having the appearance of being genuine.

Bastards (*bas'-tards*) [*bastardus*, a bastard]. The name given to an impure sugar procured by concentrating molasses and allowing it to crystallize slowly in moulds.

Bastelaer's Test. See *Tests, Table of.*

Bastose (*bas'-tōs*) [AS., *bæst*, a lime-tree]. A combination of cellulose and lignin, comprising a complete bundle of fibers, as in jute, or merely a covering upon the unaltered cellulose.

Basyl (*ba'-sil*) [βάσις, base; ὕλη, principle]. The electro-positive constituent of any compound.

Bat (*bat*) [ME., *bat*]. An instrument of great delicacy employed by Dr. Marshall Hall for the detection of minute air-currents issuing from the lungs of those apparently dead.

Bateman's Drops. The *tinctura pectoralis*, N. F.; a weak tincture of opium, camphor, and catechu; a popular remedy in coughs.

Bates's Operation. See *Operations, Table of.*

Bath (*bath*) [AS., *bæth*, a bath]. A bathing place or room. The medium in which the body is wholly or partly immersed. As therapeutic agents, baths are classified according as water, vapor, air, etc., is used; according to the temperature, as hot, temperate, cold, etc.; according to the end desired, as nutritional, medicinal, stimulant, etc. Special forms of bath are the moor, peat, mud-slime, pine-leaf, herb (hay, gentian, camomile, juniper, marjoram, etc.), brine, sand, tan, bran, malt, glue, soup, milk, whey, blood, wine, guano, starch, soap, acid, iron, sulphur, carbonic acid, compressed air, mustard, electric, etc. **B., Acid**, add 1½ ounces of nitric acid and 1 to 3 ounces of HCl to 30 gallons of warm water in a wooden or earthenware vessel, and immerse the patient in this for about 10 to

20 minutes. For a foot-bath, add ½ ounce of nitric acid and 1 ounce of HCl to 4 gallons of warm water. This is said to be useful in cases of dyspepsia with sluggish liver and constipation. **B., Air,** a bath in which but little water is employed, the body being exposed freely to the air. It is employed in those cases in which there is a tendency to catch cold from undue facility to perspire. **B., Alcohol,** one in dilute alcohol, used to reduce temperature in fever. **B., Alkaline,** add 3 ounces of potassium carbonate, or 6 of sodium carbonate, to 25 or 30 gallons of hot water. It is used in chronic squamous skin diseases, chronic rheumatism, and lithemia. It should be taken in a wooden, earthenware, or enamelled bath. **B., Arsenical,** baths at a temperature of from 90° to 97° F., containing a small quantity of arsenic. They are used occasionally in the treatment of rheumatoid arthritis. **B., Blanket,** a method employed in chronic nephritis to stimulate the diaphoretic action of the skin. The patient is placed in bed and closely wrapped in blankets, a hot poultice being applied at the same time to the loins, and renewed as often as it becomes cool. **B., Blood,** one consisting of the blood of an animal, freshly shed. **B., Bog,** a bath formed by mixing bog-earth (generated by the decomposition of plants in the presence of water and found at iron and sulphur springs) with warm water to form a pulpy or mushy consistence. This is used as a mud bath. **B., Borax,** borax, 4 ounces; glycerin, three ounces; water, thirty gallons. It is used in the same class of cases as the bran bath. **B., Bran,** boil one pound of bran in one gallon of water, strain, and add thirty gallons of water. This is a soothing and emollient bath, and is of service in squamous and irritable conditions of the skin. **B., Brand;** Cold bath. The tub is filled with water of 68°. The patient is given a stimulant of one-half to two ounces of brandy, the face and chest are laved with ice-water, and then he is gently placed in the water. The attendants should gently pass the flattened outstretched hands over successive parts of the body to dilate the superficial cutaneous vessels. Remove the patient as soon as the teeth begin to chatter, or if cyanosis of the lips or face appears. Usually the bath should be continued fifteen minutes. Then the patient is laid wet on a sheet and quickly wrapped from head to foot, then dried in five minutes and hot water applied to the feet. See *Treatment, Methods of.* **B., Chemical,** in chemistry, an apparatus for regulating the temperature of chemical processes by surrounding the substance with water, sand, oil, or mercury, through which the heat is communicated. **B., Cold.** See *B., Brand.* **B., Corrosive-sublimate,** made by adding mercuric chlorid three drams, and HCl one dram, to 30 gallons of water. It is sometimes of service in secondary syphilis and in certain skin-diseases. **B., Creasote,** composed of creasote three drams, glycerin four ounces, and water 30 gallons. It is used in squamous skin diseases. **B., Electro-therapeutic,** a bath furnished with suitable electrodes and used in the application of electricity for curative purposes. **B., Foot,** a bath for the feet only. This is used as a derivative agent in cases of cold, etc. **B., Full,** this consists of a tub about two-thirds full of water, the duration and temperature being adapted to the purpose in view. The patient's body may be entirely covered by water, so that his chin just clears it. **B., Gelatin,** dissolve one pound of common glue in hot water, and add the solution to the plain bath, or to the bran bath, and use in the same class of cases as the latter. **B., Graduated Full,** a modification of the Brand bath. The tub is filled with sufficient warm water to cover two-thirds of the recumbent body. The patient is then laid in and the temperature gradually lowered by the addition of cold or ice-water, while warm water is being removed. Friction is practised, as in the Brand bath. This bath lasts half an hour, and the water should be reduced to 68° as rapidly as possible. **B., Half,** the patient is seated in a tub containing eight or ten inches of water of a temperature suited to the case. A wet towel is tied around the head, and the bath water is poured and dashed over the back, head, and shoulders with the attendant's right hand, while friction is practised with the left, and the patient does the same on the anterior portion of the body. The temperature of the water may be lowered if a more decided impression is desired. The bath is continued for from five to twenty minutes with active friction. It is indicated in all fevers involving a depressed nervous system, as shown by ataxia, delirum, or coma. **B., Herb,** made by using the extract of pine-needles, or of some aromatic herbs. The bath is used as a tonic. **B., Hip.** See *B., Sitz.* **B., Hot,** the temperature ranges from 104° to 110° F. It acts upon the skin, producing free perspiration, and accelerates the pulse and respiration. **B., Hot-air;** Turkish bath; the patient is placed in a box (French method), his head being outside, and the box is filled with hot air furnished by a lamp. In the ordinary Turkish bath the patient is compelled to inhale the air within a closed compartment. Hot-air baths can be borne of a much higher temperature than vapor baths. They provoke more profuse sweating, and raise the temperature of the body to a greater extent. They are useful as a diaphoretic, and in catarrhal, neuralgic, and rheumatic conditions. They are contraindicated, as is also the vapor bath, in fatty degeneration of the heart. **B., Iron,** half an ounce of sulphate of iron to four gallons of water. Use in an earthenware or wooden vessel. This is valuable for strumous or rachitic children. **B., Medicated,** a bath in which medicinal substances, as mineral salt, sulphur, etc., are dissolved or held in suspension. **B., Mercurial,** for the treatment of syphilis. Calomel, 20 to 60 grains, or a mixture of 15 grains of calomel and 20 grains of cinnabar are fused over a water bath. The patient is stripped and enveloped in one or more blankets, or a mackintosh or India-rubber blanket lined with flannel. The lamp and mercury are placed under his chair, and the former lighted. In a few minutes perspiration is induced and the sublimed calomel is deposited upon the body. Twenty to thirty minutes are sufficient for a bath, after which the patient is allowed to cool off slowly. This is best taken before retiring. **B., Milk,** a bath in milk, for nutritive purposes. **B., Moor,** a bath in water mixed with the earth of moors. **B., Mud,** a bath prepared by mixing well-seasoned earths, containing more or less mineral matter, with water containing the same substances. The body is surrounded with this mixture at various temperatures from 90° to 100°. The patient is then rinsed with warm water. This is of value in some uterine diseases, and in obstinate rheumatism. **B., Mustard,** made by enclosing two to four ounces of ordinary mustard in a piece of muslin or thin linen and hanging it in about four gallons of hot water until the latter becomes yellow. It is used as a general bath for infants in collapse, convulsions, or severe bronchitis, the child being left in until the skin becomes distinctly reddened. It is also used as a foot or sitz-bath in amenorrhea. **B., Pack,** or **Sheet,** one in which the body is wrapped in cloths. **B., Permanent.** See *B., Warm.* **B., Pine,** prepared by adding a decoction

of pine-needles, or some pine extract, to hot water. It is mildly stimulating, and is employed in hysteria, gout, and rheumatism. **B., Rain,** consists of from four to six three-fourths circles of pipes secured together at a distance of two to three inches. Each pipe has three lines of fine perforations, from which the stream issues under pressure, striking the body of the patient at all points with considerable force. This may be used as a substitute for the dripping sheet. **B., Russian,** one in which the air of the room is saturated with steam by throwing water upon heated mineral or metallic substances, after which the bather is rubbed down, finishing with a cold douche. See *B., Vapor.* **B., Sand,** the body of the patient is surrounded in a tub with a layer of dry, warm sand that has been naturally or artificially heated, the temperature ranging from 95° to 120°. The duration of the bath is from one to one and a half hours. The head is wrapped in a wet towel and permitted to lie outside of the sand. The after-treatment is the same as that after a hot-air bath. This is of value as an emollient procedure. In chemistry, the immersion of a crucible, etc., containing a chemic compound in a vessel containing fine sand, the latter being heated gradually to a high temperature. **B., Sea-water,** more stimulating and tonic in its effects than fresh water. It may be given cold, tepid, or hot. It may be made away from the seashore by dissolving bay-salt or rock-salt in fresh water, four to nine pounds of salt to 30 gallons of water. It is useful in convalescence, chlorosis, and strumous diseases. **B., Sheet,** the application of cold water to the body through the medium of a sheet or towel of fine or coarse texture, placed upon the skin. The patient is wrapped in a linen sheet, wrung not quite dry out of water at a temperature of from 60° to 70°. A rubber cloth and a blanket are spread over the bed to protect it. As the sheet dries small quantities of water are poured with one hand from a vessel or sponge upon a limited part of the body, beginning with the chest. With the other extended hand rapid passes are made over this spot until it becomes a little warmer. Successive parts of the body are thus treated except the forearms, hands, feet, and legs. The patient is then dried and made comfortable. This is applicable in all febrile affections with high temperatures, except in chest or abdominal diseases. **B., Shower,** a familiar form of the douche. The water is delivered from a nozzle with numerous perforations, that may be attached to a hose, striking the body in a divided stream. **B., Sitz,** the patient sits in the tub with the feet outside upon a raised surface and blanket, so that the popliteal spaces are not encroached upon by the edge of the tub. The water should reach the umbilicus. It is useful in obstinate diarrhea, menorrhagia, subinvolution of the uterus, and pelvic inflammations. **B., Slime,** a bath in water mixed with the slimy deposit of organic matter found in rivers or ponds. **B., Sponge,** one in which the patient's body is rubbed with a sponge and water. It is used to reduce temperature. **B., Starch,** starch, one pound; water, 30 gallons. This is used as the bran bath. **B., Sulphur,** potassium sulphid four to eight ounces in 30 gallons of water; a little sulphuric acid may be added. It is used in certain skin diseases, scabies, lead colic, and lead palsy. **B., Sulphurous-acid,** a means of applying the fumes of burning sulphur to the body. The patient is seated on a cane-bottomed chair, and a blanket or oil-cloth is thrown round him, the head remaining uncovered. On the floor beneath the chair is a pan containing a little water, and in this is placed a smaller vessel containing small pieces of sulphur. A little spirit of wine is poured over this, and ignited, and sulphurous-acid gas is evolved. **B., Sun,** the therapeutic exposure of the naked body to the sun's rays. **B., Surprise,** an ancient and obsolete form of bath for insane and hysterical patients, who were unexpectedly plunged into cold water. **B., Tepid,** the temperature of the water ranges from 85° to 95° F. It acts mainly upon the skin as a sedative, cleansing, and detergent agent; the pulse, respiration, excretion, secretion, and temperature are practically unaffected. **B., Turkish,** one in which the bather is placed successively in rooms of higher temperature, then shampooed or rubbed, and finally stimulated by a douche of cold water. See *Bath, Hot-air.* **B., Vapor;** Russian bath; this may be given, as the Turkish bath, in a box, by permitting steam from a pipe to permeate it, providing for its escape, or the patient may inhale the vapor within a closed compartment, the whole surface being at the same time exposed to its influence. A higher temperature can be borne than in the hot-water bath, though for a shorter time. It is useful to provoke profuse perspiration. It should be followed by brisk frictions. **B., Warm,** the tub is filled with water at any temperature near that of the body, say 90° to 104°. The patient lies quietly in it, and obtains the effect of warmth, moisture, and water-pressure. It is used to calm the nervous system, produce sleep, and allay reflex instability. The *continuous warm bath,* called by Hebra the *permanent bath,* is made by suspending a sheet in the tub as a hammock. The patient lies upon this surrounded by water that is kept at an equable temperature (warm) by a proper arrangement of in-and-out-flow It is used in the treatment of extensive burns and wounds. **B., Water,** a bath of water. It may be cold (60°–75°) or tepid (85°–95°), or hot. In chemistry, a bath of water for immersing vessels containing substances that must not be heated above the boiling-point of water. See *B., Mud; B., Sand; B., Sun.*

Bathmic (*bath'-mik*) [βαθμός, a threshold]. Relating to bathmism.

Bathmis (*bath'-mis*). See *Bathmos.*

Bathmism (*bath'-mizm*) [βαθμός, a threshold]. That supposed modification of chemical force which is active in the processes of nutrition.

Bathmos (*bath'-mos*) [βαθμός, βαθμίς, a little fossa]. A shallow depression or fosset.

Bathwort (*bath'-wert*) [Corruption of *birthwort*]. The plant *Trillium erectum;* also *T. pendulum;* esteemed in domestic practice as deobstruent. Unof.

Bathybius (*bath-ib'-e-us*) [βαθύς, deep; βίος, life]. A name applied by Huxley to a sticky form of deep-sea ooze, formerly supposed by him to be a widely-extending sheet of living, primitive protoplasm.

Bathycentesis (*bath-e-sen-te'-sis*) [βαθύς, deep; κέντησις, puncture]. A deep surgical puncture; deep acupuncture.

Bathystixis (*bath-e-stiks'-is*) [βαθύς, deep; στίξις, puncture]. Deep acupuncture.

Batiator (*bat-e-a'-tor*). See *Vernonia nigritiana.*

Batoir (*bah-twar'*) [Fr., beater]. See *Percutor.*

Batophobia (*bat-o-fo'-be-ah*) [βατός, a height; φόβος, fear]. 1. Acrophobia; dread of being at a great height. 2. Dread of high objects; fear of passing near a high building, or of going through a deep valley.

Batrachoid (*bat'-rak-oid*) [βάτραχος, a frog; εἶδος, form]. Frog-like.

Batrachophagous (*bat-rak-off'-ag-us*) [βάτραχος, a frog; φαγεῖν, to eat]. In biology, frog-eating.

Batrachophobia (*bat-rak-o-fo'-be-ah*) [βάτραχος, a frog; φόβος, fear]. Morbid dread of toads and frogs.

Batrachoplasty (*bat'-rak-o-plas-te*) [βάτραχος, a frog; ranula; πλάσσειν, to mold]. Plastic surgical operation for the cure of ranula.

Batrachostomous (*bat-rak-os'-to-mus*) [βάτραχος, a frog; στόμα, mouth]. In biology, frog-mouthed.

Batrachus (*bat'-rak-us*) [βάτραχος, a frog]. Ranula.

Battalism (*bat'-al-izm*). See *Battarism.*

Battarism (*bat'-ar-izm*) [βατταρισμός, a stuttering]. Stuttering or stammering.

Battery (*bat'-er-e*) [*batteria*, a beating; battery]. A series of two or more pieces of apparatus arranged to produce increased or multiple effect, as battery of boilers, prisms, lenses, galvanic cells. Usually applied to a series of cells producing electricity (voltaic or galvanic battery); also, frequently to a single cell. **B., Primary,** the combination of a number of primary cells so as to form a single battery. **B., Secondary,** the combination of a number of storage cells to form a single electric source. The following table shows the materials used in the more important batteries, and the electro-motive force (E. M. F.) in volts. Storage or secondary batteries are not included in the table. The common form of these is a series of lead plates carrying masses of lead oxid.

GRENET CELL FOR THERAPEUTIC APPARATUS.

NAMES, ELEMENTS, FLUIDS, ETC., OF THE PRINCIPAL BATTERIES.

NAME OF CELL.	POSITIVE ELEMENT.	NEGATIVE ELEMENT.	EXCITING AGENT.	DEPOLARIZING AGENT.	E. M. F. IN VOLTS.
Bunsen.	Zinc.	Carbon.	Sulphuric acid, dilute.	Nitric acid.	1.75 to 1.96
Beetz.	Zinc.	Copper.	Zinc sulphate in plaster of Paris.	Copper sulphate, in plaster of Paris.	1.04
Callaud.	Zinc.	Copper.	Solution of zinc sulphate.	Cupric sulphate.	1.0 to 1.14
Daniel.	Zinc.	Copper.	Zinc sulphate.	Cupric sulphate.	1. to 1.14
Edison-Lalande.	Zinc.	Cupric oxid and carbon.	Potassium hydroxid.	Cupric oxid.	0.75
Fuller.	Zinc.	Carbon.	Zinc chlorid.	Potassium dichromate and hydrochloric acid.	1.5
Gravity. See *Callaud.*					
Gaiffe.	Zinc.	Silver.	Zinc chlorid.	Silver chlorid.	1.02
Grenet.	Zinc.	Carbon.	Sulphuric acid and potassium dichromate.	Chromic acid.	2.0
Grove.	Zinc.	Platinum.	Sulphuric acid, dilute.	Nitric acid.	1.94 to 1.97
Latimer Clark.	Zinc.	Mercury.	Mercuric sulphate.	Mercuric sulphate.	1.436
Leclanché.	Zinc.	Carbon.	Ammonium chlorid.	Manganese dioxid.	1.42
Lelande Chaperone.	Zinc.	Copper or iron.	Potassium hydroxid.	Cupric oxid.	0.98
Maische.	Zinc scraps in a bath of mercury.	Platinized carbon.	Common salt solution.	None separate.	1.25
Marié Davy.	Zinc.	Carbon.	Sulphuric acid, dilute.	Mercuric sulphate.	1.52
Maynooth.	Zinc.	Iron.	Sulphuric acid, dilute.	Nitric acid (strong).	
Niaudet.	Zinc.	Carbon.	Common salt solution.	Chlorated lime.	1.63
Poggendorf.	Zinc.	Carbon.	Potassium dichromate and sulphuric acid.	Chromic acid.	1.98
Schanschieff.	Zinc.	Carbon.	Mercurial solution.	None separate.	1.56
Scrivanoff.	Zinc.	Silver.	Potassium hydroxid.	Silver chlorid.	1.5
Smee.	Zinc.	Platinized silver.	Sulphuric acid, dilute.	None.	0.5 to 1.0
Walker	Zinc.	Platinized carbon.	Sulphuric acid, dilute.	None.	0.66
Warren de la Rue.	Zinc.	Silver.	Ammonium chlorid.	Silver chlorid.	1.05

Battey's Operation. See *Operations, Table of.*

Battledore (*bat'-l-dōr*) [ME., *batyldore*]. An instrument shaped like a racket. **B. Hands.** See *Acromegaly.* **B. Placenta,** one in which there is a marginal insertion of the cord.

Battology (*bat-ol'-o-je*) [βαττολογία, a vain repetition]. The idle or meaningless repetition of words.

Baudelocque's Diameter. In obstetrics, the external conjugate diameter of the pelvis. **B. Method.** See *Treatment, Methods of.*

Bauden's Apparatus. See *Seutin's Apparatus.* **B. Law.** See *Law.* **B. Operations.** See *Operations, Table of.*

Bauer's Apparatus, an apparatus for extending the leg in hip-disease. The extension may be varied by means of a rack-and-pinion arrangement.

Bauhin, Valve of. The ileo-cecal valve.

Bauhin's Glands. See *Gland.*

Baum's Operation. See *Operations, Table of.*

Baunscheidt's Method. See *Treatment, Methods of.*

Baunscheidtism (*bawn'-shit-izm*). [Named from *Baunscheidt,* the inventor]. A mode of treating rheumatism or other chronic neuralgias by counter-irritation, the latter being produced by pricking the exterior of the part affected with fine needles dipped in oil of mustard, formic acid or other irritant.

Bavarian (*bav-a'-re-an*) [*Bavaria*]. Pertaining to Bavaria. **B. Blue.** See *Pigments, Conspectus of.* **B. Splint,** a variety of immovable dressing in which the plaster is applied between two flannel cloths.

Bay-berry (*ba'-ber-e*) [ME., *bay; bery*]. 1. The berry of the *Laurus nobilis,* bay, or noble laurel. 2. The wax-myrtle, *Myrica cerifera,* and its fruit. See *Myrica.* 3. The pimento, or allspice. **B. Rum** and **B., Oil of.** See *Myrcia.* **B. Tree,** the *Laurus nobilis;* also *Prunus laurocerasus;* commonly called the laurel and the cherry laurel. **B. Aqua Laurocerasi.** See *Acid Hydrocyanic, Dilute.*

Baycuru (*bi-koo'-roo*) [native S. A.]. The root of a S. American plant, *Statice braziliensis,* one of the most powerful astringents known. It is used for ulcers of the mouth and for glandular enlargements. Dose of the fld. ext., ♏v–xxx. Unof.

Bayer's Test. See *Tests, Table of.*

Baynton's Bandage. See *Bandage.*

Bazin (*ba'-zin*). Synonym of *Molluscum contagiosum.*

Bazin's Disease. See *Diseases, Table of.*

Bdella (*del'-ah*) [βδέλλα, a leech]. A leech. See *Hirudo.*

Bdellatomy (*del-at'-o-me*). See *Bdellotomy.*

Bdellium (*del'-e-um*) [Heb., *b'dolach*]. A resinous gum exuding from various species of *balsamodendron.* **B., Indian,** somewhat valuable as an emmenagogue.

Bdellometer (*del-om'-et-er*) [βδέλλα, a leech; μέτρον, a measure]. A mechanical substitute for the leech, consisting of cupping glass, scarificator, and exhausting syringe.

Bdellotomy (*del-ot'-o-me*) [βδέλλα, a leech; τομή, a cut]. The opening with the knife of the body of a leech that is drawing blood; by this means the activity of the leech may be considerably prolonged.

Bdelygmia (*del-ig'-me-ah*) [βδελυγμία, disgust]. Abnormal disgust for food. That which is abhorrent or repulsive.

Beaded Hair. Synonym of *Monilethrix.*

Beads, Rhachitic. "Rhachitic rosary;" the so-called "beading of the ribs" in rickets; a succession of visible and palpable swellings at the points where the ribs join their cartilages.

Beak (*bēk*) [ME., *beeke*]. 1. The mandibular portion of a forceps. 2. The lower end of the calamus scriptorius. 3. The pad or splenium of the callosum. 4. In biology, the rostrum, snout, or some corresponding part of an animal. The apex of a bivalve, or the cannular lips of a univalve shell.

Beaker (*bē'-ker*) [ME., *biker*]. A wide-mouthed glass vessel much used in chemic laboratories. **B. Cells.** See *Cell.*

Beale's Cold-flowing Fluids. For injecting tissues. (*a*) *Blue:* Dissolve 0.777 gm. of potassium ferrocyanid in 30 c. c. of glycerin; mix 3.6 c. c. of tinct. ferri chlor. with 30 c. c. of glycerin; add the iron mixture, drop by drop, to the potassium ferrocyanid solution. Then add to this mixture 5.5 c. c. of methylic alcohol, 30 c. c. of alcohol, and 88 c. c. of water, shaking strongly. (*b*) *Acid Glycerin Fluid:* Dissolve 0.194 gm. of potassium ferrocyanid in 30 c. c. of strong glycerin; to 30 c. c. of strong glycerin add 10 drops of tincture ferri chlor. Add the latter, drop by drop, to the former, with constant shaking. Then add 30 c. c. of water, to which 3 drops of HCl have been added. This fluid flows well and does not exude from the capillaries. (*c*) *Carmin:* Mix 1 gm. of pulverized carmin with a little water and sufficient ammonia to dissolve the carmin; add 50 c. c of glycerin and shake well. Then add gradually, with constant shaking, 100 c. c. of glycerin, acidulated with 25 to 30 drops of HCl or acetic acid. Test the fluid with litmus paper, and if not decidedly acid add a few more drops of acid. Then add 25 c. c. of alcohol and 75 c. c. of water. See *Stains, Table of.* **B. Solution,** for staining histologic preparations. It consists of carmin, 1 gm.; ammonia, 3 c. c.; glycerin, 96 c. c.; distilled water, 96 c. c; alcohol, 95 per cent., 24 c. c. Dissolve the carmin in the ammonia with the aid of heat, boil for a few moments, and allow to cool. After the odor of ammonia has disappeared add the glycerin, water, and alcohol, and filter. If, after standing for some time, the carmin precipitates, add a few more drops of ammonia.

Bean (*bēn*) [ME., *bene*]. The seeds of several plants, mostly *Leguminosæ,* especially that of the common bean, *Faba vulgaris.* In biology, the rounded, white, fleshy, saccular termination of the *ductus ejaculatorius* in the drone bee. **B. of St. Ignatius.** See *Ignatia.* See also *Tonka, Vanilla, Castor oil,* etc.

Bearberry (*bār'-ber-e*). See *Uva ursi.*

Beard (*bērd*) [ME., *berde*]. The hair on the lips, cheeks and chin of adult men. On women, a beard is of rare occurrence, and is sometimes accompanied by other characteristics proper to the male sex.

Bearing-down. The feeling of weight or pressure in the pelvis in certain diseases. **B.-d. Pains,** uterine pains in labor. **Bearing-seat,** a variety of the *Apron of Succor, q. v.*

Bear's-foot. Leaf cup. A composite-flowered plant, *Polymnia uvedalia* of N. America. A popular remedy for enlargement of the spleen, or the "ague-cake" of malarious regions. **B. Ext.** Dose gr. ss–j. **B. Fld. Ext.** Dose ♏iij–x. **B. Infus.,** ℥j of an ℥j to Oj. Unof.

Beat (*bēt*) [ME., *beten*]. The pulsations of the blood in the arteries, or the impulse of the heart. See *Pulse.*

Beaten Woman's Herb. The European plant, *Tamus communis;* so called from its vulnerary qualities. See *Tamus.*

Beating (*bēt'-ing*). See *Tapotement.*

Beaufils's Operation. See *Operations, Table of.*

Beauperthuy's Method. A method of treating leprosy by bathing with olive oil, the internal administration of mercuric chlorid, abstinence from salted meats and good hygiene.

Bebeerin (*be-be'-rin*). See *Nectandra* and *Barine.*

Bebeeru Bark (*be-be'-ru*). See *Nectandra.*

Beccabunga (*bek-ah-bung'-gah*). A plant of Europe, *Veronica beccabunga*, formerly much prized in medicine. See *Veronica*.

Beccaria, Test of. See *Tests, Table of.*

Bêche-de-mer (*bāsh'-de-mār*) [Port., *bicho-do-mar*, sea-worm]. The smoked and dried bodies of *Holothuria argus*, a sea-slug; valued by the Chinese as a culinary delicacy, and an aphrodisiac. Unof.

Bechesthesis (*bek-es'-thes-is*) [βήξ, cough; αἴσθησις, sensation]. The sensation in the throat or air-passages that prompts one to cough.

Bechic (*bek'-ik*) [βηχικός, from βήξ, a cough]. A remedy for a cough; an antibechic.

Bechorthopnea (*bek-orth-op-ne'-ah*) [βήξ, cough; ὀρθός, straight; πνεεῖν, to breathe]. Cough associated with orthopnea. A synonym of *Whooping-cough*.

Bechous (*bek'-us*) [βήξ, a cough]. Pertaining to or affected with cough.

Bechterew's Nucleus. The accessory auditory nucleus.

Becker's Test. A test for astigmatism, made by means of a set of parallel lines in triplets placed in various meridians.

Beckmann, Method of. A method for the determination of the depression of the freezing-point. A hard glass tube, from 2 to 3 cm. in diameter, with a lateral projection, is filled with from 15 to 20 grams of the solvent (weighed out accurately in centigrams), and closed with a cork in which are placed an accurate thermometer and a stout platinum wire serving as a stirring-rod. The lower part of the tube is attached by means of a cork to a somewhat larger, wider tube, which serves as an air-jacket. The entire apparatus projects into a beaker-glass filled with a freezing-mixture. Cold water will answer for glacial acetic acid and ice-water for benzene. The congealing-point of the solvent is determined by cooling this to from 1° to 2° below its freezing-point; then by agitation with the platinum rod (after addition of platinum dippings) the formation of crystals is induced. The thermometer rises. When the mercury becomes stationary, the reading indicates the freezing-point of the solvent. The mass is allowed to melt and an accurately weighed amount of substance is introduced through the lateral projection. When this has dissolved, the freezing-point is determined as before.

Béclard's Hernia. See *Diseases, Table of.* **B. Operation.** See *Operations, Table of.* **B. Suture.** See *Suture.*

Becorthopnea (*bek-orth-op-ne'-ah*). See *Bechorthopnea.*

Becquerel's Pills. Pills containing quinin, extract of digitalis and colchicum seeds, for use in gout.

Becuiba (*bek-we'-bah*) [native Brazilian name]. The tree *Myristica bicuhyba* of Brazil. Its nuts afford a "tallow," or balsam, useful in rheumatism and piles. Unof.

Bed (*bed*) [AS., *bedd*]. The couch or support on which the body may rest in sleep; usually a mattress of straw, hair, or similar substance. **B., Air,** a mattress of rubber or leather that can be inflated with air. **B.-bug** an apterous insect, *Cimex lectularius*, that infests filthy bedsteads, and at times is parasitic upon the human body. See *Cimex.* **B.-case,** a form of hysteria or hypochondriasis in which the patient, without cause, persistently remains in bed. **B.-pan,** a large shallow vessel for receiving the alvine discharges from bedridden patients. **B.-rest,** an apparatus for propping up patients in bed. **B.-ridden,** confined to bed. **B.-sore,** a sore produced on any projecting part of the body by prolonged pressure against the bed, and by nutritive changes in paralyzed parts. **B., Water,** a rubber mattress containing water; it is used to prevent the formation of bed-sores.

Bedegar, Bedeguar (*bed'-e-gar*) [Ar., Pers., *bādāwar*, a white thorn]. An insect-made gall found on rose-bushes of various species. It is astringent, but is not now used in regular medicine.

Bedlam (*bed'-lam*) [ME., *bedlem*, a corruption of Bethlehem]. A mad-house.

Bedlamism (*bed'-lam-izm*) [see *Bedlam*]. Insanity.

Bedlamite (*bed'-lam-īt*) [see *Bedlam*]. A madman; an insane person.

Bednar's Aphthæ. See *Aphthæ*, and *Diseases, Table of.*

Bedouin Itch. A synonym of the vesicular variety of *Lichen tropicus.*

Bee (*be*) [AS., *bī*]. A genus of insects belonging to the *Hymenoptera*, commonly used to designate the common Honey Bee, *Apis mellifica* (*q. v.*). **B.-bread,** a preparation of pollen with which bees fill certain cells. (The propolis, or hive-resin, is also incorrectly called bee-bread.) **B.-poison,** the irritating secretion discharged through the sting of the bee. See *Formic Acid.*

Beech (*bēch*). See *Fagus.*

Beech-drop (*bēch'-drop*). See *Cancer Root.*

Beef (*bēf*) [ME., *befe*]. The flesh of domestic cattle. Good beef should be of red color, possess firm texture, and be free from unpleasant smell. Beef consists mainly of water 73, fibrin 15, gelatin 4, albumen, 3, fat and other substances 5 per cent. **B.-extract,** the soluble fibrin of lean meat partly desiccated. **B.-measles.** See *Cysticercus bovis.* **B.-tea,** the soluble extractive matter of beef, made by steeping finely-cut lean beef with its weight of water, and straining.

Beer (*bēr*). See *Malt Liquors.* **B.-vinegar.** See *Vinegar.*

Beer's Cataract Knife. A knife with a triangular-shaped blade, for making section of the cornea in the removal of the crystalline lens. **B. Operations.** See *Operations, Table of.*

Beeswax (*bēz'-waks*). *Cera flava;* wax secreted by bees, of which their cells are constructed; ordinarily it is a mixture of cerotic acid, myricyl palmitic ester, heptacosane, hentriacontane, and several alcohols. The crude melted wax is a tough, compact mass of yellow or brownish color, granular structure, faint taste, and honey-like odor. When bleached it becomes white. Its specific gravity is .959 to .969; its melting-point 62° to 64° C. It is used in making candles, ointments, and pomades.

Beet (*bēt*). See *Beta.*

Begbie's Disease. See *Diseases, Table of.*

Beggiatoa (*bed-je-at-o'-ah*) [after the Italian botanist, J. Beggiato]. A genus of arthrosporous bacteria founded by Trevisan (1833), consisting of swinging or gliding, milk-white, gray, rosy to violet threads. They decompose sulphur compounds, and store up sulphur granules in their protoplasm. They are found in stagnant, fresh, or salt water, particularly that contaminated by sewage or factory waste. See *Bacteria, Synonymatic Table of.*

Begin's Operation. See *Operations, Table of.*

Begma (*beg'-mah*) [βῆγμα, a cough: *pl.*, *Begmata*]. A cough; the matter expectorated by coughing.

Begonia (*be-go'-ne-ah*) [after *Bégon*, a French savant]. An extensive genus of flowering-plants, mostly natives of warm regions. *B. octopetala* and *tomentosa*, of Peru, are astringent. *B. balmisiana*, of Mexico, and various other species are locally prized as alteratives. Unof.

Beguan (*beg'-wan*) [native S. America]. A bezoar obtained from the iguana, a large species of lizard.

Behen-Nut (*be'-hen nut*). The seed of *Moringa pterygosperma*, and *M. aptera*, trees of tropical countries. They afford *Oil of Behen*, or *Oil of Ben*.

Behenolic Acid (*be-hen-ol'-ik*). See *Acid*.

Beindorff's Apparatus. A furnace for boiling water, in use in pharmacies.

Bela (*be'-lah*) [Hind.]. The dried, half-ripe fruit of *Aegle marmelos*, or Bengal quince. It is a valuable remedy for chronic diarrhea and dysentery. The *ripe* fruit is slightly laxative. Dose ʒss–j. **B., Ext. Liq.** (B. P.). Dose ʒj–ij. Unof.

Belching (*belch'-ing*) [ME., *belchen*]. The expulsion or throwing up of gas from the stomach. Eructation.

Belemnoid (*bel-em'-noid*) [βέλεμνον, a dart]. 1. Dart-shaped; styloid. 2. The styloid process of the ulna or of the temporal bone.

Belenoid (*bel'-en-od*). See *Belonoid*.

Bell (*bel*) [ME., *bel*]. A hollow, metal sounding-instrument. **B. gastrula.** See *Archigastrula*. **B. Metal,** an alloy of copper, zinc, tin, and antimony. **B., Nerves of.** The external and internal respiratory nerves, etc. **B. Sound,** the sound produced in pneumothorax by striking a coin, placed flat upon the chest, by another coin. It can be heard through the stethoscope placed over the affected side.

Bell's Disease. See *Periencephalitis* and *Diseases, Table of.* **B. Law.** See *Law*. **B. Mania.** See *Periencephalitis* and *Diseases, Table of.* **B. Operations.** See *Operations, Table of.* **B. Palsy or Paralysis.** See *Diseases, Table of.*

Belladonna (*bel-ah-don'-ah*) [It., *belladonna*, beautiful lady]. Deadly Night-shade. A perennial plant of the order *Solanaceæ*, indigenous to Southern Europe and Asia, and cultivated in the U. S. Its properties are due to two alkaloids, *atropin* and *belladonnin*, the latter thought to be identical with hyoscyamin. Both leaves and root are employed. It is a mild narcotic and anodyne and a powerful mydriatic; also an antispasmodic, and in small doses a cardiac, respiratory and spinal stimulant. It is valuable in the inflammation of rheumatism, in gout, and in neuralgia. Dose of the root and leaves gr. j. **B., Folia,** the leaves of belladonna. **B., Radix,** the root of belladonna. The preparations of the leaves are: **B., Extractum Alcoholicum.** Dose gr. $\frac{1}{10}$–$\frac{1}{3}$. **B., Tinct.,** 15 per cent. Dose ♏j–xxx. **B., Unguent.,** contains extract 10, dilute alcohol 6, benzoated lard 84 parts. From the root are prepared: **B., Abstractum.** Dose gr. $\frac{1}{10}$–j. Unof. **B., Emplastrum,** alcoholic ext. of leaves 20, resin-plaster 40, soap-plaster, 40. **B., Extractum Fluidum.** Dose ♏j–v. **B., Linimentum,** fluid extract 95, camphor 5. **B., Succus** (B. P.). Dose ♏v–xv. **B., Japanese.** See *Scopolia*. **Atropin sulphate,** an excellent antidote in opium-poisoning. **Lamellæ atropinæ** (B. P.), each containing of atropin $\frac{1}{500}$ grain. **Liq. atropinæ sulphatis** (B. P.). Dose ♏j–vj. **Unguentum atropinæ** (B. P.), grs. viij to the ounce. See *Atropin*. Dose gr. $\frac{1}{500}$–$\frac{1}{60}$. *Homatropin*. See *Atropin*.

Belladonnin (*bel-ah-don'-in*) [see *Belladonna*], $C_{17}H_{23}NO_3$. An alkaloid found in Belladonna. It resembles atropin, hyoscyamin, and hyoscin. It occurs with atropin, and is likewise decomposed into tropic acid and oxytropin ($C_8H_{15}NO_2$). See *Belladonna*.

Belleric (*bel-er'-ik*) [Pers., *balilah*]. A variety of myrobalan (*q. v.*); the fruit of *Terminalia fellerica*.

Bellini, Ducts of. See *Ducts*.

Bellocq's Canula. An instrument used in plugging the nares.

Bellon (*bel'-on*) [origin unknown]. Painter's (or lead) colic. See *Colic*.

Bellows (*bel'-ōz*) [ME., *belowes*]. An instrument for propelling air through a tube or small orifice. **B. and Blow-Pipe,** a circular bellows nine or ten inches in diameter, with a small gum-elastic tube, three or four feet in length, terminating in a tapering metallic tube, to be attached to a blow-pipe leading from it. The bellows is worked by the foot, while with the blow-pipe held in the hand, a jet of flame from a lamp may be projected on the object designed to be heated. **B. Murmur,** the *Bruit-de souffle, q. v.*; also the funic or placental souffle.

Belly (*bel'-e*) [ME., *bely*]. See *Abdomen*. **B.-ache.** See *Colic*. **B.-bound,** vulgar for constipated. **B.-button,** the navel.

Belmas's Operation. See *Operations, Table of.*

Beloid (*be'-loid*) [βέλος, an arrow]. Arrow-shaped or styloid.

Belonephobia (*bel-o-ne-fo'-be-ah*) [βελόνη, a pin; φόβος, fear]. A morbid dread of pins and needles.

Belonoid (*bel'-on-oid*) [βελόνη, a needle, bodkin]. Styloid; needle-shaped.

Belt (*belt*) [ME., *belt*]. A girdle about the waist. **B., Abdominal,** a broad, elastic belt worn about the abdomen as a support during pregnancy. **B., Magnetic,** a belt consisting of plates of metal fastened upon a strip of felt moistened with dilute acid. It is a cure-all largely sold by empirics.

Ben, or Benne Oil (*ben*, or *ben'-e*). Oleum balatinum, is obtained by expression from the seeds of the several species of *Moringia*. It is a colorless, odorless oil, not readily turning rancid. It is used by perfumers for extracting odors, and for lubricating clocks and light machinery. See *Behen-nut* and *Sesame*.

Bence Jones's Albumin. See *Albumin*.

Bendas's Method. See *Stains, Table of.*

Bending (*bend'-ing*) [ME., *bend*]. Active Swedish movements in which the body is bent or inclined in various directions in order to develop certain portions of the muscular system.

Benedictine (*ben-e-dik'-tin*) [*benedicere*, to bless]. A liquor or cordial originally prepared by Benedictine monks, and distilled at Fécamp, in France. It much resembles chartreuse and trappistine.

Benedikt, Syndrome of. Paralysis of the muscles supplied by the oculo-motor nerves of one side and tremor and paresis of the upper extremity of the other side.

Beng (*beng*). See *Cannabis Indica*.

Bengal (*ben'-gal*) [Hind., *Bengāl*']. A province of India. **B. Quince.** See *Bela*. **B. Red.** Same as *Rose Bengale*.

Bengalin (*ben'-gal-in*) [Hind., *Bengāl*']. Same as *Coupier's Blue*.

Benger's Food. Partially digested and solidified beef-tea, used as a food for invalids.

Benham, Gland of. See *Gland*.

Benham's Operation. See *Operations, Table of.*

Benign (*be-nīn'*), or **Benignant** (*be-nig'-nant*) [*benignus*, kind]. A term applied to medicines that are characterized by mildness. It is used chiefly to distinguish tumors that are not *malignant* (*q. v.*) or carcinomatous.

Benjamin, or Gum Benjamin (*ben'-jam-in*). See *Benzoin*.

Bennett's Operation. See *Operations, Table of.*

Benson's Operation. See *Operations, Table of.*

Bent's Operation. See *Operations, Table of.*

Benzal (*ben'-zal*). See *Benzylidene*. **B. Green.** Same as *Malachite Green*.

Benzaldehyd (*ben-zal'-de-hīd*) [*benzoin; aldehyd*'], C_7H_6O. Bitter-almond oil; a compound that results from the oxidation of benzyl alcohol; it is a colorless liquid with a pleasant odor, and boils at 179°; its specific gravity is 1.050 at 15°. It is soluble in 30

parts water, and is miscible with alcohol and ether. It is used in making benzoic acid as well as various pigments. **B. Green.** Same as *Malachite Green.*

Benzaldoxin (*ben-zal-doks'-in*), C_7H_9NO. A thick oil formed by the action of hydroxylamin upon benzaldehyd.

Benzamid (*ben'-zam-id*) [*benzoin; amid*], C_7H_7NO. A compound that results when benzoyl chlorid acts upon alcoholic ammonia. It is best obtained by heating benzoic acid and ammonium thiocyanate to 170° C. It crystallizes in pearly leaflets, melts at 130°, and boils near 288°; it is readily soluble in hot water, alcohol, and ether. It may be regarded as the amid of benzoyl.

Benzanilid (*ben-zan'-il-id*) [*benzoin; anilin*], $C_{13}H_{11}NO$. Benzoyl-anilid, prepared by the action of benzoyl chlorid on anilin. It is used as an antifebrile in children, in doses of gr. iij–viij. Unof.

Benzene (*ben'-zēn*) [*benzoin*], C_6H_6. A hydrocarbon contained in coal-tar. It is formed by the dry distillation of all benzene acids. It is a mobile, ethereal-smelling liquid, of specific gravity 0.899 at 0°. It solidifies about 0°, melts at + 6°, and boils at 80.5°. It burns with a luminous flame. It readily dissolves resins, fats, sulphur, iodin, and phosphorus. It is the material from which anilin and the anilin colors are derived. **B.-sulphonic Acid,** $C_6H_5.SO_3H$, is prepared by boiling together equal parts of benzene and H_2SO_4. It occurs in small plates, readily soluble in alcohol and water, and which deliquesce in the air. In its dry distillation the acid yields benzene phenyl-sulphone, and when fused with caustic potash phenol is produced.

Benzidin (*ben'-zid-in*) [*benzoin*], $C_{12}H_{12}N_2$. Diamido-diphenyl; a compound obtained by the action of tin and HCl upon the alcoholic solution of azo-benzene. Benzidin dissolves easily in hot water and alcohol, and crystallizes in silvery leaflets, melting at 122°.

Benzil (*ben'-zil*) [*benzoin*], $C_{14}H_{10}O_2$. A compound produced in the oxidation of benzoin with chlorin. It crystallizes from ether in large, six-sided prisms, melting at 90° and boiling at 347°.

Benzimid (*ben'-zim-id*) [*benzoin; amid*], $C_{28}H_{18}N_2O_2$. A compound formed by the action of hydrocyanic acid on hydrid of benzoyl. It occurs also in the resinous residue of the rectification of the oil of bitter almonds.

Benzine (*ben'-zin*). See *Benzinum.*

Benzinum (*ben-zī'-num*) [L.: *gen., Benzini*]. Benzine, Petroleum Ether. A purified distillate from American petroleum, having a specific gravity of .77 to .79, boiling at 80° to 90° C., colorless, of ethereal odor, and a slightly peppermint-like taste. It is a valuable solvent for oils, fats, resins, caoutchouc, and some alkaloids. It is a vermicide against tapeworm. It should be distinguished from *Benzol,* which is called *Benzene* by English chemists. Dose gtt. v–x, on sugar or in mucilage.

Benzoate (*ben'-zo-āt*) [*benzoin*]. Any salt of benzoic acid. **B. of Naphthol.** See *Benzo-naphthol.*

Benzoated (*ben'-zo-āt-ed*) [*benzoin*]. Impregnated with benzoin or with benzoic acid.

Benzoic (*ben-zo'-ik*) [*benzoin*]. Pertaining to or derived from benzoin. **B. Acid.** See *Acid.*

Benzoin (*ben'-zo-in* or *-zoin*) [origin obscure]. A resin obtained from *Styrax benzoin,* a tree native to Sumatra and Siam. It is also a ketone alcohol, $C_{14}H_{12}O_2$, and may be produced by oxidizing hydrobenzoin with concentrated HNO_3. It is sparingly soluble in water, cold alcohol, and ether, and crystallizes in shining prisms, melting at 134°. It is used as a remedy for bronchitis and in making court-plaster. It occurs in tears consisting of several resins agglutinated by a balsam. It yields benzoic and cinnamic acids, is antiseptic and disinfectant, and is used mainly as a stimulant expectorant in chronic bronchitis. Sodium and potassium compounds are sometimes used in place of like salicylic acid compounds. **Adeps benzoinatus,** benzoinated lard, contains 2 per cent. of benzoin. **B., Tinct.,** 20 per cent. of the resin in alcohol. Dose ʒss–j. **B., Tinct. Comp.,** Friar's Balsam, benzoin 12, aloes 2, styrax 8, balsam of Tolu 4, alcohol, q. s. ad 100 parts. Dose ʒss–ij. *Benzoic Acid,* $C_7H_6O_2$, alcohol the best solvent. A constituent of opii, tinct. camphorat. Dose gr. x–xxv. *Trochisci Acidi Benzoici* (B. P.). *Unguentum Cetacei* (B. P.). See *Cetaceum. Ammonium Benzoate,* water the best solvent. Dose gr. v–xxx. *Bismuth Benzoate,* an antiseptic dressing for chancroid. *Lithium Benzoate.* Dose gr. v–xxx. *Sodium Benzoate,* water the best solvent. Dose gr. v–ʒj.

Benzol (*ben'-zol*) [*benzoin*], C_6H_6. A hydrocarbon formed by the dry distillation of organic substances, but derived chiefly from coal-tar. It is inflammable and very volatile, and is an excellent solvent for grease. It is used internally to destroy epizoa. Its vapor is used in whooping-cough. Dose gtt. v–x. See, also, *Stains, Table of.* **B. Balsam.** See *Stains, Table of.* **B. Colors.** See *Conspectus of Pigments,* under *Pigment.*

Benzo-naphthol (*ben-zo-naf'-thol*) [*benzoin; νάφθα,* a kind of asphalt], $C_{10}H_7O(C_7H_5O)$. The benzoate of beta-naphthol, used as an intestinal antiseptic in typhoid fever and other intestinal diseases. Dose gr. ij to viij.

Benzonitrile (*ben-zo-ni'-tril*) [*benzoin; nitrum,* niter], C_7H_5N. Cyanbenzene; a compound isomeric with phenyl carbylamin. It is obtained from benzene sulphonic acid by distillation with potassium cyanid. It is an oil with an odor resembling that of oil of bitter almonds, and boils at 191°; its specific gravity is 1.023 at 0°.

Benzophenone (*ben-zo-fe'-nōn*) [*benzoin; φοῖνιξ,* purple-red], $C_{13}H_{10}O$. Diphenyl ketone; a compound obtained by distilling calcium benzoate. It is dimorphous, but generally crystallizes in large, rhombic prisms, melting at 48–49°, sometimes in rhombohedra, that melt at 27°. It has an aromatic odor and boils at 295°.

Benzophenoneid (*ben-zo-fe-no'-ne-id*) [*benzoin; φοῖνιξ,* purple-red]. Tetramethyl-diapsido-benzo-phenoid; an anilin dye. A solution of one part in 200 parts of water has been pronounced a valuable bactericide, neither caustic nor irritant, and very serviceable in eye-diseases. Unof.

Benzopurpurin. See *Pigments, Conspectus of.*

Benzoquinone (*ben-zo'-qwin-ōn*). See *Quinone.*

Benzosalicin (*ben-zo-sal'-is-in*). See *Populin.*

Benzosol (*ben-zo'-sol*) [*benzoin*], $C_{15}H_{12}O_3$. Benzoyl-guaiacol, an agreeable and harmless substitute for creasote in tuberculous affections. It also has antipyretic properties. Dose gr. iv–x.

Benzoyl (*ben'-zo-il,* or *-zoil*) [*benzoin*], C_7H_5O. The radical of benzoic acid, of oil of bitter almonds, and of an extensive series of compounds derived from this oil, or connected with it by certain relations. **B.-ecgonin,** $C_{16}H_{18}NO_4H$, a substance intermediate in composition between cocain and ecgonin. **B.-Glycocoll.** See *Acid, Hippuric.* **B. Green.** Same as *Malachite Green.* **B.-Pseudo-tropein.** See *Tropacocain.*

Benzyl (*ben'-zil*) [*benzoin*], C_7H_7. An organic radical that does not exist in the free state, but in combination forms a considerable number of compounds. **B. Alcohol.** See *Alcohol.* **B. Violet.** See *Pigments, Conspectus of.*

Benzylidene (*ben-zil'-id-en*) [*benzoin*], C_7H_6. A bivalent radical derived from benzoin compounds.

Beral's Apparatus. In pharmacy, an apparatus for effecting lixiviation.

Bérard's Aneurysm. See *Aneurysm and Diseases, Table of.* **B.'s Operation.** See *Operations, Table of.*

Béraud, Ligament of. The ligament that suspends the pericardium. **B., Valve of,** a valve supposed to exist at the bottom of the lachrymal sac over the entrance to the nasal duct.

Berberin (*ber'-ber-in*) [*berberina: gen., Berberinæ*], $C_{20}H_{17}NO_4$. An alkaloid found in the bark of *Berberis*, and in many other plants of exceedingly various botanic character. It is a tonic to the capillary vessels and increases the blood-pressure. It is recommended as a tonic and antiperiodic, and is an ingredient of various lotions for the mucous membranes; it is useful in nasal catarrh, etc. Dose gr. j–x. Unof.

Berberis (*ber'-ber-is*) [L.]. Barberry. The root of *Berberis vulgaris*, or common barberry. Its properties are due to an alkaloid, *berberin*, $C_{20}H_{17}NO_4$. It is an astringent, bitter tonic; in large doses a cathartic. It is used locally in conjunctivitis, and internally in malarial and typhoid fevers. **B., Ext. Fld.** Dose ♏ v–xxx. **B., Tinct.,** contains 20 per cent. of the root. Dose ♏x–ʒj. **Berberin,** the alkaloid. Dose gr. j–x. **B., Hydrochl.,** an efficient injection in gonorrhea. All unof. *B. asiatica*, *B. aquifolium* (or Oregon grape), and *B. lycium* are all medicinally active, and have similar properties to those of the common barberry.

Bergamii, Oleum (*ber-ga'-me-i o'-le-um*). Oil of Bergamot. See *Bergamot.*

Bergamot, Oil of (*ber'-gam-ot*) [*Bergamo*, a town in Italy], $C_{10}H_{16}$. A volatile oil derived from the rind of the *Citrus bergamia*. It is used mainly as a perfume, and as a clearing-agent in histologic work.

Bergeron's Disease. See *Diseases, Table of.* **B. Method.** See *Treatment, Methods of.*

Bergkrankheit (*bärg'-kra(h)nk-hit*). See *Mountain Sickness.*

Bergmann's (von) Operations. See *Operations, Table of.*

Beri-beri (*ber'-e-ber'-e*) [Singalese, *beri*, weakness]. A dropsical ailment, occurring in an acute and chronic form, and characterized by the appearance of pleuritic or pericardial effusions, with general anasarca, anemia, extreme weakness, and paraplegia. The acute form is generally fatal; recovery frequently takes place in the chronic form. It is prevalent in India, Japan, and Ceylon, and is most common among men. Its cause is not known, but possibly it is of microbic origin. Improper diet also has some influence upon the production of the disease.

Berlier System of Sewage. See *Sewage, Disposal of.*

Berlin Blue. See *Pigments, Conspectus of.*

Berlin's Operation. See *Operations, Table of.*

Berlinghieri's Operation. See *Operations, Table of.*

Bernard, Canal of. See *Canals, Table of.* **B.'s Granular Layer,** the inner zone of the cells lining the acini of the pancreas. It is granular in appearance and stains but slightly with carmin.

Bernay's Operation. See *Operations, Table of.*

Bernheim's Operation. See *Operations, Table of.*

Bernstein's Theory of Muscular Contraction. He claims that the seat of the contraction is in the interstitial material surrounding the system of inotagmata, and that it consists in the migration of that labile material from pole to equator, this being synchronous with explosive chemic change, sudden disengagement of heat, and change in the electric state of the living substance.

Berried Tea (*ber'-ĕd te*). A popular name for *Gaultheria procumbens.*

Berry (*ber'-e*) [ME., *bery*]. An indehiscent fruit with a pericarp that is succulent throughout, as the grape and gooseberry.

Bert's Experiment. Bert removed the skin from the tip of the tail of a rat, stitched it into the skin of the back of the animal, and after union had taken place the tail was divided at its base. Sensation was preserved. Nerve-fibers were thus proved capable of transmitting impulses in both directions. **B's. Method.** See *Anesthetic.*

Berthold's Method. See *Myringo-plastic Method.*

Bertillonage (*ber-til-lon-a(h)j*) [*Bertillon*, a French criminologist]. A system of carefully-recorded measurements and descriptions of criminals, for the purpose of future identification, introduced into France by M. Bertillon and adopted by the police of many large cities.

Bertin, Bones of. The sphenoidal turbinated bones, partly closing the sphenoidal sinuses. **B., Column of,** a cortical column of the kidney; the part separating the sides of any two pyramids. **B., Ligament of,** the ilio-femoral ligament. See *Ligament.*

Bertrandi's Suture. See *Suture.*

Beryllium (*ber-il'-e-um*) [*βήρυλλος*, beryl]. A bivalent metal obtainable from the beryl, whence its name; it is called also glucinum. See *Elements, Table of.*

Besnier's Lotion. A wash used in treating acne. It consists of precipitated sulphur, 1½ ounces; glycerin, 4 to 6 drams; to which are added after mixing, spirits of camphor, 6 drams, rose-water, a sufficient quantity.

Besoin (*bez-wan(g')*) [Fr.]. A desire; an impulse. *Besoin de respirer*, the sense of the need of air experienced when respiration is impeded.

Bestiality (*bes-che-al'-it-e*) [*bestia*, a beast]. Unnatural intercourse with an animal.

Bestiarian (*bes-te-a'-re-an*) [*bestia*, a beast]. An antivivisectionist, contemptuously so called as being a professed friend of the beasts.

Bestucheff's Mixture or Tincture. The ethereal tincture of chlorid of iron, used in erysipelas. It is made as follows: ℞. Tinct. ferri sesquichloridi, 1 part; spt. ether. nit., 4 parts. Mix and expose to the rays of the sun in well-closed bottles until the brownish color disappears. The dose is one to two teaspoonfuls every three hours.

Beta (*be'-tah*) [L.]. 1. The beet. See *Betin.* 2. The second letter of the Greek alphabet, used in chemic nomenclature. **B. Angle.** See *Angle.* **B.-naphthol.** See *Naphthol.*

Betacism (*ba'-tas-izm*) [*beta*, *βῆτα*, the second letter of the Greek alphabet]. The too-frequent use of the *b*-sound in speech, or the conversion of other sounds into it.

Betaïn (*be-ta'-in*) [*beta*, a beet], $C_5H_{11}NO_2$, or $C_{10}H_{22}N_2O_4$. Called also Oxyneurin and Lycin. A basic substance obtained by the careful oxidation of cholin. It occurs already formed in the sugar-beet (*Beta vulgaris*) and crystallizes from alcohol with one molecule of water in shining crystals that deliquesce in the air; it has an alkaline reaction and a sweetish taste.

Betel (*be'-tel*) [E. Ind.]. A masticatory used in the East. A few grains of the nut of the Catechu palm, *Areca C.*, are rolled up with a small amount of quicklime in a leaf of *Piper betel*, and chewed. It is tonic, astringent, stimulant, and aphrodisiac, and increases the powers of endurance. Dose of fld. ext. ʒj–iij. Unof.

Beth Root (*beth root*). The rhizome of *Trillium erecta*, astringent and tonic. Dose of fld. ext. ♏xxx–ʒj. *Trillin*, a concentrated ext. Dose gr. ij–iv. Unof.

Betin (*be′-tin*) [*beta*, a beet]. A precipitate prepared from a tincture of the common beet. It has been proposed as a substitute for ergot. Unof.

Betol (*be′-tol*), $C_{10}H_7O.C_7H_5O_2$. Salinaphthol. Naphthalol. A salicylic ether of naphthol, of alleged value in rheumatism and cystitis. It resembles salicylic acid in its properties. Dose gr. x–xv. Unof.

Betony (*bet′-o-ne*) [*betonica*, a corrupt form of *vettonica*]. Any labiate plant of the genus *Betonica*, especially *B. officinalis*, of Europe, formerly highly prized for its medicinal virtues, which are, however, unimportant. Unof.

Bettmann's Method. See *Cataract, Artificial Maturation of.*

Betula (*bet′-u-lah*). See *Birch.*

Betulin (*bet′-u-lin*) [*betula*, birch], $C_{36}H_{60}O_3$ (Hausmann). Birch resin, or birch camphor, derived from the bark of the white birch.

Between-brain. The interbrain; also the midbrain.

Betz's Cells. See *Cell.*

Bex (*beks*) [βήξ, a cough]. A cough, or disease characterized by coughing. **B. convulsiva**, whooping-cough. **B. theriodes.** Synonym of *Whooping-cough.*

Bezet or **Bezette** (*be-zet′*). See *Pigments, Conspectus of.*

Bezoar (*be′-zo-ar*) [Ar., *bāzahr*, the bezoar-stone]. A name for certain calculi or concretions found in the stomach or intestines of some animals (especially ruminants), formerly supposed to be efficacious in preventing the fatal effects of poison. **B., Vegetable.** See *Calapite.*

Bezoardic (*bez-o-ar′-dik*) [Ar., *bāzahr*, the bezoar-stone]. 1. Acting as a bezoar; antidotal. 2. Any alexipharmic agent.

Bezold's (von) Ganglion. See *Ganglia, Table of.*

Bhang (*bang*). See *Cannabis indica.*

Bhel (*bel*). See *Bela.*

Bi- (*bi*) [*bis*, twice]. A prefix signifying "twice" or "two;" as *bicuspid*, with two cusps; *bilobed*, twice lobed; *bivalved*, with two valves; *bilateral*, two-sided, etc. In chemistry, the prefix *di* is commonly employed.

Biacid (*bi-as′-id*) [*bi*, two; *acidum*, an acid]. In chemistry, a term applied to a base that may combine in two proportions with an acid.

Biauricular (*bi-aw-rik′-u-lar*) [*bis*, twice; *auricula*, the ear]. Relating to two auricles, or to two corresponding auricular points.

Bibirin (*bi-bir′-in*). See *Buxin.*

Bibiru (*bi-be′-ru*). Same as *Bebeeru.*

Bibitorius (*bib-it-o′-re-us*) [*bibere*, to drink]. The rectus internus muscle of the eye; so called because it turns the eye inward in the act of drinking.

Bibliography (*bib-le-og′-ra-fe*) [βιβλίον, a book; γράφειν, to write]. A classified list of references, books, or authorities on any subject.

Bibliophobia (*bib-le-o-fo′-be-ah*) [βιβλίον, a book; φόβος, dread]. Morbid dislike of books.

Bibron's Antidote. Formerly quite a famous remedy for rattlesnake bite. It consists of bromin, ʒiiss; potassium iodid, gr. ij; corrosive chlorid of mercury, gr. j; dilute alcohol, ℥xxx. Of this a teaspoonful is given in wine or brandy, p. r. n.

Bibulous (*bib′-u-lus*) [*bibere*, to drink]. Having the property of absorbing moisture or liquids. **B. lapis**, pumice stone. **B. Paper**, used in dentistry for drying cavities preparatory to introducing the filling. Blotting paper.

Bicarbonate (*bi-kar′-bon-āt*) [*bis*, twice; *carbo*, a coal]. Any supercarbonate that has two carbonic acid equivalents for one of the base.

Bicarinate (*bi-kar′-in-āt*) [*bi*, two; *carinatus*, keel-shaped]. In biology, having two keel-like projections, as certain grasses.

Bicaudal (*bi-kaw′-dal*) [*bicaudalis*, two-tailed]. Having two tails or appendages. **B. Muscle**, the *abductor auris.* See *Muscles, Table of.*

Bicephalium (*bi-sef-a′-le-um*) [*bi*, two; κεφαλή, head]. A tumor of the scalp so large that it gives the patient the appearance of having two heads.

Biceps (*bi′-seps*) [*bis*, twice; *caput*, the head]. A term applied to several muscles, as *B. brachii, B. extensor, B. flexor cruris.* They are so called from their double origin. See *Muscles, Table of.* **B. Reflex.** See *Reflexes, Table of.*

Bichat, Canal of. See *Canal.* **B., Fissure of.** See *Fissure.* **B., Foramen of.** See *Foramina, Table of.* **B., Tunic of**, the intima of the blood-vessels.

Bichlorid (*bi-klo′-rid*) [*bi*, two; *chlorin*]. In chemistry, a basic compound containing two equivalents of chlorin. **B. of Gold.** See *Gold.* **B. of Mercury.** See *Hydrargyrum.*

Bicho do mar (*be′-cho-do-mār*). See *Bèche de mer.*

Bichromate (*bi-kro′-māt*) [*bi*, two; *chromium*]. In chemistry, a basic compound containing two equivalents of chromium. **B. of Potash.** See *Potassium.*

Bicipital (*bi-sip′-it-al*) [*bi*, two; *caput*, the head]. Pertaining to the biceps muscle.

Bi-concave (*bi-kon′-kāv*). See *Lens.*

Biconvex (*bi-kon′-veks*). See *Lens.*

Bicornute (*bi-kor′-nūt*) [*bicornutus*, with two horns]. Having two horns, as a *bicornute* uterus.

Bicuspid (*bi-kus′-pid*) [*bi*, two; *cuspis*, the point of a spear]. Having two cusps, as **B. Teeth**, the fourth and fifth teeth. **B. Valve**, the mitral valve of the heart.

Bidder and Schmidt's Method. A method of estimating the amount of acids in the stomach. It consists in performing an ultimate analysis, apportioning the chlorin to the metals and ammonium present, and calculating the remainder as HCl.

Bidder's Ganglia. See *Ganglia, Table of.* **B.'s Organ**, a singular structure found in male toads and sometimes in male frogs, between the testis and fat-body; it is a rudimentary ovary, and in conjunction with the testis forms an ovotestis; the development of the Müllerian duct, or oviduct, being in direct proportion to the size of "Bidder's Organ." These functionless ducts frequently become cystic (in ten per cent. of male frogs, and in fifteen per cent. of male toads).

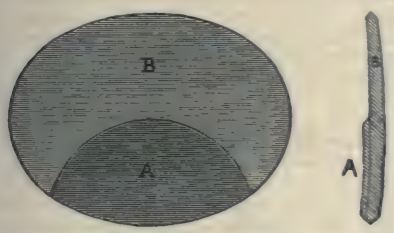
Bidens (*bi′-denz*) [*bidens*, having two teeth]. A genus of herbaceous composite plants. **B. bipennata**, Spanish needles, an herbaceous composite-flowered plant. The seeds and roots are said to be emmenagogue and antibechic. Dose of fld. ext. gtt. xv–ʒj. Unof.

Bidet (*be-det′*, or *-da*) [Fr. for pony]. A tub or basin with fixed attachments for the administering of injections; also for use as a sitz-bath or hip-bath.

Biebrich Scarlet. See *Pigments, Conspectus of.*

Biedert's Cream Mixture. An infant's food made by mixing 4 oz. of cream with 12 oz. of warm water, and adding ½ oz. of milk-sugar. It contains 1 per cent. of casein, 2.5 per cent. of fat, and 3.8 per cent. of sugar. As the child grows older a larger proportion of milk is added.

Bi-electrolysis (*bi-e-lek-trol′-is-is*) [*bi*, two; ἤλεκτρον, amber; λύσις, resolution]. The electrolysis of two substances at the same time.



Biennial (*bi-en′-e-al*) [*bi*, two; *annus*, a year]. Every two years. In botany, plants that produce foliage and a root-stalk the first year, flowering and maturing the second.

Biermer's Change of Note. See *Signs and Symptoms, Table of.*

Bifenestrate (*bi-fen-es'-trāt*). Same as *Biperforate.*

Bifid (*bi'-fid*) [*bis*, twice; *findere*, to cleave]. Divided in two; cleft, as the *spina bifida.*

Bifocal (*bi-fo'-kal*) [*bi*, two; *focus*, a point]. With a double focus. Applied to a system of lenses or spectacle-glasses with two foci, chiefly used for the correction of presbyopia, when there is at the same time an error of refraction for distant vision. The distance lens is above that for near work. These are sometimes

BIFOCAL LENS.

B. Distance Lens. A. Reading Lens, cemented to the Distance lens.

called *Pantoscopic lenses*, and also *Franklin spectacles*, because the device was first made by Benjamin Franklin. They are also called *Cement lenses*, because now made by cementing the lower segment to the distance lens.

Biforate (*bi-fo'-rāt*) [*bi*, two; *foratus*, perforated]. Having two foramina.

Biforin (*bi'-for-in*) [*biforis*, having two doors]. In biology, the name applied by Turpin to raphides-bearing cells in which the raphides are discharged from both ends of the cell.

Bifurcate (*bi-fer'-kāt*) [*bi*, two; *furca*, a fork]. Divided into two, like a fork.

Bifurcation (*bi-fer-ka'-shun*) [*bifurcatio;* from *bi*, two; *furca*, a fork]. Division into two branches, as of a tooth into two roots; of the trachea and of the aorta into two branches.

Big (*big*) [ME., *big*, large]. Great with young; pregnant. **B.-jaw**, actinomycosis in the ox.

Bigarade (*be-gah-ra(h)d'*) [Fr.]. The bitter orange. Its volatile oil (*essence* or *huile de bigarade*) is used in pharmacy and in perfumery.

Bigelovia (*big-lo'-ve-ah*) [*Bigelow*, an American botanist]. A genus of composite-flowered plants. See *Damiana.*

Bigelow's Ligament. The Y-ligament; ilio-femoral ligament. **B.'s Method.** See *Treatment, Methods of.* **B.'s Operation.** See *Operations, Table of.* **B.'s Septum**, in anatomy, a layer of hard bony tissue in the neck of the thigh-bone.

Bigeminate (*bi-jem'-in-āt*) [*bigeminus*, doubled]. In biology, forked, doubled.

Bigeminum (*bi-jem'-in-um*) [*bi*, two; *geminus*, a twin]. One of the corpora bigemina of the brain; one of the optic lobes of the brain.

Biglenoid (*bi-gle'-noid*) [*bi*, two; γληνη, a socket; εἶδος, form]. Relating to both of any pair of glenoid cavities.

Bignonia (*big-no'-ne-ah*) [*Bignon*, a French savant]. A genus of climbing-plants, often woody. **B. alliacea**, of the W. Indies, and **B. capreolata**, of N. America, are regarded as antisyphilitic. Several other species are reputed to be actively medicinal. Unof.

Bigoniac (*bi-go'-ne-ak*) [*bi*, two; γωνία, an angle]. Relating to the two gonions.

Bijugular (*bi-ju'-gu-lar*) [*bi*, two; *jugulum*, the collar-bone]. Relating to the two jugular points.

Bikh (*bik*) [native Nepalese]. The Nepalese poison, bish; it is derived from the roots of *Aconitum ferox.* See *Aconite.*

Bilabe (*bi'-lāb*, or *be-la(h)b'*) [Fr.; *bi*, two; *labium* lip]. A surgical instrument for removing foreign bodies from the bladder through the urethra.

Bilateral (*bi-lat'-er-al*) [*bi*, two; *latus*, a side]. Relating to two sides; sinistrodextral. **B. Symmetry**, the symmetry of right and left halves. **B. Operation.** See *Lithotomy.*

Bilateralism (*bi-lat'-er-al-izm*) [*bi*, two; *latus* a side]. Bilateral symmetry.

Bile (*bīl*) [*bilis;* χολή, the bile]. The substance secreted by the liver. It is mucilaginous, golden-brown in man, golden-red in *carnivora*, brownish-green in *herbivora*, and green in birds. It is composed of biliary salts, cholesterin, mucus, and certain pigments. The principal acids are *taurocholic* ($C_{26}H_{45}NSO_7$) and *glycocholic* ($C_{26}H_{43}NO_6$), both commonly combined with sodium. The taste of bile is intensely bitter; its reaction feebly alkaline, and its density from 1026 to 1032. It exercises a diastatic action on starch, emulsifies fats, and precipitates soluble peptone. Its composition varies, but according to Hoppe-Seyler, in 100 parts bile there are of

Water, Inorganic matter,	91.68	Parts.
Organic matter,	8.32	"
Mucus,	1.29	"
Taurocholate of sodium,	0.87	"
Glycocholate of sodium,	3.03	"
Saponified fat,	1.39	"
Cholesterin,	0.35	"
Lecithin,	0.55	"
Fat,	0.73	"

B. Pigments, the coloring-matters of the bile. **B. P., Tests for.** See *Tests, Table of.*

Bilharzia (*bil-har'-ze-ah*) [named after Theodor Bilharz, an helminthologist]. A genus of trematode helminths, established by Cobbold, characterized by having the sexes separate. See *Gynecophorus* and *Parasites* (*Animal*), *Table of.* **B. hæmatobia.** See *Distoma.*

Bilharziosis (*bil-har-ze-o'-sis*) [*Bilharzia*]. The *ensemble* of symptoms produced by the presence in the intestine of worms of the genus *Bilharzia.*

Biliary (*bil'-e-a-re*) [*bilis*, bile]. Pertaining to the bile. **B. Acids**, glycocholic and taurocholic acids formed in the liver. For tests for B. A. in the urine, see *Tests, Table of.* **B. Colic**, colic produced by the passage of gall-stones. See *Gall-stones.* **B. Ducts**, the hepatic, the cystic and the ductus communis choledochus. The first leads from the liver, the second from the gall-bladder. The third is a common excretory duct. See *Liver.*

Bilicyanin (*bil-e-si'-an-in*) [*bilis*, bile; κυάνεος, blue]. Cholecyanin, choleverdin. A blue pigment obtained from bilirubin.

Biliflavin (*bil-e-fla'-vin*) [*bilis*, bile; *flavus*, yellow]. A yellow coloring-matter derivable from biliverdin.

Bilifulvin (*bil-e-ful'-vin*) [*bilis*, bile; *fulvus*, fulvous]. An impure form of bilirubin; also a yellow bile-color from ox-gall, not normally present in human bile.

Bilifuscin (*bil-e-fus'-in*) [*bilis*, bile; *fuscus*, brown], $C_{16}H_{20}N_2O_4$. A pigmentary matter occurring in bile, and in human gall-stones.

Bilihumin (*bil-e-hu'-min*) [*bilis*, bile; *humus*, earth]. An insoluble residue left after treating gall-stones with various solvents.

Bilin (*bi'-lin*) [*bilis*, bile]. A mixture of the taurocholate and glycocholate of sodium, forming a copious resinoid constituent of the bile.

Bilineurin (*bil-e-nu'-rin*). See *Cholin.*

Bilious (*bil'-yus*) [*biliosus*, full of bile]. A term popularly applied to disorders supposed to arise from a too free secretion of bile. **B. Fever**, a term loosely applied to certain enteric and malarial fevers.

Biliphein (*bil-e-fe'-in*) [*bilis*, bile; *φαιός*, gray]. A supposed bile-color, now regarded as an impure bilirubin; called also *cholophein.*

Biliprasin (*bil-e-pra'-sin*) [*bilis*, bile; *πράσον*, leek; *πράσινος*, leek-green], $C_{16}H_{22}N_2O_6$. A pigmentary substance occurring in gall-stones, icteric urine and bile.

Bilipurpin, or **Bilipurpurin** (*bil-e-per'-pin, bil-e-per'-pu-rin*) [*bilis*, bile; *purpura*, purple]. A purple coloring-matter derivable from biliverdin.

Bilipyrrhin (*bil-e-pir'-in*). See *Cholepyrrhin.*

Bilirubin (*bil-e-ru'-bin*) [*bilis*, bile; *ruber*, red], $C_{16}H_{18}N_2O_3$. A red coloring-matter, the chief pigment of the bile. It is found also in the urine in jaundice. It is insoluble in water, and almost so in ether and alcohol, but it is readily soluble in alkaline solutions. It crystallizes in rhombic plates or prisms. **B. Icterus**, icterus or jaundice with discoloration of the skin and urine from the presence of an abnormally large percentage of bilirubin.

Biliverdin (*bil-e-ver'-din*) [*bilis*, bile; *viridis*, green], $C_{12}H_{20}N_2O_5$, or $C_8H_9NO_2$. A green pigment, the first product of the oxidation of bilirubin. It gives the characteristic color to the bile of herbivora, and occurs in the urine of jaundice and in traces in gall-stones.

Billroth's Mixture. See *Anesthetic.* **B.'s Operations.** See *Operations, Table of.*

Bilsted, or **Bilsterd** (*bil'-sted*, or *bil'-sterd*). See *Liquidamber.*

Bimana (*bim'-an-ah*) [*bi*, two; *manus*, a hand]. An order of the division of *mammalia* including man only.

Bimanual (*bi-man'-u-al*) [*bi*, two; *manus*, a hand]. Two-handed. Ambidextrous.

Bimastoid (*bi-mas'-toid*) [*bi*, two; *μαστός*, the breast; *εἶδος*, form]. Relating to the two mastoid eminences.

Binary (*bi'-nar-e*) [*binus*, a couple]. In chemistry, compounded of two elements. In anatomy, separating into two branches. **B. Theory**, in chemistry, the theory that considers all salts as double compounds.

Binate (*bin'-āt*) [*binus*, two by two]. In biology, bifoliate; bidigitate; occurring in pairs.

Binaural (*bin-aw'-ral*) [*bis*, twice; *auris*, ear]. Pertaining to or having two ears.

Binauricular (*bin-aw-rik'-u-lar*) [*bis*, twice; *auricula*, the ear]. Pertaining or belonging to both ears. **B. Arc.** See *Arc.*

Binder (*bīnd'-er*) [ME., *byndere*]. A wide bandage about the abdomen, worn by women during or after labor, or celiotomy, to support the abdominal walls. **B., Mammary**, a sling or suspensory for the mamma.

Binder's Board. A thick, strong variety of pasteboard for bookbinders' use; it has a limited use in surgery.

Binding Posts. Clamps for connecting conducting wires with the electric apparatus.

Bindschedler's Green. Same as *Dimethylphenylene Green.*

Bindweb (*bīnd'-web*) [ME., *binden*; *webbe*]. The neuroglia.

Binelli's Styptic. A nostrum formerly famous as a styptic. It is supposed to have contained creasote.

Biniodid (*bin-i'-o-did*). See *Iodid.*

Binocular (*bin-ok'-u-lar*) [*bi*, two; *oculus*, an eye]. In anatomy, having or pertaining to two eyes. In optics, an instrument with two eye-pieces for use with both eyes at once. **B. Vision**, the faculty of using both eyes synchronously and without diplopia.

Binoculus (*bin-ok'-u-lus*) [L., two-eyed]. A figure-of-eight bandage for both eyes.

Binoxid (*bin-oks'-id*) [*bi*, two; *oxid*]. Same as *Dioxid.*

Binuclear (*bi-nu'-kle-ar*) [*bi*, two; *nucleus*, a kernel]. Having two nuclei.

Binucleolate (*bi-nu-kle'-o-lāt*) [*bi*, two; *nucleolus*, a little kernel]. Having two nucleoli.

Bioblast (*bi'-o-blast*) [*βίος*, life; *βλαστός*, a germ]. A plastidule or formative cell; a corpuscle that has not yet become a cell.

Biocellate (*bi-o-sel'-at*) [*bi*, two; *ocellus*, a little eye]. In biology, having two spots resembling eyes.

Biochemics (*bi-o-kem'-iks*) [*βίος*, life; *χημεία*, chemistry]. The chemistry of life. See *Biochemy.*

Bio-chemistry (*bi-o-kem'-is-tre*) [*βίος*, life; *χημεία*, chemistry]. The chemistry of the living body, or of life.

Biochemy (*bi'-o-kem-e*) [*βίος*, life; *χημεία*, chemistry]. Chemic force as exhibited in living organisms.

Biochyme (*bi'-o-kīm*) [*βίος*, life; *χυμός*, juice]. In biology, the sap or cell-juice of plants.

Biodynamics (*bi-o-di-nam'-iks*) [*βίος*, life; *δύναμις*, power]. The dynamics of life; dynamic biology.

Biogamia (*bi-o-ga'-me-ah*) [*βίος*, life; *γάμος*, marriage]. The hypothetic union of opposing vital forces (as of contractility and sensibility), resulting in reproduction.

Biogenesis (*bi-o-jen'-es-is*) [*βίος*, life; *γένεσις*, origin]. 1. The doctrine that living things are produced only from living things—the reverse of *abiogenesis.* 2. Reproduction from living parents.

Biogeny (*bi-oj'-en-e*) [*βίος*, life; *γένεια*, generation]. In biology, the evolution of organic forms, either considered individually (*ontogeny*) or tribally (*phylogeny*).

Biognosis (*bi-og-no'-sis*) [*βίος*, life; *γνῶσις*, knowledge]. The study of life and its phenomena; biology.

Biokinematics (*bi-o-kin-em-at'-iks*) [*βίος*, life; *κίνημα*, motion]. The kinematics of life; the science of the motions or movements that are essential to life.

Biokinesigenesis (*bi-o-kin-es-ij-en'-es-is*) [*βίος*, life; *κίνησις*, movement; *γένεσις*, production]. The origination of the movements of living matter.

Biokinetics (*bi-o-kin-et'-iks*) [*βίος*, life; *κίνησις*, motion]. The kinetics of life: the science of the movements that are necessary parts of the process of development. See *Karyokinesis.*

Biologic, or **Biological** (*bi-o-loj'-ik, bi-o-loj'-ik-al*) [*βίος*, life; *λόγος*, science]. Pertaining or belonging to biology. **B. Law.** See *Phylogeny* and *Hæckel.*

Biologist (*bi-ol'-o-jist*) [*βίος*, life; *λόγος*, science]. One who is a student of biology.

Biologos (*bi-o-log'-os*) [*βίος*, life; *λόγος*, a word]. A designation proposed for the intelligent living power displayed in cellular and organic action and reaction.

Biology (*bi-ol'-o-je*) [*βίος*, life; *λόγος*, science]. The science embracing the structure, function, and organization of life-forms.

Biolysis (*bi-ol'-is-is*) [*βίος*, life; *λύειν*, to loosen]. The destruction of life. The devitalization of living tissue.

Biolytic (*bi-o-lit'-ik*) [*βίος*, life; *λύειν*, to loosen]. Destructive to life; relating to biolysis.

Biomagnetism (*bi-o-mag'-net-izm*) [*βίος*, life; *μάγνης*, a magnet]. So-called animal magnetism.

Biometer (*bi-om'-et-er*) [*βίος*, life; *μέτρον*, measure]. Dr. Farr speaks of the Life-Table as a biometer, and of equal importance in all inquiries connected with human life or sanitary improvements with the barometer or thermometer, etc., in physical research; and the keystone or pivot on which the whole science of life-assurance rests.

Biometry (*bi-om'-et-re*) [*βίος*, life; *μέτρον*, a measure]. Life-measurement; the estimation of the probable duration of any given life-form—in the past or future.

Biomorphotic (*bi-o-mor-fot'-ik*) [*βίος*, life; *μορφωτικός*, fit for shaping]. In biology, having an active pupa.

Biondi's Fluid. A staining-medium used in histologic laboratories. It is a mixture of orange-G., methyl-green, and acid fuchsin. See *Stains, Table of.*

Bionergy (*bi-on'-er-je*) [*βίος*, life; *ἔργον*, work]. Life-force; force exercised in the living organism.

Bionomy (*bi-on'-o-me*) [*βίος*, life; *νόμος*, a law]. Dynamic biology; biodynamics; the science of the laws of life.

Biontology (*bi-on-tol'-o-je*) [*βίος*, life; *ὢν(ὀντ)*, being; *λέγειν*, to speak]. In biology, the physiology of the species or genus, embracing the transcendental or strictly philosophic in physiology (J. Aitken Meigs.)

Biophagous (*bi-off'-ag-us*) [*βίος*, life; *φαγεῖν*, to eat]. Feeding upon living organisms, or upon living tissue, as insectivorous plants.

Biophore (*bi'-o-for*) [*βίος*, life; *φέρειν*, to bear]. One of Weismann's hypothetic "bearers of vitality," corresponding to the "plasomes" of Wiesner and Brücke and to the "pangenes" of de Vries, the smallest units that exhibit the primary vital forces, the bearers of the cell-qualities.

Biophysiography (*bi-o-fiz-e-og'-ra-fe*) [*βίος*, life; *φύσις*, nature; *γράφειν*, to write]. Descriptive or structural biology; organography, as distinguished from biophysiology.

Biophysiology (*bi-o-fiz-e-ol'-o-je*) [*βίος*, life; *φύσις*, nature; *λόγος*, science]. That branch of biology that includes organogeny, morphology and general physiology.

Bioplasm (*bi'-o-plazm*) [*βίος*, life; *πλάσμα*, form]. Any living matter, but especially germinal or forming matter; matter possessing reproductive vitality. See *Protoplasm.*

Bioplasmic (*bi-o-plaz'-mik*) [*βίος*, life; *πλάσμα*, form]. Relating to or of the nature of bioplasm.

Bioplasson (*bi-o-plas'-on*) [*βίος*, life; *πλάσσων*, forming]. Elsberg's term for living matter. A synonym of protoplasm or bioplasm.

Bioplast (*bi'-o-plast*) [*βίος*, life; *πλαστός*, formed]. A mass or cell of bioplasm which is a unit of living matter.

Bioplastic (*bi-o-plas'-tik*) [*βίος*, life; *πλαστός*, formed]. Relating to or of the nature of a bioplast or of bioplasm.

Biopsic (*bi-op'-sik*) [*βίος*, life; *ὄψις*, vision]. Pertaining to biopsy.

Biopsy (*bi'-op-se*) [*βίος*, life; *ὄψις*, vision]. Observation of the living subject; opposed to necropsy.

Biorbital (*bi-orb'-it-al*) [*bi*, two; *orbita*, a path]. Relating to both orbits.

Bioscope (*bi'-o-skōp*) [*βίος*, life; *σκοπεῖν*, to view]. An instrument used in bioscopy.

Bioscopy (*bi-os'-ko-pe*) [*βίος*, life; *σκοπεῖν*, to examine]. Examination of the body to ascertain if life be extinct. **B., Electro-,** examination by the aid of the electric current. The muscular reaction is lost to faradic stimulation in about two hours after death in the tongue; after three or four hours in the extremities; after five or six hours in the trunk. The reaction to galvanism persists somewhat longer.

Biosis (*bi-o'-sis*) [*βίος*, life]. Life; vitality.

Biostatics (*bi-o-stat'-iks*) [*βίος*, life; *στατικός*, causing to stand]. Static biology; the science of the determinate parts of biology, including anatomy, and the physics of the living body.

Biot's Respiration. See *Respiration.*

Biotaxis (*bi-o-taks'-is*) [*βίος*, life; *ταξία*, arrangement]. 1. The selective and arranging function or activity of life, or of living cells. 2. Systematic biology; the classification of living organisms.

Biotaxy (*bi'-o-taks-e*). See *Biotaxis.*

Biothalmy (*bi'-o-thal-me*) [*βιοθάλμιος*, vigorous; *βίος*, life; *θάλλειν*, to be vigorous]. The art of living long and well.

Biotic (*bi-ot'-ik*) [*βιωτικός*]. Pertaining to life or to the laws of animal and vegetable progress and evolution.

Biotome (*bi'-o-tōm*) [*βίος*, life; *τομή*, a cutting]. A term applied by Cobbold to a stage in the development of certain entozoa.

Biotomy (*bi-ot'-o-me*) [*βίος*, life; *τέμνειν*, to cut]. Vivisection.

Biparasitic (*bi-par-as-it'-ik*) [*bi*, two; *παράσιτος*, a parasite]. Parasitic upon a parasite.

Biparietal (*bi-par-i'-et-al*) [*bi*, two; *parietes*, a wall]. Relating to both parietal bones. **B. Diameter,** the distance from one parietal eminence of the cranium to the other.

Biparous (*bip'-ar-us*) [*bi*, double; *parere*, to bring forth]. Producing two at a birth.

Bipartite (*bi-par'-tit*) [*bi*, two; *pars*, a part]. In biology, composed of two parts or divisions.

Biped (*bi'-ped*) [*bi*, two; *pes*, a foot]. With or having two feet.

Biperforate (*bi-per'-fo-rāt*) [*bi*, two; *perforatus*, bored through]. Having two perforations; as a biperforate hymen.

Bipetalous (*bi-pet'-al-us*) [*bi*, two; *πέταλον*, a petal]. In biology, having two petals.

Biphosphate (*bi-fos'-fāt*) [*bi*, two; *phosphorus*]. In chemistry, an acid phosphate.

Biphosphid (*bi-fos'-fid*) [*bi*, two; *phosphorus*]. In chemistry, a phosphid containing twice as much phosphorus as the lower member of the phosphid series.

Biphosphite (*bi-fos'-fit*) [*bi*, two; *phosphorus*]. In chemistry, an acid phosphite.

Bipinnate (*bi-pin'-āt*) [*bi*, two; *pinnatus*, feathered]. In biology, doubly pinnate, as a leaf.

Bipolar (*bi-po'-lar*) [*bi*, two; *polus*, a pole]. Having two poles. **B. Nerve-cells,** nerve-cells that have two prolongations of the cell-matter. They are found chiefly in the ganglia of the gray matter of the brain.

Bipubiotomy (*bi-pu-be-ot'-o-me*) [*bi*, double; *pubes*, pubes; *τέμνειν*, to cut]. An obsolete operation (in the place of the Cesarean section) in which the pubic bones were both divided. See *Galbiati's* and *Farabeuf's Operations.*

Birch (*berch*) [AS., *birce*]. Any tree of the genus *Betula*. Birch tar, or the tarry oil of *B. alba*, is useful in certain skin diseases. The bark of *B. lenta*, the American black birch, yields a fragrant volatile oil, identical with that of *Gaultheria procumbens*, for which it is often substituted. **B. Camphor.** Same as *B. Resin.* **B. Resin.** See *Betulin.* **Oleum betulæ volatile,** volatile oil of betula, oil of sweet birch.

Bird-lime (*berd'-lim*). A viscous vegetable substance used in Japan as a local dressing for wounds.

Bird's Formula. The last two figures of the specific gravity of urine nearly represent the number of grains of solids to the ounce contained in the urine. The same two figures multiplied by 2 (**Trapp's Factor**) give the parts per 1000. **Hæser's Factor** is 2.33. **B. Operations.** See *Operations, Table of.*

Bird's-nest Bodies, or Cells. The cells of certain forms of carcinoma, distinguished by the concentric arrangement of their cell-walls. See also *Cancer Nests.* **B. Edible,** the nest of certain species of swift, used by the Chinese as food. It consists of marine algæ, *Gelidium*, cemented by the salivary

mucus of the bird. **B. Sternum,** a deformity of the sternum found in lateral curvature of the spine.

Birhinia (*bi-rin'-e-ah*) [*bi*, two; *ῥίς*, the nose]. A congenital defect in which there is the formation of two noses.

Birth (*berth*) [ME., *byrth*]. 1. The delivery of a child; parturition. 2. That which is brought forth in parturition. **B.-mark.** See *Nævus pigmentosus*. **B.-palsy,** any paralytic affection due to an injury received at birth; less correctly, a congenital paralytic affection due to a lesion that existed in the fetal state. See *Paraplegia, Infantile Spasmodic*. **B., Partial,** the incomplete expulsion of a child in labor; of legal value in lawsuits for property. **B., Plural,** the birth of more than a single child. **B., Posthumous,** the birth of a child after the death of its father. **B., Precocious,** the occurrence of natural labor after a shorter pregnancy than is usual. **B., Premature.** See *Labor*. **B.-rate,** the proportion of births per thousand. **B.-root.** See *Beth Root*. **B.-wort,** the plant *Aristolochia climatitis* (see *Aristolochia*), so called from its former employment as a depurant after childbirth. Unof. **B., Still.** See *Still-born*. Some of the *Tests* of live birth are appended: *Breslau Test*. If the intestines and stomach of the infant float in water on removal from the body it was thought to be proof that the child was born alive. This test is of no value. *Hydrostatic Test*. Suggested by Raygat. It consists in placing the lungs in water and noting their specific gravity. If inflation has occurred they will float. This test is valuable. *Ploucquet's Test*. This consists in estimating the ratio of the weight of the lungs to the weight of the body of the child. Ploucquet laid down this rule, that *before respiration* the weight of the lungs compared to the weight of the body was in the ratio of 1 to 70, and that *after respiration* it was in the ratio of 1 to 35. The test is of but slight value. *Static test*. Also called *Foderé's* or *Schmidt's Test*. This consists in ascertaining the *absolute* weight of the lungs, and comparing this weight with the average lung-weights of stillborn children, and of children who have died soon after birth. Foderé fixes the weight of the lungs of stillborn children born at term at 480 grains (1 oz.), and 960 grains (2 oz.) as the weight of the lungs soon after breathing has been established. This test is also of but slight value.

Bisacromial (*bis-ak-ro'-me-al*) [*bis*, two; *ἀκρωμία*, the point of the shoulder-blade]. Relating to the two acromia.

Biscara Button (*bis'-kar-ah but'-un*). See *Furunculus orientalis*.

Bischoff's Operation. See *Operations, Table of*.

Biscuit (*bis'-kit*) [Fr., "twice baked"]. A kind of cake; properly, a small, hard cake. In French pharmacy, medicated biscuits of various kinds are known. **B., Camplin's,** biscuits made of bran for the use of diabetics. They are made as follows: Take one quart of wheat-bran and boil in two successive waters for fifteen minutes, straining the mixture through a sieve until the water comes through clear; after each washing squeeze in a cloth until perfectly dry; spread thinly on a dish and place in a slow oven. If put in at night, let it remain in until morning, when, if dry and crisp, it is fit for grinding. The mass so obtained must be ground in a fine mill and passed through a wire sieve so fine that a brush will be required to push the flour through. Grind again that which remains in the sieve until quite soft and fine. Take three ounces of the powder, three new-laid eggs, from one and a half to two ounces of butter and about half a pint of milk. Mix the eggs with a little of the milk, and warm the butter with the other portion. Stir the whole well together, adding a little nutmeg and ginger or other spices. Bake in small well-buttered tins in a rather quick oven for about half an hour. Make the cake a little thicker than a captain's biscuit.

Biscuiting (*bis'-kit-ing*). See *Block Teeth*.

Bisection (*bi-sek'-shun*) [*bi*, two; *sectio*, a cutting]. In obstetrics, embryotomy.

Bisexual (*bi-seks'-u-al*) [*bi*, two; *sexus*, sex]. Having the reproductive organs of both sexes. Hermaphrodite.

Bish (*bish*). Same as *Bikh*.

Bishop's (Stanmore) **Operation.** See *Operations, Table of*. **B.'s Weed.** See *Ajowan*.

Bishoping (*bish'-op-ing*) [ME., *bischopen*]. In farriery, filing a space between the teeth of a horse.

Bisiliac (*bis-il'-e-ak*) [*bis*, two; *iliacus*]. Relating to the two most distant points of the two iliac crests.

Bisischiadic (*bis-is-ke-ad'-ik*) [*bis*, two; *ἰσχιαδικός*, relating to the hip]. Relating to corresponding points on the two ischia.

Biskra Boil, or **Button.** See *Furunculus orientalis*.

Bismarck Brown. Same as *Phenylene Brown* and *Vesuvin*.

Bismuth, or Bismuthum (*biz'-muth*) [L., *gen.*, *Bismuthi*]. Bi = 210; quantivalence I, III, V. A pinkish-white crystalline metal, not used in medicine in its metallic form. Its commercial salts are likely to contain arsenic. The insoluble salts of bismuth are feebly astringent and are useful in disordered digestion, acne, eczema, etc. **B. et Ammonii Citras,** soluble in water. Dose gr. j–v. **B. et Ammon. Citras, Liquor** (B.P.). Dose ʒss–j. **B. Carbonas** (B.P.), $(Bi_2O_2CO_3)_2,H_2O$. Dose gr. v–xx. **B. Citras,** $BiC_6H_5O_7$, soluble in water of ammonia; used in the U. S. only for pharmaceutic purposes. Dose gr. ij–v. **B. Oxid.** (B.P.), Bi_2O_3. Dose gr. v–xv. **B. Oxychlorid,** pearl white. Unof. It is used as a cosmetic. **B. Pulvis, Comp.,** *Ferrier's Snuff*. Contains two grains of hydrochlorate of morphin in one ounce, with bismuth and acacia. It is used for treating coryza. **B. Salicylas.** $Bi(C_7H_5O_3)_3.Bi_2O_3$. Dose gr. v–x. **B. Subcarbonas,** $(BiO)_2CO_3.H_2O$, insoluble; it is best given in emulsion with milk. Dose gr. x–ʒj. **B. Subgallate.** See *Dermatol*. **B. Subiodid,** BiOI, used as an antiseptic dusting-powder, like iodoform. **B. Subnitras,** $BiONO_3.H_2O$, the salt chiefly used in medicine. It is also used as a cosmetic. Dose gr. x–ʒj. **B. Test.** See *Tests, Table of*. **B., Trochisci** (B.P.); each contains gr. ij. **B., Unguent.,** 60 grains to one ounce. For herpes, piles, etc. **B. White.** See *Conspectus of Pigments*, under *Pigment*.

Bissa (*bis'-ah*) [native African]. An affection of man and sheep, common in Egypt, and characterized by the production of edema. **B. Bol,** a kind of myrrh, from Balsamodendron *Kafal*, a tree of E. Africa. It is used largely in adulterating the finer grades of myrrh, and is said to stimulate powerfully the flow of milk in cows. Unof.

Bistellate (*bi-stel'-at*) [*bi*, two; *stella*, a star]. Shaped like a double star.

Bistephanic (*bi-ste-fan'-ik*) [*bi*, two; *στεφάνιον*, dim. of *στέφανος*, a wreath]. Relating to the stephanions.

Bistort (*bis'-tort*) [*bis*, twice; *tortus*, twisted]. Snakeweed, Adder's-wort. The rhizome of *Polygonum bistorta*, an astringent. Dose of fld. ext. mxx–xl. Unof.

Bistoury (*bis'-to-re*) [Fr. *bistouri*]. A small (straight or curved) knife used in surgery. **B.-caché,** one that has the blade concealed for passing to the point to be incised, and by pressure on the handle the blade is exposed and the incision made.

Bisulcate (*bi-sul'-kāt*) [*bi*, two; *sulcus*, a furrow]. Having two furrows or grooves.

Bisulphate (*bi-sul'-fāt*) [*bi*, two; ME., *sulphur*]. Any acid sulphate having twice the amount of acid contained in the corresponding normal sulphate.

Bisulphid (*bi-sul'-fid*) [*bi*, two; *sulphur*]. In chemistry, a sulphur compound in which there are two atoms of sulphur to one atom of the other substance of the compound. **B. of Carbon.** See *Anesthetic*.

Bisulphite (*bi-sul'-fīt*) [*bi*, two; *sulphur*]. An acid sulphite. The *bisulphite of lime* is used as an antiferment.

Bitartrate (*bi-tar'-trāt*) [*bi*, two; τάρταρον, tartar]. Any tartrate in which one normal hydrogen atom has been replaced by a base. See *Tartaric acid*.

Bitemporal (*bi-tem'-por-al*) [*bi*, two; *tempora*, the temples]. Pertaining or belonging to the two temples. **B. Triangle.** See *Triangle*.

Biti (*bē'-te*) [E. Ind.]. The E. Indian tree *Dalbergia latifolia*; the oil of the root is said to cure or prevent baldness. Unof.

Bitnoben (*bit-nō'-ben*) [Hind. for "black salt"]. An East Indian polychrest remedy composed of salt, myrobalan and iron.

Bitter (*bit'-er*) [AS., *bitan*, to bite]. A peculiar, well-known taste, of which quinin presents an example; unpalatable. **B. Almond,** the nut of the *Amygdalum amarum*. It contains hydrocyanic acid. **B. Almond Green.** Same as *Malachite Green*. **B. Almond Oil,** oleum amygdalæ amaræ. See *Benzaldehyd*. **B. Apple,** the fruit of the colocynth, a purgative remedy. **B. Blain,** a West Indian herb, *Vandellia diffusa*, employed in fevers and in hepatic disorders. Unof. **B. Bloom.** The same as *American Centaury*, *q. v.* **B. Bugleweed,** the herb *Lycopus europæus*, alterative and tonic. Dose of fld. ext. ʒss–j. Unof. **B. Cup,** a cup made of quassia wood. It is a tonic. **B. King,** the shrub or tree, *Soulamea amara*, intensely bitter in all parts, and reputed to be antiperiodic. Unof. **B. Purging Salt,** sulphate of magnesia. **B. Root,** the root of *Gentiana catesbæi*, a tonic. **B. Tincture,** the *tinctura amara* (N.F.), prescribed also in the German pharmacy; it is a tincture of gentian, centaury, bitter orange-peel, orange-berries, and zedoary; it is known also as Stomach Drops. **B. Wine of Iron,** a solution of white wine, syrup, citrate of iron and quinin. Tonic. See *Iron*.

Bittering (*bit'-er-ing*) [AS., *bitan*, to bite]. A disease of wine in which it acquires a bitter flavor, due to the formation of a substance that develops as the wine ages, or if it be exposed to too high a temperature.

Bitters (*bit'-ers*) [AS., *bitan*, to bite]. Medicines characterized by a bitter taste. **B., Aromatic,** medicines that unite the properties of aromatics with those of simple bitters. **B., Simple,** medicines that stimulate the gastro-intestinal tract without influencing the general system. **B., Styptic,** medicines that add styptic and astringent properties to those of bitterness. See *Angustura*.

Bittersweet (*bit'-er-swēt*). See *Dulcamara*. **B., False.** See *Climbing Staff Tree*.

Bitumen (*bit-ū'-men*) [L., *bitumen*]. Mineral pitch or oil composed of various hydrocarbons. In the solid form it is usually called *asphalt*; in the liquid form, *petroleum*. An intermediate form is known as mineral tar or *maltha*. By distillation, bitumen yields benzol, naphtha, paraffin, and various other hydrocarbons, liquid and gaseous.

Bituminous (*bit-ū'-min-us*) [*bitumen*, bitumen]. Of the nature of or containing bitumen. **B. Coal.** See *Coal*.

Biuret (*bī'-u-ret*) [*bi*, two; οὖρον, urine], $C_2H_5N_3O_2 + H_2O$. A compound formed by exposing urea to a high temperature for a long time. It is readily soluble in water and in alcohol; it crystallizes with one molecule of water in the form of warts and needles. When anhydrous, biuret melts at 190° with decomposition. **B. Reaction,** or **Test.** See *Tests, Table of*.

Bivalence (*biv'-al-ens*) [*bi*, two; *valens*, having power]. In chemistry, a valence or saturating power that is double that of the hydrogen atom.

Bivalent (*biv'-al-ent*) [*bi*, two; *valens*, having power]. In chemistry, applied to an element of which an atom can replace two atoms of hydrogen or other univalent element, or to a radical that has the same valence as a bivalent atom.

Bivalve (*bī'-valv*) [*bi*, two; *valva*, a valve]. Having two valves or shells, as a mollusc or a speculum.

Biventer (*bi-ven'-ter*) [*bi*, two; *venter*, a belly]. Having two bellies, as a muscle. **B. cervicis,** the inner portion of the complexus muscle. **B. maxillæ,** the digastricus muscle.

Biventral (*bi-ven'-tral*) [*bi*, two; *ventrum*, a stomach]. Having two stomachs; having two bellies; as a digastric muscle.

Bixin (*biks'-in*) [*Bixa*, a genus of plants], $C_{16}H_{26}O_2$. An orange-red coloring-matter found in *Annatto*. See *Pigments, Conspectus of*.

Bizygomatic (*bi-zi-go-mat'-ik*) [*bi*, two; ζύγωμα, the zygomatic arch]. Relating to the most prominent points on the two zygomatic arches.

Bizzozero's Blood-plates. See *Blood-plates*. **B. Method,** a method of studying blood-plaques: A drop of a three-quarter per cent. sodium chlorid solution with one part of a concentrated aqueous solution of methyl violet for every 5000 of salt solution, is placed on the finger, which is then punctured. The blood and solution are mixed on the finger.

Bjeloussow's Gum Arabic and Borax Mass. For injecting tissues. Take one part, by weight, of gum arabic and make a syrupy solution in water. Take a half part, by weight, of sodium biborate and make a solution in water. Mix the two solutions, when a mass resembling gelatin will be obtained. This mass, which is almost insoluble in water, is rubbed up with water and forcibly strained through linen. Repeat the operation, when a solution miscible in all proportions with water is obtained. This may be colored by carmin or any pigment except cadmium and cobalt.

Black (*blak*) [AS., *blæc*]. Absence of color or light. The appearance of an object from whose surface none of the spectrum colors is reflected. **B. Alder.** See *Prinos*. **B. Antimony,** antimonium tersulphid, Sb_2S_3. **B. Ash,** the bark of *Fraxinus sambucifolia*, a mild tonic and astringent. Dose of fld. ext. ʒ ss–j. Unof. **B. Asphaltum.** Same as *Japan Black*. **B. Birch.** See *Birch*. **B. Blood,** venous blood. **B. Cancer.** See *Melanosis*. **B. Cohosh.** See *Cimicifuga*. **B.-damp,** carbon dioxid gas, which is found in greater or less quantity in all collieries, being given off by many coals, either mixed with fire-damp, or separately, or produced in various other ways, as by the exhalations of the men, by fires, and by explosions of fire-damp. Also called *choke-damp*. **B. Death.** See *Plague*. **B. Disease, 1.** A disease of malarial origin and pernicious course, characterized by extreme darkening of the skin, which may be brown or black in color. It occurs in the Garo Hills in Assam. 2. See *Aubernage*. **B. Draught.** See *Senna*. **B. Drop.** See *Opium*. **B. Erysipelas.** Synonym of *Anthrax*. **B. Eye,** livor (or sugillatio) oculi. See *Ecchymosis*. **B. Haw.** See *Viburnum*. **B.-head.** See *Comedo*. **B. Hellebore.** See *Hellebore*. **B. Hoarhound.** See *Ballota*. **B. Induration.** See *Induration*. **B. Infiltration.** See *Miner's Phthisis*. **B. Jaundice,** an excessive jaun-

dice arising from obstruction of the gall-ducts. The color of the skin is greenish-black. **B. Lead,** a form of carbon properly known as the mineral graphite. **B.-Leg,** 1. A febrile, generally fatal disease, chiefly affecting cattle and sheep, which is characterized by the rapid appearance of irregular nodules in the skin and muscular tissues, that are at first tense and very painful, but rapidly become painless and crepitating. There is no enlargement of the spleen. It is caused by anaërobic bacilli. It is also called *Symptomatic Anthrax.* 2. A synonym of the severe form of Purpura. **B. Leprosy.** See *Leprosy.* **B. Measles,** 1. The local Californian name for a disease of the grape, due to *Plasmodiophora californica* (Viala and Sanragean). Cf. *Brunissure.* 2. Rubeola nigra; a grave or malignant form of measles. **B. Pepper.** See *Piper nigrum.* **B. Phthisis.** A synonym of *Miners' Asthma.* **B. Quarter.** Synonym of *Anthrax.* See also *Black Leg.* **B. Sampon.** See *Echinacea Angustifolia.* **B. Snake-root.** See *Cimicifuga.* **B. Spauld.** See *Black-Leg.* **B. Spit.** See *Miner's Phthisis.* **B. Sweat.** See *Chromidrosis.* **B. Tongue,** 1. See *Glossophytia.* 2. A name given to a condition characterized by the formation upon the dorsum of the tongue of a hair-like deposit that passes through various stages of coloration from yellow to brown and finally black, ultimately disappearing by desquamation as gradually as it came. Repeated recurrence is the rule. It is probably an undue proliferation of the epithelium, the result of irritation. 3. See *Nigrities.* 4. A term applied to erysipelatous glossitis. **B. Vomit,** the coffee-ground vomit of yellow fever, etc. **B. Walnut,** the leaves of *Juglans nigra,* a tonic, alterative and deobstruent. Dose of fld. ext. ♏ xx–xxx. Unof. **B. Wash.** See *Hydrargyrum.* **B. Willow,** the buds of *Salix nigra,* a bitter tonic with aphrodisiac properties. Dose of fld. ext. ♏ xv–℥j. Unof.

Blackberry (*blak'-ber-e*) [AS., *blæc; berie,* berry]. See *Rubus.* **B. Cordial,** the *cordiale rubi fructus* (N.F.). Its formula is: blackberry juice, 3 pints; cinnamon in coarse powder, 2 Tr. oz.; cloves and nutmeg, in coarse powder, each ½ Tr. oz.; dilute alcohol, 2 pints; syrup, 3 pints.

Blackboy Gum. See *Acaroid Resin.*

Blackley Blue. Same as *Soluble Blue.*

Blackwater Fever (*blak'-wat-er fe'-ver*). See *Fever.*

Bladder (*blad'-er*) [AS., *blædre,* a blister]. The membranous, sac-like reservoir or receptacle for the urine. **B., Atony of,** inability to expel the urine, from deficient muscular power. **B., Catarrh of.** See *Cystitis.* **B., Extrophy, or Extroversion of,** absence of the anterior wall of the bladder, and more or less deficiency of the corresponding part of the abdomen. **B., Fasciculated,** the walls thrown into ridges by chronic cystitis. **B.-green.** See *Pigment, Conspectus of.* **B., Hernia of.** See *Cystocele.* **B., Inflammation of.** See *Cystitis.* **B., Inversion of,** a protrusion or an invagination of the bladder through the urethra. **B., Irritable,** a condition characterized by constant desire to urinate. **B., Neck of,** the constricted portion continuous with the urethra in front. **B., Nervous,** a condition in nervous patients in which there is a frequent desire to pass water, with inability at the same time to perform the act perfectly, and consequent slight dribbling at its close. **B., Paralysis of,** the same symptoms as in atony, but more marked and due to nervous or central disease. If affecting the neck alone, there is *incontinence;* if the body of the organ, *retention* of urine. **B., Sacculated,** pouches formed between the hypertrophied muscular fibers. **B. Senna,** the plant *Colutea arborescens* of Europe; its leaves are used as a substitute for senna. Unof. **B. Tetter.** See *Pemphigus.* **B., Trigone of,** the triangular, smooth surface upon the inner surface of the base of the bladder, immediately behind the urethral orifice. **B. Worm.** See *Worm.* **B.-wort.** See *Utricularia.* **B.-wrack.** See *Fucus vesiculosus.*

Bladdery Fever (*blad'-er-e fever*). See *Fever.*

Blade (*blād*) [ME., *blad,* a leaf of grass]. In biology, the broad part of a leaf. **B.-bone.** The scapula or shoulder-blade.

Blæsitas (*ble'-sit-as*). See *Blesitas.*

Blain (*blān*) [ME., *blane,* a blister]. 1. A blister; an elevation of the cuticle containing serum. Synonym of *Anthrax.* 2. A disease peculiar to the ox, marked by sudden swelling of the head, neck, and throat, and by the development of several large vesicles on the tongue that tend to cause suffocation.

Blainville's Ear. See *Diseases, Table of,* and *Ear, Deformities of.*

Blair's Wheat Food. A variety of farinaceous food for infants.

Blake's Disc. A device used in treating purulent otitis media. It is a paper disc pasted over the perforation of the tympanic membrane after the discharge has ceased.

Blanc (*blok (ng)*) [Fr.]. White. **B. d'argent.** See *Pigment.* **B. fixe.** Same as *Permanent White.* **B.-mange,** a jelly-like food-preparation, having as a basis gelatin, carragheen, isinglass, starch, or arrow-root, boiled with milk and variously flavored.

Blancard's Pills. Pills containing the iodid of iron.

Bland (*bland*) [*blandus,* mild]. A term applied to mild and soothing medicines and applications.

Blandin (*blan'-din*). See *Glairin.*

Blandin's Glands. See *Gland.* **B.'s Operations.** See *Operations, Table of.*

Blanket (*blan'-ket*) [Fr., *blanc,* white]. A woolen covering, so called because originally of white color. **B. Bath.** See *Bath, Sheet* or *Pack.*

Blasius's Operations. See *Operations, Table of.*

Blastelasma (*blas-tel-az'-mah*) [βλαστός, a germ; ἔλασμα, plate: *pl., Blastelasmata*]. In embryology, any secondary germ-layer appearing from, or later than, the endoderm and ectoderm.

Blastema (*blas-te'-mah*) [βλάστημα from βλαστάνειν, to germinate]. The formative lymph or pabulum of capillary exudation. A synonym of protoplasm.

Blastemal (*blas-te'-mal*) [βλαστάνειν, to germinate]. Of the nature of a blastema; pertaining to a blastema.

Blastematic (*blas-tem-at'-ik*), or **Blastematous** (*blas-tem'-at-us*) [βλαστάνειν, to germinate]. Blastemal.

Blastemic (*blas-tem'-ik*) [βλαστάνειν, to germinate]. Relating to blastema; rudimentary; bioplasmic.

Blastide (*blas'-tid*) [βλαστός, a germ]. In embryology, a very small clear spot on the fecundated ovum marking the place of the nucleus or cytoblast.

Blasting Gelatin (*blas'-ting jel'-at-in*). Gelatin Dynamite. A mixture of about 80 parts of nitroglycerin with 20 of nitro-cellulose. Any non-nitrated cotton or trinitro-cellulose interferes with the solution of the nitro-glycerin. The addition of 4 per cent. of camphor renders the mixture incapable of exploding when struck by a rifle-bullet, but it can be detonated by a strong dynamite cap.

Blastocardia (*blas-to-kar'-de-ah*) [βλαστός, a germ; καρδία, the heart]. The germinal spot.

Blastocarpous (*blas-to-kar'-pus*) [βλαστός, a germ; καρπός, a fruit]. In biology, developing in the fruit.

Blastocele (*blas'-to-sēl*) [βλαστός, a germ; κοῖλος, hollow]. The central cavity of the blastula or vesicular morula.

Blastocheme (*blas'-to-kēm*) [βλαστός, a germ; ἔχειν, to hold, to have]. In biology, a medusiform zoöid that gives origin to generative elements not immediately, but through the intervention of sexual buds. (Allman.)

Blastochyle (*blas'-to-kīl*) [βλαστός, a germ; χυλός, juice]. In biology, the colorless fluid in the blastodermic vesicles.

Blastocœlum, Blastocœloma (*blas-to-se'-lom, blas-to-se-lo'-mah*). Same as *Blastocele.*

Blastocolla (*blas-to-col'-ah*) [βλαστός, a shoot; κόλλα, glue]. In biology, the balsam produced on buds by glandular hairs.

Blastocolysis (*blas-to-kol-i'-sis*) [βλαστός, a germ; κόλουσις, a cutting off]. The arrest of a developmental process.

Blastocyst (*blas'-to-sist*) [βλαστός, a germ; κίστις, a bladder]. The germinal vesicle.

Blastoderm (*blas'-to-derm*) [βλαστός, a germ; δέρμα, the skin]. In embryology, the germinal membrane formed by the cells of the morula, lying on the internal surface of the vitelline membrane of the impregnated ovum. The whole hollow sphere, with its surrounding cells, is called the *blastodermic vesicle*, and is formed about the tenth day. The *ectoderm* (or *epiblast*) and the *endoderm* (*entoderm* or *hypoblast*) layers are simply due to a proliferation of the blastodermic cells about the *germinal area*, whereby the blastoderm is doubled, thus forming these outer and inner layers. The mesoblast or middle layer is developed after the latter, and probably from the hypoblast.

Blastodermic (*blas-to-der'-mik*) [βλαστός, a germ; δέρμα, the skin]. Relating to the blastoderm.

Blastodisc (*blas'-to-disk*) [βλαστός, a germ; δίσκος, disc]. A blastodermic disc; a mass or disc capping one pole of the yolk.

Blastogenesis (*blas-to-jen'-es-is*) [βλαστός, a germ; γένεσις, generation]. In biology, Weismann's theory of origin from *germ-plasm* (*q. v.*) in contradistinction to Darwin's theory of *Pangenesis.*

Blastogeny (*blas-toj'-en-e*) [βλαστός, a germ; γένεσις, generation]. Haeckel's term for the germ-history of an individual organism; a division of ontogeny.

Blastoma (*blas-to'-mah*) [βλαστός, a germ; ὄμα, a tumor: *pl.*, *Blastomata*]. A granular growth due to the presence of a germ or microörganism.

Blastomatic (*blas-to-mat'-ik*) [βλαστός, a germ; ὄμα, a tumor]. Relating to a blastoma.

Blastomere (*blas'-to-mēr*) [βλαστός, a germ; μέρος, a part]. Any one of the nucleated cells or segments into which the fecundated vitellus divides.

Blastomeric (*blas-to-mer'-ik*) [βλαστός, a germ; μέρος, a part]. Relating to or of the character of a blastomere.

Blastoneuropore (*blas-to-nu'-ro-por*) [βλαστός, a germ; νεῦρον, a nerve; πόρος, a pore]. In biology, the temporary aperture in certain embryos formed by the coalescence of the *blastopore* and *neuropore.*

Blastophore (*blas'-to-fōr*) [βλαστός a germ; φέρειν, to bear]. That part of a sperm-cell that does not become converted into spermatozoa.

Blastophyllum (*blas-to-fil'-um*) [βλαστός, a germ; φύλλον, a leaf: *pl.*, *Blastophylla*]. An endoderm or an ectoderm; a primitive germ-layer.

Blastophyly (*blas-toff'-il-e*) [βλαστός, a germ; φυλή, a tribe]. The tribal history of individual organisms.

Blastopore (*blas'-to-pōr*) [βλαστός, a germ; πόρος, passage, pore]. In biology, the primitive mouth or archistome, the orifice to the two-layered embryo (*blastula*). "The blastopore is the small opening which leads into the notochordal canal, or after the canal has fused with the yolk-cavity, leads into the archenteron. It is situated at the hind end of the primitive axis (head-process) and marks the anterior boundary of the anus of Rusconi in amphibia, or of the primitive streak, properly so-called, of amniota." (Minot). "Van Beneden's blastopore" is formed previously to the blastodermic cavity.

Blastosphere (*blas'-to-sfēr*) [βλαστός, a germ; σφαῖρα, a sphere]. In biology, the "blastula," "germinal vesicle," or "vesicular germ." A hollow sphere composed of a single, simple layer of germinal cells. A vesicular morula.

Blastostyle (*blas'-to-stīl*) [βλαστός, a germ; στῦλος, a pillar]. In biology, a columnar zoöid devoted to the origination of sexual buds.

Blastula (*blas'-tu-lah*) [dim. of βλαστός, a germ: *pl.*, *Blastulæ*]. In embryology, "The earliest form of the diaderm, a simple epithelial vesicle, the cavity of which is the large segmentation cavity" (Minot). Cf. *Blastosphere.*

Blastulation (*blas-tu-la'-shon*) [dim. of βλαστός, a germ]. In embryology, the conversion of a morula or mulberry-germ into a blastula or vesicular germ.

Blatta (*blat'-ah*) [L., "blood-colored"]. A genus of the *Blattidæ.* **B. (Periplaneta) orientalis,** the cockroach; the powdered body of the cockroach. A popular remedy for dropsy among Russian peasants. It increases the amount of urine and diminishes the amount of albumin. Dose gr. iv–xx. Unof. See *Antihydropin.*

Blaud's Pill. A pill containing sulphate of iron and carbonate of potash; for use in amenorrhea, etc. See *Pill.*

Bleach (*blēch*) [ME., *blechen*, to make white]. To make white or pale, to diminish the intensity of color. **Bleached Lac.** See *Lac.* **Bleaching Powder,** chlorinated lime, a mixture of calcium chlorid and calcium hypochlorite, containing free chlorin gas. It is much used as a disinfectant. **Bleaching Fluid,** *eau de Javelle*, a similar composition obtained by passing chlorin gas into an emulsion of calcium hydrate. The most important bleaching agents are the following: BLEACHING AGENTS.—*Acids:* Hydrochloric, Nitric, Sulphurous; *Carbonate of Potassium* (K_2CO_3); its value depends upon the percentage of carbonate it contains; *Caustic Soda* (NaOH), a coarse white powder; *Chlorid of lime*, a white powder with a chlorinous odor; it is the most important of all; *Hydrogen dioxid* (H_2O_2), a colorless, odorless liquid. It is called "Golden Hair-dye;" *Permanganate of Potassium* ($K_2Mn_2O_8$); *Soaps:* Tallow, Rosin, and Olive Oil; *Soda Ash* (Na_2CO_3); its value depends on the amount of Na_2O it contains; *Soda Crystals* ($Na_2CO_3.10H_2O$).

Bleacher's Eczema (*blēch'-erz ek'-zem-ah*). Eczema of the hands of bleachers, due to their continuous immersion in hot water and strong lye.

Blear Eye (*blēr'-i*). See *Blepharitis ulcerosa.*

Bleb (*bleb*). See *Bulla.*

Blebby (*bleb'-e*) [*Scotch*, *bleb*, "a blister"]. Covered with blebs.

Blechropyra (*blek-rop'-ir-ah*) [βληχρός, mild; πῦρ, heat]. A transient fever; a febricula.

Blechrosphygmia (*blek-ro-sfig'-me-ah*) [βληχρός, weak; σφυγμός, pulse]. Weakness or slowness of the pulse.

Bleed (*blēd*) [AS., *blēdan*, to bleed]. To shed or give vent to blood.

Bleeders (*blē'-derz*) [AS., *blēdan*, to bleed]. A popular term for those who are subjects of the hemorrhagic diathesis. **B.'s Disease.** See *Hemophilia.*

Bleeding (*blē'-ding*). See *Bloodletting* and *Hemorrhage.*

Blemmatrope (*blem'-at-rōp*) [*βλέμμα*, a glance; *τρέπειν*, to turn]. An apparatus for showing the various positions of the eye in its orbit.

Blennadenitis (*blen-ad-en-i'-tis*) [*βλέννος*, mucus; *ἀδήν*, gland]. Inflammation of the mucous glands and follicles.

Blennelytria (*blen-el-it'-re-ah*) [*βλέννος*, mucus; *ἔλυτρον*, sheath]. Leucorrhea.

Blennemesis (*blen-em'-es-is*) [*βλέννα*, mucus; *ἐμέειν*, to vomit]. The vomiting of mucus.

Blennemetic (*blen-em-et'-ik*) [*βλέννα*, mucus; *ἐμέειν*, to vomit]. Relating to or of the nature of blennemesis.

Blennenteria (*blen-en-te'-re-ah*) [*βλέννα*, mucus; *ἔντερον*, intestine]. A mucous diarrhea or dysentery.

Blennenteritis (*blen-en-ter-i'-tis*) [*βλέννα*, mucus; *ἔντερον*, intestine; *ιτις*, inflammation]. 1. Enteritis with a copious discharge of mucus. 2. Inflammation of the mucous membrane of the bowel.

Blennentery (*blen'-en-ter-e*). Same as *Blennenteria*.

Blennogenic, or Blennogenous (*blen-o-jen'-ik*, or *blen-oj'-en-us*) [*βλέννα*, mucus; *γένεσις*, production]. Producing or secreting mucus; muciparous.

Blennoid (*blen'-oid*) [*βλέννα*, mucus; *εἶδος*, form]. Resembling mucus; myxoid; muciform; mucoid.

Blennoma (*blen-o'-mah*) [*βλέννα*, mucus; *ὄμα*, a tumor: *pl.*, *Blennomata*]. 1. A mucous polypus. 2. A myxoma.

Blennometritis (*blen-o-me-tri'-tis*) [*βλέννα*, mucus; *μήτρα*, womb; *ιτις*, inflammation]. Catarrhal metritis.

Blennophthalmia (*blen-off-thal'-me-ah*) [*βλέννα*, mucus; *ὀφθαλμία*, disease of the eyes]. Catarrhal conjunctivitis.

Blennoptysis (*blen-op'-tis-is*) [*βλέννα*, mucus; *πτύσις*, a spitting]. Bronchial mucous expectoration.

Blennorrhagia (*blen-or-a'-je-ah*) [*βλέννα*, mucus; *ῥηγνύναι*, to burst forth]. An excessive catarrhal discharge from the urethra or vagina. See *Gonorrhea*.

Blennorrhagic (*blen-or-a'-jik*) [*βλέννα*, mucus; *ῥηγνύναι*, to burst forth]. Relating to blennorrhagia.

Blennorrhea (*blen-or-e'-ah*) [*βλέννα*, mucus; *ῥέειν*, to flow]. Same as *Blennorrhagia*.

Blennorrheal (*blen-or-e'-al*) [*βλέννα*, mucus; *ῥέειν*, to flow]. Relating to blennorrhea.

Blennorrhinia (*blen-or-in'-e-ah*) [*βλέννα*, mucus; *ῥίς*, the nose]. Coryza; nasal catarrh.

Blennosis (*blen-o'-sis*) [*βλέννα*, mucus; *νόσος*, disease: *pl.*, *Blennoses*]. Any disease of a mucous membrane.

Blennostasis (*blen-os'-tas-is*) [*βλέννα*, mucus; *στάσις*, a staying]. The checking or suppression of any mucous discharge.

Blennostatic (*blen-os-tat'-ik*) [*βλέννα*, mucus; *στάσις*, a staying]. Effecting a blennostasis; checking mucous discharges.

Blennothorax (*blen-o-tho'-raks*) [*βλέννα*, mucus; *θώραξ*, the thorax]. Pulmonary catarrh.

Blennotorrhea (*blen-ot-or-e'-ah*) [*βλέννα*, mucus; *οὖς*, ear; *ῥοία*, a flow]. A mucous discharge from the ear.

Blennozemia (*blen-o-ze'-me-ah*) [*βλέννα*, mucus; *ζημία*, loss]. Same as *Blennorrhea*.

Blennuria (*blen-u'-re-ah*) [*βλέννα*, mucus; *οὖρον*, urine]. The presence of mucus in the urine.

Blennymenitis (*blen-im-en-i'-tis*) [*βλέννα*, mucus; *ὑμήν*, membrane]. Inflammation of any mucous surface.

Blephara (*blef'-ar-ah*). Plural of *Blepharon*, *q. v.*

Blepharadenitis (*blef-ar-ad-en-i'-tis*) [*βλέφαρον*, the eyelid; *ἀδήν*, a gland]. Inflammation of the Meibomian glands.

Blepharal (*blef'-ar-al*) [*βλέφαρον*, the eyelid]. Relating to an eyelid or to the eyelids.

Blepharanthracosis (*blef-ar-an-thrak-o'-sis*) [*βλέφαρον*, the eyelid; *ἀνθράκωσις*, a charring; carbunculization]. Carbuncular inflammation of the eyelid.

Blepharedema (*blef-ar-e-de'-mah*) [*βλέφαρον*, the eyelid; *οἴδημα*, a swelling]. Swelling or edema of the eyelids.

Blepharelosis (*blef-ar-el-o'-sis*) [*βλέφαρον*, the eyelid; *εἴλειν*, to roll]. Synonym of *Entropion*.

Blepharemphysema (*blef-ar-em-fis-e'-mah*) [*βλέφαρον*, eyelid; *ἐμφύσημα*, an inflation]. Emphysema of an eyelid.

Blepharis (*blef'-ar-is*) [*βλεφαρίς*, an eyelash]. An eyelash.

Blepharism (*blef'-ar-izm*) [*βλεφαρίζειν*, to wink]. Rapid involuntary winking; morbidly excessive nictitation.

Blepharitic (*blef-ar-it'-ik*) [*βλέφαρον*, the eyelid; *ιτις*, inflammation]. Relating to or affected with blepharitis.

Blepharitis (*blef-ar-i'-tis*) [*βλέφαρον*, the eyelid; *ιτις*, inflammation]. Inflammation of the eyelids. **B. ciliaris**, tarsal ophthalmia; a pustular disease of the border of the eyelids, often the result of local irritation arising from habits of uncleanliness. **B. marginalis**, inflammation seated at the marginal border of the lids. **B. ulcerosa**, an ulcerative inflammation of the eyelids.

Blepharo-adenitis (*blef'-ar-o-ad-en-i'-tis*). See *Blepharadenitis*.

Blepharo-adenoma (*blef'-ar-o-ad-en-o'-mah*) [*βλέφαρον*, the eyelid; *ἀδήν*, a gland; *ὄμα*, a tumor: *pl.*, *Blepharo-adenomata*]. An adenoma on the ciliary margin of the eyelid.

Blepharo-atheroma (*blef'-ar-o-ath-er-o'-mah*) [*βλέφαρον*, an eyelid; *ἀθήρωμα*, a tumor full of gruel-like matter]. An atheromatous tumor imbedded in the tarsus of the lid; it is cystic and contains a semifluid detrital substance.

Blepharochromidrosis (*blef'-ar-o-kro-mid-ro'-sis*) [*βλέφαρον*, the eyelid; *χρῶμα*, color; *ἱδρώς*, sweat]. Colored sweat of the eyelids, usually of a bluish tint.

Blepharocleisis (*blef-ar-o-kli'-sis*) [*βλέφαρον*, the eyelid; *κλεῖσις*, closure]. Ankyloblepharon; abnormal closure of the eyelids.

Blepharodyschrea (*blef-ar-o-dis-kre'-ah*), or **Blepharodyschroia** (*blef-ar-o-dis-kroi'-ah*) [*βλέφαρον*, the eyelid; *δυσ-*, bad; *χροιά*, color]. Discoloration of the eyelid from nevus or from any other cause.

Blepharoedema (*blef-ar-o-e-de'-mah*). See *Blepharedema*.

Blepharolithiasis (*blef'-ar-o-lith-i'-as-is*) [*βλέφαρον*, the eyelid; *λίθος*, a stone]. The formation of marginal concretions within the eyelid.

Blepharon (*blef'-ar-on*) [*βλέφαρον*, the eyelid: *pl.*, *Blephara*]. The eyelid; palpebra.

Blepharoncus (*blef-ar-ong'-kus*) [*βλέφαρον*, the eyelid; *ὄγκος*, an enlargement]. A swelling of the eyelid.

Blepharopachynsis (*blef-ar-o-pak-in'-sis*) [*βλέφαρον*, the eyelid; *παχύς*, thick]. Morbid thickening of the eyelid.

Blepharophimosis (*blef-ar-o-fi-mo'-sis*) [*βλέφαρον*, the eyelid; *φίμωσις*, a shutting up]. Abnormal smallness of the palpebral openings.

Blepharophryplastic (*blef-ar-o-frip-las'-tik*) [*βλέφαρον*, the eyelid; *ὀφρυς*, brow; *πλαστικός*, plastic]. Pertaining to the plastic surgery of the lid and eyebrow.

Blepharophyma (*blef-ar-o-fi'-mah*) [*βλέφαρον*, the eyelid; *φίμα*, a growth: *pl.*, *Blepharophymata*]. A tumor of, or outgrowth from, the eyelid.

Blepharoplastic (*blef-ar-o-plas'-tik*) [*βλέφαρον*, the eyelid; *πλαστικός*, plastic]. Pertaining to blepharoplasty.

Blepharoplasty (*blef'-ar-o-plas-te*) [βλέφαρον, the eyelid; πλάσσειν, to form]. An operation for the formation of any part of the eyelid destroyed by wound or lesion, by engrafting or transplanting from a contiguous healthy part.

Blepharoplegia (*blef-ar-o-ple'-je-ah*) [βλέφαρον, the eyelid; πληγή, a stroke]. Paralysis of an eyelid.

Blepharoptosis (*blef-ar-op-to'-sis*) [βλέφαρον, the eyelid; πτῶσις, a fall]. Ptosis of an upper eyelid. See *Ptosis*.

Blepharopyorrhea (*blef-ar-o-pi-or-e'-ah*) [βλέφαρον, the eyelid; πύον pus; ῥέειν, to flow]. A flow of pus from the eyelid.

Blepharorrhaphy (*blef-ar-or'-a-fe*) [βλέφαρον, the eyelid; ῥαφή, a seam]. The stitching together of a part of the blepharal slit.

Blepharorrhea (*blef-ar-or-e'-ah*) [βλέφαρον, the eyelid; ῥοία, a flow]. A discharge from the eyelid.

Blepharospasm (*blef'-ar-o-spazm*) [βλέφαρον, the eyelid; σπασμός, a spasm]. Spasm of the orbicularis palpebrarum muscle. Excessive winking.

Blepharospath (*blef'-ar-o-spath*) [βλέφαρον, the eyelid; σπάθη, a blade]. A forceps for taking up or holding an artery; for use in operations on the eyelid.

Blepharostat (*blef'-ar-o-stat*) [βλέφαρον, the eyelid; ἱστάναι, to cause to stand]. An instrument for holding the eyelids apart or firm whilst performing operations upon the eyes or lids.

Blepharostenosis (*blef-ar-o-ste-no'-sis*) [βλέφαρον, the eyelid; στενός, narrow]. Diminution of the space between the eyelids.

Blepharosynechia (*blef-ar-o-sin-ek-i'-ah*) [βλέφαρον, the eyelid; συνέχεια, a holding together]. The adhesion or growing together of the eyelids.

Blepharotomy (*blef-ar-ot'-o-me*) [βλέφαρον, the eyelid; τέμνειν, to cut]. Incision into the eyelid. **B., Oblique.** Sphincterotomy, or Stellwag's operation. See *Operations, Table of*.

Blesitas (*ble'-sit-as*) [*blæsus*, a lisping]. Stammering or lisping; the use of a vocalized consonant instead of a mute; as *b* for *p*. Also the condition of one with distorted limbs. Applied also to an angular curvature of the spine. The term is loosely used.

Blessed Thistle. (*bles'-ed this'-l*). See *Carduus*.

Blight (*blīt*) [origin unknown]. A partial paralysis of certain facial nerves, arising from sudden or extreme cold. **B. of the Eye,** an extravasation of blood within the conjunctiva.

Blind (*blīnd*) [AS., *blind*]. Without sight. Deprived of sight. **B. Spot,** that part of the area of the fundus of the eye where the optic nerve enters. **B. Staggers.** See *Staggers*.

Blinder (*blīnd'-er*) [AS., *blind*]. A shield worn before an eye, to temporarily throw it out of function. See *Gould, Method of*. **B. Treatment** of monocular amblyopia. See *Gould, Method of*.

Blindness (*blīnd'-nes*) [AS., *blind*]. Want of vision. **Color-B.,** subnormal perception of colors. This condition is found in about 4 per cent. of people, is more frequent in men than in women, and is probably due to non-exercise of the color-sense. **Complete Color-B.** is very rare, the different colors probably appearing as different intensities or shades of white light. In **Partial Color-B.** subnormal perception of red is the most frequent, green, blue and yellow, respectively, being next in order. **Tests for Color-B.** usually consist in matching and classifying colored yarns. **Cortical B.,** B. due to lesion of the cortical center of vision. **Day-B.** See *Nyctalopia*. **Mind-B.** See *Psychic B*. **Moon-B.,** a rare condition of retinal anesthesia said to be due to exposure of the eyes to the moon's rays in sleeping. **Night-B.** See *Hemeralopia*. **B., Object-.** See *Apraxia*. **Psychic B.,** loss of conscious visual sensation from destruction of the cerebral visual center; there is sight but not recognition. **Snow-B.,** photophobia and conjunctivitis due to exposure of the eyes to the glare of sunlight upon snow. **B., Word-.** See *Aphasia*.

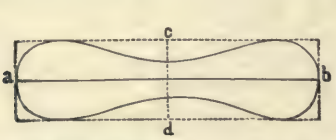
Blister (*blis'-ter*) [ME., *blister*, a vesicle]. A vesicle resulting from the exudation of serous fluid between the epidermis and true skin. Also the agent by which the blister is produced. **B., Fly,** a beetle, *Cantharis vesicatoria*, the body of which is used as a blistering agent; a blister of cantharides. **B., Flying,** a blister that remains long enough to produce redness of the skin and not vesication. **B. Test,** for gout. The serum from a blister in a gouty individual will yield crystals of uric acid when examined by Garrod's thread test (*q. v.*), only, however, when the blister is situated at a distance from the affected joint. According to Garrod the acid cannot be detected in the fluid from a blister in the neighborhood of the gouty articulation, and he infers that gouty inflammation causes a local destruction of uric acid.

Blistering (*blis'-ter-ing*) [ME., *blister*, a vesicle]. Forming a vesicle upon the skin. **B. Collodion,** a solution of cantharidin in ether. **B. Liquid.** Same as *B. Collodion*. **B. Paper,** paper saturated with cantharides; used for producing vesication.

Bloat (*blōt*) [ME., *blote*, swelling]. 1. Puffiness; edema; turgidity from any cause, as from anasarca. 2. A form of colic in the horse produced by tympanitic distention of the intestines. Also called *Wind Colic*.

Block (*blok*) [ME., *blok*, a piece of wood]. In dentistry a mass of gold foil for filling teeth, made by folding a tape of foil upon itself several times by means of pliers. **B. Teeth.** Two or more artificial teeth carved from a piece of ivory, or carved or moulded from a mass of porcelain paste and afterwards baked and enamelled. **B. Teeth, Biscuiting, or Crucing of.** The teeth, after being moulded or carved, are placed on a slide and put in the muffle of a furnace and subjected to a bright-red heat, by which process the particles become sufficiently agglutinated and hardened to receive the enamel. This is called *biscuiting* or *crucing*.

Blond (*blond*) [Fr., *blond*, light, fair]. 1. Light complexioned; fair. 2. A person with a fair complexion.



Blood (*blud*) [ME., *blood*]. The fluid that circulates through the heart, arteries, and veins, supplying nutritive material to all parts of the body. In the human being the blood of the arteries is bright-red; that of the veins dark-red. Blood consists of colorless plasma in which are suspended the red and colorless corpuscles. When exposed to the air it coagulates, forming a red-clot and a yellowish fluid called serum. Healthy blood consists of 79 per cent of water, and 21 per cent. solids. **B.-Casts,** tube-casts to which red-blood corpuscles are attached. **B.-Corpuscles,** small, circular, biconcave discs floating in the blood. Red corpuscles are circular in mammals (except the camel), and elliptical in birds and reptiles. In man they are about $\frac{1}{3200}$ inch in diameter and $\frac{1}{1200}$ inch thick. Colorless corpuscles are about one-third larger in diameter and comparatively few. They exhibit movements similar to those of *amebæ*. The coloring-matter of the B. is found in a substance

HUMAN COLORED BLOOD-CORPUSCLES.

1, on the flat; 2, on edge; 3, rouleau of corpuscles. (*After Landois.*)

known as hemoglobin, and is said to be due to minute quantities of the salts of iron. **B.-cure**, the therapeutic employment of fresh blood, mainly that of bullocks.

IDEAL TRANSVERSE SECTION OF A HUMAN RED BLOOD-CORPUSCLE (magnified 500 times).
a, *b*, diameter; *c*, *d*, thickness. (*After Landois.*)

B.-crystals, crystals of a substance known as hematoidin. **B., Defibrinated**, freshly shed blood that has been beaten with a glass rod or tongs until the fibrin has all adhered to the rod in the form of a solid, fibrous, yellowish-white, elastic mass. **B.-flower.** See *Asclepias*. **B.-fluke.** See *Bilharzia Hematobia*. **B., Gases of**, certain gases given off when blood is exposed to the vacuum produced by an air-pump. They are carbonic acid, nitrogen, and oxygen, and constitute about half of the volume of the blood. **B.-globules.** Same as *B.-corpuscles*. **B.-heat**, a temperature varying from 98° to 100° F. **B.-islands**, a term applied to the groups of corpuscles developed during the first days of embryonic life, within the large branched cells of the mesoblast. **B., Loss of.** See *Hemorrhage*. **B.-mole**, in obstetrics, a mole consisting of the decidua only, interspersed with effusions of blood, the fetus having been expelled. **B.-plaque.** See *B.-platelets*. **B.-plasma**, the *liquor sanguinis*, or fluid part of the blood. **B.-plate.** See *B.-platelets*. **B.-platelets**; besides the red and colorless corpuscles, the blood contains smaller formed elements, concerning which there are many theories and names. Hayem describes *Hematoblasts;* Pouches describes *Globulins;* Max Schultze, *Körnchen* (elementary bodies); Bizzozero, *Blut-plättchen*, or *Blood-platelets*. They are circular or oval, light gray, and in human blood destitute of nuclei. They are from 1 to 1.3 μ in size, there being from 18,000 to 300,000 in the cubic millimeter. **B.-poisoning**, a common term denoting any ailment arising from the introduction of decomposing organic matter or putrefactive germs into the blood. See *Anthrax*, *Pyemia* and *Septicemia*. **B.-pressure**, the force of compression exerted by the blood upon the walls of the vessels under the influence of the heart's action, the elastic walls, etc. Various instruments have been devised to estimate the amount of this pressure, the *Hemadynamometer of Poiseuille*, *Ludwig's Kymograph*, *Fick's Spring Kymograph*, *v. Basch's Sphygmomanometer*, the *Graduated Sphygmograph*, *Manometer*, etc. **B.-root.** See *Sanguinaria*. **B.-shot**, extravasated with blood. **B.-spavin.** See *Spavin*. **B.-stone.** See *Conspectus of Pigments*, under *Pigment*. **B.-striking.** Synonym of *Anthrax*. See also *Black-leg*. **B.-tablet.** See *Blood-plate*. **B.-tumor.** See *Hematoma*. **B.-vessel**, a tube-like structure for conveying the blood through the body. Cf. *Artery* and *Vein*.

Bloodless (*blud'-les*) [ME., *blood*]. Without blood. **B. Operations**, surgical operations, such as amputations, in which the member is so bandaged by compresses and elastic bands that the blood is expelled and kept from the part to be operated upon.

Bloodletting (*blud-let'-ing*) [ME., *blood; leten*]. The artificial abstraction of blood from the body. **B., General**, venesection or phlebotomy; it acts by reducing the heart's action and diminishing the quantity of blood. It is occasionally used with excellent results in pneumonia, sunstroke, etc. **B., Local or Topical.** See *Cupping*, *Leeching* or *Scarification*. It is useful in certain inflammatory conditions.

Bloody (*blud'-e*) [ME., *blood*.] Having the nature of, or filled with blood. **B. Flux.** See *Dysentery*. **B. Milk.** See *Red Milk Bacillus* and *Bacteria, Synonymatic, Table of*. **B. Murrain.** Synonym of *Anthrax*. **B. Sweat.** See *Ephidrosis*.

Bloom (*blūm*) [ME., *blom*, a blossom]. 1. A blossom. 2. A state of health. 3. See *Lubricating Oils*.

Blossom (*blos'-um*) [ME., *blossome*, a flower]. In biology, (1) the flower of a plant; (2) to put forth flowers.

Blotch (*bloch*) [origin uncertain]. A pimple or blain; a small discolored patch of skin; a group of small pustules.

Blow (*blo*) [AS., blôvan]. 1. To pant. 2. To deposit eggs upon, as flies.

Blowing Sound. See *Bellows Murmur*.

Blown (*blōn*) [ME., blowen]. In farriery, with the stomach distended from gorging with food. **B. Meat**, meat that has been blown up with air in order to give it a white color and to hide defects in its condition.

Blow-pipe (*blo'-pip*). A cylindrical tube, from twelve to eighteen inches long, about half an inch in diameter at one end, and gradually tapering to a fine point or nozzle, which may be straight or bent at a right angle; it is used in directing the flame of a lamp in a fine conical tongue. **B., Automaton**, in dentistry, a blow-pipe especially designed for crown and bridge-work, into which the air is admitted and conducted through a small tube to the upper end of another which admits illuminating gas. The supply of both air and gas is regulated by the presssure of the thumb or fingers on the rubber tubes of the appliance. **B., Oxyhydrogen**, an apparatus for producing intense heat by burning hydrogen or illuminating gas at the end of a mixing nozzle.

Bloxam's Test. See *Tests, Table of*.

Blue (*bloo*) [ME., blew]. One of the colors of the spectrum. **B., Alexandria.** Same as *Egyptian Blue*. **B.-Baby**, a child with blue disease. **B.-bottle.** See *Centaurea*. **B. Blindness**, acyanopsia. **B. Cohosh.** See *Caulophyllum*. **B. Disease**, cyanosis of the new-born, due frequently to congenital disease of the heart. This usually consists in constriction of the pulmonary artery with deficiency in the septum of the ventricles, the aorta communicating with the right ventricular cavity. See *Cyanopathy*. **B. Flag.** See *Iris*. **B. Gentian**, the root of *Gentiana catesbæi*, tonic and stomachic. Dose of fld. ext. ♏ x–xl. Unof. **B. Gum.** See *Gingival*. **B. Gum Tree.** See *Eucalyptus*. **B. Cardinal Flower.** Synonym of *Lobelia syphilitica*. **B. Edema**, a puffed and bluish appearance of the limb sometimes seen in hysterical paralysis. **B. Jaundice.** See *Acleitocardia*. **B. Line.** See *Lead Line*. **B. Malachite.** Same as *Azurite*. **B. Mass.** See *Hydrargyrum*. **B.-milk Bacillus**, *Bacillus cyanogenus*; it imparts a blue color to milk and renders it irritating to the stomach and intestine. See *Bacteria, Synonymatic Table of*. **B. Ocher.** See *Conspectus of Pigments* under *Pigment*. **B. Ointment.** See *Hydrargyrum*. **B. Pill.** See *Hydrargyrum*. **B., Prussian.** See *Pigment*. **B. Stick.** Same as *B. Stone*. **B. Stone.** See *Copper* and *B. Vitriol*. **B. Verditer.** Same as *Bremen Blue*. **B. Vervain.** See *Verbena*. **B. Vitriol.** See *Conspectus of Pigments*, under *Pigment*.

Blues (*blooz*) [ME., *blew*]. A popular name for short periods of mental depression; they are usually associated with indigestion.

Blumenbach, Clivus of. See *Clivus*. **B., Plane of.** See *Plane*.

Blunt-hook (*blunt'-hook*). An obstetric instrument, used mainly in embryotomy.

Blunzen (*blunz'-en*) [Ger.]. A peculiar Würtemberg sausage, made by filling the stomachs of hogs with meat, and cured by a method favoring putrefaction. This is the most common source of sausage-poisoning. See *Allantiasis* and *Botulismus*.

Blushing (*blush'-ing*) [ME., *blushen*, to glow]. The reddening of the face through shame, modesty, or confusion. See *Rubor*.

Boa (*bo'-ah*) [L.]. An ancient name applied to various eruptions and eruptive diseases, as measles, smallpox, hydroa, syphilis. **B. Vista Fever.** See *Fever*.

Boas's Test. See *Tests, Table of.*

Boat-belly (*bōt'-bel-e*). See *Scaphoid Abdomen.*

Bobb's Operation. See *Operations, Table of.*

Bochdalek's Ganglion. See *Ganglia, Table of.* **B's Pseudo-ganglion.** See *Pseudo-ganglion.*

Bock, Nerve of. See *Nerves, Table of.*

Bockhart's Blood-serum Mercury. A mercurial used in the treatment of syphilis. It is prepared as follows from the blood of sheep, horses, or oxen: 10½ drams of blood-serum, sterilized after Koch's method, are placed in a graduated glass, and then mixed with a solution of 45 grains of bichlorid of mercury dissolved in one ounce of boiling distilled water. The precipitate formed is redissolved by the addition of 105 grains of chlorid of sodium, dissolved in five drams of distilled water. This compound is then a three per cent. solution of blood-serum mercury. By adding enough distilled water to make six ounces five drams, we have the solution generally used, containing one and one-half per cent of the mercurial salt. Injections of 15 minims (containing one-quarter grain of sublimate, combined with albumin) are made daily.

Bodo (*bo'-do*) [L.]. A genus of flagellate protozoans. **B. saltans** has been reported as living in great numbers in unhealthy ulcerations. **B. urinarius** has been found in the urine of cholera-patients.

Body (*bod'-e*) [AS., *bodig*]. 1. The animal frame with its organs. Also a cadaver or corpse. 2. This term is applied by the manufacturer of porcelain teeth to the parts composing the principal portion of the artificial organ. 3. The tube of a microscope, including the draw-tube; it is the tube receiving the ocular at one end and the objective at the other. See also *Corpus*, and *Corpora*. **B. Cells.** See *Heredity*. **B. Louse.** See *Pediculus*. **B.-plasm.** See *Somatoplasm*, under *Heredity*. **B., Sub-thalamic.** See *Luys, Body of.*

Boeckel's Operations. See *Operations, Table of.*

Boerhaave, Glands of. See *Gland.*

Bog (*bog*) [E. dial.]. To ease the body by stool.

Bog (*bog*) [Gael., *bogan*, a bog]. Ground that is wet and spongy. **B.-bean.** See *Buckbean.* **B.-spavin.** See *Spavin.*

Bogue's Operation. See *Operations, Table of.*

Böhm's Acid Carmin. See *Stains, Table of.* **B.'s Operation.** See *Operations, Table of.*

Böhmer's Hematoxylin Solution. See *Stains, Table of.*

Bohun Upas (*bo'-hun-u'-pas*). See *Antiar* and *Upas.*

Boil (*boil*) [ME., *boile*]. A furuncle; a localized inflammation of the skin and subcutaneous connective tissue attended by the formation of pus. See *Furunculus.* **B., Aleppo** or **B., Delhi,** a peculiar ulcerative affection endemic in India, due to a specific and pathogenic microbe. It has been proposed by Heydenreich to call this *Tropical Boil.* Other names are *Penjdeh Boil* and *Bouton Biskra.* **B.-plague.** Synonym of *Anthrax.*

Boiled Oil. Linseed oil that has been heated to a high temperature (130° C. and upward), while a current of air is passed through or over the oil, and the temperature increased until the oil begins to effervesce from evolution of products of decomposition. **B.-sago Matter.** Vitreous-looking bodies frequently seen in the stools of dysentery. They are simply granules of starch ingested as food and remaining partially or wholly undigested. They are also called *Frogs'-spawn matter.*

Boiler-makers' Deafness. See *Deafness.*

Boiling (*boil'-ing*) [ME., *boilen*, to stir]. The vaporization of a liquid when it gives off vapor having the same tension as the surrounding air. Most tissues, animal and vegetable, are softened and rendered more or less soluble by boiling. Albumin and most albuminoids, however, are rendered insoluble. The temperature of boiling water at the level of the sea is 212° F. (100° C.); it decreases with increasing altitude. **B. Test.** See *Tests, Table of.*

Boissons (*bwah'-song*) [*Fr.*]. Cheap fermented liquors made from raisins or other dried fruits to which sweetened water is added and fermentation allowed.

Bola (*bo'-lah*). See *Myrrh.*

Bolary (*bo'-lar-e*) [*bolus*, clay]. Of the nature of bole.

Bolax (*bo'-laks*). See *Balsam-bog.* **B. Gum.** See *Balsam-bog.*

Bolbomelanoma (*bol-bo-mel-an-o'-mah*) [βολβός, a bulb; μέλανωμα, blackness]. Melanotic carcinoma of the eyeball.

Boldin (*bol'-din*). See *Boldus.*

Boldo (*bol'-do*). See *Boldus.* **B.-glucine,** an aromatic glucosid obtained from *Peumus boldus* and other species. It is a hypnotic in doses of gr. xx–℥j. Unof.

Boldoa (*bol'-do-ah*) [Chilian, *Boldu*]. A genus of monimiaceous trees. **B. fragrans,** the tree *Peumus boldus.* See *Boldus.*

Boldus (*bol'-dus*) [L.]. Boldo. The leaves and stems of an evergreen, *Peumus boldus*, native to Chili and vicinity, sometimes used in anemia and general debility as a substitute for quinin. It contains a bitter alkaloid, *Boldin*, an hypnotic in doses of gr. iij. **B., Ext., Fld.** Dose ♏j–iv. **B., Tinct.,** contains 20 per cent. of the drug. Dose ♏v–viij.

Bole (*bōl*) [βῶλος, a clod of earth]. 1. A translucent, soft variety of clay formerly much used in medicine, internally as an astringent, externally as an absorbent. Dose gr. v–x. Several varieties are used, as the *Armenian bole;* the *Lemnian*, and the *French bole.* 2. A bolus. See *Bolus.*

Boletus (*bo-le'-tus*) [βωλίτης, a kind of mushroom]. A genus of fungi, some species of which are edible, while others are highly poisonous. None is official.

Bologna (*bo-lōn'-yah*) [It.]. A city of northern Italy. **B. Lime.** Same as Vienna White. **B. Phosphorus,** a sulphid of barium, having the property of emitting a pale, feeble light in the dark.

Bolus (*bo'-lus*) [L.: *pl.*, *Boli*; *Eng. pl.*, *Boluses*]. 1. A mass of medicine exhibited in the form of a large pill. 2. A mass of masticated food ready to swallow.

Bombardier Beetle. See *Brachenin.*

Bombax (*bom'-baks*) [*bombyx*, cotton]. A genus of huge tropical malvaceous trees of many species. Some of these trees afford demulcent diuretic medicines. *Mocmain, q.v.*, is a product of *B. malabaricum.*

Bombus (*bom'-bus*) [βόμβος, a humming sound]. A ringing or buzzing sound in the ears; tinnitus. Also a sonorous movement or rumbling flatus of the intestines: borborygmus.

Bona Fever (*bo'-nah fe'-ver*). See *Fever.*

Bonbon (*bon'-bon*) [Fr.]. A confection. **B., Pectoral,** a medicated antibechic confection.

Bond's Operation. See *Operations, Table of.*

Bonduc Seeds (*bon'-duk sēdz*). See *Bonducella.*

Bonducella (*bon-du-sel'-ah*) [L.]. Bonduc Seeds. The seeds of *Cæsalpinia bonducella*, a tropical plant. It is a bitter tonic and antiperiodic in intermittent fevers. Dose gr. x–xv.b **B., Pulv., Comp.**, contains bonduc and black pepper. Dose gr. xv–xx.

Bone (*bōn*) [AS., *bān*, a bone]. A hard tissue that constitutes the framework or skeleton of the body. It is composed mainly of tri-calcium phosphate and cartilage. Bone usually consists of a compact outer mass covered with *periosteum*, surrounding a reticulated inner structure that encloses a central cavity filled with marrow. A transverse section of a long bone shows bone-tissue to be composed of a number of nearly circular zones, each having a central tube, the *Haversian canal*, through which the blood circulates. Surrounding the *Haversian* canal are concentrically arranged belts of oblong spaces called *lacunæ*. Each lacuna is the outlet of a number of *canaliculi*, through which the nutrition is conveyed to all parts of the bone. A table of bones is appended. **B. Ash**, the calcic phosphate remaining after bones have been incinerated. **B. Binder.** See *Osteocolla*. **B.-black.** Same as *Animal Black*. **B.-brown.** See *Pigments, Conspectus of*. **B. Cartilage.** See *Ostein*. **B.-conduction**, the transmission of sound-waves to the auditory nerve by means of sonorous vibrations communicated to the bones of the skull, the impression reaching the nerve in part directly and in part by way of the tympanic structure. The tuning-fork is the instrument most commonly used as a test of bone-conduction. Bone-conduction is lost or diminished in many of the typical labyrinthine lesions, *e. g.*, in true Menière's disease. See *Air-conduction*. **B. Earth.** See *Ossiterra*. **B., Epipteric** [ἐπί, upon; πτερόν, a wing], a small Wormian bone sometimes found between the great wing of the sphenoid and the anterior inferior angle of the parietal. **B.-fat**, a whitish-yellow fat obtained by boiling bones. It is used in soap making. **B.-gelatin.** See *Gelatin*. **B.-glue.** See *Glue*. **B. incarial.** See *Incarial*. **B.-nippers**, surgical cutting-forceps for use on bones. **B.-oil**, a foul-smelling oil obtained in the dry distillation of bone. **B.-setter**, a specialist at setting bones; usually an uneducated empiric, and often a pretender to hereditary skill in the business. **B.-spavin.** See *Spavin*. **B.-tumor.** Synonym of *Actinomycosis*.

Bonelet (*bōn'-let*). See *Ossicle*.

Bonellein (*bo-nel'-in*) [*Bonellia*, a genus of gephyrean worms, named after F. A. Bonelli, an Italian naturalist]. In biology, the green pigment of certain annelids, as *Bonellia viridis*.

Boneset. See *Eupatorium*.

Bonnafond's Apparatus. An apparatus for generating vapors and injecting them into the middle ear through the Eustachian tube.

Bonnet's Capsule. See *Ocular Sheath*. **B. Operations.** See *Operations, Table of*.

Bontius, Pills of. Purgative pills used in dropsy. They contain gamboge, Socotrin aloes, and gum ammoniac.

Bonwill's Crown. In dentistry, an artificial crown of all porcelain to be engrafted on a natural root. **B's. Method**, 1. A method of producing anesthesia. It is done by rapid breathing of the ordinary atmospheric air. The patient opens his mouth and breathes freely, quickly, and deeply, and in a few seconds or minutes partial anesthesia supervenes. 2. A method of articulating teeth.

Bonzel's Operation. See *Operations, Table of*.

Booboo (*boo'-boo*). See *Boohoo*.

Boohoo (*boo'-hoo*) [native S. Pacific]. A kind of gastritis with slight fever and with great nostalgia and depression of spirits. It attacks strangers in some of the Pacific Islands.

Booker, Bacillus of. See *Bacteria, Synonymatic Table of*.

Boot, Junod's. See *Junod's Boot*.

Boracic Acid (*bo-ras'-ik as'-id*). See *Acid, Boric*; also *Boron*.

Borage (*bo'-rāj*) [ME., *borage*]. The plant *Borago officinalis*, a demulcent, mild refrigerant and diaphoretic. Dose of fld. ext., ʒ j. Unof.

Boraginaceous (*bo-raj-in-a'-se-us*) [*Boraginaceæ*, a natural order of plants]. Pertaining to the Boraginaceæ.

Borate (*bo'-rāt*) [Ar., *bōraq*, borax]. Any salt of boric acid.

Borax (*bo'-raks*). See *Boron*. **B. Bath.** See *Bath*.

Borborygmus (*bor-bor-ig'-mus*) [βορβορυγμός, a rumbling: *pl.*, *Borborygmi*]. A rumbling of the bowels.

Bordeaux Method. A form of cotton antiseptic dressing for stumps.

Borelli's Operation. See *Operations, Table of*.

Boric Acid (*bo'-rik as'-id*). See *Boron*.

Born (*born*) [AS., *boren*, to bear, bring forth]. Brought into the world by the process of parturition. **B. Alive.** See *Live Birth*.

Borneo Camphor (*bor'-ne-o-kam'-for*). See *Borneol*.

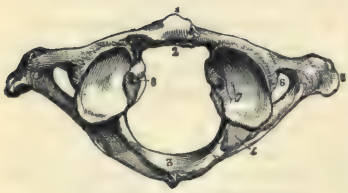
Borneol (*bor'-ne-ol*) [*Borneo*], $C_{10}H_{18}O$. Borneo Camphor; a substance that occurs in *Dryobalanops camphoræ*, a tree growing in Borneo and Sumatra. It is artificially prepared by acting with sodium upon the alcoholic solution of common camphor. It is quite like Japan camphor, and has a peculiar odor resembling that of peppermint. It sublimes in six-sided leaflets, melts at 198° and boils at 212°. It produces spasms of an epileptiform character.

Born's Method. A method of reconstructing objects from microscopic sections; by means of a camera, the outlines are transferred to wax plates, which are then cut out so as to correspond to the sections.

Boro-borax (*bo-ro-bo'-raks*). A crystalline combination of borax and boric acid. It is used as an antiseptic.

Borofuchsin. See *Stains, Conspectus of*.

Boroglycerid (*bo-ro-glis'-er-id*). See *Boroglycerin*.



Boroglycerin (*bo-ro-glis'-er-in*) [Ar., *bōraq*, borax; γλυκερός, sweet]. A mixture of boric acid, 62 parts, with glycerin, 92 parts, it is called also *boroglycerid*, and *glyceryl borate*. It is a solid preparation, soluble in water. It is used as a local application in eye and skin affections. It is an active antiseptic in a solution of 1 to 40. Unof.

Boron (*bo'-ron*) [Ar., *bōraq*, borax]. B = 11; quantivalence III, V. The base of boric acid and of the mineral borax. **Boracic**, or, more properly, **Boric Acid**, H_3BO_3, a crystalline substance, found native in the volcanic lagoons of Tuscany. It occurs in white, transparent crystals, soluble in water and alcohol; it is an active antiseptic, and is much used in parasitic diseases of the skin. Dose gr. v–xx. *Unguent. Acidi Borici* (B. P.), contains hard paraffin 2, soft paraffin 4, boric acid 1. It is used as an antiseptic and in dermatology. **Borax**, $Na_2B_8O_7,10H_2O$, sodium biborate, occurs in lacustrine deposits as white, transparent crystals, soluble in water, alcohol and glycerin. It is used as an antiseptic wash for ulcers and indolent lesions and is valuable also as an emmenagogue, and in leucorrhea. Dose gr. v–xl. All unof. *Glycerinum Boracis* (B. P.), contains borax, glycerin and distilled water; it is used as a local application. *Mel Boracis* (B. P.), borax honey, contains borax, clarified honey and glycerin (about 1 in 7); it is used as a local application.

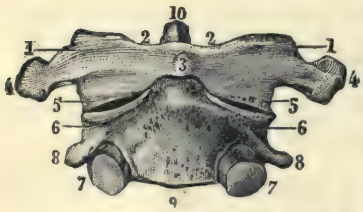
TABLE OF BONES.

Name.	Principal Features.	Articulations and Variety.	Muscular and Ligamentous Attachments.
Astragalus.	Irregularly cubical; forms the keystone of arch of foot; head, neck, six articular surfaces.	Tibia, Fibula, *ginglymus.* Os calcis, Scaphoid, *arthrodia.*	Internal and external lateral ligaments.
Atlas.	First cervical vertebra; ring-like; anterior and posterior arches and tubercles; articular surfaces.	Occipital bone—*double arthrodia.* Axis, four joints—*diarthrodia rotatoria and double arthrodia.*	Longus colli (*tubercle*), rectus capitis posticus minor (*spinous process*).
Axis.	Second cervical vertebra; body, odontoid process, pedicles, laminæ, spinous process, transverse processes, articular surfaces.	First cervical vertebra—*diarthrodia rotatoria and double arthrodia.* Third cervical vertebra—*double arthrodia.*	Longus colli, check ligaments.
Calcaneum.	The heel bone; irregularly cuboidal; lesser process [sustentaculum tali], greater process, peroneal ridge or spine, superior groove, articular surfaces.	Astragalus, Cuboid, Scaphoid, *arthrodia.*	Tibialis posticus, tendo Achillis, plantaris, abductor pollicis, abductor minimi digiti, flexor brevis digitorum, flexor accessorius, extensor brevis digitorum.
Carpal.	Consists of scaphoid, semilunar, cuneiform, pisiform, trapezium, trapezoid, os magnum, unciform. See *Individual Bones.*		
Clavicle.	Collar bone, resembles the italic "*f*"; conoid tubercle, deltoid tubercle, oblique line.	Sternum, Scapula, Cartilage of first rib, *arthrodia.*	Sterno-cleido-mastoid, trapezius, pectoralis major, deltoid, subclavius, sterno-hyoid, platysma.
Coccyx.	The last bone of the vertebral column; resembles a cuckoo's beak; usually composed of four small segments; base, apex, cornua.	Sacrum—*amphiarthrodia.*	Coccygeus, gluteus maximus, extensor coccygis, sphincter ani, levator ani.
Cranial.	Occipital, parietal (two), frontal, temporal (two), sphenoid, ethmoid. See *Individual Bones.*		
Cuboid.	Somewhat pyramidal; tuberosity.	Os calcis, External cuneiform, 4th and 5th metatarsal bones. *arthrodia.*	Flexor brevis pollicis.
Cuneiform (of carpus).	Pyramidal.	Semilunar, Pisiform, Unciform, Interarticular fibro-cartilage. *arthrodia.*	
Cuneiform (of tarsus). *Internal.*	Irregularly wedge-shaped; the largest of the three.	Scaphoid, Middle cuneiform, First and second metatarsal bones. *arthrodia.*	Tibialis anticus and posticus.
Middle.	Wedge-shaped; smallest of the three.	Scaphoid, Internal cuneiform, External cuneiform, Second metatarsal. *arthrodia.*	Tibialis posticus.
External.	Wedge-shaped.	Scaphoid, Middle cuneiform, Cuboid, Second, third, and fourth metatarsal bones. *arthrodia.*	Tibialis posticus, flexor brevis pollicis.
Ethmoid.	Irregularly cubical; situated at anterior part of base of skull; horizontal or cribriform plate, perpendicular plate, two lateral masses, crista galli.	Sphenoid, Two sphenoidal—turbinated, Frontal, Two nasal, Two superior maxillary, Two lachrymal, Two palate, Two inferior turbinated, Vomer. *synarthrodia.*	None.
Femur.	Cylindrical; longest, largest, and strongest bone in the body; shaft and two extremities, head, neck, greater and lesser trochanters, linea aspera, condyles; a long bone.	Os innominatum—*enarthrodia.* Tibia—*ginglymus.* Patella—*arthrodia.*	Gluteus medius, gluteus minimus, pyriformis, obturator internus, obturator externus, gemellus superior, gemellus inferior, quadratus femoris, psoas magnus, iliacus, vastus externus, gluteus maximus, short head of the biceps, vastus internus, adductor magnus, pectineus, adductor brevis, adductor longus, crureus, subcrureus, gastrocnemius, plantaris, popliteus.

BONES OF THE HUMAN SKELETON.

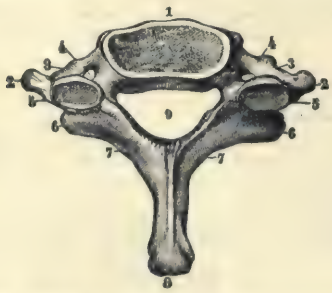
ATLAS, SUPERIOR SURFACE.

1. Tubercle of anterior arch. 2 Articular facet for odontoid process of axis. 3. Posterior arch and posterior tubercle. 4. Groove for vertebral artery and first cervical nerve. 5. Transverse process. 6. Foramen for vertebral artery. 7. Superior articular process. 8. Tubercle for attachment of transverse ligament.



AXIS, LATERAL ASPECT.

1. Body. 2. Odontoid process. 3. Facet for articulating with anterior arch of atlas. 4. Lamina. 5. Spinous process. 6. Transverse process. 7. Superior articular process. 8. Inferior articular process.

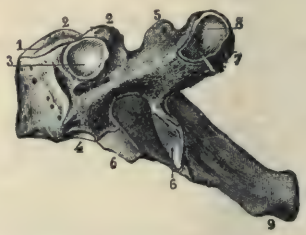


AXIS, POSTERO-SUPERIOR VIEW.

1. Posterior surface of body. 2. Odontoid process. 3, 3. Superior articular processes 4, 4. Inferior articular processes. 5, 5. Transverse processes. 6. Spinous process.

ATLAS AND AXIS, ANTERIOR SURFACE.

1,1. Lateral masses of atlas. 2, 2. Anterior arch of atlas, including odontoid process of axis. 3. Tubercle of anterior arch 4, 4. Transverse processes of atlas. 5, 5 Inferior articular processes of atlas. 6, 6. Superior articular processes of axis. 7, 7. Inferior articular processes. 8, 8. Transverse processes. 9. Anterior surface of body of axis. 10. Apex of odontoid process.

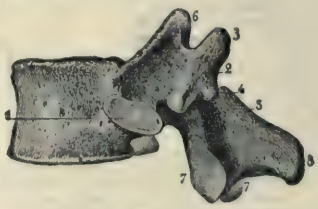


SEVENTH CERVICAL VERTEBRA, POSTERO-SUPERIOR VIEW.

1. Body. 2, 2. Transverse processes. 3, 3. Anterior or costal roots of transverse processes. 4, 4. Foramina for vertebral arteries. 5, 5. Superior articular processes. 6, 6. Inferior articular processes. 7, 7. Laminæ. 8. Spinous process. 9. Spinal foramen.

DORSAL VERTEBRA, ANTERO-SUPERIOR VIEW.

1. Anterior surface. 2. Vertebral foramen. 3. Spinous process. 4, 4. Transverse processes. 5, 5. Articular surfaces for tubercles of ribs. 6, 6. Superior articular processes. 7, 7. Pedicles.



FIRST DORSAL VERTEBRA, LATERAL VIEW.

1. Superior surface of body. 2, 2. Semi-lunar processes. 3. Articular facet for head of first rib. 4. Demi-facet for head of second rib. 5. Superior articular process. 6, 6. Inferior articular processes. 7. Transverse process. 8. Articular facet for tubercle of first rib. 9. Spinous process.

ELEVENTH DORSAL VERTEBRA, LATERAL VIEW.

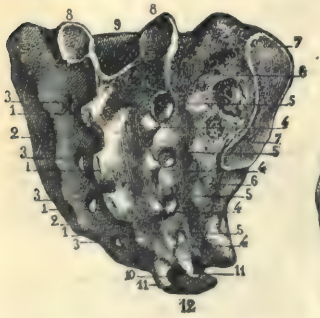
1. Articular facet for head of eleventh rib. 2. Transverse process. 3. Superior tubercle of transverse process. 4. Inferior and anterior tubercle. 5. Inferior and posterior tubercle. 6. Superior articular process. 7. Inferior articular process. 8. Spinous process.

TWELFTH DORSAL VERTEBRA, LATERAL VIEW.

1. Articular facet for head of twelfth rib. 2. Transverse process. 3. Superior and posterior tubercle of transverse process. 4. Inferior and posterior tubercle. 5. Inferior and anterior tubercle. 6. Superior articular process. 7, 7. Inferior articular processes. 8. Spinous process.

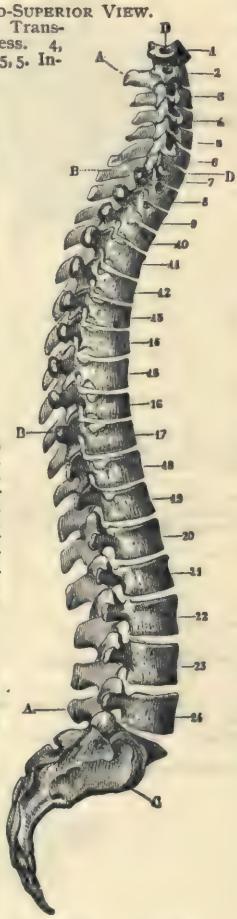
TABLE OF BONES.—*Continued.*

Name.	Principal Features.	Articulations and Variety.	Muscular and Ligamentous Attachments.
Fibula.	Long bone; shaft, upper extremity or head, lower extremity or external malleolus.	Tibia—*arthrodia*. Astragalus, with the tibia and fibula—*ginglymus*.	Biceps, soleus, peroneus longus, extensor longus digitorum, peroneus tertius, extensor proprius pollicis, tibialis posticus, flexor longus pollicis, peroneus brevis.
Foot.	Composed of tarsus, metatarsus and phalanges, *q. v.*		
Frontal.	The forehead bone; a flat bone; a frontal portion and an orbito-nasal portion; frontal eminences, superciliary ridges, supraorbital arches, supraorbital notches or foramina, internal and external angular processes, temporal ridges, nasal notch, nasal spine, nasal eminence or glabella.	Two parietal, Sphenoid, Ethmoid, Two nasal, Two superior maxillary, Two lachrymal, Two malar, } *synarthrodia*.	Corrugator supercilii, orbicularis palpebrarum, and temporal on each side.
Hand.	Composed of carpus, metacarpus and phalanges, *q. v.*		
Humerus.	Largest bone of upper extremity; long bone; a shaft and two extremities. Upper extremity presents a head, neck and greater and lesser tuberosities. Lower extremity, trochlea, olecranon fossa, coronoid fossa, external and internal condyles, supratrochlear foramen, supracondyloid ridges.	Scapula (glenoid cavity)—*enarthrodia*. Ulna, Radius, } *ginglymus*.	Supraspinatus, infraspinatus, teres minor, subscapularis, pectoralis major, latissimus dorsi, deltoid, coraco-brachialis, brachialis anticus, triceps, sub-anconeus, pronator radii teres, flexor carpi radialis, palmaris longus, flexor digitorum sublimis, flexor carpi ulnaris, supinator longus, extensor carpi radialis longior, extensor carpi radialis brevior, extensor communis digitorum, extensor minimi digiti, extensor carpi ulnaris, supinator brevis and anconeus.
Hyoid.	A bony arch; irregular bone; a body, two greater and two lesser cornua.	None.	Sterno-hyoid, thyro-hyoid, omo-hyoid, digastricus, stylo-hyoid, mylo-hyoid, genio-hyoid, genio-hyo-glossus, hyoglossus, middle constrictor of the pharynx.
Ilium.	See *Innominate*.		
Incus.	Resembles a bicuspid tooth with two roots, body, and two processes.	Malleus—*arthrodia* (*trigger-joint*). Stapes—*arthrodia*.	None.
Inferior maxillary.	Body and two rami; contains the teeth of the lower jaw; symphysis, mental process, mental foramen, coronoid and condyloid process, head, neck, sigmoid notch; irregular bone.	The two temporal bones—*bilateral condyloid—diarthrodia*.	Levator menti, depressor labii inferioris, depressor anguli oris, platysma myoides, buccinator, masseter, orbicularis oris, genio-hyo-glossus, genio-hyoideus, mylo-hyoideus, digastric, superior constrictor, temporal, internal pterygoid, external pterygoid.
Inferior turbinated.	Situated on the outer wall of the nasal fossa; irregular bone.	Ethmoid, Superior maxillary, Lachrymal, Palate, } *synarthrodia*.	None.
Innominate.	Large, 3 parts; flat bone; with its fellow and sacrum and coccyx forms pelvis. *Ilium*—superior broad expanded portion, crest, superior, middle and inferior curved lines, iliopectineal line, venter, auricular surface, anterior and posterior, superior and inferior spinous processes, ⅔ (about) of acetabulum. *Ischium*—lower and back portion, body, tuberosity and ramus, spine, greater and lesser sacrosciatic notches, external and internal lips of tuberosity, lower boundary of obturator foramen, ⅓ (about) of acetabulum. *Pubis*—body, horizontal ramus, descending ramus, spine, iliopectineal line, angle, symphysis, obturator foramen (upper boundary), ⅓ of acetabulum.	With its fellow of opposite side, Sacrum, } *synarthrodia*. Femur—*enarthrodia*.	*Ilium*—tensor vaginæ femoris, external oblique, latissimus dorsi, iliacus, transversalis, quadratus lumborum, erector spinæ, internal oblique, gluteus maximus, medius and minimus, rectus, pyriformis, multifidus spinæ, sartorius. *Ischium*—obturator externus and internus, gracilis, levator ani, gemelli superior and inferior, coccygeus, biceps, semi-tendinosus, semi-membranous, quadratus femoris, adductor magnus, transversus perinei, erector penis. *Pubis*—internal and external oblique, transversalis, rectus, pyramidalis, psoas parvus, pectineus, adductor magnus, longus and brevis, gracilis, external and internal obturator, levator ani, compressor urethræ, accelerator urinæ.



LUMBAR VERTEBRA, POSTERO-SUPERIOR VIEW.

1, 1. Anterior surface of body. 2, 2. Transverse processes. 3. Spinous process. 4, 4. Superior articular processes. 5, 5. Inferior articular processes.

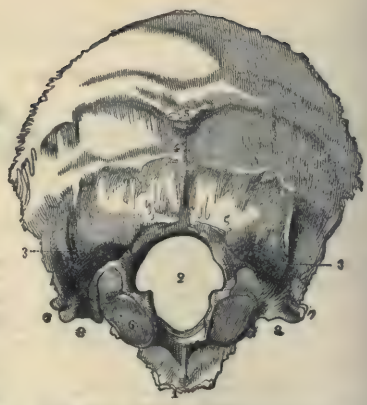


SACRUM, ANTERIOR ASPECT.

1, 1, 1, 1. Bodies of sacral vertebræ, with transverse lines of union. 2, 2, 2, 2. Anterior sacral foramina. 3. Base. 4. Auricular surface of lateral aspect. 5. Its inferior portion. 6. Articular surface of base. 7. Notch for formation of last lumbar intervertebral foramen. 8. Superior articular process of first sacral vertebra. 9. Apex of sacrum. 10. Cornu. 11. Notch for transmission of fifth sacral nerve.

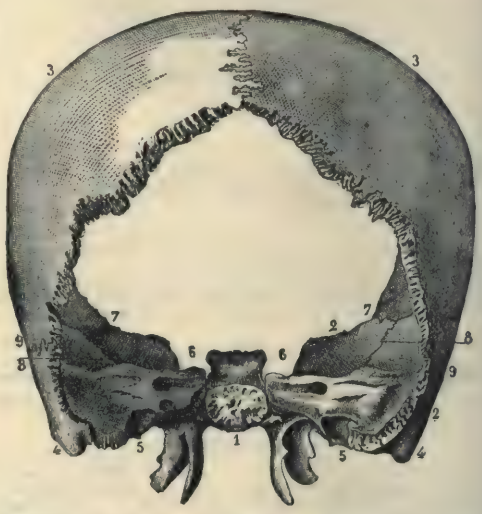
SACRUM, POSTERIOR ASPECT.

1, 1, 1, 1. Spinous processes of sacral vertebræ. 2, 2. Sacral groove. 3, 3, 3, 3. Posterior sacral foramina. 4,4,4,4. Articular processes, united. 5, 5, 5, 5. Transverse processes. 6, 6. Cribriform fossa. 7, 7. Auricular surface. 8, 8. Superior articular processes of first sacral vertebra. 9. Superior orifice of sacral canal. 10. Groove representing inferior orifice. 11, 11. Cornua. 12. Apex.



VERTEBRAL COLUMN, LATERAL ASPECT.

1–7. Cervical vertebræ. 8–19. Dorsal vertebræ. 20–24. Lumbar vertebræ. A, A. Spinous processes. B, B. Articular facets of transverse processes of first ten dorsal vertebræ. C. Auricular surface of sacrum. D. Foramina in transverse processes of cervical vertebræ.



COCCYX, ANTERIOR ASPECT.

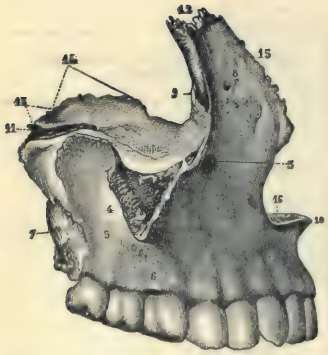
1. Base. 2,2. Cornua. 3. Second coccygeal vertebra. 4. Third coccygeal vertebra. 5. Fourth coccygeal vertebra. 6. Fifth coccygeal vertebra.

OCCIPITAL BONE, POSTERO-INFERIOR VIEW

1. Basilar process. 2. Foramen magnum. 3, 3. Posterior condyloid foramina. 4. Crest. 5. External occipital protuberance. 6, 6. Condyles. 7, 7. Jugular processes. 8, 8. Jugular fossæ.

PARIETAL, TEMPORAL, AND SPHENOID BONES; POSTERIOR ASPECT.

1. Body of sphenoid bone. 2, 2. Sphenoid and temporal bones. 3, 3. Parietal bones. 4, 4. Mastoid processes. 5, 5. Jugular fossæ. 6, 6. Notches entering into formation of sphenoidal fissures. 7, 7. Spheno-parietal sutures. 8, 8. Spheno-temporal sutures. 9, 9. Temporo-parietal sutures.

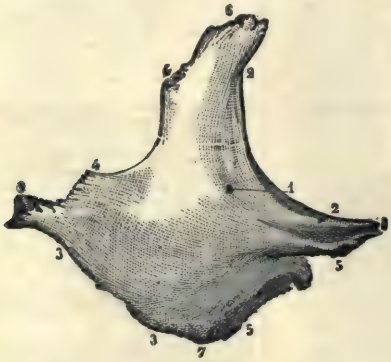


NASAL BONES, EXTERNAL ASPECT.

1, 1. The two nasal bones. 2, 2. Superior extremity. 3, 3. Inferior border. 4, 4. Internal border. 5, 5, 5, 5. External border.

TABLE OF BONES.—*Continued.*

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Ischium.	See *Innominate*.		
Lachrymal.	Small; situated at front part of inner wall of orbit; resembles finger-nail; crest, lachrymal groove; flat bone.	Frontal, Ethmoid, Superior maxillary, Inferior turbinated, } *synarthrodia.*	Tensor tarsi.
Lingual.	See *Hyoid*.		
Magnum (os).	Largest bone of carpus; occupies center of wrist; head, neck, body; short bone.	Scaphoid, Semilunar, } *enarthrodia.* Second Third Fourth } Metacarpal—*arthrodia.* Trapezoid, Unciform, } *arthrodia.*	Flexor brevis pollicis (part).
Malar.	Small; quadrangular; at upper and outer part of face; forms prominence of cheek, part of outer wall and floor of orbit, part of temporal and zygomatic fossæ; frontal, orbital, maxillary and zygomatic processes, malar foramen, four borders; irregular bone.	Frontal, Sphenoid, Temporal, Superior maxillary, } *synarthrodia.*	Levator labii superioris proprius, zygomaticus major and minor, masseter, temporal.
Malleus.	Resembles a hammer: head, neck, handle or manubrium, processus gracilis, processus brevis; irregular.	Incus—*arthrodia* (*trigger-joint*).	Tensor tympani.
Maxillary, inferior. Maxillary, superior.	See *Inferior maxillary*. See *Superior maxillary*.		
Metacarpal.	Five in number; shaft, base, and head; long bones.	Second row of carpus—*arthrodia.* Phalanges—*condyloid.*	To the *thumb*—flexor and extensor ossis metacarpi pollicis, first dorsal interosseous. *Second metacarpal bone*—flexor carpi radialis, extensor carpi radialis longior, first and second dorsal interosseous, first palmar interosseous, flexor brevis pollicis (frequently). *Third metacarpal*—extensor carpi radialis brevior, flexor brevis pollicis, adductor pollicis, second and third dorsal interosseous. *Fourth metacarpal*—third and fourth dorsal and second palmar interosseous. *Fifth metacarpal*—extensor carpi ulnaris, flexor carpi ulnaris, flexor ossis metacarpi minimi digiti, fourth dorsal, and third palmar interosseous.
Metatarsal.	Five in number; shaft, base, and head; long bones.	Tarsus—*arthrodia.* Phalanges—*condyloid.*	*First*—tibialis anticus (part), peroneus longus, first dorsal interosseous. *Second*—adductor pollicis, first and second dorsal interosseous, tibialis posticus (part). *Third*—adductor pollicis, second and third dorsal, and first plantar interosseous, tibialis posticus (part). *Fourth*—adductor pollicis, third and fourth dorsal and second plantar interosseous, tibialis posticus (part). *Fifth*—peroneus brevis, peroneus tertius, flexor brevis minimi digiti, transversus pedis, fourth dorsal, and third plantar interosseous.
Nasal.	Oblong; forms with its fellow the bridge of the nose; nasal foramen, spine, crest; flat bone.	Frontal, Ethmoid, Nasal (opposite), Superior maxillary, } *synarthrodia.*	

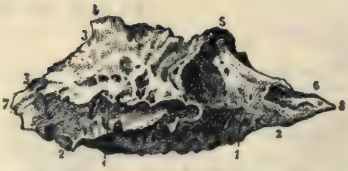


SUPERIOR MAXILLARY BONE, EXTERNAL ASPECT.

1. Anterior aspect of pyramidal process, or canine fossa. 2. Incisive or myrtiform fossa. 3. Infra-orbital foramen. 4. Summit of pyramidal process, or malar process. 5. Posterior aspect of pyramidal process. 6. Inferior border of pyramidal process. 7. Posterior border, or maxillary tuberosity. 8. Nasal process. 9. Posterior border, grooved for lachrymal duct. 10. Anterior nasal spine. 11. Infra-orbital groove. 12. Summit of nasal process. 13. Posterior and superior angle. 14. Superior border. 15. Anterior border of nasal process. 16. Notch for anterior opening of nasal fossæ.

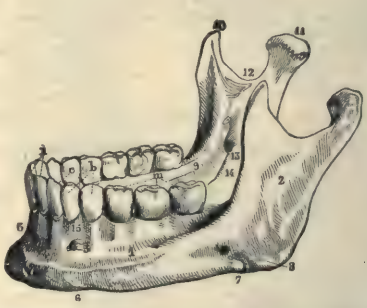
LACHRYMAL BONE, EXTERNAL ASPECT.

1, 1. Vertical crest, dividing external surface into two parts. 2. Spine, in which crest terminates. 3. Sulcus contributing to formation of lachrymal canal. 4. Continuation of preceding, contributing to formation of nasal canal. 5. Posterior division of external surface, contributing to formation of orbit. 6, 6. Anterior border. 7, 7. Posterior border. 8. Superior extremity. 9. Portion of inferior border that articulates with lachrymal process of inferior turbinated bone. 10. Portion that articulates with orbital plate of superior maxillary bone.



MALAR BONE, EXTERNAL ASPECT.

1. Orifice for malar nerve. 2, 2. Superior or orbital border. 3, 3. Inferior or zygomatic border. 4, 4. Posterior or temporal border. 5, 5. Anterior or maxillary border. 6. Superior angle. 7. Inferior angle. 8. Anterior angle. 9. Posterior angle.



PALATE BONE, EXTERNAL ASPECT.

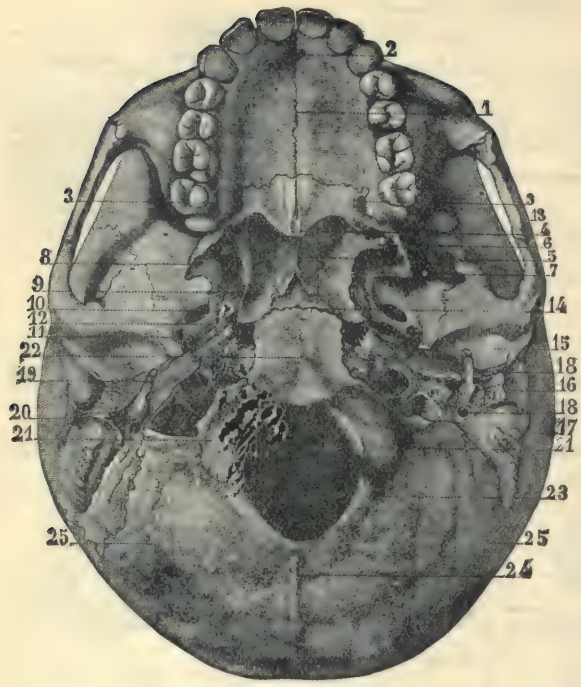
1. External surface of orbital process. 2. Superior or orbital surface. 3. Anterior or maxillary surface. 4. Notch forming greater part of spheno-palatine foramen. 5. Sphenoidal process. 6. Groove entering into formation of posterior palatine canal. 7. Surface that enters into the formation of base of maxillary sinus. 8. External surface of pterygoid process. 9. Groove to receive posterior border of internal plate of pterygoid process.

INFERIOR TURBINATED BONE, INTERNAL OR CONVEX ASPECT.

1, 1. Antero-posterior ridge, dividing the internal surface into two almost equal parts. 2, 2. Inferior border. 3, 3. Anterior portion of superior border, articulating with nasal process of superior maxillary bone. 4. Lachrymal process. 5. Ethmoidal process. 6. Portion of superior border that articulates with palate bone. 7. Anterior extremity. 8. Posterior extremity.

INFERIOR MAXILLARY BONE, EXTERNAL ASPECT.

1. Body of bone and external oblique line. 2. Ramus. 3. Symphysis. 4. Incisive fossa. 5. Mental foramen. 6. Depression in inferior border for attachment of digastric muscle. 7. Depression for passage of facial artery. 8. Angle of jaw. 9. Posterior extremity of internal oblique line. 10. Coronoid process. 11. Condyle. 12. Sigmoid notch. 13. Origin of inferior dental canal. 14. Mylo-hyoid groove. 15. Alveolar border. *a*. Incisors. *b*. Bicuspids. *c*. Canines. *m*. Molars.



LATERAL ASPECT OF SKULL.

1. Frontal bone. 2. Parietal bone. 3. Occipital bone. 4. Temporal bone. 5. Greater wing of sphenoid bone. 6. Lambdoid suture. 7. Occipito-parietal suture. 8. Squamo-parietal suture. 9. Masto-parietal suture. 10. Spheno-parietal suture. 11. Spheno-temporal suture. 12. Spheno-frontal suture. 13, 13. Temporal ridge. 14. Malar bone. 15. Fronto-malar suture. 16. Malo-temporal suture. 17. Malo-maxillary suture. 18. Superior maxillary bone. 19 Infraorbital foramen. 20. Nasal bone. 21. Naso-maxillary suture. 22. Naso-frontal suture. 23. Lachrymal groove, at the bottom of which may be seen the suture between the lachrymal and the superior maxillary bones. 24. Nasal eminence. 25. Inferior maxillary bone. 26. Mental foramen. 27. Angle of lower jaw. 28. Coronoid process. 29. Condyle. 30. Neck of condyle. 31. External auditory canal. 32. Styloid process. 33. Mastoid process. 34. Masto-occipital suture.

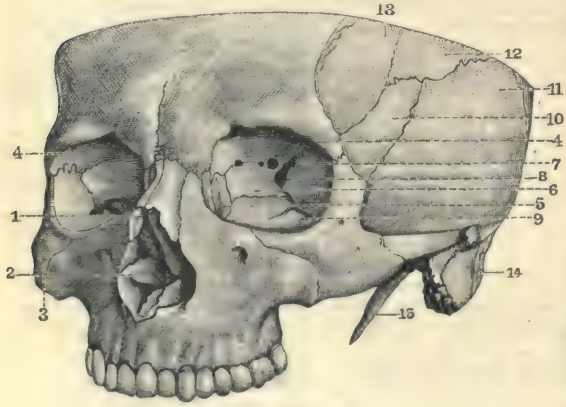


TABLE OF BONES.—*Continued.*

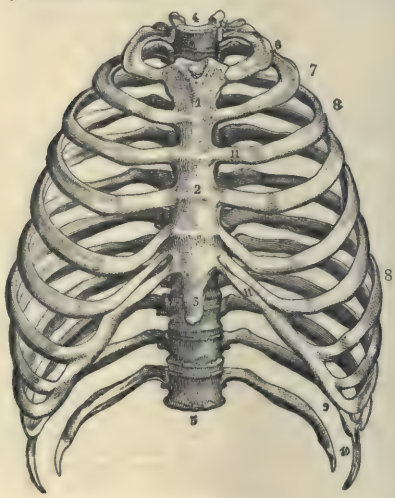
NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Occipital.	Back part and base of cranium; trapezoid in shape; outer and inner tables; external protuberance, external occipital crest, superior and inferior curved lines, foramen magnum, condyles, jugular process, anterior and posterior condyloid foramina, basilar process, pharyngeal spine, 4 fossæ on internal surface, internal occipital protuberance and crest, grooves for the cerebral sinuses, torcular Herophili, jugular foramen; flat bone.	Parietal (two), Temporal (two), Sphenoid, } *synarthrodia.* Atlas—*double arthrodia.*	Twelve pairs—occipito-frontalis, trapezius, sterno-cleido-mastoid, complexus, biventer cervicis, splenius capitis, superior oblique, rectus capitis posticus, major and minor, rectus lateralis, rectus capitis anticus, major and minor, superior constrictor of the pharynx.
Palate.	Back part of nasal fossa; helps to form floor and outer wall of nose, the roof of mouth and floor of orbit, also spheno-maxillary and pterygoid fossæ and the spheno-maxillary fissure; L-shaped; inferior or horizontal plate, superior or vertical plate, posterior palatine canal, posterior nasal spine, inferior and superior turbinated crests, maxillary process, pterygoid process, accessory descending palatine canals, orbital process, sphenoidal process, spheno-palatine foramen.	Sphenoid, Ethmoid, Superior maxillary, Inferior turbinated, Vomer, Opposite palate, } *synarthrodia.*	Tensor palati, azygos uvulæ, internal and external pterygoid, superior constrictor of pharynx.
Parietal.	Form sides and roof of skull; irregular, quadrilateral; two surfaces, four borders, four angles, parietal eminence, temporal ridge, parietal foramen, furrows for cerebral sinuses, depressions for Pacchionian bodies; flat bone.	Opposite parietal, Occipital, Frontal, Temporal, Sphenoid, } *synarthrodia.*	Temporal.
Patella.	Flat; triangular; sesamoid; anterior part of knee-joint; two surfaces, three borders, apex; flat bone.	Condyles of femur—*partly arthrodial.*	Rectus, crureus, vastus internus, vastus externus.
Pelvic.	Composed of two ossa innominata, sacrum and coccyx, *q. v.*		
Phalanges of foot.	Two of great toe, three of each of the others; shaft, base, head; long bones.	First row with metatarsal and second phalanges—*condyloid.* Second of great toe with first phalanx; of other toes, with first and third phalanges, Third row with second row, } *ginglymus.*	*First—great toe*—inner tendon extensor brevis digitorum, abductor pollicis, adductor pollicis, flexor brevis pollicis, transversus pedis. *Second toe*—first and second dorsal interosseous, first lumbrical. *Third toe*—third dorsal and first plantar interosseous, second lumbrical. *Fourth toe*—fourth dorsal and second plantar interosseous, third lumbrical. *Fifth toe*—flexor brevis minimi digiti, abductor minimi digiti, third plantar interosseous, fourth lumbrical. *Second—great toe*—extensor longus pollicis, flexor longus pollicis. *Other toes*—flexor brevis digitorum, one slip of common tendon of extensor longus and brevis digitorum. *Third*—two slips from the common tendon of the extensor longus and extensor brevis digitorum, and flexor longus digitorum.
Phalanges, of hand.	14 in number, three for each finger and two for thumb; shaft, head, base; long bones.	First row with metacarpal bones and second row of phalanges—*condyloid.* Second row with first and third rows, Third row with second row, } *ginglymus.*	*Thumb*—extensor primi internodii pollicis, flexor brevis pollicis, abductor pollicis, adductor pollicis, flexor longus pollicis, extensor secundi internodii. *First—index finger*—first dorsal and first palmar interosseous. *Middle finger*—second and third dorsal interosseous. *Ring finger*—fourth dorsal and second palmar interosseous. *Little finger*—third palmar interosseous, flexor brevis minimi digiti, abductor minimi digiti. *Second—to all*—flexor sublimis digit-

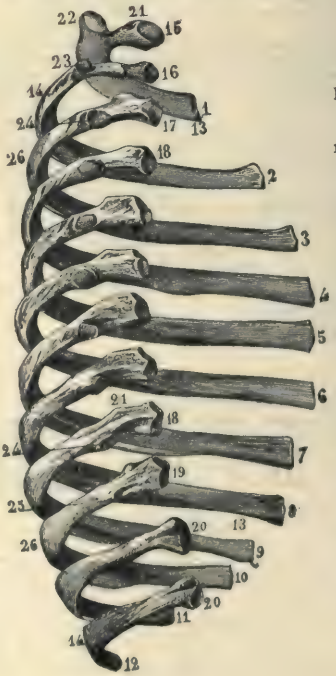
BASE OF SKULL.

1. Median suture of palatine vault. 2. Inferior orifice of anterior palatine canal. 3, 3. Inferior openings of posterior palatine canals. 4. Posterior border of palatine vault; posterior nasal spine. 5. Posterior border of nasal septum. 6. Hamular process of internal pterygoid plate of sphenoid bone. 7. Internal pterygoid plate. 8. External pterygoid plate. 9. Scaphoid fossa. 10. Oval or inferior maxillary foramen. 11. Foramen spinosum. 12. Foramen lacerum medium. 13. Zygomatic arch. 14. Spheno-occipital suture. 15. Glenoid cavity. 16. External auditory canal. 17. Mastoid process. 18, 18. Styloid process and stylo-mastoid foramen. 19. Inferior orifice of carotid canal. 20. Foramen lacerum posterius. 21, 21. Occipital condyles. 22. Basilar process. 23. Foramen magnum. 24. External occipital crest. 25, 25. Inferior curved lines of occipital bone.



THE ORBITAL CAVITIES.

1. Anterior opening of nasal fossæ. 2. Anterior extremity of inferior turbinated bone. 3. Malar bone. 4, 4. Orbital cavities. 5. Lachrymal canal. 6. Os planum of ethmoid. 7. Optic foramen. 8. Sphenoidal fissure. 9. Spheno-maxillary fissure. 10. Great wing of sphenoid. 11. Squamous portion of temporal. 12. Antero-inferior angle of parietal. 13. Portion of frontal entering into formation of temporal fossa. 14. Mastoid process. 15. Styloid process.

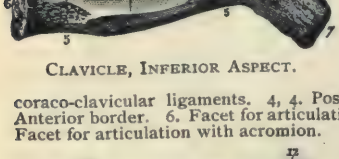


HYOID BONE, ANTERIOR ASPECT.

1, 1. Anterior or convex surface of body. 2, 2. Greater cornua. 3, 3. Junction of greater cornua with body. 4, 4. Lesser cornua.

THORAX, ANTERIOR VIEW.

1. Manubrium sterni. 2. Gladiolus. 3. Ensiform cartilage or xiphoid appendix. 4. Circumference of apex of thorax. 5. Circumference of base. 6. 1st rib. 7. 2d rib. 8, 8. 3d, 4th, 5th, 6th and 7th ribs. 9. 8th, 9th and 10 ribs. 10. 11th and 12th ribs. 11, 11. Costal cartilages.

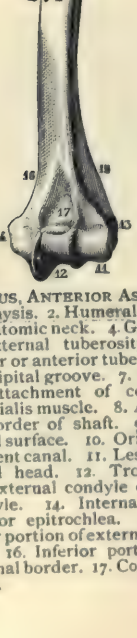


RIBS OF LEFT SIDE, POSTERIOR ASPECT.

1-12. Anterior extremities of 12 ribs of left side. 13, 13. Internal surface. 14, 14. External surface. 15. Head of 1st rib. 16. Head of 2d rib. 17. Head of 3d rib. 18, 18. Heads of ribs from 4th to 9th. 19. Head of 10th rib. 20, 20. Heads of 11th and 12th ribs. 21, 21. Necks of ribs. 22. Tubercle of 1st rib. 23. Articular facet of tubercle of 2d rib. 24, 24. Articular facets of tubercles of ribs from 3d to 9th. 25. Articular facet for tubercle of 10th rib. 26, 26. Angles of ribs.

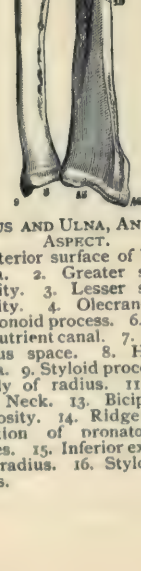
TABLE OF BONES.—*Continued.*

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Phalanges, of hand. *Continued.*			orum and extensor communis digitorum; in addition. *To index finger*—extensor indicis. *To little finger*—extensor minimi digiti. *Third*—flexor profundus digitorum, extensor communis digitorum.
Pisiform.	Anterior and inner side of carpus; small; spherical; one articular facet; short bone.	Cuneiform—*arthrodia.*	Flexor carpi ulnaris, abductor minimi digiti, anterior annular ligament.
Pubis.	See *Innominate.*		
Radius.	Outer side of forearm; shaft, head, neck, tuberosity, lower extremity, oblique line, sigmoid cavity, styloid process.	Humerus—*ginglymus.* Ulna, { superior—*diarthrodia rotatoria.* middle—*membranous.* Inferior—*diarthrodia rotatoria.* Semilunar—*condyloid.*	Biceps, supinator brevis, flexor sublimis digitorum, flexor longus pollicis, pronator quadratus, extensor ossis metacarpi pollicis, extensor primi internodii pollicis, pronator radii teres, supinator longus.
Ribs.	Twelve in number on each side; shaft, head, neck, tuberosity, angle (anterior and posterior), anterior or sternal extremity; first, second, tenth, eleventh and twelfth are peculiar; flat bones.	Vertebræ—*arthrodia.* Sternum, { First rib—*synarthrodia.* Others—*arthrodia.*	Internal and external intercostals, scalenus, anticus, medius and posticus, pectoralis minor, serratus magnus, obliquus externus, transversalis, quadratus lumborum, diaphragm, latissimus dorsi, serratus posticus superior and inferior, sacro-lumbalis, musculus accessorius ad sacro-lumbalem, longissimus dorsi, cervicalis ascendens, levatores costarum, infracostales.
Sacrum.	Large triangular bone at lower part of vertebral column, and upper and back part of pelvic cavity; composed of five vertebræ; base, promontory, four surfaces, apex, central canal, anterior and posterior sacral foraminæ, lateral masses, laminæ, articular processes, sacral cornua, transverse processes, sacral groove, ala; irregular bone.	Last lumbar vertebra, Coccyx, Ossa innominata (two), } *amphiarthrodia.*	Pyriformis, coccygeus, iliacus, gluteus maximus, latissimus dorsi, multifidus spinæ, erector spinæ, extensor coccygis.
Scaphoid, of carpus.	Largest bone of first row; boat-shaped; upper and outer part of carpus; four surfaces; tubercle; short bone.	Radius—*condyloid.* Trapezium, Trapezoid, Os magnum, Semilunar, } *arthrodia.*	External lateral ligament of wrist.
Scaphoid, of tarsus.	Or navicular bone; boat-shaped; inner side of tarsus, four surfaces, tuberosity; short bone.	Astragalus, Cuneiform (three), Cuboid (occasionally), } *arthrodia.*	Tibialis posticus (part).
Scapula.	Back part of shoulder; triangular; posterior aspect and side of thorax; two surfaces, three borders, three angles, subscapular fossa, subscapular angle, dorsum, spine, supra-spinous and infra-spinous fossæ, acromion process, glenoid cavity, neck, head, coracoid process; flat bone.	Humerus—*enarthrodia.* Clavicle—*arthrodia.*	Subscapularis, supraspinatus, infraspinatus, trapezius, deltoid, omohyoid, serratus magnus, levator anguli scapulæ, rhomboideus major and minor, triceps, teres major and minor, biceps, coraco-brachialis, pectoralis minor, platysma, latissimus dorsi.
Semilunar.	Upper row of carpus; four surfaces, crescentic outline.	Radius—*condyloid.* Os magnum, Unciform, Cuneiform, Scaphoid, } *arthrodia.*	
Sesamoid.	Small, rounded masses, cartilaginous in early life, osseous in the adult; developed in tendons; inconstant, except patellæ.		
Sphenoid.	Anterior part of base of skull; bat-shaped, with wings extended; body, two greater and two lesser wings, two pterygoid processes, ethmoidal spine, optic groove, optic foramen, olivary process, pituitary fossa, anterior, middle and posterior clinoid processes, sella turcica, carotid or cavern-	All the bones of cranium, Malar (two), Palate (two), Vomer, } *synarthrodia.*	Temporal, external and internal pterygoids, superior constrictor, tensor palati, levator tympani, levator palpebræ, obliquus superior, superior, inferior, internal and external recti.



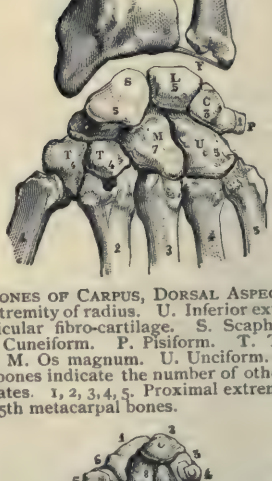
CLAVICLE, INFERIOR ASPECT.

1. Longitudinal depression for insertion of subclavius muscle. 2. Rough impression for attachment of costo-clavicular ligament. 3, 3. For attachment of coraco-clavicular ligaments. 4, 4. Posterior border. 5, 5. Anterior border. 6. Facet for articulation with sternum. 7. Facet for articulation with acromion.



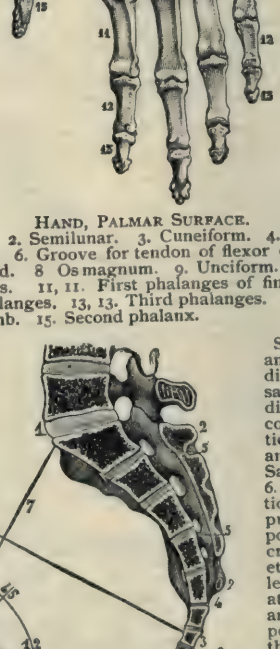
SCAPULA, POSTERO-EXTERNAL ASPECT.

1. Supraspinous fossa. 2. Infra-spinous fossa. 3. Superior or coracoid border. 4. Coracoid or suprascapular notch. 5. Axillary or external border. 6. Anterior angle and glenoid cavity. 7. Inferior angle. 8. Rough impression for long head of triceps. 9. Internal or spinal or vertebral border. 10. Spine. 11. Smooth surface over which trapezius muscle glides. 12. Acromion. 13. Base of spine. 14. Coracoid process.



HUMERUS, ANTERIOR ASPECT.

1. Diaphysis. 2. Humeral head. 3. Anatomic neck. 4. Greater or external tuberosity. 5. Lesser or anterior tuberosity. 6. Bicipital groove. 7. Ridge for attachment of coracobrachialis muscle. 8. Anterior border of shaft. 9. External surface. 10. Orifice of nutrient canal. 11. Lesser or radial head. 12. Trochlea. 13. External condyle or epicondyle. 14. Internal condyle or epitrochlea. 15. Inferior portion of external border. 16. Inferior portion of internal border. 17. Coronoid fossa.



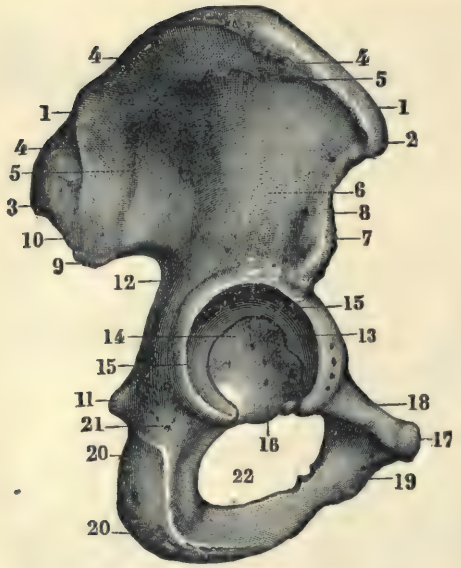
RADIUS AND ULNA, ANTERIOR ASPECT.

1. Anterior surface of body of ulna. 2. Greater sigmoid cavity. 3. Lesser sigmoid cavity. 4. Olecranon. 5. Coronoid process. 6. Orifice of nutrient canal. 7. Interosseous space. 8. Head of ulna. 9. Styloid process. 10. Body of radius. 11. Head. 12. Neck. 13. Bicipital tuberosity. 14. Ridge for insertion of pronator radii teres. 15. Inferior extremity of radius. 16. Styloid process.

BONES OF CARPUS, DORSAL ASPECT

R. Inferior extremity of radius. U. Inferior extremity of ulna. F. Interarticular fibro-cartilage. S. Scaphoid. L. Semilunar. C. Cuneiform. P. Pisiform. T. Trapezium. T. Trapezoid. M. Os magnum. U. Unciform. The numbers upon these bones indicate the number of others with which each articulates. 1, 2, 3, 4, 5. Proximal extremities of 1st, 2d, 3d, 4th and 5th metacarpal bones.

HAND, PALMAR SURFACE.



1. Scaphoid. 2. Semilunar. 3. Cuneiform. 4. Pisiform. 5. Trapezium. 6. Groove for tendon of flexor carpi radialis. 7. Trapezoid. 8 Os magnum. 9. Unciform. 10, 10. Metacarpal bones. 11, 11. First phalanges of fingers. 12, 12. Second phalanges. 13, 13. Third phalanges. 14. First phalanx of thumb. 15. Second phalanx.

Sacro-vertebral angle. 2, 2. Median section of sacrum. 3. Median section of coccyx. 4. Junction of sacrum and coccyx. 5, 5. Sacral canal. 6. 6. Median section of symphysis pubis. 7. Antero-posterior or sacro pubic diameter of pelvic inlet. *b*. Prolongation of this diameter. 8. Line perpendicular to this diameter at its middle. 9. Antero-posterior or cocci-pubic diameter of pelvic outlet. 10. Horizontal line passing through inferior margin of symphysis pubis. 11. Line perpendicular to last. 12. Arc of angle between these two.

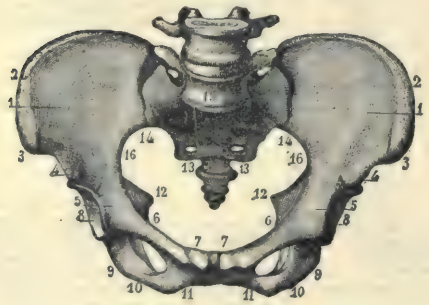
MEDIAN SECTION OF PELVIS, PLANE AND AXIS OF SUPERIOR STRAIT.

TABLE OF BONES,—*Continued.*

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Sphenoid —*Continued.*	ous groove, lingula, ethmoidal crest, sphenoidal cells or sinuses, sphenoidal turbinated bones, rostrum, vaginal processes, pterygo-palatine canal, spinous processes, round foramen, oval foramen, foramen Vesalii, foramen spinosum, pterygoid ridge, external orbital foramina, vidian canal, pterygoid fossa, internal and external pterygoid plates, hamular process, scaphoid fossa.		
Sphenoidal turbinated or sphenoidal spongy bones.	Situated at anterior and inferior part of body of sphenoid; exist as separate pieces until puberty and occasionally are not joined in the adult.	Ethmoid, Palate, } *synarthrodia.*	None.
Stapes.	Resembles a stirrup; one of the ossicles of the tympanum; head, neck, two branches (crura), base; irregular bone.	Incus—*arthrodia.*	Stapedius.
Sternum.	The breast bone; manubrium, gladiolus, ensiform cartilage, or first, second and third pieces, anterior and posterior surface, borders.	Clavicles (two)—*arthrodia.* Costal cartilages (seven on each side) first—*synarthrodia;* others, *arthrodia.*	Pectoralis major, sterno-cleido-mastoid, sterno-hyoid, sterno-thyroid, triangularis sterni, aponeuroses of the obliquus and internus, and transversalis muscles, rectus, diaphragm.
Superior maxillary.	Forms with its fellow the whole of the upper jaw; somewhat cuboidal; body and malar, nasal, alveolar and palatine processes; hollow (the antrum of Highmore or maxillary sinus), incisive or myrtiform fossa, canine fossa, canine eminence, infra-orbital foramen, posterior dental canals, maxillary tuberosity, posterior palatine canal, infra-orbital groove; irregular bone.	Frontal, Ethmoid, Nasal, Malar, Lachrymal, Inferior turbinated, Palate, Vomer, Fellow of opposite side. } *synarthrodia.*	Orbicularis palpebrarum, obliquus inferior oculi, levator labii superioris alæque nasi, levator labii superioris proprius, levator anguli oris, compressor nasi, depressor alæ nasi, dilator naris posterior, masseter, buccinator, internal pterygoid, orbicularis oris.
Tarsal.	Consist of calcaneum, or os calcis, astragalus, cuboid, scaphoid, internal, middle and external cuneiform. See *Individual bones.*		
Temporal.	Situated at side and base of skull; squamous, mastoid and petrous portions, temporal ridge, zygoma or zygomatic process, eminentia articularis, Glaserian fissure, tubercle, glenoid fossa, post-glenoid process, tympanic plate, mastoid foramen, digastric fossa, occipital groove, sigmoid fossa, mastoid cells, meatus auditorius externus, hiatus Fallopii, meatus auditorius internus, lamina cribrosa, aquæductus vestibuli, styloid process, stylo-mastoid foramen, auricular fissure; irregular bone.	Occipital, Parietal, Sphenoid, Inferior maxillary, Malar, } *synarthrodia.*	Temporal, masseter, occipito-frontalis, sterno-mastoid, splenius capitis, trachelo-mastoid. digastricus, retrahens aurem, stylo-pharyngeus, stylo-hyoideus, stylo-glossus, levator palati, tensor tympani, tensor palati, stapedius.
Tibia.	At front and inner side of leg; next to femur in length and size; prismoid in form; upper extremity or head, tuberosities, spinous process, tubercle, popliteal notch, shaft, crest (the shin), oblique line, internal malleolus; long bone.	Femur—*ginglymus.* Fibula, { superior—*arthrodia.* middle—*membranous.* inferior—*arthrodia.* Astragalus with fibula—*ginglymus.*	Semi-membranosus, tibialis anticus, extensor longus digitorum, biceps, sartorius, gracilis, semi-tendinosus, tibialis anticus, popliteus, soleus, flexor longus digitorum, tibialis posticus, ligamentum patellæ.
Trapezium.	In lower row of carpus; very irregular; six surfaces, groove; short bone.	Scaphoid, Trapezoid, First and second metacarpal, } *arthrodia.*	Adductor pollicis, flexor ossis metacarpi pollicis, flexor brevis pollicis (part).
Trapezoid.	Smallest bone in second row of carpus; wedge-shaped; six surfaces; short bone.	Scaphoid, Second metacarpal, Trapezium, Os magnum, } *arthrodia.*	Flexor brevis pollicis (part).
Triquetral.	See *Wormian bones.*		

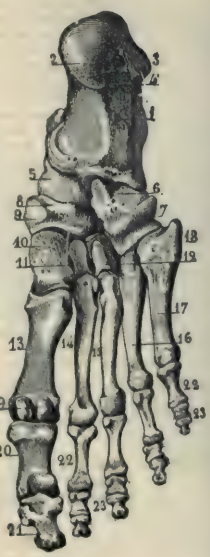
RIGHT INNOMINATE BONE, EXTERNAL ASPECT.

1. Superior border, or crest. 2. Anterior superior iliac spine. 3. Posterior superior iliac spine. 4, 4, 4. Superior curved line. 5, 5. Inferior curved line. 6. Surface between inferior curved line and acetabulum. 7. Anterior inferior iliac spine. 8. Anterior interspinous notch. 9. Posterior inferior iliac spine. 10. Posterior interspinous notch. 11. Spine of ischium. 12. Great sacro-sciatic notch. 13. Acetabulum. 14. Fundus of acetabulum. 15, 15. Circumference of acetabulum. 16. Cotyloid notch. 17. Spine of pubes. 18. Horizontal branch of pubes. 19. Descending branch of pubes. 20, 20. Ischium. 21. Groove for tendon of obturator externus muscle. 22. Obturator foramen.



FEMUR, POSTERIOR ASPECT.

1, 1. Linea aspera. 2, 2. External division. 3. Internal division. 4, 4. Inferior divisions. 5. Head. 6. Depression for attachment of round ligament. 7. Neck. 8. Great trochanter. 9. Digital or trochanteric fossa. 10. Lesser trochanter. 11. Outer condyle. 12. Inner condyle. 13. Intercondyloid notch. 14. Outer tuberosity. 15. Inner tuberosity.



TIBIA AND FIBULA, ANTERIOR ASPECT.

1. Shaft of tibia. 2. Internal tuberosity. 3. External tuberosity. 4. Spine. 5. Tubercle. 6. Crest. 7. Inferior extremity. 8. Internal malleolus. 9. Shaft of fibula. 10. Superior extremity. 11. Inferior extremity and external malleolus.

PELVIS, ANTERO-SUPERIOR VIEW, SUPERIOR STRAIT.

1, 1. Internal iliac fossæ. 2, 2. Iliac crests. 3, 3. Anterior superior iliac spines. 4, 4. Anterior inferior iliac spines. 5, 5. Ilio-pectineal eminences. 6, 6. Horizontal branches of pubes. 7, 7. Bodies and symphysis of pubes. 8, 8. Acetabula. 9, 9. Tuberosities of ischia. 10, 10. Ascending rami of ischium. 11, 11. Descending rami of pubes. 12, 12. Spines of ischia. 13, 13. Posterior wall of pelvic cavity. 14, 14. Sacro-iliac symphyses. 15. Sacro-vertebral angle. 16, 16. Superior strait.

FOOT, PLANTAR ASPECT.

1. Inferior surface of calcaneum. 2. Inner tuberosity. 3. Outer tuberosity. 4. Angular depression between these tuberosities. 5. Inferior portion of head of astragalus. 6. Plantar surface of cuboid, for attachment of inferior calcaneo-cuboid ligament. 7. Tuberosity of cuboid. 8. Scaphoid. 9. Tuberosity of scaphoid. 10. Inferior portion of internal cuneiform. 11. Apex of middle cuneiform. 12. Apex of internal cuneiform. 13, 14, 15, 16, 17. First, second, third, fourth and fifth metatarsal bones 18 Tuberosity of fifth metatarsal bone. 19. Two sesamoid bones. 20. First phalanx of great toe. 21. Last phalanx of great toe. 22, 22. First phalanges of remaining toes. 23, 23. Second and third phalanges of these toes.

TABLE OF BONES.—*Continued.*

NAME.	PRINCIPAL FEATURES.	ARTICULATIONS AND VARIETY.	MUSCULAR AND LIGAMENTOUS ATTACHMENTS.
Turbinate, inferior.	One on each side of outer wall of nasal fossæ; curled like a scroll; two surfaces, two borders, two extremities, lachrymal process, ethmoidal process, maxillary process.	Ethmoid, Superior maxillary, Lachrymal, Palate, } *synarthrodia.*	
Turbinate, middle.	The free convoluted margin of the thin lamella, that descends from the under surface of the cribriform plate of the ethmoid bone.		
Turbinate, superior.	The thin curved plate of the ethmoid, that bounds the superior meatus of the nose above.		
Tympanic.	Includes the *Incus*, *Malleus* and *Stapes* (*q. v.*).		
Ulna.	Inner side of forearm, parallel with radius; prismatic; shaft and two extremities, olecranon process, coronoid process, greater and lesser sigmoid cavities, oblique ridge, perpendicular line, head or lower extremity, styloid process; long bone.	Humerus—*ginglymus.* Radius, { superior—*diarthrodia rotatoria.* middle—*membranous.* inferior—*diarthrodia rotatoria.*	Triceps, anconeus, flexor carpi ulnaris, brachialis anticus, pronator radii teres, flexor sublimis digitorum, flexor profundus digitorum, flexor longus pollicis (occasionally), pronator quadratus, supinator brevis, extensor ossis metacarpi pollicis, extensor secundi internodii pollicis, extensor indicis, extensor carpi ulnaris.
Unciform.	Wedge-shaped; hook-like process; in lower row of carpus; short bone.	Semilunar, Fourth and fifth metacarpal, Cuneiform, Os magnum, } *arthrodia.*	Flexor brevis minimi digiti, flexor ossis metacarpi minimi digiti, anterior annular ligament.
Vertebræ.	Twenty-six; cervical seven, dorsal twelve, lumbar five, sacrum (composed of five), coccyx (composed of four; each has a body and an arch; latter has two pedicles, two laminæ and seven processes, viz.: four articular, two transverse, one spinous. Peculiar vertebræ, first, second and seventh cervical; first, ninth, tenth, eleventh and twelfth dorsal, sacrum, coccyx; irregular bones.	Articulate with each other, and with occipital and innominate bones and ribs (*q. v.*). Intervertebral articulations, between the bodies—*amphiarthrodia.* Between articular processes—*arthrodia.*	Attachment of muscles.—*To the Atlas* are attached nine pairs: the longus colli, rectus anticus minor, rectus lateralis, rectus posticus minor, obliquus superior and inferior, splenius colli, levator anguli scapulæ and first intertransverse. *To the Axis* are attached eleven pairs: the longus colli, obliquus inferior, rectus posticus major, semispinalis colli, multifidus spinæ, levator anguli scapulæ, splenius colli, scalenus medius, transversalis colli, intertransversales, interspinales. *To the remaining vertebræ* generally are attached thirty-five pairs and a single muscle: anteriorly, the rectus anticus major, longus colli, scalenus anticus, medius, and posticus, psoas magnus, psoas parvus, quadratus lumborum, diaphragm, obliquus internus and transversalis; posteriorly, the trapezius, latissimus dorsi, levator anguli scapulæ, rhomboideus major and minor, serratus posticus superior and inferior, splenius, erector spinæ, sacro-lumbalis, longissimus dorsi, spinalis dorsi, cervicalis ascendens, transversalis colli, trachelo-mastoid, complexus, biventer cervicis, semispinalis dorsi and colli, multifidus spinæ, rotatores spinæ, interspinales, supraspinales, intertransversales, levatores costarum.
Vomer.	Situated vertically at back part of nasal fossæ; forms part of septum of nose; somewhat like a plow-share; two surfaces and four borders.	Sphenoid, Ethmoid, Superior maxillary (two), Palate (two), Cartilage of the septum, } *synarthrodia.*	
Wormian.	Supernumerary bones; irregular, inconstant, isolated, interposed between the cranial bones, most frequently in the lambdoid suture.		

Bose's Operation. See *Operations, Table of.*

Boss (*bos*) [ME., *bos*]. A wide, flattish protuberance, as on the skull or on a tumor.

Bosselated (*bos'-el-a-ted*) [ME., *bos*]. Covered with bosses or small nodules.

Bosselation (*bos-el-a'-shun*) [ME., *bos*]. A boss-like elevation of the surface.

Bostock's Catarrh. See *Diseases, Table of.*

Bostryx (*bos'-triks*) [βόστρυχος, a curl]. In biology, a helicoid cyme.

Boswellia (*boz-wel'-e-ah*) [after *Boswell*, a Scotch botanist]. A genus of burseraceous trees of S. Asia and E. and Central Africa. *B. carteri* furnishes olibanum, as also *B. serrata*.

Bosworth's Operation. See *Operations, Table of.*

Bot (*bot*) [*botus*, a belly worm]. The larva of certain species of flies of the genus Œstrus, which are conveyed into the stomach of man, where they hatch. Also the thread-worm, *Oxyuris vermicularis*. See *Parasites* (*Animal*), *Table of.*

Botal, or Botallo, Duct of. See *Duct.* **B., Foramen of.** See *Foramina, Table of.* **B., Valve of.** See *B., Foramen of.*

Botalismus (*bot-al-iz'-mus*). See *Botulismus.*

Botanic (*bot'-an-ik*) [βοτάνη, an herb]. Pertaining to botany. **B. Physician,** a title assumed by certain persons who profess to use only vegetable remedies. See *Eclectic.*

Botanist (*bot'-an-ist*) [βοτάνη, herb]. A student of botany.

Botanophile (*bot-an'-o-fil*) [βοτάνη, herb; φιλεῖν, to love]. Botanic dilettanti. Persons fond of botany, but not true botanists.

Botany (*bot'-an-e*) [βοτάνη, an herb]. The science of plants—their classification and structure. **B. Bay Gum.** See *Acaroides.*

Bote (*bōt*). See *Passivism.*

Bothria (*both'-re-ah*) [L.]. Plural of *Bothrion*, or of *Bothrium.*

Bothriocephalus (*both-re-o sef'-al-us*) [βοθρίον, a pit; κεφαλή, a head]. A genus of tapeworms. See *Tapeworm.* **B. latus,** the *Broad tapeworm;* a common parasite of man in certain European localities. It may reach twenty-five feet in length, with a breadth of three-fourths of an inch. It is also called *Tænia lata*, and *Dibothrium latum.* See *Parasites* (*Animal*), *Table of.*

Bothrion (*both'-re-on*) [βοθρίον, a pit]. 1. A small cavity; the socket of a tooth. 2. A facet, or fosset, such as is seen upon the head of most of the tapeworms. 3. A deep corneal ulcer.

Bothrium (*both'-re-um*). See *Bothrion.*

Botium (*bo'-she-um*) [L.]. A goiter or tumor of the neck. **B. trachelophyma.** Synonym of *Goiter.*

Botrel's Operation. See *Operations, Table of.*

Botryoid (*bot'-re-oid*) [βότρυς, a cluster; εἶδος, likeness]. Resembling in shape a bunch of grapes.

Botryomycosis (*bot-re-o-mi-ko'-sis*) [βότρυς, a bunch of grapes; μύκης, a fungus]. A disease of horses in which fibromatous nodules form in the lungs. It is dependent upon the presence of a microörganism called *Botriomyces.*

Botryose (*bot'-re-ōs*) [βότρυς, a cluster of grapes]. An inflorescence constructed on the plan of a raceme.

Botryo-therapeutics (*bot-re-o-ther-ap-u'-tiks*) [βότρυς, a bunch of grapes; θεραπευτική, medical art]. See *Grape-Cure.*

Bots (*bots*), **Bott** (*bot*). See *Bot.*

Böttcher's Cells. Small cells in the cochlea, occurring in a single layer in the basilar membrane. **B.'s Crystals,** peculiar microscopic crystals formed by adding a drop of a one per cent. solution of phosphate of ammonia to a drop of prostatic secretion. They are composed of a phosphate formed from a base that exists in prostatic fluid, and that is supposed to impart to it its peculiar odor. **B.'s Test.** See *Tests, Table of.*

Bötteker's Test. See *Tests, Table of.*

Böttger's Test. See *Tests, Table of.*

Bottini's Operation. See *Operations, Table of.*

Bottle (*bot'-l*) [ME., *botel;* Fr., *bouteille*]. A vessel, usually of glass, with a narrow neck. **B., Feeding,** a flat flask with a nipple of India-rubber attached, used for feeding infants. **B. Nose,** a common name for Acne rosacea. **B., Specific Gravity,** a Florence flask graduated to contain 500–1000 grains of water, with the weight of which an equal volume of any other liquid may be compared. **B.-stoop,** in pharmacy, a block so grooved that it serves to hold a wide-mouthed bottle in an oblique position while a powder is being dispensed from it. **B.-wax,** a hard, stiff variety of wax used in sealing bottles.

Botts (*bots*). See *Bot.*

Botulinic Acid (*bot-u-lin'-ik as'-id*) [*botulus*, a sausage]. An acid asserted to exist in putrefying sausages, and to constitute their specific poison.

Botulism (*bot'-u-lizm*), **Botulismus** (*bot-u-liz'-mus*) [*botulus*, a sausage]. Sausage-poisoning. See *Allantiasis, Blunzen,* and *Allanto-toxicon.*

Bouchard's Diet. See *Treatment, Methods of.* **B.'s Method.** See *Treatment, Methods of.* **B.'s Nodules,** nodules appearing upon the phalangeal joints of the hands of persons suffering with gastrectasis.

Bouchut's Tubes. A variety of tubes for intubation of the larynx.

Bougard's Paste. A caustic paste containing bichlorid of mercury, chlorid of zinc, arsenic, cinnabar, starch, and wheat flour. It is used as an application to carcinoma.

Bougie (*boo-zhe'*) [Fr., a candle]. A slender, cylindrical instrument made of waxed silk, catgut, etc., for introduction into the urethra or other passage, for the purpose of dilation, exploration, etc. Sometimes bougies are covered with preparations that are thus conveyed to the inner mucous surfaces. **B., Armed,** a bougie with a piece of nitrate of silver or other caustic attached to its extremity. **B., Filiform,** a whalebone or other bougie of very small size.

Bouhou (*boo-hoo'*). See *Boohoo.*

Bouillaud's Disease. See *Endocarditis*, and *Diseases, Table of.*

Bouillon (*boo-e-yon'(g)*) [Fr.]. An alimentary broth made by boiling meat, usually beef, in water. A soup. Also a liquid nutritive medium made by boiling meat, for the culture of microörganisms. Peptonized bouillons and solutions of powdered meats have also been used. **B. of Liebig,** made by dissolving Liebig's meat extract, 5 grams, in boiling water, 100 grams, neutralizing with bicarbonate of soda and filtering. Its nutritive value is increased by adding glucose.

Bouisson's Operation. See *Operations, Table of.*

Bouknemia (*book-ne'-me-ah*). Synonym of *Elephantiasis arabum.*

Boulesis (*boo-le'-sis*). See *Bulesis.*

Boulimia (*boo-lim'-e-ah*). See *Bulimia.*

Boulopeithia (*boo-lo-pi'-the-ah*). See *Bulopeithia.*

Boulton's Solution. A solution used in the form of a spray in the treatment of rhinitis. Its formula is, compound tincture of iodin ♏xx; carbolic acid (cryst.), ♏vj; glycerin, ʒvij; distilled water, ℥v. This is placed in a water bath at 100°, in a tightly-corked bottle until the solution becomes colorless, and is then filtered.

Bouquet (*boo-ka'*) [Fr.]. 1. In anatomy, a cluster, of nerves, blood-vessels, or muscles. 2. The delicate

perfume and flavor of good wine. 3. The odor characteristic of a disease. **B. of Riolan,** the cluster of ligaments and muscles attached to the styloid process.

Bourdin's Paste. A mixture of nitric acid with flowers of sulphur; used as an escharotic.

Bourdonnement (*boor-don-mon(g)′*) [Fr., *bourdonner*, to *buzz*]. Any buzzing sound. The murmur that is heard when the stethoscope is applied to any part of the body. It is thought to result from contraction of the muscular fibrillæ. See, also, *Bombus.*

Boutha (*boo′-thah*). A non-alcoholic, stimulating, aërated beverage, containing *thein;* proprietary.

Bouton (*boo-tōn(g)′*) [Fr.]. 1. A bud or bulb. 2. A pimple. **B. d'Alep,** the Aleppo button or boil. See *Furunculus orientalis.* **B. de Biskra.** See *Furunculus orientalis.*

Boutons Terminals. Small terminal enlargements or tactile-cells of sensory nerves, as in the nose of the guinea pig and mole.

Boutonnière Operations. See *Operations, Table of.*

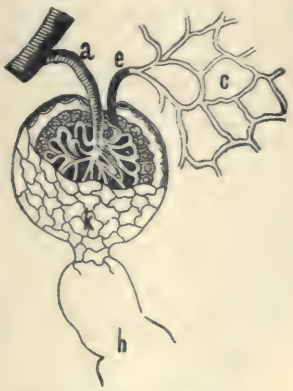
Bovet, Bacillus of. See *Bacteria, Synonymatic Table of.*

Bovey Coal (*bo′-ve kōl*). See *Lignite.*

Bovina Fames (*bo-vi′-nah fa′-mēz*) [L.]. Bovine hunger; bulimia.

Bovine (*bo′-vin*) [*bovinus*, of an ox]. Ox-like. **B. Heart,** the immensely hypertrophied heart of aortic valvular disease. **B. Hunger.** See *Bovina Fames.*

Bovinine (*bo′-vin-in*) [*bos, bovis*, an ox]. A proprietary preparation of beef used as a food for invalids and convalescents.



Bovista (*bo-vis′-tah*) [L.]. 1. A genus of fungi closely allied to *Lycoperdon;* some of the species are edible. 2. The *Lycoperdon bovista*, a fungus or puff-ball. When dry it is a good styptic, and its tincture is used for nervous diseases. It is chiefly employed by homeopathists.

Bow (*bo*) [ME., *bowe*]. A bending. **B.-drill,** a kind of drill worked by a bow and string, formerly employed in lithotripsy. **B.-leg,** a bending outward of the lower limbs. See *Genu varum.*

Bowditch Island Ringworm. See *Tinea imbricata.*

Bowels (*bow′-elz*) [ME., *bowele*: *botellus*, a sausage]. The intestines.

Bowman's Capsule. The hyaline membrane that forms the wall of the enlargement at the origin of a uriniferous tubule. Same as *Malpighian Capsule.* **B. Discs,** the products of a breaking up of muscle-fibers in the direction of the transverse striations. These correspond to the discs of "*principal substance*" of Dobie. **B. Glands.** See *Gland.* **B. Lamellæ of the Cornea.** See *Membrane of Descemet.* **B. Membrane,** a thin homogeneous membrane representing the uppermost layer of the stroma of the cornea, with which it is intimately connected. **B. Muscle.** See *Muscles, Table of.* **B. Operations.** See *Operations, Table of.* **B. Physic.** See *Gillenia.* **B. Probe.** See *Lachrymal.* **B. Root.** See *Gillenia.* **B. Tubes,** artificial passages made by forcing air or fluids between the corneal lamellæ.

BOWMAN'S CAPSULE AND GLOMERULUS.

a. Vas afferens. *e.* Vas efferens. *c.* Capillary network of the cortex. *k.* Endothelium of the capsule. *h.* Origin of a convoluted tubule. (*After Landois.*)

Box, Boxwood (*boks, boks′-wood*). See *Buxus.* **B.-berry,** a popular name for *Gaultheria procumbens.* **B. Plate,** a metallic plate with an air-tight chamber, used as an obturator, or in connection with artificial teeth, for the replacement of the loss of natural structure. See *Raised Base.* **B. Pulse-measurer,** an instrument for measuring the pulse by its action upon a column of liquid when the exposed artery is placed within an oblong box communicating with the column.

Boyer's Apparatus. An apparatus for reducing fractures of the humerus; it is composed of four splints and two spiral bandages, one within and one around the splints. **B. Bandage.** See *Bandage.* **B. Cyst.** See *Diseases, Table of.* **B. Splint.** See *B.'s Apparatus.*

Boyle's Law. See *Law.* **B. Ventilator.** See *Ventilation.*

Boynton's Method. See *Operations, Table of.* **B. Treatment.** See *Treatment, Methods of.*

Bozeman's Apparatus. A wooden framework intended to hold a patient in the knee-elbow posture in the operation for vesico-vaginal fistula. **B. Catheter,** a double-current catheter. **B. Operation.** *See Operations, Table of.*

Braccate (*brak′-āt*) [*bracæ*, breeches]. In biology, having the feet completely feathered.

Brachelytrous (*bra-kel′-it-rus*) [*βραχύς*, short; *ἔλυτρον*, a sheath]. In biology, with short elytra or wing-covers.

Brachia (*bra′-ke-ah*). Plural of *Brachium.*

Brachial (*bra′-ke-al*) [*brachium*, the arm]. Pertaining to the arm, especially the upper arm. **B. Artery,** the continuation of the axillary artery, extending along the inner side of the arm. See *Arteries, Table of.* **B. Diplegia.** See *Paralysis.* **B. Glands,** the lymphatic glands of the arm. See *Gland.* **B. Plexus,** the plexus of the fifth, sixth, seventh, and eighth cervical and the first dorsal pair of nerves. See *Plexuses, Table of.* **B. Veins,** the veins of the arm that accompany the brachial artery. See *Vein.*

Brachialgia (*bra-ke-al′-je-ah*) [*βραχίων*, the arm; *ἄλγος*, pain]. Pain or neuralgia in the arm or in the brachial plexus.

Brachialis anticus (*bra-ke-a′-lis an′-tik-us*). See *Muscles, Table of.*

Brachiate (*bra′-ke-āt*) [*brachium*, an arm]. In biology, possessing arms or branches.

Brachinin (*brak′-in-in*) [*βραχύς*, short]. A substance obtained from the Bombardier Beetle, *Brachinus crepitans*, of Europe. It is said to be efficacious against rheumatism. Unof.

Brachiocephalic (*bra-ke-o-sef-al′-ik*) [*βραχίων*, the arm; *κεφαλή*, head]. Pertaining to the arm and the head. **B. Artery** and **Vein,** the innominate artery and vein.

Brachiocubital (*bra-ke-o-ku′-bit-al*) [*βραχίων*, the arm; *cubitus* the forearm]. Relating to the arm and forearm; as the brachio-cubital ligament.

Brachiocyllosis (*bra-ke-o-sil-o′-sis*) [*βραχίων*, the arm; *κύλλωσις*, a bending]. A crookedness of the arm; also the paralysis that may accompany it.

Brachiodermian (*bra-ke-o-der′-me-an*) [*βραχίων*, the arm; *δέρμα*, the skin]. Relating to the skin of the arm.

Brachioncus (*bra-ke-ong′-kus*) [*βραχίων*, the arm; *ὄγκος*, a swelling]. Any hard and chronic swelling of the arm.

Brachionigraph (*bra-ke-on′-ig-raf*) [*βραχίων*, the arm; *γράφειν*, to write]. A device or apparatus by which a

person who has lost the hand, or who has writer's cramp, can write by means of the muscles of the upper arm.

Brachioradial (*bra-ke-o-ra'-de-al*) [*βραχίων*, the arm; *radius*, a staff]. The supinator radii longus muscle. See *Muscles, Table of.*

Brachiorrheuma (*bra-ke-o-ru'-mah*) [*βραχίων*, the arm; *ῥεῦμα*, a flux]. Rheumatism of the arm.

Brachiostrophosis (*bra-ke-o-stro-fo'-sis*) [*βραχίων*, the arm; *στρέφειν*, to turn]. A twist or twisted deformity of the arm.

Brachiotomy (*bra-ke-ot'-o-me*) [*βραχίων*, the arm; *τομή*, a section]. The surgical or obstetric removal of an arm.

Brachiplex (*bra'-ke-pleks*) [*βραχίων*, the arm; *plexus*, a twining]. The brachial plexus.

Brachiplexal (*bra-ke-pleks'-al*) [*βραχίων*, the arm; *plexus*, a twining]. Relating to the brachiplex.

Brachistocephalic, or Brachistocephalous (*bra-kis-to-sef-al'-ik*, or *bra-kis-to-sef'-al-us*) [*βράχιστος*, shortest; *κεφαλή*, head]. Having an extremely short and very broad head.

Brachium (*bra'-ke-um*) [*brachium, βραχίων*, the arm: *pl.*, *Brachia*]. The arm, especially the upper arm; the arm above the elbow. An extensor process of an organ. **B. Cerebri** or **B. of Optic Lobes**, the bands connecting the nates and testes with the optic thalamus. **B. Pontis**, the brachium of the pons, being also the middle peduncle of the cerebellum. **Brachia cerebelli**, the peduncles of the cerebellum.

Brach-Romberg Symptom. See *Signs and Symptoms, Table of.*

Brachybiotic (*brak-e-bi-ot'-ik*) [*βραχύς*, short; *βίος*, life]. Short-lived.

Brachycardia (*brak-e-kar'-de-ah*). Same as *Bradycardia.*

Brachycephalia (*brak-e-sef-a'-le-ah*) [*βραχύς*, short; *κεφαλή*, a head]. The quality of being brachycephalic.

Brachycephalic (*brak-e-sef-al'-ik*) [*βραχύς*, short; *κεφαλή*, a head]. In biology, applied to skulls of an egg-like shape, with the larger end behind. Having a skull, the transverse diameter of which is more than eight-tenths of the long diameter. See *Index.*

Brachycephalism (*brak-e-sef'-al-izm*). See *Brachycephalia.*

Brachycephalous (*brak-e-sef'-al-us*) [*βραχύς*, short; *κεφαλή*, a head]. Brachycephalic.

Brachycephaly (*brak-e-sef'-a-le*). See *Brachycephalia.*

Brachydactylia (*brak-e-dak-til'-e-ah*) [*βραχύς*, short: *δάκτυλος*, a digit]. Abnormal shortness of the fingers or toes.

Brachydactylism (*brak-e-dak'-til-izm*). See *Brachydactylia.*

Brachydactylous (*brak-e-dak'-til-us*) [*βραχύς*, short; *δάκτυλος*, a finger]. Pertaining to an abnormal shortness of the fingers or toes.

Brachygnathism (*brak-ig'-nāth-izm*) [*βραχύς*, short; *γνάθος*, a jaw]. Excess of length of the superior incisive arch, as in a horse.

Brachykephalia (*brak-e-kef-a'-le-ah*). See *Brachycephalia.*

Brachymetropia (*brak-e-me-tro'-pe-ah*) [*βραχύς*, short; *μέτρον*, a measure; *ὤψ*, the eye]. See *Myopia.*

Brachymetropic (*brak-e-me-trop'-ik*) [*βραχύς*, short; *μέτρον*, a measure; *ὤψ*, the eye]. See *Myopic.*

Brachyodont (*brak'-e-o-dont*) [*βραχύς*, short; *ὀδούς*, a tooth]. In biology, applied to low-crowned teeth: the opposite of *Hypsodont.*

Brachypnea (*brak-ip-ne'-ah*) [*βραχύς*, short; *πνοή*, breath]. Abnormal shortness of breath.

Brachypodous (*brak-ip'-o-dus*) [*βραχύς*, short; *πόυς*, foot]. In biology, possessing a short foot or stalk.

Brachypterous (*brak-ip'-ter-us*) [*βραχύς*, short; *πτερόν*, a wing]. In biology, short-winged.

Brachyrrhinia (*brak-e-rin'-e-ah*) [*βραχύς*, short; *ῥίς*, a nose]. Abnormal shortness of the nose.

Brachysomia (*brak-e-so'-me-ah*) [*βραχύς*, short; *σῶμα*, body]. Shortness of the body.

Brachyurous (*brak-e-u'-rus*) [*βραχύς*, short; *οὐρά*, tail]. In biology, short-tailed.

Bracklet (*brak'-let*) [*bracteola*, a thin leaf]. In biology, the smaller bract borne on pedicles.

Bract (*brakt*) [*bractea*, a thin plate]. In biology, the name of the modified leaves borne on flower-peduncles or at the base of flower-clusters.

Bracteole. Same as *Bracklet.*

Bradesthesia (*brad-es-the'-ze-ah*). See *Bradyesthesia.*

Bradyarthria (*brad-e-ar'-thre-ah*) [*βραδύς*, slow; *ἄρθρον*, articulation]. Abnormally slow articulation of words: bradylalia.

Bradybolism (*brad-ib'-o-lizm*) [*βραδύς*, slow; *βάλλειν*, to throw]. Same as *Bradyspermatism.*

Bradycardia (*brad-e-kar'-de-ah*) [*βραδύς*, slow; *καρδία*, the heart]. Slow pulse—the opposite of *tachycardia.*

Bradycauma (*brad-e-kaw'-mah*) [*βραδύς*, slow; *καῦμα*, burn: *pl.*, *Bradycaumata*]. Slow cautery, as with the moxa.

Bradycrote (*brad'-e-krōt*) [*βραδύς*, slow; *κρότος*, a beating]. Marked by or relating to slowness of the pulse.

Bradycrotic (*brad-e-krot'-ik*) [*βραδύς*, slow; *κρότος*, a beating]. Bradycrote.

Bradyecoia (*brad-e-ek-oi'-ah*) [*βραδύς*, slow; *ἀκούειν*, to hear]. Hardness of hearing.

Bradyesthesia (*brad-e-es-the'-ze-ah*) [*βραδύς*, slow; *αἴσθησις*, perception]. Dulness of perception.

Bradylalia (*brad-e-la'-le-ah*) [*βραδύς*, slow; *λαλεῖν*, to talk]. A slow and disordered utterance.

Bradylogia (*brad-e-lo'-je-ah*) [*βοαδύς*, slow; *λόγος*, discourse]. Bradylalia.

Bradymasesis, Bradymassesis (*brad-e-mas-e'-sis*), or **Bradymastesis** (*brad-e-mas-te'-sis*) [*βραδύς*, slow; *μάσησις*, mastication]. Slow or difficult mastication, especially that seen in general paralysis, or after lesions of the fifth nerve.

Bradypepsia (*brad-e-pep'-se-ah*) [*βραδύς*, slow; *πέψις*, digestion]. Difficult or slow digestion.

Bradyphasia (*brad-e-fa'-ze-ah*) [*βραδύς*, slow; *φάσις*, speech]. Bradylalia.

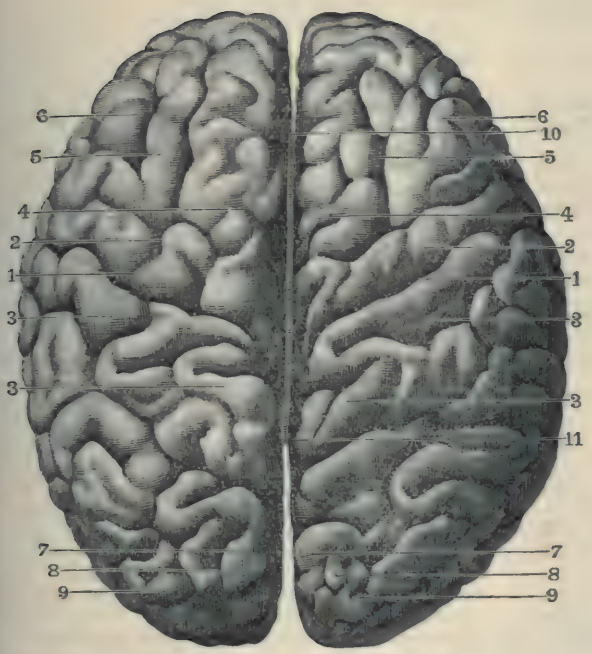
Bradyphrasia (*brad-e-fra'-ze-ah*) [*βραδύς*, slow; *φράσις*, utterance]. Slowness of speech; it occurs in some types of mental disease.

Bradypnea (*brad-ip-ne'-ah*) [*βραδύς*, slow; *πνέειν*, to breathe]. Abnormal slowness of breathing.

Bradyspermatism (*brad-e-sper'-mat-izm*) [*βραδύς*, slow; *σπέρμα*, seed]. Abnormally slow emission of semen.

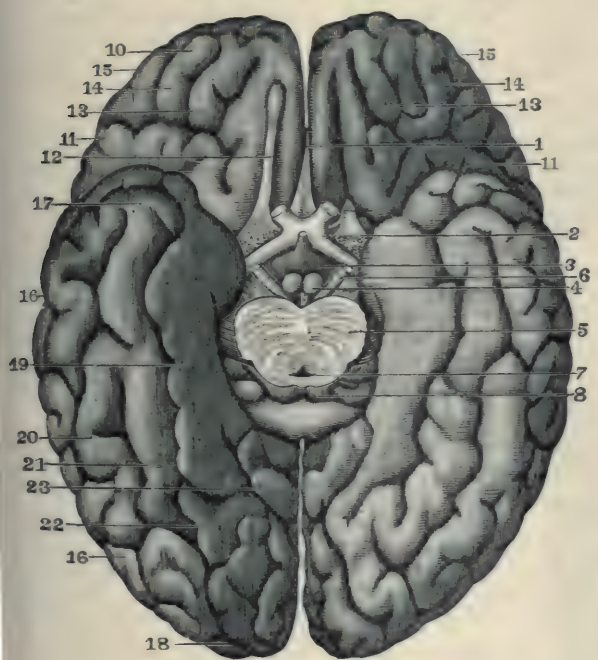
Bradysphygmia (*brad-e-sfig'-me-ah*) [*βραδύς*, slow; *σφυγμός*, pulse]. Abnormal slowness of the pulse.

Bradysuria (*brad-is-u'-re-ah*). See *Bradyuria.*



Bradytocia (*brad-e-to'-se-ah*) [*βραδύς*, slow; *τόκος*, birth]. Abnormally slow or protracted parturition.

Bradytrophic (*brad-e-trōf'-ik*) [*βραδύς*, slow; *τροφή*, nutrition]. Characterized by slowness of trophic changes.



Bradyuria (*brad-e-u'-re-ah*) [*βραδύς*, slow; *οὖρον*, urine]. Slow passage of urine.

Braidism (*brād'-izm*) [*Braid*, the originator]. The hypnotic state produced by fixation of the eyes upon a shining object; described by James Braid in 1842. See *Hypnotism.*

Brain (*brān*) [Low Ger., *brægen*]. The general contents of the cranium, especially the cerebrum. **B.**,

SUPERIOR ASPECT, OR CONVEXITY OF THE BRAIN.
1, 1. Fissure of Rolando. 2, 2. Ascending frontal convolution. 3, 3. Ascending and superior parietal convolutions. 4, 4. First frontal convolution. 5, 5. Second frontal. 6, 6. Third frontal. 7, 7. First occipital. 8, 8. Second occipital. 9, 9. Third occipital. 10. Anterior extremity of corpus callosum. 11, 11. Posterior extremity.

INFERIOR ASPECT OF THE BRAIN.
1. Anterior extremity of corpus callosum. 2. Optic chiasm. 3. Tuber cinereum and infundibulum. 4. Corpora albicantia, or mamillaria. 5. Pons varolii. 6. Third nerve. 7. Aqueduct of Sylvius. 8. Testes. 10. Inferior surface of frontal lobe. 11. Convolution of the fissure of Sylvius. 12. Olfactory nerve. 13. Third convolution of inferior surface of frontal lobe. 14. Fourth convolution. 15. Third convolution of external surface of frontal lobe. 16. External border of posterior lobe. 17. Sphenoidal extremity. 18. Occipital extremity. 19. Hippocampal convolution. 20. External convolution of posterior lobe. 21. Middle convolution. 22. Internal convolution. 23. Gyrus fornicatus.

Abdominal. See *Solar Plexus.* **B., After-.** See *Metencephalon.* **B. Axis,** that portion of the brain-substance including the island of Reil, the basal ganglia, the crura, pons, medulla, and cerebellum. **B.-bladder,** a cerebral vesicle of the embryo. **B., Compression of,** may arise from injury or disease, from serous exudation, blood extravasation, etc. See *Compression.* **B., Concussion of,** is the result of injury producing symptoms of loss of power and function generally. See *Concussion.* **B.-fag,** mental exhaustion due to overwork. **B. Fever** See *Meningitis;* also Synonym of *Typhoid Fever.* **B., Fore-.** See *Prosencephalon.* **B., Hind-.** See *Epencephalon.* **B., Incallosal,** one in which there is a complete absence of the corpus callosum. This is commonly associated with mental and physical weakness, amounting often to idiocy. **B., Inter-.** See *Diencephalon.* **B., Irritation of,** follows injury, and is marked by symptoms of irritability and often by convulsive phenomena. **B., Little,** the cerebellum. **B.-mantle,** that portion of the brain-substance including the convolutions, corpus callosum, and fornix. **B., Mid-.** See *Mesencephalon.* **B.-pan,** the cranium. **B., Railway,** a neurosis sometimes occurring in those who ride constantly on railway trains. It is characterized by anesthesia, or spinal hyperesthesia, insomnia, paresis, etc. **B. Sand,** a gritty mineral matter found in and about the pineal gland, consisting mainly of calcium and magnesium carbonates and phosphates. Its function is not known. **B.-shake.** Synonym of *B., Concussion of.* **B.-stem,** the pons, medulla, and crura cerebri. **B.-storm,** a succession of sudden and severe phenomena, due to some cerebral disturbance. **B.-tire,** a condition of brain-exhaustion due to excessive functional activity. See *B.-fag.* **B.-wave,** the supposed telepathic vibration of a "mentiferous ether," by which thoughts and impressions may be transferred from one person to another. **B.-wax.** See *Cephalot.*

Brainard's Operations. See *Operations, Table of.*

Bramah's Apparatus. An apparatus by which water may be charged with CO_2 by the continuous method.

Bramble (*bram'-bl*). See *Rubus.*

Bran (*bran*) [ME., *bran*]. The epidermis or outer covering of the seeds of most cereals. It contains woody matter 35, starch 22, albumin and gluten 13, water 12, gum 8, other matters, including a small amount of silica, 10 per cent. It contains, also, a diastatic ferment that converts the starch into dextrin. **B. Bath.** See *Bath.* **B. Tea,** a decoction of bran, used in coughs.

Branch (*branch*) [ME., *branche*]. A name given to the divisions or offshoots of blood-vessels, lymphatics, or nerves, from the trunk or main stem.

Branchiæ (*brang'-ke-e*) [βράγχια, gills]. The gills of fishes.

Branchial (*brang'-ke-al*) [βράγχια, gills]. Pertaining to branchiæ. **B. Arches.** See *Arches.* **B. Openings.** See *Clefts, Visceral.*

Branchiostegite (*brang-ke-os'-tej-it*) [βράγχια, gills; στέγη, a roof]. In biology, that portion of the carapace of a crustacean that covers the gills and branchial chamber.

Branchireme (*brang'-ke-rēm*) [*branchiæ*, gills; *remus*, an oar, hand or foot of a swimmer]. In biology, a crustacean having gill-bearing legs.

Branchus (*brang'-kus*) [βράγχος, hoarseness]. Hoarseness.

Brand Bath. See *Bath.* **B. Method.** See *Treatment, Methods of.*

Brandt's Method. See *Treatment, Methods of.* **B.'s Operation.** See *Operations, Table of.*

Brandy (*bran'-de*). See *Spiritus.* **B. Nose.** See *Acne rosacea.*

Branks (*brangks*) [Gael., *brancas*, a kind of pillory]. The mumps.

Branny (*bran'-e*) [ME., *bran*]. Like bran. **B. Kidney.** Same as *Large White Kidney, q. v.* **B. Tetter.** Synonym of *Pityriasis.*

Brasdor's Operation. See *Operations, Table of.*

Brash (*brash*) [Dutch, *braaken*, to vomit]. A common name indicating almost any disorder of the digestive system; any rash, or eruption; a short fit of illness. **B., Water.** See *Pyrosis.*

Brasilin (*bra'-zil-in*) [ME., *brasil*], $C_{16}H_{14}O_5$. Brazilin, a coloring-matter found in Brazil-wood and red-wood; it crystallizes in white, shining needles, and dissolves in alkalies with a carmin-red color on exposure to the air. See *Pigments, Conspectus of.*

Brass (*bras*) [ME., *bras*]. An alloy of copper with 25–40 per cent. of zinc. **B.-Founder's Ague.** See *Ague.*

Brassica (*bras'-ik-ah*) [AS., *brassica*, cabbage]. A genus of plants, Nat. Order, *Cruciferæ*, including the common cabbage. **B. acidulata**, sour crout (or Sauer Kraut). **B. asperifolia esculenta**, the common turnip. **B. cauliflora** (or **florida**), the cauliflower. **B. cumana** or **rubra**, the red cabbage. **B. napus**, the rape plant. **B. nigra**, the black mustard. **B. sativa**, the common cabbage.

Brassidic Acid (*bras-id'-ik*). See *Acid.*

Braun's Canal. See *Canal.* **B. Operation.** See *Operations, Table of.* **B. Test.** See *Tests, Table of.*

Braune (*braun*). See *Brunissure.*

Braune's Canal. See *Canal.*

Brawn (*brawn*) [ME., *braun*, a piece of flesh]. The flesh of a muscle; well-developed muscles.

Brawny (*brawn'-e*) [ME., *brawn*, a piece of flesh]. Fleshy; muscular. **B. Induration**, pathologic hardening and thickening of the tissues.

Braxy (*braks'-e*) [E. dial.]. A term applied to certain forms of blood-disease, as anthrax in sheep. Three forms are recognized by shepherds: *a*, turnip; *b*, wet; *c*, red. **B., Red**, a form of septicemia in sheep in which the tissues are uniformly stained of a deep-red color by the coloring-matter of the blood. **B., Turnip**, a form of malnutrition of the blood occurring in sheep that are fed on an unlimited supply of roots, particularly of swedes. The attack is sudden in onset, short in duration, and fatal in termination. See *Bacillus anthracis*, Pollender and Davaine, under *Bacteria, Synonymatic Table of.*

Brayera (*bra-ye'-rah*) [Fr., *brayer*]. Koosoo, koosso, koso, kousso, cusso. The female inflorescence of *Hagenia abyssinica*, containing tannic acid, a volatile oil and a crystalline principle, *Koussin*, $C_{31}H_{38}O_{10}$. In large doses it produces nausea and emesis. It is valuable mainly as an anthelmintic against tapeworm. Dose ʒij–ʒss, in infusion of boiling water. **B., Ext., Fld.**, dose ʒij–ʒj. **Infusum Cusso** (B. P.). Dose ʒiv–viij.

Bread (*bred*) [Sax., *bredan* to nourish; Lat., *panis;* Gr., ἄρτος]. A mixture of flour and water made porous by carbon dioxid and then baked. The flour may be of wheat, corn, oat, or rye. The carbon dioxid may be introduced by decomposing an alkaline carbonate (sodium or potassium), by an acid ("cream of tartar"), or by fermenting the starch with yeast. **B., Brown**, a kind of bread made from a mixture of corn, rye and wheat flour. **B., Graham**, made from unbolted wheat flour; it contains more gluten, diastase and mineral phosphates than ordinary bread. **B., White**, bread made from bolted wheaten flour, and therefore deficient in diastase, gluten and mineral phosphates. Other kinds, such as rye (or black), corn, bran, barley, etc., indicate their composition by their name. **B.-jelly**, a food of service as an occasional change from mushes, but with a tendency to constipate if given freely. It is prepared by pouring boiling water upon stale bread and allowing it to soak for an hour. The water is then removed, fresh water added, and the whole boiled until a thick mass forms. On pouring off the excess of water and cooling, a jelly-like material remains which may be eaten with milk or sugar. **B.-mould.** See *Ascophora.* **B.-paste**, a culture-medium for bacteria. Stale, coarse bread is dried, ground to powder and made into a paste with water. It is well suited for the growth of moulds.

Break (*brāk*) [ME., *breken*, to break]. In electricity, an opening in the circuit of a battery. See *Make.* In surgery, a fracture. **B.-bone Fever.** See *Dengue.* **B. Shock**, a term sometimes employed in electrotherapeutics for the physiologic shock produced on the opening or breaking of an electric circuit.

Breast (*brest*) [ME., *brest*, the breast]. The upper anterior part of the body between the neck and abdomen. Also, the mamma. **B.-bone.** See *Sternum.* **B., Broken**, abscess of the mammary gland. **B., Chicken**, *Pectus carinatum*; a deformity marked by prominence of the sternal portion of the chest. **B. Glass**, a glass receptacle for the overflow of milk from the breast. **B. Pang**, angina pectoris. See *Stenocardia.* **B. Pump.** See *Antlia.* **B., Pigeon.** Same as *B., Chicken.* **B. Tea, German**, a mixture of althea, or marshmallow, eight parts; coltsfoot leaves, four parts; liquorice, three parts; anise and mullein leaves, each two parts; orris, one part: this is called also *species pectoralis.*

Breastweed. See *Saururus cernuus.*

Breath (*breth*) [AS., *bræth*]. The air exhaled from the lungs. It has lost a part of its oxygen and gained a certain but varying amount of ammonia, aqueous vapor and carbon dioxid from the oxidation of the waste-matter of the blood. Also applied to the air inspired. **B. Sounds**, the respiratory sounds heard upon auscultation. In the healthy chest three varieties of respiratory sounds may be recognized: 1. Those produced in the glottis, and audible over the lower end of the trachea—*tracheal* or *bronchial breathing.* 2. Those produced in the alveoli and audible over the lungs—*vesicular* breathing. 3. Those audible about the roots of the lungs, combining the character of the two preceding—*broncho-vesicular breathing.* A *Table of Breath-Sounds* is given on the next page.

TABLE OF BREATH-SOUNDS IN HEALTH AND DISEASE.

(Altered and enlarged from J. K. Fowler).

Variety of Breathing.	Period.	Pitch.	Quality.	Interval.	Duration.	Intensity.	Where Heard.	Condition in which Heard.
Vesicular.	1. Inspiration.	Low.	Vesicular.	None.	. . . .	Variable.	Over the lungs, in health.	In health.
	2. Expiration.	Lower.	Blowing.	. . . .	Shorter than inspiration or absent.	Faint or absent.		
Bronchial.	1. Inspiration.	High.	Tracheal.	Distinct.	. . . .	Variable.	In *health*, over the seventh cervical spine In *disease*, over areas of consolidation	In health; pulmonary tuberculosis, lobar pneumonia, large pleuritic effusions, thoracic aneurysm, mediastinal tumors.
	2. Expiration.	Higher.	Tracheal.	. . . .	Equal to or longer than inspiration.	Greater.		
Broncho-vesicular.	1. Inspiration.	Higher than in vesicular breathing.	More or less tracheal.	Slight.	. . . .	Variable.	In *health, ant.*, over sternal portion of infra-clavic. region; *post.*, upper part of inter-scapular region. In *disease*, over slight consolidation.	In health; pneumonia, pulmonary tuberculosis.
	2. Expiration.	Higher than in vesicular breathing.	More or less tracheal.	. . . .	About equal to inspiration.	Greater.		
Amphoric.	1. Inspiration.	Low.	Hollow and metallic.	Distinct.	. . . .	Variable.	Over a large cavity communicating with an open bronchus.	Pulmonary tuberculosis.
	2. Expiration.	Lower.	Both characters more marked.	. . . .	Longer than inspiration.	Greater.		
Cavernous.	1. Inspiration.	Low.	Blowing and hollow.	Distinct.	. . . .	Variable.	Over a cavity communicating with an open bronchus.	Pulmonary tuberculosis.
	2. Expiration.	Lower.	Both characters more marked.	. . . .	Longer than inspiration.	Greater.		
Tubular.	1. Inspiration.	Higher than in bronchial breathing.	Laryngeal or whiffing.	Distinct.	. . . .	Variable.	Over consolidated areas.	Lobar pneumonia, pulmonary tuberculosis.
	2. Expiration.	Higher.	Laryngeal or whiffing.	. . . .	Equal to or longer than inspiration.	Greater.		

Breathing (*brēth'-ing*) [AS., *brǽth*]. See *Respiration*. **B., Abdominal,** breathing in which the abdominal walls move decidedly and in which the diaphragm is actively engaged. **B., Diminished,** is the reverse of *B. Exaggerated*. The normal breath-sound is present, but its intensity is much diminished. It is very frequently heard at the apex in the early stage of pulmonary tuberculosis. **B., Exaggerated,** is the normal breath-sound of children, but when occurring in adults, it indicates a compensatory action of one part of the lungs for deficient action elsewhere. It is an exaggerated degree of the normal vesicular breathing. **B., Interrupted, Wavy or Cogwheel,** a broken or interrupted inspiratory sound produced by nervousness, irregular contraction of the muscles of respiration, or irregular expansion of the lung from disease. **B., Mouth,** habitual respiration through the mouth. **B., Puerile.** See *B., Exaggerated*. **B., Suppressed,** entire absence of breath-sounds, as in pleuritic effusion and certain solid conditions of the lung. **B., Thoracic,** respiration in which the thoracic walls are actively moved.

Bredsore (*bred'-sōr*) [Vulgar]. A sore coming without any visible cause; a whitlow; also called *Breeder*.

Breech (*brēch*) [ME., *breech*]. The buttocks. **B. Position.** See *Fetus, Position of*.

Breeches Splint. A splint that surrounds the leg; oftenest made of woven wire.

Breed (*brēd*) [AS., *brēdan*, to nourish]. To beget, produce; to nurse; to develop.

Breeder (*brēd'-er*). See *Bredsore*.

Breeding-season (*brē'-ding sē'-zun*) [AS., *brēdan*, to nourish]. The period during which certain species of animals, especially the lower forms of vertebrates, beget and rear their young.

Breeze (*brēz*). See *Head-breeze* and *Static-breeze*.

Brefeld and Nägele's Method. See *Fractional Cultivation*.

Bregenin (*breg'-en-in*) [Low Ger., *bregen*, brain], $C_{40}H_{67}NO_5$. A name given by Thudichum to a viscous principle, soluble in and crystallizable from alcohol, by means of which it has been extracted from brain-tissue. It is fusible like a fat, but is miscible with water.

Bregma (*breg'-mah*) [*βρέγμα*, the sinciput: *pl.*, *Bregmata*]. A term applied to the anterior fontanelle. See *Craniometric Points*.

Bregmatic (*breg-mat'-ik*) [*βρέγμα*, the sinciput]. Relating to a bregma.

Bregmato-anterior (*breg'-mat-o-an-tē'-re-or*) [*βρέγμα*, the sinciput; *anterius*, front]. Having the bregma in the anterior portion of the mother's pelvis; applied to the presentation in labor.

Bregmato-cotyloid (*breg'-mat-o-kot'-il-oid*) [βρέγμα, the sinciput; κοτύλη, a socket; εἶδος, form]. With the bregma toward the cotyloid depression (acetabulum) of the mother's pelvis; a term used in obstetrics.

Bregmatodymia (*breg-mat-o-dim'-e-ah*) [βρέγμα, the sinciput; δίδυμος, twin]. Teratic union of twins by the bregmata.

Bregmato-posterior (*breg'-mat-o-pos-te'-re-or*) [βρέγμα, the sinciput; *posterius*, backward]. Having the bregma toward the rear of the mother's pelvis; a term used in obstetrics.

Bremen (*brem'-en*) [Ger.]. A town in Germany. **B. Blue.** See *Conspectus of Pigments*, under *Pigment*. **B. Green.** See *Conspectus of Pigments*, under *Pigment*.

Bremer's Test for Diabetic Blood. Diabetic blood-corpuscles stained with eosin for ten minutes in an oven at 35° C. yield a greenish yellow tint; in normal blood the color is brownish.

Bremond's Method. See *Treatment, Methods of.*

Brenner's Formula. The feeble tone heard when the anode is opened in galvanic stimulation of the auditory nerve. This tone corresponds with the resonance fundamental tone of the sound-conducting apparatus of the ear itself.

Brephalus (*bref'-al-us*) [βρέφος, the new-born babe or young]. In biology, applied to the young of a crustacean just as it quits the ovum, in whatever stage. Bates's substitute for larva.

Brephopolysarcia (*bref-o-pol-e-sar'-ke-ah*) [βρέφος, an infant; πολύς, much; σάρξ, flesh]. Excess of flesh in an infant.

Brephotrophium (*bref-o-tro-fe'-um*) [βρέφος, infant; τρέφειν, to nourish]. An infant-asylum; a foundling-hospital.

Breschet, Canals of. See *Canal.* **B., Sinus of,** the spheno-parietal sinus. See *Sinus.* **B.'s Veins.** See *Vein.*

Bresgen's Formulæ. Silver-nitrate powders of varying strengths, with powdered starch, for use in rhinitis.

Breslau Fever. See *Fever.* **B. Test.** See *Birth.*

Brevē extensor digitorum (*brev-e-eks-ten'-sor dig-it-o'-rum*) [L.]. The extensor brevis digitorum. See *Muscles, Table of.*

Brevicaudate (*brev-e-kaw'-dāt*) [*brevis*, short; *cauda*, tail]. In biology, short-tailed.

Breviductor (*brev-e-duk'-tor*) [L.]. The adductor brevis muscle of the thigh. See *Muscles, Table of.*

Breviflexor (*brev-e-fleks'-or*) [L.]. Any short, flexor muscle.

Brevifoliate (*brev-e-fo'-le-āt*) [*brevis*, short; *folium*, a leaf]. In biology, short-leaved.

Brevilingual (*brev-e-ling'-gwal*) [*brevis*, short; *lingua*, a tongue]. In biology, short-tongued.

Breviped (*brev'-e-ped*) [*brevis*, short; *pes*, a foot]. In biology, short-footed.

Brevipen (*brev'-e-pen*) [*brevis*, short; *penna*, a wing]. In biology, short-winged.

Brevirostrate (*brev-e-ros'-trāt*) [*brevis*, short; *rostrum*, a beak. In biology, short-billed.

Brevissimus oculi (*brev-is'-em-us ok'-u-li*) [L.]. The shortest muscle of the eye; the obliquus inferior. See *Muscles, Table of.*

Brewcke's Test. See *Tests, Table of.*

Briançon Manna (*bre-an-sōn' man'-ah*). A kind of manna from the twigs of the European larch-tree.

Bribosia's Operation. See *Operations, Table of.*

Brick-Dust Deposit (*brik'-dust de-pos'-it*). A lateritious sediment from urine.

Bricklayers' Itch (*brik-la'-erz ich*). Eczema due to irritation of lime mortar.

Brick-makers' Anemia. See *Anchylostomiasis.*

Bridge (*brij*) [ME., *brigge*]. 1. The upper ridge of the nose formed by the union of the two nasal bones. 2. In electricity, an apparatus for measuring the resistance of a conductor. **B. Coloboma.** See *Coloboma.* **B., Herpetic,** a term for *Fascicular Keratitis, q. v.* **B. of Nose,** the prominent ridge formed by the nasal bones. **B. of Varolius,** the pons Varolii. **B.-Work,** in dentistry, the adaptation of artificial crowns of teeth to and over spaces made by the loss of natural teeth, by connecting such crowns to natural teeth or roots for anchorage by means of a bridge, and thereby dispensing with plates covering more or less of the roof of the mouth and the alveolar ridge.

Bridle (*brī'-dl*) [ME., *bridel*]. 1. A *Frenum, q. v.* 2. A band or filament stretching across the lumen of a passage, or from side to side of an ulcer, scar, or abscess. **B. Stricture,** a stricture due to the presence of a bridle traversing the caliber of the urethra.

Brieger, Bacillus of. See *Bacteria, Synonymatic Table of.* **B.'s Method,** a method of separating ptomaïnes from a putrefying mass.

Briggs's Operation. See *Operations, Table of.*

Brightic (*brīt'-ik*) [*Bright*, an English physician]. A person suffering from Bright's disease.

Bright's Disease (*brīts dis-ēz'*) [*Bright*, an English physician]. A name formerly incorrectly used as a synonym of albuminuria, and at present covering several forms of disease of the kidney associated with albumin in the urine. It may be acute (*acute parenchymatous nephritis*) or chronic (which includes *chronic parenchymatous nephritis, granular contraction of the kidneys*, and *albuminoid degeneration of the kidneys*). Bright's disease is considered by Fothergill as a secondary condition arising from a tendency toward the reversion to that preanthropic type in which the liver performed the additional office of excreting uric acid. **Acute Bright's Disease** is sudden in its onset, and is associated with chills, headache, backache, vomiting, and edema, especially marked in the eyelids and the cheeks. The urine is scanty or even suppressed, of a dark, smoky hue, and contains a large amount of albumin, and blood. Microscopically, blood-corpuscles, renal epithelium, débris, and hyalin, epithelial, and blood-casts are found, and occasionally, also, granular casts. Occasionally the glomeruli of the kidney are the seat of the most marked changes, and to this condition the term "*glomerulo-nephritis*," has been given. The most frequent cause of acute Bright's disease is exposure to cold. It is often a complication of the specific fevers, especially scarlet fever. Death frequently results from uremia or cardiac failure, or the disease may assume a chronic form. **Chronic Bright's Disease** embraces, as has been said, three distinct diseases of the kidney. *Chronic parenchymatous nephritis*, usually following an acute attack, is also known as *chronic tubal* and *chronic desquamative nephritis*, and from its size and pallor, the kidney resulting from the disease is called the "*large white kidney*." The capsule peels off readily and leaves a smooth or very slightly granular surface. The tubules are most involved in the change; they are enlarged and distended with proliferated and swollen epithelial cells. There is some thickening of the interstitial tissue, as a rule. This large kidney is prone to undergo degenerative changes, the protoplasm of the cells in the tubules breaking down into an amorphous débris. The kidney shrinks, and at the same time undergoes an increase in the interstitial tissue, forming what is known as the "*small white kidney*." *Granular contraction of the kidney* is also known as *chronic interstitial nephritis*,

and the kidney resulting is called the "*small red granular kidney*," the "*red contracted kidney*," and at times the "*gouty kidney*" or the "*arterio-sclerotic kidney*." This kidney is usually much diminished in size and weight; the capsule is greatly thickened and adherent, so that it cannot be removed without tearing the kidney-tissue. The renal substance is reddish, granular, with small cysts, and firm on section. Microscopically, there is found a great increase in the interstitial tissue, reducing the caliber of the tubules. This excess of fibrous tissue has given origin to the name "*cirrhotic kidney*," and this form of Bright's disease is frequently associated with gout, syphilis, chronic lead-poisoning, or alcoholic excess. *Albuminoid degeneration of the kidneys* is also known as the *amyloid*, *waxy*, or *lardaceous kidney*. This kidney is enlarged and quite pale; its consistence is firm, and the section has a peculiar, glistening, bacon-like appearance. The glomeruli stand out as bright points upon the surface; the capsule peels off easily and leaves a smooth surface. Iodin applied to the surface of the section turns the diseased portions a mahogany-brown color. The change in this disease is most marked in the glomeruli and the blood-vessel walls, but may be found elsewhere; it is most frequently due to prolonged suppuration, bone and joint disease, tuberculosis, syphilis, malaria, and mercurial poisoning. The onset of chronic Bright's disease is usually insidious, and may only be indicated by slight puffiness of the eyelids or the ankles, shortness of breath, dull and persistent headache, disorder of vision and hebetude. The pulse is one of high arterial tension, and there is hypertrophy of the left ventricle of the heart, especially in the case of the contracted kidney; there is frequent micturition, progressive anemia, dryness of the skin, indigestion, and a tendency to uremia. The urine is always scanty with the large white kidney, but abundant with the other forms of the disease. The specific gravity and the reaction vary; occasionally there may be present a small quantity of blood, and albumin is always present at some period in chronic Bright's disease. The quantity of albumin is very large in the large white and amyloid kidneys; very slight in the contracted form. Microscopically, the urine contains renal epithelium, granular and fatty matter, and tube-casts. The latter are most plentiful in the large white kidney, but are never so numerous as in acute nephritis; they are granular, fatty, and hyaline in nature. A frequent symptom of chronic Bright's disease is the so-called "*albuminuric retinitis*," in which condition there are ecchymoses of the retina, together with white glistening spots, most numerous near the macula lutea, and frequently arranged in lines like the radiations from a star. This is diagnostic of chronic renal disease. The prognosis of chronic Bright's disease is bad, death eventually resulting from uremia or apoplexy.

Brilliant (*bril'-yant*) [Fr.]. Bright, glittering. **B. Green.** See *Pigments, Conspectus of.* **B. Yellow.** See *Pigments, Conspectus of.*

Brim (*brim*) [ME., *brim*]. An edge or margin. **B. of Pelvis.** See *Pelvis.*

Brimstone (*brim'-stōn*). See *Sulphur.*

Brine Test. See *Tests, Table of.*

Brinton's Operation. See *Operations, Table of.*

Briquet's Ataxia. See *Ataxia*, and *Diseases, Table of.*

Briquettes (*brik-ets'*). See *Pitch.*

Brise-coque (*brēz'-kōk*) [Fr., "shell-breaker"]. An instrument for crushing the shell of a calculus after its inner part has been pulverized.

Brisement (*brēz-mon(g)'*) [Fr.]. A crushing; the forcible breaking up of an ankylosis.

Brise-pierre (*brēz'-pe-ār'*) [Fr., "stone-crusher"]. An old form of lithotrite.

Bristle (*bris'-l*) [ME., *bristel*]. In biology, a stiff, coarse hair on certain animals and plants. A stiff feather. **B.-cell,** any one of the ciliated cells at the terminations of the auditory nerve-filaments. **B., Dentist's.** See *Nerve-Bristles.*

British (*brit'-ish*) [L., *Britanni*, the original inhabitants of Britain]. Of or pertaining to Great Britain. **B. Gum.** See *Dextrin.* **B. Oil,** a mixture of petroleum, Barbadoes tar, oil of amber, oil of juniper, oil of turpentine and linseed oil; it is prized as a domestic remedy. Unof.

Broach, Watchmaker's (*brooch*). A five-sided steel instrument used by dentists for enlarging the canal in the root, and the opening into a decayed cavity in the crown of a tooth.

Broad (*brod*) [ME., *brood*]. Wide; extensive. **B. Land Irrigation.** See *Sewage, Disposal of.* **B.-leafed Laurel.** See *Kalmia.* **B. Ligament.** See *Ligament.* **B. Tapeworm.** See *Bothriocephalus latus.*

Broca, "Grand Lobe Limbique" of. The cortical cerebral convolution formed by the continuation of the *gyrus hippocampi* with the *gyrus fornicatus*. This should not be confused with "Broca's Convolution," *i. e.*, the third left frontal.

Broca's Angles. See *Angle.* **B. Aphasia.** See *Diseases, Table of.* **B. Area,** the speech-center of the frontal convolution. **B. Auricular Point,** the center of the external auditory meatus. **B. Center.** See *Center.* **B. Convolution.** See *Convolutions, Table of.* **B. Fissure.** See *Fissures, Table of.* **B. Plane,** the *alveolo-condyloid plane.* A line passing from the alveolar process of the superior maxilla and through the lowest part (condyles) of the occipital bone, the shaven head being so placed that this line shall be horizontal. This is employed in cranio-cerebral topography. **B. Speech-center,** the folded part of the base of the third frontal gyrus.

Brochus (*brō'-kus*) [L.]. A person whose teeth project, or one who has a prominent upper lip.

Brocq's Pomade. A pomade used in lupus erythematosus. It consists of salicylic and lactic acids, each ʒss; resorcin, grs. xiv; oxid of zinc, ʒij; pure vaselin, ʒxvij.

Brodie's Disease. Same as *Brodie's Knee.* **B. Knee.** See *Diseases, Table of.*

Brokaw Ring (*brok'-aw ring*). A ring used in intestinal anastomosis, made of segments of rubber drainage-tubing and threaded with catgut strands.

Broken (*brō'-ken*) [AS., *brocen*, to break]. In surgery, fractured, as a bone. **B. Breast,** abscess of the mammary gland. **B. Wind, B.-winded,** in farriery, a term applied to a condition of heart-strain following severe muscular effort. It is characterized by paroxysms of cardiac dyspnea. See *Heaves.* **B.-wing Fever.** Synonym of *Dengue.*

Bromal (*brō'-mal*) [βρῶμος, a stench; *aldehyd*], $CBr_3.CHO$. Tribromaldehyd, analogous to chloral. It is produced by the action of bromin on alcohol. It is a colorless, oily fluid, of a penetrating odor, and sharp burning taste, boiling at 172°–173°; it has been used in medicine, having properties similar to those of chloral. **B. Hydrate,** $CBr_3.CHO + H_2O$, a fluid of oily consistence, having a structure similar to that of chloral hydrate, but more irritating and narcotic than the latter. It is used as a hypnotic and in epilepsy. Dose gr. j–v. Unof.

Bromamid (*brō'-mam-id*) [βρῶμος, a stench; *amid*]. A bromin compound of the anilid group with the formula, $C_6H_2Br_3NH.HBr$. It contains 75 per cent.

of bromin, and is much used as an antipyretic, in 10- to 15-grain doses.

Bromanil (*bro'-man-il*) [βρῶμος, a stench; *anilin*], $C_6Br_4O_2$. A compound obtained by heating phenol with bromin and iodin in water. It consists of golden-yellow, shining leaflets or thick plates that melt and sublime.

Bromated Antifebrin (*bro'-ma-ted an-te-feb'-rin*). See *Antisepsin*.

Bromatography (*bro-mat-og'-ra-fe*) [βρῶμα, food; γράφη, a writing]. A description of or treatise on foods.

Bromatology (*bro-mat-ol'-o-je*) [βρῶμα, food; λόγος, a science]. The science of foods.

Bromethyl (*brōm-eth'-il*). See *Ethyl Bromid*.

Bromid, or Bromide (*bro'-mid*, or *-mīd*) [βρῶμος, a stench]. Any haloid of bromin; those of calcium, iron, ammonium, potassium, and sodium are the ones mainly used in medicine. They allay nervous excitement, promote tranquillity, and are largely employed as sedatives. **B. of Ethyl.** See *Hydrobromic Ether*.

Bromidia (*bro-mid'-e-ah*) [βρῶμος, a stench]. An American nostrum containing in each fluid dram chloral hydrate and potassium bromid, each gr. 15, extract of cannabis indica and extract of hyoscyamus, each gr. one-half. Dose ʒj.

Bromidrosiphobia (*bro-mid-ros-e-fo'-be-ah*) [βρῶμος, a stench; ἱδρώς, sweat; φόβος, fear]. Insane dread of offensive personal smells, with hallucinations as to the perception of them.

Bromidrosis (*bro-mid-ro'-sis*) [βρῶμος, a stench; ἱδρώς, sweat]. Osmidrosis; an affection of the sweat-glands in which the sweat has an offensive odor. It is usually associated with chronic local hyperidrosis, especially of the feet. The odor is due to a specific decomposition of the sweat from the presence of the *bacterium fœtidum*.

Bromidum (*bro'-mid-um*) [βρῶμος, a stench]. Bromid; a salt of bromin.

Bromin, Bromine, or **Bromum** (*bro-min*, or *-mum*) [βρῶμος, a stench]. Br = 80; quantivalence I. A reddish-brown liquid, which, at ordinary temperatures, gives off a heavy, suffocating vapor. In its elementary form it is a very active escharotic, and internally a violent poison. It is used by inhalation and as an escharotic. Dose gtt. ij, largely diluted. The salts of bromin are cerebral and cardiac depressants, and highly valuable as hypnotics. The salts of the alkaline metals are those most commonly used. They are cerebral and spinal depressants, also alterative, antispasmodic, and hypnotic. **Ammonii bromidum,** NH_4Br, prismatic crystals. Dose gr. v–xx. **Auri bromidum.** See *Aurum*. **Calcii bromidum,** $CaBr_2$, granular and deliquescent. Dose gr. v–ʒj. **Ethyl bromid,** C_2H_5Br, useful in spasmodic coughs. Dose ♏x–ʒj. **Ethylene bromid.** See *Ethylene*. **Ferri bromidi, Syr.,** contains ten per cent. of the salt. Dose ʒss–j. **Lithii bromidum,** LiBr, granular and deliquescent. Dose gr. v–xx. **Nickel bromidum.** See *Nickel*. **Potassii bromidum,** KBr, colorless, cubical crystals. Dose gr. v–ʒj. **Sodii bromidum,** NaBr, colorless, monoclinic crystals. Dose gr. v–ʒj. **Zinci bromidum,** $ZnBr_2$, granular, deliquescent powder. Dose gr. ½–ij.

Brominism, Bromism (*bro'-min-izm*, *bro'-mizm*) [βρῶμος, a stench]. Certain peculiar phenomena produced by the excessive administration of the bromids. The most marked symptoms are headache, coldness of the extremities, feebleness of the heart's action, somnolence, apathy, anesthesia of the soft palate and pharynx, pallor of the skin, and a peculiar eruption of acne which is one of the earliest and most constant symptoms. There is also anorexia with loss of sexual power and atrophy of the testes or mammæ. The patient may become almost imbecile.

Bromo-Caffein (*bro-mo-kaf'-e-in*) [*bromin; caffein*]. A proprietary effervescing preparation containing caffein. It is used for the relief of headaches.

Bromochloralum (*bro-mo-klo-ral'-um*) [βρῶμος, a stench; *chloral*]. A proprietary antiseptic and disinfecting compound, containing the bromid and chlorid of aluminum.

Bromoform (*bro'-mo-form*) [βρῶμος, a stench; *forma*, form], $CHBr_3$. A bromid having a structure like that of chloroform, $CHCl_3$; it is an active anesthetic. Its use is not followed by vomiting. It causes irritation of the conjunctiva and respiratory organs. It is used in whooping-cough in doses of gtt. ij–v in a mixture of wine and water. Unof.

Bromography (*bro-mog'-ra-fe*). Same as *Bromatography*.

Bromoiodism (*bro-mo-i'-o-dizm*) [*Bromism; iodism*]. Poisoning by bromin and iodin compounds together.

Bromol (*bro'-mol*), $C_6H_2Br_3OH$. Tribromophenol; an antiseptic substance used in the form of a powder, solution (1 : 30 olive oil), or ointment (1 : 10). Internally it is used in cholera infantum and typhoid fever. Dose gr. $\frac{1}{10}$–$\frac{1}{3}$. Unof.

Bronchadenitis (*brongk-ad-en-i'-tis*) [βρόγχια, the bronchial tubes; ἀδήν, gland; ιτις, inflammation]. Inflammation of the bronchial lymphatic glands.

Bronchaphrosia (*brongk-af-ro'-ze-ah*) [βρόγχια, bronchial tubes; ἀφρός, foam]. Obstruction due to the presence of froth in the bronchioles.

Bronchi (*brong'-ki*) [βρόγχος, the windpipe]. The two tubes into which the trachea divides opposite the third dorsal vertebra, called respectively the right and the left bronchus.

Bronchia (*brong'-ke-ah*) [βρόγχος, the windpipe]. The bronchial tubes, especially those that are smaller than the two bronchi.

Bronchial (*brong'-ke-al*) [βρόγχος, the windpipe]. Relating to the bronchi or to their branches, or to the smaller air-passages in the lungs. **B. Arteries,** branches of the thoracic aorta, three or four in number. They are the nutrient vessels of the lungs. See *Arteries, Table of*. **B. Catarrh,** the simplest form of acute inflammation of the bronchi. It is the so-called "*cold on the chest.*" The feeling of oppression and constriction, with slight mucous discharge, is due to hyperemia and swelling of the mucous membrane of the larger bronchi. **B. Fluke.** See *Distoma ringeri*. **B. Glands,** the chain of glands running beside the bronchi. They frequently undergo pathologic enlargement and give rise to a group of symptoms—cough, pain, spasmodic dyspnea, dysphagia, and change in the voice. The enlargement is usually tuberculous in nature.

Bronchiectasis (*brong-ke-ek'-tas-is*) [βρόγχος, the windpipe; ἔκτασις, dilatation]. A term denoting the dilatation or relaxation of the walls of the bronchi, arising from inflammation and other causes. It is very rare as a primary condition, but is frequently associated with some chronic pulmonary disease. It occurs most frequently in pulmonary tuberculosis at the apex of the lung, but is also frequently seen in the bronchi at the base of the lung. It may involve a tube uniformly for some distance, producing the *cylindrical* form; or it may occur irregularly in sacs or pockets, the *sacculated* form. If the whole lung be involved in the change we have produced the so-called *turtle lung*. The characteristic symptom of bronchiectasis is paroxysmal coughing, with the expectoration of large quantities of muco-purulent, often fetid,

matter. Cavernous breathing will be heard over the dilated tubes.

Bronchiocele (*brong'-ke-o-sēl*) [*bronchiolus*, a little air passage; *κήλη*, tumor]. A swelling or dilatation of a bronchiole.

Bronchiole (*brong'-ke-ōl*) [dim. of *bronchus*]. One of the smallest subdivisions of the bronchi.

Bronchiolitis (*bron-ke-o-lī'-tis*) [*bronchiolus*, a little bronchus; *ιτις*, inflammation]. Inflammation of the bronchioles. **B. exudativa**, an inflammation of the bronchioles, with exudation. Curschmann's theory of the production of bronchial asthma.

Bronchiostenosis (*brong-ke-o-ste-no'-sis*) [*βρόγχος*, the windpipe; *στενός*, narrow]. Contraction of a bronchus or of any one or more of the bronchial tubes.

Bronchitic (*brong-kit'-ik*) [*βρόγχος*, the windpipe]. Relating to, of the nature of, or affected with, bronchitis.

Bronchitis (*brong-kī'-tis*) [*βρόγχος*, the windpipe; *ιτις*, inflammation]. Inflammation of the mucous membrane that lines the bronchial tubes. It is usually attended with soreness, cough, alteration of the voice, and febrile symptoms. **B., Acute**, a severe form of simple bronchial catarrh. It is the initiatory stage of the other forms of the disease, and is usually the result of a chill, though it may be associated with some other disease, as the exanthemata, and affections of the kidney and heart. Sibilant and sonorous rhonchi and bubbling râles may be heard on auscultation. **B., Acute Capillary**, a variety in which there is an involvement of the minute tubes of the lung. It is most frequently met with in children, usually secondarily to other diseases of the lung or other organs. The symptoms are urgent—dyspnea, short, irritating cough, nervous depression, and excited action of the heart. Collapse of portions of the lung frequently occurs, and the patient may die of asphyxia and extreme exhaustion. **B., Catarrhal**, a form attended with profuse muco-purulent discharges. **B., Chronic**, a form occurring either as an independent disease or as the result of repeated attacks of the acute variety. It is generally associated with organic changes in the lungs and other organs, such as emphysema, bronchiectasis, pulmonary tuberculosis and pleurisy. Occurring in old people, it produces the well-known "*winter cough*" of the aged. **B., Croupous, Fibrinous,** or **Plastic**, a rare variety attended with the expectoration of casts of the bronchial tubes, after a paroxysm of dyspnea and violent coughing. The casts are fibrinous in nature, hollow, yellowish-white, and vary from one to seven inches in length. This form of bronchitis is usually seen in males, and between the ages of ten and thirty. **B., Mechanical,** or **Potter's**, a form caused by the inhalation of dust, etc. **B., Potter's.** See *B., Mechanical.* **B., Putrid,** or **Fetid**, a variety of chronic bronchitis characterized by the discharge of a copious, half-liquid, extremely offensive sputum. The peculiar odor is thought to be due to a microörganism, especially to a short, slightly-curved bacillus described by Lumnitzer. **B., Summer.** Synonymous with *Hay Fever*, *q. v.*

Bronchlemmitis (*brong-klem-ī'-tis*) [*βρόγχος*, the windpipe; *λέμμα*, a skin]. Croupous bronchitis.

Bronchoægophony (*brong-ko-e-goff'-o-ne*). See *Bronchoegophony.*

Bronchocele (*brong'-ko-sēl*, or *-sel'-le*) [*βρόγχος*, the windpipe; *κήλη*, a tumor]. See *Goiter.*

Bronchocephalitis (*brong-ko-sef-al-ī'-tis*). Synonym of *Whooping-cough.*

Bronchoegophony (*brong-ko-e-goff'-o-ne*) [*βρόγχος*, the windpipe; *αἴξ*, a goat; *φωνή*, a voice, sound]. Bronchophony combined with egophony.

Broncholemmitis (*brong-ko-lem-ī'-tis*). See *Bronchlemmitis.*

Broncholith (*brong'-ko-lith*) [*βρόγχος*, the windpipe; *λίθος*, a stone]. A calculus or concretion formed in a bronchial tube.

Bronchomycosis (*brong-ko-mi-ko'-sis*) [*βρόγχος*, the windpipe; *μῦκης*, a fungus]. The growth or presence of fungi in a bronchial tube.

Bronchopathy (*brong-kop'-a-the*) [*βλόγχος*, the windpipe; *πάθος*, disease]. Any disease of the air-passages.

Bronchophonic (*brong-ko-fon'-ik*) [*βρόγχος*, the windpipe; *φωνή*, a voice]. Relating to bronchophony.

Bronchophony (*brong-koff'-o-ne*) [*βρόγχος*, the windpipe; *φωνή*, the voice]. The resonance of the voice within the bronchi as heard through the stethoscope. It is normally present over the lower cervical spines, in the upper inter-scapular region, and over the sternal portion of the infra-clavicular regions. **B., Whispered**, bronchophony elicited by causing the patient to whisper.

Bronchophthisis (*brong-ko-thī'-sis*) [*βρόγχος*, the windpipe; *φθίσις*, a wasting]. Pulmonary tuberculosis characterized by extensive lesions of the bronchial tubes.

Bronchophyma (*brong-ko-fī'-mah*) [*βρόγχος*, the air-passage; *φύμα*, a growth]. Any growth, as a tubercle, in a bronchial tube.

Bronchoplasty (*brong'-ko-plas-te*) [*βρόγχος*, the trachea; *πλάσσειν*, to form]. The surgical closure of a tracheal fissure or fistula.

Broncho-pneumonia (*brong-ko-nu-mo'-ne-ah*) [*βρόγχος*, the windpipe; *πνεύμων*, the lung]. Lobular pneumonia, a term applied to inflammation of the lungs, which, beginning in the bronchi, finally involves the parenchyma of the lungs. This disease is most frequently encountered in children, but may occur in old age. Three varieties are described: 1. A simple, acute form, following a severe bronchial catarrh. 2. A secondary form, occurring after whooping-cough or some general febrile infective disease. 3. A rare suppurative form, with the formation of abscesses throughout the lung. The patient suffering with broncho-pneumonia presents the following symptoms: dyspnea, cough, fever, often high, restlessness, and occasionally marked cerebral symptoms. If convalescence be not properly guarded relapses are likely to occur. The physical signs vary greatly, and are often not marked. The course of the disease is generally chronic, and the prognosis must be guarded.

Bronchorrhagia (*brong-kor-a'-je-ah*) [*βρόγχος*, the bronchus; *ῥηγνύναι*, to burst forth]. Hemorrhage from the air-passages.

Bronchorrhea (*brong-kor-e'-ah*) [*βρόγχος*, the bronchus; *ῥέειν*, to flow]. A form of bronchitis attended with profuse expectoration.

Bronchostenosis (*brong-ko-ste-no'-sis*) [*βρόγχος*, the windpipe; *στενός*, narrow]. Contraction of a bronchus.

Bronchotome (*brong'-ko-tōm*) [*βρόγχος*, the windpipe; *τέμνειν*, to cut]. An instrument for cutting the larynx or trachea in the operation of bronchotomy.

Bronchotomy (*brong-kot'-o-me*) [*βρόγχος*, bronchus; *τέμνειν*, to cut]. A surgical cutting-operation upon the bronchus, larynx, or trachea.

Broncho-tracheal (*brong-ko-tra'-ke-al*) [*βρόγχος*, the bronchus; *τραχεῖα*, the windpipe]. Relating to a bronchus (or to both bronchi) and to the trachea.

Broncho-vesicular (*bron-ko-ves-ik'-u-lar*) [*βρόγχος*, the bronchus; *vesicula*, a vesicle]. Both bronchial and vesicular. See *Breath-Sounds, Table of.*

Bronchus (*brong'-kus*). See *Bronchi.*

Bronson's Method. See *Treatment, Methods of.*

Bronze (*bronz*) [*bronzium*, bronze]. An alloy of copper and tin. **B. John,** a popular term for *Yellow Fever, q. v.* **B. Liver,** a dark reddish-brown or olive-black color of the liver, seen in post-mortem examinations of certain cases of chronic malarial poisoning.

Bronzed (*bronzd*) [*bronzium*, bronze]. Tanned; of a bronzed color. **B. Skin,** a symptom of Addison's Disease. **B.-skin Disease.** See *Addison's Disease.*

Brood (*brood*) [ME., *brood*]. In biology, offspring; progeny. **B.-cells,** in cell-division, the mother-cells inclosing the daughter-cells. **B.-food,** a highly nitrogenous tissue-forming pap, derived by bees from pollen by digestion.

Brooke's Ointment. An ointment for treating lupus. It is composed of oxid of zinc and powdered starch each ¼ ounce; white vaseline ½ ounce; hyd. oleatis (five per cent.) one ounce; salicylic acid 20 grains; ichthyol 20 minims; oil of lavender q. s.; enough red Armenian bole and raw umber may be added to match the color of the skin.

Broom (*broom*). See *Scoparius.*

Brosimum (*bro'-sim-um*) [βρῶσις, food]. A genus of moraceous trees of S. America. **B. galactodendron,** the Venezuelan cow-tree; its milky sap is nutritious, and yields both a cheesy food and a wax (*galactin*) serviceable for candles.

Broth (*broth*). See *Bouillon.*

Brother Ulcer (*bruth'-er ul'-ser*). See *Donda Ndugu.*

Brousnika (*broos'-ne-kah*) [Rus.]. The berries of red whortleberry, red bilberry (*Vaccinium vitis idæa*), used in the form of a decoction in Russia for the relief of rheumatic affections. Unof.

Broussaisism (*brūs-a'-izm*) [*Broussais*, a French physician]. The physiologic, pathologic, and therapeutic doctrines taught by J. V. Broussais.

Broussaism (*brūs-a'-izm*). See *Broussaisism.*

Brow (*brow*) [ME., *browe*]. The forehead; the upper anterior portion of the head. **B.-Ague,** neuralgia of the first division of the fifth cranial nerve, commonly met with in malarious districts, though at times occurring independently of such surroundings, and then dependent upon some diathesis, especially the gouty. **B. Presentation,** presentation of the fetal brow in labor. See *Fetus, Position of.*

Brown (*brown*) [ME., *brown*]. A dark reddish-yellow color. **B. Atrophy,** an atrophy of a tissue associated with a deposit therein of a brown or yellow pigment. **B. Coal.** See *Coal* and *Lignite.* **B. Crown,** in dentistry, an artificial, all-porcelain crown, which is attached to a natural root by means of an iridio-platinum pin baked in position. The pin has the greatest strength at the neck of the tooth, where the strain is heaviest, and this strength is further increased by extending the porcelain upon the pin. **B. Edema.** See *Edema.* **B. Induration of Lung,** a state of the lung due to long-continued congestion, usually arising from marked incompetency or from constriction of the mitral valve. The lungs are enlarged and do not collapse on opening the thorax, and have a peculiar tint of yellow shading into a brown or reddish-brown; a brownish fluid exudes on pressure. The color is due to pigment-granules in the epithelial cells of the air-vesicles. **B. Madder.** See *Pigments, Conspectus of.* **B. Mixture.** See *Mistura ferri composita* and *Glycyrrhiza.* **B. Ointment,** the *unguentum fuscum*, N. F.; called also *unguentum matris*, or "mother's salve." It is composed of "brown plaster," two parts; oil, one part; suet, one part. **B. Pink.** See *Pigments, Conspectus of.* **B. Plaster,** the *emplastrum fuscum camphoratum*, N. F.; called also *emplastrum matris camphorātum*, or "camphorated mother's plaster;" official in German pharmacy. It is made of red oxid of lead, thirty parts; oil of olives, sixty parts; yellow wax, fifteen parts; camphor, one part. **B. Study.** See *Cenospudia.* **B. Wort,** the plant *Brunella vulgaris*, popularly reckoned a good vulnerary, as well as a cure for sore-throat. Unof.

Brown's Operation. See *Operations, Table of.*

Browne's Operation. See *Operations, Table of.*

Brownian Movement. An oscillation or agitation observed under the microscope in very fine granules, drops, etc., when suspended in a liquid. The movement is not locomotion, and is to be distinguished from that of the self-motility of living microörganisms. Its cause is not definitely known, but it may be due to heat, light, electricity, osmosis, etc. See *Pedesis.*

Brownism (*brown'-izm*). See *Brunonian Theory.*

Brown-Sequard's Combination of Symptoms. See *Signs and Symptoms, Table of.* **B. Disease.** See *Diseases, Table of.* **B. Method of Treatment.** See *Treatment, Methods of.* **B. Paralysis.** See *Diseases, Table of.*

Bruch, Clusters of. See *Gland, Aggregated, of Bruch.* **B., Glands of.** See *Gland.*

Brucin (*bru'-sin*) [*Brucea*, a genus of shrubs], $C_{23}H_{26}N_2O_4$. A poisonous alkaloid found in Strychnos nux vomica and in Strychnos ignatius. It crystallizes in prisms containing $4H_2O$, and melts at 178°. Its taste is exceedingly bitter and acrid. Its action on the animal economy is similar to but much less powerful than that of strychnin. See *Nux Vomica.*

Brücke's Berlin Blue Mass. A warm-flowing mass for injecting tissues. It is made as follows: potassium ferrocyanid, 217 gm.; water, 1000 c.c; ferrous chlorid 1 part; water 10 parts. Take equal volumes of these solutions and add to each twice its volume of a cold saturated solution of sodium sulphate. Add the iron solution to the ferrocyanid solution, with constant stirring. Filter and wash the precipitate with the filtrate until it runs through clear, then wash with water until the filtrate runs off blue. Dry the precipitate. To a concentrated solution of this blue add enough gelatin to make a firm jelly when cold. Heat to 60° C. and filter through flannel. **B.'s Fluid,** potassio-mercuric iodid, employed in the precipitation of proteids. **B.'s Method,** a method of removing all the proteids from a substance. Acidulate the liquid with HCl, and then add to it a solution of potassio-mercuric iodid, made by saturating with mercuric iodid a boiling solution of potassium iodid. **B.'s Muscle.** See *Muscles, Table of.* **B.'s Reagent.** See *Tests, Table of.* **B.'s Red Mass,** a material for injecting the body. A concentrated solution of potassium ferrocyanid is injected into the artery until it runs clear from the vein. Then as much as possible is allowed to drain away. Next a concentrated solution of cupric sulphate free from iron is injected. By this method the red cupric ferrocyanid is precipitated in the vessels. **B.'s Test.** Same as *B.'s Reagent.*

Bruise (*brooz*). See *Contusion.*

Bruit (*bru-e'*) [Fr., a noise or report]. A term used by French physicians to designate the various specific sounds of auscultation. **B. d'airain,** Trousseau's term for the ringing note heard through the stethoscope applied to the chest wall when a coin is struck against another pressed against the surface of the chest on the opposite side. It is pathognomonic of a collection of gas in the pleural cavity. **B. de clapotement,** a splashing sound often heard in cases of well-marked dilatation of the stomach when pressure is made upon the abdominal walls. It is best elicited when the

patient is in the recumbent position, with relaxed abdominal walls, by palpating near the left border of the ribs. The same sound can be produced by shaking the patient (*bruit de glou-glou*). **B. de braquement,** a crackling sound. **B. de cuir neuf,** the new-leather murmur of the French; the creaking quality occasionally heard in pericardial friction-sounds. **B. de diable,** a venous murmur, of a whistling or rushing character, arising in the bulb of the common jugular vein, and due to such diseases as anemia, lead-poisoning, etc.; it is more common in the young, and is caused immediately by the vibration of the blood flowing from the narrow part of the common jugular vein into the wide, bulbous portion of the vessel. See also *Murmur.* **B. de galop,** a cantering rhythm of the heart frequently heard in mitral stenosis, in which three distinct heart-sounds are audible. It is due to a reduplication of the second sound. See also *Gallop Rhythm.* **B. de glou-glou.** See *B. de clapotement.* **B. de lime.** See *B. de scie.* **B. de moulin,** water-wheel sound; a peculiar friction-sound mixed with splashing and gurgling, heard in pneumohydropericardium. **B. d'oboe,** a musical heart-murmur. **B. de pot fêlé,** the cracked-pot sound. **B. de parchemin,** a rattling, as of parchment. **B. de râpe.** See *Bruit de scie.* **B. de rappel,** a sound resembling the double beat upon a drum. This doubling of the heart-sounds may be noted in different stages of chronic interstitial nephritis, when it is the first sound that is duplicated; and in mitral stenosis, when the second sound is doubled. **B. de scie,** a murmur sounding like that made by a saw or file. Also called *B. de râpe* and *B. de lime.* **B. skodique,** an amphoric note heard in the pleural cavity, especially near the apex anteriorly, when there is a fluid accumulation not filling the whole of the plural sac. Also called *Skoda's tympany.* **B. de soufflet,** a bellows-murmur. **B. de soupape,** a flapping sound. **B. de va et vient,** a to-and-fro friction-sound.

Brün's Operations. See *Operations, Table of.*

Brunet, or **Brunette** (*bru-net'*) [Fr.]. 1. Of a dark complexion. 2. One with a dark complexion.

Brüning's Red. Same as *Rosanilin.*

Brunissure (*brun-is-ur'*) [Fr., *brunisseur,* that which browns]. A disease of the grape, attacking the leaves only, caused by *Plasmodio pora vitis.* (Viala and Sauvageau). Also called *Braune.*

Brunner's Glands. See *Glands.*

Brunonian Movement. See *Brownian Movement.* **B. Theory,** brownism; a doctrine taught by Dr. J. Brown (1735–88) that both physiologic and pathologic phenomena are due to variations in a natural stimulus, its excess causing sthenic and its deficiency producing asthenic diseases.

Brunswick (*brunz'-wik*) [Ger.]. A town in Germany. **B. Black.** Same as *Japan Black.* **B. Green.** See *Conspectus of Pigments,* under *Pigment.*

Brush (*brush*) [ME., *brusshe*]. An instrument consisting of a collection of some flexible material fastened to a handle. In surgery, various forms of brush are employed; as the *acid* brush, of glass threads; the *electric* brush, a form of electrode; the laryngeal brush; the *nasal, pharyngeal,* and *stomach* brush. See also *Pencil.* 2. A thicket of small trees. **B.-burn,** the injury produced by violent friction, and the resulting heat; it often resembles a burn or scald. **B.-cells.** See *Cell.*

Bryant, Ampulla of. See *Ampulla.*

Bryant's Line. See *Lines, Table of.* **B.'s Method.** See *Treatment, Methods of.* **B.'s Operations.** See *Operations, Table of.* **B.'s Triangle.** See *Triangles, Table of.*

Bryce's Test. A test to determine if systemic infection has taken place after vaccination. It consists in repeating the inoculation during the evolution of the vaccine disease. If systemic infection has occurred, the second inoculation will mature rapidly, so as to overtake the first.

Brygmus (*brig'-mus*) [βρῦγμός, biting]. Same as *Odontoprisis.*

Bryology (*bri-ol'-o-je*) [βρύον, a moss; λέγειν, to speak]. The science of mosses.

Bryonia (*bri-o'-ne-ah*) [βρυωνία, bryony]. Bryony. The root of *B. alba* and *B. dioica;* indigenous to Europe, with properties due to an intensely bitter glucosid, *Bryonin,* $C_{48}H_{80}O_{19}$, a strong irritant when applied to the skin or mucous membrane, often producing vesication. It is a remedy of great value in pleurisy, pleuro-pneumonia, and rheumatic fever, and an excellent agent in colds. Dose of the powdered root gr. x–xxx. **B., Infusum** (unof.), has a strength of ℥j to the Oj of water. Dose ℥ss–ij. **B., Tinct.,** a 10 per cent. solution of the root in alcohol. Dose ♏ v–℥ss.

Bryonin (*bri-o'-nin*) [βρυωνία, bryony]. A precipitate from the tincture of *Bryonia alba;* useful as a hydragogue, and in rheumatism and bronchial affections. Dose gr. ij–¼. Unof. See *Bryonia.* Dose as a drastic purgative, gr. ⅙–⅓.

Bryony (*bri'-o-ne*). See *Bryonia.* **B. Black.** See *Tamus.*

Bryoplastic (*bri-o-plas'-tik*) [βρύον, moss; πλάσσειν, to form]. A descriptive term loosely applied to such abnormal growths of tissue as resemble vegetable forms.

Bryoretin (*bri-o-re'-tin*) [βρυωνία, bryony; ῥητίνη, resin]. A resin-like substance obtainable from the glucosid bryonin.

Bubaline (*bu'-bal-in*) [*bubalinus,* pertaining to the *bubalus,* buffalo]. In biology, resembling or pertaining to the buffalo.

Bubby (*bub'-e*) [E. dial.]. 1. A vulgar name for the mamma. 2. A local name for *Calycanthus floridus.*

Bubo (*bu'-bo*) [βουβών, the groin]. Inflammation and swelling of a lymphatic gland, properly and generally of the groin, and usually following chancroid, gonorrhea or syphilitic infection. **B., Parotid.** See *Parotitis.* **B., Primary,** a slight adenitis of the groin due to mechanical irritation, or other cause; formerly supposed to be due to syphilis without a chancre having preceded. **B., Sympathetic,** one caused by irritation, friction, injury, etc., and not arising from an infectious disease.

Bubonadenitis (*bu-bon-ad-en-i'-tis*) [βουβών, the groin; ἀδήν, a gland; ιτις, inflammation]. Inflammation of an inguinal gland.

Bubonalgia (*bu-bon-al'-je-ah*) [βουβών, the groin; ἄλγος, pain]. Pain in the inguinal region.

Bubonic (*bu-bon'-ik*) [βουβών, the groin]. Relating to a bubo. **B. Plague.** Synonym of the *Plague, q.v.*

Bubonocele (*bu-bon'-o-sēl*) [βουβών, the groin; κήλη, tumor]. Inguinal hernia when the gut does not extend beyond the inguinal canal.

Bubononcus (*bu-bon-ong'-kus*) [βουβών, the groin; ὄγκος, a tumor]. A swelling in the groin.

Bubonopanus (*bu-bon-o-pa'-nus*) [βουβών, the groin; πᾶνος, torch]. An inguinal bubo.

Bubonulus (*bu-bon'-u-lus*) [L., dim. of *bubo*]. Lymphangitis of the dorsum of the penis, often with abscesses; due to chancroidal virus.

Bucca (*buk'-ah*) [L.]. 1. The mouth; the hollow of the cheek, or its inner surface. 2. The vulva.

Buccal (*buk'-al*) [*bucca,* the cheek]. Pertaining to the cheek. **B. Coitus.** See *Irrumation* and *Name-*

less Crime. **B. Glands.** See *Gland.* **B. Teeth,** the teeth behind the canines are so called because they are situated on the inside of the cheeks. In the human subject they are the bicuspids and molars.

Buccinal (*buk'-sin-al*) [βυκάνη, a trumpet]. In biology, trumpet-shaped.

Buccinator (*buk'-sin-a-tor*) [βυκάνη, a trumpet]. The thin, flat muscle of the cheek. See *Muscles, Table of.*

Bucco (*buk'-o*). Same as *Buchu.*

Bucco-labial (*buk-o-la'-be-al*) [*bucca*, the mouth; *labium*, a lip]. Pertaining to the mouth and lip. **B. Muscle,** the buccinator. See *Muscles, Table of.*

Bucco-pharyngeal (*buk-o-far-in'-je-al*) [*bucca*, the mouth; θάρυλξ, the pharynx]. Relating to the mouth and to the pharynx.

Buccula (*buk'-u-lah*) [L., dim. of *bucca*, the cheek]. The fleshy fold seen beneath the chin, and forming what is called a double chin.

Buchanan's Operations. See *Operations, Table of.*

Buchu (*bu'-ku*) [native African]. The leaves of several species of *Barosma*, yielding a volatile oil, to which its properties are probably due, and a bitter extractive, *Barosmin.* Dose gr. j–v. It causes a sensation of glowing warmth over the body, stimulates the appetite, and increases the circulation. It is useful in urethritis and affections of the genito-urinary mucous membrane. Dose of the leaves, gr. xv–xxx. **B., Ext., Fld.** Dose ♏x–ʒj. **B., Infusum** (Unof.), ʒj to Oj. Dose ℥ss–ij. **B., Infusum** (B. P.). Dose ʒj–iv. **B., Tinctura,** (B. P.) Dose ʒj–ij.

Buck's Apparatus. An apparatus consisting of a weight and pulley for applying extension to a limb. **B. Fascia,** the superficial perineal fascia. **B. Method.** See *Treatment, Methods of.* **B. Operations.** See *Operations, Table of.*

Buckbean (*buk'-bēn*) Bog-bean. The rhizome of *Menyanthes trifoliata*, tonic, antiscorbutic, and emmenagogue. It has been recommended as a vermifuge, and has been used in functional amenorrhea. Dose of fld. ext. ♏v–xxx. Unof.

Bucket Fever (*buk'-et fe'-ver*). See *Fever.*

Buckeye Bark (*buk'-i bark*). The bark of *Æsculus glabra*, astringent and tonic, and serviceable in rectal irritation, prolapsus, and various uterine derangements. Dose of fld. ext. gtt. iij–v. Unof.

Buckhorn (*buk'-horn*). The horn of a buck. When powdered or calcined, it is used by dentists for polishing enamel, and fillings, and for removing light deposits of tartar. **B. Fern,** a fern, called also royal fern, *Osmunda regalis*; it is vaunted as a cure for rickets. Unof.

Buckle-shell (*buk'-l-shel*) [New Eng. dialect]. A recently moulted lobster; also called paper-shell lobster, June lobster, or sand-lobster.

Bucko (*buk'-o*). Same as *Buchu.*

Buckthorn (*buk'-thorn*). See *Frangula.* **B., California.** See *Cascara Sagrada.*

Bucku (*buk'-u*). Same as *Buchu.*

Buckwheat (*buk'-hwēt*). The seed or grain of *Fagopyrum esculentum* and of other species of the same genus. It is used to some extent as a substitute for the true cereals. In theory, it takes a high rank as a food; but its free use tends to constipation, indigestion and headache, and especially to a peculiar roughness and itching of the skin. The flowers of the plant afford rich bee-pasturage, but the honey is inferior.

Bucnemia (*buk-ne'-me-ah*) [βοῦ, increase; κνήμη, the leg]. Inflammation of the leg characterized by tenseness and swelling; elephantiasis; also phlegmasia dolens. **B. Tropica.** See *Elephantiasis arabum.*

Bud (*bud*) [ME., *budde*, a bud]. In biology, the undeveloped germ-state of a leaf or flower.

Budd's Disease. See *Diseases, Table of.*

Budding (*bud'-ing*) [ME., *budden*]. In biology, a form of reproduction or cell-division, occurring among the polyps and infusoriæ, in which a bud is given off by the parent and comes to resemble the latter. The bud may remain permanently attached or may form a colony, each member acquiring a differentiation of function, even to the formation of male and female elements. The process is also called *Gemmation, q. v.*

Budge's Center. See *Center.*

Buffalo Rubin (*buf'-al-o ru'-bin*). See *Pigments, Conspectus of.*

Buffers' Consumption (*buf'-erz con-sump'-shun*). The phthisis occurring among metal-polishers.

Buffy Coat (*buf'-e-kōt*). A grayish or buff-colored crust or layer sometimes seen upon a blood-clot, after phlebotomy, and once looked upon as a sign of inflammation. It is caused by the partial subsidence of the red blood-corpuscles.

Bufidin (*bu'-fid-in*) [*bufo*, the toad]. Phrynin; an alkaloid from the venom of the toad; it is poisonous, and said to resemble digitalin in its effects.

Bufoniform (*bu-fon'-if-orm*) [*bufo*, a toad; *forma*, shape]. In biology, toad-like.

Bugbane (*bug'-bān*). See *Cimicifuga.*

Buggery (*bug'-er-e*) [OF., *bougre*, an heretic]. Sodomy; bestiality.

Bugleweed (*bu'-gl-wēd*). The herb, *Lycopus virginicus*, narcotic and astringent. Dose of fld. ext. ʒss–ij. *Lycopin*, concentrated extract. Dose gr. j–iv. Unof.

Buhach (*bu'-hatch*) [Serbo-croatian for flea-bane; *buha*, a flea]. The plant *Pyrethrum cinerariæfolium.* See *Insect Powder.*

Buhl's Disease. See *Diseases, Table of.*

Bulam, or Bulama Boil (*bu'-lam* or *bu-lam'-ah boil*). A boil occurring on the African island of Bulam; probably caused by a burrowing-worm or insect-larva. **B. Fever,** a West-Africa coast fever, said to be identical with yellow fever.

Bulata (*bul'-at-ah*). See *Balata.*

Bulb (*bulb*) [βολβός, a bulb]. 1. The expansion or dilatation of a canal or vessel. 2. Applied to the oblongata and pons. 3. A short underground stem covered with fleshy leaf-bases or fleshy leaves, as the onion and squill. **B. of Aorta,** the dilatation of the aorta near its beginning. **B. of Corpus Cavernosum,** the muscle beneath the bulb of the urethra. **B. of an Eye,** the eyeball. **B. of Fornix.** See *Corpora.* **B. of a Hair,** the swelling at the root of a hair. **B., Olfactory,** the expanded end of the narrow olfactory lobe, commonly called olfactory nerve or first cranial nerve. **B. of a Tooth,** the papilla that forms the germ of a tooth. **B. of Urethra,** the posterior expanded part of the *corpus spongiosum penis.* **B. of the Vagina,** a small body of erectile tissue on each side of the vestibule of the vagina, homologous to the bulb of the urethra of the male. **B. of Vena Jugularis,** the dilatation at the beginning of the external jugular vein.

Bulbar (*bul'-bar*) [βολβός, a bulb]. Bulbous. Pertaining to the medulla. **B. Disease,** or **Paralysis,** a term applied to the progressive and symmetrical paralysis of the facial muscles about the mouth, including those of the tongue, pharynx, and sometimes those of the larynx. This paralysis is due to a disease of the motor nuclei in the medulla oblongata; an *acute* and a *chronic* form are met with. The acute form is due to hemorrhage or softening; the chronic to degeneration. The chronic form is insidious in its approach, the tongue often being the first organ involved; the

course is slow but progressive, and death usually results in from one to four years. Bulbar paralysis usually occurs after forty years of age. Syphilis is not a predisposing cause. The disease is also called *Labio-glosso-laryngeal Paralysis*. There is also a *pseudo-bulbar paralysis*, due to symmetrical lesions of the motor cerebral cortex.

Bulbi vestibuli (*bul'-bi ves-tib'-u-li*) [L.]. A name sometimes given to the glands of Bartholin.

Bulbil, or Bulblet (*bul'-bil, bulb'-let*) [βολβός, a bulb]. Small bulbs of fleshy buds frequently occurring on above-ground parts of plants, as the bulblets of some onions and of the tiger-lily.

Bulbillæ (*bul-bil'-e*) [*bulbillus*, dim. of *bulbus*, a bulb]. In biology, gemmæ of hydroid zoöphytes that become detached at an early stage, and are then capable of independent development.

Bulbo-cavernosus (*bul-bo-kav-ern-o'-sus*) [βολβός, a bulb; *caverna*, a cavern]. A perineal muscle in the male subject, corresponding to the sphincter vaginæ of the female. See *Muscles, Table of*.

Bulbo-urethral (*bul-bo-u-rēth'-ral*) [βολβός, a bulb; οὐρήθρα, the urethra]. Relating to the bulb of the urethra.

Bulbus (*bul'-bus*) [L.]. A bulb. **B. arteriosus**; in a certain stage in the development of the heart, the upper aortic enlargement is so called. **B. cornu posteriorus.** See *Occipital Eminence*. **B. rhachidicus**, the oblongata.

Bulesis (*bu-le'-sis*) [βούλησις, the will]. The will, or an act of the will.

Bulimia (*bu-lim'-e-ah*) [βοῦ, increase; λιμός, hunger]. Excessive, morbid hunger; it sometimes occurs in idiots and insane persons, and it is also a symptom of diabetes mellitus.

Bulimic (*bu-lim'-ik*) [βοῦ, increase; λιμός, hunger]. Pertaining to or affected with bulimia.

Bulithos (*bu'-lith-os*) [βοῦς, ox; λίθος, stone]. A bezoar from the ox or the cow.

Bulla (*bul'-ah*) [*bulla*, a bubble: *pl.*, *Bullæ*]. A bleb or "blister," consisting of a portion of the epidermis detached from the skin by the infiltration of watery fluid. The bulla differs from the vesicle mainly in size. **B. ethmoidalis**, a rounded projection into the middle meatus of the nose, due to an enlarged ethmoid cell. **B., Hemorrhagic.** See *Purpura*. **B. ossea**, the inflated or dilated part of the bony external meatus of the ear.

Bullate (*būl'-āt*) [*bulla*, a bubble]. Inflated; fornicated and with thin walls; blistered; marked by bullæ.

Bullet Extractor (*būl'-et eks-trak'-tor*). See *Forceps*.

Bullous (*būl'-us*) [*bulla*, a blister]. Marked by bullæ; of the nature of a bulla.

Bully's Toilet Vinegar. A cosmetic consisting of tincture of benzoin, 1.0; acetic acid, 4.0; Cologne water, 100.0.

Bully Tree (*būl'-e-tre*). See *Balata*.

Bulopeithia (*bu-lo-pi'-the-ah*) [βουλή, will; πείθειν, to persuade]. An exaggerated hopefulness or morbid expectation of that which is desired.

Bumastos (*bu-mas'-tos*) [βοῦς, large (ox); μαστός, breast]. A very large or hypertrophied mamma.

Bumble Foot (*bum'-bl foot*). A disease of poultry, appearing as a wart-like substance growing in the ball of the foot. It is caused by high perches or by constant walking on cement or stone.

Bump (*bump*) [origin uncertain]. Any one of those eminences of the external surface of the skull that are conceived by phrenologists to mark the localities of the various "organs" of the brain.

Bumstead's Operations. See *Operations, Table of*.

Bundle (*bun'-dl*) [ME., *bundel*]. In biology, a fascicular grouping of elementary tissues, as nerve-fibers or muscle-fibers. **B. of Vicq d'Azyr**, a thick bundle of nerve-fibers arising in the more caudad of the two median nuclei of the corpus candicans of the brain, and extending to the anterior tubercle of the thalamus. It was formerly called the *fornix descendens*. **B.-sheath**, "In many plants a ring of cells, often with strongly-thickened and lignified walls, developed only on the outside of the bast, or around the entire bundle, or around the whole mass of fibro-vascular bundles." (Thoma.)

Bunion (*bun'-yun*) [origin uncertain]. A swelling of a bursa of the foot, especially of the great toe.

Bunodont (*bu'-no-dont*) [βουνός, a hill, mound; ὀδούς, tooth]. Pertaining to tuberculate molar teeth.

Bunsen Burner. See *Burner*. **B. Cell.** See *Cell*.

Bunt (*bunt*). See *Smut*.

Buphthalmia (*būf-thal'-me-ah*), or **Buphthalmos** (*būf-thal'-mos*) [βοῦς, ox; ὀφθαλμός, eye]. See *Keratoglobus*.

Bupleurum (*bu-plu'-rum*) [L.]. A genus of umbelliferous herbs. Several old-world species were formerly employed in medicine, especially *B. rotundifolium*, of which the leaves and fruit are considered vulnerary and discutient. Unof.

Bur, or Burr [ME., *burre*, a bur]. 1. In botany, a rough, prickly shell or case. 2. The lobe of the ear. 3. In dentistry, an instrument for polishing the teeth. **B. Drills**, dental instruments of spherical, cone-shape, cylindrical, and wheel-forms, for opening and forming cavities. Flexible burs and drills having spring-tempered stems are used for opening and preparing nerve canals. **B. Thimble**, in dentistry, an open ring for the middle or index finger, with a socket attached, in which rests the end of the handle of the drill used in excavating a cavity in a tooth, preparatory to filling it.

Burckhardt's Operation. See *Operations, Table of*.

Burcquism (*boork'-izm*). See *Metallotherapy*.

Burdach, Column of. See *Funiculus cuneatus* and *Columu*. **B., Cords of**, the cords formed in the dorsal zone of the human spinal cord by the meeting of the oval bundles of His below the cords of Goll. **B.'s Fissures.** See *Fissures, Table of*.

Burdock (*ber'-dok*). See *Lappa*.

Burdwan Fever (*berd'-wan fe'-ver*). See *Fever*.

Buret, or Burette (*bu-ret'*) [Fr.]. A graduated tube designed for measuring small quantities of a reagent. It is usually held vertically in a stand and provided with a stopcock.

Burggrave's Apparatus. Same as *Seutin's Apparatus*, with the addition of a layer of wool around the limb.

Burgundy Pitch. See *Pix*.

Burking [*Burke*, a noted criminal]. Suffocation produced by a combination of pressure on the chest with closure of the mouth and nostrils. This was the method employed by Burke.

Burmah Boil. A form of endemic ulcer common in Burmah.

Burmese (*bur-mēz'*) [native]. Pertaining to *Burmah*, a province of Farther India. **B. Lacquer.** See *Lacquer*. **B. Ringworm**, Fox's name for a severe and troublesome form of *Tinea circinata*.

Burn [ME., *bernen*, to burn]. 1. To become inflamed. 2. To be charred or scorched. 3. To have the sensation of heat. 4. An injury caused by fire or dry heat. 5. A disease in vegetables. 6. In chemistry, to oxygenize. 7. In surgery, to cauterize.

Burner [ME., *bernen*, to burn]. A common name for a lamp or heating apparatus used in laboratories

for chemic and pharmaceutic purposes. **B., Argand,** uses gas or oil, and contains an inner tube for supplying the flame with air. **B., Bunsen,** a form in which the gas is mixed with a sufficient quantity of air to produce complete oxidation before ignition.

Burnett's (Sir W.) Disinfecting Fluid. A strong solution of zinc chlorid (gr. xxv to ℥j of water) with a little iron chlorid. This is added to one quart of water for use. It is serviceable as an antiseptic and deodorizer, and as a preserver of dead bodies.

Burning (*bern'-ing*) [ME., *bernen* to burn]. Consuming with heat or fire. **B. of the Feet,** a neurotic affection of the soles of the feet, common in India. **B. Oil,** kerosene. The different burning oils are graded according to the two standards of color and fire-test. The colors range from pale-yellow (standard white) to straw (prime white) and colorless (water white). The fire-tests to which the commercial oils are mostly brought are 110° F., 120° F., and 150° F.; that of 110° going mainly to the continent of Europe and to China and Japan, and that of 120° to England. An oil of 150° F. fire-test, and water-white in color, is known in the trade as "*headlight oil*." An oil of 300° F., fire-test, and specific gravity .829 is known as "*mineral sperm*," or "*mineral colza oil*." "*Pyronaphtha*" is a product of Russian petroleum, somewhat similar to mineral sperm oil. It has a specific gravity of .865, and a fire-test of 265° F. **B. Point,** in testing petroleum oils, the temperature at which a spark or lighted jet will ignite the liquid itself, which then continues to burn. This point is usually 6° to 20° C. higher than the flash-point, but there is no fixed relation between the two.

Burnisher [ME., *burnischen*, to polish]. An instrument used in polishing different kinds of metals, and in the laboratory of the dentist, for finishing pieces of dental mechanism.

Burns, Ligament of. The falciform process of the fascia lata.

Burns's Amaurosis. See *Amblyopia*, *Post-Marital;* also *Amaurosis.*

Burnt [ME., *bernen*, to burn]. Scorched; injured by dry heat. Consumed by fire. **B. Alum.** See *Alumen exsiccatum.* **B. Sponge.** See *Spongia usta.* **B. Ocher.** Same as *Ocher.*

Burow's (von) Operations. See *Operations, Table of.* **B. Veins,** small veins joining the portal and general circulations.

Burra Gookeroo (*bur'-ah gook'-er-oo*) [E. Ind.]. The spring carpels of *Tribulus lanuginosus*, a plant of the guaiacum order growing extensively throughout the East, and largely used as a diuretic and aphrodisiac. It has been employed for the relief of nocturnal emissions and impotence. Dose of the fluid extract ♏xx–l; of the infusion ℥j–ij; of the syrup (for children) ℥ss–j.

Burras Pipe (*bur'-as pip*) [*burra*, coarse-hair; ME., *pipe*]. A port-caustic.

Burring (*bur'-ing*) [ME., *borre*, a harshness in the throat]. Rhotacism; in stammering, the mispronunciation of the letter *r*. **B. Engine,** a dental appliance for the use of burs, etc., in forming cavities, etc. See *Dental Engine.*

Burrow (*bur'-o*) [ME., *borow*, a hole]. 1. To make a hole or furrow, as in the skin; said of the itch insect. 2. To force a way through, as pus through the tissues.

Burrowing (*bur'-o-ing*) [ME., *borow*, a hole]. The term given to the passage of pus through the tissues, after the formation of an abscess that has not burst or been evacuated by surgical methods.

Bursa (*bur'-sah*) [*bursa*, a purse: *pl.*, *Bursæ*]. A small sac interposed between parts that move upon one another. **B. anserina,** a pouch situated between the long internal lateral ligament and the lower internal hamstring tendons. **B. colera,** the gall-bladder. **B. cordis,** the pericardium. **B. fabricii,** "A glandular organ existing in both sexes and all species of birds; most developed in young birds, more or less atrophied in adults; it opens on the dorsal wall of the cloaca, into the lowest chamber of that organ." (Forbes.) **B. mucosæ,** a bursa situated in subcutaneous areolar tissue. **B., Plantar,** a bursa situated over the instep, either above or below a tendon. **B., Popliteal,** a bursa situated in the popliteal space between the tendon of the semimembranosus and the tendon of the inner head of the gastrocnemius, where they rub against each other. **B., Prepatellar,** a bursa situated over the patella and over the upper part of the patellar ligament. **B., Synovial,** found between tendons and bony surfaces. **B. vaginalis,** the synovial sheath.

Bursal (*bur'-sal*) [*bursa*, a purse]. Pertaining to a bursa, sac, or follicle.

Bursalogy (*bur-sal'-o-je*) [*bursa*, a purse; λόγος, science]. The science or study of the bursæ; the anatomy, physiology, and pathology of the bursæ.

Bursera (*bur'-ser-ah*) [*Burser*, a German botanist]. A genus of tropical trees, several species of which afford resinous gums. *B. acuminata* affords caranna; *B. tomentosa* furnishes tacamahac.

Burseraceous (*bur-ser-a'-se-us*) [*Burser*, a German botanist]. Pertaining to or resembling the genus *Bursera.*

Bursiculate (*bur-sik'-ŭ-lāt*) [*bursicula*; dim. of *bursa*, a purse]. In biology, pouch or purse-like, or possessing a bursa.

Bursiform (*bur'-sif-orm*) [*bursa*, a purse; *forma*, form]. Resembling a bursa.

Bursitis (*bur-si'-tis*) [*bursa*, a purse; ιτις, inflammation]. Inflammation of a bursa. **B., Tornwaldt's,** catarrhal inflammation of the anterior portion of the median recess of the naso-pharnyx.

Bursula (*bur'-su-lah*) [dim. of *bursa*, a purse]. A small bursa; the scrotum.

Burton's Sign. See *Signs and Symptoms, Table of.*

Busch's Operations. See *Operations, Table of.* **B.'s Version,** in obstetrics, direct version, the head being grasped by one hand; while the other hand pushes the breech of the child upward, the head is pulled down into the cervix.

Bushmaster (*bush'-mast-er*). See *Lachesis.*

Busk, Diameter of. In craniometry, the auriculo-bregmatic diameter. **B., Horizontal Plane of.** See *Plane.*

Butalanin (*bu-tal'-an-in*) [*butyl; alanin*], $C_5H_9(NH_2)O_2$. *a*-amidoisovaleric acid; it consists of shining prisms that sublime without fusing. It is found in the pancreas of the ox.

Butcher's Operations. See *Operations, Table of.*

Butea (*bu'-te-ah*) [John, Earl of Bute (1713-92)]. A genus of leguminous tropical trees and shrubs. *B. frondosa* and *B. superba* afford Bengal Kino (see *Kino*); also called Butea Gum. **B. Gum.** See *Kino.*

Butter (*but'-er*) [*butyrum*, butter]. The fatty part of the milk obtained by rupturing the cells of the fat-globules by "churning" or mechanical agitation. Also, various vegetable fats having the consistency of butter, as **B. of Cacao.** See *Theobroma.* Also applied to certain chemical products having the appearance or consistence of butter, as **B. of Antimony,** antimonious chlorid; **B. of Tin,** stannic chlorid; **B. of Zinc,** zinc chlorid. See, also, *Acid, Butyric.* **B.-and-Eggs.** See *Antirrhinum linaria.*

B.-fat. 1. The oily portion of the milk of mammalia. 2. The fatty portion of butter, made up of the glycerids of oleic, palmitic, and stearic acids (the so-called insoluble acids), and the glycerids of butyric, caproic, caprylic, and capric acids (the so-called soluble acids). The average proportion of the insoluble acids present in butter-fat is 88 per cent., and the average proportion of the soluble acids from five to six per cent. This gives a very important means of distinguishing between a natural butter and oleomargarin. The pure fat has a sp. gr. of from .910 to .914, and its melting-point varies from 85° to 92° F. **B.-fly**, a winged pledget or tampon of cotton for vaginal application. **B.-fly Lupus.** Synonym of *Lupus erythematosus*. **B. Kidney.** See *Amyloid Kidney*. **B.-nut.** See *Juglans*.

Butterin (*but'-er-in*) [*butyrum*, butter]. An artificial substitute for butter, made principally of beef-fat. See *Oleomargarin*.

Buttocks (*but'-uks*) [ME., *buttok*]. The nates. The fleshy part of the body posterior to the hip-joints, formed by the masses of the glutei muscles.

Button (*but'-un*) [ME., *boton*]. See *Furunculus orientalis*. **B., Amboyna.** See *Frambesia*. **B., Belly**, the navel. **B., Biskra**, the *Aleppo Ulcer*. **B., Corrigan's**, a steel button-shaped cautery-iron, introduced by Sir J. C. Corrigan (1802-80). **B.-bush**, the bark of *Cephalanthus occidentalis*, a tonic, febrifuge, and diuretic. Dose of fld. ext. ʒ ss–j. Unof. **B.-hole, Mitral.** See *Funnel, Mitral*. **B.-hole Operation.** See *Boutonnière Operation* and *Operations, Table of*. **B.-lac.** See *Lac*. **B.-maker's Chorea.** See *Chorea*. **B.-scurvy**, a disease of privation, apparently similar to sibbens or to yaws. **B.-snakeroot**, the root of *Liatris spicata*, and of *Eryngium yuccæfolium;* a stimulant, tonic, diuretic, and emmenagogue. Dose of fld. ext. ʒ ss–j. Unof.

Butyl (*bu'-til*) [*butyrum*, butter], C_4H_9. A hydrocarbon alcohol radical, that cannot be isolated, and that occurs only in combination with other radicals. **B. Chloral.** See *Chloral butylicum*. **B.-chloral Hydrate.** See *Chloral butylicum*.

Butylamin (*bu-til'-am-in*) [*butyrum*, butter; *amin*]. Any primary amin of butyl. The butylamin of cod-liver oil is said to be one of its medicinal constituents.

Butylene (*bu'-til-ēn*) [*butyrum*, butter], C_4H_8. A hydrocarbon belonging to the olefin series. It exists in three isomeric forms, all of which are gases at ordinary temperatures.

Butyric Acid (*bu-tir'-ik*). See *Acid, Butyric*.

Butyrin (*bu'-tir-in*) [*butyrum*, butter], $C_3H_5(C_4H_7O_2)_3$. A constant constituent of butter, together with olein, stearin, and other glycerids. It is a neutral yellowish liquid fat, having a sharp, bitter taste.

Butyrone (*bu'-tir-on*) [*butyrum*, butter], $C_7H_{14}O$. Dipropyl ketone. The principal product of the distillation of calcium butyrate. It boils at 144° and at 20° has a sp. gr. of .82.

Buxin (*buks'-in*) [*buxus*, the box-tree]. Bibirin; bebeerin; pelosin; the alkaloid of *Nectandra*. It is a white, amorphous powder with a persistent bitter taste; very insoluble in water, but easily soluble in alcohol and chloroform. Dose of it or its salts, from grains three to six in pill-form. It is used as a febrifuge. Unof.

Buxton's Apparatus. See *Anesthetic*.

Buxus (*buks'-us*) [L., the box-tree]. A genus of trees affording boxwood. **B. sempervirens**, the common box or box-tree of Europe and Asia. Its leaves, wood, and oil have been employed in medicine. Unof.

Buzzi's Operation. See *Operations, Table of*.

Byrd's Method. See *Artificial Respiration*. **B. Operation.** See *Operations, Table of*.

Byrne's Method. See *Treatment, Methods of*.

Byrsa (*bur'-sah*). Same as *Bursa*.

Bysma (*biz'-mah*) [βύσμα, a stopper; plug: *pl.*, *Bysmata*]. A plug or tampon.

Byssaceous (*bis-a'-she-us*) [βύσσος, a variety of flax]. In biology, composed of fine flax-like threads.

Byssinosis (*bis-in-o'-sis*) [βύσσος, cotton, flax; νόσος, disease]. A diseased condition of the lungs due to the inhalation of cotton-dust in factories.

Byssocausis (*bis-o-kaw'-sis*) [βύσσος, cotton; καῦσις, a burning].' Cauterization by the moxa; moxibustion.

Byssogenous (*bis-oj'-en-us*) [βύσσος, cotton; γένης, producing]. In biology, producing a byssus.

Byssus (*bis'-us*) [βύσσος, cotton, flax]. 1. Charpie, lint, or cotton. 2. The hairy growth of the pubic region. 3. In biology, a bunch of silky filaments secreted by the foot, in several molluscs. A name formerly given to the mycelium of large fungi. **B. Gland.** See *Gland*.

Byssys (*bis'-is*) [βύσσος, flax]. Same as *Byssus*. **B. Gland.** See *Gland*.

Bythus (*bith'-us*) [βυθός, the depth]. The lower or vesical portion of the abdomen.

C

C. The chemic symbol of *Carbon.* Abbreviation of *centigrade.*

c.c. Abbreviation of *cubic centimeter.*

cm. Abbreviation of *centimeter.*

C. M. Abbreviation of *cras mane,* to-morrow morning.

C. N. Abbreviation of *cras nocte,* to-morrow night.

Caballine Aloes (*kab′-al-in al′-ōs*). See *Aloes.*

Cabbage (*kab′-āj*). See *Brassica.* **C. Rose.** See *Rosa centifolia.* **C., Skunk,** a fetid plant of N. America, *Symplocarpus fœtidus.* Its tincture and fluid extract are prescribed as antispasmodic and antasthmatic. Unof. **C.-Tree.** See *Andira.*

Cabinet (*kab′-in-et*) [Fr., a closet]. A closed compartment. **C., Pneumatic.** See *Pneumatic.*

Cacæmia (*kas-e′-me-ah* or *kak-e′-me-ah*). See *Cacemia.*

Cacæmic (*kas-* or *kak-em′-ik*). See *Cacemic.*

Cacain (*kak-a′-in*) [Nahuatl, *cacauatl,* cacao]. Theobromin, *q. v.*

Cacalia (*kak-a′-le-ah*) [κακαλία, a plant, colt'sfoot (?)]. A genus of composite-flowered herbs, many species of which have been used in medicine. **C. suaveolens,** is the sweet centaury of N. America. Unof.

Cacanthrax (*kak-an′-thraks*) [κακός, bad; ἄνθραξ, a coal]. Contagious anthrax. See *Anthrax.*

Cacao (*kak-a′-o*). See *Theobroma.* **C. Butter,** oleum theobromæ is obtained from seeds or nibs of *Theobroma cacao.* It is a pure white fat, with a pleasant odor and taste; it fuses at 86° F. (30° C.); its specific gravity is .945 to .952. It is used in cosmetics, and for pharmaceutic preparations. See also *Theobroma.*

Cacaphthæ (*kak-af′-the*) [κακός, bad; ἀφθα, an eruption]. Malignant or cachectic aphthæ. See *Aphthæ.*

Cacation (*kak-a′-shun*) [*cacatio,* a going to stool]. Defecation; alvine discharge.

Cacatory (*kak′-at-o-re*) [*cacatio,* a going to stool]. Attended with diarrhea; as a cacatory fever.

Caccagogue (*kak′-a-gog*) [κάκκη, dung; ἀγωγός, leading]. 1. Aperient; laxative. 2. An aperient, especially an ointment or suppository that induces gentle purgation. [Archaic.]

Cacemia (*kas-e′-me-ah,* or *kak-e′-me-ah*) [κακός, bad; *alma,* blood]. An ill-condition of the blood; depravity of the blood.

Cacemic (*kak-em′-ik*) [κακός, bad; *alma,* blood]. Associated with or suffering from cacemia.

Cacesthesis (*kak-es-the′-sis*) [κακός, bad; αἴσθησις, sensation]. Morbid sensation.

Cachæmia (*kak-e′-me-ah*). See *Cacemia.*

Cachectic (*kak-ek′-tic*) [κακός, bad; ἕξις, a habit]. Ill-conditioned: marked by cachexia. **C. Aphthæ.** See *Aphthæ.*

Cachelcoma (*kak-el-ko′-mah*) [κακός, ill; ἕλκωμα, ulcer: *pl., Cachelcomata*]. A malignant or foul ulcer.

Cachemia (*kak-e′-me-ah*). See *Cacemia.*

Cachet (*ka-sha′*) [Fr.]. A pharmaceutic preparation consisting of two concave pieces of wafer, varying in size from ¾ to 1⅛ inches in diameter, round or oblong in shape, in one of which the powder to be administered is placed, and the other, having previously been moistened, is then laid over the powder and the two margins are pressed together, when they adhere and completely enclose the powder. **C. de Pain.** Same as *Cachet, q. v.*

Cachexia (*kak-eks′-e-ah*) [κακός, bad; ἕξις, a habit]. A term used to designate any morbid tendency, dyscrasia, depraved condition of general nutrition, or impoverishment of the blood, etc. It is applied particularly to scrofulous, syphilitic, or carcinomatous patients. It is characterized by emaciation and a peculiar sallow or muddy complexion. **C. africana,** dirt-eating: geophagy. A disease supposed to be identical with miners' anemia. **C. aquosa,** a dropsical and anemic state. **C. icterica,** jaundice. **C., Lymphatic.** Synonym of *Hodgkin's Disease.* **C., Negro.** Same as *C. africana.* **C., Pachydermic.** See *Myxedema.* **C. strumipriva,** the condition allied to if not identical with myxedema, following the extirpation or arrest of function of the thyroid gland. It is a cretinoid state, characterized in monkeys by hebetude, malnutrition, muscular tremor, puffy edema, leukocytosis, and the presence of mucin in the blood and connective tissue. **C. thyreopriva.** See *Myxedema.* **C. virginum.** See *Chlorosis.*

Cachexy (*kak-eks′-e*). See *Cachexia.*

Cachibou (*kash-e-boo′*). See *Chibou.*

Cachinnation (*kak-in-a′-shun*) [*cachinnare,* to laugh loudly]. Immoderate laughter, as in the insane.

Cachou (*kash-oo′*) [Fr. for "catechu"]. An aromatic pill or tablet for concealing the odor of the breath.

Cachunde (*ka-chun′-de*) [Sp.]. An oriental electuary used as a breath-perfume, and also as a stomachic and carminative. Unof.

Cacocholia (*kak-o-ko′-le-ah*) [κακός, ill; χολή, bile]. A morbid condition of the bile.

Cacochroia (*kak-o-kroi′-ah*) or **Cacochrœa** (*kak-o-kre′-ah*) [κακός, bad; χροιά, color]. A bad complexion; unnatural color of the skin.

Cachochylia (*kak-o-kil′-e-ah*) [κακός, bad; χυλός, juice]. Imperfect or disordered digestion.

Cacochymia (*kak-o-kim′-e-ah*) [κακός, bad; χυμός, juice]. A morbid state of the fluids, humors, blood, or secretions; faulty stomachic digestion.

Cacochymic (*kak-o-kim′-ik*) [κακός, bad; χυμός, juice]. Affected with cachochymia; dyspeptic.

Cacocnemia (*kak-ok-ne′-me-ah*) [κακός, ill; κνήμη, leg]. Thinness or ill-condition of the leg or shin.

Cacocolpia (*kak-o-kol′-pe-ah*) [κακός, ill; κόλπος, vagina]. A diseased state of the vagina.

Cacodemon (*kak-o-de′-mon*) [κακός, ill; δαίμων, spirit]. An old name for a supposed besetting evil spirit; also, the nightmare.

Cacodemonia (*kak-o-de-mo′-ne-ah*) [κακοδαιμονία, possession by an evil spirit]. Supposed possession or obsession by an evil spirit.

Cacodemonomania (*kak-o-de-mo-no-ma′-ne-ah*) [κακοδαιμονία, possession by an evil spirit; μανία, madness]. A delusional belief, on the part of a patient, that he is possessed of a devil.

Cacodontia (*kak-o-don′-te-ah*) [κακός, bad; ὀδούς, tooth]. A bad condition of the teeth.

Cacodyl (*kak′-o-dil*) [κακός, bad; ὄζειν, to smell; ὕλη, matter], $As(CH_3)_2$. Kakodyl; dimethylarsin; a radical containing arsenic, hydrogen, and carbon. It is a colorless, heavy liquid, with an extremely offensive odor, and poisonous vapor; it is inflammable when exposed to air. Its protoxid is called alkarsin, *q. v.*

Cacoesthesis (*kak-o-es-the′-sis*). See *Cacesthesis.*

Cacoëthes (*kak-o-e′-thēz*) [κακός, bad; ἦθος a habit]. Any bad habit, disposition, or disorder.

Cacogalactia (*kak-o-gal-ak′-te-ah*) [κακός, bad; γάλα, milk]. A bad or abnormal condition of the milk.

Cacogastric (*kak-o-gas′-trik*) [κακός, bad; γαστήρ, the stomach]. Dyspeptic.

Cacogenesis (*kak-o-jen′-es-is*) [κακός, bad; γένεσις, formation]. Any morbid, monstrous, or pathologic growth or product.

Cacoglossia (*kak-o-glos'-e-ah*) [κακός, evil; γλῶσσα, the tongue]. Gangrene of the tongue.

Cacolet (*kak'-o-la*) [Fr.]. A mule-chair or horse-pannier for the transportation of the wounded.

Cacomorphia (*kak-o-mor'-fe-ah*) [κακός, bad; μορφή, form]. Malformation; deformity.

Cachonychia (*kak-o-nik'-e-ah*) [κακός, bad; ὄνυξ, nail]. Disease or defect of a nail or of the nails.

Caconym (*kak'-o-nim*) [κακός, bad; ὄνομα, a name]. An undesirable or objectionable name, *e. g.*, in biologic nomenclature or terminology.

Cacopathy, or **Cacopathia** (*kak-op'-a-the* or *kak-o-path'-e-ah*) [κακός, bad; πάθος, illness]. Any severe, malignant, or untoward condition or disease.

Cacophonia (*kak-o-fo'-ne-ah*) [κακός, bad; φωνή, voice]. An altered, depraved, or abnormal voice.

Cacophonic (*kak-o-fon'-ik*) [κακός, bad; φωνή, voice]. Affected with cacophonia.

Cacoplastic (*kak-o-plas'-tik*) [κακός, bad; πλαστός, formed]. 1. Characterized by or adapted to a low degree or kind of organization. 2. Relating to, causing, or attended with defective formation; liable to be changed into an abnormal tissue.

Cacopragia (*kak-o-pra'-je-ah*) [κακός, bad; πράσσειν, to do]. Functional derangement, as of nutritive processes, or of organs.

Cacoproctia (*kak-o-prok'-te-ah*) [κάκη, gangrene; πρωκτός, anus]. A gangrenous state of the rectum.

Cacorrhachis (*ka-kor'-rak-is*) [κακός, ill; ῥάχις, spine]. A diseased state of the vertebral column.

Cacorrhinia (*kak-or-in'-e-ah*) [κακός, ill; ῥίς, nose]. Any diseased condition of the nose.

Cacosmia, or **Kakosmia** (*kak-os'-me-ah*) [κακός, foul; ὀσμή, smell]. A repugnant or disgusting smell. **C., Subjective**, a disturbance of the olfactory nerve or center, from hysteria or from other disease, giving rise to the perception of an offensive smell.

Cacosomium (*kak-o-so'-me-um*) [κακός, bad; σῶμα, body]. A hospital for leprosy and other incurable diseases.

Cacospermia (*kak-o-sper'-me-ah*) [κακός, ill; σπέρμα, seed]. Any diseased state of the semen.

Cacosphyxia (*kak-o-sfiks'-e-ah*) [κακός, ill; σφύξις, pulse]. A disordered state of the pulse.

Cacostomia (*kak-o-sto'-me-ah*) [κακός, ill; στόμα, mouth]. Any diseased or gangrenous state of the mouth.

Cacothanasia (*kak-o-than-a'-ze-ah*) [κακός, bad; θάνατος, death]. A painful death.

Cacothelin (*kak-oth'-el-in*) $C_{42}H_{22}NO_{20}$. An alkaloid produced from brucin by the action of HNO_3.

Cacothymia (*kak-o-thim'-e-ah*) [κακός, bad; θυμός, mind]. A disordered state of the mind or disposition; mental disorder with moral depravity; insane malignity of temper.

Cacotrophia (*kak-o-tro'-fe-ah*). Same as *Cacotrophy*.

Cacotrophy (*kak-ot'-ro-fe*) [κακός, bad; τρέφειν, to nourish]. Disordered or defective nutrition.

Cacozyme (*kak'-o-zim*) [κακός, bad; ζύμη, a ferment]. A disorganizing, putrefactive, fermentative, or pathogenic microörganism.

Cactina (*kak-ti'-nah*) [κάκτος, a prickly plant]. A proprietary preparation said to be a proximate principle derived from night-blooming cereus (*Cereus grandiflora* and *C. mexicana*). It is a cardiac stimulant recommended as a substitute for digitalis. Unof.

Cactus (*kak'-tus*) [κάκτος, a prickly plant]. A genus of plants. **C. grandiflorus.** See *Night-blooming Cereus*. **C. Nipple.** See *Mammillaria*.

Cacumen (*kak-u'-men*) [L.: *pl.*, *Cacumina*]. 1. The top, as of a plant. 2. The culmen of the vermis superior of the cerebellum.

Cadaver (*kad-av'-er*) [*cadere*, to fall]. The dead body, especially that of man. A corpse. **C. Tubercle**, anatomic wart. A peculiar circumscribed hyperplasia of the papillary structures of the skin occurring chiefly on the dorsal surface of the hands and fingers of persons who are in the habit of handling dead and decomposing bodies.

Cadaveric (*kad-av-er'-ik*) [*cadere*, to fall]. Pertaining to the cadaver or dead body. **C. Alkaloids**, *Ptomaïnes*, *q. v.* **C. Ecchymoses**, certain post-mortem stains, closely resembling in their general appearance the effects of bruises or contusions. They occur, both externally and internally, on the lowest and most dependent parts of the body. They are also called hypostases, sugillations, and vibices. **C. Spasm**, the early, at times instantaneous, appearance of rigor mortis, seen after death from certain causes. It is also called *instantaneous rigor* and *tetanic rigidity*.

Cadaverin (*kad-av'-er-in*) [*cadere*, to fall], $C_5H_{14}N_2$. A ptomaïne, isomeric with neuridin, and, like it, occurring very frequently in decomposing animal tissues. It is obtained from human hearts, lungs, livers, etc., after three days' decomposition at ordinary temperature,—also from horseflesh, from putrid mussel, from herring and haddock. It is a constant product of the growth of the comma-bacillus, irrespective of the medium. It does not occur in culture-media from which bacteria are absent. It is a thick, water-clear, syrupy liquid, having an exceedingly unpleasant odor, somewhat resembling that of coniin and semen. It is certainly identical with so-called "animal coniin." Putrescin and cadaverin were both formerly believed to be physiologically indifferent; but recent investigations show both bases capable of producing active inflammation and necrosis. The necrosis of the intestinal epithelium in Asiatic cholera seems due to their presence. They also have the power, even in small quantities, of preventing blood from coagulating, and rendering it "laky." Cadaverin is believed by Grawitz to hinder the growth of bacteria. Cadaverin hydrochlorid, on dry distillation, decomposes into ammonium chlorid, NH_3HCl, and piperidin, $C_5H_{11}N$. Whether or not this change, whereby the non-poisonous cadaverin becomes a toxic base, can take place under the influence of bacteria during putrefaction, is not known.

Cadaverization (*kad-av-er-iz-a'-shun*) [*cadere*, to fall]. The passage of a living body to the state of a cadaver. Applied to the algid and cyanotic stage of cholera.

Cadaverous (*kad-av'-er-us*) [*cadere*, to fall]. Resembling a cadaver; ghastly; of a deathly pallor.

Cade (*kād*) [a Languedoc name]. See *Juniperus*. **C., Oil of** (*oleum cadinum*), a tarry oil from the wood of *Juniperus oxycedrus;* it is used in the treatment of skin-diseases.

Cadet's Fuming Liquid. See *Alkarsin*. **C.'s Test.** See *Tests, Table of*.

Cadiva Insania (*kad-i'-vah in-sa'-ne-ah*) [L.]. Falling insanity; an old name for epilepsy.

Cadlock (*kad'-lok*). Wild mustard, *Brassica sinapistrum*. See *Brassica*.

Cadmium (*kad'-me-um*) [καδμία, calamin]. Cd = 112; quantivalence II. A bluish-white metal resembling zinc in its general properties. Only the sulphate and iodid are used in medicine. In its physiologic action it is escharotic and astringent, producing in large doses emesis and violent gastritis. See *Elements, Table of*. **C. iodidum**, CdI_2, used as an ointment, 1 to 8 of lard. **C. sulphas**, $CdSO_4.4H_2O$, a valuable astringent in gonorrhea and in corneal opacities; used in a lotion in strength of gr. ½ or 4 to ℥j of

water, or as an ointment 1 to 40 of fresh lard. Unof. **C.-Red.** See *Conspectus of Pigments*, under *Pigment*. **C.-Yellow.** See *Conspectus of Pigments*, under *Pigment*.

Caduca (*kad-du'-kah*) [*cadere*, to fall]. See *Decidua*. **C. Passio.** See *Caducus Morbus*.

Caducibranchiate (*kad-u-se-brang'-ke-āt*) [*caducus*, falling off; *branchiæ*, gills]. In biology, applied to such amphibia as lose the gills or branchiæ upon reaching maturity.

Caducicorn (*kad-u'-se-korn*) [*caducus*, falling off; *cornu*, horn]. In biology, applied to animals that shed their horns or antlers.

Caducity (*kad-du'-sit-e*) [*caducitas*, senility]. Senility; the feebleness of advanced age.

Caducous (*kad-u'-kus*) [*caducus*, falling off]. In biology, the shedding or falling off of certain parts, as gills, antlers, horns. Dropping off very early, as compared with other parts.

Caducus Morbus (*kad-du'-kus mor'-bus*) [L.]. Falling sickness; an old name for epilepsy.

Cæcal (*se'-kal*). See *Cecal*.

Cæcitas Verbalis. See *Word-blindness*.

Cæcitis (*se-si'-tis*). See *Cecitis*.

Cæcum (*se'-kum*). See *Cecum*.

Cænæsthesis (*cen-es-the'-sis*). See *Cenesthesis*.

Cænogenetic (*se-no-jen-et'-ik*) [*καινός*, recent; *γένεσις*, generation]. In biology, the appearance of a new character very late in the course of development. This usually arises from comparatively recent variations of the type-form.

Cæruleus (*se-ru'-le-us*) [L.]. Sky-blue. **C. morbus**, blue disease. See *Cyanosis*.

Cærulosis (*se-ru-lo'-sis*). See *Cyanosis*.

Cæsalpinia (*ses-al-pin'-e-ah*) [L.]. A genus of tropical leguminous trees. **C. bonducella.** See *Bonducella*. **C. moringa** has a diuretic bark. All unof.

Cæsarean Operation (*se-sar'-e-an*). See *Cesarean*.

Cæsium (*se'-se-um*). See *Cesium*.

Caffea (*kaf'-e-ah*) [L.]. The seeds of *C. arabica*. The dried and roasted seeds are almost universally used in infusion as a beverage, forming a cerebral stimulant and stomachic tonic. They are valuable in promoting digestion and allaying hunger and fatigue. Coffee frequently causes excessive palpitation of the heart. Its properties are due to an alkaloid, **Caffein**, $C_8H_{10}N_4O_2.H_2O$, identical with *Thein*. See *Tea*. Dose of the alkaloid gr. j–v. **C. citrate.** Dose gr. j–v. **C. valerianas**, for nervous vomiting in hysteria. Dose gr. j–iv. **Ext. Caffeæ Viridis Fld.** Unof. Intended as a substitute for the Fluid Extract of Guarana. Dose ʒss–ij. See *Guarana*. **Injectio Caf. Hypodermatica**, one grain of caffein in three minims. Dose ♏j–vj.

Caffein (*kaf'-e-in*) [*caffea*, coffee]. $C_8H_{10}N_4O_2 + H_2O$. Thein; an alkaloid that occurs in the leaves and beans of the coffee-tree, in tea, in Paraguay tea, and in guarana, the roasted pulp of the fruit of *Paullinia sorbilis*. It occurs in long, silky needles, slightly soluble in cold water and alcohol, with a feebly bitter taste. It is a cerebral and spinal stimulant. See *Caffea*. **C. citrata**, citrated caffein, prepared by dissolving equal weights of caffein and citric acid in double the quantity of hot distilled water. Dose gr. ij–x. **C. citrata effervescens**, effervescent citrated caffein. Dose ʒj–ij in water. **C.-iodol**, a crystalline addition-product obtained by mixing alcoholic solutions of caffein and iodol in molecular proportion. It contains 74.6 per cent. of iodol and 25.4 per cent. of caffein, and is a light-gray, odorless, tasteless, and nearly insoluble compound. It is proposed as a substitute for iodol. Unof.

Caffeina (*ka-fe'-in-ah*). See *Caffein*.

Caffeinism (*kaf-e'-in-izm*) [*caffea*, coffee]. Chronic coffee-poisoning; a train of morbid symptoms due to excess in the use of coffee.

Cagot (*kah-go'*) [Fr.]. 1. A member of an outcast race or clan in the S. W. of France; formerly regarded as lepers. 2. (By error) a cretin. **C. Ear.** See *Ear Deformities*.

Cahinca, or Cainca (*kah-hing'-kah*) [native S. American]. The diuretic root of *Chiococca racemosa*, *C. densifolia*, or *C. anguifuga*, rubiaceous shrubs of tropical America. Unof.

Cahn and V. Mering's Method. A method of estimating the amount of acids in the stomach. It consists in distilling the contents of the stomach with water three times. The volatile acids are estimated in the distillate. The residue is shaken six times with 500 c.c. of ether, and this is evaporated to dryness, and the lactic acid estimated by titration. The residue contains the HCl, and this also can be estimated by titration.

Cailcedra (*kāl-se'-drah*) [origin unknown]. 1. The *Cedrela odorata*, a large tree of tropical America. The bark and wood are used in intermittent fevers; a fragrant oil (cedar-wood oil) is distilled from the wood. The tree also affords a resin. 2. The *Khaya senegalensis* of Africa and tropical America, a tree that closely resembles the foregoing.

Cailletet's Test. See *Tests, Table of*.

Caillian's Test. See *Tests, Table of*.

Caisson Disease (*kā'-son diz-ēz'*). The symptoms due to increased atmospheric pressure sometimes occurring in divers, caisson workers, etc. Paraplegia, hemiplegia, anesthesia, or apoplectic attacks are common, but paralysis of the legs is the most frequent symptom, coming on only after return to the normal atmosphere. The nature of the lesion is obscure.

Cajeput Oil (*kaj'-e-put oil*). See *Cajuputi, oleum*.

Cajuputene (*caj-u-pu-tēn'*) [Malay], $C_{10}H_{16}$. The principal constituent of cajeput oil; it is a liquid of an agreeable odor.

Cajuputi, Oleum (*kaj-u-pu'-te, ōl'-e-um*). [Malay, "white wood;" *oleum*, oil]. Oil of Cajuput. A volatile oil distilled from the leaves of *Melaleuca leukadendron*. It resembles oil of turpentine in its general effects, being irritant externally and producing a sense of warmth internally, with accelerated pulse. It is used with benefit for flatulent colic, dropsy, hysteria, and cutaneous disorders; it also relieves toothache. Dose ♏j–v. **C., Spiritus** (B.P.). Dose ʒss–j.

Cajuputol (*kaj-u-pu'-tol*) [Malay, *Cajuputi*, white wood]. The more limpid part of oil of cajuput; it is found also in some other fragrant volatile oils.

Cake Colors (*kāk kul'-orz*). See *Pigments, Colors, and Dyestuffs*.

Caked (*kākd*) [ME., *cake*]. Compressed or hardened into a solid mass. **C. Breast**, a breast in a puerperal woman in which the milk has become hardened and inspissated. **C. Bag**, in cows, an inflammation of the mammary gland.

Calabar Bean (*kal'-ah-ar bēn*). See *Physostigma*.

Calabarin (*kal-ab'-ar-in*) [*Calabar*]. An alkaloid from Calabar bean, apparently acting much like strychnin.

Caladana (*kal-ad-a'-nah*). See *Kaladana*.

Caladium (*kal-a'-de-um*) [L.]. A genus of large-leaved araceous plants. **C. bicolor**, of Brazil, is anthelmintic and cathartic. Various other species are employed locally in medicine. Unof.

Calage (*kal-ahzh'*) [Fr., *wedging*]. A method of prophylaxis or treatment of sea-sickness by fixation of the viscera by pillows placed between the abdomen and

the wall of the cabin and between the back and edge of the berth, the patient lying upon the side.

Calamary (*kal'-am-a-re*) [καλαμάρι, inkstand]. Same as *Cuttle-bone*.

Calamin (*kal'-am-in*) [*calamina*, a corruption of *cadmia*]. Native zinc carbonate. *Calamina præparata*, the prepared calamin, washed and pulverized, is used mainly as an external exsiccant and astringent. *Unguentum calaminæ*, Turner's cerate. Unof.

Calamint, Calaminth (*kal'-am-int* or *-minth*). Any plant of the labiate genus *Calamintha*. The calamints are aromatic stimulants, with the general properties of the other mints, such as pennyroyal. Unof.

Calamistrum (*kal-am-is'-trum*) [*calamus*, a reed]. In biology, one of the spines found on the hind-legs of spiders, used in arranging the silk as it issues from the spinnerets.

Calamus (*kal'-am-us*) [L., a reed: *gen.*, *Calami*]. Sweet Flag. The rhizome of *Acorus calamus*. It contains a volatile oil and *acorin*, a bitter nitrogenous principle. The root is an aromatic, stomachic tonic, and a common ingredient of many popular "bitters." **C., Ext., Fld.** Dose ♏ xv–℥j. **C., Draco**, a species of rattan-palm that affords a part of the so-called Dragon's Blood (*q. v.*) of commerce. **C. scriptorius** (a writing pen or reed). The groove on the floor of the fourth ventricle, at the end of which is the ventricle of Arantius.

Calapitte (*kal'-ap-it*) [Mex., *calappa*, the cacao-tree]. A concretion found occasionally in the cocoa-nut; vegetable bezoar. It is valued as an amulet in the East.

Calathidium or **Calathium** (*kal-ath-id'-e-um* or *kal-ath'-e-um*) [κάλαθος, a vase-shaped basket]. In biology, applied to the flower-head in certain of the *Compositæ*.

Calathiform (*kal-ath'-if-orm*) [κάλαθος, a vase-shaped basket; *forma*, form]. In biology, shaped like a cup, vase, or bowl, hemispherical, or concave.

Calberla's Method. A method of imbedding microscopic specimens in egg-emulsion. The white of several eggs is separated from the yolks, the chalazæ removed, and the white cut up with a pair of scissors. To each 15 parts of white add one part of a 10 per cent. solution of sodium carbonate (10 parts of calcined sodium carbonate to 100 parts of water). To this solution add the well-shaken yolks and again shake well. Pour the mixture into a deep vessel, allow to settle, remove the scum, and the mass is ready for use. The specimens, after being well washed in water, are placed in this mass until permeated. They are then fastened with pins to the freshly-cut surface of a piece of hardened mass.

Calcaneal (*kal-ka'-ne-al*) [*calcaneum*, the heel]. In biology, relating to the heel-bone, or calcaneum, or to a tuberosity in birds, resembling the calcaneum.

Calcaneo-astragalar (*kal-ka'-ne-o-as-trag'-al-ar*). See *Calcaneo-astragaloid*. **C.-astragaloid**, relating to the calcaneum and the astragalus. **C.-cavus**, a club-foot that combines the characters of calcaneus and cavus. **C.-cuboid**, belonging to the calcaneum and the cuboid. **C.-scaphoid**, belonging to the calcaneum and the scaphoid bone. **C.-valgo-cavus**, club-foot combining the features of calcaneus, valgus and cavus.

Calcaneum (*kal-ka'-ne-um*) [L., the heel]. A common name for the *os calcis* or heel-bone.

Calcaneus (*kal-ka'-ne-us*) [*calcaneum*, the heel]. Club-foot in which the heel alone touches the ground, the instep being drawn up toward the shin.

Calcar (*kal'-kar*) [L., a spur]. 1. Any spur or spur-like point, as the hippocampus minor. 2. Ergot of rye. 3. The calcaneum. **C. avis**, the hippocampus minor.

Calcareous (*kal-ka'-re-us*) [*calx*, limestone]. Pertaining to or having the nature of limestone. **C. Degeneration**. See *Degeneration*.

Calcarine (*kal'-kar-in*) [*calcar*, a spur]. Relating to the hippocampus minor. **C. Fissure.** See *Fissure*.

Calceiform (*kal'-se-if-orm*) [*calceus*, a shoe; *forma*, form]. In biology, resembling in shape a shoe or slipper, as the corolla of certain flowers.

Calceolaria (*kal-se-o-la'-re-ah*) [L., like a slipper]. A genus of scrophulariaceous plants, mostly of the Andean region. Many of the species have a high local repute as alteratives and antisyphilitics; several are emetic and purgative. Unof.

Calcic (*kal'-sik*) [*calx*, lime]. Of or pertaining to lime. **C. Inflammation of Gums and Peridental Membrane.** Inflammation caused and maintained by deposits of calculus on the necks of the teeth.

Calcicosis (*kal-sik-o'-sis*) [*calx*, lime; νόσος, disease]. Marble-cutter's phthisis; phthisis due to the inhalation of marble-dust.

Calcification (*kal-sif-ik-a'-shun*) [*calx*, lime; *fiere*, to become]. The deposit of calcareous or other insoluble crystalline matter within the tissues of the body.

Calcigerous (*kal-sij'-er-us*) [*calx*, lime; *gerere*, to bear]. Containing lime or a lime-salt; as the calcigerous cells of the dentine, or calcigerous tubules in bone.

Calcigrade (*kal'-sig-rād*) [*calx*, heel; *gredi*, to walk]. Walking on the heels.

Calcination (*kal-sin-a'-shun*) [*calcinare*, to calcine]. The process of driving off the volatile chemical constituents from inorganic compounds. The expulsion of carbon dioxid from carbonates.

Calcine (*kal'-sin* or *kal-sīn'*) [*calcinare*, to calcine]. To separate the inorganic elements of a substance by subjecting it to an intense heat.

Calcium (*kal'-se-um*) [*calx*, lime.] [*gen.*, *Calcii*]. Ca = 40; quantivalence II. A brilliant, silver-white metal, the basis of lime and limestone, characterized by strong affinity for oxygen, and isolated with great difficulty. See *Elements, Table of.* It is best known in the form of *calcium oxid*, quicklime; *C. hydrate*, slaked lime; and *C. carbonate*, chalk. The preparations of lime used in medicine are usually alkaline and slightly astringent. Calcium oxid is a powerful escharotic. **C. benzoas**, $Ca(C_7H_5O_2)_2$, used in nephritis and albuminuria of pregnancy. Dose gr. v–x. **C. carbonate Test.** See *Tests, Table of.* **C. chloridum**, $CaCl_2$, soluble in water. Dose gr. x-xx. **C. chlorid., Liq.** (B. P.). Dose ♏ xv–l. **Calcii bromidum.** See *Bromin*. **C. Carb. Precipitatus**, $CaCO_3$, insoluble in water, but soluble in acids, with effervescence. Dose gr. v–xx. **C. hypophosphis**, $Ca_2PH_2O_2$. See *Phosphorus*. **C. Phosphas Precipit.**, $Ca_3(PO_4)_2$. See *Phosphorus*. **Calcis Liniment**, carron oil, contains equal parts of lime-water, and olive oil. **C., Liquor**, lime-water, contains about 1½ parts of lime in 1000 of water. Dose ℥ ss–ij. **C. Liq. Saccharatus** (B. P.). Dose ♏xv–℥j. **C., Syr.**, saccharated syrup of lime, contains lime 65, sugar 40, water q. s. It is the antidote to poisoning by carbolic or oxalic acid. Dose ℥ss–ij. **Calx**, CaO, calcium oxid, quicklime, not used internally. **C. chlorinata.** See *Chlorin*. **C. Sulphurata.** Dose gr. $\frac{1}{10}$. **Creta**, native calcium carbonate; chalk. **C. Mist.**, consists of C. pulv. comp. 20, cinnamon-water 40, water 40. Dose ℥ ss. **C. Preparata**, chalk freed from impurities by washing and elutriation. Dose gr. v–xx. **C. Pulv. Aromat.** (B.P.). Dose gr. x–℥j. **C. Pulv. Aromat. cum Opii** (B.P.). Dose gr. x–℥j. **C. Pulv. Comp.**, compound chalk-powder,

consists of C. prep. 30, acacia 20, sugar 50 parts. Dose gr. v–℥j. **Testa præparata,** prepared oyster-shell. Unof. Dose gr. x–xx. **C. trochisci,** each contains prepared chalk 4 gr., acacia 1, sugar 6, with a little nutmeg.

Calculary (*kal'-ku-la-re*) [*calculus*, a stone]. Relating to or of the nature of a calculus.

Calculifragous (*kal-ku-lif'-rag-us*) [*calculus*, a stone; *frangere*, to break]. Lithotritic; breaking or reducing a stone in the bladder.

Calculous (*kal'-ku-lus*) [*calculus*, a stone]. Of the nature of a calculus.

Calculus (*kal'-ku-lus*) [dim. of *calx*, chalk: *pl.*, *Calculi*]. A calcareous or stone-like concretion found in the bladder, kidney, etc. **C., Arthritic,** a gouty concretion. **C., Biliary,** a gall-stone. **C., Bronchial,** a concretion in an air-passage. **C., Cutaneous.** See *Milium*. **C., Dental,** tartar on the teeth or gums. **C., Fusible,** a urinary calculus composed of phosphates of ammonium, calcium, and magnesium. **C., Lacteal, or Mammary,** a calcareous nodule sometimes obstructing the lactiferous ducts. **C., Mulberry,** the oxalate-of-lime variety, resembling a mulberry in shape and color. **C., Nasal.** See *Rhinolith*. **C., Prostatic,** one in the prostate gland. **C., Renal,** a calculus found in the kidney, producing what has been called nephritic colic. **C., Salivary,** one forming in the ducts of the salivary glands. **C., Uterine,** an intrauterine concretion; a wombstone; formed mainly by calcareous degeneration of a tumor. **C., Vesical,** one that may have originally descended from the kidney or formed primarily in the bladder.

Calea (*kal'-e-ah*) [L.]. A genus of tropical American composite-flowered plants. **C. zacatechichi,** a Mexican plant, tonic, antiperiodic, and a hepatic stimulant. Unof.

Caledonia Brown. See *Conspectus of Pigments*, under *Pigment*.

Calefacient (*kal-e-fa'-she-ent*) [L., *calidus*, warm; *facere*, to make]. 1. Warming; producing a sensation of heat. 2. A medicine, externally applied, that causes a sensation of warmth.

Calefactor (*kal-e-fak'-tor*) [*caledus*, warm; *facere*, to make]. A warmer; a little, portable stove; a pocket stove; a chafing-dish.

Calendula (*kal-en'-du-lah*) [*calendæ*, the first day of the month: *gen.*, *Calendulæ*]. Marigold. The flowering plant known as the garden-marigold, *C. officinalis*. **C., Tinct.,** contains 20 per cent. of the leaves and stems. It is used exclusively as a local application to wounds, bruises, and ulcers, and has been vaunted as a cure for carcinoma.

Calendulin (*kal-en'-du-lin*) [*calendæ*, the first day of the month]. An amorphous principle obtainable from calendula.

Calentur (*kal'-en-tūr*) [Sp., *calentura*, heat; L., *calere*, to be hot]. A tropical remittent fever with delirium; formerly, a supposed fever of this kind that attacked mariners, leading them to leap into the sea.

Calf [ME., *calfe*]. The thick fleshy posterior portion of the leg. See *Sura*. **C.-bone,** the fibula. **C.-knee.** See *Genu Valgum*.

Calices of the Kidneys (*kal'-lis-ēz*). Plural of *Calyx*. The cup-like tubes of the ureter that encircle the apices of the Malpighian pyramids of the kidneys.

Calico Bush (*kal'-ik-o boosh*). See *Kalmia*.

California (*kal-if-or'-ne-ah*) [Mex.]. A western State. **C. Buckthorn.** See *Cascara Sagrada*. **C. Elm.** See *Fremontia*. **C. Feverbush.** See *Garrya*. **C. Laurel,** the leaves of *Umbellularia californica*, common to the Pacific slope. It is recommended for nervous headaches, cerebro-spinal meningitis, neuralgia, etc. Dose of fld. ext., gtt. x–xxx. **C. Poppy.** See *Eschscholtzia californica*.

Caligated (*kal'-ig-a-ted*) [*caliga*, a boot]. In biology, applied to the booted tarsus of the typical oscine birds.

Caligation (*kal-ig-a'-shun*), or **Caliginosity** (*kal-ij-in-os'-it-e*). See *Caligo*.

Calignani's Operation. See *Operations, Table of*.

Caligo (*kal-i'-go*) [L.]. Dimness of vision; an opacity of the cornea, lens, or vitreous humor.

Caligula (*kal-ig'-u-lah*) [*caliga*, a boot]. In biology, applied to the tarsal envelop of oscine birds.

Caliology (*kal-e-ol'-o-je*) [καλιά, a nest; λέγειν, to speak]. In biology, the systematized knowledge of birds' nests.

Calipers (*kal'-ip-erz*) [corruption of *caliber*]. Compasses with curved legs; they are used in vulcanite and celluloid dental work to measure the thickness of the plate. Calipers are used also in pelvimetry, craniometry, and other measurements of parts of the body.

Calisaya (*kal-is-a'-yah*) [South America]. Cinchona bark, especially that of *Cinchona calisaya*. See *Cinchona*.

Calisthenics, or Callisthenics (*kal-is-then'-iks*) [καλός, beautiful; σθένος, strength]. The practice of various rhythmic movements of the body and of the limbs, intended to develop the muscles and produce gracefulness of carriage; light gymnastics, especially designed for the use of girls and young women.

Callaway's Test. In dislocation of the shoulder the loss of from one to two inches in the vertical circumference of the shoulder-joint of the injured side, as determined by measuring with a tape-line over the acromion and through the axilla. This test is not reliable after traumatic swelling has set in.

Callicarpa (*kal-ik-ar'-pah*) [καλός, beautiful; καρπός, fruit]. A genus of verbenaceous plants. **C. americana,** a shrub of the U. S., called "French Mulberry," is used locally for skin-diseases and for dropsy. Unof. **C. bonplandiana,** of South America, and **C. cana, C. lanata,** and **C. rheedii,** of the E. Indies, are similarly employed. All unof.

Callisection (*kal-is-ek'-shun*) [*callus*, insensibility; *sectio*, a cutting]. Painless vivisection.

Callisen's Operation. See *Operations, Table of*.

Callitriche (*kal-it'-rik-e*) [καλός, beautiful; θρίξ, hair]. A genus of aquatic herbs. **C. heterophylla** and **C. verna** are diuretic; these and other species afford a mucilage employed as a hair-dressing and they are used in domestic practice for making poultices. Unof.

Callosal (*kal-o'-sal*) [*callosus*, hard]. Pertaining to the corpus callosum.

Callose (*kal'-ōs*) [*callosus*, thick-skinned, hard]. In biology, having hardened spots or protuberances.

Callositas (*kal-os'-it-as*). See *Callosity*.

Callosity (*cal-os'-it-e*) [*callus*, hardness]. Callositas, Tylosis, Tyloma, Keratoma. A hard, thickened patch on the skin produced by excessive accumulation of the horny layers.

Calloso-marginal (*kal-o-so-mar'-jin-al*) [*callosus*, hard; *margo*, margin]. Relating to the callosal and marginal gyri of the brain.

Callosum (*kal-o'-sum*). The bridge of white nerve-substance joining the hemispheres of the brain. It has also been called *Corpus callosum*, *Trabs cerebri*, and *Commissura magna*. See illustrations under *Brain*.

Callous (*kal'-us*) [*callosus*, hard]. Hard; tough, like callus.

Callus (*kal'-us*) [L.]. 1. A callosity; hardened and thickened skin. 2. The new growth of incomplete osseous tissue that surrounds the ends of a fractured

bone, during the process of repair. See *Callosity*. **C., Permanent**, the permanent bond of bony union after re-absorption of the **C. Provisional**, or cartilage-like, plastic material first thrown out. **C. of Skin**, induration and thickening of the skin.

Calmant (*kahm'-ant*) [ME., *calme*]. A calmative medicine.

Calmative (*ka(h)l'-mat-iv*) [ME., *calme*]. 1. Calming; sedative. 2. An agent that produces a calming or sedative effect.

Calomel (*kal'-o-mel*). See *Hydrargyrum*.

Calophyllum (*kal-o-fil'-um*) [καλός, beautiful; φύλλον, leaf]. A genus of large tropical guttiferous trees. Several of the species (as *C. tacamahaca*, *C. inophyllum*) yield medicinal oils and resins. Unof.

Calor (*ka'-lor*) [L. "heat"]. 1. Heat. 2. Moderate fever heat; less than *fervor* and *ardor*. **C. animalis**, animal heat. **C. febrilis**, fever-heat. **C. fervens**, boiling heat. **C. innatus**, natural or normal heat. **C. mordicans**, biting or pungent heat (an unfavorable symptom of typhus). **C. nativus**, native or animal heat; blood heat; normal heat. **C. internus**, inward fever: fever not appreciable on the surface of the body.

Caloricity (*kal-or-is'-it-e*) [*calor*, heat]. The heat-producing power of the living animal body.

Calorie (*kal'-or-e*) [Fr.]. See *Calory*.

Calorifacient (*kal-or-if-a'-she-ent*) [*calor*, heat; *facere*, to make]. Heat-producing (applied to certain foods).

Calorimeter (*kal-or-im'-et-er*) [*calor*, heat; μέτρον, a measure]. An instrument for transforming the potential energy of the food into heat, and for measuring the number of heat-units produced. Two forms are used, the Water-Calorimeter and the Ice-Calorimeter.

Calorimetry (*kal-or-im'-et-re*) [*calor*, heat; μέτρον, a measure]. The estimation of the heat-units by the calorimeter.

Calorimotor (*kal-or-im-o'-tor*) [*calor*, heat; *motor*, mover]. A galvanic battery that produces heating-effects, generating electricity in large quantity, but not necessarily with a high electro-motive force.

Calorinesis (*kal-or-in'-es-is*) [*calor*, heat: *pl.*, *Calorineses*]. Any disease characterized by an alteration in the quantity of animal heat.

Calory (*kal'-or-e*) [Fr., *Calorie*]. A heat-unit; the amount of heat required to raise the temperature of one kilogram of water one degree Centigrade. See *Unit*.

Calotropis (*kal-ot'-ro-pis*) [καλός, beautiful; τρόπις, a ship's keel]. A genus of E. Indian asclepiadaceous trees and shrubs. See *Madar*.

Caltha (*kal'-thah*) [L.]. A genus of ranunculaceous herbs. **C. palustris**, the marsh-marigold of cold and cool regions; it is vesicant when fresh. It is often cooked and eaten as a pot-herb. Unof.

Calumba (*kal-um'-bah*) [native Mozambique, *kalumb*]. Columbo. The root of *Jateorrhiza columba*, native to S. Africa and parts of the E. Indies. It is an excellent example of a simple bitter, and contains a bitter principle, *Columbin*, $C_{21}H_{22}O_7$, of which the dose is gr. j–ij. It is not astringent, and may be prescribed with salts of iron. It is useful in atonic dyspepsia, and as a mild, appetizing tonic in convalescence. **C., Ext.** (B. P.). Dose gr. ij–x. **C., Fld. Ext.** Dose ♏v–xxx. **C., Infus.** (B. P.). Dose ℥j–ij. **C., Tinct.**, contains ten per cent. of C. Dose ʒss–ij. See also *American Columbo*.

Calumbin (*kal-um'-bin*). See *Calumba*.

Calva (*kal'-vah*). Same as *Calvaria*.

Calvaria (*kal va'-re-ah*) [*calva*, the scalp]. The upper part of the skull.

Calvarian (*kal-va'-re-an*) [*calva*, the scalp]. Relating to the calvaria.

Calvarium (*kal-va'-re-um*). See *Calvaria*.

Calvert's Test. See *Tests, Table of.*

Calvities (*kal-vish'-e-ēz*) [*calvus*, bald]. Baldness, especially general or senile baldness. See *Alopecia*. **C. senilis**. See *Alopecia senilis*.

Calx (*kalks*) [L.]. The heel. In chemistry, a name formerly applied to any oxid of a metal, especially an alkaline metal, and chiefly to lime, or oxid of calcium, CaO. See *Calcium*.

Calycanthemous (*kal-ik-an'-them-us*) [κάλυξ, calyx; ἄνθεμον, a flower]. In biology, with petaloid sepals.

Calycanthin (*kal-ik-an'-thin*) (κάλυξ, calyx; ἄνθος, flower], $C_{50}H_{28}O_{22}$. A glucosid obtained from certain plants of the genus Calycanthus.

Calycanthus (*kal-ik-an'-thus*) [κάλυξ, calyx; ἄνθος, flower]. A genus of North American shrubs. **C., floridus**, the Carolina allspice, sweet-shrub, or bubby, is tonic, emetic, and antifebrile. **C. occidentalis** is the California sweet-shrub. Unof.

Calyciflorate (*kal-is-e-flo'-rat*) [*calyx*, calyx; *flos*, flower]. In biology, with the petals and stamens borne on the calyx.

Calycine (*kal'-is-in*) [*calyx*, calyx]. In biology, pertaining to or resembling a calyx.

Calycle (*kal'-ik-l*) [*calyculus*, a little calyx]. In biology, applied to parts that resemble a calyx, as the bracts or leaflets of certain plants, or the cup-cells of zoöphytes.

Calycular (*kal-ik'-u-lar*) [*calyculus*, a calycle]. 1. In biology, having bracts resembling accessory calices or a cup-cell resembling a calycle. 2. An old name for the plant *Hyoscyamus*.

Calymna (*kal-im'-nah*) [καλύπτειν, to cover, hide]. A jelly-like envelop of radiolarians.

Calyphyomy (*kal-if-i'-o-me*) [κάλυξ, a calyx; φύειν, to grow]. In biology, the growing together of sepals and petals.

Calyptera (*kal-ip-te'-rah*) [καλυπτήριον, a covering]. In biology, the tail coverts of birds.

Calyptoblastic (*kal-ip-to-blas'-tik*) [καλυπτός, covered; βλαστός, a germ]. In biology, having capsulated generative buds, as the campanularian and sertularian hydroids.

Calyptra (*kal-ip'-trah*) [καλύπτρα, a veil]. In biology, a hood-like body covering the fruit-organ in plants, as the modified archegonium of mosses, or the united bracts of some flowers.

Calyptrate (*kal-ip'-trāt*) [καλύπτρα, a veil]. In biology, having a hood-like investment.

Calyptrogen (*kal-ip'-tro-gen*) [καλύπτρα, a veil; γένης, producing]. In biology, the root-cap.

Calyx (*ka'-liks*) [κάλυξ, the cups or calyx of a flower: *pl.*, *Calices*]. In biology, applied to various cup-like ensheathing structures, as the funnel-shaped tissues surrounding the Malpighian pyramids of the kidney, the cups of a polyzoan, or a Crinoid; an ovarian capsule. **C. of Ovum**, the wall of the Graafian follicle from which the ovum has escaped.

Camass (*kam-as'*) [nat. American Indian]. The edible bulb of *Camassia esculenta*, *C. fraseri*, or *C. leichtlinii*, squill-like plants of Western N. America. Death Camass, the poisonous root or bulb of *Zygadenus venenosus*; called also *hog's potato*, as it is eaten by swine. The bulb or corm of the Blue Camass (*Brodiaea grandiflora*), is also considered poisonous, although it may be eaten.

Camata (*kah-mah'-tah*) [origin unknown]. The dried acorns of *Quercus ægilops*, used in the arts for their astringency. See *Camatina* and *Valonia*.

Camatina (*kah-mah-te'-nah*) [origin unknown]. The immature acorns of *Quercus ægilops*, used in the arts for their astringency. See *Camata* and *Valonia*.

Cambiform (*kam'-bif-orm*) [*cambium*, cambium; *forma*, shape]. In biology, applied to narrow, thin-walled succulent cells, often found in connection with sieve-tubes, but whose nature is not well understood.

Cambi-Resin [East Indian]. The resinous juice of *Gardenia lucida* an E. Indian plant. It has been recommended for use in hospital dressings, from which it is said to expel flies.

Cambium (*kam'-be-um*) [L.]. In biology, a layer of tissue formed between the wood and the bark of exogenous plants. It is composed of extremely delicate, thin-walled cells, filled with protoplasm and organizable nutrient matter, and appearing like a thin film of mucilage.

Cambogia (*kam-bo'-je-ah*) [*Camboja*, or *Cambodia*, a country in Farther India]. Gamboge. A resinous gum from *Garcinia hanburyi*, a tree native to Southern Asia. Its properties are due to *gambogic acid*. It is a drastic hydragogue cathartic, decidedly diuretic. **C., Pil. Comp.**, (B. P.), contains gamboge, Barbadoes aloes, hard soap, compound powder of cinnamon, and syrup. Dose gr. v–x. It is also officially a constituent of **Pil. Cath. Comp.** See *Colocynth*. Dose gr. ij–v.

Cambuca (*kam-bu'-kah*) [L.]. An old name for a bubo or venereal ulcer.

Camel's Hair. The hair of the camel, used in Africa, Asia Minor, and the Caucasus, and latterly in Europe, for the manufacture of woven goods, that are made from the unbleached hair. **C.'s-h. Brush**, a small fine brush used for making various applications to the surface of the body, and for cleansing the ear, etc.

Camelina (*kam-el-i'-nah*) [*χαμαί*, dwarf; *λίνον*, flax]. A genus of cruciferous plants. **C. sativa**, the gold of pleasure. A cruciferous plant of the old world, naturalized in N. America. Its seeds afford a fixed oil; the plant itself was formerly esteemed in eye-diseases. Unof.

Camellia (*kam-el'-e-ah*) [after Kamel, a scientist of the seventeenth century]. A genus of shrubs. **C. thefera.** See *Tea*.

Camellin (*kam-el'-in*) [see *Camellia*], $C_{63}H_{84}O_{19}$. A glucosid obtained from the seeds of *Camellia japonica*.

Camembert Cheese. See *Cheese*.

Camera (*kam'-er-ah*) [*καμάρα*, an arched roof or chamber]. In biology, a chamber or vaulted structure. In optics, the chamber or dark-box of the apparatus used for photography. **C. cordis**, the enveloping membrane of the heart, the pericardium. **C. of Cranium**, the chamber of the skull. **C. lucida**, an optical device for superimposing or combining two fields of view in one eye, invented by the chemist Wollaston. **C. oculi**, the chamber of the eye.

Camerated (*kam'-er-a-ted*) [*καμάρα*, a vault]. In biology, chambered, vaulted.

Camerer's Method. A method of estimating uric acid in the urine. It is done by means of Salkowski's magnesia mixture (one part of crystallized magnesium sulphate, two parts of ammonium chlorid, four parts of ammonia solution, of sp. gr. 0.924, and eight parts of water), to remove the phosphates, and the addition of silver nitrate.

Camerine (*kam'-er-in*) [*καμάρα*, a vault]. In biology, a foraminiferous shell of the numulite limestone.

Cameritelous (*kam-er-it-e'-lus*) [*camera*, a vault; *tela*, a web]. Applied to spiders that spin intricate webs or hiding-chambers.

Camerostoma (*kam-er-os'-to-mah*) [*καμάρα*, a vault; *στόμα*, a mouth]. In biology, the vaulted cover of the manducatory organs of spiders.

Camisole (*kam-is-ōl'*) [Fr.]. The straight-jacket, formerly used for the restraint of violently insane persons.

Camomile, or Chamomile (*kam'-o-mīl*). See *Anthemis* and *Matricaria*.

Campana (*kam-pa'-nah*). See *Pulsatilla*.

Camp Cure. Life in camp and in the open air, adopted as a therapeutic measure. **C. Fever.** Synonym of *Typhus Fever*. **C. Measles**, an epidemic of measles among soldiers.

Campani's Ocular. See *Ocular*. **C. Tests.** See *Tests, Table of*.

Campanula (*kam-pan'-u-lah*) [L., "a little bell"]. 1. Any bell-shaped part or process. 2. A genus of plants with bell-shaped flowers: blue-bell: Canterbury bell. Several of the species, as *C. trachelium* and *C. glomerata* have been employed in medicine, as detergents, astringents, and vulneraries. Unof.

Campanulate (*kam-pan'-u-lāt*) [*campanula*, a little bell]. Bell-shaped.

Camper's Angles. See *Angle*. **C. Ligament.** See *Ligament*. **C. Lines.** See *Lines, Table of*. **C. Plane.** See *Plane*. **C. Profile Line.** See *Profile Line*.

Camphene (*kam-fēn'*, or *kam'-fēn*) [*camphor*], $C_{10}H_{16}$. The solid terpene obtained from pinene halogen hydrid by the elimination of the haloid acid.

Camphenes (*kam'-fēnz*) [*camphor*]. The volatile oils or hydrocarbons having the general formula $C_{10}H_{16}$, isomeric with oil of turpentine. Many camphenes exist ready-formed in plants, as oil of cloves, etc. They are liquid at ordinary temperatures. They are also called *terpenes*, but by some authorities the latter is made the generic name of all the volatile hydrocarbons having the formula $C_{10}H_{16}$, while the name camphene is limited to those terpenes that are solid at ordinary temperatures.

Camphoid (*kam'-foid*) [*camphor*]. A substitute for collodion. It is a solution, one in 40, of pyroxylin, in equal parts by weight of camphor and absolute alcohol. It may be used as a vehicle for applications to the skin. The application dries in a few minutes, leaving an elastic opaque film, not easily washed off.

Campholic Acid (*kam-fol'-ik*). See *Acid, Campholic*.

Campho-phenique (*kam-fo-fen-ēk'*) [Fr.]. A proprietary preparation combining camphor and phenol; it is recommended as an antiseptic and local stimulant.

Camphor (*kam'-for*) [*camphora*, camphor: *gen.*, *Camphoræ*], $C_{10}H_{16}O$. A solid volatile oil obtained from *Cinnamomum camphora*, a tree indigenous to Eastern Asia. It yields *camphoric* and *camphretic acids*, also *C. Cymol* when distilled with zinc chlorid. It is a valuable antispasmodic, anodyne and diaphoretic. Applied locally, it is an excellent rubefacient. It is a moderate cerebral excitant. It is effectual in cholera, vomiting, cardiac depression and affections requiring an antispasmodic. **C., aqua**, consists of camphor 8, alcohol 5, precipitated calcium phosphate 5, distilled water q. s. ad 1000 parts. Dose ʒj–iv. **C. Ball**, an English preparation used as an application to chapped-skin. Its composition is spermaceti 4, white wax 12, oil of almonds 5; melt in a water bath, and add flowers of camphor 4. Dissolve and when nearly cold pour into boxes or mould in gallipots. **C. Borneo.** See *Borneol*. **C. Carbolated**, a mixture of 2½ parts of camphor with one each of carbolic acid and alcohol. A good antiseptic dressing for wounds. **C., ceratum**, consists of camphor liniment 1, white wax 3, and lard 6. Used for itching skin-affections. **C., Chloral**, a fluid prepared by mixing equal parts of camphor and chloral hydrate. It is an excellent solvent for many alkaloids. Used externally. **C.-ice**, the *ceratum camphoræ compositum*, N. F. **C., linimentum**, has camphor 20, cottonseed oil 80 parts. **C., Liniment. Comp.** (B. P.), contains camphor and oil of

lavender dissolved in rectified spirit, and strong solution of ammonia added. **C., Monobromated,** $C_{10}H_{15}BrO$, camphor in which one atom of hydrogen has been replaced by an atom of bromin. It resembles the bromids in therapeutic action. Dose gr. j–x, in emulsion. **C. salicylate,** prepared by heating together 14 parts of camphor with 11 of salicylic acid. It is used as an ointment. **C., Spt.,** contains camphor 10, alcohol 70, water 20 parts. Dose ♏v–xx. **C., Tinct., Comp.** (B. P.), contains opium, benzoic acid, camphor, oil of anise, and proof spirit. Dose ♏xv–ʒj. **C. Tinct., Rubini's.** Unof. A saturated solution of camphor in alcohol. Dose gtt. iv–x. **Raspail's "Eau Sedative."** Unof. Contains aq. ammoniæ ʒij, sodium chlorid ʒij, camph. spt. wine ʒiij, water Oij. Used externally.

Camphoric Acid (*kam-for'-ik*). See *Acid.*

Camphoronic Acid (*kam-fo-ron' ik*). See *Acid.*

Camphors (*kam'-forz*) [*camphora*, camphor]. Peculiar-smelling substances containing oxygen and intimately related to the terpenes. They are often found with the latter in plant-secretions and can be artificially prepared by oxidizing the same.

Camphylene (*kam'-fil-en*) [*camphora*, camphor], $C_{10}H_{16}$. 1. A liquid terpene produced by decomposing camphene with lime at a great heat. 2. A commercial name for naphthalin, occurring in blocks that are sold for protecting furs and woolens from moths, and are placed in urinals for disinfecting purposes.

Campimeter (*kam-pim'-et-er*). See *Perimeter.*

Camplin's Biscuits. See *Biscuits.*

Campsis (*kamp'-sis*) [κάμψις, a curving]. Any abnormal curvature or flexion.

Campterium (*kamp-te'-re-um*) [καμπτήρ, a bending]. In biology, the anterior border of the wing; the bend of the wing.

Campylochirus (*kam-pil-o-ki'-rus*) [καμπύλος, crooked; χείρ, hand]. Having distorted hands.

Campylorrhachis (*kam-pil-or'-a-kis*) [καμπύλος, crooked; ῥάχις, backbone]. A fetus with spinal deformity.

Campylorrhinus (*kam-pil-o-ri'-nus*) [καμπύλος, crooked; ῥίς, nose]. A monstrosity with a deformity of the nose.

Campylospermous (*kam-pil-o-sper'-mus*) [καμπύλος, curved; σπέρμα, a seed]. In biology, applied to seeds having the material curved so as to form longitudinal furrows.

Campylotropal (*kam-pil-ot'-ro-pal*) [καμπύλος, curved; τρέπειν, to turn]. In biology, applied to ovules or seeds that are bent or curved on themselves.

Canada (*kan'-a-dah*) [Sp.]. A British possession in North America. **C. Balsam.** See *Balsamum canadense.* For its uses in microscopy, see *Mounting Media.* **C. Snakeroot,** the root of *Asarum canadense.* See *Asarum.* **C. Hemp.** See *Apocynum.*

Canadian (*kan-a'-de-an*) [*Canada*]. Pertaining or belonging to Canada.

Canadol (*kan'-ad-ol*). A transparent volatile liquid resembling benzene in smell. It is an excellent local anesthetic for minor surgical operations. Unof. See also *Gasolene.*

Canaigre (*kan-a'-gra*) [Sp.]. The *Rumex hymenosepalus,* a plant of Texas, Mexico, Utah and California. The root is highly astringent: the sour stalks are used, like rhubarb-stalks, in making pies. Unof.

Canal, or **Canalis** (*kan-al'*, or *kan-a'-lis*) [*canna*, a reed or tube]. 1. A tube or duct for carrying the fluids of the body. 2. A hollow instrument used as a splint. **C., Abdominal.** See *C., Inguinal.* **C., Abital.** See *C., Aphodal.* **C., Aërial.** See *C., Air.* **C., Afferent.** See *C., Incurrent.* **C., Air,** a cavity containing air, such as exists in most vegetable organs; it is formed by an arrest of development or by a destruction of some of the anatomic elements. **C., Alcock's,** a strong sheath of the obturator layer of the pelvic fascia containing the internal pudic artery. **C., Alimentary,** the whole digestive tube from the mouth to the anus. **C., Alisphenoid,** in comparative anatomy, a canal in the alisphenoid bone, opening anteriorly into the foramen rotundum, and transmitting the external carotid artery. **C., Alveolar, Anterior,** one located in the superior maxilla; it transmits the anterior superior dental nerve. **C., Alveolar, Inferior,** the inferior dental canal. **C., Alveolar, Median,** one located in the superior maxilla and transmitting the middle superior dental nerve. **C., Alveolar, Posterior,** one situated in the superior maxilla; it transmits the posterior superior dental nerve. **C., Alveolo-dental,** See *C., Dental.* **C., Ambulacral,** in the *Echinodermata,* branches of the circular canal. **C., Anal,** leads from the rectum to the external opening of the anus. **C., Aphodal,** in certain sponges, one connecting a chamber with an excurrent canal. **C., Apical,** in the *Ctenophora,* two canals extending from the funnel to the apical pores. **C., Aquiferous.** 1. Canals that in many molluscs traverse the substance of the foot, opening externally by pores, or internally into the blood-sinuses. 2. In the *Entozoa,* a series of ramifying excretory canals, with blind extremities, converging to a common canal that opens externally. **C., Arachnoid,** a space formed beneath the arachnoid membrane of the brain; it transmits the venæ magnæ Galeni. **C. of Arantius,** the ductus venosus. **C., Archinephric,** the duct of the archinephron or primitive kidney. **C., Arterial.** See *Ductus arteriosus.* **C., Atrial,** the cavity of the atrium. **C., Auditory, External,** that from the auricle to the tympanic membrane. **C., Auditory, Internal,** that beginning on the posterior surface of the petrous bone, and extending outward and backward for a distance of about four lines; it transmits the auditory and facial nerves, and the auditory artery. **C., Auricular.** 1. See *C., Auditory, External.* 2. The constriction between the auricular and ventricular portions of the fetal heart. **C., Avant,** the anterior portion of the male urethra. **C., Axial,** in certain *Echinodermata,* the central canal of a brachium, opening into the alimentary canal. **C., Bartholin's,** the duct of Bartholin's gland. **C. of Bernard,** a supplementary duct of the pancreas. Also called Santorini's canal. **C., Bichat's.** See *C., Arachnoid.* **C., Biflex.** See *Gland, Interungulate.* **C., Biliary.** See *C., Hepatic.* **C., Biliary, Interlobular,** canals situated between the acini of the liver, containing small branches of the portal vein, etc. **C., Blastoporic.** See *C., Neurenteric.* **C. of Bone,** a canaliculus of bone. **C., Braun's.** See *C., Neurenteric.* **C., Braune's,** the continuous passage formed by the uterine cavity and the vagina during labor, after full dilatation of the os. **C., Breschet's.** See *C. of the Diploë.* **C., Bullular.** See *C. of Petit.* **C., Carinal,** an air-canal in the *Equiseta,* situated on the inner side of the xylem. **C., Carotic.** See *C., Carotid.* **C., Carotico-tympanic,** two or three short canals extending from the carotid canal to the tympanum; they transmit branches of the carotid plexus. **C., Carotid,** one in the petrous portion of the temporal bone; it transmits the internal carotid artery. **C. of Cartilage,** the canals in ossifying cartilage, during its vascularization intended to receive prolongations of the osteogenetic layer of the periosteum. They radiate in all directions from the center of ossification. **C., Central (of the modiolus),** a canal running from the base to the apex of the cochlea. **C., Central (of spinal**

cord), the small canal that extends through the center of the spinal cord from the conus medullaris to the lower part of the fourth ventricle. It represents the embryonic ectodermal canal. **C., Cerebro-spinal,** 1. The neural or cranio-vertebral canal, formed by the skull and the spine, and containing the brain and spinal marrow. 2. The primitive continuous cavity of the brain and spinal cord, not infrequently more or less extensively obliterated in the latter, but in the former modified in the form of the several ventricles and other cavities. **C., Cervical.** See *C. of Cervix Uteri*. **C., Cervico-uterine.** See *C., Uterine*. **C. of Cervix Uteri,** that portion of the uterine canal that extends between the internal and external os. **C. of Chorda Tympani,** a small canal in the temporal bone, between its squamous and petrous portions, parallel with the Glaserian fissure; it transmits the chorda tympani nerve. **C., Chyleaqueous,** in certain invertebrates, a system of canals containing water and digestive products. **C., Ciliary.** See *C., of Fontana*. **C., Circular,** in the *Echinodermata*, a vessel surrounding the esophagus, connected with the exterior by the madreporic canal, and giving off the ambulacral canals. **C. clavellaris,** in biology, a cecal canal running into the olfactory clubs of *Medusæ*. **C., Cloacal.** See *C., Excurrent*. **C. of Cloquet.** See *C., Hyaloid*. **C., Cochlear,** the spiral and snail-like cavity of the cochlea, 28 to 30 mm. long. The base is turned inward toward the internal auditory meatus, and the apex outward toward the tympanum. **C. of Communication,** in the embryo of the fowl, canals that run from the cavity of each protovertebra to the pleuroperitoneal space. **C., Connecting,** the arched or coiled portion of a uriniferous tubule, joining with a collecting tubule. **C., Corona,** in biology, the coronal intestine of *Medusæ*. Same as *Pouch corona*. **C. of Corti,** the triangular canal formed by the pillars of Corti, the base of which corresponds to the membrana basilaris. It extends over the entire length of the lamina spiralis. **C. of Cotunnius.** See *Aqueduct of the Vestibule*. **C., Cranio-vertebral.** See *C., Cerebro-spinal*, and *C., Neural*. **C., Crural.** See *C., Femoral*. **C., Ctenophoral,** in the *Ctenophora*, eight canals connected at right angles with the tertiary radial canals, and corresponding in their course with the eight locomotive bands. **C. of Cuvier,** the ductus venosus. **C., Cystic,** the cystic duct. **C. of De Candolle.** See *C., Medullary*. **C., Deferent,** the vas deferens. **C., Demicircular.** See *C., Semicircular*. **C., Dental, Anterior,** one extending into the facial portion of the superior maxilla; it transmits the anterior dental vessels and nerves. **C., Dental, Inferior,** the dental canal of the inferior maxilla; it transmits the inferior dental nerve and vessels. **C., Dental, Posterior,** two canals in the superior maxilla. They transmit the superior posterior dental vessels and nerves. **C., Dentinal,** the minute canals in dentine, extending approximately at right-angles to the surface of a tooth from the pulp-cavity, into which they open, to the cementum and enamel. **C., Digestive.** See *C., Alimentary*. **C. of Diploë,** canals in the diploë of the cranium transmitting Breschet's veins. **C., Efferent.** 1. See *C., Excurrent*. 2. In the *Cestoda*, canals connecting the testicles with the deferent canals. **C., Ejaculatory.** See *Duct, Ejaculatory*. **C. of Epididymis,** a convoluted tube, about 20 feet long when straightened, forming the epididymis and continuous with the vas deferens. **C., Eschricht's Yellow,** in certain of the *Cestoda*, a system of canals, opening into the fertilizing canal, and terminating in round or oval sacs. **C., Ethmoidal, Anterior,** one between the ethmoid and frontal bones; it transmits the nasal branch of the ophthalmic nerve, and the anterior ethmoidal vessels. **C., Ethmoidal, Posterior.** See *C., Orbital, Posterior, Internal*. **C., Eustachian,** one in the petrous portion of the temporal bone, containing a portion of the Eustachian tube. **C., Excurrent,** in sponges, the tubes that carry water from the ciliated chambers to the exterior. **C., Facial,** the aqueduct of Fallopius; it transmits the facial nerve. **C., Fallopian.** See *Aqueduct of Fallopius*. **C., Femoral.** 1. The inner compartment of the sheath of the femoral vessels behind Poupart's ligament; a femoral hernia descends through this. 2. See *C., Hunter's*. **C. of Ferrein,** a triangular channel, supposed to exist between the free edges of the eyelids when they are closed, and to serve for conducting the tears toward the puncta lachrymalia during sleep. **C., Fertilizing,** in many cestoda, a tube connecting the vagina and the uterus. **C., Fibro-adipose,** in certain fishes, a canal, filled with adipose tissue, on the dorsal side of the neural canal. **C. of Fontana,** a series of small spaces formed by the interlacing of the connective-tissue fibers of the framework of the peripheral processes of the iris, situated in the angle of the anterior chamber, and serving as a medium for the transudation of the aqueous humor from the posterior to the anterior chamber of the eye. They are also called *C. of Hovius, C., Ciliary*, and *Fontana's Spaces*. **C., Galactophorous,** the lactiferous tubules of the mammary gland. **C. of Gärtner,** in the female, a relic of the main portion of the Wolffian duct of the embryo; it is a tube extending from the broad ligament of the uterus to the wall of the uterus and vagina. **C., Gastro-vascular,** in the *Hydrozoa*, canals extending from the stomach into the substance of the disc of the umbrella. **C., Genital,** in comparative anatomy, any canal designed for copulation or for the discharge of ova. **C., Gonocalycine,** a system of canals found in the gonocalyx of the Hydrozoa. **C. of Groin.** See *C., Inguinal*. **C. of Guidi.** See *C., Vidian*. **C., Gynecophoric,** in *Bilharzia*, a groove extending from a little below the ventral sucker to the end of the tail. It lodges the female during copulation. **C. of Havers.** See *C., Haversian*. **C., Haversian,** canals in the compact substance of bone forming a wide-meshed network, and establishing communication between the medullary cavity and the surface of the bone. Their average diameter is $\frac{1}{300}$ inch, and they are lined by a continuation of the endosteum; they transmit blood-vessels, lymph-vessels and nerves. **C., Hemal,** one in the ventral surface of the vertebral column, enclosed by the hemal arches; it is incomplete in certain portions. **C. of Henle,** a portion of the uriniferous tubules. **C., Hepatic.** 1. The excretory duct of the liver. 2. The radicles of the hepatic duct. **C., Hernial,** one transmitting a hernia. **C. of Hovius.** See *C. of Fontana*. **C. of Huguier.** See *C. of the Chorda Tympani*. **C., Hunter's,** a triangular canal formed in the adductor magnus muscle of the thigh; it transmits the femoral artery and vein and internal saphenous nerve. **C. of Huschke,** one formed by the junction of the tubercles of the annulus tympanicus. This is generally obliterated after the fifth year, but may persist through life. **C., Hyaloid,** an irregularly-cylindrical canal running antero-posteriorly through the vitreous body, through which in the fetus the hyaloid artery passes, to ramify on the posterior surface of the crystalline lens. **C., Hyapophyseal,** in birds, that formed by the inferior spinous processes of the upper cervical vertebræ; it transmits the carotid artery. **C., Inci-**

sive. See *C., Incisor.* **C., Incisor,** a canal that opens into the mouth by an aperture just behind the incisor teeth of the upper jaw; it is formed by a groove on the adjoining surfaces of the superior maxillæ, and has two branches that open into the nasal fossæ. **C., Incurrent,** in sponges, the canals that convey water from the exterior to the ciliated chambers. **C., Infra-orbital,** a small canal running obliquely through the bony floor of the orbit; it transmits the infraorbital artery and nerve. **C., Inguinal,** a canal about one and one-half inches long, running obliquely downward and inward from the internal to the external abdominal ring, and constituting the channel through which an inguinal hernia descends; it transmits the spermatic cord in the male, and the round ligament of the uterus in the female. **C., Inter-.** See *C., Incurrent.* **C., Intercellular,** in biology, canals formed by the interspaces between vegetable cells. **C., Intestinal,** that portion of the alimentary canal that is included between the pylorus and the anus. **C., Intrafascicular,** one formed in a fibro-vascular bundle by the destruction of the vascular tissue and parenchyma. **C., Intralobular, Biliary,** the radicles of the bile-ducts, forming a fine network in and around the hepatic cells, and communicating with vacuoles in the cells. **C. of Jacobson.** See *C., Tympanic.* **C., Kidney,** in the *Platelminthes*, excretory tubes that take up excrementitious matter from the tissues. **C., Kidney, Primitive,** in some of the lower animals canals that appear to replace the kidneys. **C. of Kowalevsky.** See *C., Neurenteric.* **C., Lacrymal.** 1. The bony canal that lodges the nasal duct. 2. One of the lachrymal canaliculi. **C., Lateral,** in most fishes, two canals, one on each side, that communicate with cavities in the head, and with the exterior, by apertures in each overlying scale; they are probably sensory in function. **C. of Laurer,** in certain worms, one by which the oviduct opens externally on the dorsal surface; according to some, the vitellarian duct. **C., Lingual,** in the horse, etc., the floor of the mouth, from its lodging the tongue. **C. of Loewenberg,** that portion of the cochlear canal that is situated above the membrane of Corti. **C., Longitudinal,** in the *Cestoda*, canals, one on each side of a joint; they are of uncertain function. **C., Looped,** in the *Annulata*, the segmental organs. **C., Macro-myelonal,** the central canal of the spinal cord. **C., Madreporic,** in the *Echinodermata*, one joining the madreporite, and the circular canal. **C., Malar,** one in the malar bone transmitting the malar division of the temporo-malar branch of the superior maxillary nerve. **C. of Marrow.** See *C., Cartilage.* **C., Maxillary.** See *C., Dental.* **C., Median.** 1. The central canal of the spinal cord. 2. The aqueduct of Sylvius. **C., Medullary.** 1. The hollow cavity of a long bone, containing the marrow. 2. See *C., Vertebral.* 3. The central canal of the spinal cord. 4. An Haversian canal. 5. The canal of De Candolle, enclosing the pith in the stem of plants. 6. In embryology, the medullary tube. **C., Medullary, Cerebro-spinal,** the central canal of the spinal cord. **C., Membranous, of the Cochlea,** a canal in the cochlea, following the turns of the lamina spiralis; it is bounded by the basilar membrane, the membrane of Reissner, and the wall of the cochlea. **C., Membranous, Semicircular.** See *C., Semicircular.* **C. of Modiolus,** the spiral canal of the cochlea. **C., Muciparous.** See *C., Mucous.* **C., Mucous,** in general, canals lined with mucous membrane. In zoölogy, canals found beneath the scales of fishes and other scaly animals, furnishing the mucus that lubricates the surface. **C. of Müller.** See *Müllerian Duct.* **C., Myelonal,** the central canal of the spinal cord. **C., Nasal.** 1. See *C., Lachrymal.* 2. An occasional canal found in the posterior portion of the nasal bone; it transmits the nasal nerves. **C., Naso-lachrymal.** See *C., Lachrymal.* **C., Naso-palatine.** See *C., Incisor.* **C., Neural.** 1. See *C., Vertebral.* 2. In *Echinoderms*, a canal a part of the wall of which is formed by the ambulacral nerve and its connections. **C., Neurenteric, of Kowalewsky,** also called *Blastoporic Canal*, in the embryo, a passage leading from the posterior part of the medullary tube into the archenteron. **C., Neuro-central.** See *C., Vertebral.* **C. of Nuck,** a pouch of peritoneum which, in the female fetus, descends for a short distance along the round ligament of the uterus into the inguinal canal; it is the analogue of the processus vaginalis in the male. It sometimes persists after birth. **C., Nutritive.** See *C., Haversian.* **C., Obstetric.** See *C., Parturient.* **C., Obturator,** a canal in the ilium transmitting the obturator nerve and vessels. **C., Olfactory,** in the embryo, the nasal fossæ at an early period of development. **C., Omphalo-mesenteric,** in the embryo, a canal that connects the cavity of the intestine with the umbilical vesicle. **C., Optic.** See *Optic Foramen.* **C., Orbital, Anterior Internal.** See *C., Ethmoidal, Anterior.* **C., Orbital, Posterior Internal,** the posterior of two canals formed by the ethmoid bone and the orbital plate of the frontal. It transmits the posterior ethmoidal vessels. **C., Palatine, Accessory Posterior,** one or two canals in the horizontal plate of the palate bone, near the groove entering into the formation of the posterior palatine canal. **C., Palatine, Anterior,** formed by the union of the incisive canals; it opens on the palate behind the incisor teeth. **C., Palatine, Descending.** See *C., Palato-Maxillary.* **C., Palatine, External, Small,** a small canal in the pyramidal process of the palate bone, close to its connection with the horizontal plate. It transmits the external palatine nerve. **C., Palatine, Posterior.** See *C., Palato-maxillary.* **C., Palatine, Smaller.** See *C., Palatine, Posterior.* **C., Palatine, Superior,** one formed by the palate bone and the superior maxilla, transmitting the large palatine nerve and blood-vessels. **C., Palato-maxillary,** one formed by the outer surface of the palate bone and the adjoining surface of the superior maxilla. It transmits the large palatine nerve and blood-vessel. **C., Paragastric,** in the *Ctenophora*, one that branches off on each side of the funnel, and terminates near the oral extremity of the funnel. **C., Parturient,** the channel through which the fetus passes in parturition, including the pelvic canal, and the uterus and vagina considered as a single canal. **C., Pelvic,** the canal of the pelvis, from the superior to the inferior strait. **C., Pericardio-peritoneal,** in some of the lower vertebrates; canals connecting the pericardium and the peritoneal cavity. **C., Perigastric,** in the *Hydrozoa*, two canals running parallel to the stomach, from the infundibulum, and terminating in culs-de-sac near the mouth. **C., Peritoneal,** in the *Plagiostomata*, etc., two canals leading from the peritoneal cavity, one to each side of the cloaca. **C., Perivascular,** the circumvascular lymph spaces. **C. of Petit.** Properly, a space, intersected by numerous fine interlacing fibers, existing between the anterior and posterior laminæ of the suspensory ligament of the crystalline lens. It extends from the periphery of the lens, nearly to the apices of the ciliary process, and transmits the secretion from the posterior chamber. **C., Petro-mastoid,** a small canal not always present, situated at the angle of union between the mastoid and petrous bones. It transmits a small vein from the middle fossa of the skull to the transverse sinus. **C., Petrosal,** two canals

on the upper surface of the petrous portion of the temporal bone, transmitting the large and small superficial petrosal nerves. **C., Plasmatic.** 1. An Haversian canal. 2. In the *Teniadæ*, canals given off from the longitudinal vessels, containing a homogeneous fluid which is supposed to serve for the nutrition of the animal. **C., Poison,** in snakes, the canal in the poison-fang, serving for the ejaculation of the venom. **C., Pore.** See *C., Porous.* **C., Porous,** in the ovule, supposed to serve for the entrance of the spermatozoids in fecundation. **C., Portal.** See *Intralobular, Biliary.* **C., Preputial,** in the lower animals, the sheath of the penis. **C., Primitive,** the neural canal of the embyro. **C., Prosodal,** in sponges, a canal connecting the chamber with the prosopyle. **C., Pseudostomatous,** the processes of branched cells that extend from a sub-epithelial or endothelial layer to the free surface, their free ends forming the pseudostomata. **C., Pterygoid.** See *C., Vidian.* **C., Pterygo-palatine,** one formed by the root of the internal pterygoid plate of the sphenoid bone and the sphenoidal process of the palate bone. It transmits the pterygo-palatine vessels and nerve. **C., Pulmo-aortic.** See *Ductus arteriosus.* **C., Radial,** in the *Ctenophora*, two canals that branch off laterally from the funnel. Each divides into two (the secondary radial), which themselves divide into two (the tertiary radial), which open into the ctenophoral canals. **C. of Recklinghausen,** minute channels supposed to exist in all connective tissue, which are directly continuous with the lymphatic vessels, and hence may be said to form their origin. **C. of Reissner.** See *C., Membranous, of the Cochlea.* **C., Resin.** See *C., Resiniferous.* **C., Resiniferous,** a canal in which resin is secreted. **C., Rhachidian.** See *C., Vertebral.* **C. of Rivinus,** the duct of the sublingual gland. **C. of Rosenthal.** See *C., Spiral, of the Modiolus,* **C., Sacculo-cochlear,** one connecting the sacculus and the cochlea. **C., Sacculo-utricular,** one connecting the sacculus and the utricle. **C., Sacral,** the continuation of the vertebral canal in the sacrum. **C., Sand.** See *C., Madreporic.* **C., Santorini's.** See *C. of Bernard.* **C. of Schlemm,** an irregular space or plexiform series of spaces occupying the sclero-corneal region of the eye; it is regarded by some as a venous sinus, by others as a lymph-channel. **C., Secretory,** an interspace between the cells of vegetable tissue, lined with special cells, secreting various products such as oils, balsams, gum-resins, etc. **C., Semicircular,** bony canals of the labyrinth of the internal ear. They are three in number, the *external, superior,* and *posterior,* and contain the *membranous semicircular canals.* **C., Semicircular, Anterior.** See *C., Semicircular, Superior.* **C., Semicircular, Anterior Vertical.** See *C., Semicircular, Superior.* **C., Semicircular, External,** that one of the semicircular canals of the labyrinth having its plane horizontal and its convexity directed backward. **C., Semicircular, Frontal.** See *C., Semicircular, Superior.* **C., Semicircular, Horizontal.** See *C., Semicircular, External.* **C., Semicircular, Inferior.** See *C., Semicircular, Posterior.* **C., Semicircular, Inner.** See *C., Semicircular, Posterior.* **C., Semicircular, Internal.** See *C., Semicircular, Posterior.* **C., Semicircular, Lateral.** See *C., Semicircular, External.* **C., Semicircular, Osseous.** See *C., Semicircular.* **C., Semicircular, Posterior,** that one of the semicircular canals having its convexity directed backward, and its plane almost parallel to the posterior wall of the pyramid. **C., Semicircular, Posterior Vertical.** See *C., Semicircular, Posterior.* **C., Semicircular, Sagittal.** See *C., Semicircular, Posterior.* **C., Semicircular, Superior,** that one of the semicircular canals having its convexity directed toward the upper surface of the pyramid. **C., Seminal,** the seminiferous tubules. **C., Serous,** any minute canal connected with the lymph vessels and supposed to be filled with lymph. **C., Sheathing,** the communication between the cavity of the tunica vaginalis of the testicle and the general peritoneal cavity. It soon closes in man, leaving the tunica vaginalis a closed sac. **C., Side,** blind canals in the ventral skin of amphioxus, supposed to have a urinary function. **C., Spermatic.** 1. The vas deferens. 2. The inguinal canal in the male. **C., Spheno-palatine.** See *C., Pterygo-palatine.* **C., Spinal.** See *C., Vertebral.* **C., Spiral, of the Cochlea,** one that runs spirally around the modiolus, taking two turns and a half, diminishing in size from the base to the apex, and terminating in the cupola. **C., Spiral, of the Modiolus,** a small canal winding around the modiolus of the base of the lamina spiralis. **C., Spiroid, of the Temporal Bone.** See *Aqueduct of Fallopius.* **C. of Stenson.** See *Stenson's Duct.* **C., Sternal,** in the *Crustacea*, one formed by the union of the mesophragms of the endosternites. **C. of Stiebel,** in certain Mollusca the embryonic renal organ. **C. of Stiega.** See *C. of Laurer.* **C. of Stilling.** See *C., Hyaloid,* and *C., Central, of Spinal Cord.* **C., Stone.** See *C., Madreporic.* **C., Suborbital.** See *C., Infraorbital.* **C., Supraorbital,** one at the upper margin of the orbit. It transmits the supraorbital artery and nerve. **C., Temporal.** See *C., Zygomatico-temporal.* **C., Temporo-malar.** See *C., Zygomatico-temporal.* **C., Thoracic,** the thoracic duct. **C., Tympanic,** one that opens on the lower surface of the petrous bone, between the carotid canal and the groove for the internal jugular vein. It transmits Jacobson's nerve. **C., Urethro-sexual,** in some mammals the vagina and urethra combined. **C., Urinary,** the urethra. **C., Uro-genital.** See *Urogenital Sinus.* **C., Uterine,** the canal of the uterus, including the body and neck. **C., Utero-cervical,** the cavity of the cervix uteri at the time of labor. **C., Utero-vaginal.** 1. The common canal formed by the uterus and vagina. 2. In embryology, the duct of Müller. **C., Vaginal,** the canal of the vagina. **C., Vascular.** See *C., Haversian,* and *C., Cartilage.* **C., Vector,** the oviduct. **C., Venous,** the ductus venosus. **C., Vertebral,** the canal formed by the vertebræ. It transmits the spinal cord and its membranes. **C., Vertebrarterial,** the osseous canal through which the vertebral artery runs. **C., Vestibular.** See *C., Incurrent.* **C., Vidian,** a canal of the sphenoid bone at the base of the internal pterygoid plate, opening anteriorly into the spheno-maxillary fossa, and posteriorly into the foramen lacerum. It transmits the Vidian nerve and vessels. **C., Vitelligene,** in comparative anatomy, canals leading to the vitelligene glands. **C., Vitellin,** a supposed canal leading from the central cavity of the vitellus, in birds' eggs, to the cicatricula. **C., Vulvar,** the vestibule of the vagina. **C., Vulvo-uterine,** the vagina. **C., Vulvo-vaginal.** 1. The vagina and the vulva considered as a single canal. 2. The orifice of the hymen. **C., Water-vascular.** See *C., Aquiferous.* **C. of Wharton.** See *Wharton's Duct.* **C., White, of Malpighi,** in insects, two white convoluted urinary tubules opening into the large intestine. **C. of Wirsung,** the pancreatic duct. **C. of Wolff.** See *Wolffian Duct.* **C., Yellow, of Malpighi,** in insects, two yellowish convoluted tubes opening at the junction of the stomach and intestine; they are regarded as urinary. **C., Zygomatic.** See *C., Zygomatico-temporal* and *C.,*

Zygomatico-facial. **C., Zygomatico-facial.** See *C., Malar.* **C., Zygomatico-temporal,** the temporal canal of the malar bone, running from its orbital to its temporal surface. It transmits a branch of the superior maxillary nerve.

Canalicular (*kan-al-ik'-u-lar*) [*canalis*, a channel]. In biology, canal-shaped.

Canaliculization (*kan-al-ik-u-liz-a'-shun*) [*canaliculus*, a little canal]. The formation of canaliculi, as in bone, or as in calcified cartilage.

Canaliculus (*kan-al-ik'-u-lus*) [L.: *pl., Canaliculi*]. A small canal; especially that leading from the punctum to the lachrymal sac of the eye; and in the plural, the minute canals opening into the lacunæ of bone. See *Bone.*

Canalization (*kan-al-iz-a'-shun*) [*canalis*, a canal]. 1. The formation of canals, as in tissues, etc. 2. A system of wound-drainage without tubes. **C. of the clot,** formation of a channel through a clot in a vessel for the passage of the blood-current, occurring from the 5oth to the 7oth day after ligation. See *Cells, Vasifactive.*

Canarin (*kan'-ar-in*). See *Pigments, Conspectus of.*

Canarium (*kan-a'-re-um*) [E. Ind., *canari*]. A genus of burseraceous trees and shrubs of warm regions. **C., commune** affords a part (at least) of the manila elemi, and also a balsam resembling copaiba. Other species yield similar products.

Canatillo (*kah-nah-tēl'-yo*). See *Tepopote.*

Cancellate (*kan'-sel-āt*) [*cancellare*, to provide with a lattice]. Reticulated, or characterized by latticed lines, as the spongy tissue of bones, or certain leaves consisting entirely of veins.

Cancellation (*kan-sel-a'-shun*) [*cancelli*, lattice-work]. The quality of being cancellate; cancellous structure.

Cancellous (*kan'-sel-us*) [*cancelli*, lattice-work]. Resembling lattice-work. **C. Tissue.** See *Tissue.*

Cancellus (*kan'-sel-us*) [*cancelli*, lattice-work]. A space, or unit of structure, in cancellous bone; any one of the minute divisions in spongy bone. The spongy, lattice-work texture of bone.

Cancer (*kan'-ser*). See *Carcinoma.* **C., Alveolar,** a carcinoma with an alveolar structure. **C. aquaticus.** Synonym of *Stomatitis, Gangrenous.* **C.-bandage,** a crab-shaped bandage; a split-cloth of eight tails. **C.-cell,** a peculiar cell sometimes seen in adenoid cancer and in sarcoma. It was formerly thought to be pathognomonic of the malignant quality of a tumor. **C., Clay-pipe.** See *C., Smokers'.* **C., Colloid,** one containing colloid material. **C. en cuirasse,** disseminated lenticular cancer of the skin. **C.-Juice,** the milky fluid yielded by the cut surface of a hard cancer on scraping. **C., Melanotic,** a malignant pigmented form. **C., Smokers',** epithelioma of the lip due to the irritation of a pipe. **C.-root,** a name of *Epiphegus virginiana, Aphyllon uniflorum, Conopholis americana* and other plants vaunted as cancer-cures. The above are all either root-parasites or saprophytes. Unof. See *Aphyllon. C.-r. Beech-drop,* a name for a plant used as a local application for cancer. **C.-weed,** *Prenanthes alba,* a plant. **C.-wort,** *Linuria spuria* and *L. elatine,* European herbs.

Cancerate (*kan'-ser-āt*) [*καρκίνος*, a crab]. To become cancerous; to be developed into a cancer.

Canceration (*kan-ser-a'-shun*) [*καρκίνος*, a crab]. Development into a cancer; the assumption of malignant qualities by a tumor.

Cancerous (*kan'-ser-us*) [*καρκίνος*, a crab]. Having the qualities of a cancer; malignant.

Canchalagua (*kan-cha-la'-gwah*) [Sp.]. A Spanish-American name for various plants, chiefly of the genus *Erythræa*, (as *E. chilensis, E. venusta, E. trichantha*). They are bitter tonics, with the qualities of gentian. Unof.

Canchasmus (*kan-kaz'-mus*) [*καγκασμός*, loud laughter]. Hysterical or immoderate laughter.

Cancriform (*kang'-krif-orm*) [*cancer*, a crab; *forma*, form]. Resembling a cancer in appearance.

Cancrisocial (*kang-kris-o'-shal*) [*cancer*, a crab; *socius*, a companion]. In biology, a communalistic association of sea-anemonies, sponges, molluscs, etc. on the shell inhabited by a hermit crab.

Cancrivorous (*kang-kriv'-o-rus*) [*cancer*, a crab; *vorare*, to eat]. Applied to animals that feed upon crabs.

Cancroid (*kang'-kroid*) [*cancer*, a crab]. Cancer-like; semi-malignant. **C. Ulcer.** See *Rodent Ulcer.*

Cancroin (*kan'-kro-in*) [*cancer*, a crab]. A substance (said to be identical with neurin), introduced by Adamkiewicz as a material for hypodermatic injection in cases of malignant disease, it being regarded by him as an alexin destructive of cancer-tissue.

Cancrophagous (*kang-kroff'-ag-us*) [*cancer*, a crab; *φαγεῖν*, to eat]. Same as *Cancrivorous.*

Cancrum (*kang'-krum*) [L., "a cancer"]. A cancer or rapidly-spreading ulcer. **C. Oris,** also called *Canker of the Mouth, Gangrenous Stomatitis, Noma, Gangrenous Ulceration of the Mouth.* It is a disease of childhood between the ages of one and five, characterized by the formation of foul, deep ulcers of the buccal surfaces of the cheeks or lips. There is but slight pain, but the prostration is great, and death usually results from exhaustion or blood-poisoning. The disease is generally the result of poor hygienic surroundings acting upon a debilitated system. **C. Nasi,** gangrenous rhinitis of children.

Candela (*kan-de'-lah*) [*candere*, to glow] 1. A medicated candle for fumigation. 2. A wax bougie.

Candle (*kan'-dl*) [*candela*, a candle]. A taper; a bougie. **C.-berry,** the bay-berry, *Myrica cerifera,* or its waxy fruit, from which a greenish wax is obtained. See *Myrica.* **C.-fish Oil.** See *Eulachoni Oleum.* **C.-foot.** See *Unit Quantity of Light.* **C.-house,** an establishment in which candles are manufactured. **C.-power,** in photometry, the candle-power of a lamp is measured by the ratio of the illumination of the light considered to that of a standard candle, both sources being at the same distance from the object illuminated.

Cane Sugar (*kān-shug'-ar*). See *Saccharum.*

Canella (*kan-el'-ah*) [dim. of *Canna*, a reed]. The bark of *C. alba* deprived of its corky layer and dried. It is a native of the West Indies and is an aromatic tonic and bitter stomachic. Dose of the powdered bark, gr. xv–xxx. Officinal in the B. P.

Canelle-Brown. Same as *Phenylene Brown.*

Canescent (*kan-es'-ent*) [*canus*, white or hoary]. In biology, applied to the gray, hoary or white plumage or fur of animals and to the pubescence of plants.

Canestrini, Bacillus of. See *Bacteria.*

Canine (*ka'-nin* or *ka-nin'*) [*canis*, a dog]. Partaking of the nature of, relating to, or resembling a dog, or the sharp tearing-teeth of mammals, located between the incisors and the molars. **C. Appetite,** bulimia, *q. v.* **C. Eminence,** a prominence on the outer side of the upper maxillary bone. **C. Fossa.** See *Fossa.* **C. Laugh,** a sardonic smile, or grin. **C. Madness,** rabies, hydrophobia. **C. Muscle,** the levator anguli oris. See *Muscles, Table of.* **C. Teeth,** dentes canini; cynodontes; dentes laniarii; dents angulaires; cuspidati; conoides; eye-teeth. The cuspid teeth next to the lateral incisors; so called from their resemblance to a dog's teeth.

Caniniform (*kan-in′-if-orm*) [*caninus*, pertaining to the dog; *forma*, shape]. Applied to teeth resembling canines.

Canis (*ka′-nis*) [L., "a dog"]. 1. The dog. 2. A genus of animals. **C. rabiosa.** Synonym of *Hydrophobia.*

Canities (*kan-ish′-e-ēz*) [Lat.]. Poliosis; hoariness; hair-blanching; Trichonosis cana; Trichonosis discolor; a premature or senile, partial or universal decolorization of the hair, the change varying from black or brown through every gradation to the whiteness of wool. This change may be physiologic or pathologic, gradual or rapid, general or confined to localized patches.

Canker (*kang′-ker*) [*cancrum*, a cancer]. An ulceration of the mouth, or any ulcerous or gangrenous sore; cancrum oris; in farriery, a fetid abscess of the horse's foot. See *Cancrum Oris.* **C.-rash.** Synonym of *Scarlet Fever.*

Canna (*kan′-ah*) [κάννα, a cane]. A genus of large-leaved marantaceous plants. **C. indica**, has an acrid and stimulant root; it is alterative, diuretic and diaphoretic. Unof. The rhizome of *C. speciosa* affords *canna-starch*, or tous-les-mois, a good substitute for true arrow-root. **C. Starch.** See *Tous-les-mois.*

Cannabene (*kan′-ab-ēn*). See *Cannabis.*

Cannabin. See *Cannabis.*

Cannabinin (*kan-ab′-in-in*) [*cannabis*, hemp]. A volatile alkaloid from cannabis indica.

Cannabinon, Cannabinone (*kan-ab′-in-ōn*) [*cannabis*, hemp]. An amorphous bitter resinoid from Indian hemp, used as an hypnotic. Dose 1 to 3 grains. Unof.

Cannabis (*kan′-ab-is*) [L.]. Hemp. Indian hemp. The flowering tops of *C. sativa*, of which there are two varieties, *C. indica* and *C. americana*, the former being the more potent. They contain a resin, *cannabin*, and a volatile oil, from which are obtained *Cannabene* $C_{18}H_{20}$, a light hydrocarbon, and *Hydrid of Cannabene*, a crystalline body. It is an antispasmodic, anesthetic, narcotic, and a powerful aphrodisiac. In large doses it produces mental exaltation, intoxication, and a sensation of double-consciousness. It is a valuable hypnotic in delirium tremens, and is useful for painful affections of the bladder and for functional impotence. *Bhang*, *Gunjah*, *Churrus*, and *Hashish* are the various Indian names by which the drug is known. Strychnin and faradism are antagonistic. **C. Indica, Ext.**, dose gr. ⅙–j. **C. Ind., Ext. Fld.**, an alcoholic preparation. Dose ♏j–v. **C. Ind., Tinct.**, contains 15 per cent. of the drug. Dose ♏xx–ʒj. **Cannabin Tannate**, the tannate, a glucosid. Dose as a hypnotic gr. v–x.

Cannabism (*kan′-ab-izm*) [*cannabis*, hemp]. The habitual use of Cannabis indica; ill-health caused by the misuse of Cannabis indica.

Cannabist (*kan′-ab-ist*) [*cannabis*, hemp]. A devotee to the use of Cannabis indica.

Cannel Coal (*kan′-el kōl*). See *Coal.*

Cannoid (*kan′-oid*) [κάννα, a reed; εἶδος, form]. Tubular, as the skeleton of certain radiolarians.

Cannon-bone (*kan′-on bōn*). One of the functional and complete metacarpal or metatarsal bones of a hoofed quadruped, supporting the weight of the body upon the feet.

Cannula (*kan′-u-lah*) [dim. of *canna*, a tube]. A surgical instrument consisting of a tube or sheath obliquely pointed and a stiletto. It is used for tapping and draining tumors and cavities.

Cannulated (*kan′-u-lat-ed*) [*cannula*, a little tube]. Made hollow: as a cannulated needle.

Canquoin's Paste. A paste of flour, water, and zinc chlorid; it is a powerful escharotic.

Cantani's Diet. An exclusive meat-diet in diabetes.

Canterbury Bell (*kan′-ter-ber-e bel*). See *Campanula.*

Cantering Rhythm (*kan′-ter-ing rithm*). See *Bruit de Galop.*

Canthal (*kan′-thal*) [κανθός, a canthus]. Relating to a canthus.

Cantharіasis (*kan-thar-i′-as-is*) [κάνθαρος, a kind of beetle]. A term proposed by Hope for the diseases that originate from the presence in the body of coleopterous insects or their larvæ.

Cantharidal (*kan-thar′-id-al*) [κανθαρίς, a blistering fly]. Relating to or containing cantharides.

Cantharides (*kan-thar′-id-ēz*). Plural of *Cantharis.*

Cantharidin (*kan-thar′-id-in*) [κανθαρίς, a blistering fly], $C_{10}H_{12}O_4$. The bitter principle contained in Spanish flies and other insects; it crystallizes in prisms or leaflets, and melts at 218°. It has an extremly bitter taste, and produces blisters on the skin. See *Cantharis.*

Cantharidism (*kan-thar′-id-izm*) [κανθαρίς, a blistering fly]. Cantharidal poisoning.

Cantharis (*kan′-thar-is*) [κανθαρίς, a blistering fly: *pl.*, *Cantharides*]. Spanish Fly. The dried body of a species of beetle, *C. vesicatoria* (nat. ord. *Coleoptera*). It contains a powerful poisonous principle, *cantharidin*, $C_{10}H_{12}O_4$. Locally applied, cantharis is a rubefacient and vesicant; internally it is an irritant, causing gastralgia and vomiting. In toxic doses it produces severe gastro-enteritis, strangury, and priapism. It is used chiefly as an external counter-irritant in the form of "blisters." **C., acetum** (B. P.), of the strength of ʒij to Oj. **C., Ceratum**, cantharides 32, yellow wax 18, resin 18, lard 22, oil of turpentine 15. **C., Ext., Ceratum**, cantharides 30, resin 15, yellow wax 35, lard 35, alcohol q. s. **C., Charta**, cantharides 1, Canada turpentine 1, olive-oil 4, spermaceti 3, white wax 8, water 10 parts. **Charta epispastica** (B. P.), blistering-paper (white wax, spermaceti, olive-oil, resin, Canada balsam, cantharides, distilled water). **Collodium cantharidatum**, cantharides 60, flexible collodion 85, chloroform q. s. **C. cum picis emplast.**, *Warming Plaster*, Burgundy pitch 92, cerat. canthar. 8 parts. **Emplastrum calefaciens** (B. P.), cantharides, expressed oil of nutmeg, yellow wax, resin, resin-plaster, soap-plaster, boiling water. **C., emplastrum** (B. P.), cantharides, yellow wax, prepared suet, prepared lard, resin. **C., liniment.**, cantharides 15, oil of turpentine q. s. ad 100. **C. Tinct.**, contains 5 per cent. of the drug. Dose ♏j–xx. **C., unguent.** (B. P.), cantharides, yellow wax, olive oil.

Canthectomy (*kan-thek′-to-me*) [κανθός, canthus; ἐκτομή, a cutting out]. Excision of a canthus.

Canthitis (*kan-thi′-tis*) [κανθός, canthus; ιτις, inflammation]. Inflammation of a canthus.

Cantholysis (*kan-thol′-is-is*) [κανθός, canthus; λύσις, a loosening]. Canthotomy with section of the external canthal ligament.

Canthoplastic (*kan-tho-plas′-tik*) [κανθός, the canthus; πλάσσειν, to form]. Relating to canthoplasty.

Canthoplasty (*kan′-tho-plas-te*) [κανθός, the angle of the eye; πλάσσειν, to form]. A surgical operation for increasing the size of the palpebral fissure by cutting the outer canthus.

Canthorraphy (*kan-thor′-a-fe*) [κανθός, canthus; ῥαφή, a seam]. A surgical operation to reduce the size of the palpebral fissure by suture of the canthus.

Canthotomy (*kan-thot′-o-me*) [κανθός, canthus; τόμη, a cutting]. Surgical division of a canthus.

Canthus (*kan′-thus*) [κανθός, canthus]. The inner or outer angle formed by the juncture of the eyelids.

Cantus galli (*kant′-us gal′-i*) [L., "cock-crowing"]. Same as *Child-crowing.*

Canula (*kan'-u-lah*). See *Cannula.*

Canutillo (*kahn-oo-tēl'-yo*). See *Tepopote.*

Caoutchouc (*koo-chook'*) [S. American]. India-rubber. The chief substance contained in the milky juice that exudes upon incision of a number of tropical trees belonging to the natural orders *Euphorbiaceæ*, *Artocarpaceæ*, and *Apocynaceæ*. The juice is a vegetable emulsion, the caoutchouc being suspended in it in the form of minute transparent globules. When pure, caoutchouc is nearly white, soft, elastic, and glutinous; it swells up in water without dissolving; the best solvents are carbon disulphid and chloroform. It melts at about 150° C., and decomposes at 200° C.

Capacity (*kap-as'-it-e*) [*capacitas*, capacity]. Mental receptivity; passive (or active) mental capability; moral or legal responsibility. **C., Vital.** *See Vital.*

Capax Doli (*ka'-paks do'-lī*). See *Doli Capax.*

Capelina (*kap-el-ī'-nah*). See *Capistrum.*

Capeline (*kap'-el-in*). See *Bandage.*

Capeman's Method. See *Treatment, Methods of.*

Caper (*ka'-per*). See *Capparis.*

Capiat (*ka'-pe-at*) [L., "let it take]. An instrument intended for use in removing remnants of the placenta, polypi, or the like, from the uterine cavity.

Capillaire (*kap-il-ār'*) [Fr.]. The plant *Adiantum capillus veneris*, a species of maiden-hair fern; also a cough-syrup prepared from the same. See *Adiantum.*

Capillarity (*kap-il-ar'-it-e*) [*capillus*, a hair]. Capillary attraction: the force that causes fluids to rise in fine tubes or bores, or in very thin chinks. In an electric battery, the disturbing effects of the proper action of a voltaic cell caused by capillary action.

Capillary (*kap'-il-a-re*, or *kap-il'-ar-e*) [*capillus*, a hair]. 1. A minute blood-vessel connecting the smallest ramifications of the arteries with those of the veins. Also a very minute fissure of the skull. Also the intercellular biliary passages. 2. Hair-like: relating to a hair, or to a hair-like filament, or to a tube with a hair-like bore. **C. Attraction** capillarity. **C. Bronchitis.** See *Bronchitis.* **C. Embolism.** See *Embolism.* **C. Fissure, C. Fracture,** a linear fracture, without displacement. **C. Nevus.** See *Nævus Vascularis.* **C. Pulse,** a visible change of color or an artificial blush in aortic regurgitation. **C. Vessels,** the capillaries. **Capillaries, Meigs's,** branching capillaries discovered by A. V. Meigs in the human heart. **C., Pulmonary,** a name used to designate the plexuses beneath the mucous membrane, on the walls and septa of the alveoli of the lungs.

Capilli (*kap-il'-i*) [Plural of *Capillus*, hair]. In biology, applied to the hairs on the front and top of an insect's head.

Capilliculture (*kap-il'-e-kul-chūr*) [*capillus*, hair; *cultura*, culture]. Systematic treatment for the improvement or restoration of the hair.

Capilliculus (*kap-il-ik'-u-lus*) [dim. of *capillus*: *pl.*, *Capilliculi*]. Any one of the very smallest of the capillary vesicles.

Capillifolious (*kap-il-if-o'-le-us*) [*capillus*, hair; *folium*, a leaf]. Characterized by hair-like leaves.

Capilliform (*kap-il'-if-orm*) [*capillus*, hair; *forma*, form]. Hair-shaped.

Capillitium (*kap-il-ish'-e-um*) [*capillus*, the hair]. In biology, the hair-like threads within the spore-cases of many fungi.

Capillus (*kap-il'-us*) [L.: *pl.*, *Capilli*]. A hair; the hair of the head.

Capistrum (*kap-is'-trum*) [L., a muzzle or halter: *pl.*, *Capistra*]. 1. A bandage for the head or for the lower jaw. Called also *Capelina.* 2. In biology, a mask or hood-like coloration of the face and part of the head in certain birds.

Capital (*kap'-it-al*) [*caput*, the head]. 1. Pertaining to the head, or to the summit of a body or object. 2. Of great importance; as a capital operation in surgery.

Capitalis reflexa (*kap-it-a'-lis re-fleks'-ah*). A recurrent bandage for a stump.

Capitate (*kap'-it-āt*) [*caput*, head]. In biology, having a head or a head-like termination.

Capitellate (*kap-it-el'-āt*) [*capitellum*, a little head]. In biology, bearing small heads.

Capitellum (*kap-it-el'-um*) [dim. of *caput*]. The rounded, external surface of the lower end of the humerus.

Capituluvium (*kap-it-el-u'-ve-um*) [*caput*, head; *luere*, to wash]. A washing or bathing of the head; a wash for the head.

Capitopedal (*kap-it-o-ped'-al*) [*caput*, a head; *pes*, foot]. In biology, pertaining to or near the junction of the head and foot.

Capitular (*kap-it'-u-lar*) [*caput*, head]. Pertaining to a capitulum or head. **C. Process** of a vertebra, one with which the head of a rib articulates.

Capitulum (*kap-it'-u-lum*) [*capitulum*, a small head]. In anatomy and biology, the enlarged terminal portion of an organ, plant, or animal, as the head of a bone; the enlarged free portion of a stalked animal; the knobbed end of an antenna or of an insect's poiser; a dense cluster or head of flowers, leaves, or spores in plants. **C. of Santorini,** a small elevation on the apex of the arytenoid cartilage corresponding in position to the posterior extremity of the vocal band.

Cappa (*kap'-ah*). The ectocinereal lamina of the mesencephal.

Cappagh Brown. See *Pigments, Conspectus of.*

Capparis (*kap'-ar-is*) [L., the caper-bush]. A genus of shrubs including the caper-bush, *C. spinosa.* Its flower-buds (capers) are pickled, or made into a piquant sauce. The bark of the root and the flowers are official remedies in some countries (as Spain); it is diuretic, cathartic, depurative, stimulant. Unof.

Cappazwoli's Test. See *Tests, Table of.*

Capped Elbow (*kapd el'-bow*). See *Shoe-boil.*

Capped Hock (*kapd' hok*). In farriery, the development of a bruise at the point of the hock of a horse, with the formation of an hygroma, the result of rubbing or striking that part against the partition of the stall.

Capped Knee (*kapd' ne*). A dropsical collection in the bursa in front of the knee-joint of the horse.

Capranica's Tests. See *Tests, Table of.*

Caprantilopine (*kap-ran-til'-o-pin*) [*capra*, a she-goat; *antilopinus*, antelope]. Uniting the characters of a goat and an antelope.

Capre (*kap'-er*). See *Mulatto.*

Capreolar (*kap-re'-o-lar*), **Capreolary** (*kap'-re-o-la-re*), **Capreolate** (*kap'-re-o-lāt*) [*capreolus*, a tendril]. In biology, climbing, furnished with tendrils; in anatomy, resembling tendrils, as the spermatic vessels, *vasa capreolaria.* **C. Vessels,** the spermatic vessels, from their twined and twisted appearance.

Capreolus (*kap-re'-o-lus*) [*capreolus*, a wild goat; a tendril of a plant]. 1. A buck or he-goat. 2. The tendril of a plant.

Capric Acid (*kap'-rik as'-id*). See *Acid.*

Caprification (*kap-rif-ik-a'-shun*) [*caprificus*, the wild-fig tree]. In biology, the process of hastening fertilization and ripening of cultivated figs by the introduction of gall-insects, by hanging a branch of the wild fig in the tree, or planting a wild fig in the midst of the fig orchard.

Caprify (*kap'-rif-i*) [*caprificus*, the wild-fig tree]. To fertilize by means of *Caprification*, *q. v.*

Capriloquium (*kap-ril-o′-kwe-um*) [*caper*, a goat; *loqui*, to speak]. Same as *Egophony*.

Caprin (*kap′-rin*) [*caper*, a goat]. An oily and flavoring constituent of butter; glycerin caprate.

Caproic Acid (*kap-ro′-ik as′-id*). See *Acid*.

Caprolactone (*kap-ro-lak′-tōn*) [*caper*, a goat; *lac*, milk], $C_6H_{10}O_2$. A compound obtained from bromcaproic acid on heating the latter with water. It is a liquid boiling at 200°.

Caprone (*kap′-rōn*) [*caper*, a goat], $C_{11}H_{22}O$. Caproic ketone; a clear, volatile oil found in butter, and forming the larger part of the oil of rue.

Caproylamin (*kap-ro-il′-am-in*) [*caper*, a goat; *amin*], $C_6H_{15}N$. Hexylamin. A ptomaïne found in the putrefaction of yeast.

Caprylic Acid (*kap-ril′-ik as′-id*). See *Acid*.

Capsella (*kap-sel′-ah*) [dim. of *capsa*, a box]. The leaves and stems of *C. bursa pastoris*, common in temperate climates. It is considered an excellent hemostatic and antiscorbutic, and is slightly stimulant and astringent. Unof. **C. bursa pastoris.** See *Shepherd's Purse*.

Capsicin (*kap′-sis-in*), $C_9H_{14}O_2$. The active principle of Cayenne pepper. It is a thick, yellowish-red substance, scarcely flowing at ordinary temperatures, but becoming very limpid if warmed. See *Capsicum*.

Capsicol (*kap′-sik-ol*) [*capsicum*; *oleum*, oil]. A red oil obtainable from the oleo-resin of capsicum.

Capsicum (*kap′-sik-um*) [*capsa*, a box; *gen.*, *Capsici*]. Cayenne Pepper. The fruit of *C. fastigiatum*, native to tropical Africa and America. Its odor and hot taste are due to a volatile oil, *capsicin*, $C_9H_{14}O_2$, which is irritant to the skin and mucous membranes. Internally, it is a stomachic tonic, diuretic and aphrodisiac. It is useful in atonic dyspepsia, flatulent colic, and in intermittent fever. **C., emplastrum,** prepared from the oleoresin and resin plaster. **C., Ext. Fld.** Dose ♏v–ʒj. **C., linimentum,** 1 in 10, for chest affections, rheumatism, etc. **C., Oleoresin, Ethereal.** Dose ♏j–v. **C., Tinct.,** contains 5 per cent. of capsicum. Dose ♏x–ʒj.

Capsitis (*kap-si′-tis*). Same as *Capsulitis*.

Capsula (*kap′-su-lah*) [*capsula*, a small box]. The internal capsule of the brain; it is the thick layer of fibers between the caudatum and thalamus mesad and the lenticula laterad; it is continuous with the crura caudad, and its expansion is called the *corona*.

Capsular (*kap′-su-lar*) [*capsula*, a small box]. Pertaining to a capsule. **C. Artery,** the middle suprarenal artery. See *Arteries, Table of*. **C. Ligament,** the sac or membranous bag that surrounds every movable joint or articulation. It contains the synovial fluid. **C. Vein,** the supra- renal vein. See *Vein*.

Capsule (*kap′-sūl*) [dim. of *capsa*, a chest]. A tunic or bag that encloses a part of the body or an organ. In biology, the investment of a part or organ, as a dehiscent pod or seed-vessel, the egg-case of an insect, the test of a radiolarian. Also, in pharmacy, a small, spheroidal shell composed of glycerin and gelatin, divided so that the parts fit together like a box and cover. It is used for the administration of nauseous and repulsive medicines. **C., Bonnet's,** the posterior portion of the sheath of the eyeball. **C., Bowman's.** See *Bowman's Capsule*. **C., External,** a layer of white nerve-fibers forming part of the external boundary of the lenticular nucleus. **C.-filler,** a contrivance consisting of a funnel, tube and plunger, or other device, used for introducing medicines into capsules. **C. of Glisson,** the cellulo-vascular membrane enveloping the hepatic vessels. **C., Internal,** a layer of nerve-fibers beneath and on the inner side of the optic thalamus and caudate nucleus, which it separates from the lenticular nucleus, and containing the continuation upward of the crus cerebri. **C. of the Lens,** a transparent, structureless membrane enclosing the lens of the eye. **C., Malpighian,** the commencement of the uriniferous tubules. See *Malpighian Bodies*. **C., Suprarenal,** the ductless glandular body at the apex of each kidney. **C. of Tenon,** the *tunica vaginalis* of the eye.

Capsuliferous (*kap-sūl-if′-er-us*) [*capsula*, a little box; *ferre*, to bear]. In biology, producing capsules.

Capsulitis (*kap-su-li′-tis*) [*capsula*, a small box; *ιτις*, inflammation]. Inflammation of the capsule of the lens, or of the fibrous capsule of the eyeball.

Capsulo-ciliary (*kap-su-lo-sil′-e-a-re*) [*capsula*, a little box; *cilium*, an eyelid]. Relating to the capsule of the lens and to the ciliary organ.

Capsulogenous (*kap-sūl-oj′-en-us*) [*capsula*, a little box; *gena*, born]. Capsule-producing, as the cocoon or capsule-glands of the earthworm.

Capsulo-lenticular (*kap-su-lo-len-tik′-u-lar*) [*capsula*, a little box; *lenticula*, a lentil]. Relating to the lens and to its capsule.

Capsulo-pupillary (*kap-su-lo-pu′-pil-a-re*) [*capsula*, a little box; *pupilla*, the pupil of the eye]. Relating to the capsule of the lens and to the pupil.

Capsulotome (*kap′-su-lo-tōm*). See *Cystotome*.

Capsulotomy (*kap-su-lot′-o-me*) [*capsula*, a capsule; *τέμνειν*, to cut]. The operation of rupturing the capsule of the crystalline lens in cataract-operations.

Captage (*cap-tahj′*) [Fr.]. The measures to be applied to a natural spring of water, to secure the entire product of the spring, and the purity of the water, by the prevention of any admixture of deleterious or foreign matter.

Captation (*kap-ta′-shun*) [*captare*, to desire]. The first or opening stage of the hypnotic trance.

Capucin Madder (*kap′-u-sin mad′-er*). See *Pigments, Conspectus of*.

Capuron, Cardinal Points of. See *Pelvis*.

Caput (*kap′-ut*) [L.]. 1. The head; also the chief part or beginning of an organ. 2. The cephalic or precornual portion of the caudatum of the prosencephal. **C. coli,** the head of the colon. **C. cornu posterioris.** Same as *C. gelatinosum*. **C. gallinaginis.** See *Verumontanum*. **C. gelatinosum,** the name given to the translucent gray matter covering the dorso-mesal periphery of the dorsal horn of the spinal cord. It is a nervous substance composed of numerous closely crowded nerve-elements, with an intricate intervening plexus of very fine nerve-fibrils, derived from the dorsal (posterior or "sensory") nerve-roots. **C. medusæ.** See *Medusæ, Caput*. **C. obstipum.** Synonym of *Wry-neck*. **C. quadratum,** the rectangular head of rickets, flattened upon the top and at the sides, with projecting occiput and prominent frontal bosses. **C. succedaneum,** a tumor composed of a sero-sanguineous infiltration of the connective tissue situated upon the presenting part of the fetus.

Caraboid (*kar′-ab-oid*) [*κάραβος*, a carabus; *εἶδος*, form]. In biology, the second larval stage of certain insects.

Carajura (*kar-ah-ju′-rah*) [Brazil]. Same as *Chica Red*.

Caramania Gum. See *Bassora Gum*.

Caramel (*kar′-am-el*) [Fr., burnt sugar]. Cane-sugar deprived of two molecules of water. It is a viscid, brown-colored liquid.

Caranna (*kar-an′-ah*) [Sp., *carañna*]. An aromatic oleoresin produced by the tree *Protium carana*, of tropical America; it was formerly used in plasters: also a name for similar gummy resins from *Icica altissima*, *Bursera acuminata*, etc., all tropical American trees.

Carapa (*kar'-ap-ah*) [*caraipi*, a native Guiana name]. A genus of tropical meliaceous trees. **C. guianensis** has an antispasmodic and febrifuge bark, and its seeds afford carapa oil, a protective against insects and vermin. **C. touloucouna**, of W. Africa, and **C. indica**, of Asia, have similar properties. Unof.

Carate (*kah-rah'-te*) [S. America]. 1. A skin-disease local in tropical America, marked by blue, brown, scarlet, or rosy patches on the skin; it is usually confined to persons not of the white race. 2. A kind of camphor produced in S. America from the plant *Momordica charantia*.

Carauna (*kar-aw'-nah*). See *Caranna*.

Caraway (*kar'-ah-wa*). See *Carum*.

Carbacidometer (*kar-as-id-om'-et-er*) [*carbo*, a coal; *acidum*, acid; *μέτρον*, a measure]. A form of air-tester for estimating the amount of carbonic acid gas in the atmosphere of a room or compartment.

Carbamic Acid (*kar-bam'-ik as'-id*). See *Acid*.

Carbamid (*kar'-bam-id*, or *-mīd*) [*carbo*, a coal; *amid*], CH_4N_2O. Urea. Amid of carboxyl. It is prepared from urine, and crystallizes in long, rhombic prisms or needles that have a cooling taste. It is soluble in one part of cold water and in five parts of alcohol, but almost insoluble in ether; it melts at 132°; at a higher temperature it decomposes into ammonia, ammelid, biuret, and cyanuric acid; it is found in urine and in various animal fluids.

Carbanil (*kar'-ban-il*) [*carbo*, a coal; *anilin*], C_7H_5NO. Phenyl isocyanate; a compound produced in the distillation of oxanilid. It is a mobile liquid, boiling at 163°, and has a pungent odor, provoking tears.

Carbanilamid (*kar-ban-il'-am-id*) [*carbo*, a coal; *anilin; amid*], $C_7H_8N_2$. Phenylurea; prepared by evaporating the aqueous solution of anilin hydrochlorid and potassium isocyanid. It forms needles easily soluble in hot water, alcohol, and ether, and melting at 144–145°.

Carbanilid (*kar-ban'-il-id*) [*carbo*, coal; *anilin*], $C_{13}H_{12}N_2O$. Diphenyl urea; a compound formed by the action of phosgene gas on anilin, or by heating carbanilamid with anilin to 190°. It consists of silky needles, easily soluble in alcohol and ether, but sparingly soluble in water, and melts at 235°.

Carbasus (*kar'-bas-us*) [*κάρβασα*, cotton]. Gauze; thin muslin used in surgery. **C. carbolata** (N. F.), carbolized gauze. **C. iodoformata** (N. F.), iodoform gauze.

Carbazol (*kar'-baz-ol*) [*carbo*, coal; *azotum*, nitrogen], $C_{12}H_9N$. Diphenylimid; a body produced when the vapors of anilin are conducted through a tube heated to redness. It is a by-product in the manufacture of anilin. It dissolves in hot alcohol, ether, and benzene, and crystallizes in colorless leaflets that melt at 238°.

Carbazotate (*kar-baz-o'-tāt*) [*carbo*, a coal; *azotum*, nitrogen]. Same as *Picrate*.

Carbazotic Acid (*kar-baz-ot'-ik*). See *Picric Acid*.

Carbo (*kar'-bo*) [L.]. A coal; charcoal. **C. animalis**, animal charcoal; bone-black; it is used in pharmacy and in manufacturing chemistry largely as a decolorizing-agent and as a filter. **C. animalis purificatus**, purified animal charcoal. **C. ligni**, wood-charcoal; an absorbent, disinfectant, and deodorizer, used in poulticing wounds and dressing ulcers. Given powdered, in capsules, it relieves gastric irritation.

Carbohydrate (*kar-bo-hi'-drāt*) [*carbo*, coal; *ὕδωρ*, water]. An organic substance containing hydrogen and oxygen in the proportion in which they form water: that is, twice as many hydrogen as oxygen atoms, and usually six carbon atoms or some multiple of six. The carbohydrates form a large group of interesting organic compounds, and may be arranged into three groups: the *glucoses* (*monoses*); the *disaccharids*, or *sugars*; and the *polysaccharids*. The *glucoses* are the aldehyd-derivatives or ketone-derivatives of the hexahydric alcohols, into which they may be converted by the absorption of two hydrogen atoms. They are mostly crystalline substances, very soluble in water, but dissolving with difficulty in alcohol. They possess a sweet taste The *disaccharids* and *polysaccharids* are ethereal anhydrids of the glucoses. All of them may be converted into the glucoses by hydrolytic decomposition. The disaccharids are ether-like anhydrids of the hexoses. A *Table of Carbohydrates* is added. **C., Test for.** See *Tests, Table of*.

SERIES OF THE CARBOHYDRATES.

1. GLUCOSES.

Name.	Formula.	Fermentation.	Optic Activity.	Reducing Power.
Monoses. Glycerose,	$C_3H_6O_3$	. . .	. . .	. . .
Erythrose,	$C_4H_8O_4$	. . .	. . .	. . .
Pentoses. Arabinose,	$C_5H_{10}O_5$	Unfermentable.	. . .	Reduces Fehling's solution.
Xylose,	$C_5H_{10}O_5$	Unfermentable.	. . .	Reduces Fehling's solution.
Rhamnose,	$C_6H_{12}O_5$	Unfermentable.	. . .	Reduces Fehling's solution.
Hexoses. Mannose,	$C_6H_{12}O_6$	Fermented by yeast.	Exists in three forms: 1, dextro-rotatory; 2, levo-rotatory; 3, inactive.	Reduces Fehling's solution.
Glucose,	$C_6H_{12}O_6$	Fermented by yeast.	Exists in three forms: 1, dextro-rotatory; 2, levo-rotatory; 3, inactive.	Reduces Fehling's solution.
Galactose,	$C_6H_{12}O_6$	Fermented by yeast.	Dextro-rotatory.	Reduces Fehling's solution.
Fructose,	$C_6H_{12}O_6$	Fermented by yeast.	Levo-rotatary.	Reduces Fehling's solution.

SERIES OF THE CARBOHYDRATES.—*Continued.*

1. GLUCOSES.

NAME.	FORMULA.	FERMENTATION.	OPTIC ACTIVITY.	REDUCING POWER.
Sorbinose, ...	$C_6H_{12}O_6$	Unfermentable by yeast.	. . .	Reduces Fehling's solution.
Methyl-hexose, . . .	$C_7H_{14}O_6$	. . .	. . .	. . .
Heptoses. Manno-heptose, . .	$C_7H_{14}O_7$	Unfermentable by yeast.	. . .	. . .
Gluco-heptose, . . .	$C_7H_{14}O_7$	Unfermentable by yeast.	. . .	. . .
Gala-heptose, ...	$C_7H_{14}O_7$	Unfermentable by yeast.	. . .	. . .
Methyl-heptose, . .	$C_8H_{16}O_7$	Unfermentable by yeast.	. . .	. . .
Octoses. Manno-octose, . . .	$C_8H_{16}O_8$	Unfermentable by yeast.	. . .	. . .
Nonoses. Manno-nonose, . . .	$C_9H_{18}O_9$	Fermented by yeast.	. . .	Reduces Fehling's solution.

2. DISACCHARIDS.

Saccharose (Cane-Sugar), ...	$C_{12}H_{22}O_{11}$	Unfermentable by yeast.	Dextro-rotatory.	Does not reduce Fehling's solution.
Lactose (Milk-Sugar),	$C_{12}H_{22}O_{11} + H_2O$	Fermented by yeast.	Dextro-rotatory.	Reduces Fehling's solution on boiling.
Maltose, ...	$C_{12}H_{22}O_{11} + H_2O$	Fermented by yeast.	Dextro-rotatory.	Reduces Fehling's solution.
Mycose (Trehalose), .	$C_{12}H_{22}O_{11} + 2H_2O$	Fermented by yeast.	Dextro-rotatory.	Does not reduce Fehling's solution.
Melebiose, ...	$C_{12}H_{22}O_{11}$	. . .	. . .	. . .

3. TRISACCHARIDS.

Melitose (Raffinose), .	$C_{18}H_{32}O_{16} + 5H_2O$	Fermented by yeast.	Dextro-rotatory.	Does not reduce Fehling's solution.
Melezitose, ...	$C_{18}H_{32}O_{16} + 2H_2O$	. . .	Dextro-rotatory.	. . .

4. POLYSACCHARIDS.

NAME.	FORMULA.	OPTIC ACTIVITY.	IODIN REACTION.	REDUCING POWER AND FERMENTATION.
Starch (Amylum), . .	$C_6H_{10}O_5$, or $C_{36}H_{62}O_{31}$	Dextro-rotatory.	Blue coloration.	Fermentable.
Paramylum, ...	$C_6H_{10}O_5$	. . .	Negative.	. . .
Lichenin (Moss-starch),	$C_6H_{10}O_5$	Dextro-rotatory.	Dirty blue color.	. . .
Inulin, ...	$C_6H_{10}O_5$	. . .	Yellow color.	. . .
Glycogen (Animal starch), ...	$C_6H_{10}O_5$	Dextro-rotatory.	Reddish-brown color.	Fermentable.
Cellulose, ...	$C_{12}H_{20}O_{10}$	Dextro-rotatory.	Blue color.	. . .
The Gums. Dextrin, ...	$C_6H_{10}O_5$	Dextro-rotatory.	. . .	Does not reduce Fehling's solution. Unfermentable.
Arabin, ...	$(C_6H_{10}O_5)_2 + H_2O$	Dextro-rotatory.	. . .	Does not reduce Fehling's solution. Unfermentable.
Bassorin (Vegetable Gum), ...	$C_6H_{10}O_5$	Dextro-rotatory.	. . .	Does not reduce Fehling's solution. Unfermentable.

Carbohydraturia (*kar-bo-hi-drat-u'-re-ah*) [*carbohydrate*; *οὖρον*, urine]. The presence of an abnormally large proportion of carbohydrates in the urine.

Carbolic (*kar-bol'-ik*) [*carbo*, a coal; *oleum*, oil]. Containing or derived from coal-tar oil. **C. Acid.** See *Acid, Carbolic.* **C. Mask**, Curschmann's respirator for use in fetid bronchitis. It is fastened in front of the nose and mouth, and contains cotton in a special receptacle, impregnated with carbolic acid, equal parts of carbolic acid and alcohol, turpentine, creasote, etc.

Carbolism (*kar'-bol-izm*) [*carbo*, a coal; *oleum*, oil]. Carbolic-acid poisoning: a diseased state induced by the misuse or maladministration of carbolic acid.

Carbolize (*kar'-bol-iz*) [*carbo*, a coal; *oleum*, oil]. To impregnate with carbolic acid. To render aseptic or antiseptic by the use of carbolic acid.

Carboluria (*kar-bol-u'-re-ah*) [*carbo*, a coal; *oleum*, oil; *οὖρον*, urine]. The presence of carbolic acid in the urine, producing a dark discoloration. It is one of the signs of carbolic-acid poisoning.

Carbon (*kar'-bon*) [*carbo*, charcoal]. Charcoal. C = 12; quantivalence II, IV. A non-metal occurring in the various forms of diamond, graphite or "black lead," and charcoal. In medicine only the last named form is employed, which may be,—**C., Animal**, useful as a deodorant and disinfectant, as it readily absorbs and aids in oxidizing many gases. It is used internally to absorb fermenting products of digestion. **Carbo animal., purificat.**, purified animal charcoal. Dose gr. xx–℥ j. **C. Cataplasma** (B. P.), charcoal poultice; wood-charcoal 1, bread-crumb 1, linseed meal 3, boiling water 20. **C. dioxid**, the acid, gaseous product, having the composition of CO_2, commonly known as "carbonic acid gas," or carbonic acid. It is a colorless gas having a sp. gr. of 1.52, soluble in cold water, and possessing a pungent smell and an acid taste. Inhaled, it destroys animal life by asphyxiation. In solution, it is an excellent refrigerant and stomachic. Its inhalation is fatal in a short time, even when diluted with 95 parts of air. It is a product of respiration. It is used in medicine for inhalation in whooping cough, asthma, and to stop hiccough. It is also used as a local anesthetic in minor surgery. **C. disulphid**, bisulphid of carbon, CS_2, a colorless, transparent liquid of offensive odor, highly inflammable, very poisonous. A good solvent for caoutchouc. A diluted spray of it is recommended in diphtheria. Dose ♏ ss–j. **Carbo ligni**, wood charcoal. **C. monoxid**, CO, carbonic oxid, a colorless, tasteless, and inodorous gas, one of the products of imperfect combustion. When inhaled it is actively poisonous. **C. tetrachlorid**, CCl_4, anesthetic, recommended locally for asthma, by inhalation. Unof. See *Anesthetic.* **C. oxysulphid**, a body, COS, formed by conducting sulphur vapor and carbon monoxid through red-hot tubes; it is a colorless gas, with a faint and peculiar odor. It unites readily with air, forming an explosive mixture. It is soluble in an equal volume of water. It is present in the waters of some mineral springs.

Carbonaphtholic Acid (*kar-bon-af-thol'-ik*). See *Acid alpha-oxynaphthoic.*

Carbonemia (*kar-bon-e'-me-ah*) [*carbon*, charcoal; *αἷμα*, the blood]. A word denoting the accumulation of carbon dioxid in the blood.

Carbonic Acid (*kar-bon'-ik as'-id*). See *Carbon dioxid.*

Carbonis detergens, Liquor. See *Pix.*

Carbonization (*kar-bon-iz-a'-shun*) [*carbo*, coal]. The process of decomposing organic substances by heat without air, until the volatile products are driven off and the carbon remains.

Carbonyl (*kar'-bon-il*) [*carbo*, charcoal]. A hypothetic organic radical having the formula CO.

Carbostyril (*kar-bo-stir'-il*) [*carbo*, charcoal; *styrax*, storax], C_9H_7NO. Oxyquinolin; a compound prepared by digesting quinolin with a bleaching-lime solution. It crystallizes from hot water in fine needles, and from alcohol in large prisms, that melt at 198–199°.

Carboxyl (*kar'-boks-il*) [*carbo*, charcoal; *ὀξύς*, sharp]. The atomic group, CO.OH, characteristic of the organic acids. The hydrogen of this can be replaced by metals, forming salts.

Carbuncle, or **Carbunculus** (*kar'-bung-kel*, or *kar-bung'-ku-lus*) [*carbo*, a live coal]. A hard, circumscribed, deep-seated, painful inflammation of the subcutaneous tissue, accompanied by chill, fever, and constitutional disturbance. It differs from a boil in having greater size, a flat top, and several points of suppuration. It is erroneously called anthrax.

Carbuncular (*kar-bung'-ku-lar*) [*carbo*, a live coal]. Pertaining to a carbuncle. **C. Disease.** See *Anthracosis.*

Carbunculo contagioso. Synonym of *Anthrax.*

Carbyl (*kar'-bil*) [*carbo*, charcoal; *ὕλη*, matter]. A name given by Magnus to the hydrocarbon ethylene when it acts as a basic radical.

Carbylamin (*kar-bil'-am-in*) [*carbo*, charcoal; *amin*]. 1. A name for hydrocyanic acid. 2. One of a series of compounds parallel to, and isomeric with, the nitrites, characterized by their ready decomposition by dilute acids into formic acid and amins. They are colorless liquids that can be distilled, and possess an exceedingly disgusting odor. They are sparingly soluble in water, but readily soluble in alcohol and ether.

Carcassonne's Ligament. See *Ligament.*

Carcerule (*kar'-ser-ool*) [*carcer*, a prison]. In biology, a many-celled, many-seeded, indehiscent pericarp.

Carcharodont (*kar-kar'-o-dont*) [*κάρχαρος*, sharp, jagged; *ὀδούς*, tooth]. In biology, having compressed, trenchant, acute, pointed teeth, as sharks and snakes.

Carcinoid (*kar'-sin-oid*) [*καρκίνος*, a crab; *εἶδος*, shape]. In biology, crab-like.

Carcinology (*kar-sin-ol'-o-je*) [*καρκίνος*, a crab; *λόγειν*, to speak]. The systematized knowledge of crustaceans, or crabs, etc., a department of zoölogy.

Carcinoma (*kar-sin-o'-mah*) [*καρκίνωμα*; *καρκίνος*, a crab, thus called from the appearance of the veins]. A malignant tumor, characterized by a network of connective tissue whose areolæ are filled with cell-masses resembling epithelial cells. See *Tumors, Table of.* **C., Chimney-Sweepers'.** See *Epithelioma.* **C., colloid (Alveolar)**, affects chiefly the alimentary canal, uterus, peritoneum, etc.; the delicate connective-tissue stroma is filled with colloid matter in alveoli, or cysts. **C. cutis**, cancer of the skin. See *Epithelioma.* **C., desmoid.** See *Hodgkin's Disease.* **C., encephaloid**, is of rapid growth, with a small amount of stroma, large alveoli, and greater amount of cells and blood-vessels. *Hematoid* (bloody), *Osteoid* (in bones), *Villous* (papillary), etc., are other varieties, encephaloid in character. **C., epitheliomatous**, or **squamous-celled**, the cells resemble squamous epithelium, and they invade the adjacent tissue in a columnar manner. **C. lenticulare**, the most common form of cutaneous scirrhus. It begins as small, shot-sized, flattish, red papules, that enlarge to the size of a pea, bean, or filbert, most of them projecting above the surface, while others are subcutaneous. They are generally seated on a red or violaceous surface, and these coalesce into large irregular masses that sooner or later break down, ulcerate, and fungate, sometimes bleeding profusely.

The patient soon dies of exhaustion. **C., lipomatous,** contains cells infiltrated with fat. **C., medullary.** Same as *C., Encephaloid.* **C. melanodes,** similar to *C. Lenticulare,* but marked by dark-blue, brown or black papules, that break into fungous growths. **C., melanotic,** has cells filled with dark pigment. **C., scirrhous,** or **Hard,** most commonly in the breast; it has a stout fibrillated stroma, closely packed with large nucleated cells. **C. tuberosum,** a rarer form of cutaneous scirrhus in which the nodules are of a larger size, even up to that of a hen's egg. The patient speedily dies of exhaustion consequent upon ulceration of the tubercles. **C., Stiles's Test for;** the excised part is washed in a five per cent. solution of nitric acid for ten minutes, washing it then in cold water for five minutes. The carcinomatous tissue appears a dull-white, the normal tissue translucent.

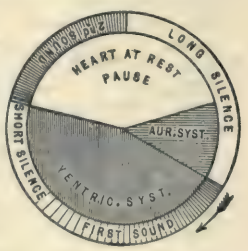
Carcinomatous (*kar-sin-o'-mat-us*) [καρκίνος, a crab]. Relating to or affected with carcinoma.

Carcinomorphic (*kar-sin-o-mor'-fik*) [καρκίνος, a crab; μορφή, form]. In biology, resembling a crab.

Carcinophagous (*kar-sin-off'-ag-us*) [καρκίνος, a crab; φαγεῖν, to eat]. Feeding upon crabs and other crustaceans.

Carcinosis (*kar-sin-o'-sis*) [καρκίνος, a crab]. 1. A cancerous cachexia; a tendency to the development of malignant disease. 2. A form of cancer, usually fatal, beginning generally in the uterus or the stomach and spreading to the peritoneum. **C., Acute,** rapidly fatal carcinosis. **C., Miliary,** carcinosis in minute foci.

Carcinus (*kar'-sin-us*) [καρκίνος, crab]. Same as *Cancer,* or *Carcinoma.*



Cardamom (*kar'-dam-om*). See *Cardamomum.*

Cardamomum (*kar-dam-o'-mum*) [L.; *gen. Cardamomi*]. Cardamom. The fruit of *Elettaria repens,* cultivated in Malabar. Its properties are due to a volatile oil, $C_{10}H_{16}$. It is an aromatic, carminative stomachic, used as an ingredient of several "bitters." It is useful when combined with purgatives to prevent griping. **C., infusum.** Unof. Consists of cardamom ʒj, water O½. Dose a wineglassful. **C., Tinct.,** 10 per cent. strength. Dose ʒj–ij. **C., Tinct. Comp.,** cardamom 20, cinnamon 20, caraway 10, cochineal 5, glycerin 60, dilute alcohol, *q. s.* ad 1000 parts. Dose ʒj–ij.

Carden's Operations. See *Operations, Table of.*

Cardia (*kar'-de-ah*) [καρδία, the heart]. The heart. **C. of the Stomach,** the esophageal orifice of the stomach.

Cardiac (*kar'-de-ak*) [καρδία, the heart]. Pertaining to the heart. **C. Aspect,** that nearest the heart. **C. Cycle,** the total cardiac movement or revolution. **C. Dropsy.** See *Dropsy.* **C. Dulness,** the region covering the position of the heart, as shown by percussion. **C. Dyspnea.** See *Dyspnea.* **C. Epilepsy,** a rare affection, with intense pain in the region of the heart, occurring in paroxysms. This paroxysm usually follows a momentary loss of consciousness, and at times is associated with twitching of the facial muscles and other spasmodic movements. **C. Facies.** See *Facies.* **C. Ganglia,** lie in the grooves and substance—the principal are **Remak's** and **Bidder's,** the first on the surface of the sinus venosus, and the latter (two) at the auriculo-ventricular groove. See *Ganglia, Table of.* **C. Impulse,** the elevation caused by the movement of the heart, usually seen in the fifth left intercostal space. **C. Murmurs.** See *Murmurs.* **C. Orifice,** of the stomach, the esophageal orifice. **C. Passion,** pain in the heart, or the stomach. **C. Plexus.** See *Plexus.* **C. Rhythm,** the term given to the normal regularity in the force and volume of the individual heart-beats. In cases of cardiac insufficiency this regularity is disturbed to a greater or less degree, as is also the interval between the beats, and this condition has been termed *arrhythmia.* The name *allorrhythmia* has been applied to various perversions of rhythm. These abnormal conditions are due very probably to some derangement of the intrinsic nerve-apparatus of the heart, and are considered as unfavorable indications.

CARDIAC CYCLE.

The inner circle shows the events that occur in the heart; the outer circle shows the relations of the sounds and silences to the events.

Cardiagra (*kar-de-a'-grah*) [καρδία, heart; ἄγρα, seizure]. Gouty attack of the heart.

Cardialgia (*kar-de-al'-je-ah*) [καρδία, heart; ἄλγος, pain]. A term loosely used as a synonym of gastrodynia in general, heartburn, and stomachic pains on the left side.

Cardiamorphia (*kar-de-am-or'-fe-ah*) [καρδία, heart; ἀ priv.; μορφή, form]. Deformity or malformation of the heart.

Cardianastrophe (*kar-de-an-as'-tro-fe*) [καρδία, heart; ἀναστροφή, a turning back]. Displacement of the heart to the right side of the chest.

Cardianeuria (*kar-de-ah-nu'-re-ah*) [καρδία, heart; ἀ priv.; νεῦρον, a nerve]. Lack of nerve-stimulus to the heart.

Cardiant (*kar'-de-ant*) [καρδία, the heart]. 1. Affecting the heart. 2. A remedy that affects the heart.

Cardiarctia (*kar-de-ark'-te-ah*) [καρδία, heart; *arctus,* bound]. Cardiac stenosis.

Cardiasthma (*kar-de-az'-mah*) [καρδία, heart; ἆσθμα, asthma]. Dyspnea or so-called asthma due to heart-disease.

Cardiatelia (*kar-de-ah-te'-le-ah*). See *Atelocardia.*

Cardiatrophia (*kar-de-at-ro-'-fe-ah*) [καρδία, heart; ἀτροφία, wasting]. Atrophy of the heart.

Cardiauxe (*kar-de-awks'-e*) [καρδία, heart; αὐξη, increase]. Enlargement of the heart.

Cardicentesis (*kar-de-sen-te'-sis*). See *Cardiocentesis.*

Cardiechema (*kar-de-ek-e'-mah*) [καρδία, heart; ἦχημα, sound: *pl., Cardiechemata*]. A sound produced in or by the heart.

Cardiectasis (*kar-de-ek'-tas-is*) [καρδία, heart; ἔκτασις, a stretching out]. Dilatation of the heart.

Cardielcosis (*kar-de-el-ko'-sis*) [καρδία, heart; ἕλκωσις, ulceration]. Ulceration of the heart.

Cardiemphraxia (*kar-de-em-fraks'-e-ah*) [καρδία, heart; ἔμφραξις, obstruction]. Obstruction to the blood-current in the heart.

Cardieurysma (*kar-de-u-ris'-mah*) [καρδία, heart; εὐρύς, wide]. Dilatation of the heart.

Cardiform (*kar'-dif-orm*) [*cardus,* a card; *forma,* shape]. In biology, having the teeth set as in a card.

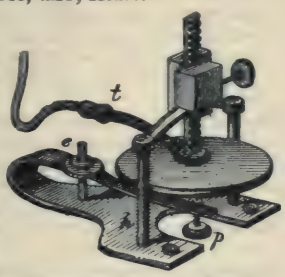
Cardinal (*kar'-din-al*) [*cardo,* a hinge]. A chief or principal part. **C. Flower,** a common name for several species of *Lobelia,* chiefly *L. cardinalis.* **C. Points.** See *Eye, Diagrammatic.* **C. Points of Capuron.** See *Pelvis.* **C. Veins,** the venous trunks which, in the embryonic stage, form the primitive jugular veins.

Cardiocele (*kar'-de-o-sēl*) [καρδία, heart; κήλη, tumor]. Hernial protrusion of the heart, chiefly through the diaphragm.

Cardiocentesis (*kar-de-o-sen-te′-sis*) [*καρδία*, heart; *κέντησις*, puncture]. Surgical puncture and aspiration of one of the chambers of the heart.

Cardioclasia (*kar-de-o-kla′-ze-ah*) [*καρδία*, heart; *κλάσις*, rupture]. Rupture of the heart.

Cardiocrystallus (*kar-de-o-kris-tal′-us*) [*καρδία*, heart; *κρύσταλλος*, crystal: *pl.*, *Cardiocrystalli*]. A heart crystal; a microscopic white crystal sometimes found in the tissues of the heart.



Cardiodemia (*kar-de-o-de′-me-ah*) [*καρδία*, heart; *δημός*, fat]. Fatty heart; fatty degeneration of the heart.

Cardiodynia (*kar-de-o-din′-e-ah*) [*καρδία*, heart; *ὀδύνη*, pain]. Pain in or about the heart.

Cardiogmus (*kar-de-og′-mus*) [*καρδία*, heart; *ὄγμος*, a furrow]. Angina pectoris; cardialgia; palpitation; aneurysm of a vessel near the heart; exophthalmic goiter. **C. strumosus.** Synonym of *Exophthalmic Goiter.*

Cardiogram (*kar′-de-o-gram*) [*καρδία*, heart; *γράμμα*, a writing]. The tracing made of the cardiac impulse by the cardiograph. See, also, *Heart.*

Cardiograph (*kar′-de-o-graf*) [*καρδία*, heart; *γράφειν*, to write]. An instrument for registering graphically the modifications of the pulsations of the heart.

CARDIOGRAPH OF V. KNOLL.
t. Exit tube. *e.* Spring. *p.* Button. (*Landois.*)

Cardiographic (*kar-de-o-graf′-ik*) [*καρδία*, the heart; *γράφειν*, to write]. Pertaining to or recorded by the cardiograph.

Cardiography (*kar-de-og′-ra-fe*) [*καρδία*, the heart; *γράφειν*, to write]. 1. The use of the cardiograph. 2. A description of the anatomy of the heart.

Cardiohemothrombus (*kar-de-o-hem-o-throm′-bus*) [*καρδία*, heart; *αἷμα*, blood; *θρόμβωσις*, a becoming curdled]. Heart-clot.

Cardio-inhibitory (*kar-de-o-in-hib′-it-o-re*) [*καρδία*, the heart; *inhibere*, to restrain]. Pertaining to the diminution of the heart's action. **C.-i. Center,** located in the oblongata. **C.-i. Nerves,** the fibers of the spinal accessory supplied to the vagus.

Cardiolith (*kar′-de-o-lith*) [*καρδία*, heart; *λίθος*, a stone]. A cardiac concretion.

Cardiology (*kar-de-ol′-o-je*) [*καρδία*, heart; *λόγος*, discourse]. The anatomy, physiology, and pathology of the heart.

Cardiomalacia (*kar-de-o-mal-a′-se-ah*) [*καρδία*, heart; *μαλακία*, softness]. Morbid softening of the substance of the heart.

Cardiomegalia (*kar-de-o-meg-a′-le-ah*) [*καρδία*, heart; *μέγας*, large]. Cardiac enlargement.

Cardiometer (*kar-de-om′-et-er*) [*καρδία*, heart; *μέτρον*, a measure]. An instrument for estimating the force of the heart's action.

Cardiometry (*kar-de-om′-et-re*) [*καρδία*, the heart; *μέτρον*, a measure]. The estimation of the size and dimensions of the heart (as by means of auscultation and percussion).

Cardiopalmus (*kar-de-o-pal′-mus*) [*καρδία*, heart; *παλμός*, palpitation]. Palpitation of the heart.

Cardiopathy (*kar-de-op′-a-the*) [*καρδία*, heart; *πάθος*, disease]. Any disease of the heart.

Cardiopericarditis (*kar-de-o-per-e-kar-di′-tis*) [*καρδία*, heart; *περί*, around; *καρδία*, the heart; *ιτις*, inflammation]. Carditis and pericarditis together; inflammation of the heart-tissues and of the pericardium.

Cardioplegia (*kar-de-o-ple′-je-ah*) [*καρδία*, heart; *πληγή*, a stroke]. Paralysis of the heart.

Cardio-pneumatic (*kar-de-o-nu-mat′-ik*) [*καρδία*, heart; *πνεῦμα*, the breath]. Pertaining to the heart and the breath. **C.-p. Movements.** Those movements of the air in the lungs that are caused by the pulsations of the heart and larger vessels.

Cardio-pneumograph (*kar-de-o-nu′-mo-graf*) [*καρδία*, heart; *πνεῦμα*, breath; *γράφειν*, to write]. An instrument designed for graphically recording cardio-pneumatic movements.

Cardiopuncture (*kar-de-o-punk′-chūr*) [*καρδία*, heart; *punctura*, a puncture]. 1. Cardiocentesis. 2. Any surgical or vivisectional puncture of the heart.

Cardiopyloric (*kar-de-o-pi-lor′-ik*) [*καρδία*, heart; *πυλωρός*, a gate-keeper]. Referring to both the cardiac and pyloric portions of the stomach.

Cardiorrhexis (*kar-de-o-reks′-is*) [*καρδία*, heart; *ῥῆξις*, rupture]. Rupture of the heart.

Cardiosclerosis (*kar-de-o-skle-ro′-sis*) [*καρδία*, heart; *σκληρόειν*, to harden]. Induration of the tissues of the heart. See *Fibroid Heart.*

Cardioscope (*kar′-de-o-skōp*) [*καρδία*, heart; *σκοπεῖν*, to view]. An instrument for the observation of the movements or of lesions of the heart.

Cardiostenosis (*kar-de-o-ste-no′-sis*) [*καρδία*, heart; *στένωσις*, narrowing]. Constriction of the heart, especially of the *conus arteriosus;* also the development of such a constriction.

Cardio-thyroid Exophthalmos (*kar′-de-o-thi-roid eks-off-thal′-mos*). Synonym of *Exophthalmic Goiter.*

Cardiotomy (*kar-de-ot′-o-me*) [*καρδία*, heart; *τομή*, cutting]. The anatomy or dissection of the heart.

Cardiotopography (*kar-de-o-to-pog′-ra-fe*) [*καρδία*, heart; *τόπος*, place; *γράφειν*, to write]. The topography or topographic anatomy of the heart and the cardiac area.

Cardiotoxic (*kar-de-o-toks′-ik*) [*καρδία*, heart; *τοξικόν*, poison]. Having a poisonous effect upon or through the heart.

Cardiotrauma (*kar-de-o-traw′-mah*) [*καρδία*, heart; *τραῦμα*, a wound]. Traumatism or wound of the heart.

Cardiotromus (*kar-de-ot′-ro-mus*) [*καρδία*, heart; *τρόμος*, a quivering]. A fluttering or slight palpitation of the heart.

Cardiovascular (*kar-de-o-vas′-ku-lar*) [*καρδία*, heart; *vasculum*, a small vessel]. Both cardiac and vascular; pertaining to the blood-vessels of the heart.

Carditic (*kar-dit′-ik*) [*καρδία*, the heart; *ιτις*, inflammation]. Relating to or affected with carditis.

Carditis (*kar-di′-tis*) [*καρδία*, the heart; *ιτις*, inflammation]. Inflammation of the heart. **C., Internal.** Synonym of *Endocarditis.*

Cardo (*kar′-do*) [*cardo*, a hinge]. In biology, a hinge-joint, as that of a bivalve shell or the maxilla of an insect.

Cardol (*kar′-dol*). See *Anacardium.*

Carduus (*kar′-du-us*) [L., a thistle]. The seeds of *C. marianus*, St. Mary's thistle, and *C. benedictus*, blessed thistle. A decoction of the former, ℥ij ad Oj, constitutes an old and popular remedy for hemoptysis. The latter is also a popular cure-all, used mainly as a tonic bitter. Dose of decoction ʒj–ʒss; of a tincture, ♏x–xx.

Carferal (*kar′-fer-al*) [*carbon*, charcoal; *ferrum*, iron; *aluminum.*] A proprietary combination of carbon, iron oxid, and clay; it is used as a filtering material for water.

Carica Papaya (*kar′-ik-ah pap-a′-yah*). See *Papain.*

Caricin (*kar′-is-in*). See *Papain.*

Caricologist (*kar-ik-ol′-o-jist*) [*carex*, sedge; *λέγειν*, to speak]. A student of sedges.

Caricous (*kar'-ik-us*) [*carica*, a fig]. Fig-shaped, as a caricous tumor.

Caries (*ka'-re-ēz*) [*caries*, rottenness]. A chronic inflammation of bone with rarefaction or absorption of bony tissue, followed usually by pus-formation; molecular death of bone, with the accompanying process, as ulceration. **C. fungosa**, tuberculosis of a bone with attached sequestrum, the meshes of the latter being filled with granulations growing into them from the inner surface of the cavity. **C., necrotic**, when portions of the bone lie in a suppurating cavity. **C. sicca**, a form of tuberculous caries characterized by absence of suppuration, obliteration of the cavity of the joint, and sclerosis and concentric atrophy of the articular extremity of the bone. **C. of Spine, or Pott's Disease**, osteitis of the bodies of the vertebræ and intervertebral fibro-cartilage, producing curvature of the spine. **C. of Teeth**, a chemical decomposition of the earthy part of any portion of a tooth, accompanied by a partial or complete disorganization of the animal framework of the affected part.

Carina (*kar-i'-nah*) [*carina*, the keel]. In biology, one of many keel-like structures; as the breast-bone of most birds, the median piece to the carapace of a cirriped, etc.

Carinate (*kar'-in-at*) [*carinatus*, keel-shaped]. Keeled.

Carinated Abdomen (*kar'-in-a-ted ab'-do-men*). See *Scaphoid Abdomen*.

Cariniform (*kar-in'-if-orm*) [*carina*, keel; *forma*, shape]. In biology, applied to the keel-like fins of certain fishes, and to other structures.

Carino-lateral (*kar-in-o-lat'-er-al*) [*carina*, a keel; *latus*, side]. Placed at the side of the carina of an animal.

Cariol (*ka'-re-ol*). A poisonous active principle obtainable from parsley. It resembles apiol in its physiologic effects, but produces a peculiar uterine vascular congestion; it is useful in genito-spinal atony. Unof.

Carious (*ka'-re-us*) [*caries*, rottenness]. Pertaining to or affected with caries. **C. Teeth, Effects of**; carious teeth may occasion facial neuralgia, facial paralysis, sciatica, hemiplegia and spinal irritation, paraplegia, tetanus, headache, epilepsy, hysteria, chorea, insanity, etc.

Carissa (*kar-is'-ah*) [L.]. A genus of shrubs. **C. schimperi.** See *Ouabain*.

Carius, Method of. A method for the quantitative determination of halogens. The substance, weighed out in a small, glass tube, is heated together with concentrated HNO_3 and silver nitrate to from 150° to 300° C, in a sealed tube, and the quantity of the resulting silver haloid determined.

Carlsbad Water. A famous mineral water used largely for chronic affections of the gastro-intestinal tract, obesity, gout, and diabetes.

Carmin (*kar'-min*) $C_{17}H_{18}O_{10}$. A coloring-matter extracted from *Cochineal, q. v.* **C. Naphtha.** See *Pigments, Conspectus of.* **C. Red.** Same as *Cochineal.*

Carminant (*kar'-min-ant*) [*carmen*, a charm]. 1. Carminative. 2. A carminative agent or medicine.

Carminative (*kar-min'-at-iv*) [*carmen*, a charm]. A calming or soothing medicine, chiefly for children, that acts by relieving pain from flatulence.

Carminic Acid (*kar-min'-ik as'-id*) See *Acid.*

Carminophile (*kar-min'-o-fīl*) [*carmin; φιλεῖν*, to love.] Readily stainable with carmin.

Carnal (*kar'-nal*) [*carnalis*, fleshly]. Pertaining to flesh. **C. Knowledge**, sexual intercourse. In forensic medicine it signifies penetration merely, which penetration need only be vulval without seminal emission.

Carnauba (*kar-na-oo'-bah*) [Braz.]. The root of *Corypha cerifera*, a wax-producing palm-tree of tropical America. It is used in Brazil as an alterative and resembles sarsaparilla in its properties. Dose of the fld. ext. ♏ xxx–ʒ j. Unof. **C. Wax**, obtained from the leaves of the carnauba-palm, *Copernicia cerifera*, of Brazil. Its specific gravity is .999 and its melting-point 185° F. (84° C.). It is brittle and of a yellowish color. It is extensively used in the manufacture of candles.

Carneous (*kar'-ne-us*) [*carneus*, of flesh]. Fleshy. **C. Columns.** See *Columnæ Carneæ.*

Carnification (*kar-nif-ik-a'-shun*) [*caro*, flesh; *fieri*, to become]. A term indicating the alteration of tissue to an unnatural, fleshy appearance. Also, the amyloid degeneration of certain tissues.

Carnin (*kar'-nin*) [*caro*, flesh], $C_7H_8N_4O_3$. A leukomaïne isolated from American meat-extract, but not from muscle-tissue itself; also obtained from yeast and wine. It crystallizes in white masses composed of very small irregular crystals; it is soluble with great difficulty in cold, readily soluble in hot water, insoluble in alcohol and in ether. It is not thought to be very poisonous, but experiments made by Brücke show that it causes a fluctuation in the rate of the heart-beat.

Carnivorous (*kar-niv'-o-rus*) [*caro*, flesh; *vorare*, to devour]. In surgery, caustic, escharotic; flesh-eating.

Carnochan's Operations. See *Operations, Table of.*

Carnose (*kar'-nōs*) [*carnosus*, fleshy]. Resembling or having the consistence of flesh.

Carnosity (*kar-nos'-it-e*) [*carnosus*, fleshy]. A fleshy growth or excrescence.

Carnot's Doctrine. An absurd theory advanced as an objection to vaccination. It is the doctrine of the "displacement of mortality." Carnot claimed that while certain diseases (small-pox, measles, croup, etc.,) were decreasing, other diseases (cholera, typhoid fever, dysentery) were increasing, and that vaccination was the cause of all the disturbance.

Caro (*ka'-ro*) [L.]. Flesh: muscular tissue.

Caroba (*kar-o'-bah*) [L.]. The leaflets of *Jacaranda procera* and of *Cybistax antisyphilitica.* It is a popular Brazilian remedy as an emeto-cathartic, alterative, and tonic in syphilis and in yaws. Dose of the fld. ext. ♏ xv–ʒ j. Unof.

Carobin (*kar-o'-bin*) [*caroba*]. An alkaloid said to be found in the leaves of *Jacaranda procera.*

Carolina (*kar-o-lī'-nah*) [*Carolus*, Charles]. A name given to two Southern States of the Union. **C. Allspice.** See *Calycanthus.* **C. Pink.** See *Spigelia.*

Carotic (*kar-ot'-ik*) [*κάρος*, stupor]. Of the nature of carus; stupid; stupefying.

Carotico-clinoid (*kar-ot'-ik-o-kli'-noid*) [*κάρος*, stupor; *κλίννς*, a bed]. Relating to a carotid artery and a clinoid process of the sphenoid bone.

Carotico-tympanic (*kar-ot'-ik-o-tim-pan'-ik*) [*κάρος*, stupor; *τύμπανον*, a drum]. Relating to the carotid canal and the tympanum.

Carotid (*kar-ot'-id*) [*καρωτίς*; *καρόειν*, to produce sleep]. 1. The principal (right and left) artery of the neck. (They were thought to give origin to sleep.) See *Arteries, Table of.* 2. Of or relating to either of the two great arteries of the neck, or their principal branches. See *Canal, Foramen, Ganglion, Plexus*, etc.

Carotin (*kar'-o-tin*) [*carota*, carrot], $C_{18}H_{24}O$. An oily coloring matter found in carrot-root and tomato. It is a lipochrome.

Carpadelium (*kar-pad-e'-le-um*) [*καρπός*, fruit; *ἄδηλος*, not manifest]. Same as *Cremocarp.*

Carpagra (*karp'-a-grah*) [*καρπός*, the wrist; *ἄγρα*, a seizure]. A sudden attack of pain at the wrist.

Carpain (*kar-pa'-in*), $C_{14}H_{27}NO_2$. An alkaloid extracted from the leaves of *Carica papaya*. It forms well-defined, beautiful crystals, with a very bitter taste, and melting at 115° C. It is recommended for the subcutaneous treatment of heart-disease. Dose, grain $\frac{1}{16}$ to $\frac{1}{8}$ subcutaneously, every day, or every second day.

Carpal (*karp'-al*) [καρπός, the wrist]. Pertaining to the wrist. **C. Angle,** in biology, the bend of the wing.

Carpale (*kar-pa'-le*) [καρπός, the wrist]. Any one of the wrist-bones.

Carpel (*kar'-pel*) [καρπός, fruit]. In biology, the ovule-producing organ of a plant; a simple pistil, or the homologous portion of a compound pistil.

Carpellary (*kar'-pel-a-re*) [καρπός, fruit]. Containing, like, or belonging to a carpel.

Carpen (*karp'-en*) [καρπός, the wrist]. Belonging to the carpus in itself.

Carphologia (*kar-fo-lo'-je-ah*). See *Carphology.*

Carphology (*kar-fol'-o-je*) [κάρφος, chaff; λέγειν, to collect]. A symptom in delirious and dying persons consisting in picking at the bedclothes. It is generally looked upon as an unfavorable omen. *Floccilatio*, or *floccilation*, was the term formerly given to this symptom.

Carpobalsamum (*kar-po-bal'-sam-um*) [καρπός, fruit; βάλσαμον, balsam]. The fruit of *Balsamodendron* (*Commiphora*) *opobalsamum*, the Mecca balsam-tree; also a fragrant volatile oil from the same fruit. It is highly prized in the Orient. Unof.

Carpocace (*kar-pok'-as-e*) [καρπός, wrist; κακός, bad]. A diseased condition of the wrist.

Carpogenic (*kar-po-jen'-ik*) [καρπός, fruit; γένης, producing]. Applied to the fruit-producing cell or system of cells in certain algæ.

Carpognathite (*kar-pog'-nath-it*) [καρπός, the wrist; γνάθος, the jaw]. In biology, the fifth joint of the gnathopodite or foot-jaw of a crustacean. See *Carpos.*

Carpogonium (*kar-po-go'-ne-um*) [καρπός, fruit; γόνος, producing]. In biology, the unfertilized female reproductive organ of certain thallophytes.

Carpolith (*kar'-po-lith*) [καρπός, fruit; λίθος, a stone]. 1. A hard concretion formed in a fruit. 2. A petrified fruit.

Carpology (*kar-pol'-o-je*) [καρπός, fruit; λέγειν, to speak]. That department of botany that treats of fruits.

Carpomania (*kar-po-ma'-ne-ah*) [καρπός, fruit; μανία, madness]. In biology, the excessive production of fruit by trees that are cultivated.

Carpo-metacarpal (*kar-po-met-a-kar'-pal*) [καρπός, carpus; μετά, between, among; καρπός, carpus]. Relating to the carpus and to the metacarpus.

Carpo-pedal (*kar-po-ped'-al*) [καρπός, carpus; *pes, pedis*, a foot]. Affecting the wrists or the hands and feet. **C. Spasm,** a spasm of the hands and feet, or of the thumbs and great toes, associated with the laryngismus stridulus of children. **C. Contractions.** See *Contraction.*

Carpophagous (*kar-pof'-ag-us*) [καρπός, fruit; φαγεῖν, to eat]. Applied to fruit-eating animals.

Carpophore (*kar'-po-fōr*) [καρπός, fruit; φέρειν, to bear]. In biology, the stalk or support of fruits, corresponding to the receptacle in the flower. Also an organ, in some thallophytes, that bears spores.

Carpopodite (*kar-pop'-o-dit*) [καρπός, the wrist; πούς, the foot]. In biology, a part of the crustacean limb, *i.e.*, the fifth joint of the endopodite. See *Carpos.*

Carpoptosis (*kar-pop-to'-sis*) [καρπός, wrist; πτῶσις, a fall]. Wrist-drop.

Carpos (*kar'-pos*) [καρπός, wrist]. In biology, the fifth joint of any crustacean appendage (Bate). The same as *Carpognathite* and *Carpopodite* (Milne Edwards).

Carpospore (*kar'-po-spōr*) [καρπός, fruit; σπορά, seed]. In biology, the equivalent of spore.

Carpostome (*kar'-po-stōm*) [καρπός, fruit; στόμα, mouth]. In biology, one of the narrow mouths or canals through which spores are discharged from the cystocarp or sporocarp.

Carpotica (*kar-pot'-ik-ah*) [καρπός, fruit]. Diseases connected with pregnancy and childbirth.

Carpozyma (*kar-po-zi'-mah*) [καρπός, fruit; ζύμη, ferment]. A genus of fermentative microörganisms. **C. apiculata,** a widely-diffused alcoholic ferment found in all fruits.

Carpue's Operation. See *Operations, Table of.*

Carpus (*karp'-us*) [καρπός, the wrist]. The eight bones collectively forming the wrist. See *Bones, Table of.*

Carr's Method. See *Treatment, Methods of.*

Carrageen, or Carragheen (*kar'-ag-ēn*) [*Carragheen* in Ireland]. Irish moss. See *Chondrus.*

Carragheenin (*kar-ag-ēn'-in*), $C_6H_{10}O_5$. A mucilaginous constituent of carragheen, apparently identical with pararabin.

Carré's Apparatus. An apparatus for manufacturing ice by means of the evaporation of ether.

Carriage (*kar'-āj*). See *Ward-carriage, Ambulance, Cacolet.*

Carrick Bend (*kar'-ik-bend*). A form of knot for fastening together two ligatures. The merit of the knot consists in the free end being held firmly between the two long portions.

Carron Oil (*kar'-on oil*). See *Linum* and *Calcium.*

Car-sickness (*kar'-sik-nes*). The well-known symptoms of sea-sickness produced by journeying in railway cars.

Carswell's Grapes. Pulmonary tubercles when they occur by racemose distribution at the extremities of several adjacent bronchioles. See *Diseases, Table of.*

Carter's Operation. See *Operations, Table of.* **C. Test.** See *Tests, Table of.*

Carthamin (*karth'-am-in*) [Ar., *qartama*, paint], $C_{14}H_{16}O_7$. The coloring-matter in safflower, the blossoms of *Carthamus tinctorius.* It is precipitated from its soda solution by acetic acid as a dark-red powder, which, on drying, acquires a metallic luster. It dissolves with a beautiful red color in alcohol and the alkalies. It is used for surface-coloring or dyeing. See *Pigments, Conspectus of.*

Carthamus (*karth'-am-us*) [Ar., *qartama*, paint]. American or bastard saffron or safflower. The flowers of *C. tinctorius.* An infusion, "Saffron tea," is a popular domestic remedy as a diuretic in measles and other exanthematous affections. Unof.

Cartilage (*kar'-til-āj*) [*cartilago*, gristle]. Gristle; a white, semi-opaque, non-vascular tissue composed of a matrix containing nucleated cells. When boiled, cartilage yields a substance called *Chondrin, q. v.* **C., Articular,** that lining the articular surfaces of bones. **C., Bone-,** bone that takes its origin from cartilage, and not from a membrane. **C., Costal,** that occupying the interval between the true ribs and the sternum or adjacent cartilages. **C., Ensiform,** the third piece of the sternum. It is also called the *xiphoid appendix.* **C., Epactal,** small cartilaginous nodules on the upper edge of the alar cartilages of the nose. **C., Hyaline,** distinguished by a granular or homogeneous matrix. **C., Fibro-,** distinguished by a fibrous matrix. **Cartilages of Larynx,** the cartilages of the larynx take part in producing the various modulations of the pitch and intensity of the voice. They are the *thyroid, cricoid, epiglottis,* and a pair each of *arytenoid, cornicula laryngis,* and *cuneiform, q. v.* **C. of Meckel.**

See *Meckel*. **C., Mucronate,** the ensiform cartilage. **C., Nasal,** the cartilaginous framework of the nose, consisting of five pieces, the two upper and two lower cartilages, and the cartilage of the septum. **C., Reticular,** a peculiar cartilage found in the auricle of the ear, the epiglottis, and Eustachian tubes. Its peculiarity consists in a network of yellow elastic fibers pervading the matrix in all directions. **C. of Santorini,** a nodule at the apex of each arytenoid cartilage, the corniculum laryngis. **C. of Weitbrecht,** the interarticular fibro-cartilage that exists in the acromio-clavicular articulation. **C. of Wrisberg,** the cuneiform cartilages, one on each side of the fold of membrane stretching from the arytenoid cartilage to the epiglottis. **C., Yellow.** See *C., Reticular*.

Cartilagin (*kar-til'-aj-in*) [*cartilago*, cartilage]. A characteristic principle of hyaline cartilage. Boiling changes it into chondrin.

Cartilaginification (*kar-til-aj-in-if-ik-a'-shun*) [*cartilago*, cartilage; *facere*, to make]. A change into cartilage.

Cartilaginiform (*kar-til-aj-in'-if-orm*) [*cartilago*, cartilage; *forma*, form]. Resembling cartilage.

Cartilaginoid (*kar-til-aj'-in-oid*) [*cartilago*, cartilage; *εἶδος*, form]. Resembling cartilage.

Cartilaginous (*kar-til-aj'-in-us*) [*cartilago*, cartilage]. Made up of or resembling cartilage.

Cartilago (*kar-til-a'-go*) [L.: *gen.*, *Cartilaginis*]. Cartilage. **C. triticea,** a small, oblong, fibro-cartilaginous mass, often found in the elastic ligament, the thyro-hyoid, connecting the superior cornu of the thyroid cartilage with the greater cornu of the hyoid bone.

Carum (*ka'-rum*) [*κάρον*, caraway]. Caraway. The seeds of *C. carui*, indigenous to Europe and an allied species native to the Pacific coast of America. Its odor and taste are due to a volatile oil. It is valuable in infantile colic, but is used chiefly as a flavor. **C., Aqua** (B. P.). Dose ʒj–ij. **C., Infusum,** unof., ʒj–ij, ad Oj. Dose ʒss–ij. **C., Oleum.** Dose ♏j–v.

Caruncle (*kar'-ung-kl*) [*caruncula*, dim. of *caro*, flesh]. A small, abnormal fleshy growth. In biology, applied to certain elevations, protuberances, or excrescences on animals or plants, as the comb of a bird, the fleshy papilla at the inner canthus of the eye, the growths on insect larvæ, and the small masses about the hilum of some seeds. **C., Lachrymal,** one upon the conjunctiva near the inner canthus. **C., Urethral,** a small, bright-red growth situated on the posterior lip of the meatus urinarius; a frequent condition in women. The caruncle varies in size from a hempseed to a filbert; it is very painful, especially during micturition and coitus, and bleeds readily.

Caruncula (*kar-ung'-ku-lah*) [dim. of *caro*, flesh: *pl.*, *Carunculæ*]. A caruncle. **C. mammillaris,** the olfactory tubercle, an eminence of gray matter between the roots of the olfactory nerve.

Carunculæ (*kar-ung'-ku-le*) [*caruncula*, a caruncle]. The nymphæ. **C. myrtiformes,** the projections of membrane near the orifice of the vagina, thought to be the remains of the hymen after its rupture. They have also been found in the imperforated hymen.

Caruncular (*kar-ung'-ku-lar*) [*caruncula*, a caruncle]. Like or pertaining to a caruncle.

Carus (*ka'-rus*) [*κάρος*, stupor]. Deep, lethargic sleep. **C. cataleptica,** catalepsy. **C. ecstasis,** trance, or catalepsy. **C. lethargus,** lethargy.

Carus, Curve or Circle of. See *Curve*.

Carvacrol (*karv'-ak-rol*) [Ital., *carvi*, caraway; *ἄκρος*, sharp], $C_{10}H_{13}.OH$. A liquid body occurring in the oil of certain varieties of satureja. It is produced on heating carvol with glacial phosphoric acid. It is a thick oil, solidifying at low temperatures; it melts at 0° and boils at 236°. It has a very disagreeable odor and strong taste. It has been used to relieve toothache.

Carvene (*karv'-ēn*) [It., *carvi*, caraway], $C_{10}H_{16}$. A hydrocarbon contained in caraway. It is a light terpene. See also *Citrene*.

Carvol (*karv'-ol*) [It., *carvi*, caraway; *oleum*, oil], $C_{10}H_{14}O$. An aromatic alcohol isomeric with carvacrol, and obtained from oil of cumin. It is an oil with a pleasant odor, boiling at 225° C.

Caryoblast (*kar'-e-o-blast*) [*κάρυον*, a nucleus; *βλαστός*, a germ]. Any nucleated plastidule.

Caryocinesis (*kar-e-o-sin-e'-sis*) [*κάρυον*, a nut (nucleus); *κίνησις*, movement]. See *Karyokinesis*.

Caryocinetic (*kar-e-o-sin-et'-ik*). See *Karyokinetic*.

Caryolysis (*kar-e-ol'-is-is*) [*κάρυον*, nucleus; *λύειν*, to loose]. The process of the dissolution of cell-nuclei.

Caryolytic (*kar-e-o-lit'-ik*) [*κάρυον*, nucleus; *λύσις*, dissolution]. Pertaining to *Caryolysis*.

Caryomitosis (*kar-e-o-mit-o'-sis*). See *Karyomitosis*.

Caryophyllin (*kar-e-o-fil'-in*) [*κάρυον*, a nut; *φύλλον*, a leaf], $C_{10}H_{16}O$ or $C_{20}H_{32}O_2$. The neutral crystalline principle of cloves. It occurs in tasteless and odorless silky acicular crystals, soluble in warm alcohol and ether. See *Caryophyllus*.

Caryophyllus (*kar-e-o-fil'-us*) [*κάρυον*, a nut; *φύλλον*, a leaf]. Clove. The unexpanded flowers of *Eugenia caryophyllata*, distinguished by their pungent, spicy taste. Its properties are due to a volatile oil, which is antiseptic, stimulant, and irritant. It also contains a crystalline body, *Eugenin*, $C_{10}H_{12}O_3$, and a camphor, *Caryophyllin*, $C_{10}H_{16}O$. It is useful as a stomachic, and to prevent griping when combined with purgatives. **C., Infusum** (B. P.). A strength of 1 to 40 recommended. Dose ʒj–ij. **C., Ol.,** contains an acid and a phenol compound. Dose ♏j–iv. It is used also by microscopists to clarify preparations and tissues for mounting.

Caryoplasm (*kar'-e-o-plazm*) [*κάρυον*, a nucleus; *πλάσμα*, that which is formed]. The plasm of a cell-nucleus; nuclear plasm.

Caryopsis (*kar-e-op'-sis*) [*κάρυον*, a nut; *ὄψις*, appearance]. In biology, an indehiscent dry fruit, like that of the wheat, in which the single seed is enveloped in the closely-adhering pericarp.

Casali Green. See *Conspectus of Pigments*, under *Pigment*.

Casali's Test. See *Tests, Table of*.

Casamajor's Test. See *Tests, Table of*.

Casaubon's Apparatus. One for charging water with CO_2 by the intermittent method.

Casca Bark (*kas'-kah bark*). Sassy Bark; Ordeal Bark. The bark of *Erythrophlæum guinensè*, a tree native to Africa, with properties due to an alkaloid. It produces nausea and vomiting. It is valuable in intermittent fevers, and is a more powerful heart-tonic than digitalis. **C., Tinct.,** 25 per cent. in strength. Dose ♏x. Unof. **C., Ext. Aq.** Dose gr. j. **C., Ext. Fld.** Dose ♏v–xv. **Erythrophlein,** the active alkaloid, unof., is locally an anesthetic.

Cascadöe (*kas-kad-o'-e*). See *Tinea imbricata*.

Cascara (*kas'-kar-ah*) [Sp., "bark"]. The bark. **C. amarga,** Honduras Bark. The bark of a tree native to Mexico, much used as an alterative tonic in syphilis and skin-affections. **C. Cordial,** a trade preparation. Dose ♏xv–ʒij. **C., Fld. Ext.** Dose ʒss–j; of the powdered extract gr. v–x. Unof. **C. sagrada,** Chittem Bark, Sacred Bark. The bark of *Rhamnus purshiana*, or California Buckthorn. Its properties are due to a volatile oil. It is useful in the treatment of chronic constipation. All unof. **Casc. sagrad., Ext.** (B. P.). Dose gr. ij–viij. **Casc. sagrad., Ext. Liquidum** (B. P.). Dose ♏v–ʒj.

Cascarilla (*kas-kar-il′-ah*) [Sp., dim. of *casca*, bark]. The bark of *Croton eluteria*, native to the Bahama Islands, an aromatic bitter, increasing the natural secretions of the digestive organs. **C., Infus.** (B. P.). Dose ʒj–ij. **C., Tinctura** (B. P.). Dose ʒss–ij.

Cascarillin (*kas-kar-il′-in*) [*cascarilla*, dim. of *casca*, bark], $C_8H_9O_2$. The active principle of cascarilla bark; a white, crystalline, bitter substance, scarcely soluble in water.

Case (*kās*) [*cadere*, to happen]. A single instance or example of a disease. A covering, or box-like structure. **C., Brain-**, the calvaria. **C., Muscle-.** See *Muscle*. **C.-taking**, the collection of memoranda and notes of an individual case for service in diagnosis or prognosis, or for use in a medico-legal inquiry. **C., Trial-**, in ophthalmology, a case containing various lenses for refracting the eye, etc.

Caseation (*ka-ze-a′-shun*) [*caseum*, cheese]. The precipitation of casein during the coagulation of milk. Also a fatty degeneration of pus, tubercle, etc., in which the structure is converted into a soft, cheese-like substance.

Casein (*ka′-se-in*) [*caseum*, cheese]. A derived albumin, the chief proteid of milk, precipitated by acids and by rennet at 40° C. It is closely allied to alkali-albumin, but contains more nitrogen and a large amount of phosphorus. It constitutes most of the curd of milk. Two varieties of **C., Vegetable**, have been described,—**Legumin**, in peas, beans, etc., and **Conglutin**, in hops and almonds. **C. Saccharid**, a compound of dry casein one part, cane-sugar nine parts, and sodium bicarbonate enough to render it slightly alkaline. It is useful in preparing emulsions, whether of oils, balsams, terpenes, resins, or gum-resins.

Caseinogen (*ka-se-in′-o-jen*) [*caseum*, cheese; *γεννᾶν*, to produce]. A peculiar substance occurring in milk, neither an alkali-albumin nor a globulin, but occupying a distinct position among proteïds. When acted upon by a digestive ferment it produces casein, or the curd of milk. Caseinogen is a proteid analogous to fibrinogen, myosinogen, etc.

Caseose (*ka′-se-ōs*) [*caseum*, cheese]. A product of the gastric digestion of casein.

Caseous (*ka′-se-us*) [*caseum*, cheese]. Having the nature or consistence of cheese.

Cashew (*kash-oo′*). The cashew-nut, the product of *Anacardium occidentale*. See *Acajou*.

Cashoo (*kash-oo′*). Same as *Catechu*.

Cassava (*kas-a′-vah*) [Sp., *casabe*]. The fecula of manioc, *Janipha manihot*, separated from the juice. Unof. See *Tapioca*.

Cassel Brown. Same as *Vandyke Brown*. **C. Green.** Same as *Manganese Green*. **C. Yellow.** See *Conspectus of Pigments*, under *Pigment*.

Cassel's Operation. See *Operations, Table of*.

Casselmann's Green. See *Conspectus of Pigments*, under *Pigment*.

Cassena (*kas-e′-nah*) [L.]. The *Ilex cassine*, the youpon-tree of the Southern U. S. Its leaves are expectorant, cathartic, emetic, and stimulant. Unof.

Casser, Ganglion of. See *Ganglia, Table of*. **C., Nerve of.** See *Nerves, Table of*.

Casserian Ganglion. See *Ganglia, Table of*.

Cassia (*cash′-e-ah*) [*κασία*, a perfume]. 1. A genus of leguminous plants, several species of which afford *Senna*, *q. v.* 2. An old name, still used commercially, for the coarser varieties of cinnamon. See *Cinnamon*. **C. Bark**, Cassia lignea. See *Cinnamon*. **C. Buds**, the immature fruit of Chinese cinnamon; used chiefly as a spice. **C. marilandica**, of N. America, produces the leaves called American senna, which are less active as a cathartic than the true senna. **C. Oil**, a variety of oil of cinnamon, used in pharmacy and in perfumery. **C., Purging**, is the fruit of a tree, *C. fistula*, growing in tropical regions. The pulp, **C. Pulpa** (B. P.), in ʒj–ij doses is a mild laxative.

Cassideus (*kas-id′-e-us*) [*cassis*, a helmet]. In biology, helmet-shaped.

Cassimuniar, or **Cassumunar** (*kas-im-u′-ne-ar*, or *kas-um-u′-nar*). The plant *Zingiber cassumunar* and its aromatic rhizome, formerly used like true ginger; now scarcely known in commerce or in pharmacy. It is tonic and stimulant. Unof.

Cassius's Purple. See *Pigments, Conspectus of*.

Cassonade (*kas-on-ād′*) [Fr.]. A name formerly applied in the French colonies to *Muscovado Sugars*, *q. v.*

Cast (*kast*) [ME., *casten*, to throw]. 1. A mass of fibrous or plastic material that has taken the form of some cavity in which it has been moulded. From their source, casts may be classified as bronchial, intestinal, nasal, esophageal, renal, tracheal, urethral, vaginal, etc. Of these, the *renal* casts are the most important, by reason of their significance in diseases of the kidney. Classed according to their constitution, casts are epithelial, fatty, fibrinous, granular, hyaline, mucous, sanguineous, waxy, etc. See *Tube-casts*. 2. To throw off; applied to labor in cattle. 3. Strabismus.

Castanea (*kas-ta′-ne-ah*) [L.]. Chestnut. The leaves of *C. vesca*. They contain tannic and gallic acids and other principles whose value is not known. They are used in infusion or decoction as a remedy for whooping-cough. **C., Fld. Ext.** Dose ɱ v-lx.

Castillon's Powders. Powders containing sago, salep, tragacanth, of each 8 parts, prepared oyster-shells, 2, cochineal, 1. They are used in treating diarrhea and dysentery.

Casting (*kast′-ing*) [ME., *casten*, to throw]. In dental mechanism, running fused lead, tin, zinc, or brass into a mould made in sand, with a plaster transfer of any portion or the whole of the alveolar border and so many of the teeth as may be remaining in it, and the palatine arch when it becomes necessary to adapt a plate to it.

Castor (*kas′-tor*). See *Castoreum*. **C. Bean** and **C. Oil.** See *Ricini*.

Castoreum (*kas-to′-re-um*) [*κάστωρ*, the beaver]. The dried preputial follicles and their secretion, obtained from the beaver, *Castor fiber*. It is a reddish-brown substance with a strong odor. It is antispasmodic and stimulant, its action resembling that of musk. **C., Tinct.** Dose ʒ ss–j. Unof.

Castoria (*kas-to′-re-ah*) [*κάστωρ*, the beaver]. A proprietary medicine recommended as a substitute for castor oil.

Castorin (*kas′-tor-in*) [*κάστωρ*, the beaver]. A crystalline substance obtained from castor.

Castration (*kas-tra′-shun*) [*castrare*, to cut]. Orchectomy; the excision of one or both testicles. **C., Female**, removal of the ovaries; oöphorectomy; spaying.

Casts (*kasts*). See *Cast*, and *Tube-Casts*.

Casual (*kaz′-u-al*) [*casus*, chance]. Fitted or set apart for the treatment of accidental injuries, as a casual ward in a hospital.

Casualty (*kaz′-u-al-te*) [*casus*, chance]. An accidental injury; a wound, or loss of life, accidentally incurred; an injury in a battle.

Catabasis (*kat-ab′-as-is*) [*κατάβασις*, a descent]. The decline of a disease.

Catabolergy, or **Katabolergy** (*kat-ab-ol′-er-je*) [*κατά*, down; *βάλλειν*, to throw; *ἔργον*, work]. Energy expended in katabolic processes.

Catabolic (*kat-ab-ol′-ik*) [*κατά*, down; *βάλλειν*, to throw]. Of the nature of, or pertaining to, catabolism.

Catabolism (*kat-ab'-ol-izm*) [κατά, down; βάλλειν, to throw]. Destructive metamorphosis; disassimilation; physiologic disintegration; movement toward a catastate.

Catabythismomania (*kat-ab-ith-iz-mo-ma'-ne-ah*) [καταβυθισμός, submergence; μανία, madness]. Insane impulse to suicide by drowning.

Catabythismus (*kat-ab-ith-iz'-mus*) [καταβυθισμός, submergence]. Drowning; especially suicidal drowning.

Catacathartic (*kat-ak-ath-ar'-tik*) [κατά, down; καθάρσις, purgation]. 1. Purging. 2. A medicine or agent that causes purgation.

Catacausis (*kat-ak-aw'-sis*) [κατά, down; καίειν, to burn]. Spontaneous combustion.

Cataclasis (*kat-ak'-las-is*) [κατά, down; κλάειν, to break]. A fracture.

Catacleisis (*kat-ak-li'-sis*) [κατάκλεισις, a locking]. Closure of the eyelids by adhesion or by spasm.

Catacorolla (*kat-a-ko-rol'-ah*) [κατά, against; *corolla*, a little crown]. In biology, a secondary corolla either within or without the true corolla.

Catacrotic (*kat-ak-rot'-ik*) [κατά, down; κρότος, a striking]. Interrupting the line of descent in a sphygmogram.

Catacrotism (*kat-ak'-rot-izm*) [κατά, down; κροτός, a striking]. An interruption or oscillation of the line of descent in a sphygmogram; the quality of being catacrotic or of being marked by oscillation in the sphygmographic line of descent.

Catadicrotism, or **Katadicrotism** (*kat-ad-ik'-rot-izm*) [κατά, down; δίκροτος, double beating]. The occurrence of a divided or double pulsation in the downward stroke of the sphygmograph.

Catadidymous (*kat-ad-id'-im-us*) [κατά, down; δίδυμος, twin]. Joined into one, as a twin monstrosity, but with a downward cleavage, so that the upper parts are double.

Catadidymus (*kat-ad-id'-im-us*) [κατά, down; δίδυμος, twin]. A catadidymous monstrosity.

Catadromous (*kat-ad'-ro-mus*) [κατά, down; δράμειν, running down]. In biology, applied to such fishes as descend rivers to spawn in the sea, *e. g.*, the eel.

Catagenesis (*kat-aj-en'-es-is*) [κατά, down; γένεσις, generation]. In biology, the process of creation by retrograde metamorphosis of energy, or by the specialization of energy (Cope).

Catagma (*kat-ag'-mah*) [κάταγμα, a fracture: *pl.*, *Catagmata*]. A fracture.

Catagmatic (*kat-ag-mat'-ik*) [κάταγμα, a fracture]. 1. Relating to or serviceable in cases of fracture. 2. A remedy that promotes the union of broken parts.

Catagoglossum (*kat-ag-o-glos'-um*) [κατάγειν, to draw down; γλῶσσα, the tongue]. A tongue-depressor.

Catalepsia (*kat-al-ep'-se-ah*). See *Catalepsy*. **C. artificialis**, artificial or hypnotic catalepsy. **C. accessoria**, catalepsy associated with some other leading nervous affection. **C. cerea**, waxen catalepsy; catalepsy in which the limbs if placed in any given position will retain it as if they were made of wax. **C. epidemica**, the epidemic or imitative variety. **C. spuria**, or false catalepsy. See *Ecstasy*.

Catalepsy (*kat'-al-ep-se*) [κατά, down; λαμβάνειν, to seize]. A peculiar neurosis characterized by loss of will and muscular rigidity, due to a diseased condition of the central nervous system. It occurs in those of the neurotic diathesis, and usually between the ages of 20 and 30 years. It is commonly associated with hysteria, but may be found in conjunction with tetanus and the various psychoses. It often forms a part of the hypnotic state. See *Somnambulism*. **C., Local**, that affecting a single organ or group of muscles. **C., Plastic.** See *Catalepsia cerea*.

Cataleptic (*kat-al-ep'-tik*) [κατά, down; λαμβάνειν, to seize]. Relating to, affected with, or of the nature of, catalepsy.

Cataleptiform (*kat-al-ep'-tif-orm*) [κατά, down; λαμβάνειν, to seize; *forma*, form]. Resembling catalepsy.

Catalpa (*kat-al'-pah*) [native Am. Indian]. A genus of American and Asiatic bignoniaceous trees. **A. bignoniodes** and **A. speciosa**, of North America, have astringent, anthelmintic, and tonic qualities; the leaves and pods are reputed anodyne, emollient, and antasthmatic. Unof.

Catalysis (*kat-al'-is-is*) [καταλύειν, to dissolve]. In chemistry, a reaction that appears to take place owing to the mere presence of another body that apparently undergoes no change.

Catalytic (*kat-al-it'-ik*) [καταλύειν, to dissolve]. 1. Of the nature of, or characterized by, catalysis. 2. Any medicine that is supposed to break down, destroy, or counteract morbid agencies existing within the economy. See *Alterative*.

Catamenia (*kat-am-e'-ne-ah*) [κατά, concerning, according to; μήν, month]. The recurrent monthly discharge of blood during sexual life from the genital canal of the female.

Catamenial (*kat-am-e'-ne-al*) [κατά, concerning; μήν, a month]. Pertaining to the catamenia.

Catantochasmus (*kat-an-to-kaz'-mus*) [κάταντα, downward; χάσμα, an expanse]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and a line joining the anterior point of the foramen magnum and the posterior nasal spine is less than 13°.

Catantopylus (*kat-an-top'-il-us*) [κάταντα, downward; πύλη, an opening]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the anterior and posterior points of the foramen magnum is between one and eight degrees.

Catantorrhinus (*kat-an-tor-i'-nus*) [κάταντα, downward; ῥίς, the nose]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the wing of the vomer and the anterior nasal spine is between 1° and 16.5°.

Catantostomus (*kat-an-tos'-to-mus*) [κάταντα, downward; στόμα, the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and a line joining the premaxillary point and the wing of the vomer is between 9° and 25.5°.

Catanturaniscus (*kat-an-tūr-an-is'-kus*) [κάταντα, downward; οὐρανίσκος, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the posterior rim of the incisor foramen and the premaxillary point is between 1° and 20°.

Catanturanus (*kat-an-tūr'-ān-us*) [κάταντα, downward; οὐρανός, the palate]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the nasal spine is between 1° and 17°.

Catapasm (*kat'-ap-azm*) [κατάπασμα, powder]. A dry powder to be sprinkled upon the skin or upon a sore.

Catapetalous (*kat-ap-et'-al-us*) [κατά, against; πέταλον, a leaf]. In biology, applied to polypetalous flowers in which the bases of the petals are adherent to the bases of the stamens.

Cataphasia (*kat-af-a'-ze-ah*) [κατάφασις, assent]. A condition of imperfect consciousness, in which the patient repeatedly utters the same word or words spontaneously, or in reply to a question.

Cataphora (*kat-af'-o-rah*) [καταφορά, a fall]. Lethargy; imperfect or restless coma, with intervals of coma-vigil.

Cataphoresis (*kat-af-or-e'-sis*) [*καταφέρειν*, to bring down]. The introduction of drugs into the system through the skin, by means of ointments or solutions applied by the electrode of a battery.

Cataphoric (*kat-af-or'-ik*) [*κατά*, down; *φορέειν*, to carry]. Passing, or causing a passage, from the anode to the kathode, through a diaphragm or septum.

Cataphract (*kat'-af-rakt*) [*καταφράκτης*, a coat of mail]. In biology, the protective armor-plates or scales of some animals.

Cataphracted (*kat'-af-rak-ted*) [*κατάφρακτος*, mailed]. In biology, protected by an armor of thick skin, heavy plates or scales.

Cataphyllum (*kat-af-il'-um*) [*κατά*, down; *φύλλον*, a leaf]. In biology, a rudimentary scale-like leaf, as a cotyledon or bud-scale.

Cataplasis (*kat-ap'-las-is*) [*κατά*, down; *πλάσις*, formation]. The stage of decline in the individual life.

Cataplasm (*kat'-ap-lazm*) [*κατάπλασμα*, a poultice]. See *Poultice*. **C., Emollient.** See *Species emollientes*.

Cataplasma (*kat-ap-laz'-mah*) [L.]. A cataplasm. **C. fermenti** (B.P.), beer yeast, wheaten flour, water at 100° F. A stimulant and antiseptic for indolent ulcers.

Cataplectic (*kat-ap-lek'-tik*) [*κατάπληξις*, a striking down]. Fulminant; sudden and overwhelming.

Cataplexis (*kat-ap-leks'-is*) [*κατάπληξις*, a striking down]. 1. A sudden and overwhelming shock or attack of disease; prostration by the onset of disease, or by shock. 2. Hypnotic sleep.

Cataptosis (*kat-ap-to'-sis*) [*κατά*, down; *πτῶσις*, a falling]. Apoplexy; epilepsy; paralysis; ptosis.

Cataract (*kat'-ar-akt*) [*καταράκτης*, a falling down or over, as of something over the vision]. Diminished transparency or an opacity of the crystalline lens, or of its capsule. **C., Artificial Maturation of,** *Förster's Method* consists in friction of the cornea against the lens by pressure upon the cornea. *Beltmann's Method* consists in "direct trituration" of the lens with a spatula introduced into the anterior chamber. Both methods are preceded by an iridectomy. **C., Black,** the lens is pigmented, and of a dark-brown color. **C., Capsular,** consists in non-transparent deposits on the inner surface of the capsule. **C., Cortical,** opacification of the outer layers of the lens. **C., Diabetic,** is associated with diabetes. **C., Discission of,** an operation preliminary to absorption, or extraction by suction, consisting in rupturing the capsule, so that the aqueous humor gains access to the lens. **C., Extraction of,** removal of the cataractous lens by surgical operation. See *Extraction of C.* **C., Fluid,** *C., Lacteal,* the breaking up of an opaque lens into a milky fluid. **C., Green,** a name given to a grayish-green reflex seen in glaucoma; it is also seen when the pupil is dilated and at the same time the media are not completely transparent. **C., Immature,** or **Unripe,** only a part of the lens-substance is cataractous. **C., Lacteal.** See *C., Fluid.* **C., Lamellar,** or **Zonular;** certain layers between the cortex and nucleus are opaque, the remaining layers being transparent. **C., Mature,** or **C., Ripe,** the whole lens-substance is cataractous. **C., Morgagnian,** when a *hypermature or overripe C.* shrinks and leaves a nucleus floating in the dissolved outer layers. **C., Naphthalinic,** an opacity of the lens of a rabbit following the administration of naphthalin. **C., Polar** (anterior or posterior), the opacity is confined to one pole of the lens. **C.-pricker.** See *Cataract-pricking.* **C.-pricking,** a name given to the old method of artificial luxation of the lens in cases of cataract. A needle was passed into the sclera on the outer margin of the cornea and into the lens, which was then depressed into the vitreous. Those who performed this operation were called *cataract-prickers.* **C., Pyramidal,** the opacity is at the anterior pole and is conoid, the apex extending forward. **C., Recurrent Capsular,** or **Secondary,** capsular cataract, appearing after the extraction of the lens. **C., Senile,** the cataract of old persons, the most frequent form, and that understood when not specified as *congenital, juvenile, traumatic, soft,* etc. **C., Soft,** is especially that of the young; the lens matter is of soft consistency and milky appearance.

Cataracta (*kat-ar-ak'-tah*). See *Cataract.* **C. secundaria.** See *After-cataract.*

Cataractous (*kat-ar-ak'-tus*) [*καταράκτης*, a falling down or over]. Of the nature of or affected with cataract.

Catarrh (*kat-ar'*) [*καταρρέειν*, to flow down]. Inflammation of a mucous membrane, especially of the respiratory tract, but also applied to the bladder, etc. Its main symptoms are redness and swelling of the affected membrane with a more or less profuse mucous discharge. **C., Epidemic.** See *Influenza.* **C., Gastric,** gastritis, acute or chronic. **C., Intestinal,** enteritis, acute or chronic. **C., Nasal,** coryza, *q. v.* See also *Rhinitis.* **C., Pulmonary,** bronchitis, acute or chronic. **C., Suffocative.** Synonym of *Capillary Bronchitis, q. v.* See also *Suffocative Catarrh.* **C., Uterine,** endometritis. **C., Venereal.** Synonym of *Gonorrhea.* **C., Vesical,** cystitis.

Catarrhal (*kat-ar'-al*) [*καταρρέειν*, to flow down]. Of the nature of, affected with, or relating to catarrh. **C. Fever.** Synonym of *Influenza.*

Catarrhine (*kat'-ar-in*) [*κατά*, down; *ῥίς*, the nose]. In biology, of or pertaining to those monkeys and apes that have approximated nostrils directed downward and separated by a narrow septum.

Catarrhus (*kat-ar'-us*). See *Catarrh.* **C. genitalium.** Synonym of *Leukorrhea.*

Catastaltic (*kat-as-tal'-tik*) [*καταστέλλειν*, to check, to send downward]. 1. Astringent. 2. Passing from above downward (as a nerve-impulse).

Catastasis (*kat-as'-tas-is*) [*κατάστασις*, a settling]. Condition, state, habit; a decline, or quieting of symptoms; restitution, as of a displaced part.

Catastate (*kat'-as-tāt*) [*κατάστατος*, settling down]. Any one of a series of successive catabolic states, substances, or conditions, each one of which is less complex, more stable, and exhibits less functional activity than its predecessor.

Catastatic (*kat-as-tat'-ik*) [*κατάστασις*, a settling down]. Relating to a catastasis, or to a catastate.

Catatonia, or **Katatonia** (*kat-at-o'-ne-ah*) [*κατά*, down; *τόνος*, tension]. A form of mental derangement progressing from melancholia successively through mania and stupidity to imbecility and tonic convulsions.

Catatony (*kat-at'-o-ne*). See *Catatonia.*

Catechin (*kat'-e-chin*) [*catechu*], $C_{21}H_{20}O_9 + 5H_2O$. Catechinic acid, the active principle of catechu. It crystallizes in shining needles of a snow-white, silky appearance.

Catechol (*kat'-e-chol*). See *Pyrocatechin.*

Catechu (*kat'-e-choo*) [E. Ind.]. An extract prepared from the wood of *Acacia catechu,* a native of the East Indies. It contains 50 per cent. of tannic acid, and hence is a powerful astringent. It is used for the diarrhea of children and as a gargle and mouth-wash. Dose of the powdered extract gr. j–℈ss. See also *Pigments, Conspectus of.* **C., Infusum** (B. P.). Dose ℈j–iss. **C., Pulv. Comp.** (B. P.). Contains catechu, kino, and rhatany. Dose gr. xx–xl. **C., Tinct. Composita,** contains catechu 10, cassia cinnamon 5, dilute alcohol q. s. Dose ♏x–℈j. **C., Trochisci,** each contains one grain of catechu with sugar, tragacanth, and orange-flower water.

Catelectrotonus (*kat-el-ek-trot'-o-nus*) [*κατά*, down; *ἤλεκτρον*, amber; *τόνος*, tension]. The state of increased irritability of a nerve near the cathode. See *Anelectrotonus*.

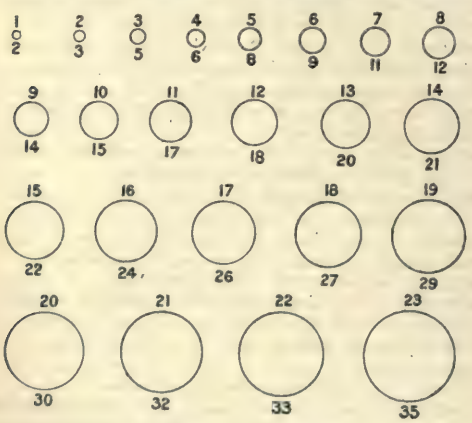
Catenulate (*kat-en'-u-lāt*) [*catenula*, a small chain]. In biology, having a chain-like arrangement.

Catgut (*kat'-gut*). The intestines of a sheep treated to make ligatures. **C., Carbolized,** catgut rendered aseptic by soaking in a solution of carbolic acid. **C., Chromicized,** treated with chromic acid. **C. Mat,** an appliance used in intestinal anastomosis for the purpose of approximating the edges of the severed intestines. **C. Plate,** an appliance for uniting the intestinal edges in intestinal anastomosis. It is made of a solid catgut sheet; is thin, large, and flat, and resembles the Senn decalcified bone-plates.

Catha (*ka'-thah*) [Ar., *kat*]. A genus of celastraceous plants. **C. edulis** affords leaves and twigs which the Arabs use as a substitute for tea and coffee.

Catharma (*kath-ar'-mah*) [*κάθαρμα*, refuse: *pl.*, *Catharmata*]. That which is removed by purgation; excrement.

Catharsis (*kath-ar'-sis*) [*καθαίρειν*, to purge]. Purgation.



Cathartic (*kath-ar'-tik*) [*καθαρτικός*, purging]. 1. Purgative. 2. A medicine used to produce evacuations of the bowels. A purgative. **C. Acid.** See *Senna*. **C. Pill, Compound.** See *Colocynth*.

Cathelectrotonus See *Catelectrotonus*.

Catheresis or **Cathæresis** (*kath-er-e'-sis*) [*καθαίρειν*, to cut down]. 1. Prostration or weakness induced by medication. 2. Caustic action; it often designates a feebly caustic action.

Catheretic (*kath-er-et'-ik*) [*καθαίρειν*, to reduce]. 1. Reducing; weakening; prostrating. 2. Caustic. 3. A reducing or caustic agent.

Catheter (*kath'-et-er*) [*καθετήρ*, a thing put down]. A tube-like instrument for evacuating the liquid of a cavity, usually the bladder. **C., Bozeman's,** a double-current uterine catheter. **C., Eustachian,** an instrument for examining the E. tube, distending or making applications to it. **C. Fever,** systemic disturbance, with fever, following the introduction of the catheter into the urethra. **C., Gouley's,** a solid curved-steel instrument grooved on its inferior aspect, for passing over a guide, through a stricture into the bladder. **C., Lung,** a soft-rubber tube that may be passed down the trachea. **C., Schrötter's,** instruments of hard rubber and of varying caliber, somewhat triangular on section, used for the dilatation of laryngeal strictures. **C., Self-retaining,** one that will hold itself within the bladder without other appliances to assist it.

THE SIZES OF CATHETERS.
The upper number indicates that of the American system; the lower, that of the French.

Catheterism, or Catheterization (*kath'-et-er-izm*, or *kath-et-er-iz-a'-shun*) [*καθετήρ*, a thing put down]. The use or passing of a catheter.

Catheterize (*kath'-et-er-īz*) [*καθετήρ*, a thing put down]. To operate upon with a catheter.

Cathetometer (*kath-et-om'-et-er*) [*κάθετος*, a plumb-line; *μέτρον*, a measure]. An instrument of precision used in craniometry for determining the length, breadth, height, and possible abnormity of the skull.

Cathetometric (*kath-et-o-met'-rik*) [*κάθετος*, a plumb-line; *μέτρον*, a measure]. Relating to the cathetometer.

Cathetometry (*kath-et-om'-et-re*) [*κάθετος*, a plumb-line; *μέτρον*, a measure]. The measurement of the skull by the cathetometer.

Cathodal (*kath'-o-dal*) [*κατά*, down; *ὡδός*, way]. Relating to a cathode.

Cathode (*kath'-ōd*) [*κατά*, down; *ὡδός*, way]. The negative electrode or pole of an electric circuit.

Cathodic (*kath-od'-ik*) [*κατά*, down; *ὡδός*, way]. 1. Relating to a cathode. 2. Proceeding downward; efferent or centrifugal (applied to a nerve-current or nerve-impulse).

Catholicon (*kath-ol'-ik-on*) [*καθολικόν*, universal]. A universal remedy; a cure-all.

Cation (*kat'-e-on*) [*κατά*, downward; *ἰέναι*, to go]. An electro-positive element; one that accumulates at the cathode in electrolysis. See *Ion*.

Catkin (*kat'-kin*) [Ger., *Kätzchen*, dim. of cat]. In biology, the indeterminate deciduous, scaly spike of unisexual sessile flowers, forming the inflorescence of many trees, *e.g.*, the willow and birch. Cf. *Ament*.

Catling, or Catlin (*kat'-ling*, or *kat'-lin*). A long, pointed, two-edged knife for amputating.

Catnep, or Catnip (*kat'-nep*, or *-nip*) [corruption of catmint]. The leaves and tops of the herb *Nepeta cataria*, a stimulant and tonic; a popular remedy for chlorosis, hysteria, etc. Dose of fld. ext. ʒj–ij. Unof.

Catocathartic (*kat-o-kath-ar'-tik*). See *Catacathartic*.

Catoche (*kat'-o-ke*) [*κατοχή*, catalepsy]. Catochus.

Catochus (*kat'-o-kus*) [*κάτοχος*, a holding down]. 1. Catalepsy; coma-vigil. 2. Apparent death; trance.

Catodont (*kat'-o-dont*) [*κάτω*, down; *ὀδούς*, tooth]. Possessing teeth only in the lower jaw.

Catoptric Test, the diagnosis of cataract by means of the reflection of images from the cornea and lens-capsules.

Catoptrics (*kat-op'-triks*) [*κατοπτρικός*, in a mirror]. The laws of the reflection of light.

Catorhinus (*kat-o-rin'-us*) [*κάτω*, below; *ῥίς*, the nose]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the wing of the nose and the anterior nasal spine is between 16.5° and 33°.

Catostomus (*kat-os'-to-mus*) [*κάτω*, below; *στόμα*, the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the wing of the vomer is between 25.5° and 42.5°.

Catoteric (*kat-o-ter'-ik*) [*κατωτερικός*, a carrying downward]. A purgative or cathartic.

Catotica (*kat-ot'-ik-ah*) [*κατωτερικός*, a carrying downward]. Medicines or diseases that affect the internal surfaces of the body.

Catotretous (*kat-ot'-ret-us*) [*κατά*, down; *τρητός*, perforate]. In biology, having the oral and anal apertures on the ventral surface. **C., Amaurosis,** a condition noted in suppurative choroiditis in which the

exudate is visible at a distance as a vivid whitish or yellowish reflex from the pupil. **C. Pupil.** See *Pupil.*

Catouraniscus (*kat-o-ūr-an-is'-kus*) [κάτω, below; οὐρανίσκος, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the center of the posterior margin of the incisor foramen and the premaxillary point is between 20° and 40°.

Catouranus (*kat-o-ūr'-an-us*) [κάτω, below; οὐρανός, the roof of the mouth]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the premaxillary point and the posterior nasal spine is between 17° and 34°.

Cattimandu (*kat-im-an'-doo*) [E. Ind.]. An E. Indian tree, *Euphorbia cattimandoo;* also its medicinal gum. It is used as a cement and as a remedy for rheumatism. When fresh it is an active vesicant. Unof.

Cattle Plague (*kat'-l plāg*). See *Rinderpest.*

Caucasian Idiocy (*kaw-kaz'-yan id'-e-o-se*). See *Idiocy, Ethnic.*

Cauda (*kaw'-dah*) [L.]. A tail-shaped appendage. The tail-like part of the caudatum. **C. cerebelli,** the vermiform process. **C. cerebri,** the part of the encephalon between the pons and optic thalami, consisting of the crura and the tegmentum. **C. dorsalis.** 1. The spinal cord. 2. The oblongata. **C. epididymidis,** the inferior part of the epididymis. **C. equina,** the terminal extremity of the spinal cord, in conjunction with the roots of the sacral nerves. **C. pancreatis,** the slender left extension of the pancreas.

Caudad (*kaw'-dad*) [*cauda*, the tail; *ad*, to]. Toward the tail or cauda; opposed to *cephalad;* in man, downward.

Caudal (*kaw'-dal*) [*cauda*, the tail]. Pertaining to a cauda, or tail. The term *Ural* has been proposed to take the place of caudal.

Caudalis (*kaw-da'-lis*) [*cauda*, a tail]. In biology, applied as the specific name of fins or other organs near the tail.

Caudate (*kaw'-dat*) [*cauda*, a tail]. Having or resembling a tail. **C. Lobe of Liver,** a small elevation of the liver. **C. Nucleus,** the intra-ventricular portion of the corpus striatum. See also *Caudatum.*

Caudatum (*kaw-da'-tum*) [*cauda*, a tail]. A ganglion or free ring of gray matter circling round the lenticularis of the brain. It is massive in the frontal portion, but becomes attenuated caudad; the anterior portion is called the head, the posterior the tail.

Caudex (*kaw'-deks*) [*caudex*, a tree-stem]. In biology, applied to the scaly, unbranching trunk of a palm tree or tree fern.

Caudicle (*kaw'-dik-l*) [*caudex*, the stem of a tree]. In biology, a little stalk, as that of the pollen-masses in orchideous plants.

Caudiduct (*kaw'-de-dukt*) [*cauda*, tail; *ducere*, to draw]. In biology, to draw or carry backward toward the tail.

Cauditrunk (*kaw'-de-trunk*) [*cauda*, tail; *truncus*, trunk]. In biology, that part of the body behind the head of fishes and fish-like mammals.

Caudle (*kaw'-dl*) [ME., *caudel*, a warm drink]. A nutritious food for invalids. It is made as follows: Beat up an egg to a froth; add a glass of sherry and half a pint of gruel. Flavor with lemon-peel, nutmeg, and sugar.

Caudula (*kaw'-du-lah*) [*cauda*, a tail]. In biology, a marginal tail-like process.

Caul (*kawl*) [ME., *calle*, a hood]. 1. A portion or all of the fetal membranes covering the head and carried out in advance of it in labor. 2. The great omentum.

Caulescent (*kaw-les'-ent*) [*caulis*, a stalk]. In biology, applied to plants having a distinct leaf-bearing stem.

Caulicle (*kaw'-lik-l*) [*caulis*, a stalk]. In biology, that portion of the stem of an embryo plant that is below the cotyledons and above the radicle.

Cauliflower Excrescence (*kaw-le-flow'-er eks-kres'-ens*). Epithelioma of the cervix uteri. See also *Verruca acuminata.*

Cauliform (*kaw'-lif-orm*) [*caulis*, a stalk; *forma*, shape]. In biology, resembling a stem.

Cauligenous (*kaw-lij'-en-us*) [*caulis*, a stalk; *genus*, producing]. Borne upon the stem.

Cauline (*kaw'-lin*) [καυλός, a stalk]. In biology, of or pertaining to the stem.

Caulis (*kaw'-lis*) [καυλός, a stalk]. In biology, a plant-stem.

Caulocarpous (*kaw-lo-kar'-pus*) [καυλός, a stem; καρπός, fruit]. In biology, applied to plants that bear fruit from year to year upon the same stem.

Caulome (*kaw'-lōm*) [καυλός, a stem]. In biology, a general term for all kinds of stems.

Caulophyllin (*kaw-lo-fil'-in*) [καυλός, a stalk; φύλλον, a leaf]. A resinoid precipitate from the tincture of caulophyllum. See *Caulophyllum.*

Caulophyllum (*kaw-lo-fil'-um*) [καυλός, stalk; φύλλον, leaf]. Blue Cohosh, "Squaw-root;" the rhizome and rootlets of *C. thalictroides*, growing in Canada and the northern U. S. It contains a glucosid, *Saponin*, and two resins, one of which is *Caulophyllin.* It produces intermittent contractions of the gravid uterus, and possesses diuretic, emmenagogue, and antispasmodic powers. There are no official preparations. Dose of the powdered drug gr. v–xx; of Caulophyllin, gr. ij–v.

Cauma (*kaw'-mah*) [καῦμα, a burning: *pl.*, *Caumata*]. Fever; heat; pyresis; an inflammatory fever; a burn. **C. enteritis.** Synonym of *Intestinal Catarrh, Acute.*

Caumatic (*kaw-mat'-ik*) [καῦμα, a burning]. Pertaining to cauma.

Causalgia (*kaw-sal'-je-ah*) [καυσός, a burning; ἄλγος, pain]. Neuralgia with burning pain, often of the foot; sometimes with a local glossiness of the skin due to impairment of the normal nerve-stimulus of the part.

Causation (*kawz-a'-shun*). See *Etiology.*

Cause (*kawz*) [*causa*, a cause]. The sources, conditions and origins of a result. The preceding factors that unite to produce a given condition. Causes are spoken of as efficient, instrumental, final, primary, secondary, predisposing, controlling, determining, ultimate, exciting, etc. **C. Causans,** the causing cause or the essential predetermining factor. **C., Exciting,** the immediately preceding and conditioning factor. **C., Predisposing,** that which tends to the development of a condition.

Causoma (*kaw-so'-mah*) [καύσωμα; καίειν, to burn: *pl.*, *Causomata*]. A burning; usually an inflammation.

Caustic [*kaws'-tik*) [καίειν, to burn]. A substance that disorganizes or destroys living tissue; it is mostly used in surgery to destroy unhealthy growths. **C. Alkali,** a pure alkaline hydrate or oxid. **C., Common,** potassa fusa or potassa cum calce. **C., Dubois's,** arsenious acid 1, mercuric sulphite 16, dragon's blood 8 parts. **C.-holder,** a porte-caustic. **C., Lunar,** argentic nitrate, or nitrate of silver. **C., Mitigated,** argentic nitrate made less active by fusion with potassium nitrate or argentic chlorid. **C. Potash,** potassium hydrate. See *Potassium.* **C. Soda,** sodium hydrate.

Causticity (*kaws-tis'-it-e*) [καίειν, to burn]. Caustic quality; corrosiveness.

Causticum (*kaws'-tik-um*). See *Caustic.*

Cauter (*kaw'-ter*) [καυτήρ, a burner]. A searing-iron or cautery-iron; any caustic application.

Cauterant (*kaw'-ter-ant*) [καυτήρ, a burner]. 1. Caustic; escharotic. 2. Any caustic substance; a caustic.

Cauterism (*kaw'-ter-izm*). See *Cauterization.*

Cauterization (*kaw-ter-iz-a'-shun*) [καυτηριάζειν, to cauterize]. The surgical application of a cautery; the effect of such application.

Cauterize (*kaw'-ter-iz*) [καυτηριάζειν, to cauterize]. To sear or burn with a cautery or a caustic

Cautery (*kaw'-ter-e*) [καυτήριον; καίειν, to burn]. Primarily, the term was applied to caustics, but more frequently now to the platinum-wire heated by an electric current, or the hot iron, for counter-irritation, removal of tissue, etc. **C., Actual,** the white-hot iron. **C. Button,** iron heated in hot water. **C., Corrigan's.** See *Button.* **C., Dento-Electric,** consists of a looped wire, held by set-screws, in contact with metal conductors that pass through a hard-rubber handle. The battery wires are coupled to two terminals. This appliance is held in the hand like a pencil in writing, and the current is closed by pressing a spring with the forefinger, when the resistance of the loop of wire causes it to become heated. It is employed for obtunding sensitive dentine. **C., Galvanic,** a platinum wire heated by electricity. **C., Gas,** cauterization by a stream of burning gas directed upon the part. **C., Paquelin's,** or **C., Thermo-,** a hollow platinum point kept at ε uniform temperature by a current of benzene vapor. **C., Potential,** or **C., Virtual,** the application of caustic substances.

Cava (*ka'-vah*) [L.: *pl.*, *Cavæ*]. A vena cava.

Caval (*ka'-val*) [*cava*, a hollow]. Relating to a vena cava.

Cavalry Bone (*kav'-al-re bōn*). A bony deposit in the adductor muscles of the thigh.

Cavernoma (*kav-ern-o'-ma*) [*caverna*, a cavern; ὄμα, a tumor]. A cavernous tumor; a cavernous angioma.

Cavernous (*kav'-ern-us*) [*caverna*, a cave]. Having cave-like spaces or hollow places. **C. Bodies,** the corpora cavernosa of the penis. **C. Breathing,** the reverberating or hollow sound of bronchial breathing in dilated or abnormal bronchi. **C. Groove,** the carotid groove. **C. Plexus.** See *Plexus.* **C. Râle.** See *C. Breathing.* **C. Sinus,** situated at the side of the body of the sphenoid. **C. Tissue,** erectile tissue. **C. Tumor.** See *Angioma.* **C. Whisper,** whispering resonance in auscultation, modified by transmission through a cavity. **C. Voice.** See *Pectoriloquy.*

Cavernula Tentacularis. In biology, a subumbral tentacle-funnel, surrounding the base of each tentacle in many *Cubomedusæ* and *Peromedusæ.*

Cavernulæ Subumbrales. In biology, niches of the subumbral cavity in *Medusæ.*

Caviar, or **Caviare** (*kav-e-ar'*) [Fr.]. The salted hard roe of the sturgeon and other large fish.

Cavicorn (*kav'-ik-orn*) [*cavus*, hollow; *cornu*, horn]. In biology, having hollow horns; or a hollow-horned ruminant.

Cavitary (*kav'-it-a-re*) [*cavitarius*, hollow]. Hollow; applied to any nematode worm; any intestinal worm that has a body-cavity; a worm that is not anenterous.

Cavitas (*kav'-it-as*) [L.]. A hollow. **C. cochleata.** See *Duct, Spinal.* **C. pulpæ,** the pulp-cavity of a tooth. See *Dental Cavity.*

Cavity (*kav'-it-e*) [*cavitas*, from *cavus*, hollow]. Any hollow, normal or pathologic. Among the normal cavities are the abdominal, arachnoid, axial, buccal, cranial, frontal, nasal, pelvic, pleural, thoracic, ventricular, etc.; among the abnormal are pulmonary and dental cavities. **C.-plate,** a term applied in mechanical dentistry to a metallic base for artificial teeth, so constructed as to have one or more vacant spaces between it and the gums, which, when applied, and the air exhausted, contributes very greatly to the firmness of its adhesion. **C., Peperitoneal,** a name given by Retzius to the loose and yielding subperitoneal tissue in front of the bladder, under the supposition that it could be inflated. It is not a true cavity, but merely a succession of areolar spaces. **C., Sigmoid.** See *Sigmoid.*

Cavo-valgus (*ka'-vo-val'-gus*) [*cavus*, hollow; *valgus*, bow-legged]. Cavus combined with valgus. See *Club-foot.*

Cavum (*ka'-vum*) [L.]. Any hollow or cavity, normal or pathologic. **C. dentis.** See *Dental Cavity.*

Cavus (*ka'-vus*) [L.]. 1. A hollow; a cavity. 2. Talipes arcuatus; hollow-foot.

Cayenne Pepper (*ki'-en pep'-er*). See *Capsicum.*

Cazenave's Lupus. See *Diseases, Table of.* **C. Solution.** An animal parasiticide used in dermatology. It consists of iodid of sulphur, iodid of potassium, of each 1½ drams, water 32 ounces.

Cazeneuve's Test. See *Tests, Table of.*

Ceanothus (*se-an-o'-thus*) [κεάνωθος, a kind of thistle]. A genus of rhamnaceous shrubs, chiefly N. American. *C. americanus*, New Jersey tea, red root, is used in domestic medicine as an astringent and alterative; its leaves are substituted for tea. Unof.

Ceasma (*se-az'-mah*) [κέασμα, a chip: *pl.*, *Ceasmata*]. A splinter; a fissured state.

Ceasmic (*se-az'-mik*) [κέασμα, a chip]. Fissured; remaining in the primitive fissured state of the embryo. See *Teratism.*

Cebadilla (*thev-ad-el'-yah*) [Sp., "little barley"]. The seed of *Asagræa officinalis*, or *Schœnocaulon officinale;* official in the B. P., and important as the principal source of the alkaloid veratrin. It is highly poisonous.

Cebocephalia (*se-bo-sef-a'-le-ah*) [κῆβος, a kind of monkey; κεφαλή, the head]. The condition of being cebocephalic.

Cebocephalic (*se-bo-sef-al'-ik*) [κῆβος, a kind of monkey; κεφαλή, the head]. Of the nature or appearance of a cebocephalus.

Cebocephalus (*se-bo-sef'-al-us*) [κῆβος, a monkey; κεφαλή, head]. A variety of single autositic monsters of the species cyclocephalus, in which there is entire absence of the nose, with, however, two orbital cavities and two eyes, although the interocular region is narrow and perfectly flat.

Cecal (*se'-kal*) [*cæcum*, blind]. Relating to or of the nature of the cecum; cæcal.

Cecitas (*se'-sit-as*) [L.]. Blindness.

Cecitis (*se-si'-tis*) [*cæcum*, the cecum; ιτις, inflammation]. Inflammation of the cecum; typhlitis, *q.v.*

Cecity (*ses'-it-e*) [*cæcus*, blind]. Blindness.

Cecograph (*se'-ko-graf*) [*cæcus*, blind; γράφειν, to write]. A writing-machine for the use of the blind.

Cecum (*se'-kum*) [*cæcus*, blind]. The large blind pouch or *cul-de-sac* in which the large intestine begins.

Cecutiency (*se-ku'-shen-se*) [*cæcutire*, to become blind]. Tendency to, or the commencement of, blindness.

Cedar (*se'-dar*) [*cedrus*, cedar]. One of the genus of coniferous trees, *Cedrus.* **C.-apple,** an excrescence or gall produced upon the red cedar, *Juniperus virginiana*, by the fungus called *Gymnosporangium macropus.* Cedar-galls are popularly esteemed as an anthelmintic. Dose gr. viij–xviij, in powder. Unof. **C.-Gum,** the fragrant resin of *Callitris arborea*, a coniferous South African tree. It is used in making plasters. Unof. **C.-wood Oil.** See *Cailcedra.*

Cedrela (*sed'-re-lah*) [κεδρελάτη, a cedar-fir tree]. A genus of trees found in tropical regions and allied to mahogany. **C. febrifuga**, of Southern Asia; **C. odorata**, bastard cedar, of tropical America (see *Cailcedra*); **C. rosmarinus**, of Indo-China, and **C. toona**, of India, are among the species that afford active medicines. All unof.

Cedrene (*sed'-drēn*) [*cedrus*, cedar], $C_{15}H_{24}$. A volatile liquid hydrocarbon found in oil of red cedar (see *Juniperus virginiana*), oil of cloves and oil of cubebs. **C. Camphor**, $C_{15}H_{26}O$, a camphor that separates from the oil of red cedar.

Cedrin (*sed'-drin*) [*cedrus*, cedar]. A bitter crystalline substance obtained from cedron.

Cedriret (*sed'-re-ret*). See *Cæroulignone.*

Cedron (*sed'-dron*) [*cedrus*, cedar]. The seeds of *C. simaba*, a popular external remedy in tropical America for the bites of venomous insects and serpents, and of reputed value in malarial fevers. Dose of the fld. ext. ♏j–viij.

Ceke (*thēk'-e*). A Feejee term for elephantiasis of the scrotum.

Celandini (*sel'-an-dīn*). See *Chelidonium.*

Celastrus (*sel-as'-trus*) [κήλαστρος, an evergreen tree]. A genus of trees and shrubs, nearly allied to *Euonymus*. Many of the species are medicinal, and some are poisonous. **C. scandens**, the climbing staff-tree of North America, is cathartic, diuretic, and alterative; it is called waxwork, bitter-sweet, and fever-twig.

Celation (*sel-a'-shun*) [*celatio*, a hiding]. The concealment of illness, of a birth, or of pregnancy.

Cele (*sēl*) [κοιλία, cavity]. An encephalic cavity; used instead of ventricle.

-cele (*sēl*) [κήλη, a tumor]. A suffix denoting a *tumor*.

Celelminth (*se'-lel-minth*) [κοῖλος, hollow; ἕλμινς, worm]. A parasitic worm with a digestive canal or cavity; a cavitary worm.

Celery (*sel'-er-e*) [σέλινον, a kind of parsley]. The stalk of *Apium graveolens*, or common garden celery. It contains *Apiol*, *q. v.* It is reputed to be antispasmodic and nervine. Dose indefinite. **C. Seed**, used to cover the taste of other drugs. Unof.

Celia (*sē'-le-ah*) [κοιλία, the belly]. 1. The belly: the stomach. 2. Any ventricle, or normal cavity of the brain.

Celiac (*sē'-le-ak*) [*cœliacus*; κοιλία, belly]. Abdominal. Pertaining to the belly. **C. Affection**, a chronic intestinal disorder most commonly met with in children between the ages of one and five, characterized by the occurrence of pale, loose stools, not unlike gruel or oatmeal-porridge; they are bulky, not watery, yeasty, frothy, and extremely offensive, and are accompanied by anemia and debility without much emaciation. The exhaustion may be aggravated by intercurrent attacks of watery diarrhea, and death may supervene. It is also called *Diarrhœa alba* or *Diarrhœa chylosa*. It is due probably to a temporary suspension of the pancreatic function. **C. Artery.** Same as *C. Axis*. See *Arteries, Table of.* **C. Axis**, a branch of the abdominal aorta; it divides into the gastric, hepatic, and splenic arteries. See *Arteries, Table of.* **C. Ganglion.** See *Ganglion, Semilunar.* **C. Passion**, painful diarrhea, or dysentery. **C. Plexus.** See *Plexuses, Table of.*

Celiaca (*se-lī'-ak-ah*) [κοιλία, the abdomen]. Diseases of the abdominal organs.

Celiadelphus (*se-le-ad-el'-fus*) [κοιλία, belly; ἀδελφός, brother]. A monstrosity having two bodies joined at the abdomen.

Celiagra (*se-le-a'-grah*) [κοιλία, belly; ἄγρα, seizure]. Abdominal gout.

Celialgia (*se-le-al'-je-ah*) [κοιλία, belly; ἄλγος, pain]. Pain in the abdomen.

Celian, Celine (*se'-le-an, se'-lin*). Same as *Celiac.*

Celiocyesis (*se-le-o-si-e'-sis*) [κοιλία, belly; κύησις, pregnancy]. Abdominal extra-uterine gestation.

Celiolymph (*se'-le-o-limf*) [κοιλία, a cavity; *lympha*, water]. The cerebro-spinal fluid.

Celiomyalgia (*se-le-o-mi-al'-je-ah*) [κοιλία, belly; μῦς, muscle; ἄλγος, pain]. Pain in the abdominal muscles.

Celioncus (*se-le-ong'-kus*) [κοιλία, the belly; ὄγκος, a swelling]. A tumor of the abdomen.

Celiopyosis (*se-le-o-pi-o'-sis*) [κοιλία, belly; πύωσις, a suppuration]. Suppuration in the abdominal cavity.

Celiorrhea (*se-le-or-e'-ah*) [κοιλία, the belly; ῥέειν, to flow]. Diarrhea.

Celioschisis (*se-le-os'-kis-is*) [κοιλία, belly; σχίσις, fissure]. Congenital abdominal fissure.

Celiotomy (*se-le-ot'-o-me*) [κοιλία, belly; τομή, a cutting]. Surgical opening of the abdominal cavity.

Celitis (*se-lī'-tis*) [κοιλία, belly; ιτις, inflammation]. Inflammation of the abdominal organs.

Cell (*sel*) [*cella*, a small, hollow cavity]. 1. In anatomy, any one of the interstitial spaces and small cavities of the bones, etc. 2. In biology, a nucleated mass of protoplasm capable of reproduction. A mass of protoplasm, with or without a cell-wall and with or without a nucleus. 3. A galvanic element, or single member of a galvanic battery without the connecting wire between the metals. See *Battery.* 4. The case or cup in which a zoöid or larva is located. See *Cell-body.* **C., Abbe-Zeiss Counting**, a glass receptacle cemented upon a glass slide, its floor being marked in microscopic squares. It is used for counting the blood-corpuscles. **C., Air.** See *Air-cell.* **C., Ameboid**, a cell capable of changing its form and of moving about like an ameba. **C., Apolar**, a nerve-cell without processes or poles, such as has been ascribed to the sympathetic system. **C., Beaker.** See *C., Goblet.* **C., Betz's**, the motor or ganglionic cells comprising the fourth layer of the motor area of the gray matter of the brain. **C.-body**, the mass of a cell, composed of two substances, the *mitoma*, or *cytomitoma*, and the *paramitoma*. The first is the thread-like basis of the cell-body, the latter, the homogeneous filar and interfilar substance. The nucleus is composed of the *karyomitoma*, or nuclear network, otherwise called the *chromatin*; the *nuclear sap*, or substances contained in the meshes of the chromatin, and from its non-staining quality called *achromatin*; and the *nuclear membrane*, made up of two layers, the outer achromatic, the inner chromatic, or staining. The *nucleoli* are usually multiple, and are composed of more refractile matter. **C., Bunsen**, the same as the Grove cell except that the platinum electrode of the latter is replaced in the Bunsen by a stick of carbon. **C.-capsule**, a thick or unusually strong cell-wall. **C., Ciliated**, one provided with cilia. **C. of Corti**, any one of the hair-cells on the outer surface of the organ of Corti. **C., Cylindrical**, a variety of epithelial cell. **C., Daniell's**, a battery cell containing two fluids, viz., a saturated solution of sulphate of copper and a semi-saturated solution of sulphate of zinc. In the former is placed a sheet of metallic copper, and in the latter a mass of zinc, these two metals forming the electrodes of the cell. **C., Daughter-**, a cell originating from the division of the protoplasm of a mother-cell; any one of the young cells found within the substance of an undivided mother-cell. **C. of Deiters**, one of the cells with fine processes resting on the basilar membrane of the cochlea, beneath the air-cells; also a nucleated cell of the neuroglia. **C., Demilune**, *Giannuzzi's cells*, granular protoplasmic cells found in mucous glands,

lying between the mucous cells and the basement membrane. They play an important part in the functional activity of the gland. **C.-Doctrine,** the theory that the cell is the unit of organic structure, and that cell-formation is the essential process of life and its phenomena. **C., Edison-Lalande,** a variety of cell used in making galvanic batteries. **C., Electrolytic,** a cell or vessel containing an electrolyte, in which electrolysis is carried on. **C., Endothelial,** one of those lining the intima of the blood-vessel system. **C., Epidermic,** or **Epithelial,** one of those covering the membranes of the free surface of the body. **C., Ethmoidal,** any one of the cellular cavities of the lateral masses of the ethmoid bone. Called also *ethmoidal sinuses*. **C., Ganglion,** a cell of the gray matter of the brain or spinal cord. **C. of Giannuzzi.** See *C., Demilune*. **C., Giant,** any polynucleated body of protoplasmic matter occurring in tuberculosis, sarcoma, etc. **C.-globulins,** Halliburton's name for forms of globulin that occur in lymph-corpuscles and extracted from them by solutions of sodium chlorid. **C., Goblet,** a form of epithelial cell. **C., Gowers's,** an apparatus for counting blood-corpuscles. **C., Grenet,** a variety of open cell used in making galvanic batteries. **C., Grove,** a two-fluid battery cell, the fluids being dilute sulphuric and nitric acids and the metals immersed in them respectively zinc and platinum. **C.-islets,** the centers of most active growth and proliferation in young cellular tissues. They contain the stores of nutriment that are gradually dissolved and digested. **C., Law,** a variety of cell used in making galvanic batteries. **C., Leclanché,** a variety of cell used in making galvanic batteries. It may be made as a liquid cell or as a dry cell, the latter being preferable. **C., Lymphoid,** a large ameboid cell. **C., Mother-,** a cell that divides its protoplasm and gives each part a new cell-wall. **C., Mounting.** See *Mounting-cell*. **C.-Multiplication,** Cytogenesis, a name given to the process of reproduction of cells. It may be *endogenous*, as when the cell-contents break up by segmentation into separate nucleated masses within the cell-wall; *gemmiparous*, as when new cells bud from the mother-cell; and *fissiparous*, as when the mother-cell divides by cleavage into two or more cells. **C., Neuro-muscular,** a name given to certain cells of lower life-forms, that act in part as nerves and in part as muscles. **C.-nests,** *Epidermic Pearls:* globular masses of flattened cells contained in epitheliomata. **C., Olfactory,** any one of the cells that lie between the network of epithelial cells in the nasal fossæ. They consist of a body and two processes, one running outward to the surface of the mucous membrane, the other running inward and connected with filaments of the olfactory nerve. **C.-parasite,** in biology, applied to any one of various microparasites, as, *e.g.*, a coccidium, living within a cell. **C.-sap,** in biology, the more fluid portion of the cell-contents. **C. of Schultze.** Same as *C., Olfactory*. **C., Seminal,** any one of the epithelial cells contained in the membrana propria and constituting the seminal tubes. **C., Sphenoidal,** one of the two large cavities in the interior of the body of the sphenoid bone. **C., Squamous,** a variety of epithelial cells. **C., Stammer's,** a variety of cell used in making galvanic batteries. **C.-substance,** in biology, the material composing a cell. **C., Thoma-Zeiss.** Same as *C., Abbe-Zeiss*. **C., Vasofactive,** or **Vasoformative,** a cell that in embryonic or very early life, and probably in certain neoplasms, anastomoses with other similar cells so as to form blood-vessels.

Cella (*sel'-ah*) [L.]. A portion of the paracele extending caudad from the porta. **C. lateralis,** the lateral ventricle of the brain, or one of its cornua. **C. media,** the central cornu of the lateral ventricle, or that part of the ventricle whence the cornua extend.

Cellæform (*sel'-e-form*) [*cella*, a cell; *forma*, shape]. Resembling a cell, but not such morphologically. Cf. *Celliform*.

Celliferous (*sel-if'-er-us*) [*cella*, cell; *ferre*, to bear]. Producing, forming, or bearing cells.

Celliform (*sel'-if-orm*). See *Cellæform*.

Celloid (*sel'-oid*) [*cella*, a cell; εἶδος, form]. Resembling a cell.

Celloidin (*sel-oid'-in*). A concentrated form of collodion for use in imbedding objects for histologic purposes.

Cellula (*sel'-u-lah*). See *Cellule*.

Cellulæ gangliosæ. Ganglion cells, or mesodermal nerve cells; neuroblasts. **C. palpantes,** tactile cells.

Cellular (*sel'-u-lar*) [*cella*, cell]. Relating to or composed of cells. **C. Cartilage,** cartilage composed mainly of large cells, with but little intercellular substance. **C. Membrane, C. Tissue,** areolar tissue; bony connective tissue; cancellous tissue. **C. Therapy,** the name applied by Aulde to the method in therapeutics of exhibiting properly-selected medicaments with a view to restoration of cell-function. It aims to apply scientifically those remedies that experience has shown to possess special curative properties in the restoration of disordered functions.

Cellule (*sel'-ūl*) [*cellula*, a small cell]. A small cell or cavity.

Celluliferous (*sel-u-lif'-er-us*) [*cellula*, a little cell; *ferre*, to bear]. In biology, producing small cells.

Cellulitis (*sel-u-li'-tis*) [*cellula*, a small cell; ιτις, inflammation]. A diffuse inflammation of cellular tissue. **C., Pelvic.** See *Parametritis*.

Celluloid (*sel'-u-loid*) [*cellula*, a little cell; εἶδος, form]. A valuable product of the action of camphor upon pyroxylin. It is prepared in a great variety of forms, both transparent and opaque, colored uniformly or mottled and striated. It cannot be caused to explode by heat, friction, or percussion. When brought into contact with flame it burns like paper. It dissolves in warm, moderately concentrated sulphuric acid, and is also soluble in glacial acetic acid, rapidly in warm, moderately concentrated nitric acid (four volumes of fuming acid to three of water), and in a hot, concentrated solution of caustic soda. The density of celluloid ranges from 1.310 to 1.393. When heated to 125° C. it becomes plastic and can be moulded into any desired shape. Separate pieces can also be welded together by simple pressure at this temperature. It is useful in various ways in surgery. It is used sometimes to form a plastic base for artificial teeth, known by various names, as "Rose Pearl," "Pyroxylin," etc. See *Zylonite*.

Cellulose (*sel'-u-lōs*) [*cellula*, a little cell], $C_{12}H_{20}O_{10}$. Wood fiber; lignose. The principal ingredient of the cell-membranes of all plants. It is a white, amorphous mass, insoluble in most of the usual solvents. In biology, the primary substance of organic cell-walls, characteristic of plant-cells, but found in the *Tunicata* among animals. It is dissolved by Schweitzer's reagent (ammonium-cupric-oxid) and decomposed by several forms of bacteria, *e.g.*, *Bacillus butyricus*, Prazmowski; *Bacterium gummis*, Comes, and *Bacterium putredinis*, Davaine. To stain.—Use Grenacher's Alcoholic Borax-Carmin, Ehrlich's or Delafield's Hematoxylin, Methyl-Green, Methylene-Blue, Safranin, Fuchsin, Chlor. Zinc, Iodin, Phloroglucin, Anilin, Chlorid. See, also, *Carbohydrates, Table of*.

Celology (*sel-ol'-o-je*) [κήλη, hernia; λόγος, science]. That branch of surgical science that treats of hernia.

Celom, or Celoma (*se'-lom*, or *se-lo'-mah*) [κοίλωμα, a cavity]. A term used by embryologists and others to denote the body-cavity in its widest morphologic sense; the space between the ectoderm and the entoderm.

Celophlebitis (*se-lo-fle-bi'-tis*) [κοῖλος, hollow; φλέψ, vein; ῖτις, inflammation]. Inflammation of a vena cava.

Celophthalmia (*se-loff-thal'-me-ah*) [κοῖλος, hollow; ὀφθαλμός, eye]. Hollowness of the eyes.

Celoscope (*se'-lo-skōp*) [κοῖλος, hollow; σκοπεῖν, to observe]. An instrument for examining the cavities of the body by means of the electric light, enclosed in a flask and mounted upon a glass shank.

Celosis (*se-lo'-sis*) [κοῖλος, hollow]. The formation of any cavity.

Celosoma (*se-lo-so'-mah*) [κήλη, hernia; σῶμα, a body]. 1. A species of single autositic monsters characterized by "more or less extensive body-cleft with eventration, associated with various anomalies of the extremities, of the genito-urinary apparatus, of the intestinal tract, and even of the whole trunk." 2. A variety of the foregoing species in which there is a lateral or median eventration, with fissure, atrophy, or even total absence of the sternum, and protrusion of the heart.

Celostomia (*se-lo-sto'-me-ah*) [κοῖλος, hollow; στόμα, mouth]. Hollowness of the voice.

Celotome (*se'-lo-tōm*) [κήλη, hernia; τέμνειν, to cut]. A hernia-knife.

Celotomy (*se-lot'-o-me*) [κήλη, hernia; τέμνειν, to cut]. The operation for strangulated hernia by incision of the stricture.

Celsus's Operations. See *Operations, Table of.*

Celtis (*sel'-tis*) [L., an African species of lotus]. A genus of ulmaceous trees. **C. australis**, the European nettle-tree, honey-berry, or lote, has mild, astringent leaves and bark. **C. occidentalis**, the hackberry of N. America, has edible, astringent berries; the bark is said to be anodyne, astringent, febrifuge. Unof.

Cement (*se-ment'*) [*cæmentum*, a rough stone]. Any plastic material capable of becoming hard and of binding together the objects that are contiguous to it; filling-material for the teeth; the crusta petrosa of the teeth. See *Teeth.* **C.-disc**, the glandular disc of orchids. **C.-duct**, the duct of the cement-gland in cirriped crustaceans. **C., Shellac**, a cement for sealing microscopic preparations and for making shallow cells. It is prepared by dissolving the gum or scales of shellac in about an equal volume of alcohol. Decant or filter the fluid, and to prevent brittleness add to every 50 parts 5 parts each of castor oil and Venetian turpentine.

Cementoblast (*se-ment'-o-blast*) [*cæmentum*, cement; βλαστός, germ]. A cement-corpuscle in tooth-tissue; more correctly, an osteoblast that takes part in the development of the dental cement.

Cemento-dentinary (*se-ment-o-den'-tin-a-re*) [*cæmentum*, cement; *dens*, *dentis*, a tooth]. Relating to the cement and dentine of a tooth.

Cementoma (*se-ment-o'-mah*) [*cæmentum*, cement; ὄμα, tumor: *pl.*, *Cementomata*]. A tumor thrown out by the irritated alveolar periosteum.

Cementum (*se-ment'-um*). See *Tooth* and *Cement.*

Cenanthy (*se-nan'-the*) [κενός, empty; ἄνθος, flower]. In biology, that condition of a flower in which the stamens and pistils are suppressed.

Cenchrus (*seng'-krus*) [κέγχρος, a small grain]. In biology, a small spot on the metathorax of an insect.

Cenesthesis (*sen-es-the'-sis*) [κοινός, common; αἴσθησις, feeling]. A sense of existence, either painful or pleasurable. It is the prevailing conscious state of feeling, either of depression or of exaltation, which is the resultant of the subconscious organic sympathies of the whole organism. It does not exceed physiologic limits so long as it does not exclude the normal exercise of mental functions.

Cenogenetic (*se-no-jen-et'-ik*) [κοινός, common; γένεσις, generation]. In biology, a modified, shortened, and simplified mode of development.

Cenogenous (*sen-oj'-en-us*) [κοινός, common; γόνος, produced]. In biology, the power of reproducing by means of eggs at one time and viviparously at another, as seen in the *Aphides.*

Cenosis (*sen-o'-sis*) [κένωσις, a draining]. Evacuation; apocenosis.

Cenosphæra (*sen-o-sfe'-rah*) [κενός, empty; σφαῖρα, sphere]. In biology, the spherical skeleton of certain radiolarians.

Cenospudia (*sen-o-spu'-de-ah*) [κενός, empty; σπουδή, zeal]. "Brown study;" mental absorption, or anxiety with regard to unimportant matters.

Cenotic (*sen-ot'-ik*) [κένωσις, a draining]. Causing cenosis; drastic; purgative.

Centaurea (*sen-taw'-re-ah*) [κένταυρος, centaur]. A genus of composite-flowered herbs. **C. benedictus.** See *Carduus.* **C. centaurium**, the greater centaury of Europe, is aromatic, astringent, diaphoretic, and stomachic. **C. cyanus**, corn-flower, blue-bottle; once used for fevers and in preparing collyria. **C. solstitialis**, Barnaby's thistle; diuretic and antipyretic. **C. nigra**, of Europe (knap-weed, centaury), is astringent and diuretic. All unof.

Centaury (*sen'-taw-re*) [*centauria*]. A popular name for various plants of the genera *Centaurea*, *Erythræa*, *Sabbatia*, *Chlora*, etc. It is used as a simple, bitter tonic. Dose ʒ ss–j in decoction several times a day. Unof.

Center (*sen'-ter*) [κέντρον, the center]. The middle point of any surface or of a body. The ganglion or plexus whence issue the nerves controlling a function. **C., Accelerating**, a probable center in the oblongata sending accelerating fibers to the heart. They leave the cord through the rami communicantes of the lower cervical and upper six thoracic nerves, passing thence into the sympathetic. **C., Anospinal**, controls defecation; it is situated at the level of the 5th, 6th, and 7th lumbar vertebræ; but for the coordinated activity it must remain in connection with the brain. **C., Auditory**, probably in the temporosphenoidal lobes, upon each side. **C., Broca's.** See *C., Speech.* **C., Cardio-inhibitory**, in the oblongata, carried by the vagus. **C., Ciliospinal**, connected with the dilatation of the pupil; it is in the lower cervical part of the cord. It controls the movements of the ciliary body. **C., Convulsional**, in the oblongata, on the floor of the 4th ventricle. **C. for Closure of Eyelids**, in the oblongata, a part of the facial center. **C., Coughing**, in the oblongata, above the respiratory center. **C., Diabetic**, in the posterior part of the anterior half of the floor of the 4th ventricle, in the median line. **C., Ejaculation**, Budge's genitospinal center, 4th lumbar vertebra (rabbit). **C., Erection**, is in the spinal cord, but is controlled from the oblongata. **C. for Mastication and Sucking**, facial and hypoglossal centers. **C. for Secretion of Saliva**, on the floor of the 4th ventricle. **C., Gustatory and Olfactory**, in the uncinate gyrus. **C., Heat-regulating or Temperature**, the center for the control of body-temperature. See *Thermotaxis.* **C., Leg**, in the ascending frontal convolution. **C., Micturition**, the vesico-spinal center of Budge, at the level of the lumbar vertebræ; coördination requires cerebral connection. **C. of Ossification**, the place in bones at which ossification begins. **C., Parturition**, at the level of the 1st and 2d lumbar vertebræ. **C., Respir-**

atory, in the oblongata, between the nuclei of the vagus and accessorius; called by Fluorens the *Nœud Vital,* or *Vital Point.* **C., Sensory,** or Psychosensorial Areas, occipital and temporosphenoidal lobes, probably the same as, or intimately associated with, the motor centers of the parts. **C., Sneezing,** same as for nerves for the muscles of expiration. **C., Spasm,** in the oblongata, at its junction with the pons. **C., Speech,** in the third left frontal convolution in right-handed people. **C., Swallowing,** on the floor of the 4th ventricle. **C., Sweat,** the dominating center is in the oblongata, with subordinate spinal centers. **C., Trophic.** See *Trophic.* **C., Upper, for Dilator Pupillæ,** in the oblongata. **C., Vasodilator,** probably exists in the oblongata, with a function the opposite of that of the vaso-motor. **C., Vasomotor,** in the oblongata. **C., Vesicospinal.** See *Micturition C.* **C., Visual,** in the occipital lobe, especially in the cuneus.

Centering (*sen′-ter-ing*) [κέντρον, a center]. In microscopy, the arrangement of an object or an accessory so that its center coincides with the optic axis of the microscope. In optics, having the pupil and the optical center of the refracting lens in the same axis.

Centesimal. In the proportion of 1 to 100.

Centigrade (*sen′-te-grad*) [*centum,* a hundred; *gradus,* a step]. Abbreviation, C. Having 100 divisions or degrees. **C. Thermometer,** a thermometer with zero as the freezing point and 100° as the boiling point of water. See *Thermometer.*

Centigram (*sen′-te-gram*) [*centum,* a hundred; γράμμα, a small weight]. The hundredth of a gram, equal to 0.1543 of a grain avoirdupois, or one-sixth of a grain Troy.

Centiliter (*sen′-til-e-ter*) [*centum,* a hundred; λίτρα, a pound]. The hundredth of a liter, equal to 0.6102 of an English cubic inch.

Centimeter (*sen′-tim-e-ter*) [*centum,* a hundred; μέτρον, a measure]. The hundredth part of a meter, equal to 0.39371 (or about $\frac{2}{5}$) of an English inch.

Centinormal (*sen-te-nor′-mal*) [*centum,* a hundred; *norma,* normal]. The $\frac{1}{100}$ of the normal; applied to a solution the $\frac{1}{100}$ of the strength of a normal solution.

Centrad (*sen′-trad*) [*centrum,* the center; *ad,* to]. Toward the center, or toward the median line. See *Position* and *Direction, Table of.*

Central (*sen′-tral*) [*centrum,* the center]. Relating to the center; passing through the center. See *Position and Direction, Table of.* **C. Artery,** an artery in the optic nerve and retina; it passes to the optic papilla and then divides. See *Arteries, Table of.* **C. Ganglia,** the corpora striata and thalami optici. **C. Ligament,** the terminal filum of the spinal cord. See *Ligament.* **C. Lobe,** the island of Reil. **C. Stop.** See *Diaphragm.*

Centraxonial (*sen-traks-o′-ne-al*) [κέντρον, center; ἄξων, axis]. In biology, having a central axial line.

Centre (*sen′-ter*). See *Center.*

Centren (*sen′-tren*) [*centrum,* a center]. Belonging solely to a center.

Centric, Centrical (*sen′-trik, sen′-trik-al*) [*centrum,* a center]. Relating to a center, especially to a nerve-center. In biology, a term applied to the internal structure of such leaves as show no distinctly developed pallisade-tissue, and no considerable structural differences between the upper and under surfaces.

Centricipital (*sen-tris-ip′-it-al*) [*centrum,* center; *caput,* a head]. Relating to the centriciput; parietal. **C. vertebra,** the second or more central of the three principal cranial vertebræ.

Centriciput (*sen-tris′-ip-ut*) [*centrum,* center; *caput,* head]. The mid-head: the second cranial segment situated between the sinciput and occiput.

Centrifugal (*sen-trif′-u-gal*) [*centrum,* the center; *fugere,* to flee]. Receding from the center toward the periphery. **C. Nerves,** those (mostly motor) conveying impulses toward the peripheral parts of the body.

Centrifugalized Milk. Milk from which the cream has been separated by whirling it in a centrifugal machine.

Centripetal (*sen-trip′-et-al*) [*centrum,* the center; *petere,* to seek]. Traveling toward the center from the periphery. **C. Nerves,** those (mostly sensory) conveying impressions from the peripheral organs toward the cerebro-spinal nervous system.

Centro-acinal, or **Centro-acinar** (*sen-tro-as′-in-al,* or *cen-tro-as′-in-ar*) [*centrum,* center; *acinus,* a grape]. Belonging to the center of an acinus. **C. Cells** are found in the acini of the pancreas, etc.

Centrolecithal (*sen-tro-les′-ith-al*) [κέντρον, center; λέκιθος, yolk]. In embryology, having the food-yolk centrally located in the protoplasm.

Centrosoma (*sen-tro-so′-mah*) [κέντρον, center; σῶμα, body: *pl.,* *Centrosomata*]. The central mass or body of any corpuscle, as distinguished from its appendages. **C. of Boveri,** in embryology, a separate central body contained in the sphere of attraction, at the pole of the resting nucleus in a dividing ovum.

Centrosome (*sen′-tro-sōm*). See *Centrosoma.*

Centrostigma (*sen-tro-stig′-mah*) [κέντρον, center; στίγμα, a point]. In morphology, having all the axes converging to a central point.

Centrotriæne (*sen-tro-tri′-e-ne*) [κέντρον, center; τρίαινα, a trident]. In morphology, a triæne spicule whose arms arise from a central bundle or rhabdom.

Centrotylote (*sen-trot′-il-ot*) [κέντρον, center; τυλωτός, knobbed]. In biology, swollen in the middle.

Centrum (*sen′-trum*) [L.]. The center or middle part; the body of a vertebra, exclusive of the bases of the neural arches. **C. Anospinale, Budge's,** the center for the movements of the anal sphincters, located in the cord at the level of the fifth lumbar vertebra in the dog, and between the sixth and seventh in the rabbit. **C. Ovale Majus,** the large mass of white matter appearing when either of the hemispheres is cut down to the level of the *corpus callosum.* **C. Ovale Minus,** the white matter appearing when the upper part of a hemisphere of the brain is removed.

Cenurus (*sēn-u′-rus*). See *Cœnurus.*

Cepaceous (*se-pa′-she-us*) [*cæpa,* an onion]. Having the smell of onions.

Cephaelis (*sef-a-′el-is*). See *Ipecacuanha.*

Cephalad (*sef′-al-ad*) [κεφαλή, head; *ad,* to]. Toward the head. See *Position and Direction, Table of.*

Cephalagra (*sef-al-a′-grah*) [κεφαλή, head; ἄγρα, seizure]. Gouty headache.

Cephalalgia (*sef-al-al′-ge-ah*) [κεφαλή, head; ἄλγος, pain]. Pain in the head. The word is variously qualified, as *C. Anemica, C. Contagiosa, C. Influenza, C. Epileptica, C. Nervosa,* etc.

Cephalalgic (*sef-al-al′-jik*) [κεφαλή, head; ἄλγος, pain]. Relating to headache.

Cephalanthium (*sef-al-an′-the-um*) [κεφαλή, head; ἄνθος, a flower]. In biology, the capitulum, or flower cluster, of one of the *Compositæ.*

Cephalanthus (*sef-al-an′-thus*). See *Button-bush.*

Cephalate (*sef′-al-āt*) [κεφαλή, head]. In biology, possessing a head.

Cephalea (*sef-al-e′-ah*) [κεφαλαία, headache]. Headache; especially severe or chronic headache, with intolerance of light and sound.

Cephalematocele. See *Cephalhematocele.*

Cephalematoma. See *Cephalhematoma.*

Cephalemia (*sef-al-e′-me-ah*) [κεφαλή, head; αἷμα, blood]. An abnormal determination of blood to the head.

Cephaletron (*sef-al-e′-tron*) [κεφαλή, head; ἦτρον, the abdomen]. In biology, applied to the anterior portion of the body of certain crustaceans.

Cephalhæmatoma (*sef-al-he-mat-o′-mah*). See *Cephalhematoma*.

Cephalhematocele (*sef-al-he-mat′-o-sēl*) [κεφαλή, head; αἷμα, blood; κήλη, tumor]. An hematocele situated beneath the scalp, and communicating with a dural sinus.

Cephalhematoma (*sef-al-he-mat-o′-mah*) [κεφαλή, head; αἷμα, blood; ὄμα, tumor: *pl.*, *Cephalhematomata*]. A collection of blood between the pericranium and the exterior of one or more bones of the skull.

Cephalhydrocele (*sef-al-hi′-dro-sēl*) [κεφαλή, head; ὕδωρ, water; κήλη, tumor]. Effusion of cerebral fluid beneath the occipito-frontal aponeuroses in fractures of the skull.

Cephalic (*sef-al′-ik*) [κεφαλή, head]. Pertaining to the head. The terms *Proral*, *Cranial*, *Rostral*, *Akral* have been proposed to take the place of Cephalic. See *Position and Direction, Table of*. **C. Index.** See *Index*. **C. Souffle**, a blowing murmur sometimes heard in auscultation of the head; a sign of aneurysm or of anemia. **C. Vein.** See *Vein*. **C. Version.** See *Version*. **C. Tetanus.** See *Kopf-Tetanus*.

Cephalin (*sef′-al-in*) [κεφαλή, the head]. An unstable phosphatic substance obtained from brain-substance; it is allied to lecithin; at least five modifications of it are reported to exist; it is called also *Kephalin*.

Cephalitis (*sef-al-i′-tis*). See *Encephalitis*.

Cephalization (*sef-al-iz-a′-shun*) [κεφαλή, the head]. In biology, Dana's term for that specialization the tendency of which is to concentrate important parts and organs at the head region of the trunk.

Cephalize (*sef′-al-iz*) [κεφαλή, head]. To develop head-organs.

Cephalobranchiate (*sef-al-o-brang′-ke-at*) [κεφαλή, head; βράγχια, gills]. In biology, with external branchial tufts in the head-region.

Cephalocathartic (*sef-al-o-kath-ar′-tik*) [κεφαλή, head; καθαρτικός, purging]. 1. Purging or relieving the head. 2. A medicine that relieves the head.

Cephalocele (*sef′-al-o-sēl*) [κεφαλή, head; κήλη, tumor]. Hernia of the brain; protrusion of a mass of the cranial contents.

Cephalocentesis (*sef-al-o-sen-te′-sis*) [κεφαλή, head; κέντησις, puncture]. Surgical puncture of the cranium.

Cephalocercal (*sef-al-o-ser′-kal*) [κεφαλή, head; κέρκος, tail]. In anatomy, from head to tail.

Cephalochord (*sef′-al-o-kord*) [κεφαλή, head; χορδή, cord]. The cephalic portion of the *chorda dorsalis* in embryonic life.

Cephaloclast (*sef′-al-o-klast*). See *Cephalotribe*.

Cephaloconus (*sef-al-o-ko′-nus*) [κεφαλή, head; κῶνος, a cone]. In biology, applied to one of the processes on the head of a pteropod.

Cephalodium (*sef-al-o′-de-um*) [κεφαλή, head; εἶδος, form]. In biology, one of the outgrowths on the thallus of a lichen, and in which gonidia or algal cells are found.

Cephalodymia (*sef-al-o-dim′-e-ah*) [κεφαλή, head; δίμεναι, to mingle]. Teratologic union of twins by the merging of their heads together.

Cephalodynia (*sef-al-o-din′-e-ah*) [κεφαλή, head; ὀδύνη, pain]. Rheumatism affecting the occipito-frontalis muscle, the pain being chiefly experienced in the forehead or occiput, and at times involving the eyeballs.

Cephalograph (*sef′-al-o-graf*) [κεφαλή, head; γράφειν, to write]. An instrument for recording the contours of the head.

Cephalography (*sef-al-og′-ra-fe*) [κεφαλή, head; γράφειν, to write]. A description of the head.

Cephaloid (*sef′-al-oid*) [κεφαλή, head; εἶδος, likeness]. Resembling the head.

Cephalology (*sef-al-ol′-o-je*) [κεφαλή, head; λόγος, science]. The science of cranial measurements and indications.

Cephaloma (*sef-al-o′-mah*) [κεφαλή, head; ὄμα, tumor: *pl.*, *Cephalomata*]. Encephaloid carcinoma; soft carcinoma.

Cephalomelus (*sef-al-om′-el-us*) [κεφαλή, head; μέλος, a part]. A form of double monster in which there is a supernumerary limb attached to the head.

Cephalomeningitis (*sef-al-o-men-in-ji′-tis*) [κεφαλή, head; μῆνιγξ, a membrane; ιτις, inflammation]. Cephalic meningitis; inflammation of the cephalic meninges.

Cephalometer (*sef-al-om′-et-er*) [κεφαλή, head; μέτρον, a measure]. An instrument for measuring the head.

Cephalometry (*sef-al-om′-et-re*) [κεφαλή, head; μέτρον, a measure]. 1. The use of the cephalometer: craniometry. 2. The art of taking measurements of the head to determine the position of the fissures and convolutions of the brain.

Cephalont (*sef′-al-ont*) [κεφαλή, head; ὤν(ὀντ), being]. In biology, that phase of a gregarine in which an epimerite is added to the anterior cyst or protomerite.

Cephalo-orbital (*sef-al-o-or′-bit-al*) [κεφαλή, head; *orbita*, an orbit]. Relating to the cranium and orbits. **C. Index.** See *Index*.

Cephalo-orbito-nasal (*sef-al-o-or-bit-o-na′-zal*) [κεφαλή, the head; *orbita*, an orbit; *nasalis*, of the nose]. Relating to the cranium, orbits, and nose.

Cephalopagus (*sef-al-op′-ag-us*) [κεφαλή, head; παγείς, joined]. An ensomphalic monstrosity having the heads united at the top.

Cephalopathic (*sef-al-o-path′-ik*) [κεφαλή, head; πάθος, disease]. Pertaining or belonging to a disease of the head.

Cephalopathy (*sef′-al-o-path-e*) [κεφαλή, head; πάθος, disease]. Any disease of the head.

Cephalophalsia (*sef-al-o-fal′-se-ah*). Same as *Cephalotripsy*.

Cephalophragm (*sef′-al-o-fram*) [κεφαλή, head; θράγμα, division]. In biology, a Y-shaped septum transversely dividing the head-chamber of certain insects.

Cephalophyma (*sef-al-o-fi′-mah*). Synonym of *Cephalhematoma*.

Cephalorrhachidian (*sef-al-o-rak-id′-e-an*) [κεφαλή, head; ῥάχις, spine]. Same as *Cerebro-spinal*.

Cephaloscope (*sef′-al-o-skōp*) [κεφαλή, head; σκοπεῖν, to examine]. A stethoscope for use in auscultation of the head or the ear.

Cephalo-spinal (*sef-al-o-spi′-nal*). See *Cerebro-spinal*.

Cephalostat (*sef′-al-o-stat*) [κεφαλή, head; ἱστάναι, to cause to stand]. A vise or clamp for holding a patient's head.

Cephalostegite (*sef-a-los′-tej-it*) [κεφαλή, head; στέγος, a roof]. In biology, the anterior or head region of the carapace of a crustacean.

Cephalot, or Cephalote (*sef′-al-ot*, or *-lōt*) [κεφαλωτός, headed]. A brown, resinoid fat obtainable from brain-substance. Cf. *Cerebrot*.

Cephalothorax (*sef-al-o-tho′-raks*) [κεφαλή, head; θώραξ, a breastplate]. In biology, the anterior portion of the body of an arthropod formed by the union of the head and thorax.

Cephalothryptor (*sef-al-o-thrip′-tor*). See *Cephalotribe*.

Cephalotome (*sef'-al-o-tōm*) [κεφαλή, the head; τέμνειν, to cut]. The instrument used in performing cephalotomy.

Cephalotomy (*sef-al-ot'-o-me*) [κεφαλή, head; τόμη, section]. The opening or division of the head of the fetus in labor.

Cephalotribe (*sef'-al-o-trib*) [κεφαλή, the head; τρίβειν, to crush]. An instrument for crushing the fetal head.

Cephalotripsy (*sef'-al-o-trip-se*) [κεφαλή, head; τρίβειν, to bruise]. The operation of crushing the fetal head when delivery is otherwise impossible.

Cephalotriptor (*sef-al-o-trip'-tor*). See *Cephalotribe.*

Cephalotroch (*sef'-al-o-trok*) [κεφαλή, head; τροχός, a wheel]. In biology, a molluscan or annelid larva having a cephalic circlet of cilia.

Cephalous (*sef'-al-us*) [κεφαλή, head]. In biology, having a head. The opposite of *Acephalous.*

Cephaloxia (*sef-al-oks'-e-ah*). Synonym of *Torticollis.*

Cera (*se'-rah*) [L.]. Wax. A mixture of *cerotic acid, cerolein,* and *myricin,* gathered by the honey-bee from the pollen of flowers and the leaves of plants. **C. alba,** white wax; prepared by bleaching yellow wax. It is valuable as an ingredient of cerates and ointments **C. flava,** yellow wax; it possesses an agreeable balsamic odor. It is soluble in ether, hot alcohol, and chloroform.

Ceraceous (*se-ra'-se-us*) [*cera,* wax]. Waxy; resembling wax.

Ceramidium (*ser-am-id'-e-um*) [κέραμος, pottery]. In biology, the urn-shaped spore-bearing receptacle of certain algæ.

Cerasein (*ser-a'-se-in*) [*cerasus,* a cherry-tree]. A precipitate from a tincture of the bark of choke-cherry, *Prunus virginiana* (true); used as a quinin-substitute, and as a diaphoretic and sedative. Dose 2 to 10 grains. Unof.

Cerasin (*ser'-as-in*) [*cerasus,* a cherry-tree]. 1. An ingredient of the gum of cherry, peach, and plum trees, apparently identical with bassorin. 2. A crude precipitate from tincture of *Choke-cherry, q. v.*

Cerasinose (*ser-as'-in-ōs*) [*cerasus,* a cherry-tree]. A crystalline carbohydrate isomeric with arabinose; it is derivable from cherry-gum.

Cerate (*se'-rāt*) [*cera,* wax]. In pharmacy, an unctuous preparation consisting of wax mixed with oils, fatty substances, or resins, and of such a consistence that at ordinary temperatures it can be readily spread upon linen or muslin, and yet is so firm that it will not melt or run when applied to the skin. There are eight official cerates. **C., Goulard's.** See *Goulard.* **C., Hufeland's.** See *Hufeland.*

Ceratectasia (*ser-at-ek-ta'-ze-ah*). See *Keratectasia.*

Ceratectomy (*ser-at-ek'-to-me*). See *Kerectomy.*

Ceratiasis (*ser-at-i'-as-is*). See *Keratiasis.*

Ceratin (*ser'-at-in*). See *Keratin.*

Ceratitis (*ser-at-i'-tis*). See *Keratitis.*

Cerato- (*ser'-at-o-*). See *Kerato-.*

Ceratum (*se-ra'-tum*). See *Cerate.*

Cerbera (*ser'-ber-ah*) [*Cerberus,* a dog of mythology]. A genus of apocynaceous old-world trees, several of them actively poisonous. **C. odollam,** of India, has purgative leaves and bark; it contains *Cerberin, q.v.* **C. tanghin,** the ordeal-tree of Madagascar, is highly poisonous; one seed is said to have destroyed 20 people.

Cerberin (*ser'-ber-in*) [*Cerberus,* a dog of mythology]. A poisonous glucosid from the seeds of *Cerbera odollam* and other related trees.

Cercaria (*ser-ka'-re-ah*) [κέρκος, tail]. Any trematode worm (fluke) in its second (or tailed) stage of larval life.

Cercarian (*ser-ka'-re-an*) [κέρκος, a tail]. Any trematode, or fluke-worm, in the *Cercaria* stage.

Cerchnus (*serk'-nus*) [κέρχνος, rough, hoarse]. Hoarseness; noisy respiration.

Cercis (*ser'-sis*). See *Judas Tree.*

Cercomonas (*ser-kom'-o-nas*) [κέρκος, tail; μονάς, monad]. A genus of flagellate infusorians. **C. intestinalis,** a minute animal parasite, a protozoön, occasionally found in the fecal discharges of patients suffering with typhoid fever, chronic diarrhea, and cholera. Its pathologic significance has not yet been ascertained. **C. urinarius.** See *Bodo.*

Cercus (*ser'-kus*) [κέρκος, the tail of a beast]. In biology, one of the antenna-like structures projecting from the hinder parts of certain insects.

Cere (*sēr*) [*cera,* wax]. In biology, that portion of the sheath of the bill in certain birds, *e. g.,* parrots and birds of prey, which has a waxy appearance.

Cereal (*se'-re-al*) [*Ceres,* the goddess of agriculture]. 1. Relating to edible grains. 2. Any edible grain or bread-corn; also the plant that produces it. The composition of the more important cereals is thus given by Bell:—

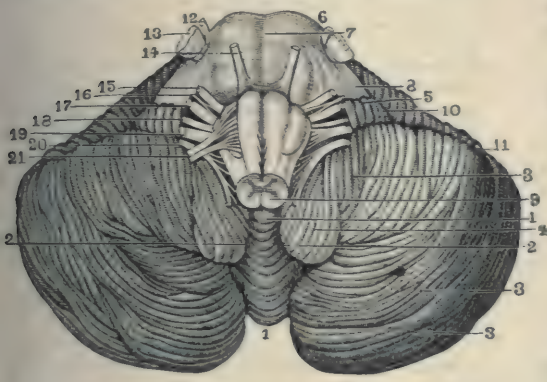
Constituents.	Wheat, winter-sown.	Wheat, spring-sown.	Long-eared Barley.	English Oats.	Maize.	Rye.	Carolina Rice (without husk).
Fat, ...	1.48	1.56	1.03	5.14	3.58	1.43	0.19
Starch, ...	63.71	65.86	63.51	49.78	64.66	61.87	77.66
Sugar (as sucrose), ...	2.57	2.24	1.34	2.36	1.94	4.30	0.38
Albumin (insoluble in alcohol),	10.70	7.19	8.18	10.62	9.67	9.78	7.94
Nitrogenous matter (soluble in alcohol),	4.83	4.40	3.28	4.05	4.60	5.09	1.40
Cellulose, . . .	3.03	2.93	7.28	13.53	1.86	3.23	Traces.
Mineral matter,	1.60	1.74	2.32	2.66	1.35	1.85	0.28
Moisture, . . .	12 08	14.08	13.06	11.86	12.34	12.45	12.15
Total, ...	100.00	100.00	100 00	100.00	100.00	100.00	100.00

Cerealin (*se'-re-al-in*) [*Ceres,* the goddess of agriculture]. An albuminoid found in various cereals and obtainable from bran. See *Flour.*

Cerebel (*ser'-e-bel*). See *Cerebellum.*

Cerebellar (*ser-e-bel'-ar*) [dim. of *cerebrum*]. Relating to the cerebellum. **C. Fossa.** See *Fossa.* **C. Ganglion.** See *Ganglion.*

Cerebellic (*ser-e-bel'-ik*). See *Cerebellar.*



Cerebellitis (*ser-e-bel-i'-tis*) [*cerebellum,* a little brain; ιτις, inflammation]. Inflammation of the cerebellum.

Cerebellocortex (*ser-e-bel-o-kor'-teks*) [*cerebellum,* the little brain; *cortex,* bark]. The cortex of the cerebellum.

Cerebello-spinal (*ser-e-bel-o-spi'-nal*) [*cerebellum,* the little brain; *spina,* the spine]. Relating to the cerebellum and the spinal cord.

Cerebellous (*ser-e-bel'-us*). See *Cerebellar.*

Cerebellum (*ser-e-bel'-um*) [dim. of *cerebrum*]. The inferior part of the brain lying below the cerebrum.

INFERIOR ASPECT OF THE CEREBELLUM.

1, 1. Inferior vermiform process. 2, 2. Median fissure. 3, 3, 3. Lobes and lobules. 4. Amygdala or tonsil. 5. Flocculus, subpeduncular lobe or pneumogastric lobule. 6. Pons varolii. 7. Median fissure of pons. 8. Middle cerebellar peduncle. 9. Medulla oblongata. 10. Anterior extremity of circumferential fissure of cerebellum. 11. Anterior border of superior surface. 12. Small or motor root of trigeminus. 13. Large or sensory root. 14. 6th nerve. 15. Facial nerve. 16. Nerve of Wrisberg. 17. Auditory nerve. 18. Glossopharyngeal 19. Pneumogastric. 20. Spinal accessory. 21. Hypoglossal.

Cerebral (*ser'-e-bral*) [*cerebrum*, the brain]. Relating to the cerebrum. **C. Apoplexy.** See *Apoplexy*. **C. Arteries.** See *Arteries, Table of*. **C. Index.** See *Index*. **C. Maculæ**, spots on the skin caused by slight irritation, and abnormally persistent. They may indicate disorder of the vaso-motor mechanism. **C. Nerves.** See *Nerves, Table of*. **C. Pneumonia.** See *Pneumonia*. **C. Surprise**, the speedy, but not long-persistent stupor that often follows sudden mental shock or grave lesion or injury of the brain. **C. Vesicles.** See *Brain-bladder*.

Cerebralgia (*ser-e-bral'-je-ah*) [*cerebrum*, the brain; ἀλγος, pain]. Pain in the head.

Cerebralism (*ser'-e-bral-izm*) [*cerebrum*, the brain]. The theory that mental operations are due to the activity of the brain; or that thought is a function of the brain.

Cerebrasthenia (*ser-e-bras-the'-ne-ah*) [*cerebrum*, the brain; ἀσθενής, without strength]. Cerebral asthenia. See *Phrenasthenia*.

Cerebrasthenic (*ser-e-bras'-then-ik*) [*cerebrum*, the brain; ἀσθενής, without strength]. Characterized by, or pertaining to, cerebrasthenia.

Cerebration (*ser-e-bra'-shun*) [*cerebrum*, the brain]. Mental and cerebral activity. **C., Unconscious**, mental activity of which the subject is not conscious.

Cerebria (*ser-e'-bre-ah*) [*cerebrum*, the brain]. Temporary cerebral exhaustion (but the term is variously applied by different writers); acute, chronic, partial, and sympathetic cerebria are among the varieties described.

Cerebric Acid (*ser'-e-brik*). Same as *Cerebrinic Acid*.

Cerebrifugal (*ser-e-brif'-u-gal*) [*cerebrum*, the brain; *fugere*, to flee]. Centrifugal; efferent; transmitting or transmitted from the brain to the periphery.

Cerebrin (*ser'-e-brin*) [*cerebrum*, the brain], $C_{17}H_{33}NO_3$. A nitrogenous glucosid obtained from brain-tissue, nerves, and pus-corpuscles. It is a light, colorless, exceedingly hygroscopic powder. The term has been applied to an "organic extract" of unknown constitution, derived from brain-tissue.

Cerebrinacide (*ser-e-brin'-as-īd*) [*cerebrum*, the brain]. One of certain substances found in brain-tissue, and capable of combining with metallic oxids.

Cerebrinic Acid (*ser-e-brin'-ik*). See *Acid*.

Cerebripetal (*ser-e-brip'-et-al*) [*cerebrum*, the brain; *petere*, to seek]. Centripetal; afferent; transmitting or transmitted from the periphery to the brain.

Cerebritis (*ser-e-bri'-tis*) [*cerebrum*, the brain; ιτις, inflammation]. Inflammation of the proper substance of the cerebrum, due to traumatism, contiguous inflammation, or septic influence. Headache, possibly vomiting, and convulsions are the most marked symptoms. **C., Enzoötic—of horses.** Also called staggers, or mad staggers. A disease of horses in the Western United States caused by eating corn that has been attacked by a mold, *Aspergillus glaucus*, the spores of which, finding lodgment in the kidneys and liver, germinate and cause derangements of the circulation with central abscesses. Neither mules, cattle, nor pigs appear to contract this disease.

Cerebrogalactose (*ser-e-bro-gal-ak'-tōs*). Same as *Cerebrose*.

Cerebro-hyphoid (*ser-e-bro-hi'-foid*) [*cerebrum*, the brain; ὑφή, tissue; εἶδος, likeness]. Resembling the substance of the brain.

Cerebrol (*ser'-e-brōl*) [*cerebrum*, brain; *oleum*, oil]. An oily, reddish fluid obtainable from brain-tissue.

Cerebroma (*ser-e-bro'-mah*) [*cerebrum*, the brain; ὁμα, a tumor: *pl.*, *Cerebromata*]. A growth, outside the cranium, that contains cerebral tissue.

Cerebromalacia (*ser-e-bro-mal-a'-se-ah*) [*cerebrum*, the brain; μαλακία, softness]. Softening of the brain-tissue.

Cerebromedullary (*ser-e-bro-med-ul'-ar-e*) [*cerebrum*, the brain; *medulla*, marrow]. Relating to the brain and spinal cord.

Cerebropathy (*ser-e-brop'-a-the*) [*cerebrum*, the brain; πάθος, illness]. 1. A train of symptoms following overwork and approaching the character of insanity. 2. Cerebral disease in general.

Cerebropsychosis (*ser-e-brop-sik-o'-sis*) [*cerebrum*, the brain; ψύχωσις, animating]. Mental disturbance due to a disease of the psychic centers.

Cerebrosclerosis (*ser-e-bro-skle-ro'-sis*) [*cerebrum*, the brain; σκληρός, hard]. Sclerosis of cerebral tissue.

Cerebroscopic (*ser-e-bro-skop'-ik*) [*cerebrum*, the brain; σκοπεῖν, to inspect]. Pertaining to cerebroscopy.

Cerebroscopy (*ser-e-bros'-ko-pe*) [*cerebrum*, the brain; σκοπεῖν, to inspect]. Ophthalmoscopy in the diagnosis of brain-disease.

Cerebrose (*ser'-e-brōs*) [*cerebrum*, the brain], $C_6H_{12}O_6$. A crystallized sugar isomeric with glucose, occurring in brain-tissue.

Cerebro-sensorial (*ser-e-bro-sen-so'-re-al*) [*cerebrum*, the brain; *sensorium*, the organ of sensation]. Pertaining to the cerebral sensorium.

Cerebroside (*ser'-e-bro-sīd*) [*cerebrum*, the brain]. One of a class of substances occurring in brain-tissue, containing cerebrose, just as *glucosids* contain *glucose*.

Cerebrosis (*ser-e-bro'-sis*) [*cerebrum*, the brain]. Any cerebral disorder.

Cerebrospinal (*ser-e-bro-spi'-nal*) [*cerebrum*, the brain; *spina*, the spine]. Pertaining to the whole of the brain and spinal structure. **C. Axis.** See *Axis*. **C. Fluid**, the fluid between the arachnoid and the pia. **C. Meningitis.** See *Fever, Cerebrospinal*. **C. System**, the brain, spinal cord, and nerves.

Cerebrospinant (*ser-e-bro-spi'-nant*) [*cerebrum*, the brain; *spina*, the spine]. A medicine that acts upon the brain and spinal cord.

Cerebrosulphatid (*ser-e-bro-sul'-fat-id*) [*cerebrum*, the brain; *sulphur*]. Any cerebrinacide containing sulphur.

Cerebrot, Cerebrote (*ser'-e-brot*, *ser'-e-brōt*) [*cerebrum*, the brain]. A white, fatty principle obtainable from brain-substance. Cf. *Cephalot.*

Cerebrotomy (*ser-e-brot'-o-me*) [*cerebrum*, the brain; τέμνειν, to cut]. Surgical or anatomic section of brain-tissue.

Cerebrum (*ser'-e-brum*) [L.]. The chief portion of the brain, occupying the whole upper part of the cranium. See *Brain.*

Cerectomy (*ser-ek'-to-me*). See *Kerectomy.*

Cerencephalot (*ser-en-sef'-al-ot*) [κηρός, wax; ἐγκέφαλος, brain]. Cephalot.

Cereolus (*ser-e'-o-lus*) [*cera*, wax: *pl.*, *Cereoli*]. A bougie of waxed linen, often medicated.

Ceresin (*ser'-es-in*) [*cera*, wax]. Ozokerite that has been bleached without distillation; it is used as a substitute for beeswax.

Cereus (*se'-re-us*) [L., "a wax candle"]. A genus of cactaceous plants. **C. grandiflorus.** See *Night-blooming Cereus.*

Cerevisia (*ser-e-vis'-e-ah*) [L.]. Ale or beer. **C. fermentum**, beer-yeast. The ferment obtained in brewing beer, and produced by *Saccharomyces cerevisiæ.* It is given in low states of the system. Dose ʒ ss–j.

Cerin (*se'-rin*) [*cera*, wax]. An ether of cerotic acid; one of the substances found in wax.

Cerise (*ser-ēz'*) [*cerasus*, a cherry-tree]. A pigment of a cherry color. See *Pigments, Conspectus of.*

Cerium (*se'-re-um*) [named after the planet *Ceres*]. Ce = 140; quantivalence II, IV. One of the rarer metals. See *Elements, Table of.* **C. oxalas**, $Ce_2(C_2O_4)_3.9H_2O$, a white, granular powder, insoluble in water or alcohol, but soluble in hydrochloric acid. The oxalate is the only salt commonly employed in medicine. It is a gastric sedative useful in the vomiting of pregnancy. Dose gr. j–x, in pill. **C. valerianate** has been used in the same class of cases. Dose gr. iss.

Ceromel (*se'-ro-mel'*) [κηρός, wax; μέλι, honey]. Honey cerate; wax one part, honey two or four parts. It is applied to wounds and ulcers, chiefly in Asiatic countries.

Ceroplastic (*se-ro-plas'-tik*) [κηρός, wax; πλάσσειν, to mould]. Modeled, or as if modeled, in wax]. **C. Catalepsy.** See *Catalepsy.*

Ceroplasty (*se'-ro-plas-te*) [κηρός, wax; πλάσσειν, to mould]. The modeling of anatomic preparations in wax.

Cerosin (*se'-ro-sin*) [κηρός, wax]. A wax-like substance forming a white or grayish-green coating on some species of sugar-cane. When purified, it yields fine, light pearly scales.

Cerosis (*ser-o'-sis*) [κηρός, wax]. That morbid condition of a membrane in which it seems to consist of wax-like scales.

Cerotene (*se'-ro-tēn*) [κηρός, wax]. An alkylen or olefin, $C_{27}H_{54}$, obtained from Chinese wax; it melts at 58°; cerylene.

Cerotic Acid (*se-rot'-ik*). See *Acid, Cerotic.*

Certificate (*ser-tif'-ik-āt*) [*certificare*, to certify]. A written statement, as for insurance, or in case of birth or death.

Cerulean Blue. See *Pigments, Conspectus of.*

Cerulein (*ser-u'-le-in*). Same as *Alizarin Green*, one of the Alizarins. See *Pigments, Conspectus of.*

Cerumen (*ser-u'-men*) [*cera*, wax]. The wax of the ear.

Ceruminous (*ser-u'-min-us*) [*cera*, wax]. Pertaining to cerumen.

Ceruse (*se'-rūs*) [*cerussa*, white lead]. 1. White lead: basic carbonate and hydrate of lead. 2. A white face-powder. **C. of antimony**, white oxid of antimony; also antimonic acid.

Cervical (*ser'-vik-al*) [*cervix*, the neck]. Pertaining to the neck, or to the cervix uteri. **C. Carcinoma**, carcinoma of the neck of the womb. **C. Choke**, in the horse, the lodgment of a foreign body in the esophagus at any point between the "throat-latch" and the shoulder. **C. Endometritis.** See *Endometritis.* **C. Pregnancy**, a rare condition in which from atrophy of the decidual membranes the impregnated ovum is not properly held in place, and dropping, lodges in the cervical canal, where it develops until the uterus, not being able to hold it longer, expels it.

Cervicen (*ser'-vis-en*) [*cervix*, the neck]. Belonging solely to the cervix.

Cervicicardiac (*ser-vis-ik-ar'-de-ak*) [*cervix*, the neck; καρδιά, the heart]. Relating to the neck and the heart, as the cervicicardiac nerves, branches of the vagus.

Cerviciplex (*ser'-vis-ip-leks*) [*cervix*, the neck; *plexus*, a network]. The cervical plexus.

Cervicitis (*ser-vis-i'-tis*) [*cervix*, the neck; ιτις, inflammation]. Inflammation of the cervix uteri.

Cervicobrachial (*ser-vik-o-bra'-ke-al*) [*cervix*, the neck; *brachium*, the arm]. Relating to the neck and the arm.

Cervico-bregmatic (*ser-vik-o-breg-mat'-ik*) [cervix, the neck; βρέγμα, the sinciput]. Relating to the cervix or nucha and the bregma.

Cervicodynia (*ser-vik-o-din'-e-ah*) [*cervix*, the neck; ὀδύνη, pain]. Cramp or neuralgia of the neck.

Cervico-facial (*ser-vik-o-fa'-shal*) [*cervix*, neck; *facies*, face]. Relating to the neck and the face.

Cervico-occipital (*ser-vik-o-ok-sip'-it-al*) [*cervix*, the neck; *occiput*, the back of the head]. Relating to the neck and the back of the head.

Cervico-orbicular (*ser-vik-o-or-bik'-u-lar*) [*cervix*, neck; *orbicularis*, circular]. Relating to the neck and the orbicular muscle.

Cervico-vaginal (*ser-vik-o-vaj'-in-al*) [*cervix*, the neck; *vagina*, a sheath]. Relating to the cervix uteri and the vagina.

Cerviculate (*ser-vik'-u-lāt*) [*cervicula*, a little neck]. In biology, having a slender neck.

Cervix (*ser'-viks*) [L.]. The neck; also the posterior part of the neck. Applied also to constricted parts of other organs, as the cervix of the bladder, or of the penis. **C. Uteri**, the neck of the womb. **C. Vesicæ**, the neck of the bladder.

Ceryl (*se'-ril*) [*cera*, wax], $C_{27}H_{55}$. An organic radical found in combination in beeswax.

Cerylene (*se'-ril-ēn*). See *Cerotene.*

Cesarean, or Cæsarean, Operation (*se-za'-re-an op-er-a'-shun*) [*cædere*, to cut]. Extraction of the fetus through an incision made in the abdomen. **C. O., Conservative**, the removal of the fetus through an opening in the anterior abdominal wall, without removing the uterus or its appendages. **C. O., Elective**, one done at a selected time prior to labor. **C. O., Improved.** See *Sänger's Operation, Porro's Operation*, etc. **C. O., Post-mortem**, extraction of the child after the mother's death. For the various methods proposed of performing the *Cesarean Operation*, see *Gastro-elytrotomy, Laparo-elytrotomy, Gastro-hysterectomy, Gastro-hysterotomy*, and the operations of *Porro, Sänger, Porro-Müller, Kehrer*, and *Thomas*, under *Operations, Table of.*

Cesarean Section. See *Operations, Table of.*

Cesium, or Cæsium (*se'-ze-um*) [L., "bluish-gray"], Cs = 132.6; quantivalence I. A rare alkaline metal resembling potassium in physical and chemic properties. **C. bromid**, like the other bromids, is a good sedative, but its cost is very great. The oxalate and nitrate have also been employed medicinally.

Unof. **C. chlorid,** unof., lowers the pulse-rate and raises the arterial pressure. Dose gr. ij–v.

Cespitose (*ses'-pit-ōs*) [*cæspes*, a turf or sod]. In biology, growing in or characterized by tangled or matted tufts.

Cesspool (*ses'-pool'*) [E. dial., *suss*, a puddle; ME., *pool*]. A reservoir for water; a privy.

Cestoid, or **Cestode** (*ses'-toid*, or *ses'-tōd*) [κεστός, a girdle; εἶδος, likeness]. Shaped like a girdle, or ribbon; applied to worms, of which *Tænia* is a type.

Cetacea (*se-ta'-se-ah*) [*cetus*, a whale]. An order of mammals living in the sea, as the whale, dolphin, etc.

Cetaceum (*se-ta'-se-um*) [L.: *gen.*, *Cetacei*]. Spermaceti. A fatty substance somewhat resembling paraffin in its physical properties. It is obtained from the head of the sperm whale, *Physeter macrocephalus*. It is soluble in ether, chloroform, and boiling alcohol, and is employed only as an emollient. **C., Ceratum,** contains spermacti 10, white wax 35, olive oil 55 parts. **C., Ung.** (B. P.), contains spermaceti, white wax, almond oil, and benzoin.

Cetraria (*se-tra'-re-ah*) [*cætra*, a short Spanish shield]. 1. A genus of lichens. 2. Iceland moss. A lichen, *C. Islandica*, found in Iceland and other northern countries. It contains a form of starch, *Lichenin*, that gelatinizes when boiled with water. It is a feebly tonic demulcent, sometimes recommended in pulmonary affections. **C., Decoct.**, contains five per cent. of the lichen. Dose ℥ ij–iv.

Cetrarin (*se-tra'-rin*) [*cætra*, a short Spanish shield]. The bitter principle of Iceland moss, crystallizing in fine needles, and nearly insoluble in water.

Cetyl (*se'-til*) [*cetus*, a whale], $C_{16}H_{33}$. An alcoholic radical existing in beeswax and spermaceti.

Cetylid (*se'-til-id*) [*cetus*, a whale], $C_{22}H_{42}O_5$. Geoghegan's term for the substance in the brain that reduces alkaline solutions of cupric salts.

Cevadilla (*sev-ad-il'-ah*). See *Cebadilla*.

Cevadillin (*sev-ad-il'-in*) [*cevadilla*], $C_{34}H_{53}NO_8$. An uncrystallizable alkaloid obtained from cevadilla.

Cevadin (*sev'-ad-in*), $C_{32}H_{49}NO_9$. A crystalline alkaloid of cevadilla. See *Veratrin*.

Ceylon Sickness. See *Beriberi*.

Chabert's Disease. See *Diseases, Table of*.

Chæraphrosyne (*ke-raf-ros'-in-e*) [χαίρειν, to rejoice; ἀφροσύνη, senselessness]. Amenomania.

Chæromania (*ke-ro-ma'-ne-ah*) [χαίρειν, to rejoice; μανία, madness]. Amenomania.

Chæta (*ke'-tah*) [χαίτη, a long hair]. A bristle.

Chætophorous (*ke-toff'-or-us*) [χαίτη, a long hair; φέρειν, to bear]. In biology, bearing bristles.

Chaffbone (*chaf'-bōn*) [AS., *ceaf*, husk; *bān*, a bone]. A name for the inferior maxilla.

Chagres Fever. See *Fever*.

Chain (*chān*) [ME., *chaine*, a chain]. 1. A series of connected links of metal, etc. 2. In chemistry, a group of like atoms joined together by chemic affinity without the intervention of atoms of another kind. **C. Écraseur,** an écraseur of which a chain forms the cutting part. **C.-saw,** a surgeon's saw, the teeth of which are linked together like a chain.

Chair (*chār*) [ME., *chaire*, a chair]. 1. A seat of office, as that of a professor. 2. A piece of furniture consisting of a seat with a back support. **C., Vibrating.** See *Shaking Cure*. **C., Whirling,** a revolving-chair in which formerly a maniacal patient was rapidly whirled. This was regarded as both a sedative and a curative procedure.

Chalastic (*kal-as'-tik*) [χαλαστικός, making supple]. 1. Emollient, softening. 2. An emollient or laxative medicine.

Chalastodermia (*kal-as-to-der'-me-ah*). Synonym of *Dermatolysis*.

Chalaza (*kal-a'-zah*) [χάλαζα, a hailstone]. In biology, one of the twisted cords binding the yolk-bag of an egg to the lining membrane of the shell; or that part of a seed where its coats unite with each other and the nucleus.

Chalazion (*kal-a'-ze-on*) [χαλάζιον, a small hailstone]. A tumor of the eyelid from retained secretion of the Meibomian glands: a Meibomian cyst.

Chalazonephritis (*kal-a-zo-nef-ri'-tis*) [χάλαζα, hail; νέφρον, the kidney; ιτις, inflammation]. Granular nephritis.

Chalicosis (*kal-ik-o'-sis*) [χάλιξ, gravel]. A disease of the lungs of workmen caused by the inhalation of dust or sand.

Chalk (*chawk*) [ME., *chalk*, lime]. Carbonate of lime. See *Calcium*. **C. Stone,** gout-stone—a deposit beneath the skin in gouty patients.

Chalot's Operation. See *Operations, Table of*.

Chalybeate (*ka-lib'-e-āt*) [χάλυψ, iron]. Containing iron.

Chalybs (*ka'-libz*) [L.]. See *Ferrum*.

Chamber (*chām'-ber*) [ME., *chamber*, a room]. A cavity or space. **C., Anterior** (of the eye), the space between the cornea and the iris. **C., Posterior** (of the eye), the space between the iris and the lens. The chambers of the eye contain the aqueous humor.

Chamberlaine's Operations. See *Operations, Table of*.

Chamberland's Bougie or Filter. See *Filter*.

Chamecephalic (*kam-e-sef-al'-ik*) [χαμαί, low; κεφαλή, head]. Characterized by chamecephaly.

Chamecephalous (*kam-e-sef'-al-us*). See *Chamecephalic*.

Chamecephaly (*kam-e-sef'-al-e*) [χαμαί, low; κεφαλή, head]. In craniometry, that condition of the skull in which the cephalic index is 70° or less. A flat and receding skull.

Chameconcha (*kam-e-kong'-kah*) [χαμαί, low; κόγχη, orbit]. In craniometry, an orbital index below 80.01.°

Chameconchous (*kam-e-cong'-kus*) [χαμαί, low; κόγχη, concha]. In craniometry, having an orbital index of not more than 80°.

Chamecranious (*kam-e-kra'-ne-us*) [χαμαί, low; κρανιόν, skull]. In craniometry, having the greatest length of the skull proportioned to its height.

Chameleon Mineral (*kam-e'-le-on min'-er-al*). An old name for a crude mixture of potassium manganate with potassium nitrate.

Chamelirin (*kam-el-ir'-in*) [χαμαί, ground; λείριον, lily]. A poisonous glucosid from *Chamælirion luteum*; it is a strong heart-depressant.

Chamelirion (*kam-el-ir'-e-on*) [χαμαί, ground; λείριον, lily]. A genus of liliaceous plants having active medicinal and poisonous properties. **C. luteum,** or **carolinianum,** of the U. S. (called *Helonias dioica*), is a uterine tonic and diuretic. Unof.

Chameopisthius (*kam-e-o-pis'-the-us*) [χαμαί, low; ὀπίσθιον]. In craniometry, Lissauer's term for a skull in which the angle between the radius fixus and the line joining the hormion and the lambda is from 17° to 24.5°.

Chameprosopic (*kam-e-pro-so'-pik*) [χαμαί, low; πρόσωπον, face]. Low-faced; having the zygomatic facial index below 90°.

Chamocephalic (*kam-o-sef-al'-ik*) [χαμαί, on the ground, low; κεφάλή, head]. See *Chamecephalic*.

Chamois Leather (*sham'-wah*, or *sham'-e*). See *Leather*.

Chamois-skin (*sham'-wah-*, or *sham'-e-skin*). Properly the skin or tanned leather of the chamois; now prepared from split sheep-skin. It is used in surgery and for underclothing.

Chamomile (*kam'-o-mīl*). See *Anthemis* and *Matricaria.*

Chamoprosopic (*kam-o-pro-so'-pik*) [χαμαί, on the ground; πρόσωπον, face]. See *Chameprosopic.*

Champagne (*sham-pān'*) [Fr.]. An effervescent wine (see *Vinum*), sometimes prescribed as a remedy for nausea and vomiting. For *Champagnes* see *Wines.*

Champak (*cham'-pak*) [Beng., *champaka*]. A magnoliaceous tree of India and Indo-China, *Michelia champaca.* Its highly-fragrant flowers are used for nasal catarrhs and for headaches and eye-disorders; its bark is febrifuge and emmenagogue. See *Michelia.* Unof.

Chancebone (*chans'-bōn*). A name for the ischium.

Chancre (*shang'-ker*) [Fr., same]. A term formerly used indiscriminately for any primary venereal ulcer, but now generally conceded to signify the initial lesion of syphilis, a true infecting sore, followed by constitutional symptoms (see *Syphilis*); while *chancroid* is employed to designate the infectious but non-constitutional sore. **C., Hard, Hunterian, Indurated, Infecting, Non-suppurating,** or **True,** the ulcer of venereal origin, that is followed by constitutional syphilis. **C., Non-incubatory, Non-infecting, Simple,** or **Soft,** a contagious, suppurating, non-syphilitic venereal ulcer, properly called *chancroid.* **C., Phagedenic,** chancroid with a tendency to erosion. **C., Serpiginous,** a variety of the last that spreads superficially in curved lines.

Chancroid (*shang'-kroid*) [*chancre*]. A local, infective process transmitted by sexual intercourse, and characterized by ulceration, local glandular involvement, and often suppuration. It has been variously termed the soft, non-indurated, simple, or non-syphilitic chancre. See *Chancre.*

Change (*chānj*) [ME., *changen*, to change]. Death. The word is colloquially used either for the establishment or the cessation of the menstrual function. **C. of Life,** the cessation of the catamenia; the menopause.

Channel-bone (*chan'-el-bōn*) [ME., *chanel*, a canal; *boon*, a bone]. The clavicle.

Chantreuil's Method. In pelvimetry, a method of ascertaining the distance between the tuberosities of the ischia (11 cm.) in estimating the size of the pelvic outlet. The two thumbs are placed upon the tuberosities, and an assistant measures the distance between them.

Chap (*chap*) [ME., *chappen*, to cleave]. 1. The jaw (usually in the pl.). 2. A slight or superficial fissure of the skin, usually upon the lips, hands, or nipples.

Chaptalization (*chap-tal-iz-a'-shun*). A method of improving wines consisting in neutralizing the excess of acidity in the must by the addition of marble-dust, and increasing the saccharine content by the addition of a certain quantity of cane-sugar. The wine becomes richer in alcohol, poorer in acid, and the bouquet is not injured.

Charbon (*shar'-bon*) [Fr.]. The French term for *anthrax*, or *pustula maligna.*

Charcoal (*char'-kōl*) [ME., *charcole*]. Coal made by subjecting wood to a process of smothered combustion. See *Carbo animalis* and *Carbo ligni.*

Charcot Pain. Pain in the ovarian region.

Charcot's Disease, *Sclerose en plaques.* Disseminated, multiple, or insular sclerosis. See *Diseases, Table of.*

C.'s Joint, or **Joint Disease.** See *Arthropathia and Diseases, Table of.*

C.-Leyden Crystals, microscopic, colorless, octahedral or rhomboidal crystals found in the intestinal tract in leukemic and anemic patients and in the sputum of asthmatic and bronchitic patients; so called by Bäumler. Same as *Charcot-Neumann Crystals.* See *Spermin.*

C.'s Method. See *Hypnotism.*

C.-Neumann Crystals. See *Spermin.*

C.-Robin Crystals, crystals forming upon leukemic blood when allowed to stand exposed for a few days.

C.'s Vibrating Arm-chair. See *Shaking Cure.*

Charlatan (*shar'-lat-an*) [Sp., *charlar*, to prattle]. A quack; a pretender to medical skill; an advertising doctor.

Charlatanoid (*shar'-lat-an-oid*) [Sp., *charlar*, to prattle]. A term applied to an organism so closely resembling a charlatan as at times to be almost indistinguishable.

Charles's Law. See *Law.*

Charpie (*shar'-pe*) [*carpere*, to pluck]. Picked or shredded lint; linen shreds for dressing wounds.

Charqui (*char'-ke*) [Chilian]. A name given in South America to strips and slices of beef freed from fat and dried rapidly by sun-heat and sprinkled with maize.

Charrière's Guillotine. An instrument for excising the tonsils. See *Operations, Table of.*

Charta (*kar'-tah*) [χάρτης, paper: *gen. and pl.*, *Chartæ*]. A paper. In pharmacy, a strip of paper as an excipient, the fibers of which are impregnated with the prescribed medicinal substance. Also a wrapper for holding powders or medicines. Of the three official *chartæ*, two are intended as vesicants. **C. epispastica,** or **C. cantharidis,** blistering-paper. **C. emporetica,** porous or bibulous paper. **C. exploratoria,** test-paper. **C. sinapis,** mustard-paper.

Chartreuse (*shar-trez'*) [Fr.]. A tonic cordial, obtained by distillation from various plants growing on the Alps.

Chartula (*kart'-u-lah*) [dim. of *charta*]. A little paper, especially a paper containing a single dose of a medicinal powder.

Chasma (*kaz'-mah*), or **Chasmus** (*kaz'-mus*) [χασμός, a gaping]. A yawn.

Chassaignac's Operations. See *Operations, Table of.*

Chaste Tree (*chāst tre*). See *Agnus castus.*

Chaulmugra Oil (*chawl-moog'-rah*) [E. Ind.]. A fixed oil expressed from the seeds of *Gynocardia odorata*, a tree native to the E. Indies. It is soluble in alcohol, and its properties are due to *gynocardic acid.* It is thought to be useful in leprosy and is recommended in scaly eczema, psoriasis, and syphilitic skin-affections. For external use, gr. xx of the acid ad ℥j of petrolatum. Internally, dose gtt. v–x of the oil, or gr. ss–iij of the acid, in capsules. All unof.

Chaussier, Line of. See *Lines, Table of.*

Chautard's Test. See *Tests, Table of.*

Chauvel's Operation. See *Operations, Table of.*

Chavibetol (*chav-e-be'-tol*) [*chavica*, or piper; *betel*], $C_{10}H_{12}O_{21}$. A substance isomeric with eugenol; it occurs in oil of betel.

Chavica (*chav'-ik-ah*) [native South Sea Island name]. A genus of plants including the long pepper and betel-pepper.

Chavicin (*chav'-is-in*) [*chavica*, a genus of plants]. An organic basic principle analogous to piperin, found in pepper.

Chavicol (*chav'-ik-ol*) [*chavica*, a genus of plants], $C_6H_4OH.C_3H_5$. A substance occurring in the oil obtained from the leaves of *Chavica betel.* It is a colorless oil with a peculiar odor, and boils at 237°; its sp. gr. at 20° is 1.035.

Chawstick (*chaw'-stik*). See *Chewstick.*

Check (*chek*) [ME., *chek*, a sudden stop]. Something restraining. **C.-experiment.** See *Control.* **C.-ligament.** See *Ligament.* **C.-observation.** See *Control.*

Checker-berry (*chek'-er-ber'-e*). A popular name for *Gaultheria procumbens.*

Cheddar Cheese. See *Cheese.*

Cheek (*chēk*) [ME., *cheke*]. The side of the face; it is composed of fat, areolar tissue, muscles, etc.

Cheese (*chēz*) [ME., *chese*]. A food prepared from the casein of skimmed or unskimmed milk. In the following table the results of the researches of Payen on the composition of cheese are quoted in 100 parts for the following kinds: (1) Brie, (2) Camembert, (3) Roquefort, (4) Double cream, (5) Old Neufchâtel, (6) New Neufchâtel, (7) Cheshire, (8) Gruyère, (9) Ordinary Dutch, (10) Parmesan. The varieties under I, exhibit an alkaline reaction, and contain, with ammonia, cryptogamic plants, or, as it is termed, are moldy. The varieties under II, so-called boiled, strongly pressed, and salted cheese, exhibit an acid reaction, as also does freshly prepared casein.

	I.				
	1	2	3	4	5
Water,	45.20	51.90	34.50	9.50	34.50
Nitrogenous matter,	18.50	18.90	26.50	18.40	13.00
Nitrogen,	2.93	3.00	4.21	2.92	3.31

Salts,	0.50	4.20	3.00	0.90	5.70
Non-nitrogenous organic matter and loss,	14.20	7.60	1.50	6.10	6.60

The character of a few of the different varieties of cheese is as follows: Neufchâtel cheese is a Swiss cream cheese. Limburger cheese is a soft, fat cheese. Fromage de Brie is a soft French cheese, rapidly ripening and developing ammoniacal compounds. Camembert cheese is also a cream cheese. Roquefort cheese is a cheese made from the milk of the ewe. Gruyère cheese is a peculiarly flavored Swiss cheese. Cheddar cheese is a hard cheese made from whole milk. Single and double Gloucester are made, the first from a mixture of skimmed and entire milk, and the second from the entire milk. Parmesan cheese is a very dry cheese, with a large amount of casein and only a moderate percentage of fat. Eidam cheese is a Dutch cheese, also relatively dry, and covered with red coloring. As to the bacillus of cheese see *Spirillum tyrogenum*, Denecke, under *Bacteria, Table of.*

Cheese-rennet (*chēz'-ren-et*). See *Ladies' Bed-straw.*

Cheesy (*chēz'-e*) [ME., *chese*]. Of the nature of cheese. **C. Degeneration,** caseous degeneration, or caseation. **C. Tubercle,** a mass of caseously degenerated tissue.

Cheil-, or **Cheilo-** (*kīl-*, or *kil'-o-*). For words thus beginning see *Chil-*, or *Chilo-*.

Cheiro- (*kīr'-o*). For words thus beginning see *Chiro-*.

Chekan, or **Cheken** (*chek'-en*) [Chilian]. 1. The leaves of *Eugenia cheken*, a South American shrub. Its properties are due to an alkaloid and a volatile oil. It is diuretic and expectorant and similar in action to eucalyptus. It is serviceable in chronic catarrh, laryngitis, etc. Dose of the fluid extract ʒss–j. Unof. 2. The crude resin obtained from *Cannabis indica.*

Chela (*kē'-lah*) [χηλή, a claw]. In biology, the claw or pincers of a crustacean.

Chelicera (*ke-lis'-er-ah*) [χηλή, a claw; κέρας, a horn]. In biology, a claw-like appendage of scorpions and spiders, containing a poison-gland in the latter.

Chelidonic Acid (*kel-id-on'-ik*). See *Acid.*

Chelidonin (*kel-id-o'-nin*) [χελιδόνιον, celandine], $C_{19}H_{17}N_3O_3 + H_2O$, or $C_{19}H_{17}NO_4$. A crystalline alkaloid of celandin (*Chelidonium majus*), of a bitter and acrid taste, and forming colorless salts with acids. It is not a very active substance. See *Sanguinarin.*

Chelidonium (*kel-id-o'-ne-um*) [χελιδόνιον, celandine]. Celandin. The leaves and stems of *C. majus*, with properties due to a number of alkaloids and acids. It is a drastic cathartic, and externally an irritant, and is of service in jaundice, whooping-cough, and catarrhal pneumonia. Dose of the plant gr. x–xxx; of the juice ɱv–xx. Unof.

Chelidoxanthin (*kel-id-oks-an'-thin*) [χελιδόνιον, celandine]. One of the bitter, crystalline constituents of celandin.

Cheloid (*kē'-loid*) [χηλή, a claw; εἶδος, form]. A raised or elevated fibroma of the skin; so called from its frequent claw-shape. See also *Keloid.*

Cheloma (*ke-lo'-mah*). Same as *Keloid.*

Chelonin (*kel'-on-in*). See *Balmony.*

Chelotomy (*ke-lot'-o-me*). See *Kelotomy.*

Chematropism (*kem-at'-ro-pizm*). See *Chemotropism,* and *Chemotaxis.*

Chemic, Chemical (*kem'-ik, kem'-ik-al*) [χημεία, chemistry]. Of or pertaining to chemistry. **C. Black.** See *Pigments, Conspectus of.* **C. Food,** compound syrup of the phosphates, a very complex preparation used in disorders attended with impaired nutrition. **C. Lung.** See *Neale's Lung.* **C. Pathology,** the chemistry of disease.

Chemico-radical Theory. A theory of the constitution of the carbon compounds. It is that the object of organic chemistry is the investigation and isolation of radicals as the more intimate components of the organic compounds.

Chemiotaxis, Chimiotaxis (*kem'-e-o-taks-is, kim'-e-o-taks-is*). See *Chemotaxis.*

Chemise, Rectal (*she-mēz'*). A form of surgical dressing made of muslin and applied after operations upon the rectum to control or prevent hemorrhage.

Chemism (*kem'-izm*) [χημεία, chemistry]. Chemic force.

Chemistry (*kem'-is-tre*) [χημεία, chemistry]. The science of the molecular and atomic structure of bodies.

Chemocephalus (*kem-o-sef'-al-us*) [χαμαί, low; κεφαλή, head]. An individual possessed of a flat head.

Chemosis (*ke-mo'-sis*) [χήμωσις, a gaping]. Conjunctival and sub-conjunctival swelling.

Chemotactic (*kĕm-o-tak'-tik*) [*χημεία*, chemistry; *τάξις*, battle-array]. Pertaining or relating to chemotaxis.

Chemotaxis (*kem-o-taks'-is*), **Chemiotaxis** (*kem-e-o-taks'-is*) [*χημεία*, chemistry; *τάσσειν*, to order, arrange]. The property of cellular attraction and repulsion. It is displayed by the proteid constituents of the protoplasm of various species of bacteria, as well as by proteids from a great variety of sources. The qualifications *positive* and *negative* are added according as the phenomenon is one of attraction or repulsion.

Chemotic (*ke-mot'-ik*) [*χήμωσις*, a gaping]. Pertaining to or marked by chemosis.

Chemotropism (*kĕm-ot'-ro-pizm*) [*χημειά*, chemistry; *τροπή*, a turning, a rout, a putting to flight]. In biology, the destruction of bacteria by phagocytes; the victory of the phagocytes over bacteria, or of bacteria over phagocytes. In biology, the attraction of leukocytes by certain chemic substances held in solution in the blood, either positive or negative. Cf. *Chemotaxis*.

Chenopodium (*ken-o-po'-de-um*) [*χήν*, a goose; *πόδιον*, a little foot]. American Wormseed; the fruit of *C. ambrosioïdes*, or *anthelminticum*, a plant native to the United States with properties due to a volatile oil, which is the only preparation used. It is a mild cardiac stimulant, promoting the secretions of the skin and kidneys, and also a very efficient anthelmintic against the round-worm. Dose of the oil ♏v–xv.

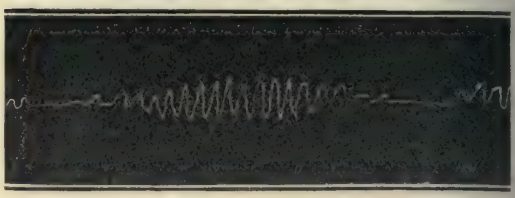
Cheoplastic (*ke-o-plas'-tik*) [*χέειν*, to pour; *πλαστικός*, plastic]. Made soft and yielding by heat. **C. Metal**, an alloy composed of tin, silver, and bismuth, with a small trace of antimony.

Cherry (*cher'-e*) [ME., *chery*]. The bark of the common cherry, *Prunus serotina*, a mild bitter and tonic, containing tannin. Dose of fld. ext. ʒss–j. *Prunin*, a concentrated ext. Dose gr. j–iij. **C.-Compound**, each Oj represents cherry-bark ℥ viij, lettuce ℥iij, horehound ℥ iijss, bloodroot ℥j, veratrum viride ℥ss. Dose ♏xv–ʒj. All unof. See also *Choke-cherry* and *Prunus virginiana*. **C.-laurel**, the European evergreen cherry, *Prunus lauro-cerasus*. Water distilled from its leaves is used in the same way as dilute hydrocyanic acid. See *Acid, Hydrocyanic*.

Cheselden's Operations. See *Operations, Table of.*

Chest. See *Thorax*. **C., Barrel-**, a peculiar formation of the chest observed in cases of long-standing emphysema of the lungs; it is round like a barrel, and in respiration is lifted vertically instead of being expanded laterally. See *Emphysema*. **C.-founder.** See *Founder*. **C. Sweetbread.** See *Sweetbread*.

Chestnut. See *Castanea*. **C. Extract.** See *Horse-chestnut-bark*. **C.-wood**, a wood used in leather-manufactures, derived from the *Castanea vesca*, and containing from eight to ten per cent. of a tannin that closely resembles gallotannic acid. The extract, containing from 14 to 20 per cent. of tannin, is used largely to modify the color produced by hemlock extract and for tanning and dyeing.



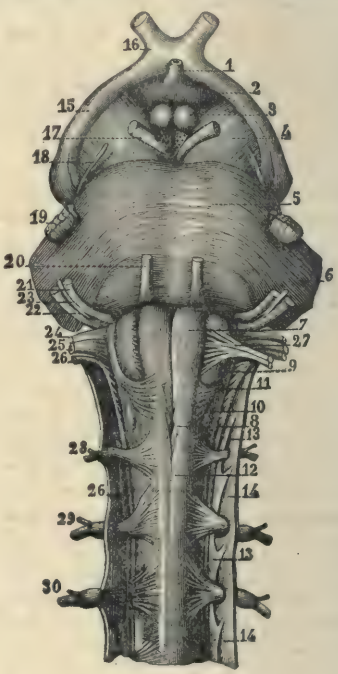
Chevreul's Test. See *Tests, Table of.*

Chevron-bone (*shev'-ron-bōn*) [ML., *capro*, a rafter; *boon*, bone]. One of two bones forming a V-shaped arch beneath the caudal portion of the back-bone of many animals.

Chewstick [ME., *chewen*, to chew; *stiken*, to pierce]. The bark of *Gonania domingensis*, a popular aromatic bitter in the West Indies. It is also used as a dentifrice and masticatory. Dose of the fld. ext. ʒj–ij. Unof.

Cheyne's Operation. See *Operations, Table of.*

Cheyne-Stokes Breathing or **Respiration.** See *Signs and Symptoms, Table of.* **C. Nystagmus**, a variety of nystagmus in which the oscillations of the



Tracing of Cheyne-Stokes Breathing.

eyeball have a rhythmic variation similar to the rhythm of Cheyne-Stokes respiration.

Chian (*ki'-an*) [*χίος*, Chios]. Pertaining to Chios, an island in the Ægean Sea. **C. Turpentine.** See *Terebinthina*.

Chiasm, Chiasma (*ki'-azm, ki-az'-mah*) [*χιάζειν*, to make a cross, as an X]. The optic commissure.

Optic Chiasm and Adjacent Parts.

1. Infundibulum. 2. Tuber cinereum. 3. Corpora albicantia, or mammillaria. 4. Crus cerebri. 5. Pons varolii. 6. Middle cerebellar peduncle. 7. Anterior pyramid. 8. Decussation. 9. Olivary body. 10. Gray tubercle of Rolando. 11. Arciform fibers. 12. Superior extremity of spinal cord. 13, 13. Denticulate ligament. 14. Spinal dura mater. 15. Optic tract. 16. Optic chiasm. 17. 3d nerve. 18. 4th nerve. 19. 5th nerve. 20. 6th nerve. 21. Facial nerve. 22. Auditory nerve. 23. Nerve of Wrisberg. 24. Glosso-pharyngeal nerve. 25. Pneumogastric nerve. 26, 26. Spinal accessory nerve. 27. Hypoglossal. 28 1st cervical pair. 29. 2d cervical pair. 30. 3d cervical pair.

Chiastometer (*ki-as-tom'-et-er*) [*χιαστός*, crossed; *μέτρον*, a measure]. An instrument for measuring any deviation of the optic axes from parallelism.

Chibou (*see-boo'*) [Fr.]. The resin or gum of *Bursera gummifera*, a tree of Florida and tropical America; it is locally valued in diseases of the lung and kidneys, and is used in various plasters and ointments; it is called also *cachibou* and *archipin*. Unof.

Chibret's Operation. See *Operations, Table of.*

Chica Red (*che'-kah*) [S. Amer.]. See *Pigments, Conspectus of.*

Chick Pea (*chik' pe*) [ME., *chich-pea*]. The plant *Cicer arietinum;* also the pulse derived from it; much used as an article of food in various countries. *Lathyrism* (apparently chronic oxalic-acid poisoning), *q. v.*, sometimes results from the too free use of the chick-pea as a food.

Chickahominy Fever (*chik-a-hom'-in-e fe'-ver*). See *Fever.*

Chicken (*chik'-en*) [ME., *chiken*, a chicken]. A domestic fowl. **C. Breast,** an abnormally prominent condition of the sternum and of the sternal region; pigeon-breast; it is seen in rhachitic persons, etc. **C. Cholera,** See *Cholera.* **C.-fat Clot.** A clot of blood consisting largely of fibrin, yellowish in color, and containing but few red-cells. **C.-pox.** See *Varicella.*

Chicle (*chik'-l*) [S. Amer.]. A gum obtained from the *Achras sapota*, a tree of tropical America, and used as a masticatory.

Chico Red (*che'-ko*) [S. Amer.]. Same as *Chica Red.*

Chicory (*chik'-or-e*) [κίχορα, chicory]. *Cichorium intybus*, a composite plant of Europe and Asia, naturalized and growing in the United States. Its ground-root is used to adulterate coffee.

Chicot (*che'-ko*) [Fr.]. Kentucky Coffee Bean. The seeds of *Gymnocladus canadensis.* Chicot contains a volatile oil and a glucosid, and is probably a cerebro-spinal stimulant. It is sometimes used as a substitute for coffee. Unof.

Chiene's (John) Method. A method of locating the fissure of Rolando. A square piece of paper is folded once, so as to form a triangle. Either of the two equal angles is then 45°. One free edge is then folded back so that this angle is bisected, thus forming an angle of 22.5°. The paper is then unfolded at the first crease, so as to secure an angle of 67.5, the apex of which is placed ½ inch behind the mid-point between the glabella and the inion, so that the straight side of the paper corresponds to the middle of the anterior aspect of the head; the other margin of the paper, the fold, corresponds to the fissure of Rolando, the length of which is about 3⅜ inches. **C.'s Operation.** See *Operations, Table of.*

Chignon Fungus (*shēn-yōn'*) [Fr.]. A fungoid disease of the hair in which oval or roundish masses surround the hair-shaft at irregular intervals. It is also miscalled *Chignon gregarine.*

Chigoe (*chig'-o*) [Fr., *Chique*]. Sand-flea; *Sarcopsylla penetrans*, a small parasite of the skin, affecting usually that portion between the toes and fingers; also the red harvest mite, *Leptus irritans.* It is also written *chigo, chegoe, chigga, chiggre, chigger, jigger.* See *Parasites* (*Animal*), *Table of.*

Chilblain (*chil'-blān*) [AS., *cele*, cold; *blegan*, to boil]. Pernio; Erythema pernio. An erythematous local inflammation and swelling of the skin, due to cold. It is most common in the young of lymphatic constitution. The symptoms are an eruption of circular, raised erythematous spots, attended with severe itching or burning; later, bullæ may form, and these may lead to ulceration.

Child (*child*) [ME., *child: pl., Children*]. A young person. **C.-bed,** the popular term for the condition of a woman during and after labor. **C.-bed Fever.** See *Puerperal Fever.* **C.-birth,** parturition. **C.-crowing,** the crowing sound of the respiration that characterizes *Laryngismus stridulus, q. v.* **C.-hood,** the age of childishness; the period before puberty. **C.-murder.** See *Infanticide.* **Children's Diseases.** See *Pediatrics.*

Chile (*chil'-e*). See *Capsicum.*

Chili Saltpeter. See *Sodium.*

Chilitis (*kil-i'-tis*) [χεῖλος, lip]. Inflammation of a lip.

Chill (*chil*) [ME., *chil*]. A sensation of cold accompanied by shivering, usually appearing shortly after exposure to cold or wet. It is frequently the initial symptom of grave acute disorders, as pneumonia, etc. It is a prominent symptom of various forms of malarial fever. See *Rigor.*

Chilli (*chil'-e*). See *Capsicum* and *African Pepper.*

Chills and Fever. A popular term for intermittent fever.

Chilo-angioscope (*ki-lo-an'-je-o-skōp*) [χεῖλος, lip; ἀγγεῖον, vessel; σκοπεῖν, to look]. An apparatus for observing the circulation of the blood in the human lip.

Chilocace (*kil-ok'-as-e*) [χεῖλος, lip; κακός, evil]. A firm, reddish swelling of the lip in scrofulous children.

Chiloglossa (*ki'-lo-glos-ah*) [χεῖλος, lip; γλῶσσα, tongue]. In biology, the anterior lip, or the membranous protuberance that lies in front of the mandibles and is continued under these in certain arthropods.

Chilogramma (*ki-lo-gram'-mah*) [χεῖλος, lip; γράμμα, a mark: *pl., Chilogrammata*]. Jadelot's labial line. See *Lines, Jadelot's.*

Chiloma (*ki-lo'-mah*) [χεῖλωμα, a lip]. In biology, a projecting thickened upper lip—as in the camel.

Chiloplasty (*ki'-lo-plas-te*) [χεῖλος, lip; πλάσσειν, to form]. Any plastic operation upon the lip.

Chilorrhagia (*ki-lor-a'-je-ah*) [χεῖλος, lip; ῥήγνυναι, to burst forth]. Hemorrhage from the lips.

Chiloschisis (*ki-los'-kis-is*) [χεῖλος, lip; σχίσις, a split]. Hare-lip.

Chimaphila (*ki-maf'-il-ah*) [χεῖμα, winter; φίλος, loving]. Pipsissewa, Prince's Pine; the leaves of *C. umbellata*, an evergreen found in the U. S, an astringent tonic and excellent diuretic. The bruised leaves are used as a rubefacient. It is valuable in dropsy, several forms of kidney disease, and for affections of the urinary passages. **C., Fld. Ext.** Dose ℥ss–ij. **C., Decoctum.** 1 to 17. Dose ℥j–iij. Unof.

Chimaphilin (*ki-maf'-il-in*) [χεῖμα, winter; φίλος, loving]. A precipitate from the tincture of *Chimaphila umbellata*, used in cancers; it is a diuretic, discutient, and alterative. Dose two to three grains. Unof.

Chimiotaxis (*kim-e-o-taks'-is*). See *Chemotaxis.*

Chimiotetic (*kim-e-o-tet'-ik*). See *Chemotactic.*

Chimney-sweep's Cancer. Cancer of the scrotum, formerly not uncommon among chimney-sweepers.

Chin [ME., *chin*]. The mentum; the lower part of the face, at or near the symphysis of the lower jaw. **C., Double.** See *Buccula.* **C.-cough,** whooping-cough. **C.-jerk.** See *Jaw-jerk*, and *Reflexes, Table of.* **C. Reflex.** See *Reflexes, Table of.*

China (*kin'-ah*, or *ke'-nah*) [Sp.]. Same as *Cinchona.*

China (*chi'-nah*) [Pers., *Chinī*, China]. A country of Asia. **C.-blue.** See *Pigments, Conspectus of.* **C.-clay.** See *Pigments, Conspectus of.* **C.-grass,** Ramie; a soft, silky vegetable substance used as a surgical dressing; the fiber of *Bœhmeria nivea.* **C.-root,** the rhizome of *Smilax china*, a plant of Eastern Asia; it is used as a substitute for true sarsaparilla. Unof. **C.-root, False,** the plant *Smilax pseudo-china* of N. America. Unof. **C.-white.** Same as *White Lead.*

Chinese (*chi-nēs'*, or *-nēz*) [Pers.; *Chinī*, China]. Pertaining or belonging to China. **C. Catarrh.** Synonym of *Influenza.* **C. Foot,** a deformed and undeveloped foot due to atrophy from compression. It is a popular fashion among Chinese ladies. **C. Green.** See *Pigments, Conspectus of.* **C. Red.** Same as *Vermilion.* **C. Twist,** a name given to a variety of silk-thread used in surgery. **C. Wax,** Insect Wax; a

substance deposited by an insect, *Coccus cerifera*, upon the Chinese ash-tree. It is a white, very crystalline, and brittle wax, resembling spermaceti in appearance, with a specific gravity of .973 at 15° C.; it fuses at 82° to 83° C. It is slightly soluble in alcohol and ether, very soluble in benzene. It is used in candle-making. **C. White.** Same as *Zinc-white*. **C. Yellow.** Same as *King's Yellow* and *Ocher*.

Chinoidin, or **Chinoidinum** (*kin-oi'-din*, or *kin-oi-din'-um*) [Sp., *China*]. Quinoidin. A mixture of amorphous alkaloids obtained in the manufacture of quinin. It has the therapeutic properties of quinin.

Chinolin (*kin'-o-lin*). See *Chinolina* and *Quinolin*.

Chinolina (*kin-o-li'-nah*) [*china*, quinin], C_9H_7N. Chinolin, Leukolin. An alkaloidal derivative of quinin and cinchonin, occurring also in coal-tar. It is now generally prepared by heating anilin or nitro-benzol with glycerin and a dehydrating agent. It is a valuable antiseptic and antipyretic, and is useful in pneumonia and typhus and other fevers. It is commonly used in the form of the tartrate because of the deliquescence of the other salts. Dose ♏iij to x; of the tartrate gr. v–xv. Unof.

Chinovin (*kin'-o-vin*) [*china*, quinin], $C_{30}H_{38}O_8$. A glucosid obtained from *Cinchona*.

Chinwhelk. Synonym of *Tinea sycosis*.

Chiococca (*ki-o-kok'-ah*) [χιών, snow; κόκκος, a berry]. A genus of rubiaceous plants. See *Cahinca*.

Chionanthin (*ki-o-nan'-thin*) [χιών, snow; ἄνθος, a flower]. A precipitate from the tincture of the root-bark of *Chionanthus virginiana;* it is an aperient, diuretic, tonic, and narcotic. Dose 1 to 3 grains. Unof.

Chionanthus (*ki-o-nan'-thus*) [χιών, snow; ἄνθος, a flower]. A genus of oleaceous trees and shrubs. **C. virginiana,** fringe-tree or poison-ash. The root is used as a vulnerary. See also *Fringe-tree*. Unof.

Chionyphe (*ki-on'-if-e*) [χιών, snow; ὑφή, a texture]. A genus of fungi. **C. carteri,** a parasitic fungus, apparently the cause of the disease known as *Fungus Foot*, or *Madura Foot*, *q. v.*

Chip Blower (*chip blo'-er*). A warm-air blow-pipe.

Chiragra (*ki-ra'-grah*) [χείρ, the hand; ἄγρα, a seizure]. Gout in the hand.

Chirarthritis (*ki-rar-thri'-tis*) [χείρ, hand; ἄρθρον, a joint; ιτις, inflammation]. Rheumatism or arthritis of the hand.

Chirata (*ke-ra'-tah*, or *che-ra'-tah*) [Hind., *chirāetā* a species of gentian]. Chiretta. The entire plant, *Swertia chirata*. It resembles gentian in its therapeutic properties, and is an excellent tonic. It does not contain any tannin. Dose of the powdered plant gr. xv–xxx. **C., Fld. Ext.,** in glycerin and alcohol. Dose ♏xv–xxx. **C., Infusum** (B. P.). Dose a wineglassful. **C., Tinct.,** ten per cent. in strength. Dose ʒss–ij.

Chiratin (*kir-at'-in*) [Hind., *chirāetā*, a species of gentian], $C_{26}H_{48}O_{15}$. A light-yellow, crystalline, bitter glucosid, obtained from *Chirata*.

Chiretta (*kir-et'-ah*). See *Chirata*.

Chirettin (*kir-et'-in*) [Hind., *chirāetā*, a species of gentian]. A precipitate obtained from the tincture of chirata.

Chirismus (*ki-ris'-mus*) [χειρισμός, a handling]. 1. Manipulation; a kind of massage. 2. Spasm of the hand.

Chiromancy (*ki'-ro-man-se*). See *Palmistry*.

Chiropelvimeter (*ki-ro-pel-vim'-et-er*) [χείρ, the hand; *pelvis*, the pelvis; μέτρον, a measure]. An instrument for use in the manual measurement of the pelvis.

Chiropodist (*ki-rop'-o-dist*) [χείρ, hand; πούς, ποδός, foot]. A surgeon or person who professionally treats diseases of the hands and feet, especially corns, bunions, etc.

Chiro-Pompholyx (*ki-ro-pom'-fo-liks*) [χείρ, hand; πόμφολυξ, blister]. Dysidrosis; pompholyx; an ill-defined, inflammatory skin-disease confined to the hands and feet, and characterized by the development of peculiar vesicles or blebs, arranged in groups. They are deeply seated and distributed chiefly on the soles and palms and sides of the fingers. Itching, burning, pain, and stiffness are present. The disease is common in neurotic women in the prime of life; it is almost invariably recurrent, and is rare in winter.

Chirurgeon (*ki-rer'-jon*) [χειρουργός, a surgeon]. A surgeon.

Chirurgia (*ki-rer'-je-ah*) [χείρ, hand; ἔργον, work]. Surgery.

Chirurgical (*ki-rer'-jik-al*) [χειρουργία, surgery]. Pertaining to surgery.

Chirurgien Dentiste (*ki-rer'-je-en den-tist'*) [Fr.]. Surgeon-dentist.

Chisel Cramp (*chiz'-el-kramp*). See *Cramp*.

Chitin (*ki'-tin*) [χιτών, a tunic], $C_{15}H_{26}N_2O_{10}$. The substance composing the chief part of the exoskeleton of many invertebrates, as crabs, lobsters, etc. It is the animal analogue of the cellulose of plants. When heated with concentrated HCl it is decomposed into glycosamin and acetic acid. *Glycosamin* ($C_6H_{13}NO_5$), crystallizes from alcohol in fine needles, is dextro-rotatory, and reduces Fehling's fluid to the same extent as does dextrose, but is not fermentable. **C. Substance,** a gelatinous substance found in hydatid cysts.

Chittim Bark (*chit'-im bark*). See *Cascara Sagrada*.

Chlamydate (*klam'-id-āt*) [χλαμύς, a mantle]. In biology, provided with a pallium or mantle.

Chlamydeous (*klam-id'-e-us*) [χλαμύς, a mantle]. In biology, pertaining to the floral envelops.

Chlamydospore (*klam'-id-o-spor*) [χλαμύς, mantle; σπορά, seed]. In biology, applied to a spore having its own protective envelop.

Chloasma (*klo-az'-mah*) [χλοάζειν, to be pale-green]. Melanoderma; melasma; a condition characterized by dyschromiæ of the skin of various sizes and shapes, and of a yellow, brown, and black color. They occur chiefly upon the face, and are idiopathic or symptomatic in character. An old name for *Tinea versicolor*. **C. hepaticum,** Liver-spots; a form following dyspepsia and popularly associated with hepatic disturbance. **C. phthisicorum,** the brown patches upon the skin of the forehead or upper portions of the cheeks in tuberculous patients. **C. uterinum,** chiefly located on the forehead, temples, cheeks, nipples, and median line of abdomen. They are marked during pregnancy, and often during menstruation.

Chloracetic Acid (*klo-ras-e'-tik*). See *Acid*.

Chloral (*klo'-ral*) [*chlorin; aldehyd*], C_2Cl_3HO. A pungent, colorless, mobile liquid. The name is often misapplied to chloral hydrate. **C. Butylicum, Butyl-Chloral Hydrate** (B.P.), croton-chloral, $C_4H_5Cl_3O_2 \cdot H_2O$, a solid occurring in crystalline scales, resembling chloral hydrate, but made with butyl, C_4H_9, as a base, instead of ethyl, C_2H_5. Its properties are parallel to those of chloral, but are much feebler. Dose gr. v–xx in syrup. **Syrupus Butyl-Chloral,** 16 grains to the ounce. Dose ʒj–iv. Unof. **C. Hydrate,** a colorless, crystalline solid having the composition $C_2HCl_3(HO)_2$, the hydrate of chloral. It is a powerful hypnotic, antispasmodic, and depressant to the cerebral, medullary, and spinal centers, and, to a limited extent, is an anesthetic. It is serviceable in fevers accompanied by cerebral excitement, in chorea, convulsions, and all affections requiring a cerebral depressant, and is excellent in delirium tremens, but should be used with

great caution. Dose gr. v–xx; smaller if combined with potassium or sodium bromid. **C., Syrupus** (B.P.). Dose ʒss–ij. **C.-urethane.** See *Uralium.*

Chloralamid (*klo-ral-am′-id*) [*chloral; amid*], $CCl_3CH{<}^{OH}_{NHCHO}$. A name inaptly applied to chloral formamidate. In doses of 30 to 45 grains it is a hypnotic.

Chloralid (*klo′-ral-id*) [*chloral*], $C_5H_2Cl_6O_3$. A substance obtained when trichlorlactic acid is heated to 150°, with an excess of chloral; it crystallizes from alcohol and ether in large prisms, is insoluble in water, and melts at from 114° to 115°; it boils at from 272° to 273°.

Chloralimid (*klo-ral′-im-id*) [*chloral; imid*], $CCl_3.CH.NH$. A hypnotic allied to chloral, soluble in alcohol. Dose same as that of chloral hydrate. Unof.

Chloralism (*klo′-ral-izm*) [*chloral*]. 1. Chloral-poisoning; the morbid state caused by the injudicious use of chloral. 2. The habit of using chloral.

Chloralize (*klo′-ral-iz*) [*chloral*]. To put under the influence of chloral.

Chloralose (*klo′-ral-ōs*) [*chloral; glucose*]. Anhydroglycochloral; a product of the action of anhydrous chloral upon glucose.

Chloramyl (*klo′-ram-il*). See *Anesthetic.*

Chloranemia (*klo-ran-e′-me-ah*). Synonym of *Chlorosis.*

Chloranil (*klo′-ran-il*) [*chlorin*], $C_6Cl_4O_2$. A compound obtained from many benzene compounds (anilin, phenol, isatin) by the action of chlorin or potassium chlorate and HCl. It consists of bright, golden leaflets, insoluble in water, but soluble in hot alcohol and ether.

Chlor-anodyne (*klor-an′-o-din*) [*chlorin; ἀν* priv.; *ὀδύνη*, pain]. A proprietary remedy introduced as an improvement on chlorodyne. It contains morphin hydrochlorate, tinct. cannab. Ind., chloroform, dilute hydrocyanic acid, and aromatics. Dose for an adult ♏xv. Unof.

Chloranthus (*klo-ran′-thus*) [*χλωρός*, yellowish-green; *ἄνθος*, a flower]. A genus of chloranthaceous plants of hot climates. **C. officinalis,** of Java, is a valuable febrifuge and anti-spasmodic. Unof.

Chlorate (*klo′-rāt*) [*chlorin*]. Any salt of chloric acid. See *Potassii chloras; Sodii chloras,* etc.

Chloremia (*klo-re′-me-ah*) [*χλωρός*, green; *αἷμα*, blood]. A blood-disorder, either idiopathic or associated with other ailments, consisting in a diminution of the percentage of the hemoglobin and a decrease in the number of red blood-corpuscles.

Chlorethyl (*klo-reth′-il*). See *Ethyl chlorid.*

Chloric (*klo′-rik*) [*chlorin*]. Pertaining to or containing chlorin. **C. Acid.** See *Acid.* **C. Ether.** 1. See *Ethyl chlorid.* 2. See *Spiritus Chloroformi.*

Chlorid (*klo′-rid*) [*chlorin*]. In chemistry, a binary compound, one of the elements of which is chlorin. **C. of Iron Test.** See *Tests, Table of.* **C. of Methyl.** See *Anesthetic.* **Chlorids, Test for.** See *Tests, Table of.*

Chlorin, or Chlorine (*klo′-rin*) [*χλωρός*, green]. Cl = 35.5; quantivalence 1. A non-metallic element. At ordinary temperatures it is a greenish-yellow gas, prepared by decomposing sodium chlorid, NaCl. It is highly irritative to the skin and mucous membranes, producing spasmodic closure of the glottis. It is the most valuable of disinfectants. **Chlori, Aqua, C., Liquor** (B.P.), chlorin water, contains 4 per cent. of the gas in solution. It is a good antiseptic wash. Dose, internally, ♏x–xxx. **Calx Chlorinata,** "chlorid of lime," a hypochlorite of calcium containing free chlorin; a valuable disinfectant. Dose, internally, gr. iij–vj. **Calx Chlorat, Liq.** (P. B.), contains 1 pound of the salt per gallon of water. **Sodium Chlorat., Liq.,** *Labarraque's Solution,* sodium carbonate 10, calx chlorinata 8, water ad 100. Dose ♏x–ʒj in 20 parts of water. **Chlorin Vapor** (B. P.), used for inhalation. **C.-Hunger,** the condition of the body when chlorin (usually in the form of common salt) is lacking. Among the immediate results of this deficiency are indigestion and albuminuria.

Chloroanemia (*klo-ro-an-e′-me-ah*). Synonym of *Chlorosis.*

Chlorobrom (*klo′-ro-brōm*) [*chlorin; bromin*]. A solution each ounce of which contains 30 grains of chloralamid and potassium bromid. It is a hypnotic.

Chlorocruorin (*klo-ro-kru′-or-in*) [*χλωρός*, green; *cruor*, blood]. A green respiratory pigment from the greenish blood of the Sabella.

Chlorodyne (*klo′-ro-din*) [*χλωρός*, green; *ὀδύνη*, pain]. A proprietary remedy supposed to contain chloroform, ether, morphin, cannabis Indica, hydrocyanic acid, and capsicum. The various imitations differ widely. It is a good anodyne and narcotic. Dose ♏ x–xxx, *with care.* Unof.

Chloroform (*klo′-ro-form*) [*chloroformum*, chloroform: *gen., Chloroformi*]. Methyl Terchlorid, $CHCl_3$. A heavy, colorless, volatile liquid obtained by the action of chlorinated lime on methyl alcohol. (The commercial article, *C. venale,* contains 2 per cent. of impurities and is unfit for administration.) Administered internally, chloroform produces narcosis and violent gastro-enteritis. Chloroform has an agreeable odor and a sweetish taste. It solidifies in the cold, melts at 71° C., boils at 61° C., and its specific gravity is 1.526. It is excellent in true cholera and in similar diseases of the stomach and bowels. Externally, it is much employed as an ingredient of rubefacient and anodyne liniments. Mixed with a large per cent. of air and inhaled, the vapor is one of the most valuable of general anesthetics, but occasionally (1:3000) causing death by cardiac paralysis. See *Anesthetic.* Deep injections in the vicinity of the sciatic nerve are recommended in sciatica. **C., Alcoholized,** a mixture of chloroform and alcohol. **C., Ammoniated,** equal parts of ammonia in alcohol and chloroform; antipyretic and anodyne. Unof. **C., Aqua.** Dose ʒss–ij. **C., Liniment,** contains chloroform 30, soap-liniment 70. **C., Liniment., Comp.,** contains chloroform ʒj, oil of turpentine ʒj, tincture of opium ʒiv, tincture of aconite ʒij. Unof. **C., Emulsum,** chloroform 4, expressed oil of almond 6, tragacanth 1.5, water q. s. Dose ʒj–ʒij. **C., Spt.,** pure chloroform 6, alcohol 94 parts. Dose ♏x–ʒj. **Tinct. chloroformi et morphinæ** (B. P.), a substitute for chlorodyne. Each dose of ten minims contains chloroform ♏1¼, ether ♏⅓, alcohol ♏1¼, morphin hydrochlorate gr. $\frac{1}{48}$, dilute hydrocyanic acid ♏⅝, oil of peppermint ♏$\frac{1}{60}$, fluid extract of licorice ♏1¼, treacle and syrup q. s. **Tinct. C. Comp.** (B.P.), chloroform 2, alcohol 8, comp. tinct. of cardamon 10. Dose ♏xx–ʒj.

Chloroformism (*klo′-ro-for-mizm*) [*chloroformum*, chloroform]. 1. The use of chloroform to excess for its narcotic effect. 2. The symptoms produced by this use of the drug.

Chlorolymphoma (*klo-ro-limf-o′-mah*) [*χλωρός*, green; *lympha*, water; *ὄμα*, a tumor]. Another name for chloroma; it is thought by some to be a variety of lymphoma, from its containing lymphocytes.

Chloroma (*klo-ro′-mah*) [*χλωρός*, yellowish-green; *ὄμα*, a tumor: *pl., Chloromata*]. "Green cancer"; a rare variety of sarcoma, of a greenish tint, usually seated upon the periosteum of the bones of the head, or upon the dura.

Chloronitrobenzene (*klo-ro-ni-tro-ben'-zēn*) [χλωρός, green; *nitrum*, niter; *benzoin*]. One of the ingredients of *Robusite*, *q. v.*

Chlorophane (*klo'-ro-fān*) [χλωρός, green; φαινεσθαι, to appear]. A yellowish-green chromophane. See *Chromophanes.*

Chlorophyl (*klo'-ro-fil*) [χλωρός, green; φύλλον, leaf]. A coloring-matter occurring in the chlorophyl-granules in all the green parts of plants. Wax and other substances are associated with it. Its constitution is not yet known. It is the substance by whose agency carbohydrates are formed in green plants.

Chlorophyllan (*klo-ro-fil'-an*) [χλωρός, green; φύλλον, leaf]. A substance obtained from fresh grass by extracting the latter with boiling absolute alcohol. It appears as crystals that melt at 110° C. to a black liquid, which on further heating burns with a luminous flame. It is easily soluble in ether, benzol, and chloroform.

Chloroplastid (*klo-ro-plas'-tid*) [χλωρός, green; πλαστός, to form or mold]. In biology, a chlorophyl-granule. Applied by Lankester to chlorophyl-bearing cells as seen in *Hydra viridis*. Probably these are secretory cells or digestive glands comparable to the liver-cells of Amphioxus.

Chlorosarcoma (*klo-ro-sar-ko'-mah*). See *Chloroma.*

Chlorosis (*klo-ro'-sis*) [χλωρός, green]. The "green sickness," a disease of young women, associated with anemia and menstrual abnormality, usually suppression. It is the most common form of idiopathic anemia. It is favored by a sedentary life and poor hygiene. The blood shows a marked deficiency in hemoglobin, with some decrease in the number of red corpuscles, together with an increase in its watery elements. The patients do not seem to suffer from any interference with the general nutrition; in fact, there is often a tendency to the accumulation of fat in the tissues. There is present well-marked neurasthenia, with, at times, hysterical manifestations. There can always be heard a systolic bruit at the base of the heart and in the neck, anemic in nature. The bowels are constipated, and there may be some fever. **C. pituitosis.** Synonym of *Enteritis, Pseudo-membranous.* **C. rubra,** cases of chlorosis of moderate grade, with a reddish tint of the cheeks, especially on exertion.

Chlorotic (*klo-rot'-ik*) [χλωρότης, paleness]. Relating to chlorosis. A person affected by chlorosis.

Chlorozone (*klo-ro'-zōn*) [χλωρός, green; ὄζειν, to smell]. A yellow liquid assumed to be a mixture of chlorin and ozone; it is formed by passing nascent chlorin through caustic soda; its composition is not known. It is a strong bleaching-agent and disinfectant.

Chlorphenol (*klor-fe'-nol*) [χλωρός, green; φοῖνιξ, purple-red], $C_6H_4Cl.OH$. Mono-chlor-phenol, a substance possessed of marked antiseptic and antitubercular properties. It is strongly recommended for inhalation in diseases of the respiratory passages.

Chlorum (*klo'-rum*) [χλωρός, green: *gen.*, *Chlori*]. The official pharmaceutic name of chlorin. See *Chlorin.*

Choana (*ko'-an-ah*) [χοάνη, a funnel: *pl.*, *Choanæ*]. A funnel-like opening. A name applied to the posterior nasal orifices.

Choanocyte (*ko'-an-o-sīt*) [χοάνη, a funnel; κύτος, a cell]. In biology, a collar-cell.

Choanosome (*ko'-an-o-sōm*) [χοάνη, a funnel; σῶμα, body]. In biology, that portion of the cavity of a sponge that is lined with collar-cells.

Chocolate (*chok'-o-lāt*) [Mex., *choco*, cacao; *latl*, water]. 1. A dried paste prepared from the powder of cacao-seeds (see *Cacao*) with various mucilaginous and amylaceous ingredients. 2. A beverage prepared from the foregoing. 3. A sugared comfit, variously compounded and flavored, containing some proportion of the foregoing paste; sometimes medicated, as with cinchona, scammony, or magnesia. **C., African.** See *Iba.*

Choke (*chōk*) [ME., *choken*, to choke]. To suffocate; to prevent the access of air to the lungs by compressing or obstructing the trachea. **C.-cherry,** the fruit of *Prunus* (*Cerasus*) *virginiana*, not the *P. virginiana* of the pharmacopeia; common in the U. S. It is antispasmodic, tonic, and slightly astringent. *Cerasin* is a concentrated extract. Dose gr. ij–viij. Unof. **C.-damp,** a name given by miners to carbonic acid gas. Called also *Black-damp.*

Choked Disc (*chōkd disk*). See *Papillitis.*

Choking (*chōk'-ing*) [ME., *choken*, to choke]. Partial or complete suffocation, whether by the lodgment of food, or any foreign body in the larynx, trachea, pharynx, or esophagus, or by the inhalation of any irrespirable gas or vapor. **C. Distemper,** a name applied in Eastern Pennsylvania to cerebro-spinal meningitis in the horse.

Cholagogic (*kōl-ag-og'-ik*) [χολή, bile; ἀγωγός, carrying off]. 1. Stimulating the flow of bile. 2. A cholagogue.

Cholagogue (*kōl'-ag-og*) [χολή, bile; ἀγωγός, leading]. Any medicine that promotes the flow of bile; an agent that is supposed to stimulate the secretion or excretion of bile.

Cholalic Acid (*ko-lal'-ik*). See *Choloidinic Acid.*

Cholangitis (*ko-lan-ji'-tis*) [χολή, bile; ἀγγεῖον, a vessel]. Inflammation of a bile-duct. It is attended with ague-like paroxysms, chills, fever, and sweating, and jaundice of varying intensity.

Cholate (*kol'-āt*) [χολή, bile]. Any salt of cholic acid.

Choleate (*kol'-e-āt*) [χολή, bile]. Any salt of choleic acid.

Cholecyanin (*kol-e-si'-an-in*). See *Bilicyanin.*

Cholecyst (*kol'-e-sist*) [χολή, bile; κύστις, a bladder]. The gall-bladder.

Cholecystectasia (*kol-e-sis-tek-ta'-se-ah*) [χολή, bile; κύστις, a cyst; ἔκτασις, a distention]. Distention or dilatation of the gall-bladder.

Cholecystectomy (*kol-e-sis-tek'-to-me*) [χολή, bile; κύστις, bladder; ἐκτομή, a cutting off]. Excision of the gall-bladder.

Cholecystendysis (*kol-e-sis-ten'-dis-is*) [χολή, bile; κύστις, a bladder; ἔνδυσις, an entering]. Cholecystotomy, *q. v.*

Cholecystenterostomy (*kol-e-sis-ten-ter-os'-to-me*) [χολή, bile; κύστις, a bladder; ἔντερον, intestine; στόμα, a mouth]. Incision of the gall-bladder and intestine, with suture of the intestinal wound to that of the gall-bladder, so as to relieve the effects of obstruction of the gall-duct by opening a new passage into the intestine.

Cholecystic (*kol-e-sis'-tik*) [χολή, bile; κύστις, a bladder]. Relating to the gall-bladder.

Cholecystitis (*kol-e-sis-ti'-tis*) [χολή, bile; κύστις, bladder; ιτις, inflammation]. Inflammation of the gall-bladder.

Cholecystocolostomy (*kol-e-sis-to-ko-los'-to-me*) [χολή, bile; κύστις, a bladder; κόλον, the colon; τομή, a cutting]. The surgical establishment of a passage between the gall-bladder and the colon.

Cholecystolithotripsy (*kol-e-sis-to-lith'-o-trip-se*) [χολή, bile; κύστις, a bladder; λίθος, a stone; τρίβειν, to crush]. The crushing of gall-stones in the gall-bladder.

Cholecystoncus (*kol-e-sis-tong'-kus*) [χολή, bile; κύστις, bladder; ὄγκος, a tumor]. A swelling or tumor of the gall-bladder.

Cholecystorrhaphy (*kol-e-sist-or'-a-fe*) [χολή, bile; κύστις, bladder; ῥαφή, a seam]. Suture of the gall-bladder.

Cholecystostomy (*kol-e-sis-tos'-to-me*) [*χολή*, bile; *κύστις*, a bladder; *στόμα*, mouth]. The surgical establishment of an opening into the gall-bladder.

Cholecystotomy (*kol-e-sis-tot'-o-me*) [*χολή*, bile; *κύστις*, bladder; *τέμνειν*, to cut]. Incision of the gall-bladder to remove gall-stones, etc.

Choledoch (*kol'-e-dok*) [*χολή*, bile; *δέχεσθαι*, to receive]. 1. Conducting bile. 2. A bile-duct. 3. The common bile-duct.

Choledochitis (*kol-ed-o-ki'-tis*) [*χολή*, bile; *δέχεσθαι*, to receive; *ιτις*, inflammation]. Inflammation of the choledoch duct.

Choledocho-duodenostomy (*kol-ed-o-ko-du-od-en-os'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *duodecim*, twelve; *στόμα*, mouth]. The surgical establishment of a passage between the common bile-duct and the duodenum.

Choledocho-enterostomy (*kol-ed-o-ko-en-ter-os'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *ἔντερον*, bowel; *στόμα*, mouth]. The surgical establishment of a passage between the cavity of the choledoch duct and the small intestine.

Choledocholithotripsy (*kol-ed-o-ko-lith'-o-trip-se*) [*χολή*, bile; *δέχεσθαι*, to receive; *λίθος*, a stone; *τρίβειν*, to rub]. The crushing of a gall-stone in the ductus choledochus.

Choledochostomy (*kol-ed-o-kos'-to-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *στόμα*, mouth]. The formation of a fistula in the gall-duct through the abdominal wall.

Choledochotomy (*kol-ed-o-kot'-o-me*) [*χολή*, bile; *δέχεσθαι*, to receive; *τομή*, section]. Opening of the common bile-duct by incision.

Choledochus (*kol-ed'-o-kus*) [*χολή*, bile; *δέχεσθαι*, to receive]. Receiving or holding bile. **C., Ductus Communis**, the common excretory duct of the liver and gall-bladder.

Choledology (*kol-ed-ol'-o-je*) [*χολή*, bile; *λέγειν*, to speak]. The sum of knowledge concerning the bile.

Choleic (*kol-e'-ik*) [*χολή*, bile]. Pertaining to the bile.

Cholein (*kol'-e-in*) [*χολή*, bile]. A mixture of several principles of the bile; a fatty principle found in bile.

Cholelith (*kol'-e-lith*) [*χολή*, bile; *λίθος*, a stone]. A biliary calculus or gall-stone.

Cholelithiasis (*kol-e-lith-i'-as-is*) [*χολή*, bile; *λίθος*, a stone]. The presence of, or a condition associated with, calculi in the gall-bladder or in a gall-duct.

Cholemesis (*kol-em'-es-is*) [*χολή*, bile; *ἔμεσις*, vomiting]. The vomiting of bile.

Cholemia (*ko-le'-me-ah*) [*χολή*, bile; *αἷμα*, blood]. The presence of bile in the blood.

Cholemic (*ko-le'-mik*) [*χολή*, bile; *αἷμα*, blood]. Relating to cholemia; marked or caused by cholemia.

Cholepyrrhin (*kol-e-pir'-in*) [*χολή*, bile; *πυῤῥός*, orange-colored]. The brown coloring-matter of bile. Also called *Bilepyrrhin*.

Cholera (*kol'-er-ah*) [*χολέρα*; from *χολή*, bile]. A name given to a number of acute diseases characterized mainly by large discharges of fluid material from the bowels. A synonym of *C. asiatica*. **C. asiatica**, an acute, specific, highly malignant disease, existing in India and the tropics of Asia during the entire year, and occasionally spreading as an epidemic over large areas. It is characterized by excessive vomiting, alvine discharges resembling flocculent rice-water, severe cramps, collapse, and frequently death. The rate of mortality varies from 10 to 66 per cent., the average being over 50 per cent. The cause or specific virus is very generally believed to be the so-called "*comma bacillus*" of Koch, which is contained in the rice-water discharges. Cultures of this germ have in some instances produced the disease and in others have failed. The virus, whatever it may be, commonly gains entrance into the system by means of the drinking-water; hence in cases of threatened epidemic, and during the prevalence of an epidemic the purity of the water-supply should be carefully investigated. **C., Bilious**, a form of the disease attended with excessive discharge of bile. **C., Chicken**, a very fatal epidemic disease of fowls, marked by tumefaction of the lymphatic glands, with inflammation and ulceration of the digestive organs. The symptoms peculiar to cholera are wanting. **C., English.** See *C. nostras*. **C., European.** See *C., Simple*. **C. gravior.** Synonym of *C. asiatica*. **C.-hand**, a livid, grayish-blue, corrugated state of the palms of the hand from immersion in water. It is present in death from drowning, and is also called "washerwoman's hand." **C., Hog**, an infectious disease attacking swine and characterized by a patchy redness of the skin, with inflammation and ulceration of the bowels, enlargement of the abdominal glands, and congestion of the lungs. **C. infantum**, the "*summer complaint*" of infants and young children; an acute disease occurring in warm weather, and characterized by gastric pain, vomiting, purgation, fever, and prostration. The cause of the disease is the prolonged action of heat, together with errors in diet and hygiene. It is most common among the poor and in hand-fed babes. The disease is of short duration, death frequently ensuing in three to five days. **C. infectiosa.** See *Cholera asiatica*. **C. morbus**, an acute catarrhal inflammation of the mucous membrane of the stomach and intestines, with enteric pain, purging, vomiting, spasmodic contractions of the muscles, etc. It is a disease of the heated term and is very similar to Asiatic cholera in its symptomatology. **C. nostras**, also called *English Cholera* and *Cholerine*. Same as *C. morbus*. **C. sicca**, a term applied to those cases of Asiatic cholera in which rice-water liquid is found in the intestines after death, though none had been voided during life. **C., Simple**, the diarrhea with cramps, purging, and collapse, common in the autumn or late summer. **C., Summer.** See *C., Simple*. **C. Voice**, the peculiar whispering voice of those in the cold stage of cholera.

Choleraic (*kol-er-a'-ik*) [*χολέρα*, cholera]. Pertaining to or resembling cholera. **C. Diarrhea.** See *Diarrhea*.

Choleraphobia (*kol-er-af-o'-be-ah*) [*χολέρα*, cholera; *ἀ* priv.; *φόβος*, fear.] Absence of fear during an epidemic of cholera.

Choleraphonia (*kol-er-af-o'-ne-ah*) [*χολέρα*, cholera; *ἀ* priv.; *φωνή*, a voice]. Aphonia occurring during an attack of cholera.

Choleriform (*ko-ler'-if-orm*) [*χολέρα*, cholera; *forma*, form]. Resembling or appearing like cholera.

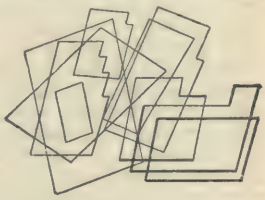
Cholerigenous (*kol-er-ij'-en-us*) [*χολέρα*, cholera; *γένεσις*, production]. Giving origin to cholera.

Cholerine (*kol'-er-in*) [dim. of *cholera*]. A mild case of choleraic diarrhea. Also, the initiatory stage of malignant cholera. Also, the zymotic cause or virus of cholera. See *Cholera nostras*.

Choleroid (*kol'-er-oid*) [*χολέρα*, cholera; *εἶδος*, like]. Resembling cholera; choleriform.

Cholerophobia (*kol-er-o-fo'-be-ah*) [*χολέρα*, cholera; *φόβος*, fear]. Morbid dread of cholera.

Cholerrhagia (*kol-er-a'-je-ah*) [*χολή*, bile; *ῥηγνύναι*, to burst forth]. Synonym of *Cholera morbus*.



Cholesteatoma (*kol-es-te-at-o'-mah*) [*χολή*, bile (cholesterin); *στεάτωμα*, a sebaceous tumor: *pl.*, *Cholesteatomata*]. A tumor containing cells inclosing plates of cholesterin, and occurring most frequently at the base

of the brain, but occasionally in subcutaneous tissue. It often incloses sebaceous glands, hair-follicles, and other dermal structures.

Cholesteatomatous (*kol-es-te-at-om'-at-us*) [χολή, bile; στεάτωμα, a sebaceous tumor]. Of the nature of, pertaining to, or affected with, cholesteatoma.

Cholesteremia (*kol-es-ter-e'-me-ah*), or **Cholesterinemia** (*kol-es-ter-in-e'-me-ah*) [χολή, bile; στέαρ, stiff fat; αἷμα, blood]. The retention of cholesterin in the blood; also, the morbid state ascribed to such retention.

Cholesterin (*kol-es'-ter-in*) [χολή, bile; στερεός, solid], $C_{26}H_{44}O$, or $C_{25}H_{42}O$. A monatomic alcohol, a constituent of bile, and a normal ingredient of nervous tissue. Also the fatty substance forming the acid principle of biliary calculi. It is a glittering, white, crystalline substance, soapy to the touch, crystallizing in fine needles and rhombic plates. It is quite insoluble in water and in cold alcohol, but soluble in solutions of bile-salts; it is levo-rotatory.

Cholesterin Crystals.

Choletelin (*kol-et'-el-in*) [χολή, bile; τέλος, completion], $C_{16}H_{18}N_2O_6$. An amorphous, soluble, yellow pigment derived from bilirubin. It is the final product of the oxidation of bile-pigments. It is readily soluble in alkalies, alcohol, and chloroform.

Choleuria (*kol-e-u'-re-ah*) [χολή, bile; οὖρον, urine]. The presence of bile in the urine.

Choleverdin (*kol-e-ver'-din*) [χολή, bile; *viridis*, green]. See *Bilicyanin*.

Cholic (*kol'-ik*) [χολή, bile]. Pertaining to the bile. **C. Acid.** See *Acid*.

Cholin (*kol'-in*) [χολή, bile], $C_5H_{15}NO_2$. A substance found among the products of the decomposition of pig's bile and ox-bile, hence its name. It is also found in the extracts of the suprarenals, and is a product of the decomposition of lecithin. It is a colorless fluid, of oily consistence, possesses a strong alkaline reaction, and forms with acids very deliquescent salts. It is a very unstable body. It is soluble in alcohol or ether. It is distinct from, though closely related to, neurin. **C. Group of Ptomaïnes,** four ptomaïnes—Cholin, Neurin, Betaïn, and Muscarin—have been thus classified. All these bases may be considered as oxidation-products of trimethyl-ethyl-ammonium hydrate.

Cholochrome (*kol'-o-krōm*) [χολή, bile; χρῶμα, color]. Any bile-pigment.

Cholocyst (*kol'-o-sist*). See *Cholecyst*.

Cholohematin (*kol-o-hem'-at-in*) [χολή, bile; αἷμα, blood]. A pigment found in the bile of the ox and sheep. It is probably a derivative of hematin.

Choloidinic Acid (*kol-oi-din'-ik*). See *Acid*.

Chololith (*kol'-o-lith*). See *Cholelith*.

Chololithiasis (*kol-o-lith-i'-as-is*). See *Cholelithiasis*.

Chololithic (*kol-o-lith'-ik*) [χολή, bile; λίθος, a stone]. Pertaining to a cholelith.

Cholophein (*kol-o-fe'-in*). See *Biliphein*.

Cholopoiesis (*kol-o-poi-e'-sis*) [χολή, bile; ποίησις, a making]. The formation of bile.

Cholorrhagia (*kol-or-a'-je-ah*) [χολή, bile; ῥηγνύναι, to burst forth]. A sudden flow of bile.

Cholorrhea (*kol-or-e'-ah*) [χολή, bile; ῥοία, a flow]. Any excessive discharge of bile.

Cholosis (*kol-o'-sis*) [χολή, bile]. Any disease caused by or associated with a perversion of the biliary secretion.

Cholotic (*kol-ot'-ik*) [χολή, bile]. Due to or associated with a cholosis.

Choluria (*kol-u'-re-ah*) [χολή, bile; οὖρον, urine]. The presence of bile, bile-salts, or bile-pigments in the urine. Also, the greenish coloration of the urine.

Chondodendron (*kon-do-den'-dron*). See *Chondrodendron*.

Chondral (*kon'-dral*) [χόνδρος, cartilage]. Cartilaginous; relating to or composed of cartilage.

Chondralgia (*kon-dral'-je-ah*) [χόνδρος, cartilage; ἄλγος, pain]. Pain in or about a cartilage.

Chondrectomy (*kon-drek'-to-me*) [χόνδρος, cartilage; ἐκτομή, a cutting out]. Surgical excision of a cartilage, or of a part of one.

Chondren (*kon'-dren*) [χόνδρος, cartilage]. Belonging to a cartilage in itself.

Chondrification (*kon-drif-ik-a'-shun*) [χόνδρος, cartilage; *facere*, to make]. The process of being converted into cartilage; the state of being chondrified.

Chondrify (*kon'-drif-i*) [χόνδρος, cartilage; *fieri*, to become]. To convert into cartilage; to become cartilaginous.

Chondrigen (*kon'-drij-en*) [χόνδρος, cartilage; γεννᾶν, to produce]. That material of the hyaline cartilage which on boiling with water becomes chondrin.

Chondrigenous (*kon-drij'-en-us*) [χόνδρος, cartilage; γεννεῖν, to produce]. Producing chondrin; relating to cartilage that has not hardened.

Chondriglucose (*kon-dre-glu'-kōs*) [χόνδρος, cartilage; γλυκύς, sweet]. A material formed by boiling cartilage with mineral acids. It has a sweet taste and the properties of glucose.

Chondrin (*kon'-drin*) [χόνδρος, cartilage]. A substance obtained from the matrix of hyaline cartilage by boiling. It resembles gelatin in general properties, but differs from it in not being precipitated by tannic acid. The substance yielding it is *chondrigen*, probably an anhydrid. See also *Glue*.

Chondritis (*kon-dri'-tis*) [χόνδρος, cartilage; ιτις, inflammation]. Inflammation of a cartilage.

Chondroblast (*kon'-dro-blast*) [χόνδρος, cartilage; βλαστός, germ]. A cell of developing cartilage.

Chondroclasis (*kon-drok'-las-is*) [χόνδρος, cartilage; κλάσις, fracture]. The crushing of a cartilage.

Chondroclast (*kon'-dro-klast*) [χόνδρος, cartilage; κλάειν, to break]. A cell supposed to be concerned in the absorption of cartilage.

Chondrocostal (*kon-dro-kos'-tal*) [χόνδρος, cartilage; *costa*, a rib]. Relating to the ribs and their cartilages.

Chondrodendron (*kon-dro-den'-dron*) [χόνδρος, cartilage; δένδρον, a tree]. A genus of S. American menispermaceous climbing-plants. **C. glaberrimum** and **C. tomentosum** are among the plants that furnish *Pareira brava*.

Chondrodynia (*kon-dro-din'-e-ah*) [χόνδρος, cartilage, ὀδύνη, pain]. Pain in a cartilage.

Chondrodystrophia (*kon-dro-dis-tro'-fe-ah*) [χόνδρος cartilage; δυς, bad; τρέφειν, to nourish]. Feta rhachitis.

Chondroepiphysis (*kon-dro-e-pif'-is-is*) [χόνδρος, cartilage; ἐπίφυσις, an outgrowth]. A cartilage that is destined to become an epiphysis; an epiphysis that has been developed from cartilage.

Chondrofibroma (*kon-dro-fi-bro'-mah*) [χόνδρος, cartilage; *fibra*, a fiber; ὄμα, a tumor: *pl.*, *Chondrofibromata*]. Chondroma with fibromatous elements.

Chondrofibromatous (*kon-dro-fi-bro'-mat-us*) [χόνδρος, cartilage; *fibra*, a fiber; ὄμα, a tumor]. Of the nature of chondrofibroma.

Chondrogen (*kon'-dro-jen*) [χόνδρος, cartilage; γεννᾶν, to produce]. 1. See *Chondrigen*. 2. A substance found in fetal and early life, forming a part of the tissue of imperfectly developed cartilage.

Chondrogenesis (*kon-dro-jen'-es-is*) [χόνδρος, cartilage; γένεσις, formation]. The formation of cartilage.

Chondrogenetic (*kon-dro-jen-et'-ik*) [χόνδρος, cartilage; γένεσις, formation]. Forming cartilage; relating to chondrogenesis.

Chondrogenous (*kon-droj'-en-us*) [χόνδρος, cartilage; γένεσις, production]. Of the nature of chondrogen; producing cartilage.

Chondroglucose (*kon-dro-glu'-kōs*) [χόνδρος, cartilage; γλυκύς, sweet]. One of the glucoses. See *Carbohydrate* and *Glucose*.

Chondrography (*kon-drog'-ra-fe*) [χόνδρος, cartilage; γράφειν, to write]. An anatomic description of the cartilages.

Chondroid (*kon'-droid*) [χόνδρος, cartilage; εἶδος, form]. Resembling cartilage.

Chondrology (*kon-drol'-o-je*) [χόνδρος, cartilage; λόγος, science]. The science of cartilages.

Chondroma (*kon-dro'-mah*) [χόνδρος, cartilage; ὄμα, tumor]. A cartilaginous tumor. See *Enchondroma*.

Chondromalacia (*kon-dro-mal-a'-se-ah*) [χόνδρος, cartilage; μαλακία, softening]. Softening of a cartilage. **C. auris.** Same as *Hæmatoma auris*.

Chondromalacosis (*kon-dro-mal-ak-o'-sis*). See *Chondromalacia*.

Chondromatous (*kon-drōm'-at-us*) [χόνδρος, cartilage; ὄμα, a tumor]. Relating to or of the nature of cartilage.

Chondro-myxoma (*kon-dro-miks-o'-mah*) [χόνδρος, cartilage; μύξα, mucus; ὄμα, a tumor: *pl.*, *Chondromyxomata*]. A chondroma with myxomatous elements.

Chondrosarcoma (*kon-dro-sar-ko'-mah*) [χόνδρος, cartilage; σάρκωμα, sarcoma: *pl.*, *Chondrosarcomata*]. A cartilaginous and sarcomatous tumor.

Chondrosarcomatous (*kon-dro-sar-kōm'-at-us*) [χόνδρος, cartilage; σάρκωμα, sarcoma]. Relating to chondrosarcoma.

Chondrosis (*kon-dro'-sis*) [χόνδρος, cartilage]. Formation of cartilage.

Chondrosteous (*kon-dros'-te-us*) [χόνδρος, cartilage; ὀστέον, bone]. In biology, having a cartilaginous skeleton.

Chondrotome (*kon'-dro-tōm*) [χόνδρος, cartilage; τομός, cutting]. An instrument for cutting cartilage.

Chondrotomy (*kon-drot'-o-me*) [χόνδρος, cartilage; τέμνειν, to cut]. The dissection or surgical division of a cartilage, or the anatomic analysis of a cartilage.

Chondrus (*kon'-drus*) [χόνδρος, a grain; cartilage]. 1. Irish Moss. The substance of the algæ *C. crispus* and *Gigartina mamillosa*. These yield, on boiling with water, a soluble colloid consisting mainly of mucilage. This is demulcent and somewhat nutrient, and is sometimes used in making *blanc mange*. Dose indefinite. Unof. See *Carragheen*. 2. A cartilage; the ensiform cartilage.

Chopart's Amputation. See *Operations, Table of.* **C. Operations.** See *Operations, Table of.*

Chopping (*chop'-ing*). See *Percussion*.

Chorda (*kor'-dah*) [L., a cord: *pl.*, *Chordæ*]. A cord, tendon, or filament of nerve. **C. caudalis,** the urochord. **C. dorsalis.** See *Notochord.* **C. spinalis,** the spinal cord. **C. tendineæ,** the tendinous strings connecting the *columnæ carneæ* of the heart with the auriculo-ventricular valves. **C. tympani,** a filament of the Vidian nerve that enters the tympanum. **C. umbilicalis,** the umbilical cord. **C. vertebralis,** the notochord; the spinal cord. **C. vocalis,** one of the vocal bands or thyro-arytenoid ligaments.

Chordal (*kor'-dal*) [*chorda*, a cord]. Relating to a chorda, especially to the notochord.

Chordapsus (*kor-dap'-sus*) [χορδή, an intestine; ἅπτειν, to tie up]. Synonym of *Acute Intestinal Catarrh*.

Chordee (*kor-de'*) [χορδή, a cord]. A symptom of gonorrhea consisting of painful erection and downward curvature of the penis.

Chorditis (*kor-di'-tis*) [χορδή, a cord; ῖτις, inflammation]. Inflammation of the vocal bands. **C. tuberosa,** a localized thickening on the vocal bands, often bilateral, and situated at the junction of the posterior two-thirds with the anterior third.

Chordotonal (*kor-do-to'-nal*) [χορδή, chord; τόνος, tone]. In biology, applied to sense-organs or parts of arthropods that are responsive to sound-vibrations.

Chorea (*ko-re'-ah*) [χορεία, dancing]. St. Vitus's dance. A functional nervous disorder, usually occurring in youth, characterized by spasmodic and convulsive contraction and non-rhythmic action of the muscles of the extremities, face, etc. The action of the heart is irregular, and in a large number of cases a systolic murmur is present. Rheumatism is a frequent complication. Chorea may be caused by a number of conditions, among which are fright and reflex irritations, but it is essentially a disease of the later period of childhood, and affects girls about three times as frequently as boys. Occasionally it is seen in the adult, and may become a serious complication of pregnancy, resulting in the death of both fetus and mother. When it occurs late in life it generally resists treatment. **C., Automatic,** an affection in which paroxysms of apparently purposive actions occur independently of the will, as the result of an impulse that arises spontaneously or that occurs in response to a stimulus received from without. **C., Buttonmaker's,** a form of chorea in girls employed in button-mills, the result of application at their trade. The fingers move involuntarily when not at work, following the same motions as when guiding the procession of buttons. It is due to an erethism of the centers in the brain for the hands and fingers. **C., Chronic.** See *C., Huntington's.* **C., Electric.** See *Dubini's Disease.* **C., Epidemic,** dancing mania. See *Choromania.* **C. festinans.** See *Paralysis agitans.* **C. germanorum,** a term for the major form of chorea. **C.-habit.** See *Spasm.* **C., Hereditary.** See *C., Huntington's.* **C., Hysterical.** See *C., Major.* **C., Huntington's,** an affection frequently hereditary, of adult or middle life, characterized by irregular movements, disturbance of speech, and gradual dementia. It was first described by Huntington, a physician of Long Island, U. S. **C. insaniens,** maniacal chorea; a grave form of chorea usually seen in adult women, and associated with maniacal symptoms. This may develop from the ordinary form, and usually ends fatally. It may develop during pregnancy. **C., Maniacal.** See *C. insaniens.* **C., Major,** the hysterical chorea of the French, in which there are regular oscillatory movements of the parts. **C., Mimetic,** that which is caused by imitation. **C., Minor,** simple chorea. **C. oscillatoria** is marked by more or less regular oscillations of the head, trunk, or limbs. **C., Post-hemiplegic.** See *Athetosis.* **C., Post-paralytic,** a form of involuntary movement seen in patients after an attack of hemiplegia. **C., Rhythmic.** See *C., Major.* **C., Rotatory,** a hysterical form associated with rhythmic movements of the body or head. **C., School-made,** chorea resulting from overstimulation of children at school by parents and teachers. **C. scriptorum.** See *Cramp, Writers'.* **C., Senile.** See *Paralysis agitans.* **C. spastica.** See *Paraplegia, Infantile Spasmodic.* **C., Sydenham's,** ordinary chorea.

Choreic (*ko-re'-ik*) [χορεία, dancing]. Relating to, of the nature of, or affected with, chorea.

Choreiform (*ko-re'-if-orm*) [*χορεία*, dancing; *forma*, form]. Resembling chorea.

Choremania (*ko-re-ma'-ne-ah*) [*χορεία*, dancing; *μανία*, madness]. Synonym of *Choromania*.

Choreoid (*ko-re'-oid*) [*χορεία*, dancing; *εἶδος*, like]. Pertaining or similar to chorea.

Choreomania (*ko-re-o-ma'-ne-ah*). See *Choromania*.

Chorial (*ko'-re-al*) [*χόριον*, skin]. Chorionic.

Chorioblastosis (*ko-re-o-blas-to'-sis*) [*χόριον*, skin; *βλαστάνειν*, to germinate]. Any anomaly of growth of the corium and subcutaneous connective tissue.

Chorio-capillaris (*ko-re-o-kap-il-a'-ris*) [*χόριον*, skin; *capillus*, a hair]. The network of capillaries over the inner portion of the choroid coat of the eye. See *Ruysch, Membrane of*.

Choriocele (*ko'-re-o-sēl*, or *ko-re-o-se'-le*) [*χόριον*, a skin; *κήλη*, hernia]. A hernial protrusion of the choroid coat of the eye.

Chorioid (*ko'-re-oid*). See *Choroid*.

Chorioidal (*ko-re-oid'-al*). See *Choroid*.

Chorioideremia (*ko-re-oid-er-e'-me-ah*). See *Choroideremia*.

Chorioidiritis (*ko-re-oid-i-ri'-tis*). See *Choroido-iritis*.

Chorioiditis (*ko-re-oid-i'-tis*). See *Choroiditis*.

Chorioido-retinitis (*ko-re-oid'-o-ret-in-i'-tis*). See *Choroido-retinitis*.

Chorion (*ko'-re-on*) [*χόριον*, fetal membrane]. The outermost of the fetal membranes, formed from the external layer of the non-germinal epiblast. The chorion lies between the amnion and the deciduæ (reflexa and vera). **C., Cystic Degeneration of,** a rare myxomatous disease of the chorion, producing the so-called "*hydatid mole*." It is characterized by rapid increase in the size of the uterus, hemorrhage, often profuse, beginning during the second month of pregnancy, and the discharge of small cysts, whitish in appearance, surrounded by bloody clots. These cysts vary in size from a pin's-head to a filbert. **C. leve,** the smooth or non-villous portion of the chorion. **C., Primitive,** the *Vitelline membrane* (or *Zona pellucida*) during the time of the development of the hollow, structureless villi upon its surface. **C., Shaggy,** or **C. frondosum,** the part covered by villi.

Chorionic (*ko-re-on'-ik*) [*χόριον*, the chorion]. Relating to the chorion.

Chorionitis (*ko-re-on-i'-tis*). See *Scleroderma*.

Choripetalous (*kor-ip-et'-al-us*) [*χωρίς*, asunder; *φύλλον*, leaf]. In biology, applied to a corolla whose petals are distinct.

Chorisis (*ko-ri'-sis*) [*χώρισις*, a separation]. In biology, the development of two or more members when but one is expected; a doubling.

Choroid (*ko'-roid*) [*χόριον*, the chorion; *εἶδος*, likeness]. The second or vascular tunic of the eye, continuous with the iris in front and lying between the sclerotic and the retina. **C. Plexus,** a vascular plexus in the lateral ventricles of the brain. **C. Sulcus** (**of Schwalbe**). See *Schwalbe, Fissure of*. **C. Vein.** See *Vein*.

Choroidal (*ko-roid'-al*). Pertaining to the choroid.

Choroideremia (*ko-roid-er-e'-me-ah*) [*χόριον*, the chorion; *εἶδος*, like; *ἐρημία*, desolation]. Absence of the choroid; absence of the epithelium of the choroid.

Choroiditis (*ko-roid-i'-tis*) [*χόριον*, the chorion; *ιτις*, inflammation]. Inflammation of the choroid coat of the eye. It may be *anterior*, the foci of exudation being at the periphery of the choroid; or *central*, the exudate being in the region of the macula lutea; *diffuse* or *disseminated*, characterized by numerous round or irregular spots scattered over the fundus; *exudative* or *non-suppurative*, when there are isolated foci of inflammation scattered over the choroid; *metastatic*, when due to embolism; and *suppurative*, when proceeding to suppuration. **C. serosa.** Synonym of *Glaucoma*.

Choroido-iritis (*ko-roid'-o-i-ri'-tis*) [*χόριον*, the chorion; *εἶδος*, like; *ἶρις*, the rainbow; *ιτις*, inflammation]. Inflammation of the choroid and the iris.

Choroido-retinitis (*ko-roid'-o-ret-in-i'-tis*) [*κόριον*, the chorion; *εἶδος*, like; *retina*, the retina; *ιτις*, inflammation]. Choroiditis with retinitis. **C.-r., Ametropic,** caused by ametropia.

Choromania (*ko-ro-ma'-ne-ah*) [*χορός*, a dance; *μανία*, madness]. A nervous disorder manifest at various times and places, and characterized by dancing or other rhythmic movements; epidemic chorea; dancing mania.

Chrchtschonovitsch's Method. A method of staining tissues. See *Stains, Table of*.

Christian Science (*kris'-chan si'-ens*). An alleged system of therapy; faith-cure, or one form of it.

Christison's Formula. A formula for estimating the amount of solids in the urine: Multiply the last two figures of the specific gravity expressed in four figures by 2.33 (or by 2, *Trapp;* or by 2.2, *Lœbisch*). This gives the amount of solids in every 1000 parts.

Chromate (*kro'-māt*) [*χρῶμα*, color]. Any salt of chromic acid.

Chromatic (*kro-mat'-ik*) [*χρῶμα*, color]. Relating to or possessing color. **C. Audition,** luminous sensations aroused by sound. See *Photism*. **C. Gustation.** See *Gustation*.

Chromatin (*kro'-mat-in*) [*χρῶμα*, color]. The chromatophilous, or tingible portion of the protoplasm, forming a delicate reticular network or plexus of fibrils permeating the achromatin of a typical cell in process of division. It is called also Karyomiton. See *Cell-body*.

Chromation (*kro-ma'-shun*) [*χρῶμα*, color]. The process of tingeing or staining.

Chromatism (*kro'-mat-izm*) [*χρωματισμός*, coloring]. 1. Abnormal coloration of any tissue. 2. Chromatic aberration.

Chromatoblast (*kro-mat'-o-blast*) [*χρῶμα*, color; *βλαστός*, a germ]. Same as *Chromatophore*.

Chromatodysopia (*kro-mat-o-dis-o'-pe-ah*) [*χρῶμα*, color; *δυσ*, ill; *ὄψις*, vision]. Color-blindness.

Chromatogenous (*kro-mat-oj'-en-us*) [*χρῶμα*, color; *γεννάειν*, to beget]. Producing color.

Chromatology (*kro-mat-ol'-o-je*) [*χρῶμα*, color; *λόγος*, science]. The science of colors. Also the spectroscopic investigation of colors.

Chromatopathia (*kro-mat-o-path'-e-ah*) [*χρῶμα*, color; *πάθος*, disease]. Any pigmentary skin-disease; a chromatosis.

Chromatopathy (*kro-mat-op'-a-the*). See *Chromatopathia*.

Chromatophile (*kro-mat'-o-fil*). Same as *Chromophilous*.

Chromatophobia (*kro-mat-o-fo'-be-ah*) [*χρώμα*, color; *φόβος*, dread]. Abnormal fear of colors.

Chromatophore (*kro'-mat o-for*) [*χρῶμα*, color; *φόρος*, bearing]. In biology, (1) one of the contractile pigment-sacs, abundant in the skin of many animals, e.g., squid, chameleon; (2) one of the pigmented marginal sense-organs of an Actinozoan; "*bourse calicinale*." (3) a plastid containing chlorophyl, or other coloring matter; color-granule, chromoplast, chromoleucite.

Chromatophorous (*kro-mat-off'-or-us*) [*χρῶμα*, color; *φέρειν*, to bear]. Containing pigment or pigment-cells.

Chromatopseudopsis (*kro-mat-o-su-dop'-sis*) [*χρῶμα*, color; *ψευδής*, false; *ὄψις*, sight]. Color-blindness.

Chromatopsia (*kro-mat-op'-se-ah*) [χρῶμα, color; ὄψις, vision]. Abnormal sensation of color. It may be due to disorders of the optic centers, or to drugs, especially santonin.

Chromatopsy (*kro'-mat-op-se*). See *Chromatopsia.*

Chromatoptometry (*kro-mat-op-tom'-et-re*) [χρῶμα, color; ὀπτεύω, to see; μέτρον, a measure]. The testing of the sensibility of the eye with respect to color-perception.

Chromatoscope (*kro-mat'-o-skōp*) [χρῶμα, color; σκοπεῖν, to observe]. An instrument for determining the refractive index of colored light.

Chromatoscopy (*kro-mat-os'-ko-pe*) [χρῶμα, color; σκοπεῖν, to observe]. The determination of the color of objects.

Chromatosis (*kro-mat-o'-sis*) [χρῶμα, color]. Pigmentation; a pathologic process or pigmentary disease consisting in a deposit of coloring-matter in a locality where it is usually not present, or in excessive quantity in regions where pigment normally exists.

Chromatosome (*kro-mat'-o-sōm*) [χρῶμα, color; σῶμα, body]. In biology, the "nuclear rods" of the nucleus.

Chromaturia (*kro-mat-u'-re-ah*) [χρῶμα, color; οὖρον, urine]. Abnormal coloration of the urine.

Chrome (*krōm*) [χρῶμα, color]. Chromium, *q.v.* **C.-alum.** See *Pigments, Conspectus of.* **C.-black.** See *Pigments, Conspectus of.* **C.-carmin.** Same as *Chrome-red.* **C. chlorid.** See *Pigments, Conspectus of.* **C.-garnet.** Same as *Chrome-red.* **C.-green.** See *Pigments, Conspectus of.* **C.-orange.** Same as *Chrome-red.* **C.-red,** a pigment; basic lead chromate. See *Pigments, Conspectus of.* **C.-vermilion.** Same as *Chrome-red.* **C.-yellow,** lead chromate, a pigment. See *Chromium,* and *Pigments, Conspectus of.*

Chromesthesia (*krōm-es-the'-ze-ah*) [χρῶμα, color; αἴσθησις, perception by the senses]. The association of colors with words, letters, and sounds.

Chromhidrosis (*krōm-hid-ro'-sis*). Same as *Chromidrosis.*

Chromic (*krōm'-ik*) [χρῶμα, color]. Pertaining to or made from chromium. **C. Acid.** See *Acid.* **C. Acid Test.** See *Tests, Table of.*

Chromicize (*kro'-mis-īz*). To impregnate with chromic acid.

Chromidrosis (*krōm-id-ro'-sis*) [χρῶμα, color; ἱδρώς, sweat]. A rare condition of the sweat in which it is variously colored, being bluish, blackish, reddish, greenish, or yellowish. *Black sweat* (*Seborrhœa nigricans*) occurs usually in hysterical girls, the part affected being the face. It is associated with chronic constipation and is due to the presence of indican in the sweat. *Red sweat, hematidrosis,* may be due to an exudation of blood into the sweat-glands, or to the presence of a microörganism in the sweat. See *Micrococcus hæmatodes,* Babes, under *Bacteria, Table of.*

Chromium (*kro'-me-um*) [χρῶμα color]. Cr = 52.2; quantivalence II and IV. One of the elements of the iron group. The various salts of chromium, especially chromic acid, Cr_2O_3, are much used in the manufacture of pigments and in dyeing textile fabrics. All are poisonous. Potassium dichromate (bichromate of potash), $K_2Cr_2O_7$, is used in various pharmaceutic and chemic operations. **C.-green.** Same as *Chrome-green.*

Chromocrinia (*kro-mo-krin'-e-ah*) [χρῶμα, color; κρίνειν, to separate]. The secretion of coloring-matter, as in the sweat, etc.

Chromocytometer (*kro-mo-si-tom'-et-er*) [χρῶμα, color; κύτος, cell; μέτρον, a measure]. An instrument for estimating the proportion of hemoglobin present in the blood.

Chromocytometry (*kro-mo-si-tom'-et-re*) [χρῶμα, color; κύτος, cell; μέτρον, a measure; νόσος, disease]. The estimation of hemoglobin by means of the chromocytometer.

Chromodermatosis (*kro-mo-der-mat-o'-sis*) [χρῶμα, color; δέρμα, skin]. A skin-disease characterized by discoloration of the surface.

Chromogen (*kro'-mo-jen*) [χρῶμα, color; γένεσις, production]. Any principle of the animal or vegetable economy which (though it is itself not of any pronounced color) is susceptible, under suitable circumstances, of being changed into a coloring-matter.

Chromogenic (*kro-mo-jen'-ik*) [χρῶμα, color; γένεσις, production]. 1. Relating to chromogen. 2. Color-producing.

Chromoleucite (*kro-mo-lu'-sīt*) [χρῶμα, color; λευκός, white]. Same as *Chromoplastid.*

Chromopare (*kro'-mo-pār*) [χρῶμα, color]. In biology, applied by Beyerinck to those chromogenic bacteria that excrete the pigment, remaining colorless themselves. Cf. *Chromophore* and *Para-chromophor.*

Chromophan (*kro'-mo-fan*) [χρῶμα, color; φαίνειν, to appear]. In biology, the pigment of the inner segments of the retinal cones of certain animals. There are at least three varieties, chlorophan, rhodophan, xanthophan. (Ruhnes).

Chromophile (*kro'-mo-fil*). Same as *Chromophilous.*

Chromophilous (*kro-mof'-il-us*) [χρῶμα, color; φίλος, loving]. Readily stained; easily absorbing color; applied to tissues prepared for microscopic study.

Chromophore (*kro'-mo-fōr*) [χρῶμα, color; φέρειν, to bear]. In biology, applied by Beyerinck to those chromogenic bacteria that possess pigment as an integral part of their organism. Cf. *Chromopare* and *Para-chromophor.*

Chromophytosis (*kro-mo-fi-to'-sis*) [χρῶμα, color; φυτόν, a plant]. 1. Any microscopic plant-growth that produces a discoloration of the skin in which it grows; any pigmentary skin-disease caused by microscopic vegetation. 2. A synonym of *Tinea versicolor,* or *Eichstedt's Disease.* See *Tinea versicolor,* and *Diseases, Table of.*

Chromoplastid, or **Chromoplastidule** (*kro-mo-plas'-tid,* or *kro-mo-plas'-tid-ūl*) [χρῶμα, color; πλάσσειν, to form]. In biology, a pigment-granule imbedded in the protoplasm of a plant or animal. It is also called chromoleucite.

Chromopsia (*krōm-op'-se-ah*). See *Chromatopsia.*

Chromoptometer (*kro-mop-tom'-et-er*) [χρῶμα, color; μέτρον, a measure]. A contrivance for determining the extent of development of color-vision.

Chromosome (*kro'-mo-sōm*) [χρῶμα, color; σῶμα, body]. Any one of the nuclear chromatin-fibrils of a cell. According to some observers there is only one such fibril in closely intertwined folds. Others say that the chromosomes are many, and of two varieties, the fine and the coarse.

Chromostroboscope (*kro-mo-stro'-bo-skōp*) [χρῶμα, color; στρόβος, a twisting; σκοπεῖν, to inspect]. A device for showing the persistence of visual impressions of color.

Chromule (*kro'-mūl*) [χρῶμα, color; ὕλη, matter]. In biology, coloring-matter in plants, especially when not green, or when liquid.

Chronic (*kron'-ik*) [χρόνος, time]. Long-continued; of long duration; slow of progress; opposed to *acute,* and to *subacute.*

Chronicity (*kro-nis'-it-e*) [χρόνος, time]. The state of being chronic or long-continued.

Chronizoöspore (*kro-niz-o'-o-spōr*) [κρόνιος, late; ζῷον, an animal; σπορά, seed]. One of the microzoögonidia or minute zoöspores or resting-spores, produced by the water-net, *Hydrodictyon.*

Chronograph (*krōn'-o-graf*) [χρόνος, time; γράφειν, to write]. An instrument for graphically recording intervals of time, in physiologic and psycho-physical experiments.

Chronoscope (*kro'-no-skōp*) [χρόνος, time; σκοπεῖν, to inspect]. An instrument for measuring extremely short intervals of time. **C., A-form,** an apparatus introduced by Galton for measuring the time of certain psycho-physical reactions. It is so called from its outline, which somewhat resembles that of the letter A.

Chronosteal (*kro-nos'-te-al*) [χρόνος, time; ὀστέον, bone]. Relating to the chronosteon.

Chronosteon (*kro-nos'-te-on*) [χρόνος, time (temporal); ὀστέον, bone]. The temporal bone.

Chronothermal (*krōn-o-ther'-mal*) [χρόνος, time; θέρμα, heat]. Pertaining to the theory that all diseases are characterized by periods of intermitting chill and heat; relating to periodicity in changes of bodily temperature.

Chroöpsia (*kro-op'-se-ah*) [χρόα, color; ὄψις, sight]. See *Chromatopsia.*

Chrotal Epithelium (*kro'-tal ep-e-the'-le-um*). The ectoderm.

Chrotic (*kro'-tik*) [χρώς, the skin]. Relating to the skin.

Chrotoplast (*krōt'-o-plast*) [χρώς, skin; πλάσσειν, to form]. A skin-cell; a dermal or epithelial cell.

Chrymar's Operation. See *Operations, Table of.*

Chrysalis (*kris'-al-is*) [χρυσός, gold]. The pupa or secondary stage in the transformation of insects. So called from the golden color of certain chrysalides.

Chrysamin (*kris'-am-in*) [χρυσός, gold; *amin*], $C_{26}H_{16}N_4O_6Na_2$. Flavophenin; a coal-tar color of the oxyazo group, used in dyeing. It dyes on cotton a sulphur-yellow, remarkably fast to light. See *Pigments, Conspectus of.*

Chrysanilin (*kris-an'-il-in*) [χρυσός, gold; *anilin*], $C_{19}H_{11}N(NH_2)_2$. A body obtained as a by-product in the manufacture of rosanilin. It crystallizes from dilute alcohol in golden-yellow needles, melting at about 268°. It is used largely as a dye-stuff, yielding a very beautiful yellow color. See *Pigments, Conspectus of.*

Chrysanisic Acid (*kris-an-is'-ik*). See *Acid.*

Chrysarobin, or Chrysarobinum (*kris-ar-o'-bin,* or *kris-ar-o-bi'-num*) [χρυσός, gold; *aroba* (nat. East Ind.), bark of a leguminous tree], $C_{30}H_{26}O_7$. A reduction-product of chrysophanic acid; it occurs in goa-powder and araroba-powder. It is a yellow-colored powder, the product of the decay of *Andira araroba,* a Brazilian tree. It is a gastro-intestinal irritant, and is almost a specific when applied locally in psoriasis. It stains the skin a dark yellowish-brown color, which may be removed by a weak solution of chlorinated lime. Dose, internally, gr. ¼–½. **C., Ung.,** contains 10 per cent. of the drug with 90 per cent. benzoated lard.

Chrysaurin (*kris-aw'-rin*) [χρυσός, gold; *aurum,* gold]. See *Orange Colors.*

Chrysene (*kris'-ēn*) [χρυσός, gold], $C_{18}H_{12}$. A hydrocarbon derived from coal-tar. It is generally colored yellow, but can be rendered perfectly colorless. It is sparingly soluble in alcohol or ether; melts at 250° C. (482° F.); boils at 436°; crystallizes and sublimes in silvery leaflets, that exhibit an intense violet fluorescence.

Chrysenic Acid (*kris-en'-ik*). See *Acid.*

Chrysin (*kris'-in*) [χρυσός, gold], $C_{15}H_{10}O_4$. A coloring-matter found in the buds of the European Black Poplar.

Chrysoidin (*kris-oi'-din*) [χρυσός, gold; εἶδος, like]. 1. $C_{12}H_3N_4Cl$. A coal-tar color used in dyeing. It is the hydrochlorid of diamidoazobenzene. It consists of dark-violet crystals soluble in water. It dyes bright-yellow on silk and cotton. See *Pigments, Conspectus of.* 2. $C_7H_{22}O_4$. A yellow coloring-substance found in asparagus berries.

Chrysoin (*kris'-o-in*). See *Orange Colors.*

Chrysolin (*kris'-o-lin*) [χρυσός, gold; *oleum,* oil], $C_{20}H_{10}O_3(OC_7H_7)OH$. A coal-tar color of the phthalein group, used in dyeing. It is the sodium salt of benzyl-fluorescein. It produces a yellow color, similar to that of turmeric, on silk, cotton and wool. See *Pigments, Conspectus of.*

Chrysophan (*kris'-o-fan*) [χρυσός gold; φαίνειν, to show], $C_{16}H_{18}O_8$. A yellow, crystalline body found in rhubarb. It has a distinctly bitter taste, is readily soluble in warm water and diluted alcohol, but insoluble in ether. It is also called *Chrysophanin.*

Chrysophanic Acid (*kris-o-fan'-ik*). See *Acid.*

Chrysophanin (*kris-o-fan'-in*). See *Crysophan,* and *Pigments, Conspectus of.*

Chrysophyl (*kris'-o-fil*) [χρυσός, gold; φύλλον, a leaf]. Xanthophyl; a bright golden-yellow crystalline pigment derived from leaves.

Chrysorrhamnin (*kris-or-am'-nin*) [χρυσός, gold; ῥάμνος, a prickly shrub]. The yellow pigment found in French berries. See *Pigments, Conspectus of.*

Chthonophagia, or Chthonophagy (*thon-o-fa'-je-ah,* or *thon-off'-a-je*) [χθών, earth; φαγεῖν, to eat]. Dirt-eating; geophagy.

Churning Sound (*churn'-ing sound*). A peculiar splashing-sound like that made by a churn, heard in the chest in some cases of pleural effusion.

Churrus (*chur'-us*) [Hind., *charas*]. Hemp-resin. See *Cannabis.*

Chvostek's Sign. See *Tetany;* also *Signs and Symptoms, Table of.*

Chylaceous (*ki-la'-se-us*) [*chylus,* chyle]. Composed of chyle.

Chylangioma (*ki-lan-je-o'-mah*) [*chylus,* chyle; ἀγγεῖον, a vessel]. Retention of chyle in lymphatic vessels with dilatation of the latter.

Chylaqueous (*kil-a'-kwe-us*) [χυλός, chyle; *aqua,* water]. Like water and chyle. **C. Fluid,** the digested food or nutritive fluid in the somatic or perigastric cavity of invertebrates; it is never enclosed in distinct vessels and represents the blood of higher animals.

Chyle (*kīl*) [χυλός, juice]. The milk-white fluid absorbed by the lacteals during digestion. On standing, it separates into a thin, jelly-like clot and a substance identical with serum. **C.-corpuscle,** any floating cell of the chyle. These cells resemble, and are probably identical with, the colorless blood-corpuscles. **C.-gland,** Cheshire's name for system II, of the "salivary glands" of bees.

Chylidrosis (*kīl-id-ro'-sis*) [χυλός, chyle; ἵδρωσις, a sweating]. Milkiness of the sweat.

Chylifaction (*ki-le-,* or *kil-if-ak'-shun*) [*chylus,* chyle; *facere,* to make]. The forming of chyle from food.

Chylifactive (*ki-le-,* or *kil-if-ak'-tiv*) [*chylus,* chyle; *facere,* make]. Chyle-forming.

Chyliferous (*ki-lif'-er-us*) [*chylus,* chyle; *ferre,* to carry]. 1. Chyle-forming. 2. Containing chyle.

Chylific (*ki-lif'-ik*) [*chylus,* chyle; *facere,* to make]. Making chyle; pertaining to chylifaction.

Chylification (*ki-le-,* or *kil-if-ik-a'-shun*) [χυλός, chyle; *facere,* to make]. The process by which the chyle is formed, separated and absorbed by the villi of the small intestine.

Chylificatory (*ki-lif'-ik-at-o-re*) [*chylus,* chyle; *facere,* to make]. Chyle-making.

Chylify (*kil'-lif-i*) [*chylus*, chyle: *facere*, to make]. 1. To make into chyle. 2. To be made into chyle.

Chylocele (*kil'-lo-sēl*) [χυλός, chyle; κήλη, a tumor]. An effusion of chyle into the tunica vaginalis testis. **C., Parasitic.** See *Filaria sanguinis hominis*.

Chylocyst (*kil'-lo-sist*) [χυλός, juice; κύστις, bladder]. The chyle-bladder; the reservoir of Pecquet.

Chylocystic (*ki-lo-sis'-tik*) [χυλός, juice; κύστις, bladder]. Relating to the chylocyst.

Chyloderma (*ki-lo-der'-mah*) [χυλός, lymph; δέρμα, skin]. Scrotal elephantiasis, with accumulation of lymph in the thickened skin and in the enlarged lymphatic vessels; lymph-scrotum.

Chylodochium (*kil-o-do'-ki-um*) [χυλός, chyle; δοχεῖον, receptacle]. The receptaculum chyli.

Chylogaster (*ki-lo-gas'-ter*) [χυλός, chyle; γαστήρ, the stomach]. The duodenum, so-called because of its being the chief seat of chylous digestion.

Chylogastric (*ki-lo-gas'-trik*) [χυλός, chyle; γαστήρ, stomach]. Pertaining to the chylogaster.

Chylopericardium (*ki-lo-per-ik-ar'-de-um*) [χυλός, chyle; περί, around; καρδιά, the heart]. A rare condition, in which chyle is present in the pericardium, as a consequence of the formation of a channel of communication between a chyle-duct and the cavity of the heart-sac.

Chylopoiesis (*ki-lo-poi-e'-sis*) [χυλοποίησις; χυλός, chyle; ποιεῖν, to make]. Chylification.

Chylopoietic (*ki-lo-poi-et'-ik*) [χυλός, chyle; ποιεῖν, to make]. Chylifaction; making or forming chyle.

Chyloptyalism (*ki-lop-ti'-al-izm*) [χυλός, chyle; πτυαλίζειν, to spit]. Milkiness of the saliva.

Chylorrhea (*ki-lor-e'-ah*) [χυλός, chyle; ῥέειν, to flow]. The excessive flow of chyle. Also, a diarrhea characterized by a milky color of the feces.

Chylosis (*ki-lo'-sis*) [χύλωσις, a converting into juice]. Chylification.

Chylothorax (*ki-lo-tho'-raks*) [χυλός, chyle; θώραξ, the chest]. The presence of chyle within the pleural cavity. It is consequent upon wounds or rupture of the thoracic duct, and is usually fatal.

Chylous (*kil'-lus*) [χυλός, chyle]. Relating to or resembling chyle.

Chyluria (*ki-lu'-re-ah*) [χυλός, juice; οὖρον, urine]. The passage of milky-colored urine. It is thought to be caused by a disordered condition of the lacteals and is also connected with the presence in the blood of *Filaria sanguinis hominis*. The urine passed is generally above the normal in quantity, has the color of milk, and becomes jelly-like on standing, afterward again becoming liquid. It readily undergoes decomposition. The condition arises from a blocking of the lymph-channels by the parasites. See *Bacillus of Chyluria* under *Bacteria, Synonymatic Table of;* also *Filaria sanguinis hominis*, Lewis, under *Parasites* (*Animal*), *Table of.*

Chyme (*kīm*) [χυμός, juice]. Food that has undergone gastric digestion and has not yet been acted upon by the biliary, pancreatic, and intestinal secretions.

Chymiferous (*kīm-if'-er-us*) [*chymus*, chyme; *ferre*, to bear]. Capable of producing chyme.

Chymification (*kīm-if-ik-a'-shun*) [*chymus*, chyme; *facere*, to make]. The change of food into chyme by the digestive process.

Chymophorous (*kīm-off'-or-us*) [χυμός, chyme; φέρειν, to carry]. Chymiferous.

Chymoplania (*kim-o-pla'-ne-ah*) [χυμός, juice; πλάνη, roving]. The morbid or abnormal metastasis of chyme or any secretion.

Chymorrhea (*kīm-or-e'-ah*) [χυμός, chyme; ῥεῖν, to flow]. A discharge of chyme.

Chymosepsis (*kīm-o-sep'-sis*) [χυμός, chyme; σῆψις, putrefaction]. Putrefactive fermentation of the chyme.

Chyron (*ki'-ron*) [*ciron, cyron*]. The name given by ancient writers to the itch-mite, *Sarcoptes scabei*.

Cibarious (*sib-a'-re-us*) [*cibum*, food]. Serving as food; nutritious; edible.

Cicatricial (*sik-at-rish'-al*) [*cicatrix*, a scar]. Pertaining to or of the nature of a cicatrix. **C. Deformities**, abnormal contractions caused by cicatrices. **C. Tissue**, a form of dense connective tissue, seen in cicatrices.

Cicatricula (*sik-at-rik'-u-lah*) [L., dim. of *cicatrix*, a scar]. The germinating point of the fecundated egg.

Cicatrisant (*sik'-at-ri-sant*). See *Cicatrizant.*

Cicatrisive (*sik'-at-ri-siv*) [*cicatrix*, a scar]. Tending to form a cicatrix.

Cicatrix (*sik-a'-triks*) [L.: *pl.*, *Cicatrices*]. A scar; a connective-tissue new-formation replacing loss of substance in the skin. It extends as far as the corium. It may be depressed below or elevated above the surface; its color is usually whitish and glistening when old, red or purple when young.

Cicatrizant (*sik'-at-ri-zant*) [*cicatrix*, a scar]. 1. Tending to cicatrize or heal. 2. A medicine that aids the formation of a cicatrix.

Cicatrization (*sik-at-riz-a'-shun*) [*cicatrix*, a scar]. The process of healing.

Cicer (*si'-ser*) [L.]. A genus of leguminous plants. See *Chick-pea.*

Cicuta (*sik-u'-tah*) [L.]. A genus of umbelliferous plants. **C. virosa.** See *Cowbane.*

Cicutin (*sik-u'-tin*) [*cicuta*, hemlock]. 1. An alkaloid obtained from *Cicuta virosa*. 2. The same as *Conein.*

Cicutoxin (*sik-u-toks'-in*) [*cicuta*, hemlock; τοξικόν, poison]. The poisonous active principle of *Cicuta virosa*. It is a viscid, non-crystallizable liquid of unpleasant taste and acid reaction.

Cider (*si'-der*) [ME., *cidre*]. The expressed juice of apples or pears. **C. Brandy.** See *Apple-Brandy.* **C. Vinegar.** See *Vinegar.*

Cigaret (*sig-ar-et'*). See *Cigarette.*

Cigarette (*sig-ar-et'*) [Fr., dim. of *cigare*, a cigar]. A roll of inflammable material medicated and adapted for smoking. Nasal catarrhs and spasmodic attacks of dyspnea are among the disorders sometimes treated by cigarette-smoking. **C.-makers' Cramp.** See *Cramp.*

Cigarmakers' Cramp. See *Cramp.*

Ciguë (*se-gu-e*) [Fr.]. Cicuta.

Cilia (*sil'-e-ah*) [*cilium*, the eyelid or lash]. The eyelashes. Also, the locomotor and prehensile organs of certain infusoria, and the hair-like appendages of certain epithelial cells, whose function it is to propel fluid or particles along the passages that they line.

Ciliariscope (*sil-e-ar'-is-kōp*) [*cilium*, eyelid; σκοπεῖν, to look at]. An instrument (essentially a prism) for examining the ciliary region of the eye.

Ciliary (*sil'-e-a-re*) [*cilium*, an eyelash]. Pertaining to the eyelid or eyelash, and also by extension to the **C. Apparatus**, or the structure related to the mechanism of accommodation. **C. Arteries**—*anterior, posterior long*, and *posterior short*, branches of the ophthalmic artery, supplying the recti muscles, the ciliary apparatus, and the posterior structures of the eye, with the exception of the retina. See *Arteries, Table of.* **C. Body**, the ciliary muscle and processes. **C. Canal**, the canal of Fontana. See *Canal.* **C. Ganglion**, the ganglion at the apex of the orbit, supplying the ciliary muscle and iris. See *Ganglia, Table of.* **C. Muscle**, the muscle of accommodation, whose contraction lessens the tension upon the suspensory ligament of the

lens. See *Muscles*, also, *Eye*. **C. Nerves**, branches of the ophthalmic ganglion supplying the anterior structures of the eyeball and the accommodative apparatus. See *Nerves, Table of*. **C. Neuralgia**, neuralgic pain of the eye, brow, temple, etc. **C. Processes**, circularly arranged choroidal foldings continuous with the iris in front. **C. Region**, the pericorneal or "danger" zone, corresponding to the position of the ciliary body. **C. Zone**, the ciliary processes collectively.

Ciliate, or **Ciliated** (*sil'-e-āt*, or *-a-ted*) [*cilium*, an eyelash]. Having cilia.

Ciliation (*sil-e-a'-shun*) [*cilium*, an eyelash]. The condition of having cilia.

Cilio-spinal (*sil-e-o-spi'-nal*) [*cilium*, an eyelash; *spina*, the spine]. Relating to the ciliary zone and the spine. **C. Center.** See *Center*.

Cilium (*sil'-e-um*). [L.]. See *Cilia* and *Eyelash*.

Cillo (*sil'-o*), or **Cillosis** (*sil-o'-sis*) [*cilium*, an eyelash]. A continued trembling of the eyelid.

Cillotic (*sil-ot'-ik*) [*cilium*, an eyelash]. Pertaining to or affected with cillo.

Cimbia (*sim'-be-ah*) [L.]. The white band seen upon the ventral aspect of the crus cerebri, the tractus pedunculi transversus of Gudden.

Cimbial (*sim'-be-al*) [*cimbia*, a cincture]. Relating to the cimbia.

Cimex (*si'-meks*) [L., a bug]. A genus of hemipterous insects. **C. lectularius**, the common bed-bug. A disgusting insect that infests beds, furniture, and the walls of bed-rooms, and that feeds on the human body, puncturing the skin and injecting an irritating fluid to increase the flow of blood. It is characterized by the repulsive odor of its secretion.

Cimicifuga (*sim-is-e-fu'-gah*) [*cimex*, a bug; *fugare*, to drive away]. Black Snake Root, Black Cohosh. The root of *C. racemosa*, ord. Ranunculaceæ. A stomachic, antispasmodic, aphrodisiac, expectorant, and diuretic. Its action on the heart is similar to that of digitalis. It is efficient as a tonic in many cardiac diseases, in functional impotence, and ovarian neuralgia. **C., Ext. fld.** (alcoholic). Dose ♏v–xxx. **C., Ext. liquid.**, (B. P.). Dose ♏iij–xxx. **C., Tinct.**, 20 per cent. in strength. Dose ♏xv–ʒj. **Macrotin** (unof.), a resinous extract. Dose gr. ½–ij.

Cimicifugin (*sim-is-e-fu'-gin*) [*cimex*, a bug; *fugare*, to drive away]. The precipitate from a tincture of the root of *Cimicifuga racemosa*; it is an antispasmodic, diaphoretic, nervin, emmenagogue, parturient, and narcotic. Dose 1 to 2 grains. As an oxytocic, 2 to 3 grains, to be repeated in from 40-60 minutes, if necessary. Unof.

Cimolia (*sim-o'-le-ah*), **Cimolite** (*sim'-o-lit*) [*κιμωλία*, earth]. Cimolian earth; a white, soapy clay formerly brought from the Greek island of Cimolus. The ancients prized it as a remedy; now little used, except in the Levant.

Cina (*si'-nah*) [L.]. The plant *Artemisia santonica*. See *Santonica*.

Cinchamidin (*sin-kam'-id-in*) [*cinchona; amidin*], $C_{20}H_{26}N_2O$. An alkaloid frequently present in commercial cinchonidin.

Cinchocerotin (*sin-ko-ser-o'-tin*) [*cinchona; cera*, wax], $C_{27}H_{48}O_2$. A white crystalline alkaloid of calisaya bark.

Cinchona (*sin-ko'-nah*) [from the Countess of *Cinchon*]. Peruvian Bark. The bark of several varieties of cinchona, a tree native to the eastern slopes of the Andes and cultivated in India, the most valuable being *C. calisaya*. Other varieties are *C. succirubra*, red bark, *C. condaminea*, pale bark, *C. pitayenis*, pitaya bark, and *C. micrantha*. Cinchona bark contains 21 alkaloids, of which 4, quinin, cinchonin, quinidin and cinchonidin, are the most important. Cinchona has the same physiologic action and therapeutic uses as its chief alkaloid, quinin. See *Quinin*. It is also an astringent, bitter and stomachic tonic, stimulating appetite and promoting digestion, beneficial in atonic dyspepsia and adynamia, but especially useful in malarial affections. **C., decoctum** (B. P.). Dose ʒj–ij. **C. Febrifuge.** See *Quinetum*. **C., Ext.** Dose gr. j–v. **C., Fld. Ext.** Dose ♏x–ʒj. **C., Ext. liquidum** (B. P.). Dose ♏v–x. **C., infusum**, bark 6, arom. sulphuric acid 1, water 93 parts. Dose ʒj–ʒj. **C., Infus. Acidum** (B. P.). Dose ʒj–ij. **C. rubra**, red cinchona, the bark of *C. succirubra*. **C., Tinct.**, 20 per cent. of the bark. Dose ʒss–ij. **C., Tinct., Comp.**, red bark 10, bitter-orange peel 8, serpentaria 2, alcohol 80 parts. Dose ʒj–ʒss. **Huxham's Tinct. of Bark**, red bark ʒiv, orange peel ʒiij, serpentaria gr. lxxx, Spanish saffron gr. clx, cochineal gr. lxxx, brandy ʒxl, digested four days, expressed and filtered. Dose ʒss–ij.

Cinchonamin (*sin-ko'-nam-in*) [*cinchona; amin*], $C_{19}H_{24}N_2O$. An alkaloid of cuprea bark. It occurs in glistening, colorless crystals that are nearly insoluble in water, and but slightly soluble in ether.

Cinchonicin (*sin-kon'-is-in*) [*cinchona*], $C_{20}H_{24}N_2O$. An artificial alkaloid derived from cinchonin.

Cinchonidin, or **Cinchonidina** (*sin-kon'-id-in*, or *sin-kon-id-i'-nah*), $C_{20}H_{24}N_2O$. An alkaloid derived from cinchona. It is a crystalline substance resembling quinin in general properties. **C. salicylate** (unof.) has decided anti-malarial properties. **C. sulph.**, $(C_{20}H_{24}N_2O)_2H_2SO_4.3H_2O$, less bitter than quinin and valuable as an antipyretic. Dose gr. j-xx or more.

Cinchonina, or **Cinchonin** (*sin-ko-ni'-nah*, or *sin'-ko-nin*) [*cinchona: gen., Cinchoninæ*], $C_{19}H_{22}N_2O$. An official alkaloid derived from cinchona. It is a colorless crystalline body, similar to quinin in therapeutic effects, but less active, producing much headache and some muscular weakness. **C. sulph.**, $(C_{19}H_{22}N_2O)_2H_2SO_4.2H_2O$. Soluble with difficulty in water, but soluble in acidulated water. Dose gr. v–xxx.

Cinchoninic Acid (*sin-ko-nin'-ik*). See *Acid*.

Cinchonism (*sin'-ko-nizm*) [*cinchona*]. The systemic effect of cinchona or its alkaloids in full doses. The symptoms produced are a ringing in the ears with deafness, headache, often severe, giddiness, dimness of sight, and a weakening of the heart's action.

Cinchonize (*sin'-ko-nīz*) [*cinchona*]. To bring under the influence of cinchona or its alkaloids.

Cinchotin (*sin'-kot-in*) [*cinchona*], $C_{19}H_{24}N_2O$. An almost insoluble crystalline alkaloid derived from a species of cinchona bark.

Cincinulus (*sin-sin'-u-lus*) [*κίκιννλος*, a curl]. In biology, small hooks attached to the stylamblys of crustaceans.

Cincture (*singk'-tūr*) [*cinctura*, a girdle]. A belt or girdle. **C.-feeling**, a sensation as if the waist were encircled by a tight girdle.

Cinene (*si-nēn'*) [*cina*, wormseed]. See *Dipentene*.

Cineol (*sin'-e-ōl*) [*cina*, wormseed; *oleum*, oil], $C_{10}H_{16}O$. The principal constituent of wormseed, cajeput, and eucalyptus oils. It is a pleasant camphoraceous liquid, inactive to polarized light, that boils between 176° and 177° C., and crystallizes at —1° C.; its sp. gr. at 16° is 0.923.

Cineraria (*sin-er-a'-re-ah*) [*cinerarius*, pertaining to ashes]. A genus of composite plants. **C. maritima**, the juice of this plant has been long used in Venezuela in the belief that, dropped in the eye, it would cause the absorption of cataract. Unof.

Cinerea (*sin-e'-re-ah*) [*cinereus*, ashen]. The gray, cineritious, or cellular substance of the brain, spinal cord, and ganglia. **C., Lamina**, a thin layer of gray

substance extending backward above the optic commissure from the termination of the corpus callosum to the tuber cinereum.

Cinereum, Tuber. See *Tuber Cinereum.*

Cineritious (*sin-er-ish'-us*) [*cineres*, ashes]. Ash-like or pertaining to ashes. **C. Substance**, the cortex of the brain, from the color of the same. **C. Tubercle**, the tuber cinereum.

Cinesiology (*sin-es-e-ol'-o-je*). See *Kinesiology.*

Cinesis (*sin-e'-sis*). See *Kinesis.*

Cinesitherapy (*sin-es-e-ther'-a-pe*). See *Kinesitherapy.*

Cinetica (*sin-et'-ik-ah*) [κινεῖν, to move]. Medicines or diseases that affect the motor apparatus.

Cingulum (*sing'-gu-lum*) [*cingere*, to gird: *pl.*, *Cingula*]. 1. A girdle or zone; the waist. 2. Herpes zoster, or shingles, *q. v.*

Cinnabar (*sin'-ab-ar*) [κιννάβαρι, a pigment]. Mercuric sulphid, HgS. See *Hydrargyrum* and *Vermilion.* **C.-green.** Same as *Chrome-green.*

Cinnamene (*sin'-am-ēn*). See *Styrol.*

Cinnamic (*sin-am'-ik*) [κιννάμωμον, cinnamon]. Pertaining to or derived from cinnamon. **C. Acid.** See *Acid.* **C. Aldehyd.** See *Aldehyd.*

Cinnamomum, or Cinnamon (*sin-am-o'-mum*, or *sin'-am-on*) [κιννάμωμον, cinnamon: *gen.*, *Cinnamomi*]. The inner bark of the shoots of several species of *Cinnamomum*, native to Ceylon and China, the latter being known in commerce under the name of *cassia.* Its properties are due to a volatile oil. It is an agreeable carminative and aromatic stimulant, useful when combined with opium for flatulence, colic, enteralgia, etc. **C., Aqua**, 2 parts of oil in 1000 of water. Dose ʒj–ij. **C., Ext. Fld. Arom.**, contains aromatic powder 10 parts, alcohol 8 parts. Dose ♏x–xxx. **C., Oleum**, the volatile oil. Dose gtt. j–v. **C., Pulv. Comp.** (B. P.), cinnamon bark, cardamom-seeds, and ginger. Dose gr. iij–x. **C. saigonicum**, Saigon cinnamon. **C., Spt.**, 10 per cent. of the oil in spirit. Dose ♏v–xxx. **C., Tinct.**, 10 per cent. of the powdered bark in alcohol. Dose ʒss–ij. **C. zeylanicum**, Ceylon cinnamon. **Pulvis aromaticus**, aromatic powder, cinnamon, ginger, āā 35, cardamom, nutmeg, āā 15. Dose gr. x–xxx. **C.-brown.** Same as *Phenylene-brown.*

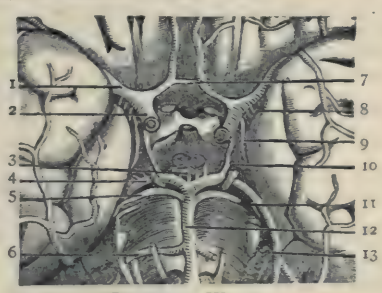
Cinnamyl (*sin'-am-il*) [κιννάμωμον, cinnamon], C_9H_7O. The radicle believed to exist in cinnamic acid.

Cionectomy (*si-on-ek'-to-me*) [κίων, the uvula; ἐκτομή, a cutting out]. Ablation of the uvula.

Cionitis (*si-on-i'-tis*) [κίων, the uvula; ιτις, inflammation]. Inflammation of the uvula.

Cionoptosis (*si-on-op-to'-sis*) [κίων, uvula; πτῶσις, a drooping]. Prolapse of the uvula.

Cionorrhaphia (*si-on-or-af'-e-ah*) [κίων, the uvula; ῥαφή, a suture]. See *Staphylorrhaphy.*



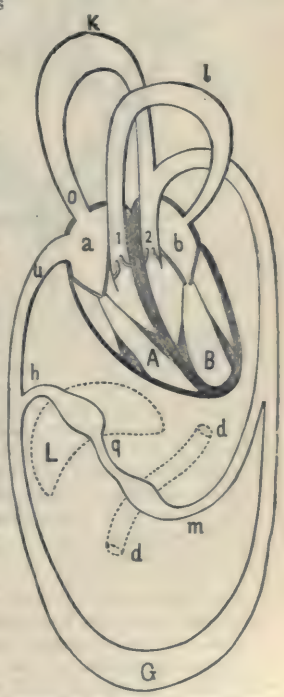
Cionotome (*si-on'-o-tōm*) [κίων, the uvula; τομός, cutting]. An instrument for cutting off the uvula.

Cionotomy (*si-on-ot'-o-me*) [κίων, uvula; τομή, a section]. Incision of the uvula.

Circinate (*sir'-sin-āt*) [*circinatus*, circular]. In biology, rolled inward from the top, like a crozier. **C. Eruption.** See *Wandering Rash.*

Circinus (*sir'-sin-us*) [κίρκινος, circle]. Herpes zoster; zona.

Circle (*sir'-kl*) [κίρκος, a circle]. A ring; a line, every point of which is equi-distant from a point called the center. **C. of Diffusion.** See *Diffusion.* **C. of Haller**, 1. The plexus of vessels formed by the short ciliary arteries upon the sclerotic, at the entrance of the optic nerve. 2. The circulus venosus mammæ. See also *Circulus.* **C. of Willis**, the remarkable arterial anastomosis at the base of the brain. The passage between the anterior cerebral arteries anteriorly, and the internal carotids and middle and posterior cerebral arteries posteriorly, by communicating vessels.



CIRCLE OF WILLIS.

1. Middle cerebral artery. 2. Internal carotid artery. 3. Postero-median perforating. 4. Posterior cerebral artery. 5. Superior cerebellar artery. 6. Anterior inferior cerebellar artery. 7. Anterior communicating artery. 8. Antero-lateral perforating. 9. Anterior choroid. 10. Posterior communicating. 11. Posterior choroid. 12. Basilar artery. 13. Crus cerebelli cut.

Circuit (*ser'-kit*) [*circuitus*, a going round]. The course of an electric current. **C.-breaker**, an apparatus for interrupting the circuit of an electric current.

Circulation (*sir-ku-la-'shun*) [*circulatio*, a circular course]. The passage of the blood through various vessels; distinguished as capillary, fetal, portal, pulmonary, etc. **C., Cross**, a laboratory experiment in which the vessels in one vascular area of an animal are separated from the rest of the circulation by ligation of anastomosing channels, and then supplied with blood from the circulation of a second animal. In this way, for example, the vascular area of the head may be isolated, and precluded from receiving chloroform inhaled by the lungs, but which is distributed to other parts of the body. By connecting the cerebral ends of the severed carotid arteries of one dog with the cardiac ends of the severed carotids of another dog, the cerebral and general circulatory systems of the first dog may presumably be separated. The first animal is called the *fed*, and the animal supplying the blood the *feeder*. The experiment is of little value. **C., Collateral**, that through branches and secondary channels after stoppage of the principal route. **C., Fetal**, that of the fetus, including the circulation through the placenta

SCHEME OF THE CIRCULATION.

a, Right, *b*, left auricle. A. Right, B, left ventricle. 1. Pulmonary artery. 2. Aorta. *l*. Area of pulmonary circulation. K. Upper area of systemic circulation. G. Lower area of systemic circulation. *o*. The superior vena cava. *u*. Inferior vena cava. *d*, *d*. Intestine. *m*. Mesenteric artery. *q*. Portal vein. L. Liver. *h*. Hepatic vein. (*Landois.*)

and umbilical cord. **C., First,** or **Primitive,** that of the embryo, a closed system, carrying nutriment and oxygen to the embryo. **C., Placental,** the fetal circulation. **C., Portal.** See *Portal System.* **C., Pulmonary,** the circulation of blood through the lungs by means of the pulmonary artery and veins, for the purpose of oxygenation and purification. **C., Second,** the fetal circulation, replacing the omphalomesenteric system. **C., Systemic,** the general circulation, as distinct from the pulmonary circulation. **C., Third,** that of the adult. **C., Vitelline,** first, or primitive circulation.

THE FETAL CIRCULATION.

a. Umbilical vein. *b.* Ductus venosus. *c.* Ductus arteriosus. *d.* Hypogastric arteries. *e.* Mesenteric arteries and vein. *f.* Portal vein.

Circulus (*sir'-ku-lus*) [L.]. A circle. **C. arteriosus,** the circle of Haller. The plexus of arteries that surrounds the outer border of the iris. **C. iridis minor,** an arterial circle near the pupillary border of the iris. **C. venosus mammæ** (or **Halleri**), a ring of anastomosing veins that surround the nipple.

Circum- (*sir'-kum-*) [L.]. A prefix meaning *around, about.*

Circumagentes (*sir-kum-aj-en'-tēz*) [L., "causing to revolve"]. 1. The oblique muscles of the eye. 2. The infraspinatus and supraspinatus muscles that revolve the arm.

Circumanal (*sir-kum-a'-nal*) [*circum,* around; *anus,* the fundament]. Periproctous; surrounding the anus.

Circumcision (*sir-kum-sizh'-un*) [*circumcidere,* to cut around]. Excision of a circular piece of the prepuce.

Circumclusion (*sir-kum-klu'-zhun*) [*circum,* around; *cludere,* to close]. A form of acupressure in which the pin is passed beneath the vessel, a wire loop placed over its point, and its ends brought over the artery and made fast.

Circumcorneal (*sir-kum-kor'-ne-al*) [*circum,* about; *corneus,* horny]. Around or about the cornea.

Circumduction (*sir-kum-duk'-shun*) [*circumducere,* to lead around]. The movement of a limb in such a manner that its distal part describes a circle, the proximal end being fixed. See *Motion.*

Circumference (*sir-kum'-fer-ens*) [*circumferre,* to carry around]. The distance around a part.

Circumflex (*sir'-kum-fleks*) [*circumflectere,* to bend about]. Applied to a number of arteries, veins and nerves.

Circumgyration (*sir-kum-ji-ra'-shun*) [*circum,* around; *gyrare,* to turn]. See *Vertigo.*

Circuminsular (*sir-kum-in'-su-lar*) [*circum,* about; *insula,* island]. Surrounding the island of Reil.

Circumlental (*sir-kum-len'-tal*) [*circum,* around; *lens,* a lentil; lens]. Surrounding the lens. **C. Space.** See *Space.*

Circumnuclear (*sir-kum-nu'-kle-ar*) [*circum,* about; *nucleus,* kernel]. Surrounding the nucleus.

Circumnutation (*sir-kum-nu-ta'-shun*) [*circum,* around; *nutare,* to nod]. In biology, a bowing successively toward all points of the compass. Applied to the movements of young and growing organs.

Circumocular (*sir-kum-ok'-u-lar*) [*circum,* about; *oculus,* eye]. Surrounding the eye.

Circumoral (*sir-kum-o'-ral*) [*circum,* about; *os,* mouth]. Surrounding the mouth.

Circumpolarization (*sir-kum-po-lar-iz-a'-shun*) [*circum,* around; *polus,* pole.] The quantitative estimation of sugar in a suspected liquid by the degree of the rotation of polarized light, sugar rotating the ray to the right, albumin to the left.

Circumrenal (*sir-kum-re'-nal*) [*circum,* about; *ren,* the kidney]. Around or about the kidneys.

Circumscribed (*sir'-kum-skrībd*) [*circumscribere,* to draw a line around]. Strictly limited or marked off; well defined; distinct from surrounding parts, as a circumscribed inflammation or tumor.

Circumvallate (*sir-kum-val'-āt*) [*circumvallare,* to surround with a wall]. Surrounded by a wall or prominence. **C. Papillæ,** certain papillæ at the base of the tongue.

Cirrhonosus (*sir-on'-o-sus*) [κιρρός, yellow; νόσος, disease]. 1. A fetal disorder, marked by yellowness of the serous membranes. 2: Abnormal post-mortem yellowness of any surface or tissue.

Cirrhose (*sir-ōs'*) [*cirrus,* a tendril]. In biology, provided with tendrils.

Cirrhosis (*sir-o'-sis*) [κιρρός, reddish-yellow; from the color of the cirrhotic liver]. Increase and thickening of the connective tissue of an organ, especially of the liver. **C., Biliary,** a form due to chronic retention of bile in the liver from long-continued obstruction in the bile-ducts from any cause. **C., Fatty,** a rare form in which the hepatic cells become infiltrated with fat. The surface is smooth and the organ enlarged, but very tough, owing to increase in the interstitial connective tissue, which does not contract. This form is usually seen in the intemperate.

Cirrhotic (*sir-ot'-ik*) [κιρρός, yellow]. Affected with, or relating to, cirrhosis. **C. Kidney.** See *Bright's Disease.*

Cirsocele (*sir'-so-sēl*) [κιρσός, a varix; κήλη, tumor]. A varicose tumor, especially of the spermatic cord.

Cirsoid (*sir'-soid*) [κιρσός, a varix; εἶδος, likeness]. Resembling a varix, or dilated vein.

Cirsomphalos (*sir-som'-fal-os*) [κιρσός, varix; ὀμφαλός, navel]. A varicose condition of the navel.

Cirsophthalmia (*sir-soff-thal'-me-ah*) [κιρσός, varix; ὀφθαλμός, the eye]. 1. Ophthalmia, with an apparent varicose condition of the conjunctival vessels. 2. Corneal staphyloma, with an appearance of varicosity of the surface.

Cirsotome (*sir'-so-tōm*) [κιρσός, a varix; τομή, a cutting]. A cutting instrument for the operation of cirsotomy.

Cirsotomy (*sir-sot'-o-me*) [κιρσός, varix; τέμειν, to cut]. Excision of a varix.

Cisma (*siz'-mah*). Same as *Absus*.

Cismatan (*siz'-mat-an*). Same as *Absus*.

Cissampelos (*sis-am'-pel-os*) [κισσός, ivy; ἄμπελος, a vine]. A genus of climbing menispermaceous plants. The root of **C. capensis**, of South America, is cathartic and emetic. **C. pareira**, of tropical America, false pareira brava (*q. v.*), is tonic and diuretic.

Cistern (*sis'-tern*) [*cisterna*, a vessel; receptacle]. 1. Any dilatation: reservoir. 2. Any dilatation of the space between the pia and arachnoid. The *cisterns* are true lymph-sacs. **C. of Pequet.** See *Receptaculum chyli*. **C. of the Cerebrum.** See *Cistern*, 2.

Cisterna (*sis-ter'-nah*) [L.]. Same as *Cistern*. **C. ambiens**, one of the pockets situated over the optic lobes. **C. magna**, a large cisterna where the arachnoid spreads across from the caudad border of the cerebellum to the oblongata. **C. perilymphatica**, in the ear, a large space adjacent to the foot-plate of the stapes.

Cistus (*sis'-tus*) [κίστος, the rock-rose]. A genus of plants of the order Cistaceæ, growing in the old world. **C. oreticus, C. cyprius, C. ladaniferus,** and **C. ledon** afford the drug labdanum, or ladanum.

Citerior (*si-te'-re-or*) [L., "hither"]. Brainward, centripetal, or afferent.

Citrate (*sit'-rāt*) [*citrus*, citron-tree]. Any salt of citric acid.

Citrene (*sit'-rēn*) [*citrus*, citron-tree], $C_{10}H_{16}$. Hesperidene; carvene. The oil of *Citrus aurantiæ*, and the chief ingredient of cedar oil, cumin oil, and dill oil. It occurs associated with pinene in lemon oil. It is an agreeable-smelling, colorless liquid, sp. gr. 0.846 at 20°, and boiling at 175–176°.

Citric (*sit'-rik*) [*citrus*, citron-tree]. Pertaining to or derived from lemons or citrons. **C. Acid.** See *Acid*.

Citrine (*sit'-rin*) [*citrus*, a lemon]. Yellow; of a lemon color. **C. Ointment.** See *Hydrargyrum*.

Citronella (*sit-ron-el'-ah*) [dim. of κίτρον, the citron-tree]. A fragrant grass. **C. Oil**, the essential oil of various grasses, mostly of the genus *Andropogon*; used chiefly as a perfume; antirheumatic. Unof.

Citrus (*sit'-rus*) [L.]. A genus of aurantiaceous trees. See *Aurantium*, *Bergamot*, *Lime*, *Limon*.

Citrosis (*sit-to'-sis*) [κίττα, κίσσα, pica]. Pica; a longing for strange or improper food.

Civet (*siv'-et*) [ME.]. A semi-liquid, unctuous secretion from the anal glands of *Viverra civetta*, *V. sibetha*, and *V. rasse*, carnivorous old-world animals, themselves called civets. It is now used as a perfume; formerly as an antispasmodic and stimulant, like musk. Unof.

Claiale's Operations. See *Operations, Table of*.

Clacking Pivot, or **Tenon** (*klak'-ing piv'-ot*). Clack pivot; a method of attaching an artificial crown to the root of a natural tooth; it was invented by Magiola.

Cladocarpous (*klad-o-kar'-pus*) [κλάδος, a branch; καρπός, fruit]. In biology, having the fruit borne at the end of short lateral branches.

Cladocerous (*klad-os'-er-us*) [κλάδος, a branch; κέρας, horn]. In biology, with branched antennæ.

Cladode (*klad'-ōd*) [κλάδος, a branch; εἶδος, form]. In biology, branch-like. See *Phyllocladium*.

Cladodont (*klad'-o-dont*) [κλάδος, a branch; ὀδούς, tooth]. Same as *Hybodont*.

Cladonea (*klad-o'-ne-ah*) [κλάδος, a branch]. A genus of lichens. **C. rangiferina**, the reindeer-moss; a lichen that grows extensively in Asia, Europe and N. America. It is used as a food in famine-seasons, and is locally distilled, affording an alcoholic spirit.

Cladophyl (*klad'-o-fil*) [κλάδος, a branch; φύλλον, a leaf]. In biology, a branch that in form mimics a leaf. Same as *Cladode*.

Cladoptosis (*klad-op-to'-sis*) [κλάδος, a branch; πίπτειν, to fall]. In biology, the annual falling of twigs bearing leaves instead of the leaves alone.

Cladose (*klad'-ōs*) [κλάδος, a branch]. In biology, ramose or branched.

Cladothrix (*klad'-o-thriks*) [κλάδος, branch; θρίξ, a hair]. A genus of bacteria, having long filaments, in pseudo-ramifications, with true spores. See *Bacteria*, *Synonymatic*, *Table of*.

Clairaudience (*klār-aw'-de-ens*) [Fr. *clair*, clear; *audience*, hearing]. The alleged telepathic hearing of sounds uttered at a great distance.

Clairvoyance (*klār-voi'-ans*) [Fr. *clair*, clear; *voir*, to see]. The alleged ability (in certain states), to see things not normally visible; the pretended ability to see the internal organs of a patient, and thus diagnosticate his ailments.

Clamp (*klamp*) [Ger. *Klampe*]. An instrument for compressing the parts in surgical operations, to fix them or to prevent hemorrhage, etc. **C., Gaskell's,** an instrument applied over the heart so that the pulsation of the auricles and ventricles may be separately registered; it is used in the study of cardiac pulsation.

Clang (*klang*) [κλαγγή, a clang]. A sharp metallic sound; a hoarse voice. **C.-deafness,** a defect of hearing in which sounds are heard, but their more delicate qualities are not perceived. **C.-tint,** the *timbre*, or delicate shading of a tone. See *Timbre*.

Clap (*klap*) [OF., *clapoir*, a venereal sore]. Gonorrhea. **C.-threads,** characteristic slimy threads in the urine of gonorrheal cystitis.

Clapotage (*klah-po-ta(h)zh'*) [Fr.]. The splashing sound of a liquid in succussion.

Clapping (*klap'-ing*). See *Percussion* and *Tapotement*.

Clapton's Lines. See *Lines, Table of*.

Claquement (*klahk'-mon(g)*) [Fr., clapping, slapping]. 1. In massage, percussion with the flat of the hand. 2. The clack, or flapping sound caused by sudden closure of the heart-valves.

Claret (*klar'-et*) [*clarus*, clear]. A wine of a light-red color. **C.-red.** See *Pigments, Conspectus of*. **C. Stain.** Same as *Nævus maternus*.

Clarificant (*klar'-if-ik-ant*) [*clarus*, clear]. A substance used for the purpose of clearing solutions turbid from insoluble matter.

Clarification (*klar-if-ik-a'-shun*) [*clarus*, clear; *facere*, to make]. The operation of removing the turbidity of a liquid or naturally transparent substance. It may be accomplished by allowing the suspended matter to subside, by the addition of a clarificant or substance that precipitates suspended matters, or by moderate heating. See *Fining*.

Clarify (*klar'-if-i*) [*clarus*, clear; *facere*, to make]. To free a liquid or solution from insoluble or heterogeneous substances. To make clear.

Clarifying (*klar'-if-i-ing*) [*clarus*, clear; *facere*, to make]. Clearing; purifying. **C. Reagent,** any preparation used for purifying microscopic and anatomic preparations that have been mounted in gummy media. Oil of cloves, turpentine, creasote, xylol, and oil of bergamot are the chief.

Clarionet-player's Cramp. See *Cramp.*

Clark's Operation. See *Operations, Table of.* **C. (Alonzo), Sign.** See *Signs and Symptoms, Table of.*

Clarke's Corroding Ulcer. An ulcer of the cervix uteri that shows a tendency to spread. **C. Intermedio-lateral Tract.** See *Column of.* **C. Posterior Vesicular Column.** See *Column of.* **C. Process.** See *Water, Softening of.* **C. Rule,** a rule for dosage. The dose is to be graded by the weight of the child. One hundred and fifty pounds is taken as the weight of an average human adult, and in order to obtain the fractional dose this number serves for the denominator of a fraction whose numerator corresponds to the weight of the child in avoidupois pounds. Thus, the formula for a child of 50 pounds would be $\frac{50}{150}$ or $\frac{1}{3}$ of the dose for the adult.

Clasmacytosis (*klas-mah-si-to'-sis*). Same as *Clasmatocytosis.*

Clasmatocyte (*klas-mat'-o-sīt*) [κλάσμα, fragment; κύτος, cell]. A form of very large connective-tissue corpuscles that tend to break up into granules or pieces.

Clasmatocytosis (*klas-mat-o-si-to'-sis*) [κλάσμα, a fragment; κύτος, a cell]. The breaking up of clasmatocytes, and the formation of islands of granules from their débris.

Clasp (*klasp*) [ME., *claspen*, to grasp firmly]. In mechanical dentistry, a hook fitted to a tooth and designed for the retention of a dental substitute or other apparatus to be worn in the mouth. In biology, an apparatus at the end of the male abdomen in certain insects, intended to grasp the female. **C.-knife Rigidity,** a reflex spasmodic action of the legs from increased myotatic irritability, as a result of which extension is, as it were, completed with a "spring," as in the knife.

Classification (*klas-if-ik-a'-shun*) [*classis*, a class; *facere*, to make]. An orderly arrangement of names, objects, diseases, etc., according to their properties and peculiarities.

Clastothrix (*klas'-to-thriks*). Synonym of *Trichorrhexis nodosa.*

Clathrate (*klath'-rāt*) [κλῆθρα, a lattice]. In biology, latticed; a name given by Mohl to cribriform cells; also written clathroid.

Clathrocystis (*klath-ro-sis'-tis*) [κλῆθρα, a trellis; κύστις, pouch]. A genus of microbes with round or oval cells, forming zoöglœæ in the form of circular layers. See *Bacteria, Synonymatic Table of.*

Clathrose (*klath'-rōs*) [κλῆθρα, a lattice]. In biology, having deep furrows crossing at right angles.

Claudication, or **Claudicatio** (*klaw-dik-a'-shun, klaw-dik-a'-she-o*) [*claudicare*, to halt or limp]. The act of limping; lameness.

Claudius, Doctrine of. The doctrine that, in the production of fetal monstrosities, attributes the atrophic changes primarily to the reversal and impairment of the circulation, consequent upon the overpowering vigor of the stronger fetus. **C., Cells of,** the outer epithelial layer of the ducts of the cochlea.

Claustrophobia (*klaws-tro-fo'-be-ah*) [*claustra*, a bolt; φόβος, fear]. Morbid distress at being in any room or confined space; clithrophobia.

Claustrum (*klaws'-trum*) [*claudere*, to shut: *pl.*, *Claustra*]. A barrier; applied to several apertures that may be closed against entrance. Also, a layer of cinerea (gray nervous matter) between the insula and the lenticula.

Clausura (*klaw-su'-rah*) [L.]. Closure; atresia; as of a passage. **C. tubalis,** closure of a Fallopian tube. **C. uteri,** an imperforate state of the uterine cervix.

Clava, Clavola, or **Clavolet** (*kla'-vah, kla'-vo-lah,* or *kla'-vo-let*) [*clava*, a club]. 1. In biology, clubbed at the end, as the antennæ of certain insects. 2. See *Funiculus gracilis.*

Clavate (*klav'-āt*) [*clava*, a club.] In biology, club-shaped. Applied to a stigma, antenna, or other organ that is thick toward the apex and gradually narrowed toward the base.

Clavation (*klav-a'-shun*) [*clavatio; clavus*, a nail]. Same as *Gomphosis.*

Clavelization (*klav-el-iz-a'-shun*) [Fr., *clavelée*, sheep-pox]. Inoculation with sheep-pox virus; ovination.

Claven, or **Claviculen** (*kla'-ven, kla-vik'-u-len*) [*clavis*, a key]. Belonging to the clavicle in itself.

Claviceps (*klav'-is-eps*) [*clava*, club; *caput*, head]. A genus of fungi. **C. purpurea,** the fungus producing the ergot of rye.

Clavicle (*klav'-ik-l*) [*clavicula; clavus*, a key]. The collar-bone. See *Bones, Table of.*

Clavicular (*kla-vik'-u-lar*) [*clavus*, a key]. Relating to the clavicle.

Clavilla marginales (*kla-vil'-ah mar-jin-al'-ēz*) [L.]. The "olfactory clubs" or marginal clubs in *Medusæ;* also called *Cordyli marginales.*

Clavula (*klav'-u-lah*) [*clava*, a club]. In biology, applied to various clubbed organs; as, a knobbed bristle in echinoderms, or the swollen receptacle of some fungi.

Clavus (*kla'-vus*) [*clavus*, a nail, a wart, a corn]. Corn; a hyperplasia of the horny layer of the epidermis, in which there is an ingrowth as well as an outgrowth of horny substance, forming circumscribed epidermal thickenings, chiefly about the toes. Corns may be *hard* or *soft*, the latter being situated between the toes, where they are softened by maceration. Both forms are due to pressure and friction. **C. hystericus,** a local neuralgic pain in hysteria, anemia, etc., in the head, as if a *nail* were being driven in.

Claw (*klaw*) [AS., *clawn*, a claw]. The stalk, or contracted base of a petal. In biology, the hooked limb or appendage of an animal. **C.-hand,** a condition of the hand characterized by over-extension of the first phalanges and extreme flexion of the others. The condition is a result of atrophy of the interosseous muscles, with contraction of the tendons of the common extensor and long flexor. (French, *main-en-griffe.*)

Clayed Sugars (*klād sug'-arz*). Sugars that have been freed from the dark molasses by covering them in moulds by moist clay, which allows of a gradual washing and displacement of the adhering syrup.

Cleaning (*klēn'-ing*) [ME., *clensen*, to make clean]. Cleansing; removal of dirt; purifying. **C. Mixture for Glass,** 1. Potassium bichromate 2 parts, water 10 parts, sulphuric acid 10 parts; dissolve the potassium in the water with heat, pour into a warm bottle, add the sulphuric acid slowly and at intervals. 2. Nitric acid (conc.) 2 parts, sulphuric acid 3 parts.

Cleansings (*klen'-zingz*) [ME., *clensen*, to clean]. The lochia.

Clearer (*klēr'-er*). See *Clearing Mixture.*

Clearing (*klēr'-ing*) [ME., *cleren*, to make clear]. Clarification; making clear. See *Fining.* **C. Agent,** a substance used in microscopy to render tissues transparent and suitable for mounting. *To replace alcohol in a dehydrated section,* creasote, turpentine, xylol, and the oils of bergamot, cedar, cloves, and origanum are used. *For celloidin sections,* Bergamot or cedar oil or creasote is preferable. *Before mounting vegetable sections,* glycerin, solution of carbolic acid, liquor potassæ, alcoholic solution of potash, liquor ammoniæ, solution of chloral hydrate, Javelle water, Labarraque's solution, are used. See *Stains, Table of.* **C. Mixture,** a fluid used in microscopy for rendering sections trans-

parent after dehydration. It must be miscible with the mounting medium. A very satisfactory and generally applicable mixture is the following: Carbolic acid crystals 4 parts, rectified oil of turpentine 6 parts.

Cleavage (*kleĭ'-vaj*) [ME., *cleven*]. 1. The linear clefts in the skin indicating the general direction of the fibers. They govern to a certain extent the arrangement of the lesions in skin-diseases. The lines of cleavage run, for the most part, obliquely to the axis of the trunk, sloping from the spine downward and forward; in the limbs they are mostly transverse to their longitudinal axis. 2. A mode of cell-division.

Cleavers (*kleĭ'-verz*). See *Galium aparine*.

Cleft (*kleft*) [ME., clift]. 1. A fissure; crevice. 2. The crotch, or point of junction of the legs. 3. In botany, divided half-way, as a leaf. **C. Face.** See *Schistoprosopia*. **C., Ocular,** a fissure in the embryo, leading from the mouth to the eye. It is situated between the fronto-nasal process and the superior maxillary plate. **C., Olfactory.** See *Olfactory*. **C. Palate,** a congenital malformation of the palate, usually occurring with hare-lip. **C. Sternum,** congenital fissure of the sternum. **C., Visceral,** or *Branchial*. The four slit-like openings on each side in the cervical region in the fetus, sometimes called the *Branchial openings*. The slits close (in the human fetus), except the upper, from which are developed the auditory meatus, tympanic cavity and Eustachian tube. See *Branchial Clefts*.

Cleidal (*kliĭ'-dal*) [κλείς, clavicle]. Relating to the clavicle; clavicular.

Cleido- (*kliĭ'-do-*) [κλείς the clavicle]. A prefix, meaning a relation to the clavicle.

Cleido-hyoid (*kliĭ'-do-hiĭ'-oid*) [κλείς, clavicle; ὑοειδής, shaped like the letter upsilon]. Relating to the clavicle and the hyoid.

Cleido-mastoid (*kliĭ'-do-mas'-toid*) [κλείς, the clavicle; μαστός, the breast; εἶδος, like]. Pertaining to the clavicle and to the mastoid process.

Cleistocarp (*klīs'-to-karp*) [κλειστός, that may be closed; καρπός, fruit]. In biology, an ascocarp in which the spores are completely enclosed and from which they escape by the rupturing of its walls.

Cleistogamy (*klīs-tog'-am-e*) [κλειστός, that may be closed; γάμος, marriage]. In biology, self-fertilization in closed flowers.

Cleithrophobia (*kli-thro-fo'-be-ah*) [κλείθρον, a bolt; φόβος, fear]. Same as *Claustrophobia*, but a better formed word.

Clematin (*klem'-at-in*) [κληματίς, clematis]. An alkaloid from *Clematis vitalba*.

Clematis (*klem'-at-is*) [κληματίς, clematis]. A genus of ranunculaceous plants of many species, most of which are acrid or poisonous. **C. corymbosa** is powerfully irritant and resistant. **C. crispa** and **C. erecta** are diuretic and diaphoretic, and are said to be antisyphilitic. **C. viorna, C. virginica,** and **C. vitalba** are similar in properties to *C. erecta*.

Clemens' Solution. See *Arsenium*.

Clemot's Operation. See *Operations, Table of*.

Cleptomania (*klep-to-ma'-ne-ah*). See *Kleptomania*.

Cleptophobia (*klep-to-fo'-be-ah*). See *Kleptophobia*.

Clergyman's Sore-Throat. A chronic hypertrophic form of pharyngitis, with more or less enlargement of the tonsils and lymph-follicles of the posterior wall, due to excessive and improper use of the voice. Dysphonia clericorum. See also *Pharyngitis, Granular*.

Clerk-Maxwell's Experiment. See *Löwe's Ring*.

Clethrophobia (*kleth-ro-fo'-be-ah*) [κλῆθρον, a bar, bolt; φόβος, fear]. Same as *Claustrophobia*.

Clevenger's Fissure. See *Fissures, Table of*.

Clichy White. Same as *White Lead*.

Clicking Sounds (*klik'-ing sounds*). Peculiar sharp sounds heard in auscultating the apex of a tuberculous lung. They indicate the commencement of softening in a tuberculous deposit. See *Râle*.

Cliff-Rose (*klif'-rōz*). See *Alonsenel*.

Climacteria (*kli-mak-te'-re-ah*). Syn. of *Menopause*.

Climacteric (*kli-mak-ter'-ik*, or *kli-mak'-ter-ik*) [κλιμακτήρ, the round of a ladder]. A period of the lifetime at which the system was believed to undergo marked changes. These were at yearly periods divisible by seven. **C. Age,** puberty; also in women the time of cessation of the catamenia. **C., Grand,** the 63d year, also the 81st year. **C. Dentition.** See *C. Teething*. **C. Insanity.** See *Insanity*. **C. Teething,** the development of teeth at a very late period of life, after the loss of those of the second dentition, and usually between the sixty-third and eighty-first year, the grand climacteric years of the Greek physiologists.

Climate (*klīʹ'-mat*) [κλίμα, a region, or zone, of the earth]. The sum of those conditions in any region or country that relate to the air, the temperature, moisture, sunshine, winds etc., especially in so far as they concern the health or comfort of mankind. Climate is an essential factor in the production of or modification of certain diseased conditions. This influence depends upon the nearness of the country to large bodies of water, its altitude above the sea-level, the peculiarities of its atmosphere, the nature and composition of its soil and subsoil, and the character of its vegetation. The most equable climate is that of the ocean, and next from a therapeutic point of view stands the sea-coast. The climate of mountains is especially lauded for the treatment of pulmonary disease. Its value consists in the rarefaction of the atmosphere and the freedom from particles and germs. Climate also plays an important part in the management of hay-fever and other diseases.

Climatic (*kli-mat'-ik*) [κλίμα, a region or zone of the earth]. Pertaining to climate.

Climatology (*klīʹ-mat-ol'-o-je*) [κλίμα, climate, a clime; λόγος, science]. The science of climate.

Climatotherapy (*kli-mat-o-ther'-a-pe*) [κλίμα, clime; θεραπεία, a waiting on]. The employment of climatic measures in the treatment of disease.

Climbing Staff-tree. False Bittersweet. The bark of the root of *Celastrus scandens*, alterative, diuretic and slightly narcotic. It has been advantageously employed in syphilitic and scrofulous affections. Dose of fld. ext. ʒj-ij. Unof. See *Celastrus*.

Clinandrium (*klin-an'-dre-um*) [κλίνη, a bed; ἀνήρ, a man]. In biology, a cavity at the apex of the column in orchids in which the anthers rest. This is also called the *Androclinium*.

Clinantheum (*klin-an'-the-um*) [κλίνη, bed; ἄνθος, a flower]. In biology, the receptacle of a composite plant.

Clinic (*klin'-ik*) [κλινικός, pertaining to a bed]. 1. Medical instruction given at the bedside, or in the presence of the patient whose symptoms are studied and whose treatment is considered. 2. A gathering of instructors, students, and patients, for the study and treatment of disease.

Clinical (*klin'-ik-al*) [κλινικός, pertaining to a bed]. Relating to bedside treatment, or to a clinic.

Clinician (*klin-ish'-an*) [κλινικός, pertaining to a bed]. A physician whose opinions, teachings, and treatment are based upon experience at the bedside; a clinical instructor; one who practises medicine.

Clinicist (*klin'-is-ist*) [κλινικός, pertaining to a bed]. A clinician.

Clinocephalia (*kli-no-sef-a'-le-ah*) [κλίνη, bed; κεφαλή, head]. Abnormal flatness of the top of the head.

Clinocephalous (*kli-no-sef'-al-us*) [κλίνη, bed: κεφαλή, head]. Having the top of the head abnormally flat.

Clinodactylous (*kli-no-dak'-til-us*) [κλίνειν, to flex or lie; δάκτυλος, finger]. Pertaining to an abnormal flexure, deviation or curvature of the fingers or toes.

Clinoid (*kli'-noid*) [κλίνη, a bed; εἶδος, likeness]. Resembling a bed; applied to sundry bony structures of the body, as the clinoid processes, plate, walls, etc.

Clinostat (*kli'-no-stat*) [κλίνειν, to incline; στατός, placed]. An apparatus for regulating the exposure of plants to the sunlight.

Clip (*klip*). See *Compressor*.

Clire, or Clyers (*kli'-er*, or *kli'-erz*) [E. dial.]. Tuberculous disease of cattle. See *Kernels*.

Cliseometer (*klis-e-om'-et-er*) [κλίσις, inclination; μέτρον, a measure]. An instrument for measuring the degree of inclination of the pelvic axis.

Clistocarpous (*klis-to-kar'-pus*) [κλειστός, that can be closed; καρπός, fruit]. In biology, having a closed capsule, as certain mosses.

Clithrophobia (*klith-ro-fo'-be-ah*). Same as *Cleithrophobia*.

Clitoralgia (*klit-or-al'-je-ah*) [κλειτορίς, the clitoris; ἄλγος, pain]. Pain referred to the clitoris.

Clitoridectomy (*klit-or-id-ek'-to-me*) [κλειτορίς, clitoris; ἐκτομή, excision]. Excision of the clitoris.

Clitoris (*klit'-or-is*) [κλειτορίς, clitoris]. The homologue in the female of the penis, attached by two crura or branches to the ischio-pubic rami, which meet in front of the pubic joint to form the body, or *corpus*. The so-called "gland" is such only in appearance and name. **C. Crises**, paroxysms of sexual excitement in women suffering from tabes.

Clitorism (*klit'-or-izm*) [κλειτορίς, the clitoris]. 1. Enlargement or hypertrophy of the clitoris. 2. Tribadism.

Clitoritis (*klit-or-i'-tis*) [κλειτορίς, clitoris; ιτις, inflammation]. Inflammation of the clitoris.

Clitorotomy (*klit-or-ot'-o-me*). Incision of the clitoris.

Clitorrhagia (*klit-or-a'-je-ah*) [κλειτορίς, clitoris; ῥηγνύναι, to burst]. Hemorrhage from the clitoris.

Clivus (*kli'-vus*) [L., a slope]. A slope. **C. Ossis**, or **C. of Blumenbach**, the slanting surface of the body of the sphenoid between the dorsum sellæ and the basi-occipital.

Cloaca (*klo-a'-kah*) [*cloaca*, a sewer]. 1. In early fetal life, the common orifice of the intestine and the allantois. 2. In surgery, the long canal of escape of pus from a necrotic sequestrum. 3. In biology, the chamber into which open the large intestine and urogenital ducts of birds, amphibians and monotremata.

Cloacal (*klo-a'-kal*) [*cloaca*, a sewer]. Pertaining to or serving as a cloaca.

Clonic (*klon'-ik*) [κλόνος, commotion]. Applied to convulsive and spasmodic conditions of muscles in which alternate contractions and relaxations occur involuntarily.

Clonici (*klon'-is-i*) [L.]. Diseases marked by clonic spasm.

Clonism, Clonismus (*klo'-nizm, klo-niz'-mus*) [κλόνος, commotion]. A clonic spasm; clonospasm.

Clonospasm (*klon'-o-spazm*) [κλόνος, commotion; σπασμός, a spasm]. A clonic spasm.

Clonus (*klo'-nus*) [κλόνος, commotion]. Involuntary, reflex, irregular contractions of muscles when put suddenly upon the stretch. According to the part stimulated, the phenomenon is spoken of as *ankle*, *foot*, *rectus*, or *wrist C.*, etc. See *Reflexes*, *Table of*. It is a valuable diagnostic sign in certain lesions of the spinal cord. **Cathodal closure clonus**, and **Cathodal opening clonus**, etc. See *Contraction*. See *Ankle C.*, *Wrist C.*, etc.

Clopemania (*klo-pe-ma'-ne-ah*) [κλοπή, robbery; μανία, mania]. See *Kleptomania*.

Cloquet, Angle of. See *Angle*. **C., Canal of.** See *Canals*, and *Hyaloid Artery*. **C., Fascia of**, the septum crurale, *q. v.* **C., Ganglion of.** See *Ganglia*, *Table of*. **C., Hernia of.** See *Hernia*, and *Diseases*, *Table of*. **C., Needle Test of.** See *Death*, *Signs of*. **C., Operation of.** See *Operations*, *Table of*. **C., Pseudoganglion of.** See *Pseudoganglion*.

Closing Tetanus (*klo'-zing tet'-an-us*). See *Galvanotonus*.

Clostridial (*klos-trid'-e-al*) [κλωστήρ, a spindle]. Referring to spindle-shaped bacilli and especially to the agent of the butyric acid fermentation.

Clostridium (*klos-trid'-e-um*) [κλωστήρ, a spindle: *pl.*, *Clostridia*]. A genus of bacteria, differing from bacilli in the fact that their spores are formed in characteristically enlarged rods. See *Bacillus butyricus*, under *Bacteria*.

Closure (*klo'-zūr*) [*clausura*, a closing]. The act of completing or closing an electric circuit. According as a closure is anodal or cathodal, its effects may so differ as to give it a marked significance in diagnosis.

Clot (*klot*) [ME., *clot*, a round mass]. A coagulum, especially that of blood; a crassamentum. See *Thrombus*, *Embolism*. **White clots** are formed of the pure fibrin of white corpuscles and of blood-plaques. If the white clot has become slightly stained with red blood-cells, it becomes yellowish (*chicken-fat clot*); if it be red and soft, it is a *currant-jelly clot*. **Stratified clots** contain layers of more than one variety. **C., Distal**, a clot formed in a vessel beyond the seat of ligature. **C.-districts**, the small divisions into which a clot is broken by the dissemination through it of the fibroblastic plasma-corpuscles. **C., Proximal**, the clot formed in a vessel above the seat of ligature.

Clotbur (*klot'-* or *klōt'-bur*). The leaves of *Xanthium strumarium*, much used as a domestic remedy for bites of poisonous insects and venomous serpents. Also an active styptic. Dose of the fluid extract ʒj–ij. Unof. See also *Spiny Clotbur*.

Clottage of the Ureters. An operation proposed in case of hematuria from a kidney hopelessly crushed or with advanced carcinoma. The procedure consists in blocking or corking up the ureter with a clot.

Cloudberry (*klowd'-ber-e*). The leaves of *Rubus chamæmorus*, used in Russia as a diuretic. Dose ʒj to a cupful of boiling water. Unof.

Cloudy Swelling. Parenchymatous degeneration; a swelling up of the elements of a tissue by imbibition or accretion, a form of hypertrophy with a tendency to degeneration.

Clove (*klōv*). See *Caryophyllus*. **C.-hitch Knot**, a form of double-knot in which two successive loops are made close to one another on the same piece of cord or bandage, a half-twist being given to the junction of each loop at the time of making it. See *Knot*.

Clover's Gas and Ether Inhaler. See *Anesthetic*.

Clownism (*klown'-izm*) [ME., *cloune*]. Charcot's term for that stage of hystero-epilepsy in which there is an emotional display and a remarkable series of contortions or cataleptic poses.

Club (*klub*) [ME., *club*, a club]. In biology, a broad ending of an antenna. **C.-foot.** See *Talipes*. **C.-hand**, a deformity of the hand similar to that of club foot.

Clubbed Fingers (*klubd fing'-gerz*). Knobbed deformity of the finger-ends, with curvature of the nails, seen in some cases of pulmonary and cardiac disease.

Clyers (*klī'-erz*). See *Clire* and *Kernels*.

Clypeate (*klip'-e-at*) [*clypeus*, a shield]. In biology, shaped like a buckler.

Clyster (*klis'-ter*) [*κλυστήρ*, an injection]. An enema.

Cnemis (*ne'-mis*) [*κνημίς*, a legging]. The tibia or shin-bone.

Cnemitis (*ne-mi'-tis*) [*κνήμη*, shin; *ιτις*, inflammation]. Inflammation of the tibia.

Cnicin (*ni'-sin*) [*κνῆκος*, a plant of the thistle kind], $C_{42}H_{56}O_{15}$. A crystalline bitter substance found in *Blessed Thistle*.

Cnidoblast (*ni'-do-blast*) [*κνίδη*, a nettle; *βλαστός*, a germ]. In biology, the budding thread-cell or urticating cell.

Cnidocell (*ni'-do-sel*) [*cnida*, a nettle; *cella*, a cell]. In biology, a lasso-cell, nematocyst, or urticating cell.

Cnidocil (*ni'-do-sil*) [*cnida*, a nettle; *cilium*, an eyelash]. In biology, the thread of a nematocyst.

Cnidophorous (*nid-off'-or-us*) [*κνίδη*, a nettle; *φέρειν*, to bear]. In biology, bearing lasso-cells or nematocysts.

Cnidosis (*ni-do'-sis*) [*κνίδη*, nettle]. Urtication; nettle-rash.

Coacervate (*ko-as-erv'-at*) [*coacervare*, to heap up]. In biology, clustered, bunched; said of grains or powers.

Coach (*kōch*). See *Quizzer*.

Coachmen's Cramp. See *Cramp*.

Coadnate (*ko-ad'-nāt*) [*con*, together; *adnatus*, bunched]. In biology, clustered.

Coagulant (*ko-ag'-u-lant*) [*coagulare*, to curdle]. 1. Causing the formation of a clot or coagulum. 2. A coagulating agent.

Coagulated (*ko-ag'-u-la-ted*) [*coagulare*, to curdle]. Clotted; curdled. **C. Proteids,** a class of proteids produced by heating solutions of egg-albumin or serum-albumin globulin suspended in water or dissolved in saline solutions, up to 100° C. At the body-temperature they are readily converted into peptones by the action of the gastric juice in an acid, or of pancreatic juice in an alkaline medium.

Coagulation (*ko-ag-u-la'-shun*) [*coagulatio*, a clotting]. The formation of a coagulum or clot, as in blood or in milk.

Coagulative (*ko-ag'-u-la-tiv*) [*coagulare*, to curdle]. Causing or marked by coagulation. **C. Necrosis.** See *Necrosis*.

Coagulum (*ko-ag'-u-lum*) [*coagulare*, to curdle: *pl.*, *-agula*]. Clot. The mass of fibrin, enclosing red and colorless corpuscles and serum, that forms from the plasma of the blood after the latter has been drawn from the body. Also, the curd of milk, and the insoluble form of albumin.

Coal (*kōl*) [ME., *cole*]. A solid and more or less distinctly stratified mineral, varying in color from dark-brown to black, brittle, combustible, and used as a fuel; not fusible without decomposition, and very insoluble. **C., Anthracite,** the hard variety of coal, used largely as a heating-agent. It contains but little hydrogen, and is mainly (over 90 per cent.) composed of pure carbon. **C., Bituminous,** is black or grayish-black in color, of a resinous luster, and somewhat friable, being readily broken into cubical fragments of more or less regularity; upon ignition it burns with a yellow flame. When heated to bright redness in retorts or ovens, free from the access of air, the volatile matter, composed of carbon compounds of hydrogen and oxygen with water, passes off. It is used in the manufacture of gas. **C., Cannel** is much more compact than gas or coking coals, duller in appearance, possessing a grayish-black to brown color, and burning with a clean candle-like flame. It does not soil the hands, and is not readily fractured. **C., Brown,** or **Lignite,** appears to occupy an intermediate position between the bituminous coals and wood. It retains the ligneous structure of the material from which it is formed, hence the name *Lignite*. The vegetable remains are in a great many cases quite distinct. The color varies from yellowish-brown in the earthy, to black in the more compact, coal-like varieties. It does not yield coke. It is used as fuel in some localities. *Peat*, or *Turf*, occurring in large areas in Ireland and in some parts of Europe, consists of the decayed remains of certain forms of plants. It has been destructively distilled for tarry products, without profit, however. **C.-miner's Lung.** See *Miner's Lung*. **C.-tar,** a by-product in the manufacture of illuminating gas; it is a black, viscid fluid of a characteristic and disagreeable odor. The specific gravity ranges from 1.10 to 1.20. Its composition is extremely complex, and its principal constituents are separated, one from the other, by means of fractional distillation. **C.-tar Colors.** See *Pigments, Colors, and Dyestuffs*.

Coalescence (*ko-al-es'-ens*) [*coalescere*, to grow together]. The union of two or more parts or things.

Coaptation (*ko-ap-ta'-shun*) [*con*, together; *aptare*, to fit]. The proper union or adjustment of the ends of a fractured bone, the lips of a wound, etc.

Coarctate (*ko-ark'-tāt*) [*coarctare*, to press together]. Crowded together.

Coarctation (*ko-ark-ta'-shun*) [*coarctare*, to put together]. A compression of the walls of a vessel or canal, thus narrowing or closing the lumen; reduction of the normal or previous volume, as of the pulse; shrivelling and consequent detachment, as of the retina. A stricture.

Coarctotomy (*ko-ark-tot'-o-me*) [*coarctatus*, constricted; *τέμνειν*, to cut]. The cutting of a stricture.

Coarse (*kors*) [ME., *course*]. Not fine; gross. **C. Adjustment.** See *Adjustment*. **C. Features of Disease,** macroscopic organic lesions, such as tumor, hemorrhage, etc.

Coarticulation (*ko-ar-tik-u-la'-shun*) [*con*, together; *articulare*, to join, articulate]. A synarthrosis.

Coat (*kōt*) [*cottus*, a tunic]. A cover, or membrane covering a part or substance. **C., Buffy,** the upper fibrinous layer of the clot of coagulated blood, marked by its color, and absence of red-corpuscles.

Coates's Operation. See *Operations, Table of*.

Coating (*kōt'-ing*) [*cottus*, a tunic]. A covering, as of a wound, the tongue, etc. **C. of the Tongue,** a condition of the tongue indicative of abnormality of the digestive tract. **C. of Pills,** a covering of various substances to conceal the taste in swallowing.

Cobalt (*ko'-bawlt*) [*Kobold*, a German mythologic goblin]. A tough, heavy metal having some of the general properties of iron. Its oxids have been employed in medicine, but are now very little used. See *Elements, Table of*. **C.-blue.** See *Pigments, Conspectus of*. **C.-green.** Same as *Rinmann's Green*. **C.-red.** See *Pigments, Conspectus of*. **C.-ultramarine.** Same as *Cobalt-blue*. **C.-yellow.** See *Pigments, Conspectus of*.

Cobweb (*kob'-web*) [ME., *cobweb*, a spider's web]. *Tela araneæ*, spider's web. The web of a common house spider, *Tegeneria domestica*. It is a styptic recommended for bleeding after tooth-extraction, and in pulmonary tuberculosis, in 30-grain doses. It forms a serviceable moxa, with the aid of the blowpipe.

Coca (*ko'-kah*). See *Erythroxylon*.

Cocain (*ko'-kah-in*, or *ko'-kān*) [S.A., *coca*], $C_{17}H_{21}NO_4$. The chief alkaloid extract of *Erythroxylon coca*. It is at first stimulant and afterward narcotic, and resembles *caffein* in its action on the nerve-centers, and

atropin in its effects on the respiratory and circulatory organs. Its long-continued use (*cocain-habit*) is followed by insomnia, decay of moral and intellectual power, emaciation, and death. Locally, it is a powerful anesthetic in a limited area of surface. It acts most rapidly on mucous tissues. Applied to the conjunctiva of the eye it causes also dilatation of the pupil and paralysis of the function of accommodation. Applied to the tongue it temporarily destroys the sense of taste. Dose gr. ⅛–ij. See also *Anesthetic*. **C.-Bug**, an imaginary insect which cocainomaniacs frequently think they are infested with; a belief that is probably due to some formicational sense-perversion. **C., Ceratum**, 1 in 30, for burns, etc. **C. Citras**, used in dentistry to ease aching teeth. **C. Hydrochloras**, or chlorid of cocain, $C_{17}H_{21}NO_4Cl$, more properly cocain chlorid, most commonly used for local anesthesia in 2–8 per cent. solution. Dose, internally, gr. ½–ij. **C. Hydrochlorat., Liquor.** (B.P.). Dose ♏ij–x. **Injectio C. Hydrochlorat., Hypoderm.**; 1 grain in 20 minims. **C., Lamellæ** (B.P.), each containing gr. $\frac{1}{100}$ of cocain hydrochlorate. **C. Oleas**, a 10 per cent. solution in oleic acid, for external use. **C. Phenas or Carbolas**, a topical application in catarrhs and in rheumatism. Used as a five to ten per cent. alcoholic solution, also internally, gr $\frac{1}{12}$–$\frac{1}{6}$.

Cocainism (*ko-ka′-in-izm*) [S. Amer. *coca*]. The cocain-habit.

Cocainization (*ko-ka-in-iz-a′-shun*) [S. Amer., *coca*]. The bringing of the system or organ under the influence of cocain.

Cocainomania (*ko-ka-in-o-ma′-ne-ah*) [*cocain; μανία*, madness]. The habit of using cocain; properly, insanity due to the cocain-habit.

Cocainomaniac (*ko-ka-in-o-ma′-ne-ak*) [*cocain; μανία*, madness]. One who is insane from the effects of cocain.

Cocamin (*ko′-kam-in*) [S. Amer. *coca; amin*], $C_{19}H_{23}NO_4$. Truxillin, or Isotropyl-cocain; an alkaloid from coca. It has active properties, but its physiologic effects are little known.

Coccaceæ (*kok-kas′-e-e*) [Fr., *coccaceēs; κόκκος*, a kernel]. A group of schizomycetous fungi, or bacteria, including as genera the Micrococcus, Sarcina, Ascococcus, and Leuconostoc. The elements are normally spherical, reproduction usually taking place by division. Some writers place the genus *Leuconostoc* alone in this group; others exclude it entirely.

Coccidia (*kok-sid′-e-ah*) [*κόκκος*, a berry]. The so-called *psorospermiæ*—minute oval structures about 0.035 mm. long, with a thick capsule and coarsely granular contents. They are frequently found in the liver of the rabbit, and have been found in the liver, in a pleuritic exudate, and in the kidney, ureter, and heart-muscle in man. The organism is more properly called *Coccidium oviforme*, while the spores that it forms are termed psorospermiæ.

Coccidiosis (*kok-sid-i′-o-sis*) [*κόκκος*, a berry; *νόσος*, disease]. The group of symptoms produced by the presence of coccidia in the body.

Coccidium (*kok-sid′-e-um*) [*κόκκος*, a berry: *pl.*, *Coccidia*]. 1. In biology, applied (*a*) to the spore-bearing conceptacle of certain algæ, and (*b*) to egg-shaped psorosperms. 2. A genus of protozoans, by some referred to as the so-called psorosperms (see *Psorosperm*). See *Coccidia*. **C. oviforme** has been found in intestinal epithelium, and in the liver of man, and often in the liver of the rabbit. True coccidia are non-motile cell-parasites. **C. sarkolytus**, the name given by Adamkiewicz to the parasite of carcinoma.

Coccillana (*kok-sil-a′-nah*) [S. Amer.]. The bark of *Guarea swartzii*, of the W. Indies, a tree of the family *Meliaceæ*, an emetic and purgative; in over-doses it is poisonous as an irritant narcotic. It acts locally upon the mucous membrane when directly applied or when absorbed. It is commended for bronchial catarrh. Dose of fl. ext. ♏x–xxx. Unof.

Coccinella (*kok-sin-el′-ah*). See *Cochineal*.

Coccinellin (*kok-sin-el′-in*), or **Coccinellina** (*kok-se-nel′-lei-na*). See *Carmin*.

Coccinin (*kok′-sin-in*) [*coccinus*, scarlet], $C_{14}H_{12}O_5$. 1. A substance obtained by heating carmic acid with potassium hydrate. It crystallizes in yellowish leaflets from an alcoholic solution. 2. A coal-tar color belonging to the azo-group. Same as *New Coccin* and *Phenetol Red*.

Coccobacteria (*kok-o-bak-te′-re-ah*) [*κόκκος*, a kernel; *βακτήριον*, a little rod]. The rod-like or spheroidal bacteria found in putrefying liquids, and called **C. septica**. See *Bacteria*, *Synonymatic Table of*.

Coccoloba (*kok-ol′-o-bah*) [*cocolobis*, a kind of grape]. A genus of polygonaceous trees of tropical America. **C. uvifera**, the sea-side grape, has a hard and valuable wood, which, when boiled, yields what is called Jamaica kino.

Coccomelasma (*kok-o-mel-az′-mah*) [*κόκκος*, berry; *μέλασμα*, blackness]. A granular dermal melanosis.

Cocculus (*kok′-u-lus*) [dim. of *coccus*, a berry]. A genus of menispermaceous plants of the tropics. **C. indicus**, is the dried fruit of *Anamirta cocculus*. It is an active narcotic poison, and is employed as a destroyer of vermin; its preparations have proved serviceable for headaches, dysmenorrhea, etc. See *Picrotoxin*.

Coccus (*kok′-us*) [*κόκκος*, a berry]. 1. A cell or capsule. 2. In biology, (*a*) the separable carpels or mitlets of dry fruits; (*b*) a spherical bacterium, a micrococcus. **C. cacti**, the cochineal insect. See *Cochineal*.

Coccyalgia (*kok-se-al′-je-ah*) [*κόκκυξ*, coccyx; *ἄλγος*, pain]. Coccygodynia.

Coccydynia (*kok-se-din′-e-ah*). See *Coccygodynia*.

Coccygalgia (*kok-sig-al′-je-ah*). See *Coccygodynia*.

Coccygeal (*kok-sij′-e-al*) [*κόκκυξ*, coccyx]. Pertaining to the coccyx.

Coccygectomy (*kok-sig-ek′-to-me*) [*κόκκυξ*, coccyx; *ἐκτομή*, excision]. Surgical excision of the coccyx.

Coccygeus (*kok-sij′-e-us*) [*κόκκυξ*, coccyx]. One of the pelvic muscles. See *Muscles*, *Table of*.

Coccygodynia (*kok-sig-o-din′-e-ah*) [*κόκκυξ*, coccyx; *ὀδύνη*, pain]. Pain referred to the region of the coccyx; confined almost exclusively to women who have given birth to children. The pain is due to a rupture or stretching of the ligaments surrounding the coccyx, or to fracture or dislocation of that bone.

Coccygotomy (*kok-sig-ot′-o-me*) [*κόκκυξ*, coccyx; *τομή*, a cutting]. Cutting of the coccyx.

Coccyx (*kok′-siks*) [*κόκκυξ*, the cuckoo (resembling the bill)]. The last bone of the spinal column, formed by the union of four rudimentary vertebræ. See *Bones*, *Table of*.

Cochenille [Fr.]. Same as *Cochineal*.

Cochia (*ko′-ke-ah*, or *ko′-che-ah*) [L.; of Gr. *κοκκίον*, a pill]. An old, but not obsolete, name for certain drastic and mainly aloetic pills (*pilulæ cochiæ*). The name *cochia* is now adjectival.

Cochin China (*ko′-chin chi′-nah*) [native Asiatic]. A country of lower Asia. **C. Diarrhea**, a form of tropical diarrhea dependent upon the presence in the intestine of a thread-worm, *Anguillula intestinalis*, and its larval offspring. **C. Leg.** Synonym of *Elephantiasis arabum*. **C. Ulcer**, an affection of Cochin China characterized by deep ulceration of the extremities. It is supposed to be the same as *Furunculus orientalis*.

Cochineal (*koch'-in-ēl*, or *koch-in-ēl'*) [ME., *cochenel*]. The dried insects of a species of plant lice, *Coccus cacti*, parasitic upon a cactus of Mexico and Central America. It contains a rich red coloring-matter, *carmin*, used mainly as a dyeing agent. See *Pigments, Conspectus of.* It is thought to be valuable in infantile whooping-cough. Dose gr. ½.

Cochlea (*kok'-le-ah*) [κόχλος, a conch-shell]. A cavity of the internal ear resembling a snail-shell. It describes two and a half turns about a central pillar called the *modiolus* or *columnella*, forming the *spiral canal*, about 1½ inches in length. The latter is divided into three canals or scalæ,—the *scalæ tympani, vestibuli*, and *media*. See also, *Ear*. 2. In botany, a coiled legume, like that of Medicago.

COCHLEA.

1. Scala tympani. 2. Scala vestibuli. 3. Anterior or triangular canal. 4. Posterior or quadrilateral canal. 5, 5. Spiral ligament. 6. External spiral sulcus. 7. Membrana tectoria, or membrane of Corti. 8. Membrana basilaris. 9. Spiral vessel. 10. Limbus laminæ spiralis. 11. Pillars of Organ of Corti. 12. Branch of cochlear nerve. 13. Ganglion spirale. 14. Branch of cochlear nerve between the lamellæ of the lamina spiralis ossea. 15. One of the orifices by which this branch penetrates the canal of Corti. 16. Part of bony cochlea. 17. Lining periosteum. 18. Membrane of Reissner.

Cochlear (*kok'-le-ar*) [κόχλος, a conch-shell]. Pertaining or belonging to the cochlea. **C. Nerve**, the nerve supplying the cochlea. See *Nerves, Table of.* **Cochlear**, or **Cochleare** (*kok'-le-ar*, or *kok-le-a'-re*) [L.: *pl.*, *Cochlearia*]. A spoon; a spoonful. **C. magnum**, a tablespoon; **C. medium**, a dessert-spoon; **C. minimum**, a teaspoon.

Cochlearia (*kok-le-ar'-e-ah*). See *Horseradish.*

Cochleate (*kok'-le-āt*) [*cochleatus*, spiral]. Spirally coiled, like a snail-shell.

Cochlitis (*kok-li'-tis*) [κόχλος, a conch-shell; ιτις, inflammation]. Inflammation of the cochlea.

Cockroach (*kok'-rōch*). See *Blatta.*

Coco (*ko'-ko*). Synonym of *Yaws*. See *Frambœsia.*

Coco, or Cocoa (*ko'-kō*) [Port., *cacao*]. See *Cacao* and *Theobroma.* **C.-nut**, the nut of *Cocos nucifera*, a palm-tree of tropical coast-regions. The oil is used as a substitute for cod-liver oil, and in Germany it is employed in pharmacy in the place of lard. **C.-nut Fiber**, coir. The coarse fibrous covering of the nut of the cocoa-palm is largely used in making brooms, rushes, matting, and coarse carpeting. The fiber is coarse, stiff, very elastic, round, and smooth like hair. It also has great tenacity, and is well adapted for cordage. **C.-nut Oil**, oleum cocois, is obtained from the dried pulp of the cocoa-nut by expression. It is an oil of the consistency of butter, fusing at from 73° to 75° F. (22.7° to 26.6° C.). When fresh, it is white in color and of sweet taste and agreeable odor, but it easily becomes rancid. It is easily saponified, even in the cold. It is used in the manufacture of candles and soap.

Cocomania (*ko-ko-ma'-ne-ah*). See *Cocainomania.*

Cocomaniac (*ko-ko-ma'-ne-ak*). See *Cocainomaniac.*

Cocoölein (*ko-ko-o'-le-in*) [Port., *cacao; oleum*, oil]. A proprietary substitute for cod-liver oil, said to be derived from cocoa-nut oil.

Cocotte (*ko-kot'*) [Fr.]. Synonym of *Influenza.*

Coction (*kok'-shun*) [*coctio; coquere*, to cook]. 1. Digestion. 2. The preparatory alteration that morbific matter undergoes in preparation for its discharge.

Cod (*kod*) [ME., *cod*]. 1. The scrotum. 2. The belly. 3. In the plural, the testes. 4. The *Gadus morrhua*, a fish furnishing a valuable medicinal product. **C.-liver Oil**, an oil derived from the liver of the *Gadus morrhua*, and ranging in color according to the method of its preparation from pale-straw to dark-brown; its specific gravity is .923 to .924 or even .930 at 15° C. The finer qualities are used for medicinal purposes, the darker by tanners and currriers. See *Morrhua.*

Codamin (*ko'-dam-in*) [κώδεια, the head; poppy-head; *amin*], $C_{20}H_{25}NO_4$. A crystalline alkaloid of opium, isomeric with laudanin. When ferric chlorid is added to it, it assumes a deep-green color.

Codein (*ko'-dēn*) [κώδεια, the poppy-head], $C_{18}H_{21}NO_3 \cdot H_2O$. A white, crystalline alkaloid of opium. It is mildly calmative and is serviceable in diabetes mellitus. It is also valuable in ovarian pain. Dose gr. ss–ij. **C. Phosphate**, soluble in water. Similar to morphin in action, but less toxic. Dose, hypodermically, gr. ss. **C. Sulphas**, dose gr. ⅙–¼. **C. Valerianate**, an antispasmodic and sedative. Dose gr. ¼.

Codex (*ko'-deks*) [L.: *pl.*, *Codices*]. A pharmacopeia or book of formulæ; specifically, the French pharmacopeia.

Codie Pine Resin. See *Cowdie-gum.*

Codonostoma (*ko-do-nos'-to-mah*) [κώδων, a bell; στόμα, a mouth]. In biology, applied to the oral or disc aperture of certain marine invertebrates, medusæ, etc.

Cœlelminth (*se'-lel-minth*). See *Celelminth.*

Cœlia (*se'-le-ah*). See *Celia.*

Cœliac (*se'-le-ak*). See *Celiac.*

Cœliaca (*se-li'-ak-ah*). See *Celiaca.*

Cœliadelphus (*se-le-ad-el'-fus*). See *Celiadelphus.*

Cœliagra (*se-le-a'-grah*). See *Celiagra.*

Cœlialgia (*se-le-al'-je-ah*). See *Celialgia.*

Cœlian, Cœline (*se'-le-an, se'-lin*). See *Celean, Celine.*

Cœliocyesis (*se-le-o-si-e'-sis*). See *Celiocyesis.*

Cœliolymph (*se'-le-o-limf*). See *Celiolymph.*

Cœliomyalgia (*se-le-o-mi-al'-je-ah*). See *Celiomyalgia.*

Cœlioncus (*se-le-ong'-kus*). See *Celioncus.*

Cœlioplegia (*se-le-o-ple'-je-ah*) [κοιλία, the belly; πληγή, a stroke]. A synonym of Asiatic cholera.

Cœliopyosis (*se-le-o-pi-o'-sis*). See *Celiopyosis.*

Cœliorrhœa (*se-le-or-e'-ah*). See *Celiorrhea.*

Cœlioschisis (*se-le-os'-kis-is*). See *Celioschisis.*

Cœlioscope (*se'-le-o-skōp*). See *Celioscope.*

Cœliotomy (*se-le-ot'-o-me*). See *Celiotomy.*

Cœlitis (*se-li'-tis*). See *Celitis.*

Cœlodont (*se'-lo-dont*) [κοῖλος, hollow; ὀδούς, tooth]. Hollow-toothed, as certain lizards—the opposite of *Pleodont*, or solid-toothed.

Cœlom, Cœloma (*se'-lom, se-lo'-mah*). See *Celom.*

Cœlophlebitis (*se-lo-fle-bi'-tis*). See *Celophlebitis.*

Cœlophthalmia (*se-loff-thal'-me-ah*). See *Celophthalmia.*

Cœlosis (*se-lo'-sis*). See *Celosis.*

Cœlosoma (*se-lo-so'-mah*). See *Celosoma.*

Cœlosperm (*se'-lo-sperm*) [κοῖλος, hollow; σπέρμα, seed]. In biology, a seed so curved as to form a concavity on one of its surfaces.

Cœlostomia (*se-lo-sto'-nie-ah*). See *Celostomia.*

Cœlumbrella (*sel-um-brel'-ah*) [κοῖλος, hollow; *umbrella*, the disc of acalephs]. In biology, the concave surface of the gelatinous umbrella of *Medusæ.*

Cœnenchyma (*se-neng'-kim-ah*) [κοινός, common; ἐγχεῖν, to infuse]. In biology, the calcified tissue common to the several polyps of a compound Actinozoön.

Cœnesthesis (*sen-es-the'-sis*). See *Cenesthesis.*

Cœnobium (*se-no'-be-um*) [κοινός, common; βίος, life]. In biology, a composite zoöphyte or any colony of independent cells held together by a common investment.

Cœnoblast (*se'-no-blast*) [κοινός, common; βλαστός, a germ]. In biology, the primitive germinal layer, giving rise to the endoderm and mesoderm.

Cœnœcium (*se-ne'-se-um*) [κοινός, common; οἶκος a dwelling]. In biology, the common dermal system of a polyzoan colony. The polypidom of Johnson.

Cœnosarc (*se'-no-sark*) [κοινός, common; σάρξ, flesh]. In biology, Allman's term for the "common living basis by which several polyps in a composite zoöphyte are connected with one another."

Cœnosteum (*se-nos'-te-um*) [κοινός, common; ὀστεόν, bone]. In biology, the calcareous ectoderm of hydrocorallines.

Cœnotype (*se'-no-tip*) [κοινός, common; τύπος, type]. The fundamental type-form of a group.

Cœnurus (*se-nūr'-us*) [κοινός, common; οὐρά, tail]. The larva of *Tænia cœnurus*, Küchenmeister, producing the disease of sheep called staggers. See also *Alternations of Generation.* **C. cerebralis**, a many-headed hydatid found mainly in the brain and spinal canal of the ox and sheep (mostly in young animals). Occasionally it has been discovered in the muscles of man. It is now known to be the larva of the tape-worm, *Tænia cœnurus.* See *Parasites* (*Animal*), *Table of.*

Cœroulignone (*se-ru-lig'-nōn*) [*cæruleus*, blue; *lignum*, wood], $C_{16}H_{16}O_6$. Cedriret; a derivative of hexa-oxidi-phenyl. It separates as a violet powder when crude wood-spirit is purified on a large scale by means of potassium chromate. It is insoluble in the ordinary solvents, and is precipitated in fine, steel-blue needles, from its phenol solution, by alcohol or ether.

Coffee (*kof'-e*). See *Caffea.* **C.-bean, Kentucky,** the popular name for *Gymnocladus canadensis.* **C.-ground Vomit,** the material ejected by emesis in carcinoma and ulceration of the stomach and other gastric conditions. It consists of blood and other contents of the stomach changed by the action of the gastric juice. **C.-tree, Kentucky.** See *Chicot.*

Coffeinism (*kof'-e-in-izm*) [*caffea*, coffee]. Excessive habitual use of coffee, or the state of ill-health that results from it.

Coffer Dam, Barnum's. See *Rubber Dam.*

Coffeurin (*kof-e-u'-rin*) [*caffea*, coffee; οὖρον, urine]. A principle said to sometimes be present in urine after the free use of coffee as a beverage or medicine. The urine then has the odor of coffee, and its color is red, brownish, or deep-brown.

Coffin (*kof'-in*) [κόφινος, a basket]. 1. A case intended to hold the dead body. 2. In farriery, the hollow portion of a horse's hoof. **C.-birth,** post-mortem expulsion of the fetus. **C.-bone,** the last or distal phalanx of a horse's foot.

Coffinism (*kof'-in-izm*) [after Dr. Coffin, who advocated it]. A variety of quackery or professed system of medical practice. It resembles so-called Thomsonianism.

Cogged Breath-sound. Cog-wheel respiration or breathing. See *Cog-wheel Sound.*

Cogwheel Breathing or Respiration. See *Cogwheel Sound* and *Breath-sounds.* **C. Sound,** a pathologic sound sometimes heard in auscultation of the lungs, due to interruptions in the accession of air to a part; this gives the sound an intermitting character. See *Breath-Sounds.*

Cohabitation (*ko-hab-it-a'-shun*) [*con*, together; *habitare*, to dwell]. The living together of a man and woman, with or without legal marriage. Sexual connection.

Cohen's Method. A method of inducing premature labor. It consists in injecting fluid into the uterine cavity between the uterine wall and the ovum. See *Treatment, Methods of.*

Cohesion (*ko-he'-zhun*) [*cohærere*, to stick together]. The force whereby molecules of matter adhere to each other. The "attraction of aggregation."

Cohn's Fluid. A fluid culture-medium. It is composed of potassium phosphate, 0.1 gm.; magnesium sulphate, 0.1 gm.; tricalcic phosphate, 0.01 gm.; distilled water, 20 gm.; ammonium tartrate, 0.2 gm.

Cohnheim's Areas. See *Area.* **C. Fields.** See *Cohnheim's Areas.* **C. Frog.** See *Salt-frog.* **C. Method,** a method of staining tissues. See *Stains, Table of.* **C. Theory,** a theory as to the origin of tumors; a satisfactory hypothesis, namely, to the effect that all true tumors are due to faulty embryonal development. The embryonal cells do not undergo the normal changes, are displaced, or are superfluous. When the favorable conditions are presented later in life they take on growth, with the formation of tumors of various kinds.

Cohnstein's Operation. See *Operations, Table of.*

Cohobation (*ko-ho-ba'-shun*) [*cohobare*, to redistil]. 1. Redistillation. 2. Recurrence of disease.

Cohosh (*ko'-hosh*) [Am. Ind.]. A name given to several medicinal plants. **C., Black.** See *Cimicifuga.* **C., Blue.** See *Caulophyllum.*

Coil (*koil*) [*colligere*, to gather together]. Rings formed by winding, as a wire. **C.-gland.** See *Sweat-gland.* **C., Induction,** rolls of wire in which an electric current is induced by the alternate opening and closing of a circuit. **C., Leiter's.** See *Leiter's Tubes.* **C., Ruhmkorff,** an induction-coil, or spark-coil.

Coiling (*koil'-ing*) [*colligere*, to bind together]. Forming into spirals or rings. **C. of the Cord.** See *Cord.*

Coïndication (*ko-in-de-ka'-shun*) [*con*, with; *indicare*, to indicate]. A concurrent indication; a collateral and confirmatory indication. Cf. *Contraindication.*

Coin-test (*koin'-test*). See *Baccelli's Sign*, and *Bell-Sound.*

Coir (*kir*) [Tamil, *kayaru*, a rope]. See *Cocoanut-fiber.*

Coiter's Corrugator. The corrugator supercilii. See *Muscles, Table of.*

Coition (*ko-ish'-un*) [*coire*, to come together]. Same as *Coitus.*

Coitus (*ko'-it-us*) [*coire*, to come together]. The act of sexual connection. Copulation. **C. Disease,** the venereal disease of the horse. **C. reservatus,** congressus interruptus; incomplete copulation; the incomplete performance of the sexual act; onanism.

Coix (*ko'-iks*) [κόιξ, an Egyptian variety of palm]. A genus of coarse monecious grasses. **C. lacrima,** an old-world species of grass, having very large and hard seeds, called *Job's tears*, from which beads are made which are worn as amulets, and are thought to assist the process of dentition when bitten upon by young teething children. The seeds are used locally for lung-troubles and for dropsy. Unof.

Coke (*kōk*) [origin uncertain]. The solid product of the carbonization of coal.

Coko Disease (*ko'-ko dis-ez'*). A name applied in the Fiji Islands to a disease resembling Yaws.

Kola (*ko'-lah*). See *Kola-nut.*

Kolalgia (*ko-lal'-je-ah*) [*κόλον*, the colon; *ἄλγος*, pain]. Pain in the great intestine.

Kolation (*ko-la'-shun*) [*colare*, to strain]. The operation of straining.

Kolatorium (*kol-at-o'-re-um*) [L.]. A sieve, colander, or strainer; used in pharmacy.

Kolature (*ko'-lat-yūr*) [*colatura*, straining]. In pharmacy, a liquid that has been subjected to colation.

Kolchicein (*kol-chis-e'-in*) [*κολχικον*, colchicum], $C_{17}H_{21}NO_5+2H_2O$. A crystalline decomposition-product of colchicin.

Kolchicin (*kol'-chis-in*) [*κολχικόν*, colchicum], $C_{17}H_{19}NO_6$. An alkaloid of colchicum; it is a pale, brownish-yellow, exceedingly bitter powder, freely soluble in water. It is a very active poison. Its dose is gr. $\frac{1}{10}$ or $\frac{1}{2}$ milligram, hypodermatically.

Kolchicum (*kol'-chik-um*) [*κολχικόν*, colchicum: *gen.*, *Colchici*]. Meadow Saffron. The corm and seed of *C. autumnale*, with properties due to an alkaloid, *colchicin*. It is an emetic, diuretic, diaphoretic, and drastic cathartic. It is valuable in acute gout, and is used with good results in gonorrhea. Dose of the powdered root gr. ij–viij, of the powdered seeds gr. j–v. **C., Extract.** (B.P.). Dose gr. ss–ij. **C., Extract., Aceticum** (B.P.). Dose gr. ss–ij. **C. Rad., Ext., Dilute** acetic acid 35, powdered root 100 parts, water q.s. Dose gr. ½–ij. **C. Rad., Ext., Fld.** Dose ♏ij–x. **C. Rad., Vinum**, 40 per cent. in strength. Dose ♏v–xv. **C. Sem., Ext., Fld.** Dose ♏j–v. **C. Sem., Vinum**, 15 per cent. in strength. Dose ♏x–xxx. **C., Tinct.**, prepared from the seed; strength 15 per cent. Dose ♏x–xxx. **C., Vinum** (B.P.). Dose ♏x–xxx.

Kolcothar (*kol'-ko-thar*) [ML.]. A crude sesquioxid of iron; red oxid of iron; a tonic and hemostatic. Unof. See also *Pigments, Conspectus of.*

Kold (*kōld*) [AS., *ceald*]. 1. The comparative want of heat. 2. A term used popularly for coryza and catarrhal conditions of the respiratory tract. Cold is employed largely in various forms as a therapeutic agent, mainly for the purpose of lowering temperature and allaying irritation and inflammation. It may be used in the form of *affusion*, that is, the sudden application of a considerable volume of cold water to the body. This application of the cold douche is contraindicated in all cases of extreme weakness, with feeble pulse. Cold may be used as an anesthetic (see *Anesthetic*); in baths (see *Bath*); in the form of compresses applied over the affected part; in the form of irrigation, especially in the treatment of bruised and injured members; as a lotion, for the purpose of relieving local heat, pain, and swelling; as an injection, in the form of ice-water, into the vagina or rectum, for various conditions; and as the *cold pack*, which is a valuable means of reducing the body-temperature in cases of hyperpyrexia. The patient is wrapped in a sheet wrung out of cold water; as this becomes warm, it is replaced by a fresh cold one, or iced water may be poured upon it, or lumps of ice placed upon and around it. When the temperature is reduced the wet sheet should be removed and a light covering applied, but not a blanket. This is not as efficacious as the cold bath. Cold may be applied in the dry form by means of the *ice-cap* or *bladder*, an india-rubber bag filled with ice, snow, or a freezing mixture. **C. Abscess.** See *Abscess.* **C.-blooded.** See *Poikilothermic.* **C. on the Chest**, bronchial catarrh, *q. v.* **C. Coil.** See *Leiter's Coils.* **C. Cream.** See *Rosa.* **C. Freckles.** See *Lentigo.* **C. Pack.** See *Cold.* **C. Plague.** Synonym of *Cerebro-spinal Meningitis.* **C. Sore**, same as *Fever-blister.* **C. Spots.** See *Temperature Sense.* **C. Stroke**, a condition, the analogue of heat-stroke, in which from excessive cold the patient is suddenly overcome and falls into a comatose state, shortly followed, as a rule, by death. **C. Test**, a test applied chiefly to lubricating oils to determine the point at which the oil begins to congeal, and ceases to flow.

Colectomy (*ko-lek'-to-me*) [*κόλον*, colon; *ἐκτομή*, cutting out]. Excision of a portion of the colon.

Coleitis (*col-e-i'-tis*) [*κολεός*, sheath; *ιτις*, inflammation]. Vaginitis.

Coleocele (*kol'-e-o-sēl*) [*κολεός*, sheath; *κηλή*, tumor]. Vaginal tumor or hernia.

Coleophyl (*kol'-e-o-fil*) [*κολεός*, sheath; *φύλλον*, leaf]. In biology, the investing sheath of the monocotyledonous plumule.

Coleoptosis (*kol-e-op-to'-sis*) [*κολεός*, sheath; *πτῶσις*, a fall]. Prolapse of the vaginal wall.

Coleorhiza (*kol-e-or-i'-zah*) [*κολεός*, sheath; *ῥίζα*, root]. In biology, a sheath that envelops the radicle in some embryos and through which roots penetrate when the seed germinates.

Coleorrhexis (*kol-e-or-eks'-is*) [*κολεός*, a sheath; *ῥῆξις*, a rupture]. Rupture of the vagina.

Coleostegnosis (*kol-e-o-steg-no'-sis*) [*κολεός*, a sheath; *στεγνωσις*, a constriction]. Contraction or atresia of the vagina.

Colic (*kol'-ik*) [*colicus*, *κωλικός*, pertaining to the colon]. 1. Pertaining to the colon. 2. A severe griping pain in the bowels or adjacent organs, as, *e.g.*, *hepatic*, *nephritic*, etc. In intestinal colic the pains radiate over the abdomen from the region of the umbilicus. The belly is usually distended (save in *Lead-colic*, *q. v.*), and pressure will usually relieve the pain. Colic may be due to irritation from the intestinal contents, a diseased condition of the bowel-wall, reflex irritation from other abdominal viscera, and general blood-poisoning. **C. of the Antilles**, an endemic form of colic somewhat resembling lead-colic. **C. Arteries.** See *Arteries, Table of.* **C., Biliary.** See *Gall-stones.* **C., Bilious.** See *C., Endemic.* **C., Copper**, a colic or pain in the intestinal canal seen in workers in copper, and differing from lead colic in being attended with extreme prostration and diarrhea. The duration is short and the prognosis favorable. **C., Cramp.** See *Cramp.* **C., Devonshire.** Synonym of *C., Lead.* **C., Dry.** See *C., Endemic.* Also a synonym of *C., Lead.* **C., Endemic**, a variety of colic occurring epidemically in some of the intertropical countries. Its symptoms resemble those of lead-colic. It is not accompanied by any constant lesion; it lasts from eight to fifteen days and may end in general paralysis and death, or it may become chronic. Relapses are frequent. **C., Hill.** See *Hill Diarrhea.* **C., Horn.** Synonym of *Priapism.* **C., Lead**, or **C., Saturnine**, or *Colica Pictonum*, *painter's colic*, is that due to lead-poisoning. It is common among those who use or work with lead. It is characterized by excruciating abdominal pain, a hard and retracted condition of the abdomen, slow pulse, and increased arterial tension. **C., Madrid.** Synonym of *C., Lead.* **C., Meconial**, the colic of the new-born. **C., Menstrual**, the pain of menstruation. **C., Mucous.** See *Enteritis, Pseudo-membranous.* **C., Nervous.** See *C., Endemic* **C., Normandy.** Synonym of *C., Lead.* **C. of Poitou.** Synonym of *C., Lead.* **C. Root.** See *Aletris* and *Dioscorea.* **C., Sailors'**, a form of colic common among sailors. **C. of Surinam.** Synonym of *C., Lead.* **C., Uterine**, colic-like pains experienced at the menstrual epochs, often coming on in paroxysms.

C., West Indian. Synonym of *C., Lead.* **C., Zinc,** a form of colic due to chronic zinc-poisoning.

Colica (*kol'-ik-ah*) [L.]. Colic. **C. pictonum** (literally, colic of the people of Poitou), lead-colic. Painters' Colic. See *Colic, Lead.* **C. pituitosa.** Synonym of *Enteritis, Pseudo-membranous.* **C. scortorum,** a pain in the pelvis of youthful prostitutes, symptomatic of the ovarian disease that results from their unnatural sexual relations. It is due probably to a pyosalpinx.

Colicodynia (*kol-ik-o-din'-e-ah*). Pain in the large intestine.

Colicoplegia (*kol-ik-o-ple'-je-ah*) [κωλικός, pertaining to the colon; πληγή, a stroke]. Paralysis of the intestines. Also a synonym of *Lead-colic.*

Colitis (*ko-li'-tis*) [κόλον, the large intestine; ιτις, inflammation]. Inflammation of the colon. See also *Dysentery.* **C., Mucous.** See *Enteritis, Pseudo-membranous.* **C., Pellicular.** A synonym of *Membranous Enteritis.*

Collagen (*kol'-aj-en*) [κόλλα, glue; γεννάειν, to produce]. A substance existing in various tissues of the body, especially bone and cartilage; it is converted into gelatin by boiling.

Collapse (*kol-aps'*) [*collabere*, to fall together]. Extreme depression and prostration from failure of nervous force, as in cholera, shock, hemorrhage, etc. **C. of Lung,** return of a portion or the whole of a lung to its fetal or airless condition from some mechanical hindrance to the entrance of air. It is characterized by dyspnea, with more or less cyanosis, and is mainly encountered in broncho-pneumonia. **C., Parturient,** parturient apoplexy; vitular or vitulary fever; puerperal fever in cows.

Collapsing (*kol-aps'-ing*) [*collabere*, to fall together]. Suddenly breaking down. **C. Pulse.** See *Corrigan's Pulse.*

Collapsus (*kol-aps'-us*) [L.]. Collapse. **C. corneæ,** entire collapse of the cornea.

Collar (*kol'-ar*) [ME., *coler*]. Something worn about the neck. **C., Adjusting,** in microscopes, a ring or collar acting on a screw to increase or decrease the distance between the systems of lenses of an objective. **C.-bone.** See *Clavicle.* **C.-cell,** in biology, a flagellate cell having the base of the flagellum surrounded by a collar-like extension of the cell-wall. **C.-crown,** in dentistry, an artificial crown, to be engrafted on a natural root, attached to which is a gold collar which encircles the exposed portion of the root, and is soldered to the lining or backing that holds the dowel, or to the dowel by means of a disc between the base of the artificial crown and the natural root.

Collateral (*kol-at'-er-al*) [*con*, together; *lateralis*, of the side]. 1. Accessory or secondary; not direct or immediate. 2. One of the first branches of an axis cylinder passing at right angles.

Collecting Tubes of the Kidney. A name given to the ducts discharging into the calices of the kidneys.

Collector (*kol-ek'-tor*) [*collectare*, to collect]. A device by which any number of cells may be taken from or added to an electric current.

Collenchyma (*kol-eng'-kim-ah*) [κόλλα, glue; ἔγχυμα, an infusion]. In biology, applied to a modified plant-parenchyma in which the cells are thickened at the angles, and swell in water to a glue-like mass.

Collenchyme (*kol-eng'-kīm*) [κόλλα, glue; ἔγχυμα, an infusion]. In biology, a colorless gelatinous matrix in which are embedded the collencytes of sponges.

Collencyte (*kol'-en-sīt*) [κολλα, glue; ἐν, in; κύτος, cell]. In biology, the branched connective-tissue cells embedded in the collenchyme of sponges.

Colles' Fascia. The deep layer of the perineal fascia. It is attached to the base of the triangular ligament, to the anterior lips of the rami of the pubes and ischia laterally, and anteriorly it is continuous with the fascia of the scrotum. **C. Fracture.** See *Fracture,* and *Diseases, Table of.* **C. Law.** See *Law.* **C. Ligament.** See *Ligament.* **C. Operation.** See *Operations, Table of.*

Collet (*kol'-et*) [Fr.; *collum*, the neck]. A neck or collar. A term applied by some writers on dental anatomy to the neck of a tooth.

Colleterium (*kol-et-e'-re-um*) [κολλητός, glued together]. In biology, a gland in certain insects that secretes a viscid substance for gluing the ova together.

Colletic (*kol-et'-ik*) [κολλητικός; κόλλα, glue]. Gluey; promoting surgical union in wounds.

Colletocystophore (*ko-let-o-sis'-to-for*) [κολλητής, one who glues; κύστις, bladder; φέρειν, to bear]. In biology, marginal bodies found in lucernarian hydrozoans.

Colliculus (*kol-ik'-u-lus*) [dim. of *collis*, hill: *pl.*, *Colliculi*]. Any eminence of the cerebral parietes. The colliculi are the caudatum, hippocamp, calcar, collateral eminence, occipital eminence, and amygdaline eminence.

Collidin (*kol'-id-in*) [κόλλα, glue], $C_8H_{11}N$. A name given to Nencki's ptomaïne-base, isomeric but not identical with aldehyd-collidin. The ptomaïne was obtained from pancreas and gelatin allowed to putrefy together in water. Its constitution is still unknown. The free base is oily, and possesses a peculiar, agreeable odor. Nencki believed it an aromatic base. Its physiologic action appears to be doubtful, but an isomer of it discovered in ox-blood fibrin and in putrefied jelly-fish has a poisonous effect resembling that of curara. Frogs poisoned by the isomer emit an orange-flower odor. Nencki's collidin is isomeric with collidin obtained from coal-tar.

Collier's Lung. Synonym of *Anthracosis.*

Collilongus (*kol-e-long'-gus*) [*collum*, neck; *longus*, long]. The muscle called longus colli. See *Muscles.*

Collimator (*kol'-im-a-tor*) [*collimare*, to aim at]. The receiving telescope of a spectroscope.

Collin's Black, C_6H_5N. A name for Anilin Black, employed in staining microscopic sections.

Collinsonia (*kol-in-so'-ne-ah*) [after Peter Collinson, an English gentleman]. A genus of labiate herbs. **C. canadensis** (stone-root, heal-all), is a coarse plant with a disagreeable smell; it has useful tonic, diuretic, and diaphoretic properties. Dose gr. xv–lx in decoction; of the fluid extract ♏x–ʒj; of the tincture (1 in 10) ʒss–ij.

Collinsonin (*kol-in-so'-nin*) [*Collinsonia*]. A precipitate from the tincture of the root of *Collinsonia canadensis.* It is tonic, diaphoretic, resolvent, and diuretic. Dose 2 to 4 grains. Unof.

Colliquation (*kol-ik-wa'-shun*) [*con*, together; *liquare*, to melt]. The liquefaction or breaking down of a tissue or organ.

Colliquative (*kol-ik'-wa-tiv*) [*con*, together; *liquare*, to melt]. Exhausting; enfeebling; copiously profuse or excessive; marked by excessive fluid discharge. **C. Diarrhea,** a profuse watery diarrhea. **C. Necrosis,** a high degree of inflammatory process in the tissues, with active movement of the leucocytes toward the central focus and rapid breaking down of the tissues, forming an abscess-cavity. **C. Sweat,** a profuse, clammy sweat.

Collocystis (*kol-o-sis'-tis*) [κόλλα, glue; κίστις, cysts]. A gelatin capsule to facilitate the swallowing of a drug.

Collodion (*kol-o'-de-on*) [κολλώδης, glue-like]. See *Pyroxylin.*

Collodium (*kol-o'-de-um*). See *Pyroxylin*.

Colloid (*kol'-oid*) [κόλλα, glue]. 1. A non-crystallizable and generally insoluble organic substance. See *Dialysis*. 2. A mobile pathologic material, jelly-like, firmer than mucus, and differing in its reactions from albumin and from lardacein. 3. Having the nature of glue. 4. In chemistry, amorphous and non-crystalline. **C. Cancer.** See *Cancer*. **C. Degeneration of the Skin,** a rare disease, occurring chiefly on the upper part of the face, in the form of small, glistening, translucent, flattish elevations, and yielding by pressure a small, jelly-like mass. **C. Milium.** See *Milium*.

Colloma (*kol-o'-mah*) [κόλλα, glue; ὄμα, a tumor: *pl.*, *Collomata*]. A cystic tumor containing a gelatiniform, amorphous, and non-vascular substance.

Collonema (*kol-o-ne'-mah*) [κόλλα, glue; νῆμα, tissue: *pl.*, *Collonemata*]. Myxoma, or myxosarcoma.

Collum (*kol'-um*) [L.]. The neck; especially the anterior part of the neck. **C. distortum.** Synonym of *Torticollis*.

Collunarium (*kol-un-a'-re-um*) [L.]. A nasal douche.

Collyrium (*kol-ir'-e-um*) [κολλύριον, an eye-salve: *pl.*, *Collyria*]. An astringent, antiseptic, or medicinal lotion for the eyes. More rarely, a vaporous or gaseous medicament for application to the eyes, or even a powder, or solid, to be used in treating the eye topically, is called a collyrium. (Anciently, any suppository or medicated bougie was thus called.) **C. adstringens luteum.** See *Graefe's Collyrium* and *Horst's Eye-water*.

Coloboma (*kol-o-bo'-mah*) [κολοβόειν, to mutilate: *pl.*, *Colobomata*]. A cleavage or fissure of parts of the eye, of congenital or traumatic origin. *Congenital C.* are due to imperfect closure of fissures during fetal development. **C., Bridge,** a variety in which the pupil is separated from the coloboma by a narrow thread of iris-tissue that stretches like a bridge from one pillar of the coloboma to the other.

Colocentesis (*kol-o-sen-te'-sis*) [κόλων, colon; κέντησις, puncture]. Surgical puncture of the colon.

Colocleisis (*kol-o-kli'-sis*) [κόλον, colon; κλεῖσις, closure]. Occlusion of the colon.

Colocynth (*kol'-o-sinth*). See *Colocynthus*.

Colocynthein (*kol-o-sin'-the-in*) [κολοκυνθίς, colocynth], $C_{44}H_{64}O_{13}$. A resinous decomposition-product of colocynthin.

Colocynthin (*kol-o-sin'-thin*) [κολοκυνθίς, colocynth], $C_{56}H_{84}O_{23}$. The active principle of colocynth; an extract, or a yellow amorphous, neutral, exceedingly bitter powder, soluble in water and alcohol, but not in ether. It is an irritant hydragogue cathartic. Dose gr. 1¼ to 1. Unof.

Colocynthis (*kol-o-sin'-this*) [κολοκυνθίς, colocynth]. Colocynth. The fruit of *Citrullus colocynthis*, from which the seeds and rind have been rejected. Its properties are due to a bitter glucosid, *colocynthin*, $C_{56}H_{84}O_{23}$, the dose of which is gr. $\frac{1}{10}$–$\frac{1}{4}$. It is a tonic and astringent purgative, and is used mainly as an ingredient of compound cathartic pills. It is somewhat useful in colic, sciatic rheumatism, and neuralgia. **C., Ext.,** alcoholic. Dose gr. ½–ij. **C., Ext., Comp.,** contains colocynth extract 16, aloes 50, cardamom 6, resin of scammony 14, soap 14, alcohol 10. Dose gr. v–xx. **C., Pilula Comp.** (B. P.) contains colocynth, aloes, scammony, sulphate of potassium and oil of cloves. Dose gr. v–x. **Pilulæ Cathartic. Comp.,** compound cathartic pills; contain each, comp. ext. of colocynth gr. 1.3, abstract jalap gr. j, calomel gr. j, gamboge gr. ¼. Dose j–iij pills. **Pil. catharticæ vegetabiles,** contain colocynth, hyoscyamus, jalap, leptandra, resin of podophyllum, oil of peppermint. **Pil. colocynth et hyoscyam.** Dose gr. v–x. **Laville's Anti-gout Remedy,** contains colocynthin 2½, quinin, cinchonin āā 5, Spanish wine 800, alcohol 100, water 1000 parts.

Colocynthitin (*kol-o-sin'-thit-in*) [κολοκυνθίς, colocynth]. A crystalline, tasteless, inactive principle of colocynth.

Colo-enteritis (*kol-o-en-ter-i'-tis*) [κῶλον, colon; ἔντερον, an intestine; ιτις, inflammation]. Inflammation of the small and large intestine. See *Enterocolitis*.

Cologne (*kol-ōn'*). See *Spiritus odoratus*. **C. Spirit,** rectified commercial alcohol. **C. Glue.** See *Glue*. **C.-water,** aqua cologniensis. See *Spiritus odoratus*. **C.-water Habit,** the use of cologne-water as a drink for the purpose of experiencing the effects of the alcohol which it contains.

Colognese (*kol-ōn-ēz'*). Same as *Umber*.

Colomba, Colombo (*kol-om'-bah, kol-om'-bo*). See *Calumba*.

Colomiatti, Bacillus of. See *Bacteria*.

Colon (*ko'-lon*) [κόλον, κῶλον, the colon]. The second and principal part of the large intestine. In the various parts of its course it is known as the *ascending C.*, the *transverse C.*, the *descending C.*, and the *sigmoid flexure*.

Colonia (*ko-lon-i'-ah*). Synonym of *Dysentery*.

Colonic (*ko-lon'-ik*) [κῶλον, the colon]. Pertaining to the colon.

Colonitis (*ko-lon-i'-tis*). See *Colitis*.

Colony (*kol'-o-ne*) [*colonia*, a colony]. A collection or assemblage, as of microörganisms in a special culture. **C. Treatment,** for the insane. See *Gheel System*.

Colophony Resin (*kol'-o-fo-ne*) [κολοφών, a city of Ionia]. Rosin. The solid residue left on distilling off the volatile oil from crude turpentine. Rosin is a brittle, tasteless, very friable solid, of smooth, shining fracture, specific gravity about 1.08. It softens at 80° C. (176° F.), and fuses completely to a limpid, yellow liquid at 135° C. (275° F.). It is insoluble in water, with difficulty soluble in alcohol, freely soluble in ether, acetone, benzene, and fatty oils. See *Resin*.

Coloproctia (*kol-o-prok'-te-ah*) [κόλον, colon; πρωκτός, anus]. The formation of an artificial colonic anus.

Colopuncture (*kol'-o-punk'-chur*) [κόλον, colon; *punctura*, puncture]. Same as *Colocentesis*.

Coloquintida (*kol-o-kwin'-tid-ah*) [ML.]. An old name for colocynth.

Color (*kull'-er*) [*color*, color]. The differences in the appearance of a thing seen, other than those due to form and relief. The tint or hue of an object, dependent upon the number of vibrations of the ethereal stimulus. See *Pigment*. **C.-blindness.** See *Blindness*. **C., Complementary,** any color that added to another color, or to a mixture of colors, produces white. **C.-contrast,** any two colors that, when mixed, supplement the prevailing tone of the light. **C.-cure,** the supposed therapeutic effect of exposure to variously colored light. **C.-hearing,** the excitation of the visual center for color through the auditory nerve; the perception of sound photisms. See *Photism*. **C.-image,** an image of a highly-colored object lighted with so wide an aperture that the refraction-images are drowned in the light. **C.-sensation,** depends on the number of vibrations of the ether, the same as the pitch of a note depends on the number of vibrations of the sounding body. *Hering's Theory of C.-s* predicates disassimilation and assimilation (decomposition and restitution) of the visual substance in vision—white, red, and yellow representing the sensation of disassimilation, black, green, and blue that of restitution. The *Young-Helmholtz Theory* assumes three

kinds of nerve-elements corresponding to the three primary colors. Stimulation of the first develops red, of the second, green, of the third, violet. See *Photism*. **C.-sense**, the faculty by which the various colors are distinguished. **C.-top**, a top containing on the sectors of its disc a number of colors to be "mixed" by rapid whirling. **Colors, Mixed**, those produced when the retina is excited by two or more simple colors. **C., Saturated**, those containing little or no white. **C., Simple**, those of the spectrum.

Colorectitis (*ko-lo-rek-ti'-tis*) [κόλον, colon; *rectus*, straight; ιτις, inflammation]. Inflammation of the colon and rectum. Also, a synonym of *Dysentery*.

Colorectostomy (*ko-lo-rek-tos'-to-me*) [κόλον, colon; *rectus*, straight; στόμα, a mouth]. The surgical establishment of a passage between the colon and the rectum.

Colorimeter (*kull-or-im'-et-er*) [*color*, color; μέτρον, measure]. An instrument for determining the quantity of coloring matter in a mixture, as in the blood. See *Hemochromometer*.

Colorin (*kull'-or-in*) [*color*, color]. An alcoholic extract of madder. See *Pigments, Conspectus of*.

Coloring (*kull'-or-ing*) [*color*, color]. A tint or combination of colors. **C. Matters.** See *Pigments, Colors*, and *Dye-stuffs*.

Colostomy (*ko-los'-to-me*) [κόλον, colon; στόμα, opening]. 1. The formation of an artificial anus by an opening into the colon; coloproctia. 2. Any surgical operation upon the colon that makes a permanent opening into it, whether internal or external.

Colostration (*kol-os-tra'-shun*) [*colostrum*, the first milk after delivery]. A disease or illness of young infants ascribed to the effects of the colostrum.

Colostric (*kol-os'-trik*) [*colostrum*, the first milk after delivery]. Relating to colostrum.

Colostrous (*kol-os'-trus*) [*colostrum*, the first milk after delivery]. Of the nature of or containing colostrum.

Colostrum (*kol-os'-trum*) [L.]. The first milk from the mother's breasts after the birth of the child. It is laxative, and assists in the expulsion of the meconium. **C. Corpuscles**, small microscopic bodies contained in the colostrum. They are the epithelial cells of the mammary glands, full of oil globules. After about the third day these cells burst and set free the fat globules before they leave the gland, and in this way the true milk is formed.

Colotomy (*ko-lot'-o-me*) [κόλον, colon; τέμνειν, to cut]. Incision of the colon, either *abdominal*, *lateral*, *lumbar*, or *inguinal*, according to the region of entrance.

Colotyphus (*kol-o-ti'-fus*) [κόλον, colon; τῦφος, smoke]. Enteric fever with involvement of the colon. Also a synonym of *Dysentery*.

Colpalgia (*kol-pal'-je-ah*) [κόλπος, vagina; ἄλγος, pain]. Vaginal pain or neuralgia.

Colpaporrhexis (*kol-pap-or-reks'-is*) [κόλπος, vagina; ἀπό, from; ῥῆξις, a tearing, or breakage]. Severance of the cervix from the body of the uterus.

Colpatresia (*kol-pat-re'-se-ah*) [κόλπος, vagina; ἄτρητος, not perforated]. Occlusion or atresia of the vagina.

Colpectasia (*kol-pek-ta'-se-ah*) [κόλπος, vagina; ἔκτασις, a stretching out]. Vaginal dilatation.

Colpedema (*kol-ped-e'-mah*) [κόλπος, vagina; οἴδημα, swelling]. Edema of the vagina.

Colpemphraxis (*kol-pem-fraks'-is*) [κόλπος, vagina; ἔμφραξις, a stoppage]. Obstruction of the vagina.

Colpeurynter (*kol-pu-rin'-ter*) [κόλπος, vagina; εὐρύνειν, to widen]. An inflatable bag or sac used for dilating the vagina.

Colpeurysis (*kol-pu'-ris-is*) [κόλπος, vagina; εὐρύνειν, to dilate]. Vaginal dilatation, especially that effected by the colpeurynter.

Colpitis (*kol-pi'-tis*) [κόλπος, vagina; ιτις, inflammation]. Inflammation of the vagina.

Colpocele (*kol'-po-sēl*, or *se'-le*) [κόλπος, vagina; κηλή, tumor]. Hernia or tumor in the vagina.

Colpocleisis (*kol-po-kli'-sis*) [κόλπος, vagina; κλεῖσις, a closure]. The surgical closure of the vagina.

Colpocystic (*kol-po-sis'-tik*) [κόλπος, vagina; κύστις, bladder]. Relating to the vagina and the bladder; vesico-vaginal.

Colpocystitis (*kol-po-sis-ti'-tis*) [κόλπος, vagina; κύστις, bladder; ιτις, inflammation]. Inflammation of the vagina and the bladder.

Colpocystocele (*kol-po-sis'-to-sēl*) [κόλπος, vagina; κύστις, a bladder; κηλή, a tumor]. A hernia of the bladder into the vagina, with prolapse of the anterior vaginal wall.

Colpocystosyrinx (*kol-po-sis-to-sir'-ingks*) [κόλπος, vagina; κύστις, cyst; σῦριγξ, pipe]. Vesico-vaginal fistula.

Colpocystotomia (*kol-po-sis-to-to'-me-ah*). See *Colpocystotomy*.

Colpocystotomy (*kol-po-sis-tot'-o-me*) [κόλπος, vagina; κύστις, bladder; τομή, a cut]. Surgical incision of the bladder through the vaginal wall.

Colpohyperplasia (*kol-po-hi-per-pla'-ze-ah*) [κόλπος, vagina; ὑπέρ, over; πλάσσειν, to form]. Hyperplasia of the vagina.

Colpo-hysterectomy (*kol-po-his-ter-ek'-to-me*) [κόλπος, vagina; ὑστέρα, womb; ἐκτομή, excision]. Removal of the uterus through the vagina.

Colpo-hysterotomy (*kol-po-his-ter-ot'-o-me*) [κόλπος, vagina; ὑστέρα, womb; τομή, section]. Surgical incision of the vagina and uterus.

Colpoleukorrhea (*kol-po-lu-kor-e'-ah*) [κόλπος, vagina; λευκός, white; ῥέειν, to flow]. Vaginal leucorrhea.

Colpo-myomotomy (*kol-po-mi-o-mot'-o-me*) [κόλπος, vagina; μῦς, a muscle; τέμνειν, to cut]. Vaginal myomotomy.

Colpopathy (*kol-pop'-a-the*) [κόλπος, vagina; πάθος, illness]. Any disease of the vagina.

Colpoperineoplasty (*kol-po-per-in-e'-o-plas-te*) [κόλπος, vagina; περίνεον, the perineum; πλάσσειν, to form]. Plastic operation for abnormality of the vagina and perineum.

Colpoplastic (*kol-po-plas'-tik*) [κόλπος, vagina; πλάσσειν, to form]. Relating to colpoplasty.

Colpoplasty (*kol'-po-plas-te*) [κόλπος, vagina; πλάσσειν, to form]. Plastic surgical operation upon the vagina.

Colpoptosis (*kol-pop-to'-sis*) [κόλπος, vagina; πτῶσις, a falling]. Prolapse of the vagina.

Colporrhagia (*kol-por-a'-je-ah*) [κόλπος, vagina; ῥηγνύναι, to burst forth]. Vaginal hemorrhage.

Colporrhaphy (*kol-por'-a-fe*) [κόλπος, vagina; ῥαφή, seam]. Suture of the vagina.

Colporrhea (*kol-por-e'-ah*) [κόλπος, vagina; ῥοία, a flow]. Vaginal leucorrhea; a mucous discharge from the vagina.

Colporrhexis (*kol-por-ek'-sis*) [κόλπος, vagina; ῥῆξις, rupture]. Laceration or rupture of the vagina.

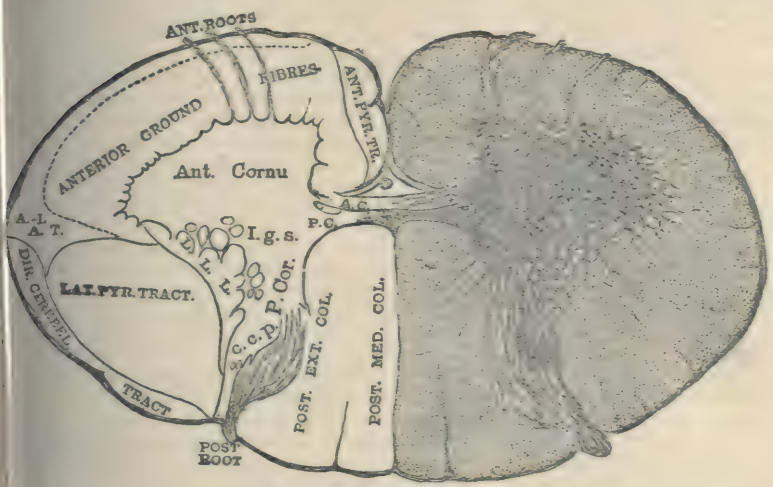
Colpostegnosis (*kol-po-steg-no'-sis*) [κόλπος, vagina; στέγνωσις, closure]. Same as *Colpostenosis*.

Colpostenosis (*kol-po-ste-no'-sis*) [κόλπος, vagina; στενός, narrow]. Stenosis or constriction of the vagina.

Colpotomy (*kol-pot'-o-me*) [κόλπος, vagina; τομή, a cutting]. Surgical or obstetric incision of the vagina.

Colpoxerosis (*kol-po-ze-ro'-sis*) [κόλπος, vagina; ξηρός, dry]. Morbid dryness of the vagina.

Colt-ill (*kolt'-il*). See *Strangles*.



Coltsfoot (*kolts'-foot*). The leaves of *Tussilago farfara*, a demulcent and tonic, sometimes prescribed for chronic cough. Dose of decoction, ℥j to Oj, a teacupful; of fld. ext. ʒj-ij. Unof.

Columbin (*kol-um'-bin*). An active principle of Calumba. It is a colorless crystalline substance of excessively bitter taste and neutral reaction.

Columbo (*kol-um'-bo*). See *Calumbo*.

Columella (*kol-u-mel'-ah*) [L., a little column]. 1. The column-like rod of birds and reptiles, a part of the organ of hearing, corresponding to the stapes of the higher animals. 2. The modiolus or central axis of the cochlea of the human ear. See *Cochlea* and *Modiolus*. **C. res dentes**; the cuspid teeth are so called from their shape.

Column (*kol'-um*) [*columna*, a column]. A pillar or column. Applied to sundry column-like organs of the body, and especially to certain parts of the spinal cord. **C., Anterior**, the layer of white matter in either half of the spinal cord included between the anterior horn and anterior nerve-roots, and the anterior median fissure. It contains the anterior or direct pyramidal tract, a portion of the antero-lateral ascending tract, and a portion of the anterior ground-fibers. **C., Antero-lateral Ascending.** See *C. of Gowers*. **C. of Burdach**, the postero-external column of the cord. **C. of Clarke**, a column of gray substance occupying the region to the outer and posterior part of the central canal of the spinal cord, at the inner part of the base of the posterior cornu. It is most marked in the dorsal region, and contains fusiform cells, some furnished with axis-cylinder processes. It is also called the posterior vesicular column of the cord. **C., Direct Cerebellar**, in the spinal cord, is situated outside of the lateral pyramidal tract, and ventrad of the Spitzka-Lissauer column. It is sensory or afferent. **C., Dorso-mesal**, a name for the postero-median column of the spinal cord and medulla oblongata. **C. of Goll**, the postero-median column of the spinal cord. **C., Gowers'**, in the spinal cord, a bunch of fibers lying in front of the direct cerebellar tract and reaching around upon the periphery of the anterior pyramidal tract. It is probably a sensory column containing the nerves of pain and temperature. **C., Lateral**, the layer of white matter in either half of the spinal cord included between the posterior horn and posterior nerve-roots, and the anterior horn and anterior nerve-roots. It contains the lateral pyramidal tract, the direct cerebellar tract, and the greater part of the anterior ground-fibers and antero-lateral ascending tract. **C. of Morgagni**, vertical folds of the rectal mucous membrane seen at the point of union of the latter with the skin of the anus. They diminish, but are not entirely effaced, when the bowel is distended. Between their lower ends little arches are sometimes found stretching from one to the other, forming pockets of skin and mucous membrane. These are the *sinuses of Morgagni*; they are more developed in old people. **C., Posterior**, a collection of white-matter situated in the spinal cord on either side between the posterior horns and posterior nerve-roots, and the posterior median fissure. It is divided into two parts by the imperfect intermediate septum, a narrow "postero-median column," and a wide "postero-external column." **C., Postero-external**, the outer wider division of the posterior column of the cord; the column of Burdach. **C., Postero-median**, the median division of the posterior column of the cord; the column of Goll. **C. of Rolando**, an eminence on the lateral border of the medulla oblongata. **C. of Spitzka-Lissauer**, in the spinal cord a group of nerve-fibers lying just in front and just behind the posterior horns or cornua. **C., Posterior-vesicular.** See *Column of Clarke*. **C. of Türck**, the anterior or direct pyramidal tract. **Columns of the External Abdominal Ring**, the free borders of the aponeurosis of the external oblique muscle.

COLUMNS OF SPINAL CORD.

A. C. Anterior commissure. P. C. Posterior commissure. I. g. s. Intermediate gray substance. P. cor. Posterior cornu. c. c. p. Caput cornu posterioris. L. L. L. Lateral limiting layer. A.-L. A. T. Antero-lateral ascending tract, which extends along the periphery of the cord. (*Gowers*.)

Columna (*kol-um'-nah*) [L.]. A column or pillar. **C. bertini**, that part of the cortical structure of the kidneys that separates the sides of any two pyramids, and through which the arteries and nerves enter, and the veins and lymphatics emerge. **C. nasi**, the antero-posterior septum between the nostrils. **C. vertebralis**, the spinal column. **Columnæ carneæ**, muscular columns projecting from the inner surface of the cardiac ventricles.

Colytic (*ko-lit'-ik*) [κολυτικός, preventive]. Preventive; inhibitory; caused by an obstruction; antiseptic.

Coma (*ko'-mah*) [κόμη, the hair of the head]. In biology, any tuft, as the top of a pineapple, the hairs on the end of a seed, etc.

Coma (*ko'-mah*) [κῶμα, deep sleep]. Abnormally deep and prolonged sleep, with the cerebral functions in abeyance; it is due to many conditions affecting the cerebrum directly or indirectly. The well-marked form is characterized by stertorous breathing, relaxation of the sphincters, lividity of the face, and loss of parallelism of the optic axes. **C., Alcohol**, that due to poisoning by alcohol. **C., Apoplectic**, that due to apoplexy. **C. diaceticum**, a form of coma occurring in carcinoma of the stomach and in diabetes. It is due to the presence of diacetic acid in the system. It is also called *Diabetic coma*. **C. Kussmaul's.** See *Kussmaul*. **C., Uremic**, that due to uremia. **C. Vigil**, a comatose

condition in which the patient lies with open eyes, but unconscious and delirious. This is occasionally met with in typhoid and typhus fevers, and in delirium tremens.

Comanic Acid (*ko-man′-ik*). See *Acid.*

Comatose (*ko′-mat-ōs*) [κῶμα, a deep sleep]. In a condition of coma.

Combination (*kom-bin-a′-shun*) [*combinare*, to combine]. The act of grouping or uniting; chemic union. **C.-back,** in the microscope, the lens-system of an objective farthest from the object, composed of a plano-concave of flint glass and a bi-concave of crown glass, or a bi-concave and two bi-convex glasses. **C.-front,** in the microscope, the lens-system nearest the objective.

Combustion (*kom-bus′-chun*) [*comburere*, to burn up]. The process of oxidation, attended with the liberation of heat and sometimes of light. It is loosely used as a synonym of inflammation. **C., Spontaneous,** that due to heat from chemic changes, such as the spontaneous ignition of oiled waste or shoddy in woolen mills, factories, etc. **C., Spontaneous Human,** the supposed burning of the body without the external application of heat.

Comedo (*kom′-e-do*) [*comedo*, a glutton: *pl.*, *Comedones*]. Grubs; Grub-worms; Black-heads. A chronic disorder of the sebaceous glands characterized by yellowish or whitish pin-point and pin-head sized elevations, containing in their center exposed blackish points. They are found usually on the face, back of the neck, chest, and back, and are often associated with acne. They occur as a rule in the young. Occasionally a parasite, the *Demodex folliculorum*, a small mite, is found in each comedo.

Comenic Acid (*ko-men′-ik*). See *Acid.*

Comes (*ko′-mēz*) [L.: *pl.*, *Comites*]. A companion, as a vein or nerve to an artery.

Comfrey (*kum′-fre*) [ME., *cumfirie*]. The root of *Symphytum officinale*, a demulcent, slightly astringent and tonic drug. It is a common ingredient of domestic cough-mixtures. Dose of the decoction indefinite; of the fld. ext. ʒj–ij. Unof.

Comma-bacillus (*kom′-ah-bas-il′-us*). See *Bacteria, Synonymatic Table of.*

Commensal (*kom-en′-sal*) [*com*, together; *mensa*, table]. In biology, the harmonious living together of two animals or plants. One of two such organisms.

Commi (*kom′-e*) [κόμμι, a gum]. Any gum; the purgative gum-resin of *Excœcaria cochinchinensis*, a tree of Indo-china.

Comminution (*kom-in-u′-shun*) [*comminutio; comminuere*, to break in pieces]. The process by which a solid body is reduced to pieces of varying sizes. It includes the various operations of cutting, rasping, grating, slicing, pulverizing, levigating, triturating, elutriating, granulating, etc. See, also, *Fracture, Comminuted.*

Commissure, Commissura (*kom′-is-ūr, kom-is-u′-rah*) [*committere*, to unite]. A joining or uniting together. **C., Anterior** (*of third ventricle*), a rounded cord of white fibers placed in front of the anterior crura of the fornix. It perforates the corpus striatum on either side, and spreads out into the substance of the hemispheres over the roof of the descending horns of the lateral ventricles. **C., Anterior White** (*of spinal cord*), a layer of fibers separating the posterior gray commissure from the bottom of the aterior median fissure. **C., Gray** (*of spinal cord*), the transverse band of gray matter connecting the crescentic masses of gray matter of each half of the spinal cord. **C. magna,** the corpus callosum. **C., Middle,** a band of soft gray matter connecting the optic thalami, and continuous with the gray matter lining the anterior part of the third ventricle. **C., Optic,** the union and crossing of the two optic nerves in front of the tuber cinereum. **C., Posterior** (*of third ventricle*), a flattened white band connecting the optic thalami posteriorly. **C., Posterior White** (*of spinal cord*), a band of fibers separating the gray commissure from the bottom of the posterior median fissure. **Commissura brevis,** a portion of the inferior vermiform process of the cerebellum, situated in the incisura posterior. **C. simplex,** a small lobe on the upper surface of the cerebellum near the incisura posterior.

Common (*kom′-un*) [*communis*, common]. Belonging or pertaining to all. Prostitute. **C. Black.** See *Pigments, Conspectus of.*

Commotio (*kom-o′-she-o*) [L.]. A commotion or shock. **C. cerebri.** Synonym of *Shock.* **C. retinæ,** the name given to those cases in which a depreciation, or perhaps an entire loss of vision, follows a blow on or near the eye. It can be explained as the result of insensibility due to the same changes in the retina as occur in the central organ of patients suffering from concussion of the brain.

Communicans (*kom-u′-nik-ans*)[L.]. Communicating. **C. noni.** See *Nerves, Table of.*

Communication (*kom-u-nik-a′-shun*) [*communicare*, to communicate]. 1. The transference of a contagium from one person to another. 2. The channel between two or more parts. **C.-plate,** in biology, a perforated diaphragm between the zoöids of a composite actinozoön (the "Rosettenplatte" of Reichert, and the Communication-pore of Smith) by means of which communication is maintained between all the cells in a colony and between all the compartments of the stolon in Polyzoa. **C.-pore.** See *C.-plate.*

Commutator (*kom′-u-ta-tor*) [*commutare*, to exchange]. An instrument for automatically interrupting or reversing the flow of an electric current, making and breaking it with desired frequency. See *Electric.*

Comose (*ko′-mōs*) [*coma*, hair]. Having much hair.

Compass Plant (*kum′-pas plant*). See *Rosin Weed.*

Compatibility (*kom-pat-ib-il′-it-e*) [*compati*, to suffer with]. The property of being compatible; susceptibility (as of different medicines) of being exhibited in the same solution with no loss of the desired effect, and without change in constitution.

Compensating (*kom′-pen-sa-ting*) [*compensare*, to compensate]. Making amends for. **C. Ocular.** See *Ocular.* **C. Operation,** in ophthalmology, tenotomy of the associated antagonist in cases of diplopia from paresis of one of the ocular muscles.

Complaisance, Operations of (*kom-pla-zongs′*). See *Election.*

Complanate (*kom′-plan-āt*) [*complanatus*, to make plane or level]. In biology, flattened.

Complemental (*kom-ple-men′-tal*) [*complementum*, that which completes or fills up]. Supplying a deficiency. In biology, forming a complement to a female. **C. Air.** See *Air.* **C. Male,** one of such supernumerary males as those cirripedia (*Ibla*) that lie within the sac of the female.

Complementary (*kom-ple-men′-ter-e*) [*complementare*, to fill up; to complete]. Complemental. **C. Colors.** See *Color* and *Pigment.*

Completely Born (*kom-plēt′-le born*). As employed in legal medicine, this expression implies that the child must be in the world in all its parts, *i. e.*, completely external to the mother. It does not imply that the placenta has been separated or the cord divided.

Complexus (*kom-pleks′-us*) [*complexus*, complex]. The totality of symptoms, phenomena, or signs of a morbid condition. **C. Muscle.** See *Muscles, Table of.*

Complication (*kom-plik-a'-shun*) [*complicare*, to fold together]. A disease or a process secondary to and more or less dependent upon some primary disease.

Compos Mentis (*kom'-pos men'-tis*) [L.]. Of sound mind, memory, and understanding. See *Non Compos Mentis*.

Composite (*kom-poz'-it*) [*componere*, to put together]. 1. Composed of distinct portions. 2. In biology, belonging to the order Compositæ. **C. Monsters**; this is a term used to designate any form of monstrosity showing some degree of duplicity in the main regions of the body.

Composition (*kom-po-zish'-un*) [*compositio*, a putting together]. Compounding; applied to drugs. The constitution of a mixture. **C. Powder**, a popular name (originally Thomsonian) for the *pulvis myricæ compositus*, N. F. At present it is a mixture of finely powdered bayberry bark (*Myrica cerifera*), 12 parts; ginger, 6 parts; capsicum and cloves, each 1 part. It is useful for sore throat and severe coryza. Unof. **C. Tea**, a warm drink composed of different spices, and used as a stomachic and to abort an attack of coryza.

Compound (*kom'-pound*, or *kom-pound'*) [ME., *compounen*, to mix or compound]. 1. To mix, as drugs. 2. Composed of several parts; in chemistry, a compound body. **C. Cathartic Pills.** See *Colocynth*. **C. Cavities**, cavities in teeth that are produced by the coalescence of two cavities or by the extension of a single cavity in such a manner as to include two surfaces of a tooth. **C. Fracture.** See Fracture. **C. Granule-Cell.** See *Corpuscle, Gluge's*. **C. Oxygen**, a quack cure-all consisting of a strong solution of potassium nitrate or chlorate through which the air to be inhaled is passed.

Compounding (*kom-pound'-ing*) [ME., *compounen*, to mix]. The mixing, manipulation, and preparation of the drugs ordered in a prescription.

Compress (*kom'-pres*) [*compressus*, pressed together]. Folded cloths, wet or dry, applied firmly to the part for relief of inflammation, or to prevent hemorrhage. **C., Fenestrated**, with a hole for drainage or inspection. **C., Graduated**, the strip applied directly is small; the others, progressively larger, cover it.

Compressed (*kom-prest'*) [*compressus*, pressed together]. Firmly pressed together; having the lateral diameter reduced. **C. Air**, air the density of which has been increased by compression. **C.-Air Bath.** Se *Bath*.

Compression (*kom-presh'-un*) [*compressus*, pressed together]. The state of being compressed. **C.-atrophy**, atrophy of a part from constant compression. Instances are the Chinese foot, liver-atrophy of tight lacing, atrophy of tissues from pressure by an aneurysm. **C. of Brain.** See *Brain*. **C.-myelitis**, myelitis due to compression. See *Myelitis*.

Compressor (*kom-pres'-or*) [*comprimere*, to press together]. 1. An instrument for compressing an artery, vein, etc. 2. It is also applied to muscles having a compressing function, as the *C. naris*, *C. venæ dorsalis penis*, etc. See *Muscles, Table of*. 3. One of the light springs inserted on either side of the stage of a microscope for holding the slide in position; a clip. **C. sacculi laryngis**, the inferior aryteno-epiglottideus muscle. See *Muscles, Table of*. **C. urethræ**, constrictor urethræ. See *Muscles, Table of*.

Compressorium (*kom-pres-o' re-um*) [*compressor*, a compress]. An instrument devised for making pressure on the cover-glass of a microscope-slide in order to favor separation of the elements of the specimen to be examined.

Comptonia (*komp-to'-ne-ah*) [after Henry *Compton*, Bishop of London, a botanist]. A genus of plants. **C. asplenifolia.** See *Liquidambar*.

Conarial (*ko-na'-re-al*) [κωνάριον, the pineal gland]. Relating to the conarium. **C. Vein.** See *Vein*.

Conario-hypophyseal (*ko-na-re-o-hi-po-fis'-e-al*) [κωνάριον, the pineal gland; ὑποφύσις, an undergrowth]. Relating to the conarium and to the hypophysis of the cerebrum; pineo-pituitary.

Conarium (*ko-na'-re-um*) [κωνάριον; dim. of κῶνος, a cone]. See *Pineal Gland*.

Conation (*ko-na'-shun*) [*conari*, to endeavor]. The exertive power of the mind, including will and desire; a special act or exercise of the exertive power.

Concassation (*kon-kas-a'-shun*) [*concassatio*; *con*, together; *cassare* or *quassare*, to shake, to beat]. 1. The shaking of medicines, as in a bottle; the pulverizing of drugs by beating. 2. Mental distress or affliction.

Concato's Disease. See *Diseases, Table of*, and *Polyorrhymenitis*.

Concaulescence (*kon-kawl-es'-ens*) [*con*, together; *caulis*, a stalk]. In biology, the partial fusion of the pedicle of a flower with the stem from which it springs.

Concavo-concave (*kon-ka'-vo-kon'-kāv*). See *Lens, Biconcave*.

Concavo-convex (*kon-ka'-vo-kon'-veks*). See *Lens, Periscopic*.

Conceive (*kon-sēv'*) [*concipere*, to take in]. To become pregnant.

Concentration (*kon-sen-tra'-shun*) [*con*, together; *centrum*, the center]. Evaporation of part of the water or other liquid of a mixture, thus rendering it relatively more dense.

Concentric (*kon-sen'-trik*) [*con*, together; *centrum*, the center]. Arranged in an equidistant manner about a center. **C. Hypertrophy of the Heart**, increase in the muscular texture of the heart, the capacity of the cavities remaining unchanged.

Conception (*kon-sep'-shun*) [*concipere*, to conceive]. 1. The fecundation of the ovum by the spermatozoid. See *Pregnancy*. 2. The abstract mental idea of anything; the power or act of mentally conceiving. **C., Imperative**, a false idea that an insane person dwells upon, and which he cannot expel from his mind, even when he knows it to be absurd, and which dominates his actions.

Concha (*kong'-kah*) [κόγχα, a shell]. A shell. Applied to organs having some resemblance to a shell, as the patella, vulva, etc., and especially to **C. auris**, or the hollow part of the external ear. **C. narium**, the turbinated bones. **C. santoriniana**, a name applied to a fourth turbinated bone sometimes found in the nose.

Conchiolin (*kong-ki'-o-lin*) [κόγχα, a shell; *lov*, a violet], $C_{30}H_{48}N_9O_{11}$. The skeletin material that forms the organic bases of the shells of gastropods. **C. Osteomyelitis.** See *Osteomyelitis*.

Conchitis (*kong-ki'-tis*) [κόγχα, a shell; ιτις, inflammation]. Inflammation of the concha.

Concho-anthelix (*kong'-ko-ant'-he-liks*) [κόγχα, a shell; ἀνθέλιξ, the inner curvature of the ear]. The muscle called obliquus auriculæ. See *Muscles, Table of*.

Concho-helix (*kong'-ko-he'-liks*) [κόγχα, a shell; ἕλιξ, a spiral]. The muscle called transversus auriculæ. See *Muscles, Table of*.

Conchology (*kong-kol'-o-je*) [κόγχα, a shell; λέγειν, to speak]. That department of science that deals with the shells of molluscs.

Conchometer (*kong-kom'-et-er*) [κόγχα, a shell; μέτρον, a measure]. An instrument for the measurement of the shells of molluscs.

Conchoscope (*kong'-ko-skōp*) [κόγχα, a shell; the naris; σκοπεῖν, to inspect]. A speculum and mirror for inspecting the nasal cavity.

Concoctio (*kon-kōk'-she-o*) [L.]. Digestion. **C. tarda.** Synonym of *Dyspepsia.*

Concoction (*kon-kok'-shun*) [*concoquere*, to boil together]. The act of boiling two substances together.

Concolor (*kon-kull'-or*) [*con*, together; *color*, color]. In biology, having the same color on both sides or over the entire surface.

Concomitant (*kon-kom'-it-ant*) [*concomitari*, to accompany]. Accompanying. **C. Strabismus.** See *Strabismus.* **C. Symptoms,** symptoms that are not in themselves essential to the course of a disease, but that may occur in association with the essential symptoms.

Concrement (*kon'-kre-ment*) [*concrescere*, to grow together]. A concretion.

Concresce (*kon'-kres*) [*con*, together; *crescere*, to grow]. In biology, to grow together.

Concrescescence (*kon-kres-es'-ens*) [*con*, together; *crescere*, to grow]. In biology, the union of the germ-bands to form the primitive streak.

Concrete (*kon'-krēt*, or *kon-krēt'*) [*concrescere*, to grow together]. Solidified or condensed. **Concreted Sugar,** the product of the Fryer concretor, or similar form of apparatus. It is a compact, boiled-down mass, containing both the crystallizable sugar and impurities that ordinarily go into the molasses. It shows little or no distinct grain.

Concretion (*kon-krē'-shun*) [*concretio; concrescere*, to grow together]. The solidification or condensation of a fluid substance; a calculus; a union of parts normally separate, as the fingers. **C., Animal,** an earthy deposit found in any of the various organs or secretions of the body. These concretions have a fibrous base containing salts of calcium, phosphorus, or magnesium.

Concubitus (*kon-ku'-bit-us*) [*concumbere*, to lie together]. Copulation.

Concursus (*kon-ker'-sus*) [*concursere*, to run together]. A synonym of *Anastomosis.*

Concussion (*kon-kush'-un*) [*concussio*, a violent shock]. Shock; the state of being shaken; a severe or injurious shaking or jarring of a part; also, the morbid state resulting from such a jarring. **C. of Brain.** See *Brain.* **C. of Spinal Cord.** A condition caused by severe shock of the spinal column, with or without appreciable lesion of the myelon.

Concussor (*kon-kus'-or*) [*concutere*, to shake]. In massage, an apparatus for gently beating the part to be treated.

Condaminea (*kon-dam-in'-e-ah*) [after *Condamine*, the botanist]. A genus of Cinchona-yielding trees.

Condensability (*kon-dens-ab-il'-it-e*) [*condensare*, to condense]. Capacity for undergoing condensation.

Condensation (*kon-den-sa'-shun*) [*condensare*, to condense]. In chemistry, the union of two or more molecules by the linking of carbon-atoms and the formation of complicated carbon-chains. 2. The pathologic hardening, with or without contraction, of a soft organ or tissue.

Condensed (*kon-densd'*) [*condensare*, to make thick]. Made compact; reduced to a denser form. **C. Milk,** milk that has had most of its watery elements evaporated according to a known process. Condensed milk prepared with the addition of cane-sugar is a white or yellowish-white product of about the consistency of honey and ranging in specific gravity from 1.25 to 1.41. It should be completely soluble in from four to five times its bulk of water, without separation of any flocculent residue, and then possess the taste of fresh, sweetened milk. Condensed milk prepared without the addition of cane-sugar is not boiled down to the same degree, and therefore remains liquid. Battershall gives the following analysis of both classes:—

CONDENSED MILK WITH ADDITION OF SUGAR.

Brand.	Water.	Fat.	Cane-sugar and Milk-sugar.	Casein.	Salts.
Alderney,	30.05	10.08	46.01	12.04	1.82
Anglo-Swiss (American),	29.46	8.11	50.41	10.22	1.80
Anglo-Swiss (English),	27.80	8.24	51.07	10.80	2.09
Anglo-Swiss (Swiss),	25.51	8.51	53.27	10.71	2.00
Eagle,	27.30	6.60	44.47	10.77	1.86
Crown,	29.44	9.27	49.26	10.11	1.92

CONDENSED MILK WITHOUT CANE-SUGAR.

Brand.	Water.	Fat.	Milk-sugar.	Casein.	Salts.
American,	52.07	15.06	16.97	14.26	2.80
New York,	56.71	14.13	13.98	13.18	2.00
Granulated Milk Company,	55.43	13.16	14.84	14.04	2.53
Eagle,	56.01	14.02	14.06	13.90	2.01

Condenser (*kon-den'-ser*) [*condensare*, to make dense]. A lens or combination of lenses used in microscopy for gathering and concentrating rays of light.

Condiment (*kon'-dim-ent*) [*condimentum*, spice]. Spice, sauce, or other appetizing ingredients used with food.

Condom, or **Cundum** (*kon'-dum*, or *kun'-dum*) [corruption of *Conton*, the name of the inventor]. A sheath worn over the penis during copulation for the purpose of preventing conception.

Conduction (*kon-duk'-shun*) [*conductio; conducere*, to draw together]. The passage or transfer of force or material from one part to another. **C.-resistance,** the resistance encountered by an electric current in passing through a circuit.

Conductor (*kon-duk'-tor*) [*conducere*, to draw together]. 1. A body that transmits force-vibrations, such as those of heat or electricity. A term applied to the electrodes and cords by which they are joined to the battery. 2. An instrument serving as a guide for the surgeon's knife.

Conduplicate (*kon-du'-plik-āt*) [*conduplicare*, to double together]. In biology, doubled or folded together, as leaves or wings.

Condurango Bark (*kon-du-rang'-go bark*) [native of S. Amer.]. Bark of *Gonolobus tetragonus*, or of *Conglobus condurango;* a remedy much used in S. America as an alterative in syphilis. It was introduced into the U. S. as a remedy for carcinoma of the

stomach, but yielded uncertain results. Dose of the fluid extract ʒ ss–j; of the tincture, ʒ j–ij. Unof.

Condy's Fluid. A proprietary disinfecting solution of unknown constitution, but said to be prepared from permanganates.

Condylar (*kon'-dil-ar*) [κόνδυλος, a knuckle]. Pertaining to the condyles.

Condylarthrosis (*kon-dil-ar-thro'-sis*) [κόνδυλος, a knuckle; ἄρθρον, a joint]. A form of diarthrosis, wherein a condyle is set in a shallow and elliptic cavity, and free and varied movement of the joint is possible; condylar articulation.

Condyle (*kon'-dil*) [κόνδυλος, a knuckle]. Any rounded eminence such as occurs in the joints of many of the bones, especially the *femur*, *humerus*, and *lower jaw*.

Condyloid (*kon'-dil-oid*) [κόνδυλος, a knuckle; εἶδος, likeness]. Resembling or pertaining to a condyle.

Condyloma (*kon-dil-o'-mah*) [κονδύλωμα, a swelling: *pl.*, *Condylomata*]. A wart-like growth or tumor about the anus or pudendum. The term is applied also to syphilitic patches and discolorations.

Condylomatous (*kon-dil-o'-mat-us*) [κονδύλωμα, a swelling]. Of the nature of a condyloma.

Condylotomy (*kon-dil-ot'-o-me*) [κόνδυλος, a knuckle; τέμνειν, to cut]. Extra-articular osteotomy; a division through the condyles of a bone.

Cone, Conus (*kōn*, *ko'-nus*) [κῶνος, a cone]. A solid body having a circle for its base, and terminating in a point. A patch of choroidal atrophy near the papilla of the eye, in myopia. **C., Graduated,** a cone-shaped body used for measuring the size of orifices of vessels, etc., especially in post-mortem examinations. **C. Inhaler.** See *Anesthetic*. **C. of Light,** the triangular reflection from the normal membrana tympani. **C., Retinal,** one of the rod-like bodies of elongated conical form, which, with the associated rods, form one of the outer layers of the retina, the so-called rod-and-cone layer. **C., Spermatic,** one of the series of cones forming the head of the epididymis, and composed of the coiled efferent tubules.

Conenchyma (*kon-eng'-kim-ah*) [κῶνος, a cone; ἔγχυμα, an infusion]. In biology, a term applied to tissues formed of conical cells, as the velvety surface of some petals.

Confectio (*kon-fek'-she-o*) [L.: *gen.*, *Confectionis*]. Official name for any confection, *q. v.* **C. damocratis.** See *Mithridate*.

Confection (*kon-fek'-shun*) [*confectio*, a preparation]. In pharmacy, a mass of sugar and water, or of honey, used as an excipient with a prescribed medicinal substance. There are two official (U.S. P.) *confectiones*; in the B. P. there are eight.

Confectioners' Disease (*kon-fek'-shun-erz dis-ēz'*). A disease frequently occurring in the workpeople manufacturing candied fruits, nuts, etc. It is confined to the nails of the fingers of the hands; the nail loses its polish, and becomes black, and the periungual portion becomes loosened and raised.

Configuration (*kon-fig-u-ra'-shun*) [*configurare*, to form after something]. In chemistry, a term now designating what was formerly called the "constitution" or "structure" of the molecules.

Confinement (*kon-fin'-ment*) [L., *confiner*, to shut up]. The condition of women during childbirth.

Confirmatory (*kon-fir'-mat-or-e*) [*confirmare*, to confirm]. Confirming. **C. Incision,** an abdominal section, made to confirm a diagnosis, as in case of malignant disease of the ovary, uterus, peritoneum, etc.

Confluent (*kon'-flu-ent*) [*confluere*, to flow together]. In descriptive pathology, a term applied to eruptions that run together. The opposite of discrete. In anatomy, coalesced or blended; applied to two or more bones originally separate, but subsequently formed into one.

Conformator (*kon'-for-ma-tor*) [Fr., *conformateur*]. A form of cephalograph used in determining the outlines of the skull in craniometry.

Confrontation (*kon-frun-ta'-shun*) [*confrontari*, to be contiguous to]. The bringing of one person into the presence of another from whom he or she has contracted a disease, as an aid in diagnosis.

Confusion (*kon-fu'-shun*) [*confusio*, a confounding]. Mixing; confounding. Embarrassment. **C. Colors,** a set of colors so chosen with regard to their degree of brilliancy that they cannot be distinguished by one who is color-blind; a good test for color-blindness.

Congelation (*kon-jel-a'-shun*) [*congelatio*, a freezing]. 1. Freezing; frost-bite; intense cold or its effect on the animal economy, or any organ or part. 2. The chilling or benumbing effect of any freezing-mixture or application; mainly employed for its local anesthetic effect. 3. Coagulation.

Congener (*kon'-jen-er*) [L., of the same race]. In biology, belonging to the same genus; closely allied.

Congenital (*kon-jen'-it-al*) [*con*, together; *genitus*, born]. Existing at birth.

Congestion (*kon-jes'-chun*) [*congerere*, to heap up]. An abnormal collection of blood in a part or organ. Congestion may be active or passive, atonic or inflammatory, functional or hypostatic. It is also named from the parts affected; the most important varieties of morbid congestion are the cerebral, spinal, pulmonary, hepatic, and renal.

Congestive (*kon-jes'-tiv*) [*congerere*, to heap up]. Marked by, due to, or of the nature of congestion.

Congius (*kon'-je-us*) [L.]. A Roman measure. A gallon.

Conglobate (*kon-glo'-bāt*) [*con*, together; *globare*, to make into a globe]. Rounded. **C. Glands,** the absorbent or lymphatic glands. See *Gland*.

Conglomerate (*kon-glom'-er-at*) [*conglomerare*, to heap up]. 1. Massed together; aggregated. 2. A mass of units without order. **C. Glands,** acinous glands.

Conglutin (*kon-glu'-tin*) [*con*, together; *gluten*, glue]. One of the proteids found in peas, beans, and other kinds of pulse. Vines considers it an artificial product. It is more glutinous and more soluble in acetic acid, and richer in nitrogen, than ordinary legumin. See *Casein*.

Conglutination (*kon-glu-tin-a'-shun*) [*conglutinare*, to glue together]. The abnormal union of two contiguous surfaces or bodies, as of two fingers, or of the opposed surfaces of the pleural or pericardial sac.

Congo (*kon'-go*) [native African]. A country of western Africa. **C. Fever.** See *Fever*. **C. Paper,** a test-paper stained with Congo-red. **C.-paper Test.** See *Tests, Table of*. **C.-red,** a red coloring matter which becomes blue in the presence of free HCl. It is used in chemic investigation of the gastric juice. See *Pigments, Conspectus of*. **C. Solution.** See *Tests, Table of*.

Congress (*kong'-gres*) [*congressus*, a meeting together]. An assemblage for deliberative purpose. **C., Sexual,** coition, or carnal intercourse.

Congressus (*kong-gres'-us*) [L.]. Congress; sexual intercourse. **C. interruptus.** See *Coitus reservatus*.

Conhydrin (*kon-hi'-drin*) [κώνειον, hemlock; ὕδωρ, water], $C_8H_{17}NO$. A solid alkaloid of conium, an oxyconin, occurring in pearly, iridescent, white, foliaceous crystals, with a faint, conin-like odor, and melting at 121° C. and distilling at 226°.

Conical (*kon'-ik-al*) [κωνικός, pertaining to a cone]. Cone-shaped. **C. Cornea.** See *Kerato-globus*.

Conidiophore (*ko-nid'-e-o-for*) [κόνις, dust; φέρειν, to bear]. In biology, applied to the hypha that produces conidia.

Conidium (*ko-nid'-e-um*)[κόνις, dust; ἰδιον, dim. suffix: *pl. Conidia*]. In biology, the deciduous asexual spores of certain fungi. Also called *Basidiospore* and *Acrospore*.

Conidosis (*kon-id-o'-sis*). Synonym of *Urticaria*.

Coniferin (*ko-nif'-er-in*) [*conifer*, cone-bearing], $C_{16}H_{22}O_8 + 2H_2O$. A crystalline glucosid found in the cambium of coniferous woods, and consisting of shining needles. It effloresces in the air and melts at 185° C. It is also called *Abietin*.

Coniin (*ko-ni'-in*). See *Conium* and *Conin*.

Conin (*ko'-nin*) [κώνειον, hemlock], $C_8H_{15}N$. A volatile alkaloid that occurs in hemlock (*Conium maculatum*), chiefly in the seeds, and is obtained by extraction with acetic acid or distillation with soda. It is a colorless, oily liquid, having the odor of hemlock and boiling at 167–168°; its specific gravity is 0.886 at 0°.

Conium (*ko-ni'-um*) [κώνειον, hemlock]. Hemlock. The green, full-grown fruit of the spotted hemlock, *C. maculatum*. It contains three alkaloids and a volatile oil. Its properties are mainly due to the alkaloids *coniin*, $C_8H_{15}N$, and *methylconiin*, $C_8H_{14}NCH_3$. It produces motor paralysis, without loss of sensation or of consciousness. Toxic doses cause death by paralysis of the organs of respiration. It is valuable in acute mania, delirium tremens, tetanus, blepharospasm, asthma, and whooping-cough. **C., Abstract.**, made from conium 200, dilute hydrochloric acid 6, sugar of milk and alcohol q. s., to make 100 parts of abstract. Unof. Dose gr. ss–iij. **C., cataplasma** (B. P.), made from the leaves. For external use. **C., Ext., Alcoholic.**, each grain representing one grain of the drug. Dose gr. ij–v–xl. **C., Fld. Ext.**, same strength as preceding. Dose ♏ij–v–xl. **C., pilula Comp.** (B. P.), contains extract of hemlock and ipecac. Dose gr. v–x. **C., succus** (B. P.), made from the leaves. Dose ♏xxx–℥ij. **C., Tinct.**, 15 per cent. strength. Dose ♏x–℥j. **C. Vapor** (B. P.), for inhalations. **Coniin**, unof., volatile alkaloid of conium. Dose gr. $\frac{1}{60}$–$\frac{1}{10}$. **Coniin Hydrobrom.**, $C_5H_9(C_3H_7)$, unof., recommended for spasmodic affections. Dose gr. $\frac{1}{80}$–$\frac{1}{15}$. All preparations uncertain in strength. **Coniin. Hydrobrom., Injectio Hypoderm.** Dose ♏j–iij.

Conjugal (*kon'-ju-gal*) [*conjugalis*, a husband or wife]. Pertaining to marriage; connubial. **C. Diabetes**, diabetes affecting husband and wife together; this is said to be not infrequently observed.

Conjugate (*kon'-ju-gāt*) [*con*, together; *jugare*, to yoke]. Yoked or coupled. **C. Deviation.** See *Deviation*. **C. Diagonal, Internal**, an internal measurement of the pelvis from the middle of the sub-pubic ligament to the sacro-vertebral angle. It is 12¾ cm. **C. Diameter** (of the pelvis), the antero-posterior or sacro-pubic. See *Diameter*. **C. Diameter** (of the pelvis), **external.** See *Baudelocque, Diameter of*. **C. Focus.** See *Focus*. **C.-symphyseal Angle**, the angle that the conjugate diameter of the pelvis makes with the pubic bone at the symphysis. **C., True**, the minimum useful diameter of the pelvic inlet. See *Diameter*.

Conjugation (*kon-ju-ga'-shon*) [*conjugatus*, joined together]. In biology, that form of sexual reproduction in which two cells, similar in size and appearance, unite to form a spore. The sexual character of conjugation was first pointed out by Vaucher, in 1803.

Conjunctiva (*kon-junk-ti'-vah*) [*conjunctivus*, connecting]. The mucous membrane covering the anterior portion of the globe of the eye, reflected on and extending to the free edges of the lids. Its parts are called *palpebral* and *ocular*, or *bulbar*.

Conjunctival (*kon-junk'-tiv-al*, or *kon-junk-ti'-val*) [*conjunctivus*, connecting]. Relating to the conjunctiva.

Conjunctivitis (*kon-junk-tiv-i'-tis*) [*conjunctivus*, connecting; ιτις, inflammation]. Inflammation of the conjunctiva. It may be catarrhal, croupous, diphtheric (or membranous), gonorrheal, phlyctenular, purulent, etc., in character or origin. **C., Atropin**, a peculiar idiosyncratic catarrh of the conjunctiva produced by prolonged use of atropin as a mydriatic, and characterized by the formation of numerous follicles. **C. crouposa**, a form associated with the formation of a whitish-gray membrane that is easily removed. **C. diphtheritica**, a specific purulent inflammation of the conjunctiva spreading by infection, yielding a contagious secretion, and leading to necrosis of the infiltrated tissue. **C. eczematosa.** See *C. lymphatica*. **C., Egyptian.** See *Trachoma*. **C. exanthematica.** See *C. lymphatica*. **C. follicularis**, a form characterized by the presence of follicles. **C., Granular.** See *Trachoma*. **C. lymphatica**, that occurring in scrofulous individuals. It is accompanied by the formation of ulcers. **C. membranacea.** See *C. crouposa* and *Ophthalmia*. **C. phlyctenulosa.** See *C. lymphatica*. **C. pustulosa.** See *C. lymphatica*. **C. scrofulosa.** See *C. lymphatica*.

Connate (*kon'-āt*). See *Confluent* and *Congenital*.

Connection (*kon-ek'-shun*) [*connectere*, to connect]. Sexual intercourse.

Connective (*kon-ek'-tiv*) [*connectere*, to connect]. 1. Connecting; binding. 2. In botany, the portion of the filament that connects the two cells of an anther. **C. Tissue.** See *Animal Tissue*.

Connivent (*kon-i'-vent*) [*connivere*, to wink at]. In botany converging toward each other; applied to stamens that converge above, as those of the violet.

Conocephalic, or Conocephalous (*ko-no-sef-al'-ik, ko-no-sef'-al-us*) [κῶνος, cone; κεφαλή, head]. Having the skull somewhat conoidal.

Conoid, or Conoidal (*ko'-noid*, or *ko-noi'-dal*) [κῶνος, cone; εἶδος, shape]. Of a conical or approximately conical shape. **C. Ligament**, the lower and inner part of the coraco-clavicular ligament. **C. Tubercle**, the eminence on the inferior surface of the clavicle to which the *C. ligament* is attached.

Conquassant (*kon-kwas'-ant*) [*conquassare*, to shake severely]. Very severe (applied chiefly to labor-pains at the acme of their intensity).

Conquassation (*kon-kwas-a'-shun*). See *Concassation*.

Conquinamin (*kon-kwin'-am-in*). An alkaloid of Cuprea bark.

Conrad's Water. An eye-wash composed of three parts of mercuric chlorid, 100 of distilled water, and five to ten of tinctura opii crocata.

Conroy's Test. See *Tests, Table of*.

Consanescent (*kon-san-es'-ent*) [*consanescere*, to become sound]. Healing, becoming healed (applied mostly to wounds).

Consanguine (*kon-san'-gwin*) [*consanguineus*, of the same blood]. Allied by birth or descent; akin by blood-relationship.

Consanguineous (*kon-san-gwin'-e-us*) [*consanguineus*, of the same blood]. Related by a common parentage.

Consanguinity (*kon-san-gwin'-it-e*) [*con*, together; *sanguinis*, of blood]. The relationship arising from common parentage; blood-relationship.

Consciousness (*kon'-shus-nes*) [*conscius*, knowing]. The state of being aware of one's own existence, of one's own mental states, and of the impressions made upon one's senses; ability to take cognizance of sensations; applied to *ab extra* impressions. **C., Double**, that morbid condition in which there are two separate

and alternating states of mental consciousness, in either one of which the events that have occurred in the other state are not remembered by the patient.

Consenescence (*kon-sen-es'-ens*) [*consenescere*, to grow old]. The state or condition of growing old.

Consensual (*kon-sen'-su-al*) [*consensus*, agreement]. Reflex and involving sensation, but not volition; as a consensual act or movement.

Consent (*kon-sent'*) [*consentire*, to agree]. In forensic medicine, this term signifies willing participation in unnatural or illegal intercourse. In pathology, a sympathetic affection of a part distant from a diseased part.

Consentience (*kon-sen'-she-ens*) [*consentire*, to agree]. Undeveloped or unintellectual consciousness; the sum or result of the impressions made by sensations upon the psychic center of the organism.

Conserva, or Conserve (*kon-ser'-vah*, or *con-serv'*) [*conservare*, to keep]. A confection, *q. v.*

Conservancy (*kon-ser'-van-se*) [*conservare*, to keep]. Public conservation of health or of things that make for health; the sum of hygienic or preservative legislation. **C. System.** See *Sewage*, *Disposal of.*

Conservative (*kon-ser'-vat-iv*) [*conservare*, to keep]. Aiming at the preservation and restoration of injured parts; as conservative surgery or dentistry.

Conservator (*kon'-ser-va-tor*) [*conservare*, to preserve]. A person appointed to look after the business interests and general welfare of an insane person or idiot.

Consolidant, Consolidating (*kon-sol'-id-ant*, or *kon-sol'-id-a-ting*) [*consolidare*, to make firm]. Tending to heal or promoting the healing of wounds or fractures; favoring cicatrization.

Consolidation (*kon-sol-id-a'-shun*) [*consolidare*, to make firm]. The process of becoming firm or solid, as a lung in pneumonia.

Consonants (*kon'-so-nants*) [*con*, together; *sonare*, to sound]. Non-vowel sounds in speaking produced at certain parts of the resonance-chamber. They are sounded only with a vowel. They consist of Explosives, Aspirates, Vibratives, and Resonants; they are also divided into four classes, according to the situation in which they are produced—the **Articulation Positions**,—the first being between the lips; the second between the tongue and hard palate; the third between the tongue and soft palate; the fourth between the vocal bands. **Labials**, made at the lips, may be explosive (*b*, *p*), aspirate (*f*, *v*, *w*), vibrative (the "burr"), and resonant (*m*). These form the consonants of the first articulation position. Those of the second position are the explosives *t* and *d*; the aspirates *s*, *z*, *sch*, *th*; the vibrative *r*; the resonant *n*. Those of the third position are the explosives *k* and *g*; the aspirates are the unvoiced consonants, unvoiced *ch* and *j*; the vibrative, palatal *r*; the resonant, palatal *n*. That of the fourth position is the aspirate, the glottis-formed *h*.

Constant (*kon'-stant*) [*constans*, steady]. Fixed; not changing. **C. Battery, Element, or Cell.** One yielding a constant current. A galvanic battery, of which the most common types are those of Bunsen, Callaud, Daniell, Grénèt, Grove, Leclanché, and Smee.

Consternatio (*kon-ster-na'-she-o*) [L.]. See *Night-Terrors.*

Constipation (*kon-stip-a'-shun*) [*constipare*, to crush tightly together]. Costiveness; retention and hardness of the feces from functional inactivity of the intestinal canal, or from abnormalism of the biliary or other secretions. It may also be due to mechanical obstruction of the intestinal canal, paresis of the intestinal walls, the use of certain foods, and general depression of vital activity.

Constituent (*kon-stit'-u-ent*) [*constituere*, to establish]. A formative element or ingredient. **The Constituents of the Organism** are organic and inorganic. **The Inorganic C.** are Water, forming 58.5 per cent. of the body; Gases, such as oxygen, marsh-gas, etc.; Salts, of which the chief are sodium chlorid, calcium phosphate (forming more than one-half of the bones), sodium phosphate, sodium carbonate, sodium and potassium sulphates, potassium chlorid, calcium fluorid and carbonate; Free Acids, as hydrochloric, sulphuric, etc.; Bases, such as silicon, manganese, iron. **The Organic C.** comprise the large classes of the proteids, albuminoids, fats, etc.

Constitution (*kon-stit-u'-shun*) [*constituere*, to dispose]. In chemistry, the atomic or molecular composition of a body. In pharmacy, the composition of a substance. In physiology, the general temperament and functional condition of the body.

Constitutional (*kon-stit-u'-shun-al*) [*constituere*, to dispose]. Pertaining to the state of the constitution. **C. Diseases,** in pathology, such diseases as are inherent, owing to an abnormal structure of the body. Also, inherited diseases. Also, a condition in which the disease pervades the whole system. General, in contradistinction to local.

Constrictor (*kon-strik'-tor*) [*constringere*, to bind together]. Any muscle that contracts or tightens any part of the body. See *Muscles*, *Table of.*

Constringent (*kon-strin'-jent*) [*constringere*, to constrict]. Same as *Astringent*, *q. v.*.

Consultation (*kon-sul-ta'-shun*) [*consultare*, to take counsel]. A deliberation between two or more physicians concerning the diagnosis of the disease of a patient and the proper method of treatment.

Consumption (*kon-sump'-shun*) [*consumere*, to consume or wear away]. Wasting, denutrition, or atrophy, loosely used as a synonym of *Tuberculosis*, especially pulmonary tuberculosis, *Phthisis*, *q. v.* **C. of the Bowels.** See *Diarrhea*, *Chronic Inflammatory.*

Consumptive (*kon-sump'-tiv*) [*consumere*, to consume or wear away]. 1. Of the nature of tuberculosis. 2. One afflicted with pulmonary tuberculosis.

Contact (*kon'-takt*) [*contactus*, a touching]. A touching. **C. Lenses,** in optics, a glass shell the concavity of which is in contact with the globe of the eye, a layer of liquid being interposed between the lens and the cornea. **C. Series,** a series of metals arranged in such an order that each becomes positively electrified by contact with the one that follows it. The contact-values of some metals, according to Aryton and Perry, are as follows:—

DIFFERENCE OF POTENTIAL IN VOLTS.

Zinc, Lead	.210	Iron, Copper	.146
Lead, Tin	0.69	Copper, Platinum	.238
Tin, Iron	3.13	Platinum, Carbon	.113

C. Test, Heller's test. See *Tests*, *Table of.*

Contactile, or Contactual (*kon-tak'-til*, or *kon-tak'-tu-al*) [*contactus*, contact]. 1. Tactile. 2. Due to or spreading by actual contact.

Contagion (*kon-ta'-jun*) [*contagio; contingere*, to touch]. The process by which a specific disease is communicated between persons, either by direct contact or by means of an intermediate agent. (See, also, *Infection.*) Also the specific germ of virus from which a communicable disease develops. **C., Mental.** See *Imitation.*

Contagionist (*kon-ta'-jun-ist*) [*contagio; contingere*, to touch]. One who believes in the contagious origin or transmission of any given disease.

Contagious (*kon-ta'-jus*) [*contagium*, a touching]. Communicable or transmissible by contagion, or by a specific contagium. *Infectious*—applied to a

disease engendered by a specific agency, which, once present, may multiply and renew itself indefinitely, and which always gives rise to the same disease. (a) *Miasmatic*—applied to an infectious disease of which the specific cause exists only in certain localities, *e. g.*, malaria, pneumonia, acute rheumatism. (b) *Contagious*—applied to a disease of which the cause is transmitted from person to person, through houses, villages, cities, and countries, *e. g.*, variola, morbilli, scarlatina, diphtheria, etc. (c) *Miasmatic-contagious*—applied to an infectious disease of which the specific cause is carried by persons, or their emanations, to a locality, and in the soil, water or houses of which it multiplies and thence generates the disease, *e. g.*, cholera, enteric fever, yellow fever. **C. Typhus.** Synonym of *Typhus Fever*, *q. v.*

Contagium (*kon-ta'-je-um*) [L.]. Any virus or morbific matter by means of which a communicable disease is transmitted from the sick to the well. **C. animatum**, same as *C. vivum*. **C. vivum** ("living contagium"), any living vegetable or animal organism that causes the spread of an infectious disease.

Contest (*kon'-test*) [*contestari*, to call to witness]. To dispute; to strive for. **C. Theory**, the doctrine of chemiotaxis.

Contiguity (*kon-tig-u'-it-e*) [*contiguitas*, a touching]. Proximity. **C., Amputation in the**, is performed at a joint, without section of a bone.

Continued (*kon-tin'-ūd*) [*continuare*, to make continuous]. Persisted in. **C. Fever**, a fever that is neither intermittent nor typically remittent. See *Fever*.

Continuity (*kon-tin-u'-it-e*) [*continuitas*, uninterruptedness]. In anatomy, the portion lying between two ends, as the shaft of a bone. **C., Solution of.** See *Solution*. **C., Amputation in the**, amputation in which a bone is divided.

Continuous (*kon-tin'-u-us*) [*continuus*, joined; uninterrupted]. Unbroken. **C.-gum Work**, a method of constructing artificial dentures.

Contortion (*kon-tor'-shun*) [*contorquere*, to twist]. A twisting or writhing, as of the body.

Contour (*kon-toor'*) [Fr., *contour*, circuit]. 1. The line that bounds, defines, or terminates a figure. 2. In operative dentistry, to effect the restoration of lost parts of teeth by building them up with gold, etc. **C.-feather-hair**, one of those outer and longer hairs or feathers that go to determine the contour of a bird or mammal, as distinguished from a soft down-feather or a hair of the under-fur. **C.-fillings**, in dentistry fillings in which the material is so built out as to restore the lost portion of the crown of the tooth; distinguished from plane or flush-fillings.

Contracted Heels. See *Hoofbound*.

Contractility (*kon-trak-til'-it-e*) [*contrahere*, to draw together]. The peculiar property of muscular tissue manifested by shortening and concomitant thickening.

Contraction (*kon-trak'-shun*) [*contrahere*, to draw together]. Approximation of the elements of a tissue or organ, thus diminishing its volume or contents. **C., Carpo-pedal**, a variety of tetany occurring in infants, and generally associated with dentition or seat-worms. There is a flexing of the fingers, toes, elbows, and knees, and a general tendency to convulsions. **C., Closing**, muscular contractions produced at the instant that the electric current is closed. **C., Front-tap**, Gowers' term for a phenomenon often observed in cases with exaggerated knee-jerk. It is a delicate test of increased spinal irritability. The foot is placed at a right angle to the leg, and the muscles of the front of the leg are tapped, the result being extension of the foot from contraction of the gastrocnemius. See *Reflexes, Table of.* **C.-furrows**, a number of concentric curved lines near the ciliary margin of the iris. They are produced in the living iris by a folding of the iris upon itself during dilatation of the pupil. **C., Hour-Glass.** See *Uterus*. **C., Opening**, the muscular contraction produced by opening or breaking the circuit. **C., Paradoxic**, Westphal's term for a phenomenon that consists in the contraction of a muscle, caused by the passive approximation of its extremities. **C.-remainder**, the stage of elastic after-vibration or residual contraction persisting in a muscle after withdrawal of the stimulus. **C.-ring**, the boundary line between the upper and lower uterine segments, often marked by a perceptible ridge. That portion of the uterine canal that must be dilated to allow the escape of the fetus is called the *lower uterine segment*; that portion above the point at which the dilatation ceases, *i. e.*, the contracting portion of the muscle, is called the *upper uterine segment*.

Contractions. See *Contracture* and also *Abbreviations*, in Introductory Tables.

Contracture (*kon-trak'-chur*) [*contractus*, a drawing together]. Contraction; permanent shortening, as of a muscle; distortion or deformity due to the shortening of a muscle or of various muscles. In electro-therapeutics, muscular spasms, clonic or tonic, the variety determined in regard to time, by the method of application of the current.

Contra-extensio (*kon-trah-ek-sten'-se-o*) [L.]. Counter-extension.

Contra-fissura (*kon'-trah-fis-su'-rah*) [*contra*, opposite to; *fissura*, a fissure]. Cranial fissure or fracture produced by a blow upon the skull at a point distant from or opposite to the seat of the fracture.

Contra-indicant (*kon-trah-in'-dik-ant*) [*contra*, opposed to; *indicare*, to indicate]. 1. Having the effect of a contra-indication. 2. A symptom, indication, or condition that forbids the use of a particular remedial measure or set of measures.

Contra-indication (*kon-trah-in-dik-a'-shun*) [*contra*, against; *indicare*, to point out]. That pathologic or modifying condition in which a remedy or a method of treatment is forbidden that under ordinary cases might be proper.

Contra-stimulant (*kon-trah-stim'-u-lant*) [*contra*, against; *stimulare*, to stimulate]. 1. Counteracting the effect of a stimulus; depressing; sedative. 2. A sedative remedy.

Contra-stimulism (*kon-trah-stim'-u-lizm*) [*contra*, against; *stimulare*, to stimulate]. The doctrine of contrastrimulus; Rasorianism.

Contra-stimulus, or **Contro-stimulus** (*kon-trah-stim'-u-lus*, or *kon-tro-stim'-u-lus*) [*contra*, against; *stimulus*, a stimulus]. An influence that is opposed, or acts in opposition, to a stimulus.

Contrayerva (*kon-trah-yer'-vah*) [*contra*, against; *herba*, an herb]. The root of *Dorstenia contrayerva*, a stimulant, tonic, and diaphoretic. Its decoction is mucilaginous, and is serviceable in low fevers and malignant eruptive diseases. Dose ʒ ss. Unof.

Contrecoup (*kon'-tr-koo*) [Fr.]. Counter-stroke, a variety of injury by indirect violence, as by a blow on a remote part. See *Contra-fissura*.

Contrectation (*kon-trek-ta'-shun*) [*contrectatio*; *contrectare*, to touch]. Digital examination; palpation; touch; manipulation, as in massage.

Control (*kon-trōl'*) [*contra*, against; *rotula*, a roll]. An experiment performed to test the correctness of the results of another experiment; a standard by which to check observations and insure the validity of their results. Also, a synonym for *Control Animal*. **C. Animal.** See *C. Experiment*. **C. Experiment**, an

experiment carried out under normal or common circumstances or conditions, to serve as a standard whereby to test the variation or value of another experiment carried out under peculiar or abnormal circumstances. For instance, an animal is rendered immune by inoculation with some anti-specific agent. Such an animal is called the **Immune Animal.** Another animal, not having been previously rendered immune, is called the **Control Animal.** Both animals are then exposed to the action of, or are inoculated with, the specific virus in question, and the relative differences in the reaction of the two animals to the last inoculation or exposure constitute the conclusions of the experiment.

ontusion (*kon-tu'-zhun*) [*contusio; contundere*, to bruise]. A bruise or injury by a blunt weapon, or by collision, without breaking the skin or covering. **C.-pneumonia**, a form of pneumonia following traumatism. It is of frequent occurrence.

onus (*ko'-nus*) [κῶνος, a cone: *pl.*, *Coni*]. A crescentic patch of atrophic choroid tissue near the optic papilla in myopia. **C. arteriosus**, the conoid eminence of the right ventricle of the heart, whence arises the pulmonary artery. **C. medullaris**, the cone-like termination of the spinal cord, continuous as the *filum terminale*. Coni vasculosi, a series of conical masses that together form the globus major of the epididymis.

nvalescence (*kon-val-es'-ens*) [*convalescere*, to become well]. A term applied to the restoration to health after the subsidence of a disease or ailment.

nvalescent (*kon-val-es'-ent*) [*convalescere*, to become well]. 1. One recovering from a sickness. 2. Recovering from sickness.

nvallamarin (*kon-val-am'-ar-in*) [*convallis*, a valley; *amarus*, bitter], $C_{28}H_{44}O_{12}$. A bitter, crystalline whitish powder; a glucosid derived from *Convallaria*. It is a rather active poison. See *Convallaria majalis*.

nvallaria (*kon-val-a'-re-ah*) [*convallis*, a valley]. A genus of liliaceous plants. **C. majalis**, Lily of the valley. All parts of the plant are used in medicine. Its properties are due to *convallarin*, $C_{34}H_{62}O_{11}$, and *convallamarin*, $C_{28}H_{44}O_{12}$, glucosids. It is a prompt cathartic, diuretic, and cardiac stimulant, valuable as a heart-tonic. Unlike digitalis, it has no cumulative effect. **C., Ext.**, soluble in water. Dose gr. ij–x. **C., Ext., Fld.**, alcoholic. Dose ♏ ij–xj. **C. infusum**, prepared with three times its weight of water. Dose ʒss–ij. **Convallamarin**, or **Convallamarinum**, is soluble in water. Dose gr. ¼–ij. All unof.

Convallarin (*kon-val'-ar-in*) [*convallis*, a valley], $C_{62}H_{92}O_{11}$. A purging, crystalline glucosid derived from *Convallaria*.

Convallarrhetin (*kon-val-ar-e'-tin*) [*convallis*, a valley; ῥέω, resin], $C_{28}H_{52}O_6$. A poisonous resiniform substance obtainable from convallarin upon the separation of glucose from the latter.

Convection (*kon-vek'-shun*) [*convehere*, to carry together]. A transmission or carrying, as of heat or electricity. **C.-current**, a current of a liquid or gas created to a temperature above that of the surrounding medium; it rises to the surface because of its lighter density, and thus the entire fluid or gas acquires the same temperature.

Convergence (*kon-ver'-jens*) [*convergere*, to tend to a center]. Inclination or a direction toward a common point, center, or focus, as, *e.g.*, of the axes of vision on the near-point. **C.-theory**, a theory that accounts for the production of myopia by the pressure exerted by the external ocular muscles upon the eyeball in convergence, this pressure leading to distention of the eyeball.

Convergent (*kon-ver'-jent*) [*con*, together; *vergere*, to incline]. In biology, coming together. Tending to a common center. **C. Strabismus.** See *Strabismus.*

Convex (*kon-veks'*) [*convexus*, vaulted]. Rounded, as a swelling of a round or spheric form on the external surface; gibbous; opposed to concave.

Convexity (*kon-veks'-it-e*) [*convexus*, convex]. A surface rounding outward; the quality of being convex.

Convexo-concave and **Convexo-convex** (*kon-veks'-o-kon-kāv*, *kon-veks'-o-kon-veks*). See *Lens.*

Convolute (*kon'-vo-lūt*) or **Convoluted** (*kon'-vo-lu-ted*) [*convolutus*, rolled together]. Rolled together. **C. Bones.** See *Turbinated Bones.*

Convolution (*kon-vo-lu'-shun*) [*convolvere*, to roll together]. A folding and turning upon itself of any organ, as the cerebrum and the small intestines; any gyrus of the brain. A *Table of the Convolutions of the Cerebrum* is added. (See page 323.)

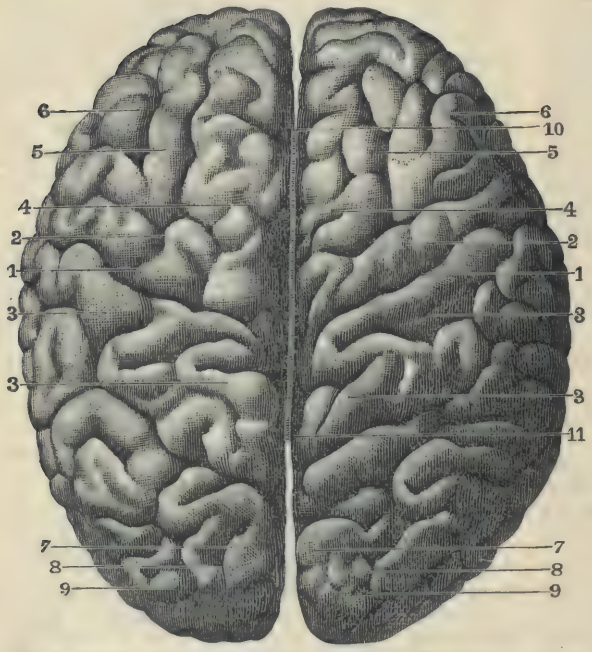
Convolvulin (*kon-vol'-vu-lin*) [*convolvere*, to roll together], $C_{31}H_{50}O_{16}$. A glucosid derived from the roots of Jalap (*Convolvulus purga*). It is a gummy mass, with active purgative properties.

Convolvulus (*kon-vol'-vu-lus*) [*convolvere*, to roll together]. A genus of plants. **C. panduratus**, wild potato. The tuber is a mild cathartic. Dose gr. xl. Unof. **C. purga.** See *Jalap.* **C. scammonia.** *Scammony.*

Convulsant (*kon-vul'-sant*) [*convellere*, *convulsum*, to pull together]. A medicine that causes convulsions.

Convulsion (*kon-vul'-shun*) [*convellere*, to convulse]. A general paroxysm of involuntary muscular contraction, whether tonic or (more especially) clonic. Loss of consciousness and voluntary control of the muscles, with clonic, tonic, or mixed contraction, etc. It may be due to epilepsy, other functional or organic disease of the brain, circulation, etc.; or may be cataleptic, hysteric, choreic, etc. See, also, *Epilepsy.* **C., Infantile**, due to a number of causes, such as rickets, exhaustion, etc.; sometimes called "screaming fits." **C., Puerperal.** See *Eclampsia.* **C., Salaam**, Eclampsia nutans, *q.v.* **C., Uremic**, due to the altered state of the blood in disease of the kidney.

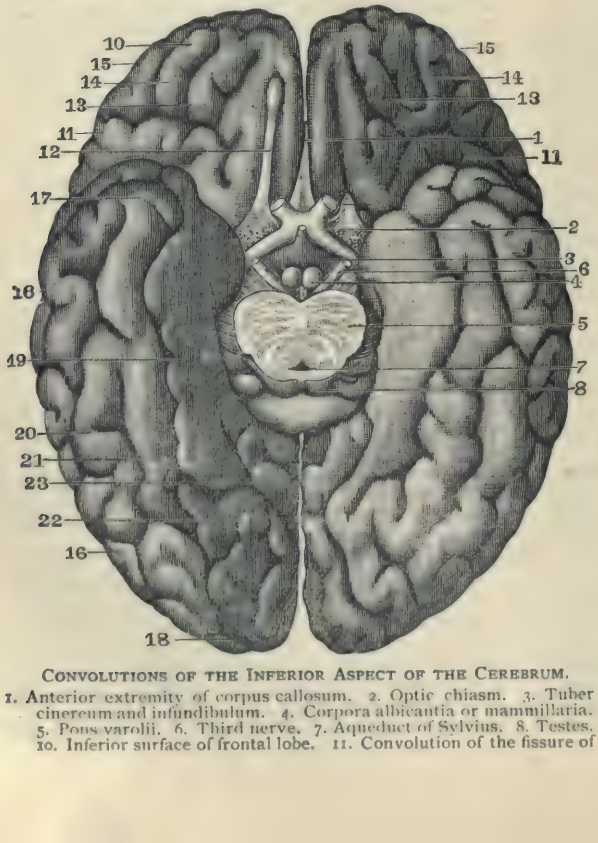
Convulsionary (*kon-vul'-shun-a-re*) [*convellere*, to convulse]. One who is subject to convulsions; especially one of a set of patients who are subject to epidemic or imitative convulsions.



Convulsivant (*con-vul'-siv-ant*) [*convellere*, to convulse]. An agent that causes convulsions.

Convulsive (*kon-vul'-siv*) [*convellere*, to convulse]. Marked by convulsions or spasms. **C. Cerebral Typhus.** See *Dubini's Disease.* **C. Cough.** See *Cynobex hebetis.* **C. Tic.** See *Habit-Spasm.* **C. Tremor.** See *Paramyoclonus.*

Conydrin (*ko-ni'-drin*). See *Conhydrin.*



Cook's (Alleyer) Hematoxylin Solution. A solution for staining microscopic sections. Extract of logwood 6 gm., alum 6 gm., cupric sulphate 1 gm., and water, 40 c. c. are rubbed up into a paste in a mortar. This is allowed to stand for two days, and then filtered, and a crystal of thymol is added to the filtrate for preserving. See *Stains, Table of.*

Cooper's (Sir Astley) Arsenious Ointment. An ointment composed of arsenious acid and sulphur, each one part, spermaceti cerate, eight parts. It has been used as a local application in skin-affections. **C. Fascia.** See *Scarpa's Fascia.* **C. Hernia.** See *Hernia*, and *Diseases, Table of.* **C. Irritable Breast.** Synonym of *Mastodynia.* **C. Irritable Testicle.** Synonym of *Orchialgia.* **C. Ligaments.** See *Ligaments.* **C. Method.** See *Treatment, Methods of.* **C. Operations.**

CONVOLUTIONS OF THE SUPERIOR ASPECT OR CONVEXITY OF THE CEREBRUM.

1, 1. Fissure of Rolando. 2, 2. Ascending frontal convolution. 3, 3. Ascending and superior parietal convolutions. 4, 4. First frontal convolution. 5, 5. Second frontal. 6, 6. Third frontal. 7, 7. First occipital. 8, 8. Second occipital. 9, 9. Third occipital. 10. Anterior extremity of corpus callosum. 11, 11. Posterior extremity.

CONVOLUTIONS OF THE INFERIOR ASPECT OF THE CEREBRUM.

1. Anterior extremity of corpus callosum. 2. Optic chiasm. 3. Tuber cinereum and infundibulum. 4. Corpora albicantia or mammillaria. 5. Pons varolii. 6. Third nerve. 7. Aqueduct of Sylvius. 8. Testes. 10. Inferior surface of frontal lobe. 11. Convolution of the fissure of Sylvius. 12. Olfactory nerve. 13. Third convolution of inferior surface of frontal lobe. 14. Fourth convolution. 15. Third convolution of external surface of frontal lobe. 16. External border of posterior lobe. 17. Sphenoidal extremity. 18. Occipital extremity. 19. Hippocampal convolution. 20. External convolution of posterior lobe. 21. Middle convolution. 22. Internal convolution. 23. Gyrus fornicatus.

See *Operations, Table of.* **C. Ventilator.** See *Ventilation.*

Coopers' Knee. An enlarged bursa patellæ found in coopers, as the result of pressure exerted by the knee against the barrel.

Coördination (*ko-or-din-a'-shun*) [*con*, together; *ordinare*, to regulate]. The harmonious activity and proper sequence of operation of the various organs of the body, especially of those parts that coöperate in the performance of any function.

Copaiba (*ko-pa'-e-bah*) [Sp.]. Balsam of Copaiba. The oleoresin of *Copaifera officinalis, C. coriacea, C. guianensis, C. multijuga, C. cordifolia, C. laxa, C. nitida, C. oblongifolia*, and *C. langsdorffii*; leguminous trees, native to South America. It is a stimulant, diuretic, diaphoretic, and an expectorant, and is much used in gonorrhea, although now considered of doubtful value. **C., Massa,** copaiba 94, magnesia 6 parts. Dose ♏x–ʒj. **C., Mist. Comp.,** Lafayette's mixture, unof., copaiba ʒvij, oil cubebs ʒj, glyceriti vitelli ʒvij; triturate and add syr. aq. menth. piperit. ℥iiss; then add, with constant stirring, liq. potass. ʒss, tinct. cardamon comp. ʒij, spt. æther. nitrosi, ʒss, aq. menth. piperit. q.s. to make ℥viij. Dose ʒj–ʒss. **C., Ol.** Dose ♏x–xv. **C., Resina,** mainly copaibic acid. Dose gr. j–v.

Copal (*ko'-pal*) [Mex., *copalli*, resins]. Anime. These terms include a number of related resins that are of both fossil and recent origin. The copal resins, when of good quality, are too hard to be scratched by the nail, have a conchoid fracture, and a specific gravity ranging from 1.059 to 1.080. Unlike others, they are soluble with difficulty in alcohol and essential oils, and are, therefore, valuable for making varnishes. The softer kinds are called *anime*.

Copalche (*ko-pal'-che*) [Mex.]. The bark of *Croton niveus* and other trees of tropical America. The term is a vague one, and is little used in medical literature.

Copalin, Copalm (*ko'-pal-in, ko'-palm*) [Mex., *copalli*, resins]. The sweet-gum tree, Liquidambar styraciflua; also the resin that in warm latitudes exudes from it, the so-called Highgate resin.

Copeman's Method. A method of overcoming the nausea and vomiting of pregnancy. It consists in digital dilatation of the cervix uteri to a slight degree, not sufficient to induce abortion.

Copernicia cerifera (*ko-per-nish'-e-ah ser-if'-er-ah*). See *Carnauba.*

Cophosis (*ko-fo'-sis*) [κωφός, deaf]. Deafness or dulness of hearing.
